Organic geochemical investigations of lunar rock samples based on analysis methods for carbonaceous meteorites and early Precambrian sedimentary rocks
20 p3476 A69-37616

Precambrian crustal geotectonic evidence of earth radius expansion based on dated orogenic fold belts distribution
22 p3936 A69-40182

Early Precambrian Onverwacht microstructures studied in petrographic thin sections and powdered preparations for possibility of oldest terrestrial fossils
24 p4263 A69-43221

PRECAUTIONS

U ACCIDENT PREVENTION

PRECESSION

NT LARMOR PRECESSION

Dynamically symmetric gyrostat steady motion stability in relation to satellite motion
01 p0163 A69-11301

Equivalence principle application to gyroscope motion in uniform gravitational field to obtain precessional angular velocity
05 p0764 A69-16367

Special and general relativity theories following Newtonian mechanics and gravitation theories, discussing metric tensor, sun oblateness and experiments with gyroscope spin axis precession
07 p1181 A69-18928

Biaxial gyro stabilizers mounting on rocking base, deriving expressions for constant components of stabilizer precession rate
09 p1498 A69-22112

Single axis gyro stabilizer stability analysis allowing for dry friction in precession axis, noting asymptotic tendency of motions toward steady rotation
09 p1502 A69-22701

Small angle precessional motion of axisymmetric spin stabilized bodies subject to disturbing moments
10 p1724 A69-22932

Hydropendulum bearing linear horizontal vibration effect on vortex vibration, analyzing zero initial phase using precession theory
10 p1697 A69-24086

Rotor shaft mounted on number of bearings and carrying masses and inertia angular precession and critical speeds, considering gyroscopic moments, rotary inertia and shear deformation
[ASME PAPER 69-VIBR-54]
10 p1805 A69-24154

Directional gyroscope accuracy increased by self adaptive systems, based on precession theory and drift amplitude dependence
11 p1881 A69-24559

Image motion trajectory in rotating angular mirror having converging reflections from two surfaces, using precession theory of gyroscopes
11 p1881 A69-24562

Helicoidal precession stability in sense of Liapunov, Poincare and Lagrange
12 p2130 A69-26286

Land gyrocompass on torsional suspensions in liquid filled chamber, considering design and operation in terms of precession theory
13 p2259 A69-27431

Instantaneous rotational impulse imparting steady motion of disk determined for coupled gyroscope
13 p2264 A69-28527

Circular membranes vibrational and stability characteristics under simultaneous constant spin and precessional motions, obtaining Hill equation for motion amplitude coefficients
13 p2370 A69-28665

Deep freezing of nuclear precession magnetometer elements for improving instrument characteristics
14 p2446 A69-29083

Earth quadrupole moment effects on precession of gyroscope in satellite in equatorial orbit
17 p2972 A69-33072

Boundary layer theory application to dynamics of gyroscope in gimbal suspension, defining nutational and precessional motion
18 p3135 A69-34559

Passive damper system for reducing precession in free symmetrical rotating space vehicle, noting linear torsional spring influence on precession decay
19 p3429 A69-35913

Coordinate transformation of Euler equations governing precession and nutation of self gravitating bodies of viscous fluid in inertial coordinates
21 p3797 A69-38539

Eulerian equations for precession and nutation of self gravitating fluid globes of arbitrary structures in inertial coordinates, discussing coplanar case, tidal breathing, etc
22 p4030 A69-40904

Autometric gyro for satellite general relativity experiments, particularly earth orbit measurement of Lense-Thirring precession
23 p4162 A69-41543

PRECIOUS METALS

U NOBLE METALS

PRECIPITATION [CHEMISTRY]

Grain boundary interaction energy with inclusion of second phase, describing equilibrium and boundary shape
03 p0449 A69-13880

Nodal precipitation and cellular solidification substructure in commercial purity nickel, discussing supercooling, NiO and eutectic composition
08 p1332 A69-20289

Carbide precipitation in stainless steels using metal foil and extraction replicas, discussing grain boundaries corrosion relation
10 p1713 A69-23820

Anodic stain etching technique for carbide precipitates of niobium-base alloy Cb 132, noting X ray diffraction
13 p2282 A69-28162

N precipitation kinetics in deformed Nb, finding constant in rate equation dependent on temperature and correlated to precipitates nature
15 p2639 A69-30585

Nb supersaturated solid solution in Co precipitation mechanism analyzed by X rays and electron microscope, noting diffusive scattering effects
21 p3750 A69-39788

PRECIPITATION [METEOROLOGY]

NT DEW

NT HAIL

NT RAIN

NT SNOW

Radar method of spiral scanning clouds and precipitation at constant altitude
03 p0459 A69-13286

Numerical radar information charts, plotting radio echo reflection boundaries from cloud and precipitation observations by weather radars
03 p0459 A69-13287

Quantitative estimations of cloud and precipitation by radar meteorology, assuming homogeneous reflectivity distribution of clouds
04 p0626 A69-14507

Microwave absorption and scattering by atmospheric precipitation as function of temperature and water droplet size
06 p0954 A69-17997

Radio wave brightness temperatures and contrast characteristics in presence of clouds and precipitation
06 p0954 A69-17999

Cometary, lunar and solar effects on precipitation, considering joint influence of meteoric streams and moon
11 p1965 A69-25420

Statistical rules for seasonal forecasts based on temperature and precipitation deviations analysis in long term climatological records, considering sunspot cycle role
12 p2125 A69-25895

Atmospheric models for electromagnetic scattering of monochromatic IR and microwave radiation by natural suspensions as hazes clouds and precipitation
12 p2030 A69-26467

Dimensions, concentration and spectrum of large precipitation particles in clouds and cloud water content by measuring reflectivity and absorptivity at different wavelength
16 p2807 A69-32268

Amplitude distribution and correlation functions of signals reflected from precipitations at various polarizations of waves emitted and received
16 p2807 A69-32269

Horizontal wind pulsations in precipitations obtained from pulsed Doppler radar data, including degree of turbulent flow anisotropy
16 p2807 A69-32271

Vertical wind velocity pulsations in precipitation and passage through subfrontal clouds measured by pulse radar
16 p2807 A69-32272

MRL-1 meteorological radar station detection of cloud types under steady rain, showers and storm conditions, describing radar data analysis procedure
16 p2808 A69-32278

Wind velocity and precipitation particle terminal fallspeeds component determination from continuity equation for data collected by Doppler radar
17 p2919 A69-33162

Air motion and precipitation patterns in travelling wave depression, considering Doppler radar data, rainfall rates, orographic influences, etc
18 p3166 A69-34419

Precipitation zone-cloud mass correlation based on Tiros cloud photographs, synoptic charts and weather maps for European U.S.S.R.
19 p3366 A69-36671

Cloud physics problems of precipitation release from interaction of air motions and microphysical events, discussing raindrop growth initiation, artificial cloud modification, etc
20 p3572 A69-37906

Doppler radar observations of precipitation induced mesoscale wind oscillations near melting layer produced by pressure perturbations due to horizontal variations in cooling
20 p3572 A69-37909

Meteor shower effects on rainfall, noting anomalous radar meteor influx increase and subsequent subnormal precipitation
20 p3609 A69-38062

Radar signal reflectivity and precipitation relationship revised on basis of radio signal damping for improved measurement accuracy
23 p4185 A69-42494

Precipitation physics, discussing cloud structure on mountains and in free atmosphere, precipitation measurement on ground, raindrop size distribution, etc
24 p4343 A69-43037

PRECIPITATION HARDENING

Nichrome bars production dispersion hardened by alumina and zirconia inclusions, noting extrusion temperature influence
01 p0085 A69-10397

Nb-W alloy solution hardening and deformation, noting flow stress dependence on strain rate and temperature plus activation energy of deformation
01 p0095 A69-10488

Precipitation hardening of gamma phase in austenitic stainless steels studied for phase transformations by dilatometry after aging and quenching
01 p0096 A69-10613

Aging and cold work hardening effect on deformability of aluminum-magnesium-silicon-copper alloy
02 p0254 A69-12677

Dispersed hard particles effect on high strain fatigue behavior of nickel at room temperature
03 p0443 A69-13121

Heavy titanium carbide precipitation on fatigue slip zones of stainless steel, noting rupture produced crystallographic facets
03 p0447 A69-13605

Al/Zn/Mg alloys preprecipitation, discussing Guinier-Preston and critical zone sizes and reversible vacancy trap
03 p0447 A69-13613

Second phase hardened materials recovery creep rate model, showing dependence on stress level
03 p0447 A69-13615

Impurity-dislocation interaction in Al alloy by vacancy mechanism and repeated yielding phenomenon, establishing activation energy
04 p0613 A69-14440

Properties of Ni-Mo-Al age hardening steels, discussing data confirming validity of low carbon low aluminum approach
04 p0613 A69-14527

Aging of iron-nickel-titanium alloys during heating in reverse martensitic alpha to gamma transformation process, investigating phase parameter changes
04 p0613 A69-14558

Al-Mg-Si alloy strain aging, noting effect of deformation stresses on kinetics and aging mechanism for prior and concurrent deformation
04 p0614 A69-14575

Precipitation hardening effects on Al-Zr recrystallization with Fe and Si additions, noting peak hardness increment with decrease in aging temperature

04 p0617 A69-14931

Work hardening in quenched fully hardened and overaged Mg-Mn alloy single crystals as function of temperature and strain rate

05 p0778 A69-15757

Low carbon maraging steel, studying age hardening behavior of iron-manganese-nickel alloys with titanium additions

05 p0781 A69-16541

Sintered W-Ni-Fe alloys strength and precipitation hardening characteristics for various compositions and cooling conditions

05 p0782 A69-16798

Precipitation hardening stainless steels, discussing corrosion resistance, high strength, weldability, fabricability, heat treatment, etc

06 p0932 A69-17874

Plastic deformation of internally oxidized dispersion strengthened silver magnesium alloys, noting hardening effect dependence on oxidation temperature

07 p1159 A69-18627

Plastic fractures of age hardened aluminum alloys analyzed by tensile tests and electron fractography, considering stresses, surface and intergranular effects

07 p1166 A69-18961

Polycrystalline Mg-Th-Zr alloy precipitation hardening investigated by tensile and hardness tests and transmission electron microscopy

07 p1167 A69-19265

Edge dislocations effect in perpendicular slip planes on work hardening and strain aging, calculating dilatation centers absorbed

07 p1238 A69-19695

Solution annealing and aging time and temperature effects on precipitation in quenched and aged beryllium

08 p1330 A69-20008

Weldability of precipitation-hardening stainless steels by gas tungsten arc process, discussing microstructure and shrinkage stress cracking

08 p1320 A69-20409

Dislocations effect on intermediate body centered tetragonal phase precipitation in Fe-Ni-Cr-Be alloy using transmission electron microscopy

08 p1333 A69-20447

Monograph on precipitation hardening and mechanical properties of various heat resistant alloys with Co contents to 35 percent

08 p1334 A69-20763

Crystal lattice and orientation of precipitate responsible for hardening water quenched Ni-Cr-Nb alloy

08 p1334 A69-20852

Wrought superalloys fusion welding behavior, discussing hot cracking, hot microfissuring and strain age cracking [SAE PAPER 690102]

09 p1503 A69-21558

Alloying elements effects on structure, mechanical properties, aging and composition of precipitation hardening intermetallic phases in Ni and Fe based alloys

09 p1525 A69-22143

High temperature metallic material strengthening methods, noting metallurgical factors and temperature effects on mechanical properties

10 p1712 A69-23630

Silicon particle sizes in Al-Si system investigated for interactions with dislocations as function of strain and for effect in dispersion hardening

10 p1714 A69-23980

Monograph on effect of nitrogen on precipitation behavior of austenitic chromium-nickel steel covering carbides, intermetallics, phase transportations, corrosion resistance, etc

11 p1902 A69-24369

Preliminary natural aging effects on maximum strength properties obtained at various artificial aging temperatures for aluminum ternary alloy

11 p1905 A69-24921

Highly alloyed steels weldability, considering nickel maraging and precipitation hardening stainless steels

12 p2111 A69-25829

Precipitated phase composition and structure of Co-Ti solid solution during aging

12 p2112 A69-26037

Intermetallic compound precipitation effects on mechanical properties of Fe-Mo alloy at high temperatures

12 p2116 A69-26925

Dynamic strain aging of Fe-Cr-C and Fe-Mo-C steels, analyzing strength, ductility and secondary

hardening by using microprobes, foils diffraction and extraction replicas

13 p2276 A69-27403

Quantitative separation of elements in gamma prime from precipitation hardened high temperature nickel-base alloys by anodic dissolution

13 p2277 A69-27408

Plasma spray quenched Al-V alloys resulting in dispersion strengthening of material

13 p2277 A69-27409

Precipitation influence on martensite formation kinetics and structure of Fe-Ni-Ti alloys

13 p2279 A69-27765

Dispersion-strengthened alloys from extraction replicas, determining volume fraction and spacing of dispersed phase particles

13 p2282 A69-28167

Ni alloys phase precipitation and Fe substitution effects on heat resistant alloys

13 p2283 A69-28488

Grain size and deformation velocities effects on plasticity of dispersion hardened alloy

13 p2283 A69-28489

Time and temperature effects on corrosion and structure of Hastelloy alloy C-276

14 p2466 A69-29930

Maraging steel weldability, discussing residual stresses, hydrogen cold cracking, age hardening and hot cracking

15 p2617 A69-30098

Strain aging of polycrystalline Nb containing interstitial impurities as function of temperature, discussing interstitials role in recovery substages

15 p2636 A69-30194

Al-Mg-Si alloy strain aging, noting effect of deformation stresses on kinetics and aging mechanism for prior and concurrent deformation

15 p2638 A69-30276

Discontinuous yielding characteristics of 2024 Al alloy determined for different conditions of solution, heat treatment and age hardening

15 p2639 A69-30598

Maximum strengthening due to second phase precipitation within operating temperatures maintainable to 20 hr during aging of Nb-Hf-O and Nb-Zr-O alloys

15 p2640 A69-30632

Trace elements influence on precipitation process and properties of Al-Cu, Al-Zn-Mg and Al-Mg alloys, using X ray diffraction

16 p2801 A69-31783

Precipitation processes and effect on properties of Cr-Ni-W-Ti heat resistant austenitic steel, using electron diffraction and transmission electron microscopy

17 p2984 A69-32833

Preliminary plastic deformations effect on dispersion hardened nimonic-80 alloy creep properties

18 p3159 A69-35446

Adhesive bonding of Al sheets for honeycomb sandwich material, using electrical conductivity to measure sheets age hardening progress during high temperature curing

19 p3321 A69-35565

Ti transition metals alloys omega phase precipitation, discussing composition, morphology, coherency, formation, etc

19 p3344 A69-35928

Precipitation hardening, microstructure and dislocation influence on intergranular stress corrosion cracking (SCC) of high strength Al alloys examined by transmission electron microscopy

19 p3351 A69-36898

Supersaturated solid solution decomposition in Ni-Cr-Ti system, discussing precipitation mechanism of eta phase

20 p3558 A69-36968

Precipitation hardening stainless steels applications in aerospace industry, discussing steel selection and heat treatment

20 p3563 A69-37931

Age hardening response of Mg-Th-Zr alloy at 60-450 C, discussing peak strengthening, superlattice formation, precipitation processes, etc

21 p3743 A69-38735

Composition and thermal treatment effects on weldability of precipitation hardened Ni base alloy, analyzing heat affected zone cracking sensitivity

22 p3968 A69-39885

Recovery process observation in pure binary Al-Cu alloy and commercial Al-Cu-Mg-Pb alloy, noting electron microscope applicability

22 p3968 A69-40062

Alloy Inconel 625 precipitation behavior and effect on short and long term properties, discussing tetragonal phase segregate and creep strength

22 p3971 A69-40802

Solid solutions precipitation effect during deformation process on static and dynamic tensile tests of Al alloy by electric resistance measurement

22 p3972 A69-41082

Al-Ni-Co alloys precipitation mechanism effect on magnetic properties, including heat treatment and Ti alloying effects

23 p4175 A69-41298

Ni based superalloy mechanical properties, determining chromium carbide discontinuous precipitation effects at various temperatures

23 p4176 A69-41507

Coherent matrix precipitates observation in Fe-Ni-Cr alloy by transmission electron microscopy, discussing yield strength and elongation dependence on aging conditions

23 p4176 A69-41508

PRECIPITATION PARTICLE MEASUREMENT

Radar calibration and precipitation measurements equation taking Gaussian approximation for antenna radiation pattern

16 p2806 A69-32264

Precipitation intensity measurements, obtaining distribution parameters from radar reflectivity at two wavelengths and microwave attenuation factor at third wavelength

16 p2806 A69-32265

Range effects on apparent height and frequency biases of radar precipitation echoes determined by regression technique for several stations

18 p3101 A69-34826

Waves in auroral ionosphere due to particle precipitation, indicating ionospheric plasma instabilities

18 p3130 A69-35187

Millimeter wave pseudorandom coded CW meteorological radar for precipitation drop size spectrum analysis and cloud studies, discussing overall system design

23 p4115 A69-41531

Precipitation physics, discussing cloud structure on mountains and in free atmosphere, precipitation measurement on ground, raindrop size distribution, etc

24 p4343 A69-43037

PRECIPITATORS

U ELECTROSTATIC PRECIPITATORS

PREDICTIONING

Semiconductor impressed voltage preconditioning, considering problems involving surface properties

16 p2758 A69-31713

PREDICTIONS

NT LINEAR PREDICTION

NT PERFORMANCE PREDICTION

Optimal predictor design by comparison of statistical input models, measuring signal filter performance by root-mean-squared errors

01 p0043 A69-10558

Adaptive compression system for predicting and encoding video data for transmission in noiseless channel

03 p0427 A69-12869

Distribution function of multiple correlation coefficient for various sampling volumes and various numbers of predictors calculated using Fisher formula

13 p2293 A69-27843

Predictability of deterministic fluid systems with many scales of motion using vorticity equation for two dimensional incompressible flow, noting application to earth atmosphere

19 p3303 A69-36404

Controlled-variable prediction display based on Taylor series computation, describing acceleration system simulator and human operator performance

19 p3313 A69-36414

Adaptive predicting filter mathematical model based on information probability, using adaptive systems latent memory

19 p3287 A69-36665

Biological responses to weightlessness prediction, considering gravity perception mechanisms, cellular metabolism, etc

21 p3656 A69-38921

Interference prediction models of equipment emissions and susceptibility thresholds based on limited spectrum signature data

23 p4126 A69-42223

PRESSURE CHAMBERS

NT VACUUM CHAMBERS

Reinforced thin walled cylindrical pressure body nonlinear circumferential stress problem approximate solution, noting fatigue strength of aircraft pressurized cabins 04 p0548 A69-14838

Rectangular shock tube for use with pressure and vacuum, discussing sealing of circular end flanges to buildup tube 06 p0906 A69-16928

Device for producing high current high pressure arc discharge using water cooled chamber and Be bronze electrodes 09 p1547 A69-21593

Discharge rates of metabolic products in men confined in pressure chamber wearing airtight suits and gas masks 10 p1646 A69-23508

Prestressed ceramic driver chamber energy efficiency for arc driven shock tube by pressure measurements with piezoelectric probe 18 p3116 A69-34456

EEG monitoring during decompression illness /bends/ treatment by hyperbaric procedure using small multichannel telemetry pack 19 p3261 A69-36268

Bubble oscillations in water filled pressure chamber with alternating pressure generated by piston, measuring temporal development 19 p3302 A69-36871

Portable multiunit low pressure chamber with locks, permitting water replenishment, feeding of animals under continuous pressure and gas mixtures 22 p3891 A69-40217

EKG, EEG, pneumograms and X ray pictures showed no pathological effect after prolonged confinement in sealed chamber having artificial atmosphere with variable gas composition 22 p3892 A69-40284

PRESSURE COEFFICIENT

U AERODYNAMIC COEFFICIENTS

PRESSURE DISTRIBUTION

Static pressure field induced by steady subsonic flow of compressible inviscid fluid through two dimensional duct with statistically distributed wall roughness 01 p0062 A69-11279

Polygonal wing planform pressure distribution in incompressible flow calculated on basis of lifting surface theory 01 p0008 A69-11298

Pressure and shock shape determination for plane supersonic and low hypersonic flows past aerodynamic profiles 01 p0008 A69-11299

Turbulent boundary layer growth, pressure distributions and surface shear stresses on yawed semicircle cone [AIAA PAPER 68-98] 02 p0190 A69-12526

Unsteady pressure field in zone of aerodynamic proximity of free moving airscrew investigated with propeller blades replaced by surface singularities 02 p0192 A69-12827

Plane supersonic base flows studied using integral analysis of turbulent reattachment, noting prediction of wall pressure distribution 03 p0361 A69-12990

Pressure distribution at wedge wall during instantaneous small variation of supersonic motion 03 p0364 A69-13662

Rayleigh step journal bearings, considering pressure distribution, load capacity and attitude angle and optimal film thickness ratio for incompressible fluid lubrication 04 p0605 A69-14587

Shoulder pressure on slender cone/afterbody combinations in hypersonic inviscid flow of perfect gas 04 p0542 A69-14735

Axially symmetric bodies shape for static pressure at location independent of Mach number 04 p0542 A69-14738

Rotating spectral and spatial sound pressure distribution in propeller duct calculated on basis of propulsion quantities, noting effect of tip clearance 04 p0544 A69-14867

Mean meridional pressure profiles and atmospheric mass readjustment time dependence for initially at rest atmosphere with mean baroclinity, using frozen gradient model 04 p0627 A69-15086

Laminar compressible viscous boundary layer with arbitrary external pressure distribution, using implicit multiplace difference method 04 p0591 A69-15294

Local pressure and skin friction distribution around circular cylinder in cross flow in large range of Reynolds numbers 05 p0744 A69-15716

Weak shock wave diffraction at two dimensional obstacles, discussing time behavior of pressure distribution 05 p0746 A69-16018

Pressure distribution across short vortex chamber to exit radius with known inlet geometry based on incompressible flow model and visualization photographs [ASME PAPER 68-WA/FE-17] 05 p0748 A69-16093

Static pressures, profiles of local longitudinal velocity, fluctuating wall pressures and power spectra of wall pressures measured for subsonic turbulent flow [ASME PAPER 68-WA/FE-36] 05 p0750 A69-16109

Fixed point support properties of quasi-vertical peripheral jet hovercraft with two pressure stages 06 p0857 A69-16820

Visual investigation of flow field at swept wing, measuring pressure distribution at stall fence and vortices formation 06 p0858 A69-17341

Geometry changes influence on rigid plastic circular plate behavior under two independent distributed pressures 06 p1023 A69-17508

Pressure distribution, heat transfer rates and shear stresses in laminar boundary layer of supersonic viscous flow incident on corner point of body
06 p0861 A69-17641

Injector vaporizer performance in liquid metal MHD system, using model for total and static pressure distribution
06 p0871 A69-17918

Lower atmosphere pressure field determination based on meteorological satellite observations of amount and types of clouds and upper boundary altitude
06 p0952 A69-17987

Three dimensional compression problem for two elastic bodies in contact, determining contact pressure distribution by iteration procedure on computer
06 p1026 A69-18014

Pressure distribution determined from laminar viscous-inviscid interactions in supersonic flow, including flows with heat transfer
[AIAA PAPER 69-7] 06 p0913 A69-18095

Underexpanded nozzle ejected supersonic turbulent jet off-design behavior, discussing static pressure distribution, boundary layer and Mach number effect
07 p1049 A69-18397

Pressure distribution on star-shaped bodies in wind tunnel at Mach 4 and Reynolds number .000006
07 p1050 A69-18703

Gas pressure control in xenon lasers, using variable temperature surface partially insulated from liquid nitrogen coolant
07 p1155 A69-19090

Compressibility parameters role in pressure distribution derived for radial laminar compressible fluid flow between two disks
07 p1121 A69-19321

Shallow spherical shells equilibrium under uniformly distributed internal pressure, analyzing nonlinear boundary value problems by algorithm
07 p1237 A69-19685

Supersonic flows past slender bodies, calculating pressure by means of moving singularities
08 p1252 A69-20721

Boundary value problem for linearized system of Navier-Stokes equations in three dimensional space, determining velocity vector and pressure
08 p1344 A69-21156

Hall effect and mass flow influence on MPD arc jet radial pressure profile calculated as function of pressure and magnetic field
[AIAA PAPER 69-246] 09 p1562 A69-21226

Pressure distribution in propagating current sheet structure in dynamic Z pinch discharge in argon, evaluating particle density, velocity and temperature profiles
[AIAA PAPER 69-264] 09 p1564 A69-21243

Magnetic pinch effect in thermal RF induction plasma in argon, developing theory for calculating excess magnetic pressure
09 p1544 A69-21341

Cross-spectral density of pressure induced on lifting surface by isotropic atmospheric turbulence, solving integral equation
[ONERA-TP-681] 09 p1613 A69-21689

Lifting pressure distributions on oscillating surfaces in subsonic flows using doublet lattice method for various surface geometries
[AIAA PAPER 68-73] 09 p1430 A69-21946

Sonic boom reduction by azimuthal redistribution of supersonic aircraft pressure field variation
[AIAA PAPER 68-159] 09 p1434 A69-21948

Hypersonic slipper bearing problem in rocket boosted sleds, discussing flow model consisting of laminar stagnation region and boundary layers
[AIAA PAPER 68-736] 09 p1477 A69-22003

Base pressure fluctuations behind cone in supersonic gas flow, noting complicated superposition of harmonics associated with various factors
09 p1431 A69-22237

Fuel control systems using emulsified fuel, noting exposure effects and temperature and pressure characteristics
[ASME PAPER 69-GT-40] 09 p1571 A69-22486

Acoustic waves pressure field micropulsations in turbulent fluid, analyzing space-time spectrum
09 p1492 A69-22710

Pressure coefficients determination on slender body surface to estimate effects of quadratic terms, considering body of revolution with thin cruciform lifting surfaces
10 p1632 A69-22911

Interfacial pressure distribution during slip damping in clamped rectangular beams subjected to vibration
10 p1800 A69-23350

Invariant finite amplitude spherical shock wave propagation in medium with inversely radial density
10 p1778 A69-23405

Integral representation for velocity and pressure fields produced by horizontal motion of two dimensional bodies below or on free surface of viscous liquid
11 p1866 A69-24278

Characteristics method for solution of differential equations representing time changes of wind and pressure fields in divergent barotropic channel flow
11 p1911 A69-24585

Nonlinear partial differential equations for solution of steady stratified flows, noting hydrostatic pressure distribution and horizontal and vertical scales
11 p1869 A69-24889

Three dimensional theory of elasticity for finite hollow cylinder under axisymmetric deformation, considering stress and pressure distribution over surface
11 p1983 A69-25022

Pressure distribution measurement over sphere with cylindrical afterbody in magnetofluid dynamic flow, showing drag decrease at large magnetic field
11 p1873 A69-25136

Radial hydrostatic bearing parameters calculated by pressure distribution diagram in bipolar coordinates, obtaining equations of motion
11 p1892 A69-25341

Skin friction coefficient relation to pressure distribution in turbulent flow and development of momentum thickness along flow
11 p1819 A69-25385

Low power gradient uniform electric arc column in cross flow and transverse magnetic field, analyzing temperature, velocity, pressure and magnetic field distribution
11 p1933 A69-25556

Density stratified model of troposphere and constant gravity field for ground level pressure perturbations in mesoscale region
12 p2126 A69-26016

Inertia effect on incompressible fluid film pressure between two oscillating parallel plates, considering Reynolds number
12 p2102 A69-26241

Transverse symmetrical vibrations of thin elastic plates under Jacobi pressure distribution, giving displacement and velocity plots
12 p2180 A69-26271

Pressure distribution in finite width high speed self acting gas lubricated slider and partial arc bearings, noting trailing edge conditions and side leakage effects
[ASME PAPER 68-LUBS-15] 13 p2265 A69-27268

Pressure distribution in viscous flow between parallel disks with sinusoidal oscillation, noting effects of oscillation amplitude and vibrating disk velocity
[ASME PAPER 68-LUBS-1] 13 p2244 A69-27278

Flow models for externally pressurized gas bearings, discussing pressure distributions, load capacity and flow rate
[ASME PAPER 68-LUBS-2] 13 p2267 A69-27285

Nonuniform flowfield from supersonic penetration of plane shock by three dimensional pointed planar wing, using integral transform method to study field perturbation pressure
13 p2199 A69-27323

Suction effects on shockwave-turbulent boundary layer interactions at compression corner leading to reductions in upstream influence
13 p2244 A69-27326

Flux, density and pressure variations with position in vacuum system /nonuniform gas distribution/, discussing causes and consequences
13 p2299 A69-28019

Experimental and predicted shock axial pressure variations for semifinite metallic targets during high velocity impact, using Al alloys and Cu
[AIAA PAPER 69-361] 13 p2366 A69-28294

Boundary conditions for equilibrium diamagnetic plasma in magnetic dipole having constant and isotropic pressure in system
14 p2489 A69-28910

Neutral gas pressure in positive column plasma between two coaxial insulated cylinders as function of cylinders radii
14 p2490 A69-29036

High pressure Cs thermionic converter with cold region, measuring Cs partial pressure distribution in Ar filled tube
14 p2397 A69-29176

Time dependent evolution of probability pressure distribution maximum obtained from Liouville equation
14 p2472 A69-29406

Normalized correlation functions of dispersion values for pressure fields and geopotential obtained by low latitude stations, noting wind field features
14 p2478 A69-29833

Longitudinal pressure distribution in MHD channel with electrodes parallel to applied transverse magnetic field
14 p2501 A69-29918

Aircraft created pressure patterns responsible for sonic boom, discussing design techniques for noise reduction
15 p2550 A69-30369

Incompressible two dimensional turbulent boundary layer equations with arbitrary pressure distribution solved by weighted residual method
[AIAA PAPER 69-397] 15 p2591 A69-30478

Flow and pressure fields for spiral grooved pumping seal with specified groove dimensions and Reynolds number
[ASLE FICFS PREPRINT 30] 15 p2619 A69-30481

Mach numbers effect on pressure distribution and friction moment in nonisothermal layer of gas lubricant, using power series
15 p2629 A69-31021

Static pressure distribution induced by statistically roughened duct walls on supersonic stream
15 p2593 A69-31148

Boundary value problem for linearized system of Navier-Stokes equations in three dimensional space, determining velocity vector and pressure
15 p2645 A69-31249

Atmospheric models for pressure variation and neutral air winds in thermosphere, discussing wind velocity vector relation to satellites orbital inclination
15 p2603 A69-31403

Pressure distribution in wake produced by obstacle with secondary fluids injection into boundary layer, obtaining coefficient governing resistance of obstacle to forward motion
16 p2768 A69-31604

Double shock method for detecting pressure limits in magnetic phase transition of solids
16 p2825 A69-31696

Trailing shock wave position in air breathing jet engine channels, determining supersonic-subsonic boundary, noting Mach number effects on pressure ratio
16 p2768 A69-31743

Ablation injectants effect on supersonic stream pressure distribution inside cavity and upstream boundary layer velocity profiles
16 p2770 A69-31902

Acoustic waves pressure field micropulsations in turbulent fluid, analyzing space-time spectrum
16 p2782 A69-32489

Velocity and static pressure redistribution in distorted flow field upstream of axial flow compressors
[AIAA PAPER 69-485] 16 p2842 A69-32694

Turbulent base flowfields in multinozzle configurations, considering adiabatic flow and determining base pressure distribution from reverse jet impingement
[AIAA PAPER 69-570] 16 p2733 A69-32751

Impingement pressure analysis associated with two phase cryogenic propellant venting to space environment
[AIAA PAPER 69-571] 16 p2869 A69-32753

Monograph on determination of unsteady pressure field of freely rotating propeller covering blades, displacement and lift effects, distribution functions, etc
17 p2889 A69-32994

Linear aerospace structures vibrations in randomly distributed pressure field forecasted by applying Green function
[ONERA-TP-703] 17 p3054 A69-33064

Nonaxisymmetric stability loss /buckling/ of closed toroidal shell of circular cross section under uniformly distributed external pressure, considering Volmir linear theory
17 p3055 A69-33130

Bag type deformation of incompressible viscous convective and nonevaporating droplets immersed in Stokes or potential flow pressure distributions, including Weber number
[AIAA PAPER 69-669] 17 p2954 A69-33456

Flow field pressure distribution due to plane shock wave impinging by thin wing moving in opposite direction, discussing mathematical formulation, analytic solution and applications
[AIAA PAPER 69-647] 17 p2891 A69-33459

Surface pressure and heat transfer over blunt conical body in hypersonic flow with uniform mass addition of various gases
[AIAA PAPER 69-716] 17 p2891 A69-33463

Pressure distribution in self acting hydrodynamic journal bearings without end leakage, presenting closed form solution for nonhomogeneous Reynolds equation with turbulence considerations 18 p3139 A69-34270

Static and impact pressure distributions for Mach number and velocity profiles of supersonic to subsonic flow transition in tube at low Reynolds numbers
[ASME PAPER 69-APM-23] 18 p3120 A69-34397

Optimum pressure distribution and airfoil profiles for maximum lift without separation in incompressible flow determined by second order theory
[AIAA PAPER 69-739] 18 p3083 A69-34401

Pressure distribution in two dimensional incompressible potential flow on Joukowski airfoils with normal upper surface spoilers, emphasizing potential flow theory
[AIAA PAPER 69-737] 18 p3083 A69-34402

Method of characteristics for computing supersonic jets and wakes with given boundary pressure distribution
[ONERA-TP-721] 18 p3121 A69-34636

Objective analysis of pressure trend fields and surface pressure retaining field with scale of 100 km, using filtering procedure 18 p3166 A69-34816

Dynamic instability regions of parametric resonance of cylindrical shells with curved generating lines under axial and radial pressure 18 p3223 A69-34979

Stress-strain state calculations of ribs reinforcing cantilever shell under external pressure, using differential-difference equations 18 p3223 A69-34980

Subsonic and supersonic turbulent air jets expansion over perpendicularly positioned plane disk obstacle, deriving equations for pressure distribution and stagnation temperature 18 p3123 A69-34990

Forced pressure fluctuations in hydraulic systems of aircraft fuselages and engines, taking into account square law of losses at resistance points 18 p3094 A69-34991

Pressure distribution over lining of brake shoe for brake drums design, discussing pressure compensation after wear 18 p3149 A69-35287

Asymptotic theory of pressure on cylindrical shell subjected to unsteady oscillations in external and internal linearized supersonic flow using Laplace and Fourier transforms 18 p3089 A69-35461

Velocities and pressure in twisted jet in unbounded space containing same fluid as jet 19 p3298 A69-36388

Interaction effects between mixing and pressure distribution of heterogeneous flow in channel, deriving criteria for predicting pressure variation sign 19 p3300 A69-36785

Pressure increment due to inertia of rotating fluid film at journal bearing periphery theoretically estimated and measured 20 p3548 A69-37085

Supersonic inviscid flow past wing-body configuration, determining pressure distribution 20 p3458 A69-37099

Conical delta wings in supersonic-moderate hypersonic flow, studying yaw effects on pressure distribution behind shock wave 20 p3459 A69-37593

Sunspot spectra near solar limb for difference between Fraunhofer line continuum and line core formation levels, finding geometrical height scale and pressure equilibrium 22 p4019 A69-40292

STOL scaplane bottom pressure distribution from tests on scale model of PX-S scaplane, discussing boundary layer control effects 22 p3864 A69-40586

Space-time behavior of random pressure field of turbulent boundary layer on plane plate surface 22 p3933 A69-41027

Pressure distribution in gas lubrication layer of infinite radial sliding bearings, approximating differential equation by simple formulas 23 p4168 A69-41412

Mars light polarization observations noting unsatisfactory surface pressure determinations 23 p4212 A69-41615

Inviscid transonic flow past circular arc bodies of revolution, applying Hosokawa technique to pressure distribution solution 23 p4059 A69-41899

Radial pressure distribution in steady state rotationally symmetrical plasma jet subjected to axial magnetic field, emphasizing mass entrainment effect [DGLR-69-024A] 23 p4202 A69-41924

Digital simulation of oxygen pressure fields and supply conditions in biological tissues 23 p4097 A69-42098

Surface pressure field forecast by meteorological fields expansion into orthogonal components, estimating number of predictors in regression equation 23 p4184 A69-42491

Fluid flow around sphere at high Reynolds number by measuring pressure distribution, considering boundary layer separation, tunnel blockage, etc
[ASME PAPER 69-APMW-26] 24 p4245 A69-43093

Equator-to-pole temperature gradient relation with planetary pressure belts, comparing observational data with theoretical circulation criterion 24 p4345 A69-43149

Northern Hemisphere 500-mb height pattern series expansion, using optimal sets of orthonormal functions, obtaining rms error 24 p4346 A69-43157

Velocity and pressure fields produced by deformable load carrying filament studied for unsteady gas motion past slender body with nonpotential external forces 24 p4246 A69-43483

Gas phase self induced pressure field and laminar velocity distribution of working fluid within closed heat pipe channels analyzed by momentum integral method [ASME PAPER 69-HT-22] 24 p4412 A69-43546

Supersonic viscous flow around sharp corner at various expansion angles, giving pressure distributions and velocity profiles role [ASME PAPER 69-HT-14] 24 p4247 A69-43555

Irregular pressure profiles and pressure-time histories when using octofluorocyclobutane and sulfur hexafluoride in explosive driven shock tube [AIAA PAPER 68-730] 24 p4297 A69-43577

Mean velocity and pressure fields in turbulent boundary layer on flat plate at Mach 2 investigated for ratios of mass flow [AIAA PAPER 68-129] 24 p4304 A69-43581

Acrodynamic forces on hypersonic vehicle surfaces, deriving relations for weak interaction pressures induced in unsteady flow 24 p4306 A69-43676

Pressure distribution correlation over blunted slender cone at various angles of attack by tangent cone method, describing hypersonic wind tunnel tests 24 p4249 A69-43681

Computerized pressure distribution estimation for stalled airfoil with arbitrary wake geometry 24 p4250 A69-43726

PRESSURE DRAG

NT INTERFERENCE DRAG

NT SUPERSONIC DRAG

NT WAVE DRAG

Low Mach number airfoil profile drag calculation for various angles of attack and Reynolds numbers, noting effects of transition and airfoil thickness 01 p0006 A69-11017

Differential rotation of sphere in viscous incompressible liquid, discussing pressure and skin friction drag between two hemispheres with different angular velocities 04 p0590 A69-15278

Nonlifting blunt axisymmetric hypersonic shape determination to maximize pressure drag for given convective heat transfer, diameter and free-stream conditions 24 p4244 A69-42960

PRESSURE DROP

Dynamic gas flowmeter for ultrahigh vacuum based on transmission characteristics of diffuser screens and associated pressure drops 13 p2263 A69-28087

Pressure drop fluctuations amplitude and frequency effect on channel resistance and magnetic field effect on fluctuations intensity in laminar conducting fluid flow 14 p2501 A69-29909

Flame pressure drop and burning velocity related, discussing stream tube area expansion error 21 p3849 A69-38806

Liquid solid mixtures of parahydrogen flow characteristics in pipe, globe valve, orifices and venturi, determining pressure loss [NAS-NRC PAPER F-5] 22 p3998 A69-40626

PRESSURE EFFECTS

Hydrostatic pressure effects on mechanical properties of hot pressed, extruded and rolled polycrystalline beryllium sheet 01 p0092 A69-10059

Turbulent to laminar boundary layer reversal by applying negative pressure gradient 01 p0058 A69-10066

Diffusion welding of AMS 4921 titanium, discussing premature pressure removal before completion of first joining stage 01 p0086 A69-10535

Pressure and temperature dependence of slow crack growth in hardened steel in gaseous hydrogen environment 01 p0096 A69-10612

HF plasma ionic composition dependence on discharge conditions and ions translational energy 01 p0129 A69-10682

Isopentane and mesitylene index of refraction variations with pressure, determining average molecular radii and polarizabilities 01 p0123 A69-10685

Isothermal secant and tangent bulk moduli of silicon fluids and correlation with pressure, volume and temperature 01 p0102 A69-10913

Cryogenic expansion to pressures below triple point and resulting formation of solid-vapor mixtures, discussing flow and heat transfer characteristics in heated tubes 01 p0176 A69-11146

Cardiovascular changes in male students during tilt and negative pressure tests with bed rest studied from heart rate, blood pressure and leg volume measurements 01 p0021 A69-11334

Transverse pressure gradient and streamwise derivatives effect on free convection laminar heat transfer on isothermal vertical plate at low Prandtl numbers 01 p0177 A69-11409

Pressure and magnetostriction effects on magnetization curves of type 2 superconducting In-Tl alloy, noting Ginzburg-Landau parameter stress dependence 02 p0294 A69-11776

Ultrahigh pressure physics of materials, discussing apparatus, phase transitions and yield strength ductility relationships 02 p0260 A69-11803

Downstream pressure asymmetry effect on efflux angle and contraction coefficient of incompressible jet from two dimensional orifice 02 p0231 A69-12075

Vortex controlled fluid amplifiers, discussing static and dynamic performance characteristics 02 p0195 A69-12081

Fluid temperature sensor generating output differential pressure proportional to temperature of fluid entering device 02 p0249 A69-12089

Sulfospinel polymorphism at high temperature and pressure and pressure-temperature phase relations 02 p0266 A69-12162

Gaseous and liquid H refractive index variations with pressure and density below room temperature, noting Lorentz-Lorenz function variations 02 p0281 A69-12180

Relativistic heat transfer formula and pressure definition in relativistic thermodynamics 02 p0352 A69-12253

Pressure and temperature dependence of isotropic elastic moduli of polycrystalline alumina, noting Gruneisen parameter, equation of state and Debye temperature 02 p0268 A69-12407

Pressure and velocity couplings effects on oscillatory and transient motions in solid propellant rocket motors, emphasizing unsteady burning calculations 02 p0305 A69-12501

Anisotropic pressure influence on silicon diodes parameters 02 p0223 A69-12839

Finite amplitude surface wave excitation in infinitely deep ideal fluid by moving pressure, noting phase velocity increase with amplitude 03 p0466 A69-13277

Pressure induced microwave absorption in molecular N for various temperatures, determining dielectric loss, absorptivity and quadrupole moment 03 p0472 A69-13317

Equivalent pressure concept verification for arc discharge with incandescent cathode in mercury vapor 03 p0478 A69-13843

Uniaxial pressure applied to p-n junction of GaAs in injection laser, discussing effects on threshold current and wavelength

03 p0441 A69-13848

Pressure induced variations in stability constant characterizing bubble structure in two phase boundary layer of several liquids during boiling with natural convection

03 p0534 A69-14149

Constants in formulas describing temperature and pressure dependence of thermodynamic characteristics of high temperature monatomic ionized gases for positive ions

03 p0473 A69-14156

Human auditory function during exposure to prolonged low barometric pressure unaffected with normal oxygen partial pressure

03 p0378 A69-14206

X ray investigation of repeated simulated exposures to altitude and acceleration on healthy professional flyers

03 p0378 A69-14208

Hydrostatic pressure effect on recombination emission in indium phosphide p-n junctions

04 p0639 A69-14428

Thermodynamic computations for combustion product temperature and flow rate as function of pressure in burner and excess air ratio

04 p0684 A69-14487

Stressed state periodic problem in infinite strip under combined pressure and temperature field effect

04 p0673 A69-14497

Frequency dependent shear modulus for hexachlorobiphenyl measured under rare gas infusion at 5-25 C and from ambient atmospheric to 4000 psi

05 p0796 A69-15912

Liquid oxygen shear viscosity dependence on temperature and pressure obtained by measuring electrical characteristics of immersed torsional vibrating crystal

05 p0846 A69-15916

Relaxation time of carbon dioxide laser levels as function of water vapor, CO and Xe gas pressure measured by afterglow pulse gain technique [IEEE PAPER G-1]

05 p0774 A69-16314

Pressure stratification and transparency/geometrical depth expansion/ in Fricke-Elsasser and Zwaan sunspot models

06 p0999 A69-16976

Shock wave profiles in expansion flows determined with static and impact pressure probes, investigating pressure gradient effects

06 p0908 A69-17022

Plastic deformation and bursting pressure of thin rupture disk as related to tensile strength

06 p1020 A69-17129

Stability of rectangular transversely isotropic plate hinged at three sides under uniform pressure applied to two opposite hinged sides

06 p1021 A69-17178

Stability loss of shells of revolution under effect of axial compression and radial pressure with no restrictions on generatrix curvature, using strain energy method

06 p1021 A69-17179

Data on muons indicating temperature effect diurnal maximum and pressure corrected daily variation

06 p0924 A69-17294

Thin circular cylindrical shells steady creep behavior under combined lateral and axial pressures, using Tresca criterion and associated flow rule

06 p1023 A69-17506

Geometry changes influence on rigid plastic circular plate behavior under two independent distributed pressures

06 p1023 A69-17508

Moment equations of Vlasov plasma used for pressure effects on gravitational flute instability of nonuniform plasma

06 p0965 A69-17515

Two dimensional stress distribution changes around rectangular hole with rounded corners for varying internal pressure and temperature

06 p1025 A69-17611

Gas laser operation at high pressures, examining threshold pumping and power output dependence on pressure to optimize parameters

06 p0934 A69-17680

Collisionally induced microwave absorption by nonpolar gases, discussing dimer absorption

06 p0962 A69-17816

G suit inflation acute and prolonged effects on cardiovascular dynamics in recumbent and passively tilted individuals

06 p0883 A69-17843

Solid propellant burning rate behavior during abrupt environmental pressure excursions, using transient combustion model

[AIAA PAPER 69-172] 06 p1036 A69-18046

Extinction by depressurization of AP composite solid propellants theory to predict rate of pressure decrease required to achieve flameout

[AIAA PAPER 69-176] 06 p0983 A69-18102

Quasi-steady combustion model of fuel droplet with convection, including pressure effect

[AIAA PAPER 69-147] 06 p1037 A69-18114

Sustained combustion initiation in subatmospheric gaseous fuel-oxidant mixtures by UV radiation at room temperature, measuring parameters as function of mixture pressure

[AIAA PAPER 69-88] 06 p0983 A69-18118

Low pressure deflagration limit dependence on strand size in terms of cross section dimensions for composite ammonium chlorate propellant

[AIAA PAPER 69-144] 06 p0983 A69-18162

Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing origin from counterrotating longitudinal vortices in boundary layer

[AIAA PAPER 69-11] 06 p0915 A69-18213

Calibration curve for constant temperature hot-wire anemometer, taking into account high wire temperature and gas pressure effects

06 p0930 A69-18218

Regression rate model for pressure sensitive hybrid combustion based on classical turbulent flame theory [WSCI PAPER 68-22]

07 p1240 A69-18362

Radiation pressure effects on laser produced carbon plasma in vacuum, discussing target surface superheating, plume boundary, plume density precursor and electron and ion temperature merging

07 p1190 A69-18902

Water vapor absorption line for nitrogen and oxygen mixtures with frequency measurements at various pressures and temperatures, discussing attenuation and line breadth

07 p1184 A69-18911

Pressure properties of fluorides and silicofluorides as cutting and grinding lubricants for titanium [ASLE PAPER 68-LC-20]

07 p1141 A69-19311

Pressure-temperature dependence of nitrogen solubility in tungsten at 2400-3000 C

07 p1168 A69-19602

Tensile strength of alloys under high pressure of hydrogen and helium, discussing embrittlement [ASM PAPER D8-14.2]

07 p1169 A69-19667

Local stability of thin walled elastic shells of revolution subjected to external pressure

07 p1237 A69-19686

Stability of cylindrical shell reinforced by circular ribs under combined action of external pressure and axial forces, using characteristic equation

07 p1238 A69-19687

Carbon dioxide laser radiation frequency controlled by varying boron trichloride pressure in cell inserted in resonator

08 p1323 A69-19804

Interaction between atom and plane monochromatic traveling wave taking into account pressure effect occurring in strong collision model

08 p1354 A69-19954

Wall temperature influence on intensity of transverse flow of three dimensional laminar boundary layer resulting from transverse pressure gradient

08 p1251 A69-20274

Recombination rate of electrons in high pressure helium-like plasma with gas temperature fixed at 300 K and electron temperature varied between 300-2000 K

08 p1356 A69-20742

Background pressure and magnetic field shape effect on MPD thruster performance, testing radiation cooled thrusters

[AIAA PAPER 69-243] 09 p1564 A69-21239

Flapper valves in high pressure hydraulic aircraft systems, with hydrodynamic equations and charts for design and performance characteristics

09 p1435 A69-21296

Bellows sealed valve for measurement of fluorine thermodynamic properties at moderately high pressures

09 p1493 A69-21428

Convective MHD channel flow in vertical channel subjected to temperature and pressure gradients, discussing wall conductance effects on flow rate and heat transfer

09 p1545 A69-21441

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects

09 p1555 A69-21470

Stimulated Mandelstam-Brillouin scattering in compressed N and H as function of pressure, using ruby laser pulses

09 p1516 A69-21562

Thermionic converters stability and safety maintainable at high Ce pressures

09 p1441 A69-21837

Pure ammonium perchlorate single crystal self deflagration, determining energy transfer mechanisms from pressure effects, combustion characteristics and subsurface profile

[AIAA PAPER 69-142] 09 p1560 A69-21900

Laser radiation produced by continuous glow discharge within Al hollow cathode, determining laser power in terms of He-Ne mixture pressures

09 p1519 A69-22245

Thermosetting resin curing behavior characterized by differential thermal analysis performed above atmospheric pressure to prevent volatilization

09 p1500 A69-22311

Controlled expansion of captive silicone rubber used to achieve pressure control for adhesive bonding interface

09 p1512 A69-22367

Thermal and pressure environments analysis in Saturn S-1C stage base during flight tests, noting base gas flowfield and heating [AIAA PAPER 69-318]

09 p1611 A69-22383

Gas turbine combustion control at high pressure, considering mixing, fuel evaporation, spray penetration and cone angle

09 p1625 A69-22620

Linear theory of cylindrical panel buckling and circumferential restraint along straight edges under lateral pressure, using Donnell equations

09 p1621 A69-22782

Pressure and temperature effects on electrical conductivity of dense plasma ejected from Laval nozzle

10 p1739 A69-23492

Pressure effects on hep crystalline lattice alloys order-disorder transformations

11 p1937 A69-24704

Deformations of thick walled cylinder with internal surface subjected to uniform pressure and externally connected to rigid chamber, calculating solid rocket booster charge

11 p1942 A69-25347

Mass flow rates for nearly free molecular flow through two dimensional slit for several tank pressure ratios

11 p1874 A69-25357

Cylindrical shells spectral response to random acoustic pressure excitation, noting natural modes and inner air column effects

11 p1990 A69-25506

Flutter analysis of plates with inplane boundary support flexibility exposed to transverse pressure loading or buckled by uniform thermal expansion

11 p1992 A69-25523

Calcite IR absorption dependence on pressure, discussing calcite-aragonite transformation

12 p2141 A69-25783

Laser gain medium dispersion expressions applied to multimode ring laser operation with mode spacing less than pressure broadened atomic linewidth

12 p2106 A69-26324

Component ratio effect on pressure dependence of burning rate in ammonium and potassium perchlorate mixed with organic compounds, graphite and tungsten

12 p2027 A69-26474

Multi-electrode probe performance in plasma diagnostics, considering effects of plasma pressure, probe geometry and space charge on current-voltage characteristics

12 p2138 A69-26539

Carbon dioxide dissociation in carbon dioxide laser gas discharge plasma for various flow rates, pressures, discharge current densities and tube diameters

12 p2107 A69-26540

Finite plane deformations theory extended to incompressible materials with logarithmic change of volume proportional to pressure

12 p2181 A69-26613

Pressure and heating rate correlations for rocket exhausts impinging on flat plates and curved panels, generating axisymmetric real gas exhaust plumes

12 p2190 A69-26781

Pressure calcining process in production of fine grained ceramics at low temperatures

12 p2119 A69-26832

Temporal variation of metal content in galaxy, discussing stellar radiation pressure effects on heavy element abundance of interstellar gas

12 p2160 A69-26854

Steady helical discharges /skin effect/ in air and Ar under high pressure without gas injection, discussing discharge stability factors

12 p2140 A69-27122

Strain rate and pressurization effect on ductile-brittle transition temperature of polycrystalline sintered W, discussing yield stress

12 p2117 A69-27138

Resistance type bonded strain gages for seven adverse environments, discussing installations and transducers

12 p2099 A69-27165

Stress distributions in two normally intersecting cylindrical shells subjected to internal pressure, using Donnell and Flugge equations

13 p2359 A69-27255

Limiting pressure for deflagration related to initial solid temperature of single crystals and pressed pellets of ammonium perchlorate

13 p2324 A69-27364

Electric arc and hydrogen flow interaction at high pressure, showing radiation role in heat exchange

13 p2305 A69-27387

Ambient air pressure effects on fatigue crack growth rate in strain hardened aluminum

13 p2276 A69-27393

Hayashi effect modifications due to high opacity stellar atmosphere or presence of molecular hydrogen dissociation zone, discussing pressure dissociation role

13 p2342 A69-27594

Beryllium single crystals c axis compression behavior at three purity levels under hydrostatic pressures

13 p2279 A69-27760

Copper and aluminum fatigue in vacuum and ultrahigh vacuum, discussing effects of hydrogen, nitrogen and oxygen pressures

13 p2280 A69-28088

Depth and planarity of zinc diffused junctions in GaP using temperature, phosphorus overpressure and time as independent variables

13 p2322 A69-28136

Lung ventilation mechanics affecting respiration in hyperbaric environment during deep diving, stressing biological necessity of equal pressure respiration

13 p2215 A69-28598

Finite amplitude surface wave excitation in infinitely deep ideal fluid by moving pressure, noting phase velocity increase with amplitude

14 p2482 A69-28785

Graphites wear rates and structural changes in machine parts under dynamic stresses in air or vacuum, noting pressure role

14 p2467 A69-28912

Compressed ammonium perchlorate combustion rate and pressure requirements established from initial temperature effects

14 p2508 A69-28914

Frequency shifts of Lamb dip minimum in helium-neon laser, considering effects of discharge tube parameters and gas pressure

14 p2457 A69-28929

UV radiation decreased transmittance through quartz exposed to plasma at high temperature and pressure, showing dependence on heated surface layer absorption

14 p2490 A69-29159

Auxiliary discharge thermionic converter with Penning mixture /Ne-Ar/, discussing pressure and Penning ionization effects, collector current discontinuities, etc

14 p2398 A69-29180

Thermionic converter stability as function of cesium pressure, heat input, reservoir temperature, load voltage or resistance

14 p2402 A69-29236

Rare gases effect on thermionic converters volt-ampere characteristics, noting gas pressure, oxygen contamination and performance relations

14 p2403 A69-29251

Work function changes of tungsten single crystals as function of oxygen and CO gas pressure at high temperatures, using emission microscope

14 p2506 A69-29272

Auditory evoked response /AER/ as measure of narcosis induced at depth in diving personnel, discussing hyperbaric nitrogen and oxygen effects

14 p2407 A69-29302

Pressure sensitive adhesives composition, tapes tacking and peeling theory and tests including electrolytic corrosion and insulation evaluation

14 p2468 A69-29342

Compression molding of molecular salt-like intermediate Pyrrone powders by two pressure method, noting volatiles climination

14 p2469 A69-29415

Solar radiation pressure effects on satellite models in circular equinoctial orbits

14 p2522 A69-29595

Sonic boom produced earth particle velocities, noting seismic effect limitation to boom pressure envelope area and earth surface boundary

14 p2393 A69-29880

Diperchlorates different in organic part of structure and explosive transformation heats, showing strong dependence of combustion velocity on pressure

15 p2716 A69-30108

Shock hardening in Ni at high pressure observed by electron microscopy showing dominating thermal effects on microstructure

15 p2637 A69-30225

Collapse pressure of flush cylindrical nozzle axisymmetrically intersecting conical pressure vessel for rigid plastic shells

15 p2704 A69-30289

Plasma arc characteristic and radiation at high pressure and temperature showing strong electrical field strength and radiation increases with pressure

15 p2659 A69-30377

Gas barrier seal design producing varying unit loading on conventional contact seal faces, including geometric stability and test results [ASLE FICFS PREPRINT 26]

15 p2621 A69-30495

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects

15 p2669 A69-30715

Power spectral density response of uniform beams to random pressures, evaluating joint acceptance of systems with pressure field [ASA PAPER SVT2]

15 p2713 A69-31143

Cylindrical shell bending subjected to internal pressure and force uniformly distributed on round section solved by numerical integration of differential equations

15 p2653 A69-31195

Similarity criteria for plastic deformation theory of body under pressure and nonuniform temperature field, considering strength calculations

15 p2714 A69-31200

Reinforced cylindrical shell stability under external compression load by pressurized air, determining critical pressure

15 p2715 A69-31204

Stagnation region dimensionless pressure effect on flow pattern, boundary conditions and oscillation mechanism in compressible flow through nozzle in circular duct

15 p2549 A69-31220

Rapid orbit prediction method for planning satellite observation programs, considering oblateness and radiation pressure effects

15 p2697 A69-31310

Fuel drop combustion under unsteady conditions at high pressure in unlimited and limited air volume

15 p2719 A69-31476

Uniaxial stress effect in Schottky barrier diodes measured by beam balance noting higher sensitivity

16 p2758 A69-31619

Acoustic velocities in polymethylmethacrylate measured as functions of frequency, temperature and pressure, comparing data obtained with equation of state high pressure determinations

16 p2825 A69-31695

Gas discharge tube graphite hollow cathode geometry leading to abnormal discharge operation under certain pressure conditions

16 p2814 A69-31838

Prebuckling deformations influence on circular cylindrical shell buckling under external pressure, applying Galerkin method to Donnell equations

16 p2872 A69-31905

Polycrystalline BeO sound velocities determined as function of pressure and temperature using pulse superposition method

16 p2802 A69-32338

Ammonium perchlorate sublimation models, discussing low temperature decomposition influence on pressure dependence of sublimation rate [WSCJ PAPER 69-22]

16 p2832 A69-32360

Hydrogen-oxygen ion exchange membrane fuel cells for sounding balloons, discussing flight duration and power requirements, gas supply pressure effects, etc

16 p2738 A69-32413

Diurnal pressure cycles found as zeitgeber to entrain body temperature endogenous circadian rhythm in pocket mice under constant environmental temperature and light

16 p2745 A69-32447

Jet engine compressor stalls in-flight investigation up to Mach 2 on F-111A by pressure sensors, noting steady state distortion role

[AIAA PAPER 69-488] 16 p2843 A69-32706

Supersonic compressor blade sections performance prediction near maximum pressure ratio and efficiency by analyzing flow processes

[AIAA PAPER 69-522] 16 p2843 A69-32711

Linear and nonlinear pressure coupled combustion instability of solid propellants

[AIAA PAPER 69-479] 16 p2834 A69-32725

Stresses in perforated ribbed cylindrical shell subjected to internal pressure using brittle coating, electrical strain gages, photoelasticity and micrometers

16 p2876 A69-32784

Plastic failure under internal pressure of aluminum spherical shells with single radial or oblique nozzle based on limit analysis theory

17 p3052 A69-32983

Preferential ion recombination in gases under high pressure, noting no dependence of recombination on average energy

17 p2949 A69-32999

Fatigue crack growth rates in stainless steel at elevated temperature measured as function of oxygen pressure in resonant fatigue machine

17 p2987 A69-33074

Nonaxisymmetric stability loss /buckling/ of closed toroidal shell of circular cross section under uniformly distributed external pressure, considering Volmir linear theory

17 p3055 A69-33130

Powdered oxidizer and infusible polymer binder combustion at various pressures, studying gaseous phase temperature field by optical color analysis

17 p3069 A69-33135

Temperature and pressure effects on flame propagation rates, burning time and combustion zone length in turbulent flows of homogeneous gas mixtures

17 p3069 A69-33140

Pulmonary ventilation and perfusion in normal supine subjects before and during exposure to lower body negative pressure measured using Xe-133

17 p2909 A69-33180

Inflight spontaneous pneumothorax case of civilian pilot lung collapse experience during exposure to reduced ambient pressure, discussing etiology, incidence, treatment and disposition

17 p2909 A69-33183

Thermal contact resistance measurement at various ambient pressures compared with theoretical predictions with each parameter analyzed over interface by computer program

[AIAA PAPER 69-629] 17 p3073 A69-33299

Turbulent boundary layer subject to sudden pressure variation due to rapid expansion or shock wave, noting application to hypersonic ramjet air intake

[ICAS PAPER 68-42] 17 p2895 A69-33587

Flame propagation mechanism on plastic fuel in oxygen-nitrogen atmospheres with variable pressures and at different initial fuel temperatures, discussing safety and ignition problems

17 p3074 A69-33662

Large deflections of thin nonlinearly elastic ring under external pressure, using two layer model

17 p3062 A69-33715

Interstellar H I regions and clouds heating and ionization by low energy cosmic rays from quantitative models, noting pressure equilibrium role

17 p3038 A69-33726

Stationary liquid under pressure effect on energy dissipation of rectilinear pipelines under pure bending

17 p2904 A69-33930

Temperature and pressurization effects on tensile and compressive properties of polycrystalline arc-cast W

18 p3154 A69-34273

Circular cylindrical shell nonlinear response to uniform radial impulsive pressure, noting intentionality constraint and equations of motion roles [ASME PAPER 69-APM-26]

18 p3214 A69-34399

Toroidal, spherical and conical shells limiting equilibrium under various loading and support conditions

18 p3216 A69-34572

Testing machine for in vacuo tensile testing of tubular metallic specimens at high temperatures and low pressures

18 p3117 A69-34604

Stability loss of shells of revolution under axial tension and radial pressure, considering shells of Gaussian curvature, calculating critical force

18 p3222 A69-34976

High temperature air spectral absorption indices determined at different pressures and temperatures
18 p3231 A69-35122

Electron current flow from metal target in gas due to laser radiation, showing increased dependence on gas pressure
18 p3152 A69-35124

Temperature and pressure effect on cobalt base alloy cavitation in liquid sodium, using vibratory apparatus and loss rate contour diagram
18 p3157 A69-35184

Plane LF oscillations of eccentric cylinder under harmonic pressure applied to lateral surfaces, noting natural oscillations
18 p3226 A69-35380

Pressure dependence of trapped spontaneous decay of resonant radiation carbon dioxide
18 p3179 A69-35478

Transfer molded epoxy dielectrics, comparing encapsulation rate, pressure and cure times to compression molding
19 p3281 A69-35548

Safety disk strength under static lateral pressure from rupture studies of thin circular plates under static and pulsating lateral pressure
19 p3434 A69-35773

Lunar interior chemical heterogeneity determined from model taking into account pressure, temperature and composition effects
19 p3425 A69-36421

Liquid driver shock tubes dynamic and thermodynamic properties as functions of diaphragm pressure ratio and initial conditions
19 p3295 A69-36471

Vertical profiles of pressure, temperature and density variations due to upper troposphere pressure changes with and without zero layer effect
19 p3365 A69-36580

HCN laser line gain measurements during continuous excitation as function of current and pressure for acetonitrile and water mixtures
19 p3339 A69-36695

Bubble oscillations in water filled pressure chamber with alternating pressure generated by piston, measuring temporal development
19 p3302 A69-36871

Hydrogen embrittlement mechanism in steel based on modified pressure theory, discussing crack propagation mechanisms and stress corrosion cracking
19 p3350 A69-36894

Maser submillimeter emission lines used to determine atmospheric and water vapor absorption, noting role of pressure
20 p3553 A69-37296

Supersonic molecular beam relative intensity represented as function of nozzle to collimator distance and gas admission pressure
20 p3579 A69-37432

Elastic properties of hot pressed polycrystalline quartz and rutile as function of pressure, obtaining pressure coefficients of compressional and shear wave velocities
20 p3583 A69-37502

Fluidic direct impact modulator design, studying effects of pressure levels and nozzle geometries [ASME PAPER 69-FLCS-38]
20 p3465 A69-37983

Superconductor research noting pressure effects, graphs and tables illustrate behavior of materials considered
20 p3584 A69-38015

Nitrogen gas breakdown threshold dependence on pressure during picosecond ruby laser pulse, discussing photoionization leading to breakdown in electromagnetic wave field
20 p3555 A69-38067

Inconel and aluminum tested in pressurized hydrogen at room temperature, using surface flawed fracture toughness specimens and preflawed pressure vessels
21 p3730 A69-38666

Diurnal variations of cosmic ray neutrons corrected for barometric and temperature effects by harmonic analysis
21 p3791 A69-38840

Physiological and psychological measurements of high pressure effects on man and animals, discussing decompression sickness, respiratory embarrassment, inert gas narcosis, helium tremble, etc
21 p3655 A69-38912

Oxygen pressure effect on oxide layer composition on W surface by secondary ion-ion emission
21 p3746 A69-39071

Stability of cylindrical shell of average length with elastic filler under uniform external radial pressure
21 p3837 A69-39088

Rat dental pulp hemorrhages following acute hypoxia from exposure to decompression chambers, atmospheric pressure variations or high acceleration
21 p3661 A69-39276

Temperature, applied stress and pressurization effects on materials corrosion by liquid F and F containing oxidizers
21 p3748 A69-39485

Power density and time history of pulsed molecular nitrogen laser, discussing dependence on fill pressure and electric circuit parameters
21 p3742 A69-39779

Static and fatigue strength of end-closed filament-wound vessels under internal pressure
21 p3846 A69-39797

Wear resistance of briquetted lubricants from fluoroplast and molybdenum disulfide under pressure
21 p3733 A69-39805

Ti and Zr diborides sintering with Cr, Mo, W and Re additions, discussing activation, pressure effects and density
22 p3968 A69-39888

Space cabin and suit pressures for decompression sickness avoidance and fire hazard alleviation
22 p3890 A69-40212

Lower body negative pressure (LBNP) effects on ventilation and lung volumes, presenting lung model for pulmonary gas exchange changes
22 p3891 A69-40222

Left ventricular function in intact anesthetized dogs analyzed during graded hypovolemia produced by lower body negative pressure
22 p3874 A69-40225

Gravitational fields and atmospheric pressure effects on soils subjected to static and dynamic loading, using aircraft parabolic gravity simulation [AIAA PAPER 69-1009]
22 p3921 A69-40382

Pressure and temperature effects on reversal transitions of stishovite, noting meteoritic impact formation at Meteor Crater, Arizona
22 p4021 A69-40412

Compactibility dependence of Fe, Co and Ni powders with Zr, Nb and Mo carbide additives on pressure, carbide content and lubricant
22 p3970 A69-40634

Detonation velocity variation in nitromethane with initial pressure, discussing relationships
22 p4051 A69-40713

Molecular N UV spectrum at various pressures, showing absorption band dependence on pressure induced dipole transitions
22 p3986 A69-40723

Pure quadrupole resonance spectrum of iodine-127 in solid stannic iodide measured in specific temperature range at atmospheric pressure
22 p3986 A69-40726

Arterial and deep venous blood from human forearm analyzed following rest and rhythmic exercise on ergometer in hyperbaric oxygen chamber
22 p3878 A69-40834

Pressure activated superfluid valve design and operation for liquid He transfer from reservoir to cold finger
22 p3870 A69-41237

Decreasing barometric pressure effects on abdominal gas volume in military men under simulated flight conditions, noting abdominal fullness and pain
23 p4076 A69-41291

Decompression sickness in simulated zoom flights, discussing bubble formation probability and instantaneous surface tension effect on bends resistance
23 p4077 A69-41292

Arterial pressure and heart rate responses to increased intrapulmonary pressure in anesthetized dogs via simulated Valsalva tests
23 p4078 A69-41365

Nitrogen-carbon dioxide-helium lasers CW operation at various pressures and N flow rates
23 p4173 A69-41496

Transport coefficients in neutral gases, discussing fundamental relations of parameters in viscosity, thermal conductivity and self, pressure and thermal diffusion
23 p4193 A69-41514

High speed radially resistant ball bearing, analyzing effect of lubrication film on axial rigidity
23 p4169 A69-41555

Initial pressure rise and consequent laminar boundary layer separation during interaction with shock wave
23 p4151 A69-41691

Pituitary-adrenocortical axis of rats in oxygen atmosphere at low pressure, finding depressed norepinephrine excretion
23 p4087 A69-41790

Burning solid propellant behavior under pressure fluctuations expressed in response function terms defining small mass flux change ratio to small pressure change
23 p4201 A69-41922

Hinged circular cylindrical shells reinforcing ribs effect on deflection and bending moments, assuming external pressure application
23 p4229 A69-42001

Sinusoidal pressure electric stimuli frequency effects in isolated carotid sinus on canine peripheral blood pressure, determining dynamic characteristics from observation data
23 p4092 A69-42062

Acoustic gravity waves propagation over spherical earth with isothermal windless atmosphere, determining pressure perturbations
23 p4158 A69-42175

Pressure ratio effect on supersonic turbine nozzle performance during off-design regime operation, noting effect of low specific heat gas ratio
23 p4203 A69-42250

Surface films effect on friction coefficient of sodium chloride and Zn single crystals under normal pressure loads, noting film thickness role
23 p4170 A69-42343

Nb single crystals oxidation in dry oxygen at high pressure and temperature indicating suboxide platelets existence as function of temperature
23 p4177 A69-42357

Steady constant density two dimensional flow in laminar boundary layer over permeable curved surfaces, showing effects of suction or blowing
23 p4153 A69-42399

Alveolar and pleural pressures affecting pulmonary interstitial pressure in anesthetized dogs, applying Starling law of transcapillary exchange
24 p4257 A69-42627

Test animals prolonged deep submersion in water, in mixed oxygen-H atmosphere at elevated pressure, noting EEG and EKG activities
24 p4262 A69-43025

Initial deflection and internal pressure effects on supersonic panel flutter boundary of simply supported rectangular plates under diverse middle-surface stress conditions
24 p4400 A69-43056

Initialization technique for primitive forecast equations balancing Coriolis and pressure forces effects on atmospheric observations
24 p4344 A69-43065

Ge films formation by evaporation technique, discussing background O pressure effect
24 p4361 A69-43345

Barometric pressure affecting convective heat transfer from human body in air, deriving empirical formula as function of air density, speed and temperature
24 p4267 A69-43384

White mice survival rates and blood morphology and sedimentation rates in low ambient pressure confinement following infectious bacteria injection
24 p4267 A69-43397

Aircraft passenger cabins pressure safety limits estimating factors, discussing human respiratory gas exchange mechanism, pressure drop and smoking effects, etc
24 p4269 A69-43411

Decompression disease symptoms from standpoint of gas bubbles formation in blood vessels, examining factors preventing air metabolism
24 p4269 A69-43414

Heat transfer during nitrogen tetroxide nucleate boiling at various pressures and heat fluxes [ASME PAPER 69-HT-58]
24 p4411 A69-43536

Damping influence on shallow arch static and dynamic snapping under step pressure load
24 p4405 A69-43654

Pressure effects in spontaneous ignition of interimpinging hydrazine and red fuming nitric acid (RFNA) liquid streams in evacuated test chamber
24 p4415 A69-43667

Gas velocity and pressure influence on electrical breakdown potential of Ar, N and He between parallel flat plate and concentric electrodes
24 p4359 A69-43693

Atmospheric gases emission spectra excited by electron beam as function of pressure
24 p4353 A69-43698

PRESSURE GAGES
NT BAYARD-ALPERT IONIZATION GAGES
NT IONIZATION GAGES

NT KNUDSEN GAGES
NT MANOMETERS
NT OSMOMETERS
NT PIEZOELECTRIC GAGES
NT PIRANI GAGES
NT VACUUM GAGES

Pressure measurements by gauges in rarefied gas flows past bodies of various shapes, discussing configurations effect on gauge readings 01 p0080 A69-10358

Shock reflection structure in ionizing xenon determined by fast rise pressure gauge mounted in shock tube end wall 01 p0132 A69-12105

Etched manganin gauge for shock pressure measurement in high noise environments containing radiation and electromagnetic effects 04 p0603 A69-15431

HF electromagnetic decoupling pressure gage, using transducer with solid state strain gages as sensing elements 15 p2611 A69-31029

PRESSURE GRADIENTS

Turbulent to laminar boundary layer reversal by applying negative pressure gradient 01 p0058 A69-10066

Waves in inhomogeneous warm magnetoplasmas with static pressure gradients, applying dyadic to planar stratified plasma case 01 p0129 A69-10561

Venus cloud layer thickness and lower boundary estimation from data on chemical composition, temperature and pressure profiles of atmosphere 01 p0152 A69-10580

Superlayer structure determination near turbulent boundary layer with zero pressure gradient, using constant temperature linearized hot-wire anemometers 01 p0061 A69-10759

Pressure and flow transients in liquid rocket engine feed systems predicted by method of characteristics 03 p0495 A69-12991

Turbulent boundary layer reversion to laminar state associated with departures from inner law velocity distribution in presence of favorable pressure gradients 03 p0414 A69-13016

Planetary boundary layer response to time varying pressure gradient force 03 p0460 A69-13337

Wind shear and reflectivity gradient effects on Doppler radar spectra 03 p0461 A69-13341

Pressure rise and thermal conductivity in cylindrical hydrogen plasma column in axial magnetic field, assuming local thermal equilibrium 03 p0479 A69-13967

Elastic-plastic thin walled cylindrical shell axisymmetric behavior under radial pressure difference, noting load for collapse [ASME PAPER 68-APM/AA] 04 p0670 A69-14404

Hypersonic turbulent boundary layer in adverse pressure gradients studied for transition, measuring static/pitot pressure, stagnation temperature and heat transfer rates [AIAA PAPER 68-44] 04 p0588 A69-14716

Incompressible turbulent boundary layer properties with arbitrary pressure gradient calculated by integral method resulting in single equation for skin friction coefficient [ASME PAPER 68-WA/FE-22] 05 p0749 A69-16098

Shock wave profiles in expansion flows determined with static and impact pressure probes, investigating pressure gradient effects 06 p0908 A69-17022

Curvilinear plasma motions in ionosphere same as cyclones and anticyclones in troposphere, solving ionospheric unstable wind as function of pressure gradients 06 p0919 A69-17722

Liquid metal MHD systems efficiency when operating with pressure jump in diffuser nozzle 06 p0872 A69-17921

Transformation theory for compressible turbulent boundary layer with arbitrary pressure gradient [AIAA PAPER 69-160] 06 p0912 A69-18073

Nonsimilar laminar boundary layer solutions with negative pressure gradient compared to experimental boundary layer velocity profiles, momentum and displacement thicknesses [AIAA PAPER 69-35] 06 p0913 A69-18094

Viscid-inviscid equations solution, describing flows with coupled mixing, combustion and lateral pressure gradients [AIAA PAPER 69-83] 06 p1037 A69-18109

Superlayer structure in turbulent boundary layer without pressure gradient, using constant temperature linearized hot wire anemometers 07 p1118 A69-18299

Conducting gas acceleration in strong unsteady electromagnetic field, discussing channel flow in relation to time and pressure gradient 07 p1191 A69-18988

Turbulent boundary layer in presence of longitudinal pressure gradient 07 p1122 A69-19735

Sonic boom minimum achievable shock front pressure rise and overpressure level prediction for given aircraft and flight conditions 08 p1253 A69-19903

Jet flow and wakes in external stream and tailored pressure gradients, deriving similarity solutions for boundary layer equations 08 p1252 A69-20782

Double adiabatic MHD fluid equations for electrons and ions with pressure gradients for collisionless plasma in magnetic field 08 p1369 A69-20815

Power series solutions of MHD boundary layer equations for flat plate with transverse magnetic field and arbitrary pressure gradient, discussing skin friction 09 p1545 A69-21396

Velocity profiles of turbulent boundary layers with constant and variable pressures using Cole formulation 09 p1484 A69-22780

Unsteady baroclinic planetary atmosphere boundary layer turbulent states with various pressure and temperature gradient distributions, using boundary layer model 10 p1722 A69-23973

Shock wave propagation in gravitational field with pressure and density gradients, considering nonlinear equations of fluid flow 11 p1961 A69-25106

Streamwise pressure gradient effect on velocity profile in viscous sublayer of two dimensional turbulent flow along smooth wall 11 p1872 A69-25131

Turbulent wall jet growth in streaming two dimensional incompressible flow over plane smooth wall with pressure gradient 11 p1873 A69-25139

Pressure and flow rate variations at any point of manifold with control units calculated using transfer functions 11 p1942 A69-25335

Piezoelectric variometer with reduced indicator time lag for measuring pressure gradients in fluid media 11 p1889 A69-25427

Floating element skin friction meter designed for adverse pressure gradients, discussing wall shear stress measurement 11 p1889 A69-25557

Jet stream winds direction correlated with direction of LF pressure disturbances crossing microbarograph array 12 p2125 A69-26015

Viscous incompressible conducting fluid flow through porous coaxial nonconducting cylinders under radial magnetic field with pressure gradients functions of time 12 p2062 A69-26275

Ablation wedge model design for testing in wave superheater under controlled pressure gradients and constant temperature 12 p2059 A69-26816

Atmospheric pressure and wind data at equatorial latitudes, determining relation between rms meridional and zonal wind and pressure gradient 13 p2293 A69-27845

Atmospheric pressure variation coefficients computation based on harmonic analysis of wave behavior 13 p2295 A69-28648

Laminar and turbulent hypersonic wakes trailing blunt bodies studied by finite difference method, taking into account pressure gradients and nonequilibrium chemical reactions effects 14 p2391 A69-29618

Sealing mechanism theory with face seal applications, taking into account load carrying capacity and no leakage pressure gradient [ASLE FICFS PREPRINT 18] 15 p2620 A69-30489

Venus cloud layer thickness and lower boundary estimation from data on chemical composition, temperature and pressure profiles of atmosphere 15 p2691 A69-30750

Wind tunnel investigation of turbulent gas flow heat transfer and hydrodynamic drag in variable pressure gradient field of divergent-convergent channel 15 p2548 A69-31173

Pitot tubes diameter effect on pressure gradients during measurement through shock wave 16 p2771 A69-31927

Pressure gradients and moving ions driven neutral-air winds in F region, using asymmetric pressure model 16 p2779 A69-32302

Lower solar corona composition changes due to pressure and thermal gradients calculated with multicomponent diffusion equations 17 p3030 A69-33059

Gas pressure differential across multilayer insulation blanket during rapid evacuation predicted, using one dimensional flow theory [AIAA PAPER 69-608] 17 p3072 A69-33275

Favorable pressure gradient effect on compressible two dimensional supersonic turbulent boundary using temperature and pressure probes and shear balance [AIAA PAPER 69-685] 17 p2956 A69-33489

Turbulent boundary layer subject to sudden pressure variation due to rapid expansion or shock wave, noting application to hypersonic ramjet air intake [ICAS PAPER 68-42] 17 p2895 A69-33587

Statistical analysis in inlet air flow dynamics, discussing inlet duct design and pressure variations [AIAA PAPER 68-649] 17 p2896 A69-34020

Hydrodynamic noise as pseudosound field resulting from pressure variations in turbulent fluid flow, using Lighthill acoustic analogy 18 p3123 A69-34921

Rough wall turbulent boundary layer development in pipe flow determined for different roughness geometries in zero and adverse pressure gradients 18 p3125 A69-35387

Axisymmetric laminar and turbulent wakes of body in flow with streamwise pressure gradient, discussing velocity defects and profiles 19 p3296 A69-35762

Surface tension gradients caused thermocapillary convection solved for spherical fluid film under weightlessness conditions 19 p3452 A69-36392

Pressure gradient produced steady plane flow of Maxwellian gas between infinite parallel planes, describing linearized Boltzmann equation solution 19 p3379 A69-36604

Wall temperature distributions predicted in turbulent boundary layer with arbitrary pressure gradients, basing calculations on Spalding function solutions 19 p3302 A69-36853

Turbulent boundary layer of injection gas flow calculated past surfaces with pressure gradient 20 p3513 A69-37091

Reynolds analogy factor approximate calculation for turbulent boundary layer with pressure gradient 20 p3514 A69-37183

Turbulent boundary layer growth predicted for adverse pressure gradients, using entrainment theory for two dimensional and axisymmetric flows [ASME PAPER 69-FE-16] 20 p3517 A69-37991

Nomograph for rapid estimation of pressure drops across orifices in pneumatic systems using real gas data with illustration for nitrogen 20 p3467 A69-38186

Upper atmosphere horizontal unsteady wind with pressure gradient time dependence, solving heat conduction type equation by integral representations 21 p3758 A69-38411

Temperature distributions and heat transfer in thermal entrance region for Hartmann liquid flows under constant pressure gradient between parallel electrically conducting walls at rest 21 p3847 A69-38442

Heat transfer and hydrodynamic resistance for turbulent gas flow in longitudinal positive and negative pressure gradients analyzed using Reynolds number data 21 p3848 A69-38635

Blowing effect on surface friction coefficient and heat transfer in turbulent boundary layer in compressible fluid with pressure gradient 21 p3643 A69-38636

Unsteady baroclinic planetary atmosphere boundary layer turbulent states with various pressure and temperature gradient distributions, using boundary layer model 21 p3760 A69-39659

Blood sheet flow velocity distribution and pressure gradients in pulmonary alveolar septa determined, allowing for system elasticity 22 p3874 A69-40216

Mass diffusion and heterogeneities in compression chamber gas mixture in shock tube ascribable to pressure and temperature gradients

23 p4146 A69-41547

Slender profile oscillations in subsonic flow near solid boundary, calculating pressure gradients by dipole method

23 p4058 A69-41713

Spanwise velocity profiles through cascades and axial flow turbomachines, analyzing loading, secondary losses and inlet conditions interacting on downstream profile

23 p4061 A69-42110

Shock wave/boundary layer interaction calculation methods circumventing simultaneous large longitudinal and transverse pressure gradients and viscous effects

24 p4243 A69-42582

Compressible gas flow into cavity of various volumes in presence of supercritical pressure gradients

24 p4298 A69-42587

Bubble flow evolution at various pressures up to critical value [ASME PAPER 69-HT-30]

24 p4411 A69-43529

Rough surface skin-friction relations expanded to provide turbulent boundary layer growth prediction in pressure gradient

24 p4304 A69-43580

Unsteady MHD conducting fluid flow in arbitrary ducts under transverse magnetic field, studying effects of pressure gradient impulsive change

24 p4359 A69-43678

Reverse flow profiles in turbulent free jet mixing with streamwise pressure gradient

24 p4306 A69-43684

PRESSURE HEADS

Spikes on sonic boom pressure waveforms due to simultaneous focusing and diffraction of planar N wave by inhomogeneous atmosphere layer

01 p0011 A69-11280

PRESSURE MEASUREMENTS

Cooled probes for gas measurements in high pressure arc jets, hyperthermal wind tunnels, rocket motors, scramjets and similar severe environments

01 p0078 A69-10150

Human systolic and diastolic blood pressure measuring apparatus and method

01 p0079 A69-10296

Pressure gain estimates in analog jet amplifier based on total pressure measurements in main jet interaction region

02 p0195 A69-12076

Viscous effects on impact pressure measurements in free jet low density gas flows at high Mach numbers

02 p0234 A69-12633

Wind tunnel pressure tests of Concorde air intake mockups in presence of aircraft wing and nose for Mach numbers 2, 2.2 and 2.35

03 p0361 A69-12879

Design and development of electrical transducer and associated instrumentation for fluid pressure measurement

03 p0427 A69-12914

Glaucoma in commercial airline pilots noting value and safety of routine tonometry

03 p0376 A69-14078

Unsteady potential flow and wake near oscillating circular cylinder noting velocity, pressure and correlation measurements [ASME PAPER 68-WA/FE-23]

05 p0749 A69-16099

Aircraft gas turbine component pressure data storage and scanning

05 p0726 A69-16768

Radiation effects on NERVA out-of-core instrumentation, discussing cryogenic temperature measurements and transducer measuring pressure at gamma heating rates

06 p0956 A69-16882

Manual performance of aircraft pilots under sustained acceleration using measurements of handwriting pressure

06 p0884 A69-18030

Condensation and probe interference in planar expansion deflection nozzle measurements [AIAA PAPER 69-170]

06 p0863 A69-18059

Flow measurements in near wake of 7 degree half angle cone at free stream Mach number 4.3, noting pressure measurements [AIAA PAPER 69-186]

06 p0863 A69-18068

Book on fundamentals of temperature, pressure and flow measurements covering standards, calibration, moving fluid effects, transient effects and installations in fluids and solids

07 p1131 A69-18410

Pneumatic instrumentation line transfer function approximated by system model for simplifying reactor control system analysis [IEEE PAPER 2D-6]

07 p1059 A69-19190

Low pressure measurement by electron scattering using Born approximation

07 p1181 A69-19218

Jet engine gas flow, temperature, velocity and pressure measurements by analog and digital systems

08 p1316 A69-20869

Coordination technique for pressure, density and temperature measurements by probes during parachute reentry into planetary atmospheres, taking into account reentry dynamics

09 p1609 A69-21775

Turbine stator blade performance determination from total pressure surveys downstream of blade row, noting problems in pressure measurement [ASME PAPER 69-GT-103]

09 p1432 A69-22521

Skin friction measurement with rectangular mouthed Preston tubes of constant thickness ratio, analyzing calibration curves and difference from circular tubes

11 p1880 A69-24376

Pressure distribution measurement over sphere with cylindrical afterbody in magnetofluid dynamic flow, showing drag decrease at large magnetic field

11 p1873 A69-25136

Static pressure measurements at surface of sharp plate in supersonic flow during gas/liquid jet injection

11 p1821 A69-25479

Different pressure and deflection measurements coherence in vortex flows verified assuming radial equilibrium conditions

12 p2012 A69-26362

Ionization sensors and detectors classification and dynamic calibration for pressure measurement

13 p2262 A69-28083

Diagnostic measurements in nonequilibrium nozzle flows compared to finite rate expansion calculations, measuring pressure, temperature and density [AIAA PAPER 69-328]

13 p2200 A69-28263

Atmospheric pressure variation coefficients computation based on harmonic analysis of wave behavior

13 p2295 A69-28648

Cavity mounted pressure transducers response in high speed pressure measurements

14 p2445 A69-28874

Contact between cylindrical surfaces in thermionic converters, determining thermal resistance and pressure in contact area

14 p2400 A69-29216

Worldwide observation of atmosphere with occultation satellites, correcting orbit perturbations to obtain air pressure

14 p2447 A69-29517

Saturated Li vapor pressure measured by static equilibrium technique based on use of null membrane, tabulating pressures for various temperatures

15 p2656 A69-30997

Pressure behind spherically divergent shock wave produced by explosion of metal wire measured and compared with calculated values

16 p2769 A69-31837

Buried collector ionization gage for measurements in 100 billionth torr pressure range using shielded collector to lower X ray current

16 p2791 A69-32324

Molecular flow network theory applicable to volumes interconnected by small orifices or porous membranes for transient pressure measurements

16 p2813 A69-32325

Vertical atmospheric pressure distribution measured directly with Pirani-Israel gauge in Skylark rocket, transforming dynamic pressure data into static pressures on ground

17 p2971 A69-33037

Pressure and temperature surveys of Mach 27-47 nozzle boundary layer at Ames M-50 He tunnel, determining velocity profiles, wall friction coefficient, etc [AIAA PAPER 69-686]

17 p2953 A69-33441

Wind tunnel model low pressure measuring system, discussing pressure transducers, automatic control and pressure distribution tests [AIAA PAPER 68-402]

17 p2947 A69-34023

High speed transient pressure measurement, emphasizing forcing function measurement

18 p3133 A69-34244

Fluidic pressure ratio computing device based on two free jets interaction principle, describing prototype system design and analysis, electronics and overall error

18 p3133 A69-34309

Ducted fan engine turbine air flow rate and frontal gas temperature determined from air tempera-

ture/pressure measurements behind compressor and engine fuel flow

18 p3086 A69-34986

Multichannel pressure telemetry system for base pressure measurements on small wind tunnel models, considering proximity effects on transducer-telemetry units

19 p3305 A69-35727

Error analysis for pressure measurements in blow-down supersonic tunnel

19 p3292 A69-35728

DYDRA data logger for dynamic measurements of pressure distributions on harmonically excited wind tunnel models, noting use as general transfer function analyzer

19 p3293 A69-35746

Pressure increment due to inertia of rotating fluid film at journal bearing periphery theoretically estimated and measured

20 p3548 A69-37085

Free flight telemetered base pressure test data correlation for high Mach numbers, noting facilities and instrumentation

20 p3458 A69-37196

Condensation and probe interference in planar expansion deflection nozzle measurements [AIAA PAPER 69-170]

21 p3645 A69-39769

Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation [AIAA PAPER 69-1033]

22 p3924 A69-40401

Single channel pressure telemetry unit with magnetic latching or RF switch for chronic implantation

23 p4100 A69-41295

Vacuum gage calibration standards and methods [AIAA PAPER 69-170]

23 p4162 A69-41530

Distortion processes in ear, discussing sound pressure level/SPL/measurements in rigid-walled couplers

23 p4085 A69-41573

Indentation tonometry for occult pathology and glaucoma in commercial pilots

23 p4088 A69-41805

Hypersonic turbulent flow heat transfer and pressure data for flat plate containing steps and cavities obtained in hypersonic wind tunnel [AIAA PAPER 68-673]

23 p4060 A69-41902

Pressure measurement modifications of quasi-steady flow model for interaction between reflected shock wave and laminar boundary layer in shock tube

23 p4152 A69-41903

Two fluid heat pipe performance, measuring temperatures and condenser end vapor pressures for two thermal power input conditions

23 p4240 A69-42306

PRESSURE OSCILLATIONS

Pressure oscillation production in wind tunnel by hinged plates in test section walls to test jet engine inlets under controlled conditions

02 p0229 A69-12537

Ideal liquid small oscillations in vessel under close to weightlessness conditions, discussing surface tension, equilibrium conditions and solution by decomposing vector function space

03 p0418 A69-13811

Primary frequency of oscillations of ideal liquid in cylindrical vessel with axially directed weak gravitational field

03 p0418 A69-13812

Pressure fluctuations in separated flow region behind thin fence, determining recombination point position, noise sources and frequency spectra variations

04 p0544 A69-14868

Initiation of HF combustion oscillation in premixed gas rocket [ISAS-430]

06 p1029 A69-17025

Nonmetalized composite propellant solid phase heterogeneities effect on oscillatory combustion, inducing coherent burning rate oscillations with external pressure oscillations

09 p1622 A69-22085

Fuel concentration effect on turbojet engine reheat jet pipe vibrations via tests

09 p1573 A69-22616

Forced discontinuous vibrations of liquid in conduit experimentally analyzed, discussing test devices and procedures

11 p1875 A69-25485

Combustion instability problems in rocket motors, emphasizing strongly coupled pressure oscillations in combustion chambers

11 p2003 A69-25597

Wall pressure fluctuations due to turbulent boundary layer flow, calculating statistical properties [AIAA PAPER 68-642]

13 p2244 A69-27246

- Pressure fluctuation relaxation model to close turbulent distribution function equations at one point level, solving equation for rectilinear flows and periodic wake decay
15 p2591 A69-30906
- Nonlinear response of single Helmholtz resonator subjected to finite amplitude pressure oscillations, detailing entrance, orifice and cavitation flow [AIAA PAPER 69-481]
16 p2844 A69-32719
- Semidiurnal oscillation in the thermogeostrophic atmosphere examined using atmospheric model for tidal oscillations response study
17 p2959 A69-33148
- Random oscillations of elastoacoustic systems, obtaining solution for spherical shell containing acoustic medium
17 p3057 A69-33199
- Pulsating flow analysis in finite and infinite conical nozzles under sinusoidal pressure disturbances [ASME PAPER 69-APM-16]
18 p3214 A69-34392
- Flame and pressure /or velocity/ oscillations interaction in unstable combustion regimes, considering tubes with propane-air mixtures
19 p3450 A69-36357
- Liquid propellant rocket injectors response to HF chamber pressure oscillations using one dimensional model
21 p3786 A69-39235
- Pressure wave transmission in liquid filled tubes, determining attenuation and phase shift for hemodynamics applications
24 p4279 A69-43798
- PRESSURE PULSES**
- Temperature and pressure measurements in low temperature combustion of n pentane covering slow reaction and cool flame regions
02 p0353 A69-12321
- Pressure pulses propagation in nonsteady fluid flow through expandable tubes, noting computer solution
02 p0232 A69-12477
- Dynamic pressure pulse over band on solid elastic cylinder surface, analyzing time stress distribution throughout elastic cylinder
04 p0670 A69-14408
- Longitudinal stress pulse propagation in finite length free-free bar with variable cross section, noting stresses in projectile impacting plane target
04 p0671 A69-14412
- Elastic behavior of large blood vessels in canine aorta by measuring dispersion and attenuation of artificially induced pressure waves
04 p0553 A69-14692
- Simulation of two and three dimensional fluid transients by use of one dimensional equations in lattice-work of piping elements
05 p0747 A69-16071
- White dwarfs atmospheric pulsation suggested as pulsar mechanism, considering thin adiabatic atmospheric model with constant lapse rate
05 p0828 A69-16659
- AC fluidics for pressure pulse frequency control and monitoring in flow, discussing design and application to steam turbine speed control
07 p1058 A69-18938
- Impulse noise damage risk criteria, discussing maximum tolerable exposure, hazardous exposure and methods of impulse noise measurement
07 p1066 A69-19171
- LF spectral analysis of flowing water pressure pulsations behind single bulge on hydrodynamic channel smooth wall at low disturbance level
13 p2246 A69-27535
- LF spectrum analysis of hydrodynamic flow near-wall pressure pulsations over rough surfaced wall
13 p2246 A69-27537
- Vortex ring production in liquid jet by vibration induced pressure pulses at orifice, discussing plates formed under high g vibration [AIAA PAPER 68-132]
16 p2770 A69-31880
- High speed transient pressure measurement, emphasizing forcing function measurement
18 p3133 A69-34244
- Dynamic pressure pulsations, temperature distribution and gas concentrations in discrete vortices zone in wake of plate in unbounded flow
18 p3124 A69-35120
- Spatiotemporal contours of pressure pulses emitted into surrounding fluid by collapsing cavitation bubble, using schlieren-optical observation method, electroacoustical detection device and microphone
19 p3302 A69-36870
- LF spectral analysis of flowing water pressure pulsations behind single bulge on hydrodynamic channel smooth wall at low disturbance level
20 p3518 A69-38202
- LF spectrum analysis of hydrodynamic flow near-wall pressure pulsations over rough surfaced wall
20 p3518 A69-38203
- Initially sharp plane pressure pulse propagation through linear elastic composite material, determining wave front shape change and stresses behind front [ASME PAPER 69-APMW-11]
24 p4401 A69-43103
- Interphase momentum transfer during propagation of infinitesimal pressure pulse through bubbly flow two phase mixture
24 p4409 A69-43511
- PRESSURE RECOVERY**
- Pressure recovery of straight channel divergence diffusers at high inlet Mach numbers [ASME PAPER 68-WA/FE-19]
05 p0698 A69-16095
- High energy recovery pressure and enthalpy sensor /HERPES/ for flow measurements in aerospace simulation facilities
19 p3307 A69-35750
- PRESSURE REDUCTION**
- NT EXPLOSIVE DECOMPRESSION**
- Changes in organism during sudden decompression, analyzing pressure equalization, dissolved gases transformation and body fluids vaporization
01 p0020 A69-10753
- Prolonged decompression stress effects on humans in simulated orbital flight or extravehicular activity, investigating endocrine-metabolic disturbance by urinalysis
01 p0022 A69-11336
- Human endocrine-metabolic response to sequential decompression exposure during simulated orbital flight or extravehicular activity
01 p0022 A69-11337
- Nitrogen and helium as factors affecting human decompression stress severity, using urinary measurements reflecting various endocrine and metabolic changes
01 p0018 A69-11338
- Smith correlation of turbine stage efficiency for relating achievable efficiency to stage loading and flow factors used for total pressure loss coefficient data [ASME PAPER 68-WA/GT-5]
05 p0812 A69-16140
- Human acceleration tolerance under reduced pressures corresponding to various high altitudes, noting visual disorders
07 p1065 A69-18982
- Air powered fluid jet engine compressor bleed control stressing closing, reset and override operations [ASME PAPER 69-GT-19]
09 p1571 A69-22498
- Elastic release wave and pressure drop measurement in 2024-T4 aluminum at 313 kb for dynamic yield strength, considering surface velocity and stress
10 p1712 A69-23665
- Bleed air environmental system utilizing air to air jet pumps as flow multipliers for cabin pressurization air supply in commercial turboprop aircraft [SAE PAPER 690331]
11 p1941 A69-24494
- Blood oxygen metabolism, analyzing content and volume circulation in dogs under oxygen partial pressure decrease in inhaled air
12 p2019 A69-26346
- Blood coagulation in animals under acute hypoxia at exposures to pressure corresponding to 5000 m altitude, noting blood morphology
12 p2019 A69-26348
- Radial electric field effect on pressure drop in isothermal laminar flow of dielectric liquid through stainless steel tube, considering ion drag
12 p2136 A69-26401
- Autonomic nervous system role in controlling body functions after rapid decompression, increasing tolerance to pressure gradients by physical training
13 p2212 A69-28622
- Bird respirator function at simulated high altitude, noting adequate support in case of rapid decompression
14 p2406 A69-29290
- Rapid decompression and recompression in stapectomized cat, noting fibrous tissue response in middle ear at reconstructions utilizing polyethylene struts on gelfoam
14 p2406 A69-29292
- Monograph on Prandtl number effect on heat transfer and pressure loss in artificially roughened channels
15 p2717 A69-30934
- Pressure losses in pipeline with venturi tube, calculating hydraulic resistance coefficient as function of structural parameters and pipeline length
15 p2612 A69-31180
- Hydrogen check valve with low cracking pressure and flow pressure drop for hydrogen vent system at Saturn launch pad [AIAA PAPER 69-578]
16 p2845 A69-32738
- Concentration, flow rate and tube diameter effects on viscous drag reduction in nonpolar soap solutions, using pressure drop measurements to observe turbulent flow behavior
17 p2951 A69-33253
- Solid propellant motor extinction by depressurization, determining extinction conditions by electrical analogy
17 p3021 A69-33355
- Solid propellant motor extinction by depressurization, determining extinction conditions by electrical analogy [ONERA-TP-722]
18 p3184 A69-34637
- Pressure drop in control element of gas generator during readjustment of throttle in hydraulic supply line, noting assumptions
19 p3393 A69-35819
- Human acceleration tolerance under reduced pressures corresponding to various high altitudes noting visual disorders
20 p3480 A69-38230
- Decompression study simulating supersonic aircraft cabin small structural failure at 60,000 ft, using monkeys as subjects
21 p3665 A69-39171
- Canine cerebellar Purkinje cells electron microscopy after rapid decompression to near vacuum
21 p3660 A69-39177
- Prandtl number influence on heat transfer and pressure drop characteristics of roughened channels, determining friction factor
24 p4407 A69-42915
- Choking and shock in flashing single component two phase flow in tube, including vibrational effects, predicting minimum stagnation pressure loss [ASME PAPER 69-HT-61]
24 p4303 A69-43535
- PRESSURE REGULATORS**
- Hybrid fluidic pressure regulator combining vortex amplifier and confined-jet amplifier with performance upgrading moving metering element, noting greater efficiency and reliability
10 p1639 A69-23560
- Back pressure control system for heat leak evaluation tests of cryogenic containers, discussing component selection and error analysis
15 p2702 A69-30397
- Self contained remote sense remote control pressure regulator using pure fluid amplifiers, controlling large or small flow over wide pressure range
15 p2554 A69-31303
- Temperature control below 5.2 K based on servoing He pressure above bath
18 p3136 A69-34641
- PRESSURE RELIEF VALVES**
- U RELIEF VALVES**
- PRESSURE SENSORS**
- Calibration of pressure transducers in liquid hydrogen to liquid helium temperature range using cryogenic test equipment
01 p0080 A69-10300
- Acoustic probe for measuring pressure fluctuations on hypersonic reentry vehicle, discussing flow characteristics and heat shield ablation effects on frequency response
01 p0008 A69-11278
- Pneumatic pressure ratio sensing element and associated high pressure switches and amplifiers for gas turbine engine control systems
02 p0249 A69-12088
- Design and development of electrical transducer and associated instrumentation for fluid pressure measurement
03 p0427 A69-12914
- Rotating hot wire and five hole pressure probes for determining complete velocity vector in subsonic flow
05 p0764 A69-16398
- Condensation and probe interference in planar expansion deflection nozzle measurements [AIAA PAPER 69-170]
06 p0863 A69-18059
- Nonlinear lumped parameter model for long gas filled pressure sensing lines covering steady state, laminar or turbulent gas flow [AIAA PAPER 69-117]
06 p0913 A69-18106
- Pressure-altitude transducers for atmospheric pressure measurements on balloon flights including diaphragm, thermoconductivity, radioactive density and hypsometer gauges
07 p1132 A69-18873

Fluoride light-off detector /FLOD/ for sensing and indicating minimum light-off or blow out conditions in turbojet engine afterburner
[ASME PAPER 69-GT-36] 09 p1501 A69-22488

Pressure transducers with variable reluctance and magnetic signal transmission techniques
10 p1690 A69-23226

Signal conditioning for transducers covering piezoelectric devices, thermocouples, resistance transducers, reluctance and differential transformer sensors
10 p1691 A69-23228

Capacitance pressure transducer capable of detecting pressure changes equivalent to 0.2 mm water
11 p1885 A69-24902

Single channel pressure telemetry unit for chronic implantation into cardiac chambers or major blood vessels in unrestrained animals for measuring ventricular pressure
11 p1831 A69-25642

Construction and calibration of combined temperature and pressure probe for compressible flow
13 p2242 A69-28226

Cavity mounted pressure transducers response in high speed pressure measurements
14 p2445 A69-28874

Monograph on investigation of rarefied gas flows by means of miniature pressure probes in transition region between molecular and continuum flows
14 p2430 A69-29289

Lightweight sensor for telemetering oxygen partial pressure in respiration air
15 p2559 A69-31231

Fluidic sensors for jet engine control, analyzing convergent divergent nozzles, vortex and acoustic oscillators for pressure and gas temperature measurements
[AIAA PAPER 69-542] 16 p2843 A69-32699

Fixed position pressure probe for measuring subsonic flow direction over range of Reynolds number, Mach number and flow angle
17 p2973 A69-33107

Wind tunnel model low pressure measuring system, discussing pressure transducers, automatic control and pressure distribution tests
[AIAA PAPER 68-402] 17 p2947 A69-34023

High speed transient pressure measurement, emphasizing forcing function measurement
18 p3133 A69-34244

Multichannel pressure telemetry system for base pressure measurements on small wind tunnel models, considering proximity effects on transducer-telemetry units
19 p3305 A69-35727

High energy recovery pressure and enthalpy sensor /HERPES/ for flow measurements in aerospace simulation facilities
19 p3307 A69-35750

Condensation and probe interference in planar expansion deflection nozzle measurements
[AIAA PAPER 69-170] 21 p3645 A69-39769

Pressure transducers using heterode strain sensors evaporated directly onto pressure diaphragm
22 p3950 A69-41222

Miniature transducer to measure low transient pressures on models in rarefied shock tunnel flows, emphasizing mechanical vibration, convective heating and miniaturization
22 p3950 A69-41222

Nonlinear lumped parameter model for long gas filled pressure sensing lines covering steady state, laminar or turbulent gas flow
[AIAA PAPER 69-117] 24 p4301 A69-43259

Dynamic pressure response of viscous compressible fluids in rigid tubes with dead ended volume termination, testing Ibrall theorem as function of Stokes number
24 p4301 A69-43287

Static and dynamic characteristics of fluid pressure signal transmitter between members with relative rotary motion
24 p4256 A69-43300

PRESSURE SUITS

NT SPACE SUITS

Flight test evaluation of small man lunar flying device /POGO/, discussing vehicle control, pressure suit factors and piloting differences
[AIAA PAPER 68-240] 02 p0229 A69-12379

G suit inflation acute and prolonged effects on cardiovascular dynamics in recumbent and passively tilted individuals
06 p0883 A69-17843

Finger dexterity in JMG-1 pressure gloves with regard to efficiency associated with fine adjustments
06 p0884 A69-18032

Pressure garments weight reduction methods, comparing partial pressure systems equipped with bladder, capstan, airpipe or foam rubber
06 p0884 A69-18037

Moisture losses of men wearing partial pressure suit with oxygen mask determined by changes in skin temperature and heat flow
10 p1647 A69-23591

PRESSURE VESSEL DESIGN

Cost effective pressure vessel design using fracture mechanics, discussing fabrication costs, service life requirements, etc
16 p2870 A69-31740

High modulus filament wound composites used for propellant and pressurization tanks, discussing overwrap and liner permeability, porosity, weight, etc
19 p3354 A69-35513

Fracture mechanics application to pressure vessel design and analysis, reviewing nondestructive inspection techniques
19 p3439 A69-36438

Linearization of relationship between stress concentration factor and reciprocal of strain hardening exponent enabling shakedown to pressure vessels formulated by mathematical model
20 p3620 A69-37002

Elastic interactions between cylindrical shell and added band reinforcement turns, analyzing stress relaxation magnitude and effect on pressure vessel design
20 p3621 A69-37064

Fracture mechanics concepts for cost effective booster pressure vessel design and fabrication from commercial steels using boiler plate techniques and minimal NDT quality control
21 p3837 A69-39028

PRESSURE VESSELS

Basic equations for optimum inhomogeneity in pressure vessels of maximum rigidity derived, using thick walled spherical shell
01 p0167 A69-10326

Spherical shell pressure vessels investigated for optimum inhomogeneity and rigidity using Lagrange polynomials
01 p0167 A69-10327

Fabrication of large arched bottoms for pressure vessels from aluminum alloys, discussing sheet cutting and welding, annealing, machining, etc
02 p0254 A69-12678

Computer method calculating stressed state of elliptical bottom of cylindrical pressure vessel based on differential bending equations for shell of revolution
04 p0668 A69-14275

Ultrahigh pressure test vessel for determining pressure vs burning rate characteristics of propellants and explosives
04 p0645 A69-14472

Glass, boron and graphite filament wound resin composites and liners for cryogenic pressure vessels
05 p0785 A69-16488

Leak testing of welded pressure and vacuum vessels, considering nature of flow of gases through small restrictions
07 p1140 A69-18799

Rupture times in analysis of creep tensile instability in uniformly pressurized thin walled membrane shells of revolution, comparing two criteria
07 p1234 A69-19378

High pressure storage vessels for gaseous hydrogen, discussing failure, manufacturing controls and access for internal nondestructive inspection
[ASM PAPER D8-14.1] 07 p1143 A69-19666

Pressure vessel design to alleviate hydrogen embrittlement of steels for shock tunnel drivers
[AIAA PAPER 68-367] 09 p1477 A69-21993

Multilayer pressure vessel load carrying capacity calculated, using Huber-Mises yield condition to estimate axial force influence
09 p1618 A69-22257

Planar ribbon winding for buildup control of material near polar openings of filament wound vessels, discussing ribbon width and density
09 p1507 A69-22328

Pressure vessels burst tests for investigating alloys, fabrication processes and biaxial loading effects, noting vessel configurations and test temperatures
10 p1714 A69-23974

Deformations and stresses in pressure vessel with elliptical cross section under uniform internal pressure, noting radial deflection and membrane, bending and skin stress
11 p1983 A69-25023

High pressure vessels welding reliability improvement, discussing edge profile, air expulsion from vessel and shielding atmosphere
11 p1892 A69-25670

Heat treatable low alloy steels weldability for lightweight ultrahigh strength pressure vessels, gear and shaft fabrication in aerospace applications
12 p2100 A69-25827

Axisymmetric elastic stresses in ring stiffened segmented shells of revolution, noting finite difference method for nonlinear analysis and computer program
12 p2185 A69-26818

Materials rating method in pressure vessel applications, considering impact on design of minimum cost space launch vehicle
12 p2175 A69-26844

Liquid sloshing in vessel of complex geometry reduced to boundary value problem
14 p2428 A69-28969

Collapse pressure of flush cylindrical nozzle axisymmetrically intersecting conical pressure vessel for rigid plastic shells
15 p2704 A69-30289

Thick walled pressurized cylinder fatigue test results compared with axial tension and rotating beam tests on same material
15 p2709 A69-30676

Repeated static stress limit of internal pressure vessels, emphasizing effect of redistribution of stresses and strains
15 p2712 A69-30973

Stress-strain rate of glass fiber reinforced plastic pressure vessels under internal pressure, determining optimal fiber pattern
17 p3057 A69-33195

Fracture safe design practices for pressure vessels and piping, stressing transition temperature and proof testing roles
17 p3060 A69-33562

Forming and heat treatment process for stainless steel pressure containers using liquid N, discussing austenite-martensite transformation role
18 p3161 A69-34605

Deformation detection by stress wave analysis technique /SWAT/, noting pressure vessel applications
18 p3223 A69-35080

Graphite fiber NOL rings and biaxial wound pressurized cylinders tested at ambient and cryogenic temperatures for tensile and cyclic fatigue properties
19 p3355 A69-35521

Fracture mechanics applied to cylindrical pressure vessels containing longitudinal defects for fracture behavior prediction from fracture toughness or stress intensity factor
19 p3439 A69-36439

Stress analysis of cylindrical shell-end closure junction for optimum pressure vessel configuration prediction for nuclear reactor applications
19 p3447 A69-36861

Microplasma, W inert gas and submerged arc welding processes for fabrication of rocket motor cases and pressure vessels, discussing material requirements and weldability
[SBAC PAPER 7] 20 p3550 A69-37449

Thin cylindrical pressure vessels with circular cutouts and radial branches, observing limit pressures during plastic deformation
20 p3629 A69-38027

Axial through-cracks extension criteria in cylindrical pressure vessels, considering fracture toughness and plastic flow stress
[ASM PAPER W9-13.3] 21 p3833 A69-38658

Texture hardening combined with age hardening for biaxial strength improvement of Ti-Al-V alloy, discussing applications to spherical pressure vessels
21 p3729 A69-38662

Computer program for stress analysis of cylindrical pressure vessel with flat-end closures by thin shell theory
21 p3842 A69-39306

Static and fatigue strength of end-closed filament-wound vessels under internal pressure
21 p3846 A69-39797

Axial through-cracks extension criteria in cylindrical pressure vessels, considering fracture toughness and plastic flow stress
22 p4046 A69-41040

High strength austenitic Cr-Mn-Ni steel applicability to welded pressure vessels for cryogenic fluid storage, discussing operating temperature stability, weldability, etc
23 p4175 A69-41475

Fracture and tensile properties of electron beam welded Al alloy for pressure vessels compared to gas tungsten arc welding results
24 p4319 A69-42941

Nondestructive detection of titanium hydride formation in threaded joints of Ti alloy pressurization tanks by neutron radiography
24 p4320 A69-42998

Aerospace pressure vessel materials selection and construction, applying Apollo program experience to future programs
24 p4324 A69-43430

PRESSURE WAVES
U ELASTIC WAVES

PRESSURE WELDING
NT DIFFUSION WELDING
NT EXPLOSIVE WELDING
NT ULTRASONIC WELDING

Fusion, resistance and pressure welding of titanium, discussing shielding, brazing, diffusion and adhesive bonding
02 p0253 A69-12064

Adhesive pressure welded joints tightness and fabrication stability analyzed on duraluminum sheet samples
17 p2978 A69-32949

PRESSURIZED CABINS

Reinforced thin walled cylindrical pressure body nonlinear circumferential stress problem approximate solution, noting fatigue strength of aircraft pressurized cabins
04 p0548 A69-14838

Bleed air environmental system utilizing air to air jet pumps as flow multipliers for cabin pressurization air supply in commercial turboprop aircraft
[SAE PAPER 690331] 11 p1941 A69-24494

Pressurized Navajo aircraft environmental system, discussing ventilation, pressurization, heating and air cooling systems
[SAE PAPER 690330] 11 p1829 A69-24504

Fuselage corrosion effect on structure and skin of older aircraft with emphasis on pressurized aircraft
21 p3646 A69-38392

Decompression study simulating supersonic aircraft cabin small structural failure at 60,000 ft, using monkeys as subjects
21 p3665 A69-39171

PRESSURIZATION
NT FUEL TANK PRESSURIZATION

Gas flow analysis for externally pressurized porous journal gas bearing, considering circumferential flow in bearing clearance and porous bushing
01 p0085 A69-10312

Whirl instability of externally pressurized gas journal bearing with peripheral feeding holes, discussing analytical natural frequency of shaft bearing systems
02 p0254 A69-12426

Pressurized fluid journal bearing with fluid fed into space between shaft and shell from plenum chamber in bearing housing through circumferential slots
06 p0931 A69-17529

Externally pressurized gas lubricated journal and thrust bearings designs, citing reference literature
[ASME PAPER 68-LUBS-8] 13 p2267 A69-27282

Externally pressurized gas lubricated bearings treated theoretically using unevenly distributed supercharging method, noting Reynolds equation numerical integration
[ASME PAPER 68-LUBS-44] 13 p2267 A69-27283

Pressurized cylindrical shell creep analysis by elastic procedure extension using computer program
17 p3067 A69-34211

Wrinkling of pressurized cylindrical and conical free membrane column under lateral load, considering membrane sheets elastic properties
22 p4045 A69-40814

PRESTON TUBES
U PITOT TUBES
U SPEED INDICATORS

PRETRAINING
U PRESTRESSING

PRESTRESSING

Yield surface after prestraining under radial loading, analyzing formation of yield corner
01 p0166 A69-10303

Prestraining of stainless steel EN58b sheet at room and cryogenic temperature, noting effect on tensile properties
01 p0099 A69-11151

Material memory effect in plastically prestrained thin walled brass tubes analyzed on basis of kinematic strain hardening theory
02 p0336 A69-11551

Predeformations of thin walled elastic isotropic spherical shells analyzed using Vlasov shell bending theory
02 p0336 A69-11555

Butt weld fatigue properties improvement in maraging steels, using shot peening and prestretching
03 p0434 A69-13762

Subsequent yield surfaces in cross shaped brass plates determined after prestraining or cold rolling
04 p0682 A69-15302

Prestressing of aircraft wing stringers in order to reduce weight, noting initial bending moment, initial axial stress and prestressing methods
05 p0832 A69-15690

Stress effect on laser damage crack orientation in transparent organic dielectrics, estimating gas pressure in cracks
10 p1703 A69-23621

Secondary fatigue curves slope variation to determine preloaded materials fatigue life under unstationary loading
17 p3052 A69-32976

Prestressed beams, columns and plates nonlinear response, statistical behavior and transverse cracking under axial compression, describing strength and stiffness
17 p3060 A69-33568

Prestrained material plastic behavior experiments and deformation lines of influence analysis, noting importance in cold working
17 p3067 A69-34146

Rectangular cross section pretwisted beams modal curves for turbine and compressor blading vibrational studies
20 p3621 A69-37080

Strain gage and mechanical types of load-determining bolts selected on basis of application requirements and installation costs
22 p3957 A69-40829

Interference fit fasteners role in improving aircraft structure fatigue life through preload barrier against fatigue stresses
22 p3957 A69-40830

Mechanical properties of glass and glass-ceramics products improvement through prestressing
24 p4335 A69-43034

Adhesive joints design with uniform shear stress for prestressing wood beams
24 p4323 A69-43425

PRIMARY BATTERIES
U ALKALINE BATTERIES
U DRY CELLS
U THERMAL BATTERIES

PRIMARY COSMIC RAYS
NT SOLAR COSMIC RAYS

Primary cosmic radiation charge spectrum measurement during 1965 minimum solar activity, using balloon-borne Cerenkov scintillation counter
02 p3038 A69-12043

Underground search for massive strongly interacting cosmic ray particles, using shower selecting extension array and interaction detecting telescope
02 p0310 A69-12831

Deuteron microbeam for simulating biological effects of ionization by heavy cosmic ray particles
03 p0373 A69-13493

Numerical calculation of trajectories of high energy cosmic rays in galactic disk, using quasi-longitudinal model of magnetic field
03 p0501 A69-13960

Coupling coefficients between primary and secondary ionizing cosmic ray variations, using stratospheric observations in Siberia during IQSY
03 p0504 A69-14224

Heavy nuclei in cosmic rays analyzed in photographic emulsion tracks suggest supernova origin
04 p0649 A69-15422

Chemical composition of nuclear cosmic rays with Z greater than 22, noting etching techniques for utilizing meteoritic minerals as detectors
05 p0816 A69-16355

Energy spectrum and intensities of medium and very heavy nuclei in primary cosmic radiation
05 p0816 A69-16365

Heavy nuclei energy spectrum in primary cosmic rays explained by assuming two component charged nuclei
05 p0816 A69-16366

Elementary composition and origin of primary cosmic rays, discussing space techniques for observation of components
05 p0818 A69-16816

Heavy nuclei abundances and energy spectra in primary cosmic rays, using blob gap parameter as measure of primary ionization
06 p0988 A69-17274

Helium component flux in primary cosmic rays determined, using corrected alpha particles number
06 p0988 A69-17275

Oriented nuclear emulsion stack for determining differential rigidity spectrum of primary He nuclei between 12 and 35 bv
06 p0988 A69-17276

Rigidity spectra of total primary cosmic radiation by ascending or descending balloon-borne detectors in atmosphere, with changing mean response energy
06 p0989 A69-17279

Spark chambers for primary cosmic ray study in balloon flights, detailing construction and performance
06 p0924 A69-17285

Variational coefficients for vertical and inclined meson telescopes, deriving primary cosmic rays anisotropy parameters from daily variations
06 p0924 A69-17293

Primary cosmic ray intensity variation with cut-off energy of particular secondary component, using ground based monitors
06 p0925 A69-17295

Primary electrons implications on cosmic ray confinement in Galaxy, astrophysical aspects and problems of energy spectrum
06 p0991 A69-17308

Radio spectrum and cosmic ray electron data evaluated concerning conditions in Galaxy, deducing mean magnetic fields
06 p0991 A69-17309

Book on supernovae covering galactic supernovae, type II supernovae remnants, Crab Nebula, primary cosmic radiation, etc
07 p1210 A69-18379

Electron detector for OGO-E to measure flux and energy spectrum of electrons in primary cosmic rays
[IEEE PAPER 3C-4] 07 p1135 A69-19198

Cosmic ray nuclei energy spectra and abundances above 20 Mev/nucleon determined by OGO-1 satellite experiment, considering He, B, C, N, O, Ne, Mg, Si, Mn, Fe, Co and Ni
08 p1378 A69-20067

Low energy multiply charged cosmic ray nuclei propagation and source characteristics, considering two component model based on OGO satellite measurements
08 p1378 A69-20068

Galactic halo chronology determination by positron component flux measurement in primary cosmic rays
08 p1386 A69-20084

Energy spectrum of primary cosmic ray helium nuclei from nuclear emulsion stacks exposed in sounding rocket flights
08 p1378 A69-20264

Energy spectra of carbon and oxygen nuclei in primary cosmic radiation, comparing results to earlier measurements and satellite observation
08 p1380 A69-20632

Ablation rate of Saint-Severin amphoterite based on heavy primary cosmic ray track densities in surface samples
08 p1406 A69-20933

Geomagnetic activity correlation to cosmic ray solar daily variation underground, observing primary cosmic ray flux with meson telescopes
09 p1583 A69-22755

Weak interaction theory modifications needed for high energy cosmic ray muons to not violate conservation of probability
09 p1583 A69-22758

Satellite data on relative flux and group composition of heavy nuclei in primary cosmic rays
10 p1756 A69-22820

Secondary emission in low altitude satellite body dependent on inelastic collisions with primary cosmic ray protons
10 p1757 A69-22821

Mean distance between magnetic clouds in space determined from measuring anisotropy coefficient of high energy radiation
10 p1760 A69-23293

Primary cosmic rays, radiation belts and solar wind studies by semiconductor detectors installed on orbiting satellites
10 p1662 A69-23294

Secondary muon flux from primary cosmic ray particles monitored during minimum solar activity by telescopes at 60 mwe underground
10 p1769 A69-23827

Excess radiation in equatorial regions studied on-board Cosmos 137, noting contribution of primary particle multiplication to secondary radiation
10 p1783 A69-23922

High energy cosmic ray origin and acceleration by L.F. electromagnetic radiation produced by pulsars, noting maximum energy for protons
11 p1950 A69-24927

Cosmic ray composition and nuclear interactions at very high energies, comparing results of Monte Carlo simulations with various experimental data
12 p2149 A69-26475

Primary cosmic ray energy spectrum studies during 11-year cycle based on changes in intensity at various altitudes
12 p2149 A69-26682

Chemical composition of nuclear active particle component of primary cosmic rays in extensive air showers
13 p2326 A69-27464

Nuclear component energy flux absorption in Fe measured with ionization calorimeter
13 p2330 A69-28386

Primary particle energy and extensive air shower electron density relationship derived from vertical spectral profiles
13 p2331 A69-28396

Primary particles energy determined by probability distribution functions of cosmic ray showers characteristics, using Monte Carlo computerized calculation
13 p2332 A69-28411

Angular distribution function calculations for avalanche electrons at various stages of cascade development, discussing electron energies and primary electron roles
13 p2303 A69-28414

Primary electrons and gamma quanta generated electron photon cascades in Pb, obtaining error free cascade curves
13 p2304 A69-28416

Diurnal variation of cosmic ray muon intensity near geomagnetic equator and primary anisotropy monitored by cubical counter telescope
14 p2512 A69-28966

Fluorine nuclei in primary cosmic radiation identified by counter telescope measurements on Pioneer 8 spacecraft
15 p2676 A69-30886

Matter traversal of high energy primary galactic cosmic ray protons from antiproton flux and energy measurements
15 p2678 A69-31491

Charge sign ratio of primary cosmic ray electrons measured by balloon flown multilayer spark chamber, studying east-west asymmetry
15 p2678 A69-31497

Near horizontal air showers relationship to direct muon production and heavy triplet particles of unit charge, discussing nuclear interactions and muon bremsstrahlung
15 p2678 A69-31499

High energy cosmic ray proton, electron and photon propagation through cosmic microwave background, discussing mean free paths
16 p2852 A69-32819

Depth distribution of primary cosmic radiation fluxes and secondary nuclear-active particles in stone meteorites and surface layer of planets, moon and asteroids
19 p3410 A69-36092

Densities and angular distributions of fossil tracks in meteorites produced by slowing down heavy primary cosmic ray nuclei
19 p3410 A69-36096

Trans-iron nuclei flux in primary cosmic radiation determined through high altitude balloon exposure of interleaved layers of nuclear photographic emulsion and plastic detectors
21 p3787 A69-38327

Primary cosmic ray nuclei studies during Gemini 2 flight by nuclear emulsion detector with time resolution capability, describing experiment design and equipment operation
21 p3787 A69-38350

Primary cosmic rays solar diurnal modulation, measuring relative amplitudes and phases over full cycle
21 p3788 A69-38547

High energy cosmic rays primary spectrum determined from observations of secondary components including gamma rays, muons and air showers
21 p3790 A69-38822

Primary and secondary cosmic ray intensity variation with altitude from ascending balloon data, noting absorption length role
21 p3791 A69-39249

Extensive air showers temporal distribution of electrons by diffusion equations in A approximation compared with experiments and Monte Carlo calculations
22 p4007 A69-41054

Neutrons energy spectrum at sea level calculated and proved consistent with satellite cosmic ray data
23 p4205 A69-41701

PRIMATES

NT BABOONS
NT CHIMPANZEES
NT HUMAN BEINGS
NT MONKEYS

Biological effects of proton irradiation of monkeys investigated to provide improved protective shield design data with minimum weight penalty
03 p0373 A69-13496

Primates for space research, discussing selection, purchase, handling and use as controls in observations of disorders experienced by man
09 p1445 A69-22723

Statistical critique of Polyak values for tangential dendritic spread of primate retinal neurons
22 p3880 A69-40848

Circadian rhythms in nonhuman primates - Conference, Atlanta, July 1968
24 p4259 A69-42701

PRIMERS [COATINGS]

Low temperature bond failures of room temperature vulcanizing methyl-phenyl adhesive bonds attributed to thermal stress cracking of primer, presenting in-process tests
19 p3321 A69-35563

PRIMERS [EXPLOSIVES]

Primary explosives tested for effects of shock, friction, heat and electrical discharges
10 p1750 A69-23010

Silver and cadmium nitrides, copper chlorotetrazolate and barium and potassium dinitrobenzofuroxannates compared for priming explosive applications
10 p1750 A69-23011

Priming explosives analysis suggesting physicochemical methods for high purity products for space applications
10 p1750 A69-23012

Initiation of priming explosives by electrons, photons, electrical discharges and laser radiation
10 p1751 A69-23017

Secondary explosives ignition by primers and other explosive wire devices on missiles, discussing circuitry and resistance to severe climatic and electrical environments
10 p1751 A69-23021

PRINTED CIRCUITS

Printed circuits development based on use of grid without aid of draftsmen
02 p0216 A69-12051

Printed circuit board wiring technique for strain gage rosettes application in extensive airframe static tests
02 p0250 A69-12231

Flexible printed circuitry electrode arrays fabrication for surface cortical potentials recording in animals
02 p0204 A69-12601

Loss factors effects on substrate choice in production of microwave printed circuit components
04 p0578 A69-15199

Additive processing technique for fabrication of single sided, double sided and multilayer printed circuit boards
07 p1100 A69-18621

IR evaluation of multilayer etched circuit boards, discussing testing of circuit distributive properties and individual layers
07 p1117 A69-19698

Computer aided automatic drawing of printed circuits, including design and manufacture of films for engraving
08 p1296 A69-19979

Microsoldering techniques for thin and thick film hybrid circuits and microminiature printed circuit boards
09 p1510 A69-22349

Flat flexible printed circuitry in AWG-10 missile control system on F-4J, regarding wire harness packaging
09 p1511 A69-22356

Flexible printed circuits manufactured by offset rotogravure printing, noting production cost economies
09 p1511 A69-22357

Electronic module testing with integrated hardware/software system, noting module test console and manual capabilities
11 p1864 A69-25065

Doppler radar clearance hole packaging method for ruggedized dual in-line integrated circuits with conventional etching, tooling and double-sided printed wiring techniques
14 p2419 A69-29102

Automation of wiring diagrams and printed circuit conductor patterns by computerization
15 p2632 A69-31520

PRINTERS [DATA PROCESSING]

Alphanumeric listing and digital data x-y plotting by high speed printer, describing equipment modifications and control software
17 p2932 A69-33108

Micromation and micrographics, discussing nonimpact printing in computer avoiding output imbalance by high speed microfilm recorder
18 p3234 A69-35059

PRINTING

NT LITHOGRAPHY

Orthophoto maps production, discussing scales, aerial photography, control points, orthoreprojection, cartography and printing
22 p3951 A69-41246

PRISMATIC BARS

Plastically twisted prismatic bars with transverse discontinuous inhomogeneity, using sand hill analogy to determine stress field and limiting torque
03 p0524 A69-13021

Self excited aeroelastic galloping oscillations of long prismatic bodies subjected to wind velocity, noting effect of aerodynamically unstable cross sections
09 p1615 A69-21923

Saint Venant torsion and flexure of prismatic bars analysis in polar coordinates, discussing boundary errors
09 p1621 A69-22770

Transverse reinforcing straps effects on torsional stiffness and bending behavior of open cross section profile thin walled prismatic beams
10 p1802 A69-23890

Discrete element plastic analysis of long prismatic bars under transverse loading in longitudinal direction, based on matrix displacement method
13 p2365 A69-28237

Membrane analogy for flexure of prismatical beams with square cross section and longitudinal cavities, employing Saint-Venant solution
15 p2704 A69-30288

Torsion of composite prismatic rod consisting of three different isotropic materials with two interfaces converging on cross section contour corner point
15 p2707 A69-30579

Vibration modes and damping of rectangular cantilevered prismatic steel rods, showing effects of transverse vibration, material and stress on logarithmic decrement
17 p3065 A69-33936

Laser emission divergence reduced by compensating optical inhomogeneity of active elements with prismatic reflector in resonator
17 p2983 A69-33970

Torsion analysis of curvilinear rectangular prismatic beam reinforced by off-center circular rod, using conformal mapping
22 p4049 A69-41279

Prismatic beam stress-strain state under steady temperature field, deriving stresses, displacements and elastic curve equations
23 p4227 A69-41708

Nonlinear formulation for rigid jointed space frame comprised of prismatic linear elastic members, using Newton-Raphson and successive substitution methods
23 p4232 A69-42142

PRISMS

NT PRISMATIC BARS

One dimensional expansion of laser beam, using pairs of prisms with continuous wave output
01 p0091 A69-10852

Glan-Thompson and Rochon prisms modified by replacing one of two calcite halves of cemented oriented birefringent crystals with glass
02 p0280 A69-11924

Fluid flow velocity measurements by optical device having trigonal rectangular glass prisms and microscope objective
03 p0427 A69-12969

Pulsed ruby laser threshold and output energy for different relative orientations of rectangular prism and ruby crystal main crystallographic axis
05 p0777 A69-16526

Laser beam discrete deflection method using Wollaston prism and electro-optical switch for changing polarization plane
14 p2459 A69-29391

Initial flow turbulence effects on drag coefficient for prismatic bodies in low velocity gas flow determined by wind tunnels
14 p2391 A69-29625

Drag and lift coefficients of moderate aspect ratio prismatic bodies analyzed as function of angle of attack, Reynolds number and aspect ratio
17 p2896 A69-33717

Coupled dilatational and equivoluminal modes of free vibration for elastic prisms and polygonal plates, using Poisson ratio and wave path construction
19 p3444 A69-36801

PROBABILITY DENSITY FUNCTIONS
NT NORMAL DENSITY FUNCTIONS
NT PEARSON DISTRIBUTIONS
NT RAYLEIGH DISTRIBUTION
NT WEIBULL DENSITY FUNCTIONS

Error probability distribution density at output of optimal Gaussian random signal detection, using approximate solution of integral equations
02 p0206 A69-11605

Computer program for calculating density distribution of deviation of F 2 layer critical frequency from median value
02 p0239 A69-11692

Probability density function measurement for microwave noise generator
02 p0221 A69-12459

Voltage probability density of wideband microwave noise, discussing measurement technique of dividing spectrum down by noise bandwidth
02 p0211 A69-12460

Probability density distribution of time shifts in binary signal fronts caused by fading, applying results to FM signal reception
05 p0719 A69-16087

Algorithm for discriminating random signals with unknown mean values, discussing decision functions possible existence to minimize error probability
05 p0719 A69-16218

Mean number of polarization coefficient modulus zero crossings for field reduced at reception point to uncorrelated orthogonally polarized components
05 p0720 A69-16445

Time averages for estimating probability distribution, density and moments of random functions applied to deterministic signals, considering sampling frequency dependence
05 p0722 A69-16729

Upper bound obtained for probability of zero Gaussian random process remaining above specified signal throughout prescribed interval of time
09 p1452 A69-21319

Density functions analytic solution for Fokker-Planck equation representing cascaded phase locked loops
09 p1474 A69-22450

Probability of completing countdown in single malfunction encounters, considering development of industry and government guidelines
10 p1792 A69-22979

Zero crossing statistics measurements for 1/f noise, noting statistically stationary character of probability density distributions of interval spacings between zero crossings
10 p1656 A69-23657

Optimal estimation of conditional mean of posterior probability density function in multistage nonlinear filters, using Monte Carlo techniques and Bayes theorem
10 p1667 A69-24039

Error probability distribution density at output of optimal Gaussian random signal detection, using approximate solution of integral equations
11 p1835 A69-24712

Rod load capacity changes due to random overloads constituting upper limit of stress probability distribution density function used in programmed fatigue tests
11 p1985 A69-25180

Nonlinear systems disturbed by random white noise analyzed by Fokker-Planck equation for probability density in state space
12 p2124 A69-27141

Computer program for calculating density distribution of deviation of F 2 layer critical frequency from median value
13 p2258 A69-28723

Probability density functions of waveforms from summation of digits in n-stage shift register generating m-sequence
15 p2568 A69-30617

Satellite signal probability density determined from scintillation plus Faraday effect in statistical terms
16 p2751 A69-32103

Mean number of polarization coefficient modulus zero crossings for field reduced at reception point to uncorrelated orthogonally polarized components
16 p2753 A69-32478

Robust detection of binary signal in additive noise, using extreme value theory /EVT/ to estimate probability density function and system error and threshold
17 p2944 A69-33624

Fokker-Planck equation applied to probability density for finding rays larger than correlation distance during propagation in random medium
17 p2926 A69-33854

Hazard and renewal rate and bathtub curves for electronic equipment reliability, noting single and multiple probability densities
20 p3504 A69-37070

Least square or least mean square approximation methods in abstract pattern recognition, noting unknown probability density function
20 p3504 A69-38285

Adaptive control system synthesis for reducing computation labor for controlled inertialess plant, reproducing probability density function to describe unknown parameters
22 p3918 A69-40739

Radar return from clutter target with circular polarization, finding probability density functions and cumulative distributions of power ratio
23 p4131 A69-42540

PROBABILITY DISTRIBUTION FUNCTIONS
Monte Carlo simulation procedure synthesizing probability distributions of reliability parameters with individually exponential components
01 p0036 A69-10707

Computer program for calculating density distribution of deviation of F 2 layer critical frequency from median value
02 p0239 A69-11692

Probability density distributions for monaural detection of tonal signal in continuous background of Gaussian noise as modified noncentral chi distribution
02 p1201 A69-11821

Optimal detection of random signals on background of noise of unknown intensity and persistent false alarm probability
02 p0208 A69-12264

Probability distribution of field strength fluctuations in p-n junctions taking into account impurities distribution
05 p0807 A69-16000

Time averages for estimating probability distribution, density and moments of random functions applied to deterministic signals, considering sampling frequency dependence
05 p0722 A69-16729

Double stochastic approximation algorithm for minimizing mean square error in finite expansion of unknown probability distribution functions
06 p0947 A69-17361

Synoptic meteorological predictions using statistical dynamic approach, considering probability distributions and nocturnal temperature decay
08 p1345 A69-20300

Continuous variate duration estimates by Markov process, giving example of surface air temperature conditional probability distribution
08 p1346 A69-20731

Computer programs for systems statistical reliability characteristics using reliability tests and time to failure data, giving optimal breakdown probability functions
08 p1322 A69-21101

Failure distribution functions based on Eyring component aging model, including failure probability density function for Weibull and gamma type distributions
08 p1322 A69-21104

Statistical regularization for obtaining a priori probability distribution information on mathematically incorrect inverse geophysical problems, deriving algorithm
10 p1689 A69-23968

Radio signals and concentrated noise amplitudes probability distributions reflected from ionosphere and scattered in troposphere calculated for Rayleigh and log-normal fading
11 p1833 A69-24440

GO/NO/GO logic synthesis for probability functions development for systems operational readiness tests
11 p1843 A69-25078

Rod load capacity changes due to random overloads constituting upper limit of stress probability distribution density function used in programmed fatigue tests
11 p1985 A69-25180

Probability distributions of characteristics of mass produced semiconductor rectifier diodes
12 p2035 A69-25832

Cumulative probability distribution of positive random variable from moment generating function, exemplifying exponential and Poisson functions
12 p2120 A69-25927

Random variables generation from distribution having given failure rate function
12 p2102 A69-26571

Joint probability distributions of electric microfield in hot ionized plasma consisting of noninteracting particles
12 p2139 A69-26871

Primary particles energy determined by probability distribution functions of cosmic ray showers characteristics, using Monte Carlo computerized calculation
13 p2332 A69-28411

Computer program for calculating density distribution of deviation of F 2 layer critical frequency from median value
13 p2258 A69-28723

Time dependent evolution of probability pressure distribution maximum obtained from Liouville equation
14 p2472 A69-29406

Optimum nonlinear digital filter synthesis for smoothing, predicting and differentiating measured quantity having uniform probability distribution over finite number of discrete values
14 p2426 A69-29421

FM discriminator click widths probability distribution function, defining click widths duration from input noise considerations
14 p2422 A69-29553

Moving targets trajectories determination from radar data, using posteriori probability distribution represented by Markov chain
15 p2566 A69-30334

Fluctuation spectra of monotonic gases, using two time probability distributions for distribution function autocorrelations
16 p2817 A69-31669

Modified pulse height analyzer /PHA/ for sample amplitude height occurrence frequency measurements obtaining amplitude probability distribution /APD/ and three moments of atmospheric noise
18 p3102 A69-34960

Thunderstorm probabilities at Cape Kennedy, giving data on frequency, duration, multiple occurrence, nonoccurrence, runs and conditional probabilities
18 p3167 A69-35100

Mechanical components life or cycles to failure probability distributions determined by Monte Carlo method, comparing theory with aircraft engine parts field data
19 p3327 A69-36031

Statistical description of turbulence of viscous incompressible fluid at large Reynolds numbers, using velocity distribution probability
20 p3517 A69-38007

Statistical regularization for obtaining a priori probability distribution information on mathematically incorrect inverse geophysical problems, deriving algorithm
21 p3680 A69-39654

Error probability of Gaussian signal detector in Gaussian noise background determined from quadratic form of probability distribution density
22 p3901 A69-40955

Radar return from clutter target with circular polarization, finding probability density functions and cumulative distributions of power ratio
23 p4131 A69-42540

Quantization optimization of continuous signals with known probability distribution, using quantizers with limited output values
24 p4288 A69-42671

PROBABILITY THEORY
Survival analysis based on probability theory for design of air cushion vehicle to determine height for operating over open sea
01 p0008 A69-10027

Asymptotic behavior of probabilities of large deviations of sums of independent random variables with moments of any order
01 p0104 A69-10264

Probabilities of error, correct reception and signal cancellation in radio communication systems channels with signal absorption fading
01 p0030 A69-10592

Meteorological probability assessors, describing framework for evaluation consistent with subjective probability theory

01 p0110 A69-10690

Monte Carlo method accuracy improvement for calculating probability characteristics of nonlinear ordinary differential equations, describing nonlinear automatic control

01 p0105 A69-10730

Probability characteristics of temperature and supply voltage dependent parameters of semiconductor equipment

01 p0047 A69-10783

Probabilistic Information Processing System using men and machines to perform diagnostic information processing and to guide decision making

01 p0037 A69-10954

Sequential probability ratio test for detecting changes in Gauss-Markov process characteristics, noting application to fault detection in gyro navigational system

01 p0083 A69-11002

Book on probabilistic information theory-discrete and memoryless models covering information transmission, digitalized sources, generating functions, decoding error, systematic codes and sequential decoding

01 p0037 A69-11030

Multistage detection systems probability characteristics with parallel stage realization, taking into account signal losses

02 p0206 A69-11604

Filter uncertainty for time or frequency resolution in analysis of waveform, decomposing characteristic functions and determining least uncertain realizable filter

02 p0226 A69-12306

Book on compound signals and uncertainty principle in radar observations, considering Woodward ambiguity function, determining accuracy and resolution of range and velocity measurements

03 p0385 A69-13000

Undetected defects and false alarm probabilities for automatic test equipment, emphasizing quality and confidence limits

03 p0428 A69-13187

Absorption as factor influencing correlation between solar activity, sporadic E layer probability of occurrence and reflection stability

03 p0423 A69-13537

Maximum probability technique for measuring angular coordinate with unknown signal and noise intensity

03 p0399 A69-14132

Optimal detection of deterministic signals with random initial phase on background of unknown intensity noise under condition of constant false alarm probability

04 p0557 A69-14788

Conditional probabilities, definition and algebra

04 p0623 A69-14948

Delay method of finite ergodic Markov chains, analyzing first moments of state probabilities with aid of asymptotic equation

04 p0624 A69-15002

Laws of wear and average life, noting application to electric connector reliability

04 p0579 A69-15320

Distribution free sequential probability ratio procedure for detecting signal in multiple resolution element radar

05 p0717 A69-15609

Standards of sterility for prevention of introduction of terrestrial microorganisms onto other planets during space missions, noting contamination probability

05 p0712 A69-15936

Probability theory and Laplace functions used to determine pulse coincidence probability of two random independent pulse streams in given time

05 p0719 A69-16224

Statistical aspects of uncertainty function of linearly frequency modulated signals for nonstationary random process of phase errors

06 p0889 A69-17798

Bit error probability for noncoherent binary FSK link involving Rician interfering signal

07 p1080 A69-19095

Bit error probability estimation of NRZ PCM synchronizer and detector operating in presence of fluctuating data frequency source

07 p1083 A69-19121

Antenna pattern loss factor for determination of average probability of detection vs SNR curves for three dimensional or pencil beam radars

08 p1270 A69-19858

Nonparametric ranking procedures based on order statistics/ guaranteeing preassigned probability for

selection from random samples populations as good as control

08 p1342 A69-20172

Book on stochastic convergence covering infinite sequences of random variables, stochastic integrals and derivatives, characterization of normal distribution and Wiener process

08 p1343 A69-20443

Angular separation of two point sources measured through expressing antenna resolving power by a posteriori probability laws

08 p1288 A69-20961

Error probability for transmission of one of M orthogonal, equally likely, equal energy signals over generalized incoherent channel

09 p1452 A69-21314

Round trip delay effect on probability of error in uncertainty feedback communication systems operating at channel capacity

09 p1453 A69-21322

One and two dimensional frequency distributions for probability estimates of climatological quantities, discussing temperature and interdiurnal changes

09 p1535 A69-21520

Coding schemes for memoryless Gaussian channels with feedback considering error probabilities

09 p1454 A69-21794

Probability approach to control system optimization problem for plant with incomplete information

09 p1473 A69-21856

Optimal detection of determinate signal and signal with random amplitude and phase, estimating probability of false and correct detection

09 p1456 A69-22286

Random data detection method applicable to low voltage SNR cases using real time correlation of probability functions

09 p1459 A69-22593

Probabilities of error, correct reception and signal cancellation in radio communication systems channels with signal absorption fading

10 p1653 A69-23106

Probability characteristics of temperature and supply voltage dependent parameters of semiconductor equipment

10 p1661 A69-23112

Variational approximation of probability measures and products of random matrices, discussing point distribution on Lobachevskii plane

10 p1719 A69-23399

Error correction of digital data with cyclic codes and probability function set extended to Bose-Chaudhuri-Hocquenghem codes and P super M codes

10 p1655 A69-23529

State probabilities of finite stochastic queueing system for calculating equipment reliability parameters

10 p1664 A69-23693

Optimizing two stage procedure for detecting fluctuating incoherent signal, estimating detection attempts reliability

11 p1833 A69-24444

Probability models used in statistical approach to fracture mechanics, noting role of weakest link model in representing brittle fracture

11 p1975 A69-24673

Multistage detection systems probability characteristics with parallel stage realization, taking into account signal losses

11 p1835 A69-24711

Probability of ocular damage for illumination by pulsed laser beam transmitted through atmosphere, developing safety nomograph for eye hazard analysis

11 p1830 A69-24843

Minimum test error probability test limits for known test equipment and signal tolerances, developing semi-graphically single equation for calculation

11 p1865 A69-25079

Microbial contamination release probability from solids fractured by impact, considering spacecraft sterilization requirements

11 p1828 A69-25461

Descriptive statistics in quality control dealing with variability and probability, discrete and continuous variables, frequency distributions and measures of central tendency and dispersion

12 p2100 A69-25846

Integral representation for continuous linear stochastic processes with independent pieces, assuming convergence in probability for sequence of random variables

12 p2121 A69-26365

Approximate solution of boundary value problems for Fokker-Planck equation to determine probability of exceeding limits in nonlinear automatic control systems

12 p2054 A69-26653

Probability analysis by methods simplifying calculations or providing bounds on reliability of complex system

12 p2103 A69-26751

Differential equations of probability theory for studying control systems and processes involving random variables

12 p2124 A69-27142

Inductive converters accuracy calculation by statistical method based on probability theory

13 p2259 A69-27424

Parallel processing in system of computers with identical output, including probability graph for algorithm

13 p2224 A69-27426

Bounding technique of first excursion probability for random vibration, considering relation to reliability of mechanical and structural systems under random disturbances

13 p2361 A69-27438

Probable sign-invariant periods of air temperature anomalies based on random Gaussian processes

13 p2294 A69-27855

Radar SEP /spherical error probable/ for defining error ellipsoid in three dimensional accuracy and CEP /circular error probable/ for defining two dimensional accuracy

13 p2221 A69-27963

Book on probability and stochastic processes, discussing applications

13 p2289 A69-28177

Probability matrix for n order transition independent of decision taking method, applying fundamental matrices to analysis of mean number of false targets

14 p2410 A69-28836

Thermionic converter components reliability under mechanical load and failure models, showing probabilistic nature of failures

14 p2400 A69-29227

Qualitative analysis of CAT parameters from radio sounding data, noting mean bumpiness probability dependence on Richardson number and wind vector shift

14 p2474 A69-29735

Complex pulsed radar signals synthesis with uncertainty function having principal maximum and small secondary maxima for radar stations and wideband communications systems

15 p2563 A69-30140

Probability diagnosis and prognosis for buffering zones based on Bayes formula, determining clear air turbulence zones

15 p2648 A69-30645

Initial uncertainties role in weather forecasting, discussing errors as represented by rms deviation of ensemble members from mean

15 p2649 A69-30894

Research and development planning and control models based on subjective probability estimates for failing projects identification

15 p2721 A69-31072

Probabilistic automata stochastic matrices algebraic properties of definite, quasi-definite, periodic and quasi-periodic sets

15 p2645 A69-31141

Hazards model for probabilistic prediction of casualties by exploding solid propellant rockets, deriving casualty expectation equation [AIAA PAPER 69-461]

16 p2869 A69-32749

Probabilistic analysis of code message distortion due to pulse noise in modulation systems and comparison between linear and quadratic detections

17 p2919 A69-33145

Spatial frequency distribution of linear array with randomly located elements from probabilistic analysis

17 p2929 A69-33873

Satellite attitude control mass properties, showing weight tradeoff analyses role in selecting control system [SAWE PAPER 743]

18 p3208 A69-34885

Evaluation method for strapdown spacecraft guidance systems on automated interplanetary missions, using cost and system performance efficiency probability model [AIAA PAPER 68-828]

19 p3370 A69-35953

System reliability with allowable downtime, calculating probability of on-line units staying operational during mission time using conditional availability

19 p3326 A69-36002

R and D program risk evaluation methodology in density functions form for program goals probabilities, noting random variables as parameters

19 p3455 A69-36008

Successful launch probability analyzed as function of launch strategy from past countdown hold data

19 p3430 A69-36034

Asymptotic behavior of probabilities of large deviations of sums of independent random variables with moments of any order
19 p3360 A69-36199

Perceptron probability algorithm for random events prediction based on previous histories, applying Bayes formulas, static solutions formulas and transition probability tables and graphs
19 p3287 A69-36664

Book on stochastic optimal linear estimation and control, discussing probability theory, models and continuous and discrete time linear systems
20 p3509 A69-37143

Time-space variations in occurrence probability of ionospheric E-2 layer during solar activity maximum and minimum
20 p3527 A69-37672

Probability theory applied to age and block replacement models in preventive maintenance of parts, noting inspection cost distribution
20 p3551 A69-38267

Antenna arrays subject to random excitation error analyzed by probability theory, noting relationship between antenna pattern and excitation distribution parameters
21 p3681 A69-38742

Spacecraft return probabilities with time constraints and redundant access, using Borel set concept for counting and summing coverage belts
21 p3819 A69-39017

Gaussian type densities estimated by representing unknown density in terms of convolution expansion of Gaussian probability density and arbitrary distribution, discussing convergence rates
21 p3756 A69-39499

Stacking fault formation probability in Ti and Zr by X ray diffraction techniques, using Fourier analysis and half-width measurements
21 p3749 A69-39600

Probability characteristics of total error in vertical gyroscope evaluated from component errors along suspension axes
22 p3946 A69-42051

Risk taking under uncertainty in individual and group decisions, analyzing gambling and group discussion situations
23 p4091 A69-42016

Most probable position determination in astronomical navigation by tracing lines on nautical chart
23 p4186 A69-42025

Error probability bounds for self synchronized binary PSK communication systems, simulating decision feedback, phase doubling and maximum likelihood systems
23 p4128 A69-42501

Algorithm for constructing random error correcting convolutional codes
24 p4284 A69-42723

Transmission functions probabilistic model for solving radiative transfer problems in spherical shell medium surrounding emitting black core or point source, using integrodifferential equations
24 p4415 A69-43637

Satellite system survival probability expressed as function of launch probability, time and number of satellites available
[AIAA PAPER 67-324] 24 p4249 A69-43665

PROBES

Cooled probes for gas measurements in high pressure arc jets, hyperthermal wind tunnels, rocket motors, scramjets and similar severe environments
01 p0078 A69-10150

Electron density and temperature, ion density, composition and temperature and plasma space potential relative to space vehicle potential measured by spherical probe assembly
01 p0065 A69-10549

PROBLEM SOLVING

NT ASYMPTOTIC METHODS
NT ITERATIVE SOLUTION
NT THEOREM PROVING

Exchange rule to solve system of linear matrix equations in sense of Chebyshev, giving various algorithms
01 p0105 A69-10705

FORTTRAN Deductive System to find solutions to theorem proving problems, discussing computer implementation
01 p0037 A69-10806

Finite element method for exact solution of more general problems with one independent variable and extension to many dependent variables
04 p0676 A69-14741

Stability of quasi-solutions for equations with closed and with continuous operators
13 p2289 A69-28483

Solution methods for differential heat conduction equations, discussing methods of variable separation, Green function, thermal potentials, etc
14 p2539 A69-29456

Convergence of methods of tangential parabolas and hyperbolas used in nonlinear equation solution with nondifferentiable operators
18 p3164 A69-34707

Technical problem solving model based on tape recorded protocols of engineers engaged in R and D project
20 p3640 A69-38020

Basic task archetypes in man-computer problem solving including detection, planning, optimization, designing, etc
24 p4274 A69-43019

PROCEDURES

U OPTICAL CORRECTION PROCEDURE

PROCESSORS [COMPUTERS]

U COMPUTERS

PROCUREMENT

Military aircraft procurement trends examined to forecast military aircraft market
01 p0009 A69-10147

Procurement procedures in management planning, discussing document flow charts, contract negotiation, etc
15 p2719 A69-30314

PRODUCT DEVELOPMENT

NT WEAPONS DEVELOPMENT

Handbook on fatigue properties for product design covering metals stress conditions, machine parts load and stress determination, cyclic stress, etc
01 p0170 A69-10918

Fabrication of large arched bottoms for pressure vessels from aluminum alloys, discussing sheet cutting and welding, annealing, machining, etc
02 p0254 A69-12678

Industrial and workman safety concept evolution, discussing role in product design engineering
[SAE PAPER 680676] 03 p0433 A69-13449

Optical and mechanical design of Anglo- Australian 150 inch telescope for observations of southern sky at Siding Spring Observatory, Australia
03 p0411 A69-13466

Cost effective aerodynamic deceleration and retardation systems for military and space programs, noting technical research and development areas in need of advancement
03 p0364 A69-13854

Single crystal cells for construction of large deployable solar cell arrays
03 p0368 A69-13993

Product development process diagram, systems engineering checklists and program plankit as devices to assist product manager
[ASME PAPER 68-WA/MGT-3] 05 p0850 A69-16146

Substrates containing silicon regions separated by silicon dioxide or ceramic dielectrics, prepared by lamination in hot press, noting applications to integrated circuits
07 p1100 A69-18617

Research and development programs for several advanced rotary wing VTOL concepts
[AIAA PAPER 69-199] 07 p1055 A69-19555

Avionic systems development, discussing criteria for realization of operational requirement and engineering product satisfying requirement
[AGARDOGRAPH-114] 08 p1317 A69-20982

Integrated circuit production, development and research in Germany
[AGARDOGRAPH-114] 08 p1292 A69-20994

Induction flowmeters design, discussing materials and structural details of sensor and transducer elements
11 p1887 A69-25208

Type 2 ceramic capacitor manufacture, selection and control in Concerto space program
11 p1853 A69-25393

Aircraft engine spark plugs development, reviewing ceramic and mica insulated plugs and four pole electrode spark plugs
13 p2324 A69-27333

Ultralightweight mirror blanks for astronomical telescopes, discussing weight saving low thermal expansion and fused monolithic core technology
13 p2261 A69-27953

Capital budgeting for R and D, discussing control of rising costs
14 p2541 A69-29281

Systems engineering approach to aerospace product defects minimization, discussing scope, contract

development, mainstream functions, component development, design data and subsystem integration
15 p2719 A69-30085

Barometric altimeters development, discussing servo and three pointer types, accuracy, Central Air Data Computer repeater function and future trends
15 p2610 A69-30859

Reliability testing of development models during production, considering short term and large batch tests
15 p2579 A69-31036

Mathematical model for money expenditure on product oriented research programs, based on accumulated profits
15 p2721 A69-31068

Propulsion system influence on aircraft reliability from viewpoint of engine manufacturer
15 p2629 A69-31122

Fatigue data adapted to conditions of specific design part including fatigue limits, S-N curves and various failure diagrams
16 p2794 A69-32433

JT8D turbofan engine composite fan blades design and fabrication methods using aluminum-Borsic fiber, noting direct and indirect weight reduction
[AIAA PAPER 69-465] 16 p2842 A69-32698

Engine and components reliability, discussing design stage and programming
[AIAA PAPER 69-476] 16 p2795 A69-32771

Small penetration axial rocket motors fabrication, discussing axial- and tangential-thrust integral assembly, impulse levels, delay line connection for igniters, production evolution, etc
[AIAA PAPER 69-520] 16 p2795 A69-32779

German VTOL aircraft development excluding helicopters, discussing technical problems, safety and economy in civil application
17 p2899 A69-33381

R and D for economic growth, discussing interaction between management, planning, engineering, marketing, production, customers and competitors
17 p3077 A69-34126

Development, manufacturing and logistic costs of reliability improvement in electronic equipment design
18 p2321 A69-34485

Electronic data processing facilitating engineering design development work, including computer programming
18 p3106 A69-34838

French helicopter industry projected development for existing types, production models or final development and long range design programs
19 p3248 A69-36848

Impact limiter system design for Mars landing vehicle noting balsa wood or phenolic honeycomb construction
[AIAA PAPER 68-161] 21 p3820 A69-39228

Linear elastic isotropic materials for model tests, describing properties of material composed of Araldite B and air
21 p3844 A69-39319

Thermal scale modeling for space hardware development from managerial and engineering viewpoints
[AIAA PAPER 69-1010] 22 p3922 A69-40383

NDT techniques relation to engineering design problems with failure potential, discussing management planning and cost analysis
24 p4318 A69-42769

Mechanical properties of glass and glass-ceramics products improvement through prestressing
24 p4335 A69-43034

PRODUCTION ENGINEERING

Silicon carbide filament fabrication by chemical vapor deposition, noting physical and mechanical properties and application to other refractories
01 p0097 A69-10645

Integrated circuit manufacturing status, discussing raw materials, crystal imperfections, surface damage, epitaxy and diffusion techniques
01 p0045 A69-10650

Fabrication of large parts in aircraft and space industry, discussing extrusion, forging, explosive forming and diffusion bonding
01 p0088 A69-11400

Reinforcing glass fiber fillers in thermoplastic commercial products, noting applicability to high speed fabrication by injection molding processes
02 p0269 A69-11794

Compressed air in aircraft manufacture, discussing versatility in production and testing of Concorde 002
02 p0253 A69-12069

Large scale integration /LSI/ arrays, discussing high yield manufacturing methods based on fixed nondiscretionary connections among components
02 p0254 A69-12467

Wafer chip assembling technique for high density interconnection of silicon devices in large monolithic electronic systems, noting application to MOS shift register
02 p0222 A69-12472

Microelectronic components joining technique by compliant bonding, utilizing deformable medium between tool and beam leads to eliminate intricate tool shapes and alignments
02 p0254 A69-12473

Industrial and workman safety concept evolution, discussing role in product design engineering
[SAE PAPER 680676] 03 p0433 A69-13449

Production history of Model UH-1/Huey helicopter power transmission, discussing producibility
[SAE PAPER 680675] 03 p0433 A69-13450

Electron beam welding procedure planning and production shop control parameters
04 p0605 A69-14529

Explosive welding application to dissimilar metals and tube to tube plate welding, noting influence of detonation and sound bulk velocity
04 p0608 A69-15481

Plasma arc welding, discussing transferred and non-transferred arc systems application to spraying and welding techniques, including automated microplasma welding
04 p0608 A69-15482

Electron beam process application to welding, machining and assembling in automobile mass production
04 p0608 A69-15484

Quality control in welding from design through experimental manufacture, product testing, large scale production and improvements
04 p0608 A69-15485

Self acting gas lubricated bearings production, discussing manufacture to ultraprecision tolerances by semiskilled labor
[ASME PAPER 68-WA/LUB-4] 05 p0768 A69-16130

Book on machinability and producibility of metals, plastics, nonmetallic materials and composites, emphasizing machine tools and tool holders
06 p0931 A69-17782

Additive processing technique for fabrication of single sided, double sided and multilayer printed circuit boards
07 p1100 A69-18621

Ti alloy blanks production technology and quality control, noting rolling of sectional profiles
07 p1161 A69-18765

Direct bead sampling by aspiration of molten metal in open hearth furnaces and converters
07 p1141 A69-19341

Alumina radomes manufacture by flame spraying process, discussing raw materials quality control, spraying operation, sintering and final inspection
07 p1142 A69-19528

Components production process effect on reliability based on values and functional relations of internal parameters, noting influence on accelerated testing
08 p1319 A69-20346

Cost control for project management based on detailed programming
08 p1423 A69-20629

Process control data in acceptance procedures for high reliability electronic components, discussing supplier and user cooperation
08 p1293 A69-21110

Bubble leak testing of components to understand effects of gas and liquid viscosity, surface tension, pressure differential and temperature
09 p1503 A69-21391

Metal castings around ceramic cores for economic manufacture of jet engines
09 p1503 A69-21907

Forming and processing facility for producing one million titanium alloy parts per month for Boeing 747 aircraft
09 p1504 A69-22063

Giant landing gear steel parts fabrication for Boeing 747 aircraft, discussing material and processing problems including Cr and Cd-Ti coatings application
09 p1434 A69-22064

Complicated power metallurgical shapes fabricated by hydrostatic pressing, noting spheres, cones, rods, tubes and combinations
09 p1511 A69-22353

Flexible printed circuits manufactured by offset rotogravure printing, noting production cost economies
09 p1511 A69-22357

Laser applications to production line metal working, discussing economics, welding, drilling, automation, thermal and atmospheric effects, etc
10 p1698 A69-22985

FM Lamb wave system for flaws and defects detection in thin metal sheets
10 p1699 A69-23048

Design management in next century covering computer methods, market needs, etc
11 p2004 A69-24371

Plain and rolling metal bearings manufacture and use, discussing materials structure and properties, operating conditions, lubrication, etc
11 p1903 A69-24517

Gas laser materials, fabrication and performance, analyzing gas cleanup, cathode degradation, bore erosion and optical surface contamination effects
11 p1896 A69-24743

Pressure calcining process in production of fine grained ceramics at low temperatures
12 p2119 A69-26832

Hard superconductors technology, stressing metallurgical processing factors effect on properties of niobium alloys and intermetallic compounds
12 p2103 A69-27120

Canadian air cushion vehicle industry, considering materials, design, production, tests, components and quality control
13 p2381 A69-27544

Fabrication techniques for plastic insulation in electronics, discussing packaging, low pressure molding, casting, etc
13 p2285 A69-27987

Relay reliability cost vs failure cost in spacecraft applications
13 p2231 A69-28044

Microminiature latching relay design and manufacturing cost
13 p2232 A69-28049

Value engineering and component/products improvement incentive contract clauses role in defense product quality improvement
13 p2383 A69-28100

Management and control techniques for aircraft product engineering changes
[ASME PAPER 69-DE-67] 14 p2540 A69-28850

Flat conductor cable technology, discussing design, manufacture, specifications, etc
[ASME PAPER 69-DE-8] 14 p2393 A69-28855

Book on integrated circuits covering fabrication techniques, basic semiconductor theory, thin film, monolithic, compatible circuits, packaging, etc
14 p2419 A69-29002

Production method for fabricating HF surface wave interdigital electrode transducers, discussing pattern replication, etching, etc
14 p2455 A69-29571

Hydrostatic tube extrusion, discussing equipment, techniques and commercial applications
[SAE PAPER 690319] 15 p2617 A69-30093

Hot extrusion process for steel and various metals in U.S. semifinished product industry, considering lubrication problems, research centers and development
15 p2618 A69-30228

VM-1 alloy investigated for creep mechanisms and ultimate strength for applications in reactors, rockets and aircraft construction
15 p2638 A69-30284

Foil bearings design, fabrication, applications to flexible material transport, rotor support, etc
15 p2618 A69-30327

Mass-produced silicon transistors reliability, presenting tables and curves of lifetime tests
15 p2626 A69-30833

Production line requirements for MOS and IC, considering high reliability at minimum cost for space applications
15 p2627 A69-30841

Ceramic condensers with very high reliability mass produced for Concerto program, describing component characteristics and production methods
15 p2627 A69-30844

Microelectronic technology for mass production of high reliability hybrid thin film circuits
15 p2628 A69-30845

Thin film tantalum nitride resistors technology and production, evaluating projected reliability of resistance circuits as function of operating and environmental conditions
15 p2628 A69-30846

Carbidothemic process for high melting metals and alloys production stressing Ti alloys
16 p2800 A69-31777

Integrated circuits effect on electronic equipment design and production technology
16 p2762 A69-32578

Wire-wrap solderless joints production technology in electronic equipment
16 p2763 A69-32579

Ammonium perchlorate grinding and blending facility, discussing process flow, machinery, etc
[AIAA PAPER 69-516] 16 p2767 A69-32664

Book on high purity beryllium metallurgy for nuclear reactor applications covering physical properties, crystallography, thermodynamics, production methods, etc
17 p2986 A69-32952

ELDO booster /EUROPA 1/ third stage management and construction problems
17 p3050 A69-33701

Disk type or elastic melt extruders development based on Weissenberg effect permitting near uniform extrusion
18 p3148 A69-34612

Machining processes effect on surface integrity of machine parts and effects on product quality
18 p3149 A69-35129

Polyimide resin system for glass reinforced laminates, noting processing characteristics and curing
19 p3353 A69-35505

Filament reinforced metal matrix composites made by continuous casting process, discussing tensile tests results and production costs
19 p3318 A69-35511

Tape placement machines to fabricate composite high modulus filamentary tape reinforced aerospace structures, anticipating future generations evolution into automatic control
19 p3323 A69-35584

Soviet book on interchangeability of structural elements in aircraft construction, discussing experiences in serial production of aircraft and helicopters
20 p3462 A69-37443

Microplasma, W inert gas and submerged arc welding processes for fabrication of rocket motor cases and pressure vessels, discussing material requirements and weldability
[SBAC PAPER 7] 20 p3550 A69-37449

Electronic packaging and production - Conference, Anaheim, February 1969 and Philadelphia, June 1969
22 p3909 A69-39941

Gas laser-Doppler radar system for moving materials velocity and length measurements in industrial processes
22 p3955 A69-40237

Metal matrix fiber-reinforced composite materials joining by welding and brazing techniques
22 p3956 A69-40480

Digital computer systems for automating machine parts design main metal cutting operations, emphasizing optimal instrument usage, reliability, digital algorithm language and economics
23 p4169 A69-41952

Waveguide below cut-off high pass filters fabrication technique using slot cut into waveguide section
23 p4170 A69-42231

Quality and reliability of electronic spacecraft devices and structural components produced in limited quantity, discussing documentation of production and testing
23 p4171 A69-42474

Numerical control as manufacturing tool, with application to aircraft engine precision components
24 p4318 A69-42710

Fatigue crack initiation mechanism as used in design to prevent fatigue failures in service
24 p4397 A69-42770

Self acting gas lubricated bearings production, discussing manufacture to ultraprecision tolerances by semiskilled labor
[ASME PAPER 68-WA/LUB-4] 24 p4320 A69-43035

PRODUCTIVITY

Research productivity in large organizations stressing interface problem minimization, recommending deferred bonus system
17 p3075 A69-32964

PROFICIENCY MEASUREMENT

U HUMAN PERFORMANCE

U PERFORMANCE TESTS

PROFLOMETERS

Radio profilograph designed for integrating aircraft excess altitudes and measured distances between aircraft and earth, discussing block diagram
07 p1132 A69-19006

Laser profilometer to measure sea wave profiles from airborne platform, describing transmitter, receiver and signal processor
21 p3739 A69-39461

PROGNOSIS
Geopotential and wind prediction by integration of prognostic equations of single level atmosphere
13 p2294 A69-27852

PROGRAM MANAGEMENT
U PROJECT MANAGEMENT
PROGRAMMERS
Temperature program generation for test chambers, describing temperature programmers and readout, verification and recording systems
22 p3954 A69-40038

PROGRAMMING [SCHEDULING]
NT THRUST PROGRAMMING
Cost control for project management based on detailed programming
08 p1423 A69-20629
Federal Government budgeting, discussing systems analysis, planning-programming, etc
10 p1811 A69-23351
Quantitative and qualitative reliability programs for commercial and aerospace products, considering Failure Effect Management System
18 p3143 A69-34486

PROGRAMS
NT APOLLO APPLICATIONS PROGRAM
NT APOLLO PROJECT
NT COMSAT PROGRAM
NT EARTH RESOURCES PROGRAM
NT ECHO PROJECT
NT EUROPEAN SPACE PROGRAMS
NT GEMINI PROJECT
NT LUNAR PROGRAMS
NT MARINER PROGRAM
NT MARS 69 PROJECT
NT MERCURY PROJECT
NT NASA PROGRAMS
NT NIMBUS PROJECT
NT PERT
NT PIONEER PROJECT
NT RESEARCH PROJECTS
NT ROVER PROJECT
NT SATURN PROJECT
NT SURVEYOR PROJECT
NT U.S.S.R. SPACE PROGRAM
NT UNIVERSITY PROGRAM
NT VOYAGER PROJECT
German analysis of preparatory technology of U.S. space programs, noting effects of hardware development for manned space travel on future planning
05 p0849 A69-15576

PROGRESS
National programs relationship to progress in technological societies
03 p0536 A69-14245

PROJECT MANAGEMENT
Avionics in forest resource inventories management, noting design of radar altimeter for low level aerial photography
01 p0080 A69-10352
Human engineering program plans for Phase 3 of SST Development Program in accordance with airframe and engine contracts
01 p0019 A69-10451
Project management in complex research, discussing incentive contracting decision model and resources allocation
02 p0356 A69-12476
Aerospace company engineering administration criteria and functions for chief project engineer [SAE PAPER 680682]
03 p0535 A69-13447
Aerospace manufacturing contribution to engineering function in design development [SAE PAPER 680668]
03 p0433 A69-13451
Book on economic management of research and engineering covering project plan impact, projects control and evaluation of research and engineering structure
04 p0688 A69-14530
Cost dependent utility characteristics in mathematical model for optimum research and development resource allocation, computing optimum fund distribution with Lagrange multipliers
04 p0689 A69-14807
Predictive model for risk in technological research and development
04 p0689 A69-14980
Graphical evaluation and review technique /GERT/ in R and D project planning processes
04 p0689 A69-15100

Estimate accuracy and project selection models in industrial research, examining company data for miscellaneous, technical and commercial failure
05 p0849 A69-15981
Project management decision making, noting decision nature, cost effectiveness concepts and incentives [ASME PAPER 68-WA/MGT-2]
05 p0850 A69-16145
Statistical analysis of aircraft programs engineering man hours, aircraft performance and weight, avionics systems, schedules, etc, as estimating standards
05 p0769 A69-16239
Cost and schedule planning and control /CSPC/ project progress reporting technique
05 p0850 A69-16300
German Air Force Center of Aeronautical Medicine, discussing organization, work projects and proposed mutual cooperation with French counterpart
05 p0850 A69-16629
Interplanetary Pioneer spacecraft development and systems engineering aspects
06 p1017 A69-17605
Organization behavior models compared in theory of scientific and professional personnel management, noting compromise between excess restrictions and freedom [AIAA PAPER 68-805]
08 p1422 A69-20196
Defense project management and discrepancies between estimates and final costs
08 p1423 A69-20628
Cost control for project management based on detailed programming
08 p1423 A69-20629
Project control cycle, cost monitoring and reporting to management
08 p1423 A69-20630
Organization and manpower utilization in R and D, determining criteria for organizational form selection
08 p1423 A69-21155
Incentive provisions used by mutual agreement between purchaser and contractor for project management covering planning, control, financial, technical and personnel functions
09 p1626 A69-22777
Potential hazards of government sponsored technology, examining SST and fluoridation projects and weather problems
10 p1811 A69-23392
Isolation of scientific and technical personnel and effect on lateral communication and intellectual cross fertilization in research and development program
11 p2004 A69-25303
Integrated management information system /IMIS/, discussing logistics, reliability and quality assurance disciplines
11 p2005 A69-25304
Program definition and government-industry relationships in entry research and development program management
11 p2005 A69-25726
FAA aircraft accident human factors investigation plan, discussing on-call pathologists, site organization and investigation, autopsy and result reporting
12 p2022 A69-25843
Civil aircraft accident investigation, discussing organization and procedures of Bureau of Aviation Safety of National Transportation Safety Board
12 p2191 A69-25844
Financial, political and engineering considerations influencing space flight programs implementation, including nuclear systems examination for propulsion and power capability
13 p2334 A69-27296
Esro 1 satellite program management, discussing scientific mission, structure, tracking system and history
13 p2355 A69-27360
ESRO 1 project management and organization, discussing cost control, time saving, program evaluation and review system /PERT/, etc
13 p2382 A69-27750
Galaxy C-5A aircraft Value Control Program stressing design organization, upper management authority, budgetary adjustments, etc
13 p2383 A69-28095
Cost estimates of R and D, considering planned profit and loss following products introduction to market
14 p2541 A69-29280
MACRO /methodology for allocating corporate resources to objectives/ for R and D, discussing program for optimal budget management
15 p2720 A69-30958

Program stretchout in aerospace procurement, discussing costs effect in relation to incentive contracts
15 p2721 A69-31071
Research and development planning and control models based on subjective probability estimates for failing projects identification
15 p2721 A69-31072
Integrated Logistics Support /ILS/ cost effectiveness, discussing management of systems elements in addition to prime equipment including computer programs, training, maintenance, etc
15 p2722 A69-31126
Book on space age management, considering large scale approach
16 p2881 A69-31766
Motivation and performance increase in R and D by incentive plans, discussing prestige, power, responsibility, recognition, work, salary, comfort, etc
17 p3075 A69-32963
International organization and project management procedures in design and construction of Heos 1 satellite for measuring charged particles energy distribution outside geomagnetic field
17 p3050 A69-33699
German research satellite Azur design and production management
17 p3050 A69-33700
ELDO booster /EUROPA 1/ third stage management and construction problems
17 p3050 A69-33701
Proposed projects selection for independent R and D development program in business entity, measuring merits in terms of future financial returns
17 p3077 A69-34129
Saturn software configuration accounting and reporting system for document change and information retrieval
18 p3105 A69-34269
Mathematical index model based on weighted factor analysis to facilitate management and technical decisions concerning achievement of numerous tasks with fixed funds
18 p3232 A69-34504
Operational system effectiveness information for reconnaissance drone system including test flights, discussing application to reliability and maintainability in project management
18 p3232 A69-34505
Failure mode and effect analysis integrating design and reliability engineering, discussing management controls and interdisciplinary coordination
18 p3147 A69-34526
Project management of Apollo short stack testing project, discussing organization, planning, operations and procurement to cut testing time
18 p3233 A69-34616
Apollo project by-products, emphasizing NASA project management methods application to large R and D projects
18 p3233 A69-34649
System approach to reliability demonstration, discussing design and impact on levels, risks, requirements, testing, cost and incentives
19 p3327 A69-36003
Systems effectiveness function from project and organization management viewpoint
19 p3454 A69-36006
Failure data role in management of launch operations reliability program
19 p3294 A69-36022
Ionospheric satellite series Alouette-ISIS, discussing successive engineering and management constraints leading to ISIS-C design
20 p3618 A69-37856
Technical problem solving model based on tape recorded protocols of engineers engaged in R and D project
20 p3640 A69-38020
International organizations and planning for earth observation satellite program involving exploitation in communications, meteorology and aircraft
21 p3855 A69-38622
Ariel 3 satellite management structure, responsibilities and orbit, stabilization, launch window, data acquisition and processing
21 p3856 A69-39255
Technical and economic factors of program to provide communications services via satellite facilities in continental U.S.
21 p3678 A69-39762
Thermal scale modeling for space hardware development from managerial and engineering viewpoints [AIAA PAPER 69-1010]
22 p3922 A69-40383

- Complex program management emphasizing systems engineering management, noting applications to aeronautical systems
[RAES PAPER 9] 22 p4053 A69-40489
- Management system for safety in NASA Manned Space Flight Program, discussing hazard analyses and reduction precedence sequence
[AAS PAPER 69-522] 24 p4418 A69-42851
- Space flight programs management cooperation and limited competition advantages, emphasizing single management team responsibility for effective multilateral activities
24 p4419 A69-43043
- PROJECTED AREAS**
U AREA
U PROJECTIVE GEOMETRY
- PROJECTILE CRATERING**
Numerical method for time dependent compressible Navier-Stokes equations applied to axisymmetric flow field produced by hypervelocity impact, examining viscous effects
[AIAA PAPER 69-354] 13 p2366 A69-28288
- Hypervelocity impact dynamics on copper cube targets imbedded with nickel wires, discussing terminal positions, Vickers hardness, flow fields, etc
[AIAA PAPER 69-368] 13 p2367 A69-28300
- Lunar relief mechanism based on experimental cratering by pasty projectiles, proposing terrestrial magma genesis
15 p2698 A69-31373
- Hypervelocity micrometeor impact sites identification on aluminumized glass, using conchoidal pattern as criterion in analysis
18 p3199 A69-34952
- PROJECTILE PENETRATION**
U TERMINAL BALLISTICS
- PROJECTILES**
NT HYPERVELOCITY PROJECTILES
- Perforation and penetration mechanisms of Styrofoam slabs, using impact tests with free falling and rifle powered projectiles
01 p0165 A69-10115
- Terradynamic research program for studying instrumented projectile penetration of terrestrial materials
02 p0228 A69-11767
- Attitude control system effect on roll resonance in rocket boosted projectile
09 p1610 A69-22001
- Parachute recovery system for spinning /250 rps/ 155 mm shell launched to 3000 ft/sec by 20,000 g acceleration
[AIAA PAPER 68-937] 12 p2014 A69-26805
- Gun projectiles assisted by solid propellant motor to increase range, discussing construction, performance and free-wheeling rotation band use
15 p2702 A69-30592
- Cylindrically shaped projectiles low velocity impact upon horizontal surface of dry commercial Ottawa sand mass, estimating penetration for soft landing
21 p3839 A69-39231
- Stability conditions determination for spinning projectile based on ballistic equations, discussing role of Magnus effect
21 p3772 A69-39294
- Ballistic equations for mass center movement in vertical plane defined by projectile initial velocity
23 p4183 A69-42482
- PROJECTIVE DIFFERENTIAL GEOMETRY**
U DIFFERENTIAL GEOMETRY
- PROJECTIVE GEOMETRY**
NT MERCATOR PROJECTION
- Orthogonal projection derived equation to optimally estimate state of nonstationary linear discrete systems with time delay, developing Kalman type filter
09 p1473 A69-22437
- PROJECTORS**
Laser color TV projection-display system using moving mirrors and dual polarization scanner
07 p1137 A69-19740
- Optical interpolation for GZ-1 orthoprojector in storage mode, noting electronic contour plotter
22 p3951 A69-41247
- Automatic contour plotting for orthoprojector based on adjacent profiles and linear interpolation
22 p3951 A69-41248
- PROJECTS**
U APOLLO PROJECT
U ECHO PROJECT
U GEMINI PROJECT
U MARS 69 PROJECT
U MERCURY PROJECT
U NIMBUS PROJECT
U ORBITER PROJECT
U PERT

- U PIONEER PROJECT
U RESEARCH PROJECTS
U ROVER PROJECT
U SATURN PROJECT
U SURVEYOR PROJECT
U VOYAGER PROJECT
- PROLATE SPHEROIDS**
Asymptotic solutions for prolate spheroidal wave functions satisfying given differential equation, producing asymptotic expansions in terms of confluent hypergeometric functions
04 p0623 A69-14892
- Prolate spheroidal antennas operation in isotropic plasmas, studying effects of collision frequency, electron temperature and antenna length on admittance, radiation and current distribution
22 p3914 A69-40702
- Electromagnetic backscattering by perfectly conducting prolate spheroid, predicting echo signal in resonance region
23 p4115 A69-41584
- PROLATENESS**
Prolateness of Venus radius on basis of satellite microwave temperature measurements, chemical compositions and ice cap model
10 p1784 A69-23958
- PROMINENCES**
NT SOLAR PROMINENCES
- Total solar eclipse of September 22, 1968 in Siberia, discussing instrumentation and solar light radiation, corona, prominences, spicules, etc
10 p1782 A69-23696
- Jupiter red spot prominence correlation with Zurich sunspot number
17 p3045 A69-34185
- PRONE POSITION**
Sensorimotor coordination of man performing graphic assignments in upright, reclining and prone position, discussing interaction of vestibular, visual and motor analyzers
20 p3470 A69-37246
- PROPAGATION**
Linear equations of motions of inviscid ideal gas atmospheres, describing climatology of propagation parameters for point impulse sources
22 p3938 A69-40446
- PROPAGATION [EXTENSION]**
U CRACK PROPAGATION
U FLAME PROPAGATION
- PROPAGATION MODES**
Forward and backward scattered modes over frequency range in multimode nonuniform waveguide, transforming coupled modes telegraphist equations into Volterra equations
01 p0043 A69-10621
- E field transmission and reflection coefficients in linearly tapered waveguide for fundamental and higher order modes, using point matching method
01 p0044 A69-10629
- Plane wave scattering from modulated corrugated structures, obtaining reflection coefficients for multimode propagation
01 p0033 A69-10973
- First normal modes characteristics and lateral wave in weak dielectric layer applicable to microwave propagation
01 p0033 A69-10975
- Electromagnetic wave propagation across magnetic field under relative streaming motion, noting plasma frequency cut-off
01 p0134 A69-11247
- Book on propagation characteristics of various wave modes in ionized gas plasmas
02 p0285 A69-11518
- Dispersion relation of internal acoustic gravity wave motion in compressible nonviscous and nonheatconducting atmosphere
02 p0242 A69-11868
- Dispersion relations of axisymmetric and dipolar surface modes propagation along inhomogeneous plasma columns on dispersion relations
02 p0289 A69-12242
- Polarization stability improvement of helical beam antenna by increased turns, smaller pitch angle and decreased transverse electromagnetic mode amplitude
02 p0219 A69-12345
- Mode theory of backscattered radar cross section of elongated dielectric bodies capable of sustaining traveling wave
03 p0384 A69-12907
- Parametric light generation in resonator with nonlinear medium, discussing continuous pumping with laser modes matched with pumping frequency
03 p0437 A69-13044

- Propagation tests of skywave field strength reduction by orthogonal transmission
03 p0395 A69-13597
- Finite element solution of Helmholtz equation and application to waveguides with complicated boundaries
03 p0404 A69-13598
- Sunrise modal interference patterns for VLF propagation, analyzing variations with latitude
03 p0396 A69-13628
- Strain effects on transverse electromagnetic modes of anisotropic dielectric waveguides at p-n junctions
03 p0406 A69-13830
- Optical waveguide with optimum refractive index distribution for equalizing group velocities of different modes and minimizing waveform distortion
04 p0575 A69-14749
- Dispersion relations for propagation of quasi-TEM mode and higher order symmetric modes in longitudinally magnetized ferrite filled coaxial waveguide
04 p0575 A69-14751
- Higher order modes suppression in square waveguides by bifurcating metal septa of finite length, analyzing periodic array of many finite-length septa
04 p0576 A69-14758
- Higher modes of longitudinal wave propagation in dispersive thin elastic rod, noting response to laser pulse
04 p0678 A69-14869
- Dielectric waveguide propagation, impedance and attenuation characteristics and insertion loss and launching efficiency of mode transducer
04 p0577 A69-14971
- VLF phase measurements for apparent and equivalent diurnal height variation for lower ionosphere waveguide
05 p0752 A69-15666
- Whistler mode propagation in homogeneous electron plasma situated in longitudinal electrostatic field, using Fokker-Planck model
05 p0758 A69-16417
- Solar cosmic rays anisotropies including solar flare particles propagation
06 p0990 A69-17288
- Deviation of dispersion equations for all modes existing in E-plane slabs of dielectrically loaded rectangular waveguides
06 p0888 A69-17486
- Multimode direction tracking with polarization tracker used simultaneously, analyzing cross coupling and conical horn/reflector antenna
06 p0888 A69-17652
- Trapped mode wave propagation for cold uniform magnetoplasma cylinder in free space, studying dipole modes and one-wave approximation
06 p0967 A69-17756
- VLF diurnal phase change observations, showing deviations from theoretical first mode and second mode dominance
07 p1078 A69-18912
- Formulas for ray paths in ionized layers with application to oblique ionograms and duct modes
07 p1078 A69-18913
- Circularly polarized waveguide mode simulation for multislot leaky waveguide harmonic content measurement
07 p1105 A69-19046
- Beam distortion in low order Gaussian-Laguerre modes propagating through saturable laser amplifier, noting uniform and Bessel small signal gain distributions
[IEEE PAPER J-3] 07 p1152 A69-19065
- Reflection and transmission scattering coefficients for step type transition between two uniform waveguides with surface impedance boundaries, discussing coupled differential equations
08 p1272 A69-20020
- Horizontal electric dipole excitation of spherical guide waves between earth and ionosphere, discussing TM and TE modes and ELF and VLF range
08 p1273 A69-20023
- Low energy multiply charged cosmic ray nuclei propagation and source characteristics, considering two component model based onOGO satellite measurements
08 p1378 A69-20068
- Disturbing TM mode generation effect on attenuation measurement accuracy in TE mode attenuators
08 p1283 A69-20126
- Wavefront Wilkins-Minnis, null selection and elevation scanning techniques for measuring radio signals elevation angles with vertical antenna arrays
08 p1275 A69-20293

- Propagation modes in corrugated cylindrical waveguides determined by imposing nonisotropic surface reactance boundary condition at corrugated walls
08 p1284 A69-20295
- Mode designation and propagation characteristics of dielectric tube waveguide, noting practicability at higher microwave frequencies
08 p1284 A69-20296
- Radiation field patterns of linear antennas immersed in weakly ionized plasma evaluated for propagation constants of current distribution
08 p1285 A69-20551
- Transverse density nonuniformity effect on electromagnetic wave propagation in cylindrical plasma waveguide immersed in magnetic field, noting frequency increase
09 p1545 A69-21348
- VLF electromagnetic wave propagation in earth-ionosphere waveguide with reflections from ionosphere, noting TE and TM mode coupling and mode conversion
09 p1460 A69-22699
- Micromechanism of crack propagation in brittle fracture, considering kinematics for steady state crack in plane strain and energy dissipation
10 p1796 A69-23070
- Transequatorial propagation mode for waves in VHF band twice scattered by field aligned irregularities in electron density
10 p1653 A69-23192
- Weakly attenuated components of VLF mode spectrum associated with propagation below anisotropic ionospheres as function of frequency and azimuth
10 p1655 A69-23417
- Shock front propagation in argon with electrode-drawn induced EMF, using shock tube with induced transverse magnetic field
10 p1737 A69-23469
- Slow electromagnetic wave propagation along cold collisionless cylindrical plasma in axial magnetic field, noting surface wave metamorphosis into bulk waves
10 p1739 A69-23659
- Electromagnetic wave propagation along longitudinally magnetized plasma column surrounded by isotropic dielectric medium, without making quasi-static assumption
10 p1658 A69-24061
- Normal mode dispersion at upper hybrid frequency propagating parallel to uniform magnetic field in spatially inhomogeneous plasma
11 p1924 A69-24302
- Computer calculated phase velocities for surface wave and waveguide modes given for circular waveguide filled with inhomogeneous electron plasma
11 p1844 A69-24437
- Air gap tolerances effect on admittance of TEM mode dielectric and plasma coated slot antennas determined by variational method
11 p1851 A69-24986
- Ideal mode conversion and transmission by circular aperture of cylindrically symmetric cavity
11 p1899 A69-25056
- Landau dispersion relation solutions, noting higher order Landau poles and coupling of spatial Landau modes and least damped wave
11 p1929 A69-25265
- LF waves and instabilities on positive column in axial magnetic field, noting axisymmetric and asymmetric ion acoustic and electron wave modes and current convective instability
11 p1929 A69-25268
- Wave-mode converter with feed for omnidirectional antenna excitation, discussing H to E wave conversion, waveguides, emitter, etc
11 p1854 A69-25616
- TEM-WAVE propagation between parallel conducting planes, stressing changes in curved waveguide sections
11 p1841 A69-25619
- Resonance method determining spurious modes excitation in natural mode converter, discussing construction, application and mathematical correlation
11 p1856 A69-25630
- Fresnel dragging effect on 3 cm microwaves by electron gas drift in low pressure glow discharge, noting electron density and excitation modes
12 p2133 A69-25766
- Characteristic equation for corrugated surface wave line loaded with uniformly spaced thin metallic disks excited in E mode, considering spacing and groove depth
12 p2028 A69-25899
- Radiation pattern of circular cylindrical dielectric rod antenna excited in mixed magnetic and electric modes, discussing mode transducer
12 p2035 A69-25900
- Distortionless propagation of light through optical two level atoms medium, considering relation to Poynting theorem, hyperbolic secant solution and pendulum analogy
12 p2130 A69-26313
- Short circuit and variable frequency technique for measurement of coupling efficiency between dielectric loaded rectangular and trough waveguides, noting propagation modes
12 p2039 A69-26374
- Internal guiding of microwaves by elevated tropospheric layer noting refractive index, radius of curvature and attenuation
12 p2032 A69-26856
- VLF wave propagation along mixed path in curved earth-ionosphere waveguide, considering reflection and transmission coefficients of modes
12 p2032 A69-26858
- Auroral and polar zone ionosphere effects on propagation in HF through low VHF spectrum, considering nongreat circle mode, sporadic E ionization, etc
12 p2032 A69-26859
- Elliptical waveguide design dimensions for minimum attenuation in fundamental mode, giving formulas for attenuation constant and minor-major axis ratio
12 p2044 A69-27070
- Horn exciter with fundamental and second mode in feeding waveguide of shallow paraboloid antennas
12 p2044 A69-27093
- Waveguide higher order modes solved by finite-difference method, employing successive overrelaxation to compute field potentials at discrete points in arbitrary guide shapes
13 p2228 A69-27670
- Microwave propagation in coupled pairs of microstrip transmission lines for integrated circuit design, discussing dielectric Green function
13 p2229 A69-27672
- Cerenkov radiation from point charge uniformly moving along external magnetostatic field in warm anisotropic plasma, noting excitation modes and propagation frequencies
13 p2307 A69-27964
- Plane TM surface waves supported by plane ungrounded magnetoplasma slab with magnetostatic field parallel to two parallel interfaces and perpendicular to propagation direction
13 p2308 A69-27966
- Numerical integration for coupling between two modes of propagation /electron and proton whistlers/
13 p2254 A69-27981
- Leaky helix and solid metal waveguides propagation losses measured by shuttle pulse method in SHF
13 p2233 A69-28063
- Diffraction and mirror analyses of right angle corner in overmoded waveguide for scattered modes, discussing transmission loss
13 p2234 A69-28426
- Two dimensional adiabatic transverse normal modes of inviscid compressible uniformly rotating fluid, discussing harmonic wave propagation in opposite directions and rotation effects
14 p2431 A69-29581
- Tunable band stop filter realization from characteristic equation solution for propagation modes by magnetized ferrite slab placed in rectangular waveguide
14 p2422 A69-29751
- Leaky waves propagation characteristics helix waveguide covered with slitted cylinder using transverse network representation, emphasizing small pitch angles, hybrid TE and TM modes, etc
14 p2422 A69-29752
- Impedance eigenvalues for eigenmodes of multiconductor transmission lines, discussing transverse field distributions along conical line
14 p2423 A69-29756
- Shields frequency ranges analysis to determine frequencies and parameters for electrostatic and magnetostatic modes transition to electromagnetic and microwave modes
15 p2562 A69-30120
- Corrugated cylindrical waveguides used as hybrid mode feeds for reflector antennas
15 p2575 A69-30175
- Corrugated conical horn used as antenna feed, studying modes in horn and associated radiation patterns by spherical hybrid functions analysis
15 p2575 A69-30176
- Cut-off wavelength of transverse magnetic mode related to cross section eccentricity of hollow conducting elliptical waveguide
15 p2575 A69-30178
- Waveguide mode propagation theory for determining earth-ionosphere spherical waveguide upper boundary height diurnal variation for VLF waves
15 p2595 A69-30224
- Resonance measurement of power percentage in single spurious mode of overmoded waveguide, using back to back transducers and reflection at input
15 p2577 A69-30611
- Time dependent Green function method for premature saturation due to parametric amplification of nonuniform spin wave modes by one and two magnon processes
15 p2668 A69-30685
- Coupled TEM lines arrays analysis in terms of odd and even modes, computing equivalent circuit elements, impedances and admittances
15 p2581 A69-31525
- Wave propagation in warm uniaxial plasma filled waveguide, analyzing TE modes, TM mode splitting and power transfer
16 p2756 A69-31576
- Electromagnetic wave propagation in transversely magnetized warm plasma filled rectangular waveguide, analyzing TE and TM modes
16 p2756 A69-31581
- Propagation modes attenuation and guidance on circular hollow dielectric waveguides dependent on dielectric loss tangent
16 p2757 A69-31587
- Hall current effect on thermal instability explaining nonself gravitating astronomical objects, discussing current effects on propagation modes
16 p2854 A69-31649
- Computerized finite element waveguide analysis for determining propagating modes and cut-off frequencies
16 p2760 A69-31942
- Waveguide bends fields expressed in coupled local annular modes derived by evaluating differential scattering coefficients
16 p2760 A69-31943
- Wave propagation in open periodic two dimensional iris waveguide and beam reconstruction by diffraction, considering existence and character of modal fields
16 p2753 A69-32394
- Ionosphere depression influence on VLF signals phase and amplitude calculated by mode theory and integral equations system representing aperture fields
17 p2920 A69-33418
- Asymptotic solutions for vector fields and propagation constants of axial modes in circular cylindrical waveguides, noting changes in dielectric constant
17 p2921 A69-33673
- Wave excitation in resonant dissipative and inhomogeneous structures, discussing resonator geometry, mode spectra, etc
17 p2926 A69-33849
- Trapped modes in cold magnetoplasma slabs and rods in free space analyzed by Maxwell equation, assuming DC magnetic field and homogeneous electrons distribution
17 p2926 A69-33850
- Continuity conditions for drifting magnetoplasmas without ionic effects, discussing eigenvalue equation of refractive index and electromagnetic modes propagation
17 p2926 A69-33851
- Mathematical model for aircraft antenna to antenna electromagnetic interference analysis, emphasizing techniques for propagation paths and shading factors
17 p2943 A69-34134
- Pulse propagation through antipode, calculating time domain response of fields near axial caustic
18 p3100 A69-34233
- Radio echo from south showing origin from irregularities in F but not E region, discussing propagation modes for particular record
18 p3125 A69-34252
- Whistlers propagation in cold plasma in uniform magnetic field, considering amplitude dispersion effect
18 p3179 A69-34437
- Anisotropic ionospheric model for VLF TM and TE modes excitation, noting nighttime phase velocity variations
18 p3101 A69-34797
- Transverse and longitudinal velocity components of detonation waves in stoichiometric hydrogen-oxygen propagating in fundamental mode in square section tube
19 p3451 A69-36367

Q factors of ideal antenna enclosed in imaginary sphere with excited TE and TM modes
20 p3506 A69-37836

Two-hop signals observed on high latitude Alouette 2 topside ionograms found propagating in field aligned cylindrical ionospheric ducts
20 p3531 A69-37890

Propagation characteristic model study of kinked Z trace observed on topside ionograms and explained by magnetoionic theory
20 p3531 A69-37893

Field patterns, propagation constants and losses determined for axially propagating modes guided by circular cylindrical inhomogeneous dielectric, using perturbation method
20 p3497 A69-38130

Monochromatic electromagnetic field in resonant medium, examining linear, incoherent and coherent nonlinear propagations and resonant scattering
21 p3769 A69-38382

Cosmic rays composition, origin, acceleration and propagation, describing two component models
21 p3789 A69-38814

Cosmic ray propagation from experimental data on cosmic ray nuclei
21 p3789 A69-38816

HF direction finder for display of time varying multimode propagation phenomena, using analog computer and phase sensitive interferometer
21 p3677 A69-39456

Equatorial radiation pattern of parallel plate TEM mode axial slot on elliptical conducting cylinders, using wedge diffraction and creeping wave theory
22 p3914 A69-40703

Mode conversion in nonuniform multimode waveguides and transitions using Maxwell equations, considering tapered and circular waveguides
23 p4135 A69-41354

HF backscatter, long delay signals and round-the-world echoes as radio wave propagation modes
23 p4116 A69-41602

VHF radio propagation over transequatorial circuit related to equatorial anomaly in F layer, suggesting F2/F2 propagation mode role
23 p4127 A69-42431

Rectangular dielectric waveguide propagation modes, describing computer analysis based on electromagnetic field expansion in circular harmonics series terms
24 p4288 A69-43330

PROPAGATION VELOCITY

Whistler rate and dispersion daily and annual variations derived relative to propagation conditions and magnetospheric behavior over North Italy
01 p0067 A69-11033

Granite compressional wave velocity and electrical resistivity variations with depth, explaining discrepancy between in situ and laboratory measurements on dry samples
02 p0241 A69-11806

Alfven wave propagation designations in terms of polarization and propagation velocity, resolving contradictory aspects
02 p0290 A69-12400

Pressure pulses propagation in nonsteady fluid flow through expansible tubes, noting computer solution
02 p0232 A69-12477

Velocity field generated by vibrations propagating at finite velocity over elastic wing surface
02 p0190 A69-12571

Light tachyons, tachyon velocity and relation to gravitational quanta
02 p0282 A69-12746

Theory of heat conduction with finite wave speeds for materials with memory
03 p0533 A69-13956

Elastic-plastic boundaries velocities for combined longitudinal and torsional plastic wave propagation in thin walled tube during unloading
[ASME PAPER 68-WA/APM-7]
04 p0670 A69-14403

Propagation velocity upper limits for plasma waves during state of equilibrium transition determined from nonlinear wave equation
04 p0630 A69-14553

Bandwidth effect on wave recordings cross spectra interpretation from spatially separated sites, deriving relationship between propagation velocity and velocity bandwidth
05 p0756 A69-16272

Compressional and shear wave velocities vs porosity for sintered perlitic bricks
06 p1000 A69-17009

Equations for electron scattering by sound in n-type semiconductors, giving corrections to sound propagation velocity during interactions
07 p1199 A69-18680

Quasi-linear differential constitutive equation of work hardenable elastoviscoplastic material in case of plane wave propagation in half space
08 p1415 A69-20662

Current sheet velocity in coaxial plasma accelerator, noting drag due to insulator ablation and degassing
[AIAA PAPER 69-265]
09 p1566 A69-21258

Mach number values and propagation rates of wear disturbances in interplanetary medium obtained from Mariner 2 data during low solar activity
09 p1575 A69-21523

Electron content of earth-Venus interplanetary medium measured by observing relative propagation time of radar pulses to Venus
09 p1594 A69-21697

Flame propagation normal velocity evaluated with heat transfer equation at flame front taking into account temperature, pressure and inert gas percentage
09 p1625 A69-22695

Crack propagation velocity in titanium alloys over varying stress intensities under adverse environment
10 p1709 A69-23058

Ionization front propagation rate in crossed electric and magnetic fields in Ar-Cs, Hg-Cs and Ne-Xe discharge plasmas
10 p1733 A69-23447

Turbulent flame propagation velocity in homogeneous premixed combustible gas, using one dimensional inviscid flame model
11 p1998 A69-24473

Flame velocities of stable premixed tetrafluoroethylene-oxygen mixture flames measured with bunsen-cone method
11 p1940 A69-24485

Electric fields effect on flame front propagation structure and velocity, obtaining color topletopograms by high speed photography
12 p2190 A69-26192

Velocity dependence of temperature waves /second sound/ in liquid He II measured as function of relative velocity for normal and superfluid
13 p2297 A69-27460

Shock wave velocity and gas flow parameters in shock tube with noninstantaneously opening diaphragm calculated by method of characteristics
14 p2432 A69-29623

Group delay time for dispersive wave propagation velocity determined using correlation method
15 p2562 A69-30094

Annealed aluminum rods dynamically compressive impact loading used to study longitudinal plastic waves propagation velocity
15 p2709 A69-30677

Small perturbations propagation in plasma at Newtonian acoustic velocity, determining temperature, pressure and current densities
15 p2663 A69-30993

Flame propagation velocity for different gas mixtures enclosed in glass tube determined by fiber optics devices
16 p2789 A69-31764

Relativistic exceptional wave propagating heat, computing speeds in direction orthogonal to heat vector
16 p2827 A69-32042

Initial temperature effects on flame propagation velocity in turbulent flow of homogeneous gasoline-air mixture under realistic conditions
16 p2837 A69-32138

Additives effect on flame propagation velocity and stability in N diluted hydrogen-chlorine propellants, noting entrained air role
[WSCIPAPER 69-13]
16 p2831 A69-32353

Mach number values and propagation rates of weak disturbances in interplanetary medium obtained from Mariner 2 data during low solar activity
16 p2851 A69-32518

VLF wave propagation phase velocity prediction for airborne Omega computer, using scatter model based on abnormal ionosphere
17 p3002 A69-34077

Hard cosmic radiation hypothesis for Newton gravitation law for neighboring bodies, obtaining gravitational energy quanta and propagation velocity relationship
18 p3172 A69-34627

High speed brittle fracture of polycarbonate resin subjected to static bending in liquid nitrogen determined from crack propagation speed of surface coating
19 p3358 A69-35776

Turbulent velocity of flame propagation in supersonic stream of hydrogen-air mixture determined by velocity distribution, exchange coefficient and burning time
19 p3448 A69-35854

Combustion turbulence effect on flame propagation velocity taking into account flame-generated pulsation velocity as function of temperature and flame velocity
21 p3850 A69-38861

Linear system propagation time measurement independent of input or output time functions
23 p4165 A69-41700

Heat finite propagation velocity effects on temperature distribution and heat flux for step temperature change at semiinfinite body surface
[ASME PAPER 69-HT-1]
24 p4414 A69-43564

PROPAGATORS

U PROPAGATION

PROPANE

Liquefied propane fog dispersal at Medford-Jackson airport, Oregon
04 p0585 A69-14918

Physicochemical and operational properties of trimethylol propane esters as lubricating oils under static and dynamic conditions
12 p2103 A69-27090

LF oscillations in simple combustion chamber using gaseous propane fuel, discussing association with progressive flame necking
18 p3230 A69-34837

Ammonia addition effect on laminar flame speeds of propane-air mixtures
21 p3849 A69-38809

Interferometric study of cool flame propagation in equimolar propane-oxygen mixtures, observing refractive index and temperature distribution changes
21 p3852 A69-39595

PROPELLANT ADDITIVES

NT SOLID ROCKET BINDERS

Plateau effect in burning of platonized propellants due to lead compound additives
03 p0494 A69-12881

Catalytic effect of potassium bichromate and chromic oxide additives on burning of ammonium perchlorate and mixtures
08 p1375 A69-19997

Aluminum effect on ammonium perchlorate/polyformaldehyde mixtures combustion properties noting heat transfer decrease into k phase
08 p1375 A69-20338

Vanadium pentoxide addition effect on combustion rates of mixtures of ammonium perchlorate and metallic fuels in nitrogen atmosphere
08 p1375 A69-20342

Jet fuel quality improvement by adding isopropylacetate and other substances because of surface-active and sorptive qualities
16 p2828 A69-31562

Burning velocity inhibitors effects on hydrocarbon-oxygen-nitrogen mixtures ignition temperature, reporting data on 20 additives at ambient temperature and pressure
[WSCIPAPER 69-14]
16 p2831 A69-32352

Point defect structure to control ammonium perchlorate burning rate, discussing thermal analysis data correlations, isothermal decomposition, etc
[WSCIPAPER 69-17]
16 p2831 A69-32355

Decomposition of ammonium perchlorate containing additives introduced by spray drying
[AIAA PAPER 69-502]
16 p2834 A69-32752

Book on chemical rockets and flame and explosives technology covering propulsion systems, combustion, propellant ingredients, etc
22 p3998 A69-40866

PROPELLANT BINDERS

NT SOLID ROCKET BINDERS

Low temperature grinding technique for IR spectra of propellants and binders in potassium bromide disks
01 p0082 A69-10892

Oxidizer particle size and binder type effects on nonacoustic combustion instability of solid propellants
[AIAA PAPER 69-175]
06 p0983 A69-18152

Combustion rates of condensed systems under positive and negative accelerations at atmospheric pressure
11 p2001 A69-25195

Combustion bomb testing of propellants containing fluorocarbon binder and ammonium perchlorate, noting unique ignition, combustion and extinction properties
[WSCIPAPER 69-9]
16 p2831 A69-32349

Composite propellants high pressure burning stability with various binders and oxidizers, showing ammoni-

- um perchlorate oxidized formulations susceptibility to instability
[AIAA PAPER 69-438] 16 p2834 A69-32704
- Powdered oxidizer and infusible polymer binder combustion at various pressures, studying gaseous phase temperature field by optical color analysis
17 p3069 A69-33135
- PROPELLANT CASTING**
- Nonnewtonian solid propellant viscosity and pseudoplasticity utilizing rheological characterization for optimal casting and pot life determination
[AIAA PAPER 69-518] 16 p2833 A69-32665
- PROPELLANT CHEMISTRY**
- High thrust fluorine engines and propellants
03 p0494 A69-12889
- Integrated Waste Management/Rocket Propulsion System, using human feces as propellant component
[SAE PAPER 680717] 03 p0495 A69-13442
- High performance chemical propulsion systems feasibility, discussing propellant combinations
06 p0983 A69-17627
- Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies
[AIAA PAPER 69-270] 09 p1565 A69-21252
- Chemical species and reactions determined for propellants in calculating nonequilibrium rocket engine performance
11 p1940 A69-24905
- Book on inorganic high energy oxidizers covering synthesis, structure and properties of fluoronitrogen, fluorine, fluorohalogen and oxygen compounds
12 p2146 A69-25824
- Description and automated research of correlation /DARC/ for establishing quantitative relationships between topology and properties of chemical substance
12 p2026 A69-26361
- Rocket propellants, propellant chemistry and rocket propulsion system performance
13 p3234 A69-27916
- Solid propellants formulation quantitative predictability for algorithmic modeling of functional selection, discussing specific impulse and burning rate
[AIAA PAPER 69-432] 16 p2828 A69-31845
- Chemical processing for manufacture of solid propellant motors, discussing mixing, casting and curing of composite propellants
16 p2829 A69-31992
- Additives effect on flame propagation velocity and stability in N diluted hydrogen-chlorine propellants, noting entrained air role
[WSCI PAPER 69-13] 16 p2831 A69-32353
- Free gas formation in propellant systems and effects on attitude control systems
[AIAA PAPER 69-434] 16 p2870 A69-32765
- Turbulent process employing product constituents dilute suspensions in inert carrier /Quickmix/ to obtain solid propellant mixtures, discussing plant design and analysis, economics, etc
[AIAA PAPER 69-517] 17 p2978 A69-33033
- Binder polymer network and microstructure effects on solid rocket propellant properties, emphasizing choice of polymer ingredients
[AICHE PAPER 37A] 17 p3017 A69-33668
- Thermodynamics of propellant combination of Li hydride containing solid fuel with ethylenimine base, coupled with Cl trifluoride oxidizer and ammonium nitrate added
22 p3997 A69-39919
- Book on chemical rockets and flame and explosives technology covering propulsion systems, combustion, propellant ingredients, etc
22 p3998 A69-40866
- Intermediate hydrazine-RFNA reaction product formed on injector nozzle and combustion chamber surfaces after fuel injection without ignition analyzed by various methods
24 p4365 A69-43669
- PROPELLANT COMBUSTION**
- NT SOLID PROPELLANT IGNITION**
- Book on combustion covering aerodynamic and chemical aspects, combustion instability, detonation and rocket propellant combustion
01 p0176 A69-10906
- Specific acoustic admittance of solid propellant burning surface for determining burning instability under rocket motor conditions
02 p0302 A69-11521
- Combustion instabilities in solid propellant rocket engines, emphasizing acoustic types for longitudinal and tangential modes
02 p0303 A69-11531
- Flame zone development of monopropellant droplets during heat-up period
02 p0352 A69-12310
- Solid propellant combustion instability models describing combustion zone dynamics applied to acoustic and nonacoustic instability in LF regime
[WSCI PAPER 67-13] 02 p0352 A69-12311
- Thermal decomposition of ammonium perchlorate and ammonium perchlorate-copper chromite mixtures
02 p0304 A69-12312
- Initiation of detonation by incident shock waves in hydrogen-oxygen-argon mixtures
02 p0304 A69-12313
- Hydrogen bromide, HI and HCl effects on hydrogen-air mixtures flammability, discussing flame propagation inhibition efficiency
02 p0304 A69-12315
- Fuel films ignition behind shock waves in air and oxygen
02 p0353 A69-12317
- Combustion oscillations in liquid and solid propellant engines, noting destructive effect of LF vibrations and acoustic instability
02 p0305 A69-12494
- Pressure and velocity couplings effects on oscillatory and transient motions in solid propellant rocket motors, emphasizing unsteady burning calculations
02 p0305 A69-12501
- Microcalorimetric measurement of radiation flux of flames of condensed burning material, noting surface temperature distribution
02 p0355 A69-12671
- Combustion model for rapidly burning involatile condensed materials, obtaining combustion rates
02 p0355 A69-12672
- Plateau effect in burning of platonized propellants due to lead compound additives
03 p0494 A69-12881
- Rocket engine combustion mechanism of ammonium perchlorate composite propellants
03 p0532 A69-13002
- Ultrahigh pressure test vessel for determining pressure vs burning rate characteristics of propellants and explosives
04 p0645 A69-14472
- Characteristics of liquid propellant explosions, analyzing detonation, shock wave formation and deflagration
04 p0645 A69-14474
- Saturn fireball thermal environment associated with liquid propellant explosions, using analytical model
04 p0645 A69-14475
- Yield and combustion physics of liquid propellant explosions determined from analytic charts
04 p0646 A69-14477
- Perturbation behavior of solid propellant combustion, discussing relevance of analytical models and use of qualitative models
04 p0685 A69-14726
- Initiation of HF combustion oscillation in premixed gas rocket
[ISAS-430] 06 p1029 A69-17025
- Deflagration of solid and hybrid propellants in steady state for missile and rocket propulsion applications
06 p0982 A69-17422
- Burning rates of solid propellants by variable pressure method, taking into account environmental heat loss and gaseous condensation
06 p0982 A69-17505
- Laminar and turbulent regimes of flame propagation studied by blowing explosive gas mixture through porous wall, determining Reynolds number by hot-wire anemometer
06 p1034 A69-17626
- Photochemical ignition of low pressure fuel-oxidizer mixtures applied to unsensitized stoichiometric mixtures of methane-oxygen and hydrogen-oxygen
[WSCI PAPER 68-42] 06 p1034 A69-17791
- Liquid hydrazine ignition by nitrogen tetroxide gas based on stagnation flow principle, presenting threshold measurements
06 p0983 A69-17792
- Unstable combustion of ammonium perchlorate /AP/, discussing correlation between propellant particle diameter and frequency in burning rate
[AIAA PAPER 69-177] 06 p1036 A69-18063
- Nonsteady combustion models for gases, liquid fuels and solid propellants, reviewing errors in physics and mathematics
[AIAA PAPER 69-178] 06 p1037 A69-18100
- Ammonium perchlorate high temperature decomposition by using carbon dioxide laser pyrolysis/mass spectrometry
[AIAA PAPER 69-143] 06 p0885 A69-18111
- Photographic study of burning metalized composite propellant under acceleration, noting burning rate augmentation by heat transfer from alumina particles retained on propellant surface
[AIAA PAPER 69-173] 06 p0983 A69-18151
- Low pressure deflagration limit dependence on strand size in terms of cross section dimensions for composite ammonium chlorate propellant
[AIAA PAPER 69-144] 06 p0983 A69-18162
- Solid propellant burning rates from condensed phase decomposition kinetics, discussing kinetic rates of thermal decomposition
[AIAA PAPER 69-145] 06 p1039 A69-18182
- Regression rate model for pressure sensitive hybrid combustion based on classical turbulent flame theory
[WSCI PAPER 68-22] 07 p1240 A69-18362
- Empirical and analytic modeling of propellant role in ignition, discussing ignition transient prediction to describe propellant ignitability characteristics
[WSCI PAPER 68-34] 07 p1202 A69-18364
- Strong electrostatic fields effects on burning rates of double base and composite propellants
[WSCI PAPER 68-24] 07 p1241 A69-18366
- Heat conduction equation for convective flow applied to gunpowder combustion under harmonic pressure variation
07 p1241 A69-18708
- Laboratory test stands for ignition, combustion and expansion processes experiments in hypergolic liquid fuels, noting minimal recombination gains
08 p1301 A69-20170
- Vanadium pentoxide addition effect on combustion rates of mixtures of ammonium perchlorate and metallic fuels in nitrogen atmosphere
08 p1375 A69-20342
- Monograph on ignition, combustion and expansion in hypergolic liquid propellant mixtures at gas temperatures up to 3000 K for small rocket engines
08 p1375 A69-20723
- Burning rate catalysts mechanism and location in composite propellant combustion at high pressure
09 p1622 A69-21954
- Solid propellant combustion, calculating burning, flame standoff distance, flame thickness, heat transfer, energy losses, and distributed and unsteady combustion
09 p1623 A69-22091
- Sublimation in ammonium perchlorate propellants combustion, discussing low temperature isothermal processes, linear regression rates measurements and low ambient pressure
11 p1940 A69-24481
- Critical diameter of ammonium perchlorate stable detonation as function of initial temperature, water content, density and particle size
11 p1940 A69-24553
- Ionizing radiation effects on combustion of ammonium perchlorate compacts with and without fuel addition, considering X ray, electron and plasma radiation
11 p1941 A69-25194
- Spherical monopropellant droplet radially symmetric burning during adiabatic vaporization and direct decomposition, examining near-equilibrium limit by asymptotic analysis
12 p2190 A69-25948
- Helmholtz resonance in rocket injectors as function of frequency response of interaction between chamber pressure and dissolved gas-fuel injection flow rate
12 p2148 A69-26806
- Polyester/ammonium perchlorate combustion, determining degradation rate by loss in weight method at different intervals
13 p2324 A69-28234
- Extinction kinetics of monopropellant droplet burning in inert gas reservoir with atmospheric temperature lower than adiabatic combustion temperature
13 p2378 A69-28250
- Polymethyl methacrylate burning rates in mixture with ammonium perchlorate or in hybrid systems when mixed with ammonium chloride
13 p2324 A69-28503
- Shorter combustors for high temperature jet engines of high speed aircraft, considering lifetime, shroud scoops, overheating, warpage, etc
14 p2509 A69-29433
- Nucleate boiling burnout heat flux data for ethane, ethylene and ethane-ethylene mixtures at various pressures, discussing applicability of Noyes equations
15 p2671 A69-31118
- Fuel injector-induced mass flux and mixture ratio distributions effects on combustion performance, chamber volume and stability, discussing combustion oscillation avoidance
16 p2877 A69-31731

Combustion in liquid propellant rockets, discussing aerothermochemical steady state and nonsteady behavior analysis and experiments
16 p2835 A69-31732

Solid propellants formulation quantitative predictability for algorithmic modeling of functional selection, discussing specific impulse and burning rate
[AIAA PAPER 69-432] 16 p2828 A69-31845

Solid propellants steady state combustion with emphasis on heterogeneous propellants
16 p2829 A69-31995

Combustion instability characteristics of solid propellants, discussing small scale testing methods
16 p2829 A69-31996

Solid fuel propulsion systems for tactical rockets design, discussing microwave attenuation, acceleration-combustion interactions and performance optimization
16 p2836 A69-31998

Compressible turbulent accelerating boundary layer flow model for convective heat transfer from rocket combustion gases, noting heat flux
16 p2878 A69-32000

Feed-system-coupled combustion instability linearized mathematical models for liquid fuel rocket engines, discussing nonrigid injector and method for instability elimination
16 p2836 A69-32001

Hybrid rockets combustion mechanism, discussing turbulent boundary layer with heat and mass transfer, chemical reactions, etc
16 p2879 A69-32002

Small disturbances and effect on processes of fast combustion of inflammable compressible mixture
16 p2837 A69-32137

Thermal layer theory of composite propellant combustion leading to minimum steady state burning rate under ideal thermal conditions
[WSCIPAPER 69-5] 16 p2830 A69-32346

Composite solid propellant burning rate by solving energy equation, yielding heat release, flame thickness and standoff distance
[WSCIPAPER 69-7] 16 p2830 A69-32348

Combustion bomb testing of propellants containing fluorocarbon binder and ammonium perchlorate, noting unique ignition, combustion and extinction properties
[WSCIPAPER 69-9] 16 p2831 A69-32349

IR spectrometric analysis of flames of composite rocket propellants, maintaining diffusion flames between surfaces of decomposing ammonium perchlorate and fuel source
[WSCIPAPER 69-10] 16 p2831 A69-32350

Linear pyrolysis of thermoplastics during combustion of composite solid propellants and ammonium perchlorate solid propellant deflagration mechanism studied by loose granule analog
[WSCIPAPER 69-16] 16 p2831 A69-32354

Doped recrystallized ammonium perchlorate effects on composite propellant burning rates
[WSCIPAPER 69-18] 16 p2831 A69-32356

Thermal decomposition behavior of perchlorate oxidizers studied by flash mass thermal analysis for determining propellant combustion kinetics
[WSCIPAPER 69-19] 16 p2832 A69-32357

Nonequilibrium initial condition combustion effects on propellant performance for hydrazine/chlorine pentafluoride and hydrogen/fluorine with equilibrium, kinetic and frozen nozzle flow
[AIAA PAPER 69-469] 16 p2832 A69-32659

Integrated double oblique shock scramjet for supersonic combustion tests and instrumentation development, discussing fuel injection through sonic orifices, combustion data, etc
[AIAA PAPER 69-827] 16 p2840 A69-32673

Composite solid propellant combustion using differential scanning calorimeter and mechanical model of steady state combustion
[AIAA PAPER 69-504] 16 p2833 A69-32679

Flame propagation in narrow slit and fine hole of solid propellant grain
[AIAA PAPER 69-561] 16 p2833 A69-32680

Premature exothermic decomposition suppression in propellant grade ammonium perchlorate, using differential thermal analysis
[AIAA PAPER 69-503] 16 p2833 A69-32688

Droplet vaporization model representing combustion processes of longitudinal oscillations in liquid rocket combustor
[AIAA PAPER 69-483] 16 p2841 A69-32689

Linear and nonlinear pressure coupled combustion instability of solid propellants
[AIAA PAPER 69-479] 16 p2834 A69-32725

Compositional and oxidizer particle size effects on combustion instability of plastic propellant based on ammonium perchlorate and polyisobutene
[AIAA PAPER 69-478] 16 p2834 A69-32734

Stability criteria for longitudinal combustion instability tested for generality using data from various solid propellant formulations
[AIAA PAPER 69-480] 16 p2834 A69-32736

Gas phase ignition theory with feedback of homogeneous propellant exposed to stagnant gas after shock reflection
[AIAA PAPER 69-559] 16 p2880 A69-32740

Combustion of pure crystalline boron single particles injected into hot oxidizing gases streams at atmospheric pressure
[AIAA PAPER 69-562] 16 p2880 A69-32741

Ammonium perchlorate linear pyrolysis by convective surface heating, discussing propellant deflagration models
[AIAA PAPER 69-501] 16 p2835 A69-32758

Hybrid propulsion chemical and technical problems, discussing solid fuel fragmentation and defining typical combustion modes
17 p3021 A69-33358

Liquid rocket combustion investigated by pulsed ruby laser holography at sea level rocket engine test stand, noting laminated glass acrylic window byproduct
[AIAA PAPER 69-471] 17 p3075 A69-34200

Nonsteady propellant burning theory for Al melting role in suppressing combustion instability in solid propellant rocket motors
19 p3393 A69-36814

Hydrogen and methane combustion to simulate expansion of storable propellants
[AIAA PAPER 68-635] 20 p3631 A69-37188

Laboratory unsteady burning data applied to analysis of small amplitude combustion instability in solid propellant rockets
20 p3586 A69-37224

Acceleration effects on solid propellant rocket motors combustion characteristics
[AIAA PAPER 68-530] 21 p3786 A69-39217

Shock front reaction and detonation initiation in low density ammonium perchlorate
21 p3784 A69-39590

Combustion considerations in fuel rich solid and hybrid propellant systems in air breathing propulsion for comparison with metal ignition requirements
23 p4199 A69-41894

Propellant ignition delay in contact of condensed fuel with hot reactive gas in shock tube, using graphical method and surface temperature fractional increase
23 p4199 A69-41897

Burning solid propellant behavior under pressure fluctuations expressed in response function terms defining small mass flux change ratio to small pressure change
23 p4201 A69-41922

Detonation wave instability and damping in gas containing liquid or solid inflammable aerosol, considering atomized propellants
23 p4240 A69-42339

Solid fuel ablation and supersonic combustion processes for various propulsion configurations, testing plastic models in wind tunnel
24 p4414 A69-43569

Solid propellant flame zone radiant energy flux emitted through side port of internal burning cylindrical rocket motor related to total heat flux at burning surface
24 p4415 A69-43595

Pressure effects in spontaneous ignition of interimpinging hydrazine and red fuming nitric acid (RFNA)/liquid streams in evacuated test chamber
24 p4415 A69-43667

Adiabatic model deflagration limits for steady linear monopropellant burning at Lewis number of unity and one step gas phase reaction
24 p4415 A69-43670

PROPELLANT DECOMPOSITION

Solid propellant burning rates from condensed phase decomposition kinetics, discussing kinetic rates of thermal decomposition
[AIAA PAPER 69-145] 06 p1039 A69-18182

Ammonium perchlorate exothermic decomposition control noting effects of preheating and ammonium fluoroborate additives
[WSCIPAPER 68-25] 07 p1202 A69-18363

Spherical monopropellant droplet radially symmetric burning during adiabatic vaporization and direct decomposition, examining near-equilibrium limit by asymptotic analysis
12 p2190 A69-25948

Steady deflagration of homogeneous monopropellant in condensed phase, considering nonequilibrium surface condition for mass decomposition rate
[WSCIPAPER 69-6] 16 p2830 A69-32347

Granular ammonium perchlorate thermal decomposition analyzed by cinemicrography, discussing sublimation role
[WSCIPAPER 69-20] 16 p2832 A69-32358

Ammonium perchlorate pyrolysis by convective surface heating, monitoring IR emission as measure of surface temperature
[WSCIPAPER 69-23] 16 p2832 A69-32361

Decomposition of ammonium perchlorate containing additives introduced by spray drying
[AIAA PAPER 69-502] 16 p2834 A69-32752

Turbulent heat and mass diffusion in catalytic reactors for hydrazine decomposition, developing computer program to calculate temperature and reactant concentration distributions
[AIAA PAPER 69-421] 16 p2846 A69-32768

Ammonium perchlorate decomposition, discussing high and low temperature reactions, combustion, catalysts and gaseous environment effects
21 p3784 A69-39593

PROPELLANT EVAPORATION

Propellants volatile fraction removal followed by gas chromatographical determination, noting use of heating method
02 p0302 A69-11522

Treatment and testing of thin platinum and gold alloy wires used in thermoelements for studying liquid fuel vaporization in combustion chambers
07 p1130 A69-18258

Fuel droplet evaporation and combustion in still air as unsteady diffusion controlling phenomenon, basing calculations on flame front model
20 p3632 A69-37520

PROPELLANT GRAINS

Glass fiber reinforced plastic (GFRP)/roving end grains in rocket combustion chambers, discussing design and structural parameters
02 p0305 A69-12748

Burning rate of solid grains of hybrid rocket engine, using calculated diagrams for quick computations of engine
08 p1376 A69-20590

Elastomeric solid propellant grains viscoelastic flow, analyzing stresses and strains under various operating conditions and rocket engine geometry effect
10 p1801 A69-23702

Flame propagation in narrow slit and fine hole of solid propellant grain
[AIAA PAPER 69-561] 16 p2833 A69-32680

Mathematical analysis of dendrite design of solid propellant grains for variant of modified wagon wheel design
22 p3997 A69-40553

PROPELLANT MASS RATIO

Relative weight of fuel required for flight along prescribed flight trajectory
03 p0519 A69-12964

Unannounced propellant weight and thrust of Soviet Luna spacecraft based on Luna 12 lunar orbit injection maneuver
08 p1409 A69-19969

Fuel injector-induced mass flux and mixture ratio distributions effects on combustion performance, chamber volume and stability, discussing combustion oscillation avoidance
16 p2877 A69-31731

Liquid propellant injector design for rocket thrust chambers, discussing mass and mixture ratio regulation
16 p2836 A69-31999

Cost optimization of mixture ratio control systems for liquid propellant launch vehicles, considering open and closed loop systems
[AIAA PAPER 69-441] 16 p2870 A69-32775

Chemical relaxation, optimum propellant mixture ratio, combustion chamber pressure, gas jet impulse, mass flow and drive capacity of space propulsion systems
18 p3229 A69-34773

PROPELLANT OXIDIZERS

U ROCKET OXIDIZERS

PROPELLANT PROPERTIES

Characteristics of liquid propellant explosions, analyzing detonation, shock wave formation and deflagration
04 p0645 A69-14474

Solid propellants formulation, processing physical properties, testing and rocket motor inspection
04 p0646 A69-14583

JP-4 fuel emulsions properties, handling characteristics and safety performance, noting satisfactory shelf life and thermal stability
[ASME PAPER 68-GT-24] 06 p0982 A69-17190

Fluid and thermodynamic modeling for ground test simulation of nuclear rocket vehicle liquid hydrogen propellant behavior
[SAE PAPER 690201] 07 p1178 A69-18306

Chemical reaction rate data for propellant systems containing boron or aluminum and hydrogen, chlorine and fluorine, based on finite kinetics expansions
[AIAA PAPER 69-182] 11 p1940 A69-24907

Fuel requirements for flights up to Mach 3.5, discussing heat stable mineral oil based SST fuels
11 p1941 A69-25422

Binder polymer network and microstructure effects on solid rocket propellant properties, emphasizing choice of polymer ingredients
[AICHE PAPER 37A] 17 p3017 A69-33668

PROPELLANT SENSITIVITY

Shock sensitivity of solid explosives and propellants, using calibrated gap testing techniques
02 p0302 A69-11520

Rocket propellant safety, discussing thermal, mechanical and impact sensitivity tests of solid and liquid propellants
02 p0302 A69-11525

Explosives and propellants sensitivity to fragment impact, establishing threshold detonation velocity
04 p0645 A69-14473

Shock initiation and sensitivity of granular explosives, noting heterogeneity effect in ammonium perchlorate
10 p1751 A69-23016

PROPELLANT SPRAYS

Charged particles generation by liquid subjected to high electric field for efficient bipolar microthruster
[AIAA PAPER 67-728] 13 p3235 A69-28220

PROPELLANT STORABILITY

Propellants volatile fraction removal followed by gas chromatographical determination, noting use of heating method
02 p0302 A69-11522

Film cooling design criteria for small rocket engines
[AIAA PAPER 68-617] 09 p1570 A69-21978

Combustion performance evaluation program demonstrating high performance with space storable propellant combination of FLOX, methane and ethane
[AIAA PAPER 69-507] 16 p2829 A69-31848

PROPELLANT STORAGE

Fluid support by capillary forces, fluid support by pressure with surface tension stabilization and capillary gas barriers for long life missions
[AIAA PAPER 68-465] 04 p0646 A69-15505

Thermal protection system optimization for storage of cryogenic propellants in space, noting vented systems
[AIAA PAPER 69-27] 06 p1039 A69-18211

Propellant orientation and expulsion methods in space vehicle tankage, discussing ullage rockets system, bladders and diaphragms, dielectrophoretic expulsion, etc
16 p2736 A69-31734

Highly concentrated hydrogen peroxide production, handling and storage, discussing crystallization process, equilibrium diagram, decomposition reduction and stabilizers
17 p3017 A69-33353

Payload optimization factors for orbital storage of liquid hydrogen, considering payload cost of agitation, tank pressure, pressurant weight, etc
[AIAA PAPER 69-1007] 22 p4021 A69-40381

PROPELLANT TANKS

Liquid propellant space launch vehicles longitudinal modes natural frequency, discussing coupled engine-propellant supply system stability
[AIAA PAPER 68-289] 02 p0335 A69-12393

Spherical false bottom influence on propellant sloshing in circular tank
[DVL-843] 03 p0416 A69-13665

Method for solving propellant sloshing in rotationally symmetric rocket tanks with arbitrary internal boundaries
04 p0665 A69-14840

Nondestructive weld tests of propellant tanks in Saturn V-S-1C stage
07 p1140 A69-18798

Maraging stainless steel for manufacturing liquid rocket propellant tanks, discussing composition determination and mechanical properties
07 p1166 A69-19236

Rigid top mass effect on longitudinal response of model vehicle propellant tank, determining natural frequencies and forced asymmetric response
09 p1616 A69-21979

Fluidic component application to propellant tank pressurization and controller design
[AIAA PAPER 68-629] 09 p1442 A69-21980

Cylindrical propellant tanks dynamic stability and parametric resonance, analyzing axial preload, liquid depth, top impedance and ullage pressure by Donnell theory
11 p1989 A69-25499

Liquid expulsion by direct pressurization of propellant tank in spinning missile system, demonstrating feasibility with subscale hardware
[AIAA PAPER 69-527] 16 p2838 A69-32651

Neutron and photon transport properties in liquid hydrogen obtained from measuring radiation environment in propellant tank mockup suspended above NERVA reactor
[AIAA PAPER 69-475] 16 p2810 A69-32716

Twin spool hydrogen turbopump performance at zero net positive suction pressure /NPSP/ saturated fluid in propellant tank, including steady state and simulated transient engine tests
[AIAA PAPER 69-550] 18 p3140 A69-34414

High modulus filament wound composites used for propellant and pressurization tanks, discussing overwrap and liner permeability, porosity, weight, etc
19 p3354 A69-35513

Boron epoxy strut prototype for support system of advanced nuclear flight stage with nonintegral cryogenic tankage configuration, achieving weight reduction
19 p3354 A69-35516

Main tank injection for packaged liquid missiles, discussing propulsion system design, pressurization, packaging and screen reservoir
[AIAA PAPER 68-627] 19 p3429 A69-35947

Sprayable polyurethane foam lightweight insulation for Saturn s-2 booster tanks holding liquid H an liquid O at wide temperature ranges
21 p3732 A69-38967

Simulated low gravity propellant sloshing in spherical, ellipsoidal and cylindrical tanks, discussing Bond number simulation and tank geometry effects
[AIAA PAPER 69-1004] 22 p3921 A69-40378

PROPELLANT TESTS

Low temperature grinding technique for IR spectra of propellants and binders in potassium bromide disks
01 p0082 A69-10892

Rocket propellant safety, discussing thermal, mechanical and impact sensitivity tests of solid and liquid propellants
02 p0302 A69-11525

Dry heat sterilization and ethylene oxide decontamination test equipment for bipropellant liquid propulsion system
02 p0228 A69-11764

Ultrahigh pressure test vessel for determining pressure vs burning rate characteristics of propellants and explosives
04 p0645 A69-14472

Liquid explosive testing from point of view of liquid mobility
04 p0646 A69-14481

Solid propellants formulation, processing physical properties, testing and rocket motor inspection
04 p0646 A69-14583

Test program for solid propellant rockets capability to withstand space environments
06 p0982 A69-17594

Short duration tube wind tunnel supersonic testing, noting Saturn S-1C base heating and solid propellant rocket base burning tests
[AIAA PAPER 69-335] 13 p2242 A69-28271

Solid rocket propellants tests, considering propulsion performance measurements, altitude simulation problems, internal flow patterns, nozzle geometry, etc
16 p2765 A69-31751

Polydiethylene glycol-bis-allyl carbonate /PBAC/ Hugoniot equation of state, reporting shock data, discussing applications to propellant testing
16 p2879 A69-32179

Integrated double oblique shock scramjet for supersonic combustion tests and instrumentation development, discussing fuel injection through sonic orifices, combustion data, etc
[AIAA PAPER 69-827] 16 p2840 A69-32673

Acceleration effects on solid propellant rocket motors combustion characteristics
[AIAA PAPER 68-530] 21 p3786 A69-39217

PROPELLANT TRANSFER

High pressure transfer system to deliver liquid hydrogen to testing equipment and liquid hydrogen/liquid oxygen engines
01 p0013 A69-11145

Cryogenic flexibility of thin polymeric film plies for use as spacecraft positive expulsion bladders
05 p0769 A69-16486

Propellant orientation and expulsion methods in space vehicle tankage, discussing ullage rockets system, bladders and diaphragms, dielectrophoretic expulsion, etc
16 p2736 A69-31734

Liquid expulsion by direct pressurization of propellant tank in spinning missile system, demonstrating feasibility with subscale hardware
[AIAA PAPER 69-527] 16 p2838 A69-32651

Capillary barriers to provide propellant positioning, expulsion capability and slosh damping for spacecraft propulsion systems during rotational maneuvers
[AIAA PAPER 69-529] 16 p2868 A69-32713

Analytical model for liquid fluorine no-vent loading operations noting application to flightweight upper stage systems
[AIAA PAPER 69-579] 16 p2767 A69-32715

Fluid flow problems during orbital refueling vehicle maneuvers and system operations in propellant transfer, including disturbances, liquid-vapor interface instability, vapor ingestion, etc
[AIAA PAPER 69-567] 16 p2868 A69-32721

Orbital refueling techniques, discussing vapor-liquid interface stability, pressurant requirements, transfer line chillover, propellant transfer dynamics, dielectrophoresis, suction speed estimating and system tradeoffs
[AIAA PAPER 69-564] 16 p2869 A69-32733

Pressurant gas requirements for pressurized discharge of liquid hydrogen from propellant tanks for optimum pressurization system designs
[AIAA PAPER 69-526] 16 p2845 A69-32737

Excessive extrapolation limitations in applying transient data to low gravity fluid behavior for orbital refueling systems, presenting orbital fluid transfer experiment
[AIAA PAPER 69-566] 16 p2870 A69-32755

Fluid transfer in orbit under low or zero g, stressing orientation
[AIAA PAPER 69-565] 16 p2865 A69-32770

Rocket engine with turbopump supplied liquid propellant, describing ejector, pump assembly, gas generator and control devices
17 p3019 A69-33341

Time-optimal nuclear rocket propellant start-up with thermal stress constraints based on distributed parameter model, deriving algorithm for flow rate increase
21 p3768 A69-39632

Cooldown of vacuum insulated transfer lines using liquid N and H, discussing flow characteristics reproduction by digital computer program
[NAS-NRC PAPER I-1] 22 p4050 A69-40625

Multiple outlets for reducing stratification-induced liquid propellant supply temperature rise, preventing cavitation problems in supply pumps
[AAS PAPER 69-395] 24 p4363 A69-42830

Dielectrophoretic zero gravity cryogenic liquid expulsion using lightweight high voltage ribbon electrode conduits and electrohydrodynamic bang-bang field effect
24 p4300 A69-43237

PROPELLER BLADES

Propeller static performance calculations for infinite number of blades applied to four blade propeller at different blade angles

02 p0188 A69-11957

Unsteady pressure field in zone of aerodynamic proximity of free moving airscrew investigated with propeller blades replaced by surface singularities

02 p0192 A69-12827

Helicopter rotor blades in metal sandwich bonding, discussing component parts assembly by adhesive films

07 p1143 A69-19731

Vibration eigenfrequencies of helicopter blades, discussing equation integration problems

11 p1995 A69-25673

Rotating static thrust propeller or hovering rotor flow field study by schlieren photography, considering vortex field, tip flow and shock wave formation

18 p3087 A69-35218

BORSIC Al composites for propeller blades, discussing designs, fabrication methods and tensile test results

[AIME PAPER S69-4] 21 p3733 A69-39473

PROPELLER DRIVE

NT HELICOPTER PROPELLER DRIVE

Propeller at static working state using vortex theory assuming infinite blade number, discussing thrust and torque coefficients

06 p0857 A69-17194

Wakkel engine development in Poland for powered military gliders at 18 hp and 5500 rpm

22 p3999 A69-40006

V/STOL propeller aerodynamics, considering thrust efficiency, roll and yaw control, flow visualization methods, etc

23 p4062 A69-41375

Wingtip mounted propellers effect on wing lift and induced drag, varying lift to drag ratio by changing inflight aspect ratio

24 p4250 A69-43713

PROPELLER EFFICIENCY

Propeller static performance calculations for infinite number of blades applied to four blade propeller at different blade angles

02 p0188 A69-11957

Lubrication and operation of Hamilton Standard propellers in high altitude and low temperature environments

[SAE PAPER 690323] 11 p1822 A69-24515

Helicopter rotors and static propellers theory based on Prandtl-Betz theorem, calculating ideal performance

[AHS PAPER 326] 17 p2894 A69-33533

PROPELLER SLIPSTREAMS

Streamlined rotors calculation, interpreting compatibility conditions between streamlining and airscrew stresses

08 p1252 A69-20655

Aerodynamic characteristics of propeller-wing-flap systems used on deflected slipstream STOL aircraft

09 p1431 A69-22278

CX-84 two propeller tilt wing deflected slipstream V/STOL Military Evaluation Program related to support of surface forces

[AHS PAPER 351] 17 p2900 A69-33526

Wind tunnel tests determining propeller slipstream effect on roll-damping derivative in transitional flight region, estimating STOL aircraft characteristics

22 p3863 A69-40145

PROPELLER SYNCHRONIZERS

U PROPELLERS

U SYNCHRONIZERS

PROPELLERS

NT SHROUDED PROPELLERS

NT TILTED PROPELLERS

Propeller performance prediction for nonnegligible angle of attack, determining tip loss factor with model similar to Prandtl model for axial flight

11 p1819 A69-25375

Monograph on determination of unsteady pressure field of freely rotating propeller covering blades, displacement and lift effects, distribution functions, etc

17 p2889 A69-32994

Book on experimental aerodynamics covering subsonic and supersonic wind tunnels, wall measurements, airfoils, aerodynamic characteristics of propellers, fixed and rotary wing aircraft

17 p2891 A69-33318

Helicopter rotors and static propellers theory based on Prandtl-Betz theorem, calculating ideal performance

[AHS PAPER 326] 17 p2894 A69-33533

PROPHYLAXIS

Motion sickness prophylaxis for rabbits subjected to rotation, investigating effects of adrenalin, ephedrine, sympatholytin, piperoxane and pyridoxyphene on nystagmus and respiration

20 p3472 A69-37265

Motion sickness prophylactic action of sodium hydrocarbonate in dogs subjected to vertical accelerations, using intravenous administration

20 p3473 A69-37269

PROPORTIONAL CONTROL

Random order linear homing systems analyzed by frequency methods employing method of proportional navigation, noting use of transfer functions

01 p0113 A69-10805

Fluidic proportional thruster system for sounding rocket control

[ASME PAPER 68-WA/FE-32] 05 p0763 A69-16105

Hysteresis of on-off element with proportional feedback around element, noting autooscillations and results for electromagnetic relay

12 p2053 A69-26506

Fluidic proportional level control and density control systems, discussing advantages of low initial and maintenance cost, long life and temperature, shock, radiation resistance, etc

22 p3870 A69-41241

Quasi-optimum proportional navigation for interceptor missiles, discussing feedback guidance law and attack geometry

24 p4348 A69-43292

PROPORTIONAL COUNTERS

Carbon dioxide ionization by Q switched laser beam, using proportional counter

02 p0255 A69-11702

Large area proportional counter for cosmic ray design, construction and specifications

03 p0427 A69-12979

Fast neutron fluxes at various atmospheric levels and geomagnetic northern midlatitudes measured by proportional counters using boron trifluoride

03 p0501 A69-13528

X ray proportional counter, analog to digital converter and power supply for gamma ray spectrometry used in satellite applications

[IEEE PAPER 3A-7] 07 p1134 A69-19194

Proportional counter pulse shape calculation for point and extended ionization tracks, considering electron drift velocity and positive ion mobility

09 p1493 A69-21419

X ray microanalyzer maximum sensitivity obtained using flow type proportional and scintillation counters with proper tuning and eliminating scattered electrons

12 p2093 A69-26596

Proportional counter array for detection of soft X ray photons from OSO-4 observations, discussing solar event energy spectra

12 p2151 A69-26936

Boron 10 absorption cross sections from counting ratios measurements of boron trifluoride proportional counter used to monitor neutron fluxes

17 p3008 A69-33753

Pulse height distribution changes of gas filled proportional counters ascribed to deposit accumulation on anode, using X ray fluorescence analysis

20 p3538 A69-37302

Propulsion - Conference, Paris, October 1967

03 p0494 A69-12887

Aircraft propulsion by wake regeneration, noting supersonic transport oggee layout with maximum drag fraction

05 p0811 A69-15555

Propulsion and reentry - Conference, Belgrade, September 1967

06 p0859 A69-17625

Thermodynamics and aerothermodynamics for propulsion problems noting thermodynamic laws and quantities, steady flow, shock waves, nozzles, inlet and thermodynamic cycles

11 p1821 A69-25583

Propulsion systems for boosters and space vehicles including chemical, electric and nuclear

13 p2325 A69-27915

PROPULSION CALCULATIONS

U MATHEMATICAL MODELS

PROPULSION SYSTEM CONFIGURATIONS

Apogee stage and strap-on booster applications of solid propellant rocket motors, discussing configuration, functioning and performance

03 p0494 A69-12891

Airframe/propulsion blending in high performance fighter aircraft, discussing thrust augmentation, fuel consumption, induction system and exhaust nozzle balance with airframe

03 p0364 A69-13676

Power requirements of low thrust space engine for maneuvers and optimum overlappings theory for selection of power plant

04 p0666 A69-14920

Air deflection and modulation /ADAM/ turbofan propulsive wing V/STOL design

[AIAA PAPER 69-201] 07 p1056 A69-19573

Wind tunnel measurements on integrated shrouded propeller model proposed for power gliders

07 p1052 A69-19633

Pulsed MPD arc jet electric propulsion system requirements, examining physical constraints, pulse duration, duty cycle, power network structural details, etc

[AIAA PAPER 69-269] 09 p1560 A69-21215

Film cooling design criteria for small rocket engines

[AIAA PAPER 68-617] 09 p1570 A69-21978

Baseline requirements for commercial aircraft propulsion systems, stressing engine installation in aircraft

[ASME PAPER 69-GT-57] 09 p1572 A69-22514

Qualitative and quantitative hazards analysis of potential accidents/incidents in Post Boost Propulsion System with hypergolic propellants, considering recovery

10 p1753 A69-22972

Space station attitude control through resistojets and control moment gyros /CMG/, discussing propulsion, safety features, weight factors, etc

11 p1965 A69-24531

Space propulsion by radioisotope energy noting thermal heating, thruster configurations, propulsion system, mission capabilities and current thruster technology

11 p1914 A69-25591

Space propulsion system design with consideration for launch and mission requirements, noting upper stage structural design and computer techniques

12 p2148 A69-26834

Integrated lift, propulsion and control in Aeromobile air cushion vehicle, considering ram wing and gimbal fan plenum chamber vehicles

13 p2201 A69-27543

L-500 inlet development program, discussing external forebody design, entry lip and diffuser geometries, configuration and technology developments, experimental techniques and test equipment

[AHS PAPER 69-448] 16 p2733 A69-32684

Hall ion thruster prime propulsion system, considering low and high voltage mode in plasma source I-V characteristics

17 p3019 A69-33338

Propulsion power plant arrangements for rotary wing aircraft with thrust producer for forward flight, considering convertible fan/shaft engine configurations

[AHS PAPER 333] 17 p3021 A69-33529

Weights study of V/STOL aircraft types for similar mission and payload requirements with different propulsion systems and flight profiles

[SAWE PAPER 783] 18 p3091 A69-34869

NERVA technology development, discussing reactor technology program, downward firing and flight-like configuration engine

[AIAA PAPER 68-612] 19 p3371 A69-35942

VTOL aircraft lift systems, propulsion, airframes, dynamic and aerodynamic characteristics, control systems, missions, safety, configurations and environment

[AIAA PAPER 68-977] 20 p3461 A69-37149

Nonintegral burn of solid core nuclear rockets, discussing modular stage concepts approach to low cost space exploration

[AIAA PAPER 68-589] 21 p3768 A69-39026

- Lockheed 1011 propulsion system design relating to system and component maintainability, reliability, performance and noise
[SAE PAPER 690390] 23 p4201 A69-41665
- STOL transport aircraft propulsion requirements, discussing engine cycle selection, design variables effects, etc
[SAE PAPER 690380] 23 p4201 A69-41668
- PROPULSION SYSTEM PERFORMANCE**
- Vitiated inlet air effects on J60-P-6 turbojet engine performance at sea level for various simulated flight Mach numbers
01 p0143 A69-11063
- Disulfide effects on jet fuel operating characteristics and demercaptization influence on thermal stability, corrosive action and sedimentation
01 p0142 A69-11098
- Dry heat sterilization and ethylene oxide decontamination test equipment for bipropellant liquid propulsion system
02 p0228 A69-11764
- Book on electric propulsion systems for spacecraft covering thermoelectric, electromagnetic, electrostatic, plasmacore, thermonuclear and photon systems
02 p0305 A69-12233
- French solid propellant sounding rockets proposed launching from Guiana base using different fuel propulsion systems
03 p0518 A69-12851
- Apogee stage and strap-on booster applications of solid propellant rocket motors, discussing configuration, functioning and performance
03 p0494 A69-12891
- Weapons propulsion system off-design engine performance, noting installation loss effects
[SAE PAPER 680712] 03 p0496 A69-13445
- Monograph on exhaust gases mixing with cold airstream in ducted fanjet engine, noting thrust and efficiency increase
03 p0496 A69-14048
- High voltage mercury electron bombardment ion thruster power efficiency
[ECS PAPER 170D] 05 p0812 A69-16233
- High performance chemical propulsion systems feasibility, discussing propellant combinations
06 p0983 A69-17627
- Advanced electrical and nuclear propulsion systems for European launchers, comparing performances with chemical propulsion
06 p0984 A69-17628
- Advanced propulsion systems propulsive capabilities in connection with interstellar flights, considering rocket and ramjet propulsion, energy requirements and stellar plasma
06 p0984 A69-17631
- Method of characteristics for nonequilibrium internal flow fields in propulsion systems, discussing focusing, shock wave and accuracy
[AIAA PAPER 69-6] 06 p0915 A69-18170
- Aerobell extendible nozzle rocket engine design and performance, cold flow and simulated hot flow test results
[AIAA PAPER 69-4] 06 p0985 A69-18195
- Aircraft gas turbine engines control systems capabilities and future requirements, considering maximum propulsion system performance with minimum fuel consumption
[ASME PAPER 68-GT-62] 08 p1376 A69-19846
- HORA, flexible upper rocket stage, noting variable fuel tank capacity and high energy propulsion
08 p1409 A69-20094
- Water jet propulsion for air cushion vehicles, emphasizing inlet shape effect on performance and potential flow theory application to inlet design
08 p1254 A69-20115
- Turbojets, turbojets and Ramjet turbines compared as propulsion systems for aircraft with speeds to Mach 7
08 p1376 A69-20656
- Combustion in high power jet engine combustion chamber in case of continuous and intermittent liquid fuel injection
08 p1421 A69-20762
- Rocket propulsion with gaseous bipropellant systems and attitude control
08 p1376 A69-20870
- Particle free path estimates for axisymmetric high specific impulse plasma accelerators, discussing collisionless plasma simulated by computer
[AIAA PAPER 69-278] 09 p1563 A69-21233
- Space charge sheath electric thruster principles, construction and performance using laboratory test model
[AIAA PAPER 69-282] 09 p1563 A69-21235
- Background pressure and magnetic field shape effect on MPD thruster performance, testing radiation cooled thrusters
[AIAA PAPER 69-243] 09 p1564 A69-21239
- Performance boundaries of space propulsion systems containing nuclear electric stages
[AIAA PAPER 69-249] 09 p1538 A69-21249
- 30 cm diameter mercury bombardment low impulse thruster development for potential space applications, discussing performance and control
[AIAA PAPER 69-238] 09 p1566 A69-21256
- Kaufman thruster performance dependence on transmission of ion extraction optics and magnetic field shape
[AIAA PAPER 69-257] 09 p1569 A69-21878
- Space storable propulsion system comparison, discussing liquid propellants performance and thermodynamic analysis
[AIAA PAPER 68-614] 09 p1570 A69-21981
- Turbofan engines augmentation, evaluating duct heater, bluff body stabilizers, piloted can combustors, flameholding techniques and afterburner tests
09 p1573 A69-22617
- Book on rocket propellants covering propulsion fundamentals, liquid, solid and hybrid propellants properties, performance calculations, rocket technology, etc
10 p1752 A69-23806
- Propulsion optimization for various vehicles, considering power plant weight, specific fuel consumption, power and thrust ratios, etc
11 p1941 A69-24462
- Gas turbine propulsion engines for small single engine helicopters, discussing costs, performance and FAA tests
[SAE PAPER 690310] 11 p1942 A69-24513
- Chemical species and reactions determined for propellants in calculating nonequilibrium rocket engine performance
11 p1940 A69-24905
- Propeller performance prediction for nonegligible angle of attack, determining tip loss factor with model similar to Prandtl model for axial flight
11 p1819 A69-25375
- Rocket engine high energy hybrid propellant performance optimization, discussing engine enlargement, oxidizer injection geometry, fuel additives, combustion gas vorticity, etc
11 p1943 A69-25428
- Rocket propulsion devices classifications, discussing energy sources, propellants, performance, space vehicle applications, liquid propellant rockets, engines, selection criteria and cooling methods
11 p1943 A69-25587
- Nuclear rocket propulsion, discussing solid core and fluid core systems for reactors, nozzles, feed systems, control, component design and performance
11 p1914 A69-25590
- Ion spacecraft propulsion systems, discussing components and characteristics of reaction type rocket engines and electrical thrust devices
11 p1944 A69-25593
- Unsteady gas dynamics of explosions and detonation theory, noting applications to rocket propulsion systems performance
11 p1876 A69-25595
- Spacecraft propulsion systems comparison and evaluation, discussing quality, schedules and costs in relation to mission requirements
11 p1965 A69-25600
- Rocket propellants, propellant chemistry and rocket propulsion system performance
13 p2324 A69-27916
- Electric and chemical rocket propulsion systems
13 p2325 A69-28255
- Thermionic reactor systems, discussing hybrid nuclear rocket/nuclear electric Mars mission, design features, performance and electric power characteristics
14 p2480 A69-29183
- Performance potential of high speed ocean-going air cushion vehicles with aircraft nuclear power plants
[AIAA PAPER 69-416] 15 p2550 A69-30480
- Propulsion system influence on aircraft reliability from viewpoint of engine manufacturer
15 p2629 A69-31122
- Mixture ratio distribution, injector/chamber performance and nozzle effects on specific impulse of liquid propellant rocket engine using hydrazine and oxygen
16 p2828 A69-31724
- Bipropellant propulsion systems using Aerozine 50 and nitrogen tetroxide for Symphonie telecommunications satellite
16 p2828 A69-31733
- Solid rocket propellants tests, considering propulsion performance measurements, altitude simulation problems, internal flow patterns, nozzle geometry, etc
16 p2765 A69-31751
- Subsonic transport high bypass ratio engine evaluation in terms of fuel consumption, size, thrust-weight ratio, noise and price
16 p2835 A69-31803
- Nuclear rockets as Saturn 5 third stages, emphasizing increased payload or velocity utility and resulting engine and stage requirements
[AIAA PAPER 69-555] 16 p2867 A69-31849
- Solid fuel propulsion systems for tactical rockets design, discussing microwave attenuation, acceleration-combustion interactions and performance optimization
16 p2836 A69-31998
- Concorde propulsion and ejection systems reliability, testing reheating duct, primary nozzle, secondary assembly, etc
16 p2837 A69-32072
- ICRPG liquid propellant thrust chamber performance evaluation methodology, reviewing imperfections and limitations
[AIAA PAPER 69-468] 16 p2838 A69-32657
- Nuclear solid core rocket engine performance for interplanetary orbital launch of spacecraft by multiport injection
[AIAA PAPER 69-535] 16 p2810 A69-32660
- Vaporization interaction liquid rocket performance model, discussing performance loss evaluation and test data
[AIAA PAPER 69-470] 16 p2838 A69-32663
- Saturn 5 S-1C stage propulsion performance, using engine parameters from telemetry rather than accelerometer data, analyzed by iterative techniques and computer program
[AIAA PAPER 69-733] 16 p2839 A69-32672
- Agna propulsion system performance model for predicting propellant flow rate, mixture ratio, thrust time and specific impulse
[AIAA PAPER 69-453] 16 p2841 A69-32683
- Stator setting effect on single stage turbine performance, considering blade loss and surface velocity distribution
[AIAA PAPER 69-525] 16 p2841 A69-32686
- Solar electric propulsion system performance consisting of thrusters with thrust vector aligning actuators, switching network and flight type power conditioner
[AIAA PAPER 69-498] 16 p2843 A69-32708
- Analytical evaluation of secondary flow injection effects on rocket engine performance including cold flow and simulated hot flow data
[AIAA PAPER 69-473] 16 p2844 A69-32726
- Discharge chamber plasma processes in electron bombardment ion thrusters, considering factors affecting thruster performance
[AIAA PAPER 69-494] 16 p2845 A69-32735
- Nonequilibrium inlet conditions effect on combustor performance during H and vitiated air combustion, studying ignition delays
[AIAA PAPER 69-457] 16 p2881 A69-32767
- Space storable hydrocarbon fuel blended FLOX propellant performance with coaxial injector including characteristic velocity, chamber geometry, pressure and heat flux distribution
[AIAA PAPER 69-507] 16 p2835 A69-32772
- Constant chamber pressure thrust throttling of expansion-deflection rocket nozzle, calculating wall static pressure and thrust by characteristics method, discussing performance
[AIAA PAPER 69-435] 16 p2846 A69-32776
- Rocket performance optimization by extending injector design technology to high performance injectors for space storable FLOX/LPG propellants
[AIAA PAPER 69-506] 16 p2846 A69-32778
- Interagency Chemical Rocket Propulsion Group method of treating measurement error for liquid rocket engine performance parameters, using uncertainty model
[AIAA PAPER 69-734] 16 p2846 A69-32781
- RF ion thrusters using electrodeless self sustaining mercury discharge, describing basic theory, component design, performance optimization and test results
17 p3018 A69-33326
- Vernier motor for Europa 1 rocket third stage, discussing component design, system performance and fuel composition
17 p3018 A69-33328
- STOL and V/STOL short haul intercity airliners emphasizing propulsion systems, operational aspects and economics
17 p2898 A69-33356

PROPULSIVE EFFICIENCY

OH-6A drive system design for lightweight, low cost high performance helicopter, discussing reliability from RVN combat data
[AHS PAPER 374] 17 p2900 A69-33514

Helicopter power plant and drive and rotor systems influence on design, configuration, weight, payload and performance
[AHS PAPER 334] 17 p2901 A69-33528

Heavy lift helicopter design with 30 ton payload, considering fanjet drive hot cycle and shaft drive propulsion systems
[AHS PAPER 330] 17 p2901 A69-33532

Chemical relaxation, optimum propellant mixture ratio, combustion chamber pressure, gas jet impulse, mass flow and drive capacity of space propulsion systems
18 p3229 A69-34773

NERVA engine operational cycle and performance, discussing startup, thrust buildup and shutdown
[AIAA PAPER 69-515] 18 p3170 A69-34809

Advanced design weight analysis and fixed equipment and propulsion systems weight prediction, noting error probability
[SAWE PAPER 790] 18 p3220 A69-34867

Air breathing engines performance possibilities, describing design and testing difficulties, stability requirements, etc
18 p3185 A69-35139

Steady state and dynamic distortion influence on performance and stall of turbofan engine, discussing compressor instrumentation, tests and simulation data
18 p3185 A69-35175

Solar electric thrust system technology concerning performance, thruster control system stability and method for solution
19 p3394 A69-35941

BEEP /Best Estimate of Engine Performance/ program based on trajectory reconstruction and acceleration determination for evaluating Titan 3 propulsion system performance
[AIAA PAPER 68-585] 19 p3394 A69-35945

Main tank injection for packaged liquid missiles, discussing propulsion system design, pressurization, packaging and screen reservoir
[AIAA PAPER 68-627] 19 p3429 A69-35947

Titan 3 transtage attitude control system hydrazine rocket engine design and performance, emphasizing problems associated with monopropellant
[AIAA PAPER 69-422] 19 p3394 A69-36300

Propulsion performance of XB-70A aircraft calculated by gas generator method
[AIAA PAPER 68-594] 20 p3461 A69-37152

Propulsion system performance relationship to manned planetary mission capability, discussing anticipated performance of advanced propulsion concepts
20 p3586 A69-38118

Pulsed performance of saturated steam reaction jet, comparing steam performance to nine gases for equal temperatures and thrust levels
21 p3785 A69-39021

Mission and planetary vehicles characteristics affecting design of solid propellant motors and thrust vector control systems in planetary orbiters and landers
[AIAA PAPER 68-815] 21 p3819 A69-39031

Trajectory requirements and performance comparisons of single stage electrically propelled space vehicles
[AAS PAPER 68-106] 21 p3819 A69-39204

ATS 3 spacecraft ammonia-fueled resistojet engine test performance
[AIAA PAPER 68-553] 21 p3786 A69-39754

Equilibrium running points and performance data of turbojet engine with characteristic curves of dynamic intake, compressor, combustion chamber, turbine and ejection duct
21 p3786 A69-39858

MPD converters in pulsed and continuous modes, discussing inductive propulsion system
22 p3999 A69-39905

HF ion engine RIT 10, Kaufman ion engine ESKA, Hall effect ion engine HIT and MPD engine compared for state of development
[DGLR-69-021] 23 p4202 A69-41928

Low temperature mechanical properties of structural materials for high energy propulsion systems, using low boiling point propellants as liquid hydrogen, fluorine and oxygen
23 p4177 A69-42159

PROPULSIVE EFFICIENCY NT PROPELLER EFFICIENCY

Steady three dimensional flow through impeller of turbines with small number of blades and with edge cut hub, noting inefficiency of flow without impact
01 p0142 A69-10309

High pressure rocket engine design, considering complete combustion, propellant feed system overall efficiency and thermodynamic gain
03 p0495 A69-12888

Aerothermodynamics of subsonic-aircraft propulsion, analyzing performance of bypass engine, fuel consumption and specific weight
05 p0695 A69-15551

High turbine inlet temperature technology using thermosiphon cooling for gas turbine, possibly doubling specific horsepower of aircraft
[SAE PAPER 690034] 07 p1203 A69-18311

Unannounced propellant weight and thrust of Soviet Luna spacecraft based on Luna 12 lunar orbit injection maneuver
08 p1409 A69-19969

Electron bombardment mercury ion thruster plasma properties and performance, computing ion beam current, discharge losses and propellant utilization efficiency
[AIAA PAPER 69-256] 09 p1560 A69-21214

Book on rocket propellants covering propulsion fundamentals, liquid, solid and hybrid propellants properties, performance calculations, rocket technology, etc
10 p1752 A69-23806

Propulsion optimization for various vehicles, considering power plant weight, specific fuel consumption, power and thrust ratios, etc
11 p1941 A69-24462

Charged particles generation by liquid subjected to high electric field for efficient bipolar microthruster
[AIAA PAPER 67-728] 13 p2325 A69-28220

Fluidic systems for automatic control of fuel supply to ramjet engine combustor, coolant rationing and distribution to engine structure and performance efficiency maintenance
14 p2508 A69-28875

Monograph on jet turbine with small hub ratio for cases of complete and partial admission, considering masking effects, flow measurements, etc
20 p3586 A69-37924

Nonintegral burn of solid core nuclear rockets, discussing modular stage concepts approach to low cost space exploration
[AIAA PAPER 68-589] 21 p3768 A69-39026

Thrust increase methods for air breathing turbojet engines analyzed with respect to effectiveness, taking into account environmental supporting mass and fuel expenditures
23 p4199 A69-41578

Foamed liquid as potential coolants in rocket engine to overcome low efficiency and streaky coverage of conventional liquid film cooling
24 p4408 A69-43127

PROPYL COMPOUNDS
Propyl gallate radiation shielding effect variations with proton and gamma ray bombardment, noting growth and development of potato tuber eyes
08 p1262 A69-19927

PROPYLENE
Propylene imine IR and Raman spectra, calculating thermodynamic functions based on rigid rotator harmonic oscillator model
14 p2410 A69-29922

PROTECTION

U THERMAL PROTECTION

PROTECTIVE CLOTHING
NT HELMETS
NT PRESSURE SUITS
NT SPACE SUITS

Occupant restraint systems for automobiles, aircraft and manned space vehicles, discussing cost, practicability, ease of use, acceptability and possible improvements
03 p0380 A69-13459

Water cooling jackets of plastic textile reinforced film for high inside temperature reduction in protective clothing
06 p0883 A69-18027

Protection against burn producing intense thermal exposures, noting double layer of fire resistant material
[AGARDOGRAPH-111] 08 p1266 A69-20674

Human body heat loss control during water immersion, discussing insulative garments and technologies of energy conversion systems
[AGARDOGRAPH-111] 08 p1267 A69-20681

Personal cooling in inadequately air conditioned cockpits, considering dry air, air ventilated suits and liquid circulated tubes near skin
[AGARDOGRAPH-111] 08 p1267 A69-20684

Ranque vortex tube as cooling device in MA-3 ventilating garment
09 p1447 A69-22550

Crash helmet impact protection capability, considering helmet construction
17 p2913 A69-33169

Composite ceramic armor systems for airborne vehicles and personnel, air cushion vehicles and ground troops, discussing weight and contour forming advantages
19 p3355 A69-35525

Radio telemetry system for evaluating protective masks dynamic performance by remote simultaneous monitoring of respiration, acceleration and temperature data generated by human subjects
23 p4121 A69-41765

Circulatory reactions of humans under g forces in centrifuge for various periods, with or without anti-g suit
24 p4267 A69-43385

PROTECTIVE COATINGS NT ANODIC COATINGS NT CERAMIC COATINGS NT PRIMERS [COATINGS]

Chemical vapor deposition of iridium coatings on graphites for high temperature oxidation protection, discussing parameters for iridium compounds and optimum depositing conditions
01 p0097 A69-10643

Passive ice protection of aerodynamic surfaces by icephobic coating, measuring removal of ice under simulated conditions in tunnel tests
01 p0056 A69-11047

Protective coatings for gas turbine engine components in marine environments, considering corrosion of diffuser, impeller, compressor case and turbine blades
01 p0099 A69-11057

Aircraft gas turbine compressor parts erosion tests
01 p0099 A69-11058

Silicic coatings effect on Mo mechanical properties subjected to tensile tests in vacuum and air at various temperatures
02 p0264 A69-11883

High temperature tensile strengths of uncoated boron filament and filament coated with silicon carbide
02 p0270 A69-12731

Aluminum corrosion by fungi isolated from jet fuel system with predominance of Cladosporium resinae, noting protective coatings
06 p0616 A69-14765

Satellite, spacecraft and rocket components coatings and lubricants, noting high radiation resistance of polyimides
06 p0945 A69-17046

Storable tubular extendible member /STEM/ booms for gravity gradient applications, emphasizing reflective coatings to minimize deflection by solar radiation
07 p1226 A69-18327

Chemical conversion coatings and low temperature enamels preventing corrosive attack on beryllium parts in environments containing moisture, chloride ions and/or high temperature oxidizers
07 p1169 A69-19762

Plastic backing films removal from carbon electron microscope replicas by maintaining specimens in horizontal position
09 p1495 A69-21651

Apparatus for depositing protective coatings on graphite by vacuum method in refractory metal carbonyl and halides mixtures and in molten metals
09 p1528 A69-21850

Earth reflected solar radiation and stability of satellite thermal control coatings, noting intensity distribution shifting toward UV region and coatings degradation rate
09 p1579 A69-22174

Refractory metal oxidation protection by inorganic compounds at high temperatures, discussing protective mechanisms
09 p1526 A69-22322

Refractory metal, precious metal and ceramic material compatibility tested by metallography and by microprobing for protective coatings possibilities
09 p1477 A69-22325

Refractory alloys electrodes used for surface coating Ti alloys by electric spark method, studying microhardness and wear resistance
10 p1711 A69-23339

Monograph on molecular structure and polymer properties, covering coherent adhesive layer of polymeric material for paint film in protective coatings
10 p1717 A69-24187

Gas film protection of quartz tube wall transparency loss due to hot plasma contact used to study UV emission during high power pulse discharges
11 p1926 A69-24616

Fiber optics application to fiberscopes and fused fiber optic plates, noting surface coating for light scattering prevention
12 p2084 A69-26150

Ductile metal clads and coatings of silicides, aluminides and noble metals to protect Cr alloys against nitrogen embrittlement and air oxidation
12 p2114 A69-26495

Book on oxidation and shielding of beryllium in gas media for nuclear and aircraft technology
13 p2280 A69-27927

Tungsten disilicide coated Ta-W alloy oxidation mechanisms, comparing coatings protective properties at high temperatures
13 p2280 A69-28137

Electrode surface bismuth coating selected for reducing electrostatic analyzers photocurrents
14 p2446 A69-29048

Self thermostatic phase-change coatings for active and passive spacecraft temperature control, discussing temperature dependent changeability in solar absorptance
14 p2530 A69-29434

Stress corrosion preventative metal-pigmented paints for titanium alloys, discussing chemicals added to increase cathodic potential
14 p2469 A69-29936

Corrosion at polymeric film-metal substrate interfaces, noting roles of film properties, bond strengths and primer coats
14 p2466 A69-29938

Corrosion prevention in beryllium, testing conversion coatings and low fired porcelain enamels under various humidity and temperature conditions
14 p2466 A69-29939

Calorimetric measurement of source and broadband spectral absorptances of spacecraft thermal control coatings during exposure to UV in vacuum environment
16 p2789 A69-31815

Simulated solar wind environment effects on zinc oxide/potassium silicate and lanthanum oxide/potassium silicate spacecraft thermal control coating pigments [AIAA PAPER 69-642]
17 p2991 A69-33273

UV irradiation effects on ZnO spacecraft thermal control coating pigments, discussing photo-Hall, luminescence and electron paramagnetic resonance measurements [AIAA PAPER 69-639]
17 p2992 A69-33288

Thermal design of landed vehicle on Mars surface, discussing instrument package covering inside surface coating and battery insulation [AIAA PAPER 69-611]
17 p3049 A69-33295

Electron energy effects on reflectance degradation and recovery of thermal control materials in vacuum, reporting test results for various protective coatings [AIAA PAPER 69-643]
17 p3005 A69-33306

Silicide coatings effect on Mo mechanical properties subjected to tensile tests in vacuum and air at various temperatures
18 p3156 A69-35043

Glass encased electronic components with conformal coatings, considering glass breakage at low temperature
19 p3281 A69-35547

Thin silicon solar cells environmental tests, evaluating temperature and humidity effects on various contacts and coatings
19 p3252 A69-35699

Cadmium sulfide solar cells and Kapton coverslides under proton irradiation, noting annealing of damage in samples exposed to air
19 p3253 A69-35705

Collection of papers on protective coatings of metals
19 p3328 A69-36155

Diffusion during high temperature exposure of protective coatings on Mo, noting compact layers and carbide forming elements effect on thermal stability
19 p3345 A69-36156

Al effect on B and Cr diffusion in protective coating on Cr-Ni heat resistant alloy, noting thermochemical kinetics for homogeneous layers
19 p3345 A69-36157

Heat resistance evaluation of ZrH6-K alloy subjected to multicomponent surface diffusion alloying combinations of Al, B, Cr, Si, Zr
19 p3345 A69-36159

Second surface mirror used as coating for spacecraft thermal control
20 p3632 A69-37290

Heat resistant coatings - Conference, Leningrad, may 1966
20 p3559 A69-37357

Coating deposition theory on high temperature materials, discussing interfacial energy and wetting properties of molten metal drop on solid base material surface
20 p3560 A69-37358

Protective coatings of oxygen-free high melting point Si compounds and silicate binder, noting chemical stability in corrosive media
20 p3566 A69-37371

Carbide coatings formation on graphite in molten media, determining diffusion coefficient of carbon in molten Zr
20 p3566 A69-37372

Tungsten carbide erosion resistant coatings, discussing optimum plasma deposition process and coating characteristics
20 p3561 A69-37373

Protective coatings for high melting point metals, discussing prevention of low temperature coating breakdown due to oxidation
20 p3561 A69-37375

Oxidation resistant coating methods and systems for Cb base materials protection for aerospace vehicles and aircraft propulsion systems structures
21 p3730 A69-38672

Oxidation resistant silicide coatings for tantalum and tungsten alloys at elevated temperatures
21 p3730 A69-38673

High strength steel landing gear components corrosion protective finishes, discussing paint over bare steel, porous Cd plating and vacuum deposited Cd
21 p3743 A69-38730

Sprayable polyurethane foam lightweight insulation for Saturn s-2 booster tanks holding liquid H an liquid O at wide temperature ranges
21 p3732 A69-38967

Stress corrosion cracking prevention by selection of material, stress relief, compressive stresses introduction, protective coatings and by simulated accelerated tests
21 p3748 A69-39490

Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion [AIAA PAPER 69-979]
22 p4050 A69-40359

Vacuum integrating sphere for measuring solar absorptance in space environment to determine thermal control coatings qualifications [AIAA PAPER 69-1021]
22 p3923 A69-40392

Galvanic corrosion prevention measures for airframe fasteners, discussing crevice sealants, primers, zinc chromate, cadmium and aluminum coatings
22 p3957 A69-40825

Silicide and B-modified coatings on Mo, noting improved high temperature oxidation resistance under thermocycling
22 p3957 A69-40972

Soviet collection of papers on bright electrolytic coatings including physicochemical principles of deposition
22 p3958 A69-41261

Physicochemical principles of electrolysis and electrodeposition of metals for obtaining bright galvanic coatings
22 p3958 A69-41262

Bright chromium electrodeposition principles and properties of coatings
22 p3958 A69-41263

IR directional and hemispherical emittance of spacecraft thermal control coatings, comparing values determined by various measurement techniques
23 p4164 A69-41633

Integral coverslip development for Si solar cells, considering borosilicate glass fusing on cell surface and RF and high vacuum ion beam sputtering
23 p4070 A69-42272

Wear protection of pressure loaded Ti-Mn alloy by heat diffused lubricated electrodeless Ni coatings
24 p4331 A69-42786

Soviet book on silicoorganic protective coatings preparation, physical, chemical and operational characteristics, with emphasis on silicates and metals
24 p4336 A69-43232

Chemical treatment of Ti during processing, discussing protective coating, scale conditioning, surface contaminant removal and acid pickling
24 p4324 A69-43432

Polymeric polyurethane protective coatings for radar radome covers with improvement in service life, discussing performance properties and production method
24 p4338 A69-43456

Protective coatings on Ni base superalloys for gas turbine engine blade and vane components for hot corrosion and oxidation resistance [SAE PAPER 690480]
24 p4335 A69-43515

PROTECTORS

AC ignitor priming of quartz-chlorine gas discharge X band waveguide limiter with fast recovery used as radar receiver protector
15 p2573 A69-30035

PROTEIN METABOLISM

NT LIPID METABOLISM

Chlorella and Scendesmus unicellular algae mixture tested for biological protein value in humans for possible food source
01 p0021 A69-11079

Protein contained purine free basal and yeast ribonucleic acid diets effect on plasma and urinary uric acid production in male subjects
05 p0708 A69-15968

Algae diet more effective than soya-protein diet in recovering metabolic processes in protein deficient white rats
07 p1065 A69-18977

Hypokinesia effects on rats noting body and organ weights, liver glycogen and N content and tissue proteolysis of skeletal muscles
08 p1262 A69-19928

Algae soil-protein diet more effective in recovering metabolic processes in protein deficient white rats
20 p3479 A69-38225

Muscular strength dynamometric measurements in subjects during prolonged inactivity with restricted caloric and protein intake, showing decrease in strength
21 p3653 A69-38901

Cholesterol-protein metabolism in muscles, liver and cerebrum of lethal X ray exposed guinea pigs compared with unexposed group
21 p3657 A69-39052

Protein rates and RNA synthesis in cerebra of rats analyzed as factor of high altitude hypoxia adaptation
22 p3886 A69-41122

Anoxia effects on leucine-super 3 H incorporation by submandibular gland cells of neonatal rats, discussing cytoplasmic proteins synthesis impairment
22 p3887 A69-41195

Cytoplasmic protein synthesis mechanism using rats heart-lung preparation with precise hemodynamic parameters control, noting variance with change in cardiac work level
23 p4083 A69-41456

Tension effects on amino acid incorporation rate into proteins of cross-striated muscles of rats
23 p4083 A69-41458

Whole body X irradiation effect on protein degradation in mice, using radioactive I labeled albumin
23 p4099 A69-42151

Cardiac myosin characteristics obtained from dogs with naturally occurring heart failure, showing reduced adenosinetriphosphatase activity as compared with normal dogs
24 p4258 A69-42630

Myocardium protein metabolism and heart physiology and pathophysiology, examining contractile function and energy transformation in hyperfunction, hypertrophy and heart failure
24 p4259 A69-42637

PROTEINOIDS

Acidic, neutral and basic proteinoids thermal synthesis, discussing characterization and tendency to form microparticles
07 p1074 A69-18633

Binding of lysine-rich proteinoids to organismic or thermally synthesized polynucleotides, noting polyanhydroamino acid interactions with polynucleotides
07 p1074 A69-18635

Self assembly relation to origin of life and spontaneous generation applied to precellular polymers, biopolymers and cellular structures
12 p2018 A69-25776

Origin of life data, discussing self ordered polymers, propagative cell-like systems, protenoids, cellular evolution, etc
12 p2018 A69-25781

PROTEINS

NT ADENOSINE TRIPHOSPHATE [ATP]
NT ALBUMINS
NT COENZYMES
NT FIBRINOGEN
NT GAMMA GLOBULIN
NT LIPOPROTEINS
NT NUCLEOTIDES

NT OXIDASE
NT OXYHEMOGLOBIN
NT PEPTIDES
NT PROTEINOIDS

Fluorescence spectroscopy of proteins, analyzing polarity, distances between groups, flexibility and conformational transitions

01 p0023 A69-10291

Low temperature effects on calf thymus deoxy-nucleoprotein, crystalline egg albumin and fibrillar actin, noting molecular weight and viscosity changes

01 p0018 A69-11089

Cell and tissue cultivation outside living organisms, discussing applications in space biology, space medicine and food protein sources

02 p0198 A69-11501

Nutritive value of protein from discolored algae biomasses on groups of rats kept on algae biomass, casein and soybean diets

02 p0198 A69-11510

High oxygen tension effect on transport and incorporation of exogenous leucine and protein synthesis in *Pseudomonas saccharophila* cells

03 p0369 A69-13433

Molecular mechanisms leading to mineralization of organic tissues, noting role of protein and glycoprotein matrices

04 p0555 A69-14888

Substrate and subunit interactions influence of beta 2 protein of *Escherichia coli* tryptophan synthetase on fluorescence properties of pyridoxal phosphate prosthetic groups

04 p0553 A69-15304

Protein free diets effects on rat intestinal microflora, noting decrease in lactic acid bacteria and increase in spore forming bacteria

05 p0709 A69-16516

Hydrogenomonas eutropha as means of protein food source independent of conventional agriculture for animal feed supplement

10 p1644 A69-23306

Tryptic digestion of C terminal tritiated peptides analyzed with *Scenedesmus ferrodoxin*, noting use for protein structural study

10 p1648 A69-24190

Protein and nucleic acid building blocks sequence differences influence on evolutionary relationship of living organisms, comparing fish and mammal globins

11 p1828 A69-25456

Gas-liquid chromatography of natural protein amino acids in biological substances, noting separation characteristics

13 p2217 A69-28258

Biochemiluminescent luminol-peroxide reaction to detect iron porphyrin proteins in microorganisms for extraterrestrial life search, discussing reaction kinetics

15 p2556 A69-31325

Dynamic differential thermal analysis with He flow performed on biological specimens, proteins and starches, showing discrete decomposition peaks monitoring pyrolysis process

16 p2747 A69-31807

Macromolecular ring shaped components corresponding to hemagglutinin studied in *Limulus polyphemus* hemolymph by electron microscopy

16 p2742 A69-31864

Protein free diets effects on rat intestinal microflora, noting decrease in lactic acid bacteria and increase in spore forming bacteria

18 p3096 A69-34735

Scenedesmus algae cell wall structure degrading to increase digestibility of cell bound protein, describing mechanical, enzymatic and chemical methods

21 p3667 A69-39701

Microbial protein extraction from *Chlorella* algae and *Torulla* yeasts using urea soaking method

21 p3662 A69-39712

Adenylates condensation in protein-associated amino acids as clue to peptide bond synthesis within protocellular structures

22 p3895 A69-40048

C 14-tryptophan incorporation into C 14-protein in cultured rat pineals, noting norepinephrine stimulation

22 p3871 A69-40054

NonDarwinian evolution of protein and DNA, comparing expectations of evolution models for protein and amino acid changes

22 p3871 A69-40060

Yield stress of normal human blood related to endogenous fibrinogen concentration as function of total protein concentration, proposing fibrinogen adsorption and coupling model

22 p3874 A69-40223

DNA interaction with ribosomes enhancing amino acid incorporation into cell-free protein synthesizing system extracted from *Chlorella pyrenoidosa*

23 p4080 A69-41430

Pyrimidine polyribonucleotides or purine polyribonucleotides binding to lysine- or arginine-rich proteinoids considered for abiogenesis

23 p4113 A69-41509

Biochemical evolution role in porphyrin synthesis forming hemoproteins base, discussing assimilation of carbon dioxide in early earth atmosphere

23 p4088 A69-41814

PROTOBIOLOGY

Cell-like structures containing biochemicals as inevitable event under various hypothetical primitive earth conditions

23 p4085 A69-41479

PROTON BEAMS

Proton energy distributions for passage through NaCl, KCl, KBr, Si and Ge single crystals at various angles relative to /100/ and /110/ crystallographic planes

01 p0140 A69-11109

Radiological properties of high energy proton beams from synchrocyclotron in tumor treatment and neurosurgery

03 p0373 A69-13495

Proton beams uniformity available at NASA synchrocyclotron designed for radiation biology research by simulating space radiation environment

05 p0742 A69-15992

Proton flare activity dependence on Bartel active longitudes and sector structure boundaries of interplanetary magnetic field

07 p1205 A69-19248

Carbon dioxide laser excitation by fast proton beams, noting generation power increase

08 p1323 A69-19802

Cosmic protons interaction with interplanetary plasma, analyzing beam energy loss due to excitation of longitudinal electrostatic oscillations

10 p1760 A69-23617

600 Mev proton synchrocyclotron at Space Radiation Effects Laboratory for space radiation environment simulation, discussing beam energy spread

16 p2814 A69-32201

Elastic scattering cross sections for 21-Mev incident protons measured for nuclei differing in mass, determining optical model potential

18 p3179 A69-35489

PPI bursts interpreted as proton beams cyclotron instability in geomagnetic field

20 p3521 A69-37039

PROTON BELTS

Inner Van Allen belt proton dose rate and spectral charged particle environment profiles correlated, noting agreement with theoretical values

01 p0145 A69-11081

Bimodal diffusion mechanism for acceleration of trapped electrons and protons in earth radiation belts, noting particle intensity profiles and energy spectra

09 p1576 A69-21708

Inner radiation zone including data on electrons, protons and heavier particles and results from high altitude nuclear tests

12 p2152 A69-27144

Proton dose in receiver behind combination electromagnetic and material shield, calculating dose for Van Allen and solar proton event spectra

15 p2652 A69-31522

Trapped protons acceleration through bimodal diffusion in magnetosphere, noting spatial patterns and temporal behavior of proton and electron belts

16 p2851 A69-32618

Ionospheric electron temperature profiles for mid-day equinoctial conditions noting protonospheric and conjugate heating effects

22 p3939 A69-40506

Cosmic ray albedo neutron decay (CRAND) source for trapped protons, showing disagreement with intensities in inner zone measured on OV1 2 spacecraft

22 p4005 A69-40512

Cosmic ray albedo-neutron decay source role in intensity measurements of high energy protons trapped on low L shells during satellite flights

24 p4367 A69-43176

Nighttime protonosphere thermal balance from Alouette 2 electrostatic probe measurements of electron temperature and concentration in magnetosphere

24 p4310 A69-43181

PROTON DAMAGE

Cadmium sulfide solar cells and Kapton coverslides under proton irradiation, noting annealing of damage in samples exposed to air

19 p3253 A69-35705

PROTON DENSITY [CONCENTRATION]

NT MAGNETOSPHERIC PROTON DENSITY

Ion cut-off whistlers observed during VLF experiment aboard OGO 2 and OGO 4, noting possible application to relative ionospheric proton concentration determination

03 p0426 A69-14029

Energy density of neutron star matter from Brueckner theory calculations of nuclear matter and pure neutron gas, determining proton relative density

08 p1381 A69-19785

Solar wind-magnetosphere pressure balance and proton density of solar wind

09 p1577 A69-21711

Cosmic rays sudden intensity increases during proton flares of 28 January 1967 and 7 July and 2 September 1966, plotting proton density vs pressure

20 p3587 A69-37045

PROTON ENERGY

Proton energy distributions for passage through NaCl, KCl, KBr, Si and Ge single crystals at various angles relative to /100/ and /110/ crystallographic planes

01 p0140 A69-11109

Thermal-neutron flux generated by high energy protons in water moderator surrounding thick targets calculated as function of position

02 p0279 A69-11837

High energy cosmic ray particles observed with SEZ-14 instrument aboard Proton 1 and 2 satellites

03 p0499 A69-12944

Acute somatic effects in monkeys irradiated with protons of various discrete energies representing significant portions of space proton spectrum

03 p0374 A69-13497

Charged particles injection into captured radiation zone of Van Allen belts during main phase of magnetic storm indicated by proton data analysis

05 p0815 A69-16057

Injection spectra of protons accelerated on sun to billion-trillion ev, discussing acceleration mechanisms

06 p0996 A69-17741

High electron-proton temperature ratios effect on solar wind double shock wave structure, using one dimensional and two fluid models

07 p1205 A69-18849

Solar protons balloon measurements following flare, noting integral proton flux and energy spectra

10 p1767 A69-23763

Microscale fluctuations in interplanetary magnetic field, considering proton thermal energy and magnetic field energy densities

10 p1785 A69-24100

High energy cosmic ray origin and acceleration by LF electromagnetic radiation produced by pulsars, noting maximum energy for protons

11 p1950 A69-24927

Pitch angle distribution function of thermal protons in magnetosphere taking into account earth gravitational field

12 p2067 A69-26354

Electron and proton spectra in 1-13 kev range relative to geomagnetic field lines measured by ESRO 1 satellite during Aurorae mission

13 p2328 A69-27755

Medium energy trapped and dumped protons at high latitudes and auroral zone, using semiconductor radiation detectors on ESRO 1 satellite

13 p2328 A69-27756

Low energy electron and proton precipitation, discussing acceleration mechanisms and periodicity in relation to auroras and airglows

15 p2594 A69-30018

Photometric rocket measurements in hydrogen auroras, finding vertical H beta emission profile estimate of proton energy spectrum for H beta production cross section

15 p2598 A69-31307

Magnetic storm effects on electrons and protons in outer belt, using satellite data for intensity and differential energy spectra

15 p2676 A69-31314

Matter traversal of high energy primary galactic cosmic ray protons from antiproton flux and energy measurements

15 p2678 A69-31491

Solar energetic proton penetration into magnetotail from proton data collected by Vela 4 energetic particle telescopes, comparing proton fluxes inside and outside magnetotail

16 p2847 A69-31966

Stochastic heating of protons by random magnetosonic wave propagating normal to magnetic field to explain proton energy excess in magnetotail plasma sheet

16 p2848 A69-31969

Electrostatic heating of solar wind ions from instability in two fluid solar wind model leading to preferential heating of protons over electrons
16 p2848 A69-31971

Low energy solar protons entry into magnetosphere on 26 May 1967 showing diffusion control
16 p2849 A69-31984

600 Mev proton synchrocyclotron at Space Radiation Effects Laboratory for space radiation environment simulation, discussing beam energy spread
16 p2814 A69-32201

Diurnal variations in gamma rays produced by proton bombardment ascribed to geomagnetic time dependence for low energy solar proton cut-off
16 p2850 A69-32308

Rocket instrumentation for electron and proton spectra measurement in aurora borealis
17 p2972 A69-33038

NaI/Tl/ and CsI/Tl/ scintillation counters effectiveness in recording low energy protons against counter noise background
18 p3138 A69-35255

Proton and deuteron energy used to study solid state chemical reactions effects on meteorites composition and properties, obtaining hydroxyl ions and hydrocarbons
19 p3414 A69-36114

Solar protons captured in earth dipole trap, discussing conditions for nonadiabatic escape
20 p3587 A69-37042

Charged particles injection into captured radiation zone of Van Allen belts during main phase of magnetic storm indicated by proton data analysis
20 p3591 A69-37967

Auroral electron and proton fluxes precipitation measurements by satellite, studying data in terms of spatial, energy and angular distributions
21 p3709 A69-38500

Daily variation of trajectory derived high latitude vertical cut-off rigidities in magnetospheric model consistent with proton and electron experiments
22 p4005 A69-40513

Cosmic X ray bremsstrahlung due to collisions of suprathermal protons with ambient electrons, giving clue about diffuse sky background of X rays
22 p4006 A69-40643

Cosmos 137 proton spectra data obtained in inner radiation belt agreeing with Relay I data
22 p4007 A69-41093

Thin films of infectious DNA of bacteriophage bombarded by slow protons, determining differential inactivation cross sections
23 p4081 A69-41431

Intermediate energy protons elastic and quasi-elastic scattering from light nuclei, correlating p-D, p-He-3, p-p and p-He-4 data with various scattering models
24 p4352 A69-43123

H beta production in hydrogen aurora measured during rocket flight, obtaining proton energy spectrum
24 p4309 A69-43170

PROTON FLUX DENSITY

Geoelectric field over polar cap based on proton flux detection
04 p0648 A69-14682

Satellite-borne auroral particle spectrometer calibration to minimize uncertainty in measuring absolute particle flux of electrons and protons
04 p0599 A69-15022

High energy proton and neutron fluxes and spectra from nuclear emulsion stacks on Cosmos satellites, calculating cosmic radiation doses
05 p0814 A69-16051

Cosmic ray electron flux and energy spectrum from balloon data obtained at Palestine, Texas, monitoring proton flux periodically
05 p0815 A69-16250

Polar cap event detected at low latitudes by effect on VLF propagation, noting VLF technique sensitivity to low proton fluxes
05 p0816 A69-16276

Hydrogen, helium and electron flux measurements by differential detectors at Fort Churchill in 1967
05 p0756 A69-16277

Nonadiabatic particle losses effect on integral proton flux in inner radiation belt, discussing proton energy spectrum
06 p0921 A69-17742

Low energy solar cosmic ray proton flux characteristics observed by Injun 1 satellite after July 1961 sudden commencement magnetic storm
09 p1576 A69-21707

Low energy proton flux in neighborhood of Moon measured by Luna 12 satellite indicating magnetized plasma region effect on burst
09 p1577 A69-21773

Recurrent Forbush decrease association with proton enhancement, discussing energetic storm particle events
09 p1582 A69-22752

Short term variability of solar proton flux in interplanetary space during solar flare activity, using data from cosmic ray detector on Pioneer 7
09 p1582 A69-22754

Solar cosmic rays proton intensity time variations and diffusion coefficient obtained by satellites, balloons and ground stations observations
10 p1755 A69-22812

Proton flux density at axial point of thin cylindrical and slab shell shields bombarded by isotropic inverse power law spectrum of protons in space
10 p1723 A69-23165

Solar protons balloon measurements following flare, noting integral proton flux and energy spectra
10 p1767 A69-23763

Energetic proton and electron fluxes spatial gradients after July 7, 1966 solar flare, noting satellite observations and injection mechanism geometry
10 p1767 A69-23767

ESRO 1 satellite measuring proton intensities and energy spectra of precipitated and magnetically trapped electrons
13 p2327 A69-27754

Integral particle flux of protons and electrons in upper atmosphere, discussing energy and angular distribution
13 p2328 A69-27757

Solar proton flux in two energy intervals measuring by ATS detectors during January 1967 event compared with data from satellites outside magnetosphere
14 p2509 A69-28935

Large amplitude pulsations in magnetic field magnitude and proton fluxes observed by satellite during magnetic storm compared with various models
14 p2434 A69-28947

Proton and alpha particle fluxes above specified vertical geomagnetic cut-off rigidity measured by balloon-borne Cerenkov scintillation counter telescope
14 p2511 A69-28951

ESRO 2 satellite observations of solar proton event of 9 June 1968, comparing flux profile variations across polar cap with magnetic changes at earth surface
15 p2677 A69-31347

Diurnal variations in gamma rays produced by proton bombardment ascribed to geomagnetic time dependence for low energy solar proton cut-off
16 p2850 A69-32308

Ground based solar proton monitoring, considering particle intensities and radiation dose rates from riometer absorption as function of time
16 p2850 A69-32321

D region electron densities from multifrequency absorption measurements by proton spectra analysis, noting cubic approximation
18 p3127 A69-34799

Low altitude trapped protons in inner radiation belt during solar minimum period, using emulsion detectors on polar-orbiting satellite
18 p3187 A69-34944

Precipitated low energy protons and electrons measurements during breakup aurora, discussing fluxes and poleward boundaries
18 p3187 A69-34946

Proton concentrations, magnetic field strength and temperatures distribution in interplanetary plasma flows as function of latitudinal distance from center of active region
20 p3594 A69-37020

Solar protons intensity increase observed by balloon-borne instruments over Antarctica, describing decay phases
20 p3589 A69-37556

High energy proton and neutron fluxes and spectra from nuclear emulsion stacks on Cosmos satellites, calculating cosmic radiation doses
20 p3591 A69-37961

Interplanetary proton and alpha particle radial gradients determined from Mariner data, considering Forbush decrease, particle solar origin, galactic cosmic radiation, etc
20 p3592 A69-38096

Charge exchange of solar wind protons passing shock front, noting turbulent subsonic motion of randomized hot solar wind protons in shadow cone
22 p4008 A69-41208

Incident proton flux atmospheric altitude profile during PCA period, comparing balloon observations with preliminary satellite data
23 p4204 A69-41485

PROTON IMPACT

First Born approximation cross sections for He excitation from ground state by proton impact calculated, using wave functions
06 p0960 A69-17027

Atomic H ionization by proton impact analyzed to calculate ejected electrons angular and energy distributions by extending Rudge and Seaton theory
19 p3375 A69-35911

Impact parameter versions of two state and Born approximations to calculate single excitation cross sections of H atoms ground state collisions
22 p3987 A69-41006

PROTON IRRADIATION

Explorer 26 observations of solar proton penetration inside trapped radiation near geomagnetic equator
01 p0146 A69-11122

P32 distribution in protein of blood serum, liver and brains of rats bombarded with high energy protons
02 p0198 A69-11507

Thermal-neutron flux generated by high energy protons in water moderator surrounding thick targets calculated as function of position
02 p0279 A69-11837

Slow proton irradiation of ribonuclease thin layers, determining differential inactivation cross section for various proton energies
03 p0371 A69-13482

Long lived radicals produced in crystalline ribonuclease and lysozyme by 120-Mev protons studied by ESR spectroscopy
03 p0372 A69-13485

Biological effects of proton irradiation of monkeys investigated to provide improved protective shield design data with minimum weight penalty
03 p0373 A69-13496

Acute somatic effects in monkeys irradiated with protons of various discrete energies representing significant portions of space proton spectrum
03 p0374 A69-13497

Biological effects on rhesus monkeys of high energy protons compared to effects of cobalt 60 gamma radiation
03 p0374 A69-13498

Surgical radiolesion in human brain by high energy protons
03 p0374 A69-13501

Orientation dependence of pitting and blistering in proton irradiated Al polycrystal surfaces
04 p0640 A69-14451

Pathomorphological aspects of radiation sickness in animals irradiated by high energy protons, showing changes in lymph node, stellate ganglion and spleen
05 p0708 A69-16509

Radiosensitivity of potatoes to gamma ray and proton irradiation applied to whole tubers and to isolated eyes before planting
05 p0709 A69-16511

Production rates of nuclides measured in stack of glass plates under proton irradiation for calculating cosmic ray production rates in stone meteorites
06 p0989 A69-17283

Distribution characteristics of radiation defects in materials irradiated by monoenergetic beams of protons and alpha particles
06 p0981 A69-17878

Bone marrow cell division disturbance in rats after proton irradiation
07 p1064 A69-18973

Propyl gallate radiation shielding effect variations with proton and gamma ray bombardment, noting growth and development of potato tuber eyes
08 p1262 A69-19927

Local shielding effectiveness of dogs against proton irradiation at minimum lethal dose, noting bone marrow role
08 p1263 A69-19939

Microvillar bleb formation in proton irradiated primate hepatocytes with electron microscope, noting sinusoidal lumen
10 p1641 A69-23045

Spatial distribution of residual nuclei produced in thick Fe targets by one and three Gev protons, noting total production and longitudinal variation of production
10 p1760 A69-23411

Electron and proton radiation doses impinging on orbiting satellites computed using orbit calculation and B, L coordinates
11 p1949 A69-24862

Computer program for electron and proton fluxes impinging on spacecraft, performing computation for Van Allen belts and solar flares
11 p1949 A69-24863

D-2 satellite radiation dose based on upper atmosphere electron and proton distribution model, simulating electron bombardment and aging of materials and subsystems
11 p1949 A69-24869

Electron, proton and gamma ray radiation effects on thin film CdS, GaAs and CdTe solar cells
11 p1825 A69-24872

Neutron production cross sections prediction at proton bombarding energies below 50 Mev and above threshold for multiple nucleon emission
12 p2192 A69-26299

Photoemulsion stacks irradiated by protons in magnetic field, determining nuclear isobar generation during quasi-nucleon interactions
13 p2303 A69-28373

Electron and proton components contribution to reverse current production after particle shower through upper Cu wall of ionization chamber with lower Pb wall
13 p2304 A69-28417

Distribution characteristics of radiation defects in materials irradiated by monoenergetic beams of protons and alpha particles
14 p2503 A69-28787

Histological changes in rat skin after 13 Mev proton irradiation, evaluating biopsies in tissue culture
14 p2407 A69-29299

Soviet book on nuclear interactions in spacecraft shielding covering proton-A1 nuclei inelastic interactions, secondary radiation, solar radiation effects, radiation belts, etc
14 p2481 A69-29817

Oxygen K-shell X ray production cross section and stopping power of aluminum oxide thin films for 20-100 kev protons
14 p2489 A69-29994

Diurnal variations in gamma rays produced by proton bombardment ascribed to geomagnetic time dependence for low energy solar proton cut-off
16 p2850 A69-32308

Pathomorphological aspects of radiation sickness in animals irradiated by high energy protons, showing channels in lymph node, stellate ganglion and spleen
18 p3095 A69-34728

Radiosensitivity of potatoes to gamma ray and proton irradiation applied to whole tubers and to isolated eyes before planting
18 p3095 A69-34730

Photoresponse and minority carrier diffusion length long term stability of Li doped solar cells after proton, neutron and electron irradiation
19 p3252 A69-35697

Proton irradiation effects on current degradation at fixed voltages of silicon solar cells with coverslips
19 p3252 A69-35701

Proton and electron auroral ovals, deriving H alpha intensity and frequency distributions as function of geomagnetic latitude and time from patrol spectrographs in Canada
19 p3302 A69-35993

Na 22 and H 3 production rates determined in stone meteorites exposed to 3 Gev isotropic protons, using radionuclide distribution data of exposed thick stone target
19 p3425 A69-36423

N-type GaAs optical properties after proton irradiation, noting transmission spectra dependence on initial electron concentration and irradiation dose
20 p3582 A69-36969

Bone marrow cell division disturbance in rats after proton irradiation
20 p3479 A69-38221

Pathological effects of single 120 Mev proton doses on rats blood in rotating cylinder, discussing leukopenia and benign and malignant tumors development
21 p3658 A69-39058

Solar proton bombardment of lunar surface, discussing luminescence and chemical effects
22 p4012 A69-40089

Thin films of infectious DNA of bacteriophage bombarded by slow protons, determining differential inactivation cross sections
23 p4081 A69-41431

PROTON MAGNETIC RESONANCE

Barrier to internal rotation from PMR spectrum for 1, 2-disubstituted ethanes, studying vicinal coupling parameters dependence
12 p2132 A69-25987

PROTON MASERS

Proton spin maser oscillator with emission coils coupled by prepolarized liquid, discussing tuning and detuning
08 p1324 A69-20231

Single hyperfine-state atomic beam selector effect on hydrogen maser stability, discussing DC magnetic field variation
18 p3153 A69-35306

PROTON-PROTON REACTIONS

Secondary particle spectra from proton-proton interactions analyzed in two temperature statistical model, considering momentum distributions
05 p0797 A69-16368

Pion production rate for proton-proton interactions in hydrogen, discussing relevance to hot massive stars, charged pion decay probability and mu-neutrino production
21 p3792 A69-39615

PROTON PROTUBERANCES

Cosmic radio emission anomalous absorption measurements during PCA following July, August, September 1966 proton flares
23 p4156 A69-41845

PROTON SATELLITES

Proton satellites measurements reconciliation with diurnal stellar variation data and cosmic rays origin models
19 p3396 A69-36621

PROTON SCATTERING

Differential cross sections for elastic scattering of 600 Mev protons from He 3 between 19 and 45 degrees
03 p0472 A69-13464

Asymmetry of polarized protons scattered from He 4 at 540 Mev for laboratory angles between 4 and 42 degrees
04 p0632 A69-14966

Multiple Coulomb scattering and range straggling effects in shielding against solar flare protons and trapped protons in Van Allen belt
10 p1723 A69-23164

Charged state variations during protons and inert gas atoms interactions analyzed by coincidence method
12 p2133 A69-26543

Elastic proton scattering measurements, noting consistency with statistical theory when diffraction is taken into account
13 p2302 A69-28368

High energy scattering approximation valid from small to large angles, discussing errors and proton scattering by He
14 p2487 A69-29008

Differential cross sections for elastic scattering of protons by Ar atoms in energy range 12.7-44.1 ev, estimating internuclear separation
20 p3580 A69-37499

Inelastic proton scattering cross sections for target nuclei in 2s-1d shell calculated in distorted wave Born approximation with projected Hartree-Fock wave functions
22 p3988 A69-41045

Intermediate energy protons elastic and quasi-elastic scattering from light nuclei, correlating p-D, p-He-3, p-p and p-He-4 data with various scattering models
24 p4352 A69-43123

Differential cross section and polarization measurements for elastic scattering of high energy protons from light nuclei
24 p4352 A69-43125

PROTON TELESCOPES

U PARTICLE TELESCOPES

PROTON 2 SATELLITE

Atmospheric density determination based on long period variations of drag coefficients from satellite Proton 2, considering satellite orientation
15 p2602 A69-31392

Satellite Proton 2 orientation from onboard measurement data, discussing general statistical method and data processing results
17 p3001 A69-33221

Proton 2 satellite orientation and motion about center of mass determined from telemetric data analysis under aerodynamic moment
22 p4037 A69-41090

PROTONS

NT SOLAR PROTONS

Spectra analysis of proton and He nuclei having different charge-to-mass ratios to obtain information on solar modulation and injection spectra
06 p0988 A69-17272

Differential energy spectrum of protons and helium nuclei using lithium drifted silicon detectors and scintillator-Cerenkov counter
07 p1204 A69-18833

Long lived streams of low energy solar electrons and protons and association with bright flares or solar active regions
07 p1206 A69-19249

Chemical effects of solar wind and cosmic protons on solid bodies in space, discussing possible relation to origin of life
08 p1407 A69-20935

Proton electrolyte application to fuel cells, discussing proton diffusion in solids and materials with vacancies /proton conductors/ in structures
08 p1269 A69-21053

Cosmic gamma ray spectra from metagalactic proton-antiproton annihilation
09 p1574 A69-21459

High energy protons, helium and gamma rays observed by particle telescope on board OSO-C, obtaining integral rigidity spectra of proton and helium nuclei
09 p1579 A69-22172

Chirp radar signal compression by proton spin echo phenomena, noting compression ratio and SNR
11 p1834 A69-24566

Ionization processes in Seyfert galaxies, considering thermal electrons, superthermal protons and electrons and nonthermal UV radiation
13 p2346 A69-27710

Proton initiated nuclear cascade in atmosphere calculated using Monte Carlo method, relating electron number to primary proton energy
13 p2331 A69-28397

Earth radiation belt data, discussing origin, density distribution, etc, of protons, electrons and alpha particles
15 p2674 A69-30016

Aurora electron and proton excitation patterns determined spectroscopically, discussing ground based observations of emission geomagnetic latitude-time distribution
15 p2593 A69-30017

Neutron star atmosphere and X ray emission spectrum, computing incident protons mean free path for two assumptions
15 p2686 A69-30535

Elementary processes cross sections in charged states changes during proton-hydrogen molecule interactions
15 p2655 A69-30963

Phonons, electrons and protons in ferro- paraelectric and hydrogen bonded ferroelectrics, examining higher frequency optical and lower frequency dielectric properties
16 p2827 A69-32262

Fuel cells with solid membranes with ion conductivity, discussing proton electrolyte
16 p2740 A69-32424

Hydrogen molecular ion dissociation due to ion-molecule inelastic collisions, comparing measured and calculated velocity distributions of protons produced
19 p3375 A69-35985

Synthesis of proton rich nuclei in highly evolved stars, considering p elements production in interior by isobaric transformation
19 p3428 A69-36837

Cosmic protons and high energy heavy nuclei interaction with radiation in expanding universe, including estimates of light radiation influence on cosmic ray spectra
20 p3591 A69-38034

ELF noise band observed by Alouette 2 receiver interpreted in terms of electrostatic power cyclotron harmonic waves, using digital power spectrum techniques
20 p3497 A69-38079

Ionospheric VLF electrostatic noise observed by sounding rocket, noting proton gyrofrequency harmonics effects within emission attenuation bands
21 p3714 A69-38550

Proton transfer mechanism of copper chromite catalyzed thermal decomposition of ammonium perchlorate, noting electron transfer
21 p3783 A69-38810

Thermodynamic properties of hydrogen atoms, protons and electrons, using canonical group analysis to determine bound and free states
21 p3850 A69-38964

Proton-antiproton high energy elastic scattering by bosons exchange, introducing vertex functions for non-local Lagrangian
21 p3775 A69-39467

Solar atmosphere radio emission generation by hydrodynamic shock wave interaction with coronal plasma, treating corona as ideal gas consisting of protons and electrons
22 p4009 A69-39984

Geomagnetically trapped protons and alpha particles, analyzing OGO 4 data
24 p4368 A69-43184

Proton cyclotron echoes on ionograms obtained from topside ionosphere by Alouette 2 satellite
24 p4310 A69-43189

Proton ejection as hydrogen ion clusters by low energy electron bombardment of solid hydrogen
24 p4389 A69-43747

PROTOPLASM

Mitochondrion-endoplasmic reticulum connection in hepatocytes, discussing possible protein molecule transfer
23 p4083 A69-41455

PROTOSTARS

NT T TAURI STARS

Plasmas in galaxies, spiral structures and radio galaxies, discussing quasar line and continuum spectra
02 p0329 A69-12790

Time scale of cooling/heating process compared with gaseous clouds contraction/expansion for one solar mass protostar evolution in transparent stage
04 p0651 A69-14366

Protostars as sources of anomalous OH emission, discussing densities, masses and temperatures of OH condensations
04 p0661 A69-15143

Submillimeter wavelength astronomy noting instruments, prestellar matter, interstellar and intergalactic matter state and composition, IR stars, planetary atmospheres, etc
05 p0821 A69-15843

Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars
11 p1954 A69-24379

Residual interstellar gas from protostar formation detected as high luminosity IR object
13 p2327 A69-27593

Protostars collapse and flare up computations, including radiative and convective energy flow terms in hydrodynamic equations of motion
15 p2680 A69-30206

Preprotostar radio observations suggesting nonthermal radio sources formation with magnetic energy dissipated in particles acceleration
15 p2701 A69-31531

Protosun and solar system angular momentum losses analyzed from equations for convective star rotation change, noting almost total protosun initial momentum loss possibility
18 p3203 A69-35346

Primitive solar nebula physical model considered under angular momentum conservation in collapsing fragment
19 p3406 A69-36074

Protostar chemical processes responsibility for population inversion and properties in OH and water masers
22 p4018 A69-40267

Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars
24 p4389 A69-43769

PROTOTYPES

Optical design of Wolter type 1 glancing incidence X ray telescope for 6-100 A wavelength region, describing results of laboratory and rocket flight tests of prototype
08 p1318 A69-21087

Electric outside-in attitude gyro display system prototype tested and compared with contemporary inside-out display
[SAE PAPER 690326] 11 p1890 A69-24507

VFW-H3 Sprinter prototype, discussing cost effectiveness, VFW-H2 test vehicle, hovering stability, dynamic takeoff characteristics, vibration level, noise level, reliability and maintenance
[AHS PAPER 303] 17 p2901 A69-33546

PROTOZOA

NT FLAGELLATA

NT MICROSPORES

NT PARAMACIA

NT SPORES

Continuous culture device for controlled growth of *Euglena gracilis*
15 p2555 A69-30445

Colpoda maupasis resistance to Martian atmospheric pressure and oxygen partial pressure noting adaptation, reproduction and existence
20 p3478 A69-37627

PROTUBERANCES

NT PROTON PROTUBERANCES

Orientation dependence of pitting and blistering in proton irradiated Al polycrystal surfaces
04 p0640 A69-14451

Three dimensional effects on Stanton tube data for skin friction determination for small protuberances drag immersed in turbulent boundary layer
16 p2771 A69-31920

PROVING

U THEOREM PROVING

PROXIMITY

Listen-in feature, allowing general aviation aircraft equipment to receive airborne SSR reply signals, provides air to air proximity warning
03 p0464 A69-13247

PSEUDOMONAS

High oxygen tension effect on transport and incorporation of exogenous leucine and protein synthesis in *Pseudomonas saccharophila* cells
03 p0369 A69-13433

Oxygen physiological and biochemical effects on *Pseudomonas saccharophila*, discussing sucrose uptake, lipid synthesis and polysaccharide formation
15 p2556 A69-31045

PSEUDONOISE

Pseudonoise generator producing controllable repetitive random signal patterns used to evaluate instrumentation system
03 p0403 A69-13188

Reference oscillator synchronization inaccuracy influence on SNR at output of correlation receiver during reception of signals with pseudonoise modulation
15 p2563 A69-30141

Hydrodynamic noise as pseudosound field resulting from pressure variations in turbulent fluid flow, using Lighthill acoustic analogy
18 p3123 A69-34921

Phase modulation in pseudo-noise ionospheric communication system for reducing F region CW signal fading
18 p3104 A69-35308

PSEUDORANDOM SEQUENCES

Pseudorandom radar ranger /DIOMEDE/ using optical correlator and phase loop
03 p0393 A69-13254

Primitive trinomials of high degree for use in pseudorandom sequence generation of zeros and ones
03 p0455 A69-13373

Properties and methods of generation of pseudorandom binary signals, developing linear modeling for multivariable systems
04 p0583 A69-15113

Incidental modulation effect on accuracy, signal loss and sensitivity of pseudorandom code systems
06 p0890 A69-17824

Drift elimination in linear system identification using binary m-sequences by crosscorrelating over two periods of output
11 p1834 A69-24547

Sampled data multichannel telemetry using pseudorandom sequences generated by linear shift registers
12 p2028 A69-25925

Pseudorandom uniformly distributed numbers generation from noise-like signals produced by shift register with feedback, noting statistical tests
13 p2218 A69-27248

Pseudorandom FM waveforms for simultaneous range and Doppler shift radar measurements
13 p2221 A69-27944

Quasi-uniform pseudorandom numbers program transmitter statistical characteristics suited for solving problems by Monte Carlo method
15 p2572 A69-30336

Millimeter wave pseudorandom coded CW meteorological radar for precipitation drop size spectrum analysis and cloud studies, discussing overall system design
23 p4115 A69-41531

Pseudorandom code development and possibilities for radar applications, considering signal processing, antenna requirements, radar signal phase modulation, etc
24 p4281 A69-42741

Optical correlation for radar signals phase modulated by pseudorandom codes
24 p4282 A69-42742

Coherent pulsed radars using pseudorandom modulation, explaining pulse position modulation and radar receiving equipment
24 p4282 A69-42743

PSYCHIATRY

U SOCIAL PSYCHIATRY

PSYCHOLOGICAL EFFECTS

NT ILLUSIONS

NT OCULOGRAPHIC ILLUSIONS

Human behavior during stressed underground confinement, discussing adaptation processes
01 p0020 A69-10757

Psychiatric study of master attack carrier aviators inability to fly, considering adult situational reaction diagnosis
03 p0369 A69-12883

Psychological aspects of crew members resistance to eject from aircraft in trouble
06 p0877 A69-16956

Macaque monkeys in weightless state on sounding rocket, noting vigilance level and characteristics
09 p1445 A69-22724

Psychic stress effect on physiological parameters of helicopter pilots during critical flight situations, considering biotelemetry examination of heart and circulatory systems
11 p1829 A69-24347

Noise measurement and scales in studying psychological and nonauditory physiological effects on human functioning
14 p2485 A69-29150

Engineer performance related to organizational factors, discussing colleague contact, work diversity, number of subordinates and involvement in work
15 p2721 A69-31069

Vertical vibrations effect on test subjects in supine position, noting human tolerances and mood changes
19 p3260 A69-35986

Psychology and physiology of vision in relation to large screen display design, discussing effects of symbol size and spacing, color usage, etc
21 p3662 A69-38330

Statistics on airline flight crew members grounding due to psychic disorders
21 p3665 A69-39181

Life in common by groups of four or five people isolated on high mountain under adverse conditions
21 p3661 A69-39267

In-flight illnesses in French Air Force, emphasizing psychological failures in etiology
21 p3666 A69-39270

Flying effects on air hostesses, considering questionnaire data for various psychophysiological factors and flight modes
23 p4086 A69-41688

Psychological, psychophysiological and biochemical effects of prolonged sleep deprivation in human males, noting transient ego disruption
23 p4099 A69-42195

Airline pilots simulated incapacitation involving myocardial infarction or cerebrovascular accident, discussing effect on crew behavior during flight task performance
24 p4277 A69-43386

Psychophysiological effects of fatigue and correlation with somatic parameters following circadian rhythm
24 p4268 A69-43407

PSYCHOLOGICAL FACTORS

Human psychological factors involved in genesis of contingent or conative negative variation using EEG activity measurements
01 p0015 A69-10904

Biological, psychological and technological requirements in astronaut nutrition programs, examining preservation and reconstitution techniques
04 p0554 A69-15388

Physiological or survival training emphasizing psychological approach
06 p0879 A69-16965

Medical factors as probable cause of aircraft accidents, discussing psychological factors, CO poisoning, hypoxia, alcohol, etc
07 p1067 A69-19433

Psychological study of stewardsesses for depressive, neurotic and psychosomatic episodes, discussing psychopathological structures corresponding to etiological sequences
07 p1067 A69-19434

Statistical, economic and psychological aspects of aeronautical and astronautical profitable reliability in relation to operation, using mathematical model
10 p1700 A69-23839

Military flying career choice as neurotic compensation for personality defects, stressing personality screening during interview
12 p2023 A69-26492

Lunar astronauts psychological problems, discussing isolation from outside world, gravitational and extreme light effects, protective space suits, etc
13 p2210 A69-27905

PSYCHOLOGICAL TESTS

NT RORSCHACH TESTS

Head injury clinical and laboratory long term follow-up data, discussing conscious state alterations, focal neurological deficit, EEG abnormalities, etc
01 p0022 A69-11346

Book on groups under stress covering psychological research in SEALAB 2, emphasizing planning of data collection and experimental results
04 p0552 A69-14533

Characteristics of accident experienced pilots based on personality and psychological tests
06 p0876 A69-18033

Flying safety and human factors relationships from job classification survey oriented toward social psychology
06 p0884 A69-18035

Man psychic activity interference resistance, discussing stress effects characterized by theta and delta rhythms
08 p1262 A69-19839

Visual, auditory and reaction-time responses in aging pilots, determining continuing capacity for choice and discrimination with advancing age
14 p2408 A69-29307

Physiologic and psychologic aging in professional pilots analyzed on basis of cardiovascular, pulmonary, exercise tolerance and sense testing
14 p2408 A69-29309

Physiological and psychological measurements of high pressure effects on man and animals, discussing decompression sickness, respiratory embarrassment, inert gas narcosis, helium tremble, etc
21 p3655 A69-38912

Multiple cues in paired comparisons, discussing mathematical model of psychological process in information extraction and combination
21 p3664 A69-38970

Thematic apperception test /TAT/ cards for assessing attitudes in naval recruiting, respiratory responses during ejections and aviation psychology
23 p4112 A69-42365

Pilot selection procedure emphasizing integration of all-around personality picture from different approaches
24 p4278 A69-43395

Physiological and psychological variables relationship in candidate pilots, noting age and educational level
24 p4268 A69-43406

PSYCHOLOGY

NT ACCIDENT PRONENESS
NT MILITARY PSYCHOLOGY
NT PSYCHOPHYSICS

Classical and differential conditioning of eyelid response with correctness of solutions of arithmetic problems as discriminandum
07 p1064 A69-18637

PSYCHOMOTOR PERFORMANCE

Monkey psychomotor reactions during ballistic flight, noting alertness reduction during weightlessness
01 p0017 A69-11082

Soviet book on human movements coordination during space flight covering space walks, lunar surface photographs, space docking, weightlessness, etc
01 p0018 A69-11180

Physiologic and psychomotor changes during various acceleration stresses
01 p0019 A69-11340

Physiological processes occurring in voluntary movements of animals under space flight weightlessness conditions
02 p0199 A69-11827

Dynamic flight simulators fidelity assessment, discussing hybrid method based on pilot psychomotor responses
02 p0203 A69-12215

Manual performance relationship to men exposed to cold, thermal neutral and hot environments, discussing finger dexterity and motor coordination tests
03 p0381 A69-14074

Psychomotor reactions to zero gravity during ballistic rocket flights, analyzing electrical activity of cortex in animals
06 p0874 A69-17649

Mild hypoxia effect on selective attention performance of human subjects at simulated 8000 ft altitude
09 p1445 A69-22553

Psychomotor reaction time and motions, myogenic tonus at rest and precision of monkeys during rocket flights along ballistic curve, noting weightlessness effect
10 p1646 A69-23575

Model for temporal structure of human behavior from analysis of temporal information treatment in subjective synchronization task
12 p2025 A69-27084

Models for cognitive behavior and psychomotor behavior for maintenance tasks
12 p2025 A69-27086

Mental patient performance in detecting and identifying visual signals under fixed interval schedule, noting nonuniform performance and comparing to normal subjects
23 p4091 A69-42014

Circadian rhythm phase relationships between photoperiodism and heart rate, locomotor activity and deep body temperature /DBT/ in unrestrained monkeys
24 p4260 A69-42706

PSYCHOPHYSICS

Psychophysical methods for determining perception threshold of angular acceleration in man during vertical rotation
05 p0708 A69-15969

Group observers magnitude estimation judgements of stationary spacecraft model apparent distance in simulated space, obtaining psychophysical functions for three stimulus ranges
07 p1069 A69-19501

Blood pressure telemetry of pilot during flight including determination of psychophysical relations
15 p2559 A69-31229

Psychophysical method of studying heart rate as indication of physiological fatigue
17 p2911 A69-34013

Brightness discrimination judgments for gray chips by humans, using psychophysical limits method and white, noncoherent red and He-Ne laser light sources
24 p4276 A69-43323

PSYCHOPHYSIOLOGY

External observer effect on human behavior during sensory deprivation tests conducted in isolation chambers as factor in estimating personality
02 p0200 A69-11516

Respiratory disturbances relationship to experience and attitudes toward gas anesthesia and response to different types of face mask
03 p0378 A69-12884

Psychochemical research theory and methodology, relating biochemical phenomena to human brain function
04 p0553 A69-14976

Psychophysiological factors in USAF aircraft mishaps involving ground egress
06 p0878 A69-16959

Biotelemetry of human physiological processes in space for assuring physiopsychological control and immediate intervention for emergencies, discussing application in Mercury and Gemini projects
12 p2023 A69-26491

F-102 pilot anticipatory and flight stress, noting endocrine-metabolic hyperactivity
12 p2023 A69-26552

Astronauts physical training for space flight requirements
13 p2215 A69-28611

Psychophysiological factors in USAF aircraft mishaps involving ground egress
15 p2558 A69-30462

Painted helicopter rotor blades ruled out as cause of flicker induced vertigo, reporting pilots psychophysiological responses to formation flying
17 p2913 A69-33175

Psychopharmacological drug effects on retinal neuron activity in cats measured by microelectrodes, noting spontaneous activity decrease
22 p3879 A69-40846

Psychopharmacological drug effect on visually evoked responses in cats from recordings from visual cortex, noting latencies increase with dose
22 p3879 A69-40847

Psychophysical threshold changes during subliminal monocular and interocular stimulation, studying conditioning flash size effects on temporal summation
22 p3881 A69-40860

Psychological, psychophysiological and biochemical effects of prolonged sleep deprivation in human males, noting transient ego disruption
23 p4099 A69-42195

Psychophysiological effects of fatigue and correlation with somatic parameters following circadian rhythm
24 p4268 A69-43407

PSYCHOSES

U PSYCHOTIC DEPRESSION

PSYCHOTHERAPY

Psychotherapeutic treatment of depressions and neuroses in flight crews, noting face to face method effectiveness
23 p4086 A69-41690

Psychiatric morbidity as absenteeism cause among ground and flight personnel in civil aviation, recommending psychotherapy and chemotherapy
24 p4266 A69-43378

PSYCHOTIC DEPRESSION

Man psychic activity interference resistance, discussing stress effects characterized by theta and delta rhythms
08 p1262 A69-19839

Psychotherapeutic treatment of depressions and neuroses in flight crews, noting face to face method effectiveness
23 p4086 A69-41690

PSYCHROMETERS

Aspiration psychrometric probe for measurements of relative humidity of gas-vapor phase of gas flow containing liquid droplets
06 p0927 A69-17689

PTM [MODULATION]

U PULSE TIME MODULATION

PUBLICATIONS

U DOCUMENTS

PULLEYS

Stress-strain state of shells of multicable elevator pulleys under asymmetric load for various friction coefficients and pulley shell lengths and widths
06 p1026 A69-18016

PULLING

Periodic pulling mechanism for explaining transition to turbulence in bounded plasma with weakly unstable drift modes
07 p1194 A69-19400

PULMONARY CIRCULATION

Control mechanisms of hemodynamic shifts from dogs subjected to acceleration under anesthesia
02 p0198 A69-11503

White rat physiological processes while maintained on hypothermic cardiopulmonary bypass with small membrane type heart-lung machines
05 p0708 A69-15971

High oxygen concentration influence on animal organisms noting respiration, pulmonary gas exchange, hypoxia, brain phosphorylation, immunological indices and morphological structure of rats and mice
05 p0709 A69-16512

Pulmonary capillary gas exchange and venous admixture model and inclusion into respiratory system model, discussing pressure and concentration gradients, pathological effects, etc
07 p1068 A69-19482

High oxygen concentration influence on animal organisms noting respiration, pulmonary gas exchange, hypoxia, brain phosphorylation, immunological indices and morphological structure of rats and mice
18 p3095 A69-34731

Transfer function in pulmonary ventilation and O tension in arterial blood analyzed by automatic control
19 p3260 A69-35897

Pulmonary arterial pressure for perfusion of excised dog lungs after inflation not due to shunt channels through atelectasis areas
21 p3651 A69-38386

Blood sheet flow velocity distribution and pressure gradients in pulmonary alveolar septa determined, allowing for system elasticity
22 p3874 A69-40216

Static pressure-diameter measurements on small pulmonary blood vessels of frogs, analyzing capillary septal area as function of intravascular pressures noting high compliance
22 p3885 A69-40974

Stratified blood flow distribution in lung lobule from analyzing breath-holding changes on expired Ar and nitrous oxide tension plateaus during rest and exercise
23 p4078 A69-41315

Pulmonary emphysema effect on expiratory flow limitation from static pressure-volume and flow volume curves during natural and forced deflation of hamster lungs
23 p4082 A69-41442

Pulmonary capillary blood flow pulse of healthy men in supine position recorded by nitrous oxide/plethysmograph and phonocardiogram
24 p4259 A69-42638

PULMONARY FUNCTIONS

Pulmonary mouth pressure and heart rate in Flack test for flight personnel by simultaneous double recordings
05 p0710 A69-16626

Lung ventilation mechanics affecting respiration in hyperbaric environment during deep diving, stressing biological necessity of equal pressure respiration
13 p2215 A69-28598

Pulmonary oxygen toxicity, analyzing reticulin and elastic tissue damage and hyaline membranes by histochemical techniques
14 p2407 A69-29298

Physiologic and psychologic aging in professional pilots analyzed on basis of cardiovascular, pulmonary, exercise tolerance and sense testing
14 p2408 A69-29309

Pulmonary ventilation and perfusion in normal supine subjects before and during exposure to lower body negative pressure measured using Xe-133
17 p2909 A69-33180

Pulmonary mechanics during zero gravity maneuvers, noting decrease in flow rate and increase in expiration time without decrease in vital capacity
17 p2909 A69-33181

Pulmonary surfactant identification on modified Wilhelmy balances, by measurement of areas corresponding to minimum surface tension, using tracheal lavage from dogs and rats
21 p3651 A69-38387

Hyperoxia and pulmonary surfactant washout in pulmonary compliance measurements of rats subjected to 100 percent diatomic oxygen before asphyxial death
21 p3659 A69-39066

Lower body negative pressure /LBNP/ effects on ventilation and lung volumes, presenting lung model for pulmonary gas exchange changes
22 p3891 A69-40222

Carbon monoxide effect on dog lung volume, mechanical properties and diffusing capacity
22 p3874 A69-40224

Oxygen uptake and circulatory response in human male subjects during maximal treadmill and bicycle exercise
22 p3874 A69-40226

Human lung ventilation-perfusion scatter decreasing gas exchange efficiency during high altitude adaptation
22 p3875 A69-40227

Unilateral hypoventilation effect during bronchospirrometry on human pulmonary blood flow
22 p3875 A69-40229

Alveolar and mixed venous carbon dioxide pressure during absence of gas exchange across mammalian lung
22 p3885 A69-40976

Arterial pressure and heart rate responses to increased intrapulmonary pressure in anesthetized dogs via simulated Valsalva tests
23 p4078 A69-41365

Air and saline P-V curves of rat lungs after hyperoxia, comparing hyperoxia effects to surfactant washout on pulmonary compliance
23 p4081 A69-41440

Carbon dioxide inhalation and intravenous isoproterenol effects on hemorrhagic consolidation occurring after left pulmonary artery ligation in dogs
23 p4082 A69-41441

Pulmonary capillary blood flow, stroke volume and heart rate measured in tilted and supine subjects during respiration, discussing tourniquets and intravenous atropine effects
23 p4082 A69-41445

Pulmonary mechanics during zero gravity maneuvers, noting decrease in flow rate and increase in expiration time without decrease in vital capacity
23 p4089 A69-41825

Forearm skin capacity vessels tonus as function of intrapulmonary pressure during positive and negative pressure breathing
23 p4093 A69-42068

Alveolar and pleural pressures affecting pulmonary interstitial pressure in anesthetized dogs, applying Starling law of transcapillary exchange
24 p4257 A69-42627

Steady state model for human respiratory system analysis, discussing controlled and controlling parts
24 p4276 A69-43272

PULMONARY LESIONS

Feline lung injury produced by vertical sinusoidal vibrations during upright water immersion attributed to chest wall impact
23 p4082 A69-41447

PULSARS

Pulsar discovery at position of suspected supernova remnant, suggesting pulsars as rotating neutron stars formed in stellar explosion
01 p0149 A69-10268

Pulsating magnetic white dwarfs as pulsar models, discussing radio emission mechanisms via shock wave interaction with stellar plasma atmosphere
01 p0149 A69-10269

Relative proper motion of blue star in field of pulsar CP 1919 determined from photographic data analysis
01 p0149 A69-10270

Neutral hydrogen content in directions of pulsars related to distance estimates
01 p0149 A69-10271

Pulsar radiation origin related to electromagnetic wave distortion during propagation through resonant media
01 p0149 A69-10272

Spectral fine structure in emission from pulsars, noting correlation between fading and spectral change
01 p0150 A69-10273

Pulsars features explained by model based on binary system of neutron stars, discussing associated stellar plasmas as directional HF radio wave source
01 p0156 A69-10981

Pulsar CP 1133 high energy gamma ray emission, using atmospheric Cerenkov detection technique for high energy neutral cosmic rays
02 p0307 A69-11823

Pulsar frequency Doppler shift due to general relativistic corrections to optical path of photons in field of sun
02 p0315 A69-11836

Pulsar CP 1133 pulse duration increase with decreasing RF from analysis of pulse shape data
02 p0318 A69-12093

Mass effect on frequency tested during approach of pulsar to sun
02 p0323 A69-12298

Radio telescopic detection of seven new pulsars lying close to galactic plane, noting one pulsar close to supernova remnant
02 p0327 A69-12725

Measurements of pulsars CP 0834, CP 0950, CP 1133 and CP 1919, discussing pulse intensities and shape, submillisecond structure, intensity variations, periods and positions
02 p0328 A69-12726

Solar corona delay effects on pulsar signals due to inhomogeneities in coronal electron density
02 p0328 A69-12727

Pulsar hypothesis based on oscillating white dwarf surrounded by hot rarefied corona to explain radio emission
03 p0505 A69-13077

Pulsar CP 1919 pulse intensity fluctuations intensity with time scales could be strong scintillations
03 p0513 A69-13770

Radio waves Faraday rotation measured from pulsars by recording difference in received power
03 p0513 A69-13771

Gamma ray fluxes from pulsating radio sources, using detection of Cerenkov light generated by energetic particles in atmosphere
03 p0513 A69-13772

Photographic recording to produce spatial analog of temporal Fourier spectrum of astronomical source used for distinguishing weak periodic signal from background signal
04 p0556 A69-14294

Pulsating radio sources near Crab Nebula noting possible coincidence with nebula, pulse dispersion and interstellar electron density
04 p0659 A69-14977

Spinning neutron star model for pulsars based on slowing down of pulse rate, proposing emission mechanism for radio energy and relativistic gas
05 p0825 A69-16351

Increasing periodicities in radio pulses from pulsars
05 p0825 A69-16352

Pulsar pulse period stability, noting slowing down in several sources
05 p0825 A69-16353

Pulsar amplitude variations due to scintillation effects arising from irregular plasma refraction by general interstellar medium between source and solar system
05 p0825 A69-16354

Pulsars, noting clusters associated with spiral arm tangential points, anomalous distribution and possible association with galactic disk or spiral arms
05 p0825 A69-16356

White dwarfs atmospheric pulsation suggested as pulsar mechanism, considering thin adiabatic atmospheric model with constant lapse rate
05 p0828 A69-16659

Frequency structure of pulse energy or pulsar intensity, emphasizing total energy density received per pulse
05 p0828 A69-16660

Pulse intensity variations in pulsars observed at 113 MHz with parabolic antenna using photographic recording techniques, noting lack of periodicities
06 p1009 A69-17964

Radio source CP 1133 at 408 Mc, noting upper and lower limit to continuous emission between pulses
06 p1009 A69-17969

Pulsar distance estimates based on evaluation of galactic H absorption of 21 cm radiation
06 p1012 A69-18225

Pulsar model based on rapidly rotating neutron star with radiating attached plasma, discussing test of radiation mechanism by means of coherence of emission
06 p1012 A69-18226

Pulsating radio source pulse arrival time measurements at 1919 plus 21, determining highest SNR
07 p1214 A69-18665

Pulsar characteristics absence in X ray sources, noting data for Scorpius XR-1
07 p1218 A69-19254

Crab Nebula pulsar NPO527 position measurement with split beam antenna, noting proximity and similar dispersion with NPO532
07 p1221 A69-19405

Linear polarized emission from pulsar CP 0328 dependent on frequency, discussing model for source with constant Faraday rotation
08 p1382 A69-19817

Pulsar emission possible connection with rotating neutron stars, discussing rotational energy transfer to circumstellar plasma and production of periodic shock waves
08 p1383 A69-19895

Very high energy gamma rays from pulsars, considering implications of various gamma ray production processes
08 p1377 A69-19897

Strong light flashes detected from fast pulsar NP 0532 in Crab Nebula, discussing time-averaged optical flux
08 p1394 A69-20622

Strong light flashes from pulsar NP 0532 in Crab Nebula, noting UVB photometric analysis of nebular brightness
08 p1394 A69-20623

Rotating and oscillating magnetic neutron stars causing pulsars radio and optical signals, stressing UV line emissions theory
08 p1394 A69-20624

Orbiter and rotator models of pulsating radio sources, considering relationship between lack of Faraday rotation and similar polarization in decametric radiation from Jupiter
08 p1397 A69-20688

Polarization variations in radio pulses from pulsar CP 0328, noting possible origin in synchrotron radiation from collimated electron beam
08 p1397 A69-20694

Galactic H II regions and projected electron density or dispersion measures of pulsars, noting early stars
08 p1397 A69-20696

Pulsar distance estimates, discussing effect of interstellar electron and H densities and temperature dependence of H density-electron density ratio within disk
08 p1397 A69-20698

Radio emission from magnetic neutron stars as possible model for pulsars, noting optical and IR emission bands
08 p1397 A69-20729

Instability of stellar structures intermediate between white dwarfs and neutron stars shown by stellar models, discussing pulsar signals periodicities
08 p1397 A69-20770

Microwaves from celestial objects noting radio emission from sun, moon and Jupiter, cosmic fireball and pulsars
08 p1407 A69-21125

Photoelectric monitoring broadband photometry and spectral scans of candidate star for pulsating radio source CP 1919
09 p1591 A69-21455

Pulsar NP 0532 identified with Baade south preceding star in Crab Nebula, noting pulsed optical radiation
09 p1592 A69-21458

Vela pulsar polarization and periodicity observations supporting rotational model vs radial pulsations as radio emission source
09 p1592 A69-21461

Crab Nebula pulsar properties including pulse shape, dispersion and strong pulse emission
09 p1592 A69-21462

Pulsars rotating neutron star model analyzed on basis of magnetic dipole rotating in vacuo
09 p1592 A69-21463

Two pulsars discovered during search with transit telescope at U.S. National Radio Astronomy Observatory, tabulating pulsar parameters
09 p1592 A69-21484

Jupiter model /cyclotron/ of pulsar radiation generation

09 p1608 A69-22761

Pulsar NP 0532 optical pulsations period, discussing time rates of change, pulse shape, amplitude, photons, etc

10 p1774 A69-23182

Electromagnetic wave buildup by induced Compton effect as possible radio emission source, considering data for quasars and pulsars

11 p1957 A69-24402

High energy cosmic ray origin and acceleration by LF electromagnetic radiation produced by pulsars, noting maximum energy for protons

11 p1950 A69-24927

Optical flashes recorded from Crab Nebula M1 close to central double star with periodicity equal to radio pulses discovered earlier

11 p1962 A69-25250

Crab Nebula pulsar detection by TV camera with image intensifier at focus of astronomical telescope, detailing instrumentation and observations

11 p1962 A69-25251

Pulsed radio source near Crab Nebula studied to estimate age of longer period pulsars and frequency of pulsar-producing events in galactic history

11 p1963 A69-25252

Pulsars and ancient chinese records of supernova explosions, relating luminous intensities, radio sources and evolution

11 p1963 A69-25253

Pulsar PSR 0833-45 period decrease and rate of change in period increased between 24 February-3 March 1969, discussing contraction explanation

12 p2154 A69-25878

Pulsar distances estimated from neutral hydrogen absorption, using observations from 140 ft telescope

12 p2156 A69-26224

Pulsar NP 0527 near Crab Nebula noting long period

12 p2156 A69-26227

Crab Nebula pulsar observations confirming wavelength independence of light velocity in space

12 p2157 A69-26233

Pulsars discovery, emission, regularity, narrow frequency band and pulse changes, physical nature and aspects of Crab Nebula source

12 p2160 A69-26895

Periodicity decrease on 24 February to 3 March 1969 in decay of Molonglo pulsar PSR 0833-45

12 p2172 A69-27167

Magnetic models of pulsars and rotating neutron stars to explain narrowness of radiation beam in polar diagram

12 p2172 A69-27168

Digital computer methods for weak pulsars search using radio noise picked by telescopes

12 p2172 A69-27169

Light curve shape as function of color, changing period and polarization angle of Crab Nebula optical pulsar

12 p2172 A69-27170

Vela pulsar investigated for optical pulsations, noting negative result for expected brightness

12 p2173 A69-27173

Galactic magnetic field along Orion arm from dispersion and rotation measures of linearly polarized radiation from pulsar psr 0833-45

13 p2335 A69-27311

Crab Nebula pulsar NP 0532 photoelectric spectrophotometry results, noting main pulse and interpulse spectral energy distributions similar to extended synchrotron radiation

13 p2335 A69-27317

Optical radiation detection from pulsar PSR 0833-45 associated with supernova remnant in Vela, noting UV excess from plates using U and B filters

13 p2337 A69-27516

Pulsars and neutron star formation based on stellar evolution theory, suggesting massive O stars as origin

13 p2337 A69-27517

Pulsars suggested as magnetic rotating neutron stars with unstable oscillations

13 p2352 A69-27912

X ray pulsations in Crab Nebula at frequency closely matching radio and optical pulsations, noting energy distribution

13 p2354 A69-28465

Vela pulsar PSR 0833-45 optical observations and Crab pulsar NP 0532 linear and circular polarization measurements by telescope- photomultiplier

13 p2354 A69-28470

Pulsar hypothesis based on oscillating white dwarf surrounded by hot rarefied corona to explain radio emission

14 p2515 A69-28759

Pulsars dynamic spectra, suggesting inadequacy of interstellar scintillation models to explain observed dependence of decorrelation band widths on frequency

14 p2517 A69-29087

Pulsar dispersion-removing technique, discussing pulsar mean flux density decrease with age

14 p2517 A69-29091

Pulsar model used to explain stellar shape oscillations as cause of radio emission periodic variations

14 p2522 A69-29675

Periodic stellar radiation at 3.5 mm from pulsar CP1919 measured by paraboloid antenna and radiometer

14 p2529 A69-29978

Pulsar NP 0532 period measurements at various frequencies, obtaining accuracy in timing data reduction by linking pulse arrivals over interval of months

15 p2680 A69-30232

Crab Nebula pulsar NP 0532 simultaneous optical and radio observations, noting influence of interstellar dispersion value uncertainty

15 p2680 A69-30233

Pulsar clock mechanisms on basis of relativistic gravitational effects, considering white dwarfs and neutron stars

15 p2694 A69-30855

Interstellar hydromagnetic waves due to streaming cosmic rays indicated by pulsar scintillations studies

15 p2676 A69-30889

Pulsar NP 0532 in Crab Nebula observed by rocket and telescope showing strong pulsed X ray signal

15 p2679 A69-31529

Pulsars properties, nature and utilization for interstellar medium study including radiation mechanisms, white dwarf stars and neutron star development

16 p2855 A69-31762

Nanosecond optical pulses from Crab pulsar NP 0532 detection indicating negative observations

16 p2865 A69-32801

Criticism of Chiu theory on radio emission from pulsars supposing electron radiation

16 p2865 A69-32802

Spin down effects on neutron stars, discussing decrease of period of PSR 0833-45 as result of differential rotation instability

16 p2865 A69-32803

Pulsars Mp 0450, Mp 1642 and Mp 1818 discovery, discussing role of Molonglo radio telescope and pulse amplitude variations in detection

17 p3026 A69-32857

Pulsars distance determined using H II region data covering line of sight stars and Galaxy hydrogen distribution

17 p3026 A69-32858

Pulsar emission and magnetic field in Crab Nebula, discussing magnetic flux amplification, gravitational to magnetic energy conversion and pulsars as pulsed signals

17 p3026 A69-32859

Collection of papers on pulsating stars covering discovery, signal characteristics, optical measurements, theories and applications

17 p3035 A69-33634

Linear polarization in pulsating radio sources observed by galvanometric recordings, using Mark I radio telescope

17 p3036 A69-33635

Emission from pulsating radio sources, discussing pulse amplitude variations and frequency structure for neutron stars and white dwarf

17 p3036 A69-33636

Pulsed radio source CP 1919 detection at 13 cm wavelength with maser receiver and 210 ft antenna

17 p3036 A69-33637

Impulsive radio emission from CP 0950 by Mark I telescope, plotting mean and interpulse profiles

17 p3036 A69-33638

CP 0950 and CP 1133 pulsating stars position, using radio telescope at two frequencies

17 p3036 A69-33639

Pulsed radio sources origin from models, emphasizing pulsating white dwarfs

17 p3037 A69-33640

Relativistic effect detection on pulsar frequencies by general relativity theory, assuming pulsars are orbiting objects

17 p3037 A69-33645

General relativity theory test using earth orbital motion and solar gravitational field effects on pulsars frequency stability

17 p3037 A69-33646

Pulsars properties and distribution in galactic coordinates, deriving interstellar medium properties and physical nature of objects based on neutron star rotation

17 p3040 A69-33800

Pulsed hard X radiation from NP 0532, discussing slow down rate and luminous intensity

18 p3186 A69-34316

NP 0532 slow down rate, using quadratic least squares method

18 p3191 A69-34317

IR and optical measurement of Crab pulsar NP 0532, analyzing energy density per pulse and smoothness of visual data

18 p3191 A69-34318

Faraday rotation in NP 0527 and CP 0328, measuring angular velocity and mean longitudinal magnetic fields

18 p3192 A69-34319

Pulsar search techniques, sources searched and discovery of NP 0527 and 0532

18 p3192 A69-34320

Light curve of pulsar NP 0532 represented with oblique rotator hypothesis, assuming concentrated emission at opposite spots on star

18 p3192 A69-34321

Pulsars observed for average energies at centimeter wavelengths, using azimuth elevation antenna

18 p3196 A69-34644

Models for pulsars periodicity and period range due to nonradial gravity wave in almost adiabatic matter of degenerate neutron stars

18 p3196 A69-34645

Pulsar PSR 0833-45 period decrease resulting from mass addition leading to radius and inertia moment decreases

18 p3196 A69-34646

Oblique rotator model for pulsars, discussing difficulties arising from two asymmetrically spaced pulses during each stellar rotation

18 p3196 A69-34647

Night sky Cerenkov light detectors observations of pulsars CP 1133, NP 0532 and NP 0527, noting instrumental limitation in detecting ultrashort light pulses

18 p3200 A69-34994

Low energy cosmic ray density in Galaxy due to pulsar PSR 0833-45 caused by mass ejection

18 p3187 A69-34995

Pulsars theoretical period distributions derived, considering period change of period dependence

18 p3201 A69-35203

Pulsars measured parameter data tabulation including right ascension, declination pulse repetition period, showing sources distribution and clusters

18 p3202 A69-35211

Pulsar PSR 0833-45 polarization structure frequency dependence measurement leading to model implying radiation emanated from magnetic poles neighborhood

18 p3202 A69-35215

Pulsars, pulse shape and duration, object size and spatial distribution, distinguishing between pulsars and supernovae

18 p3202 A69-35283

Pulsars pulse profiles data collected and interpreted with attempt to infer origin

20 p3597 A69-37335

Pulsar distance determined by electron content in line of sight to pulsar compared with neutral H amount integrated through galaxy in pulsar direction

20 p3597 A69-37409

Gamma ray flux from processes associated with high energy electrons from pulsar NP 0532, noting light polarization

20 p3588 A69-37410

Plasma acceleration away from rotating magnetized astrophysical objects analyzed and applied to pulsar NP 0532 for magnetic moment and mass loss rate calculations

20 p3598 A69-37419

Pulsars cosmic ray mass and charge spectra analyzed for evidence of neutron star origin

20 p3588 A69-37487

Radiation emission mechanism for NP 0532 associated with Crab Nebula, discussing shock- neutral sheet interaction

20 p3604 A69-37572

Radial pulsations of neutron star losing mass, interpreting Crab Nebula pulsar observed period and secular increase of period

20 p3604 A69-37573

Pulsed X ray emission associated with pulsar NP 0532 in Crab Nebula measured by six element detector on Aerobee 150 rocket

20 p3590 A69-37574

Optical flashes from PSR 0833-45 searched using 74 inch Radcliffe telescope with pulse counting photometers

20 p3604 A69-37575

Pulsar search signal processing and digital techniques, using fast folding /cross correlation/ or fast Fourier transform /FFT/ algorithms

20 p3605 A69-37824

Crab Nebula pulsar NP 0532 linear and circular optical polarization measurements

21 p3798 A69-38542

Rotating neutron star model to fit pulsar data, considering star crust formation and properties, angular velocity changes and starquake effects

21 p3798 A69-38544

Optical observations of pulsar NP 0532, comparing light curves in IR and UV, noting polarization

21 p3799 A69-38645

Spectroscopic observations of optical pulsar NP 0532, using technique permitting phase resolution of spectra of main pulse and interpulse

21 p3799 A69-38646

Spectra, fading and pulse structure of pulsars noting electron density, polarization, second periodic pulsation, etc

21 p3802 A69-38826

Rotating neutron stars with magnetic fields symmetric about rotation axis considered for pulsar model

22 p4027 A69-40657

Quasar features compared to pulsars, noting complete analogy except for energy output scale

22 p4029 A69-40762

Pulsar magnetic models, coherent radio emission mechanisms, radiation polarization, data summary and astrophysical nature

22 p4030 A69-40905

Pulsar CP 0328 radiation mechanism, considering relativistic effects of rapid rotation

22 p4035 A69-41206

Optical detection of pulsars with emphasis on CP 1919, discussing optical variation

23 p4218 A69-42325

Pulsars models and radiation mechanism, noting neutron stars with rotating magnetospheres

23 p4218 A69-42326

Pulsars dispersion measure and distance relationship, particularly for Crab Nebula pulsars

23 p4220 A69-42381

Neutron star formation, discussing influence of supernova explosions and need of pulsar study

23 p4222 A69-42393

Crab Nebula pulsars radio properties, possible neutron star origin, interstellar gas and magnetic fields, etc

24 p4375 A69-42556

Mean and variance of Faraday rotation and pulsar signal dispersion in galactic turbulent structure, applying to statistically homogeneous disk model of Galaxy

24 p4375 A69-42659

Pulsar model with seat as rotating neutron star having dipolar magnetic field not parallel to rotation axis

24 p4377 A69-42666

Pulsars relation with supernovae remains and radiation patterns and fluxes analysis, ascribing radio emission to relativistic plasma

24 p4383 A69-42985

Rotating neutron stars, pulsars and cosmic X ray sources, accounting for large and small diameter sources by rotating neutron star losing mass in magnetic field

24 p4369 A69-43222

Pulsars radio intensity fluctuations noting possible periodic pulse amplitude modulation

24 p4389 A69-43744

Pulsars turn off time compared to Galaxy age, discussing physical theory and pulsar models

24 p4389 A69-43745

Electromagnetic wave buildup by induced Compton effect as possible radio emission source, considering data for quasars and pulsars

24 p4391 A69-43792

PULSATING FLOW

U UNSTEADY FLOW

PULSE AMPLITUDE

Monolithic sense amplifier for laminated-ferrite memories including provision for strobing, detecting, pulse forming and internal inversion logic using thermal feedback control

01 p0039 A69-10174

Graphical method for determining rise time of planar transistors with constant collector space-charge capacitance

01 p0049 A69-11362

Pulsar CP 1919 pulse intensity fluctuations intensity with time scales could be strong scintillations

03 p0513 A69-13770

Pulse amplitude measurements comparison by sampling signal at given time and pulse peak detection, considering SNR

05 p0722 A69-16730

Transistorized multichannel pulse height analyzer and recording system for balloon-borne cosmic ray payloads, discussing performance capacity

06 p0924 A69-17284

High power microwave interactions in pulsed electron beam plasma klystron

07 p1095 A69-18433

Multichannel pulse height analyzer with memory, small size and low power consumption for application to satellites

07 p1135 A69-19200

Giant pulse production of Nd-glass laser with aid of coherent pumping by second harmonic of Q switched laser, noting pulse duration

07 p1156 A69-19333

Frequency conversion in microwave crystal mixer with EMF amplitude fluctuations in heterodyne

09 p1469 A69-22644

Noise rejection in linear amplitude detector during weak harmonic signal reception improved by limiting threshold voltage

09 p1460 A69-22645

Pulsar NP 0532 optical pulsations period, discussing time rates of change, pulse shape, amplitude, photons, etc

10 p1774 A69-23182

SNR variation with PCM using quantization distortion equations applied to coding-decoding facilities not exactly matched with respect to amplitude

10 p1656 A69-23692

Pulsed tunable lasers, emphasizing dye lasers for visible and near visible light in specialized spectroscopy

11 p1893 A69-24343

Amplitude spectra of periodic pulse sequences or pseudonoise sequences calculated using weighting and shape functions

12 p2030 A69-26389

Ferrites dynamic characteristics in alternating magnetization pulse with variable amplitude indicating linearity loss in strong fields

13 p2320 A69-27994

High latitude ionization spikes observed by POGO spacecraft, noting frequency correlation with magnetic disturbances and development by high energy electron injections

14 p2511 A69-28950

Plasma energy and energy replacement time dependent on discharge pulse shape and magnitude

14 p2499 A69-29848

Charge flow injection into MOS substrate attributed to gate pulses, correlating charge magnitude with pulse frequency

15 p2573 A69-30033

Q switched ruby laser giant pulses during pumping by another Q switched laser exhibit simple shape and low duration

15 p2634 A69-30727

Waveform amplitude variation of phase modulation pulses affected by band limitation

15 p2569 A69-30803

Peak amplitude selector for electrophysiological phenomena analysis, describing memory schemes, threshold crossing detectors and display, input and output circuits, timing, etc

15 p2612 A69-31266

Pulse height distributions, gain and counting rate characteristics of two magnetic strip multipliers and two channel multipliers in 1.5 to 44 A region of soft solar X-rays

17 p2972 A69-33082

Emission from pulsating radio sources, discussing pulse amplitude variations and frequency structure for neutron stars and white dwarf

17 p3036 A69-33636

Observed and computed radio pulse profiles of white dwarfs, noting resemblance of emissivity variation with latitude to magnetic field distribution on sun

17 p3037 A69-33644

Modified pulse height analyzer /PHA/ for sample amplitude height occurrence frequency measurements obtaining amplitude probability distribution /APD/ and three moments of atmospheric noise

18 p3102 A69-34960

Pulse height distribution changes of gas filled proportional counters ascribed to deposit accumulation on anode, using X ray fluorescence analysis

20 p3538 A69-37302

Phase and amplitude stability measurements in airborne pulse Doppler radar

20 p3492 A69-37711

PULSE AMPLITUDE MODULATION

Continuous random process spectral density at PAM system output

01 p0050 A69-10211

Transversal filters for equalization of data channels with pulse amplitude modulation, discussing pulse equalizability and convergence criteria for iterative search routine

01 p0027 A69-10251

Optimum demodulation of PAM-FM signal for case of minimum mean square error as performance criterion

03 p0392 A69-13250

Weighted pulse trains for clutter suppression during radar target detection

04 p0562 A69-15467

Continuous random process spectral density at PAM system output

14 p2424 A69-28748

Spectral characteristics of pulsed signal with determinate repetition period and amplitude and duration modulation by correlated random processes

15 p2567 A69-30347

Pulsars radio intensity fluctuations noting possible periodic pulse amplitude modulation

24 p4389 A69-43744

PULSE CODE MODULATION

NT DELTA MODULATION

Pulse code modulation /PCM/ time multiplex system companding by switching, discussing SNR measurement

01 p0031 A69-10739

Monochrome pictorial encoding, discussing pulse code modulation, delta modulation and buffer storage techniques

02 p0213 A69-12154

Mean error rates in microwave PCM systems with wave distortion due to multipath propagation

02 p0208 A69-12307

Optical correlator for fast acquisition of pseudorandom ranging codes, giving code delay estimation to synchronize local code generator of delay-lock loop

03 p0389 A69-13186

Optical receivers for deep space optical communications link assuming PCM scheme

03 p0389 A69-13194

Digital data processing equipment for space flight PCM telemetry

03 p0393 A69-13290

Radiation sensor PCM data processing by computer to detect radiation level using data decorrelation, data normalization and threshold test

03 p0400 A69-13313

Upper and lower bounds on mean reduced error of pulse code telemetry systems operating by binary code

03 p0396 A69-13687

Data handling equipment for Ariel 3 and future satellites emphasizing manufacturing of PFM and PCM systems

05 p0726 A69-16769

Error probability vs SNR and power spectrum of PCM/PM signal with small phase deviation, noting applications in satellite tracking

06 p0889 A69-17656

Time division multiple access satellite communication system employing pulse code modulation of voice channels and phase shift keying of RF carrier

07 p1077 A69-18759

Maximum likelihood bit synchronizer for baseband PCM signals in Gaussian noise, stressing system noise performance analysis and measurements

07 p1105 A69-19093

Block coding systems performance in digital PCM data transmission through N-ary discrete channels in white Gaussian noise presence, discussing SNR upper bounds

07 p1080 A69-19096

Bit probability of PCM/FM for receiver with IF bandwidth equal to or greater than data rate, limiter-discriminator detection and postdetection filter

07 p1082 A69-19106

Error probability for discriminator detection of wideband PCM/FM, considering IF bandwidth/bit duration product and low pass filtering effect

08 p1271 A69-19864

Delta modulation for analog to PCM encoding due to tapped binary shift register and up-down counter

09 p1455 A69-21844

Optimum timing extraction /bit synchronization/ in pulse code transmission, analyzing probabilistic structure by statistical parameter estimation and deriving system

09 p1455 A69-22115

SNR variation with PCM using quantization distortion equations applied to coding-decoding facilities not exactly matched with respect to amplitude

10 p1656 A69-23692

Atmospheric interference effects on optical PCM signal, analyzing absorption, beam bending, scintillation and correlation with visibility and weather

11 p1888 A69-25308

Ultrahigh speed microwave diode switch used as transmitter-modulator in PCM systems, utilizing varactor diode avalanche breakdown

13 p2229 A69-27671

PCM oscillator synchronization system stability, considering sampled model by digital nature of equipment

15 p2565 A69-30171

Demand assigned frequency division multiple access-PCM system designed by COMSAT for satellite communication

16 p2749 A69-31602

Regenerative amplifier to counteract cable damping due to narrow bandwidth in PCM systems

16 p2755 A69-31860

PCM data handling system for NASA Space Tracking and Data Acquisition Network with explanation for output capabilities, noting BIOSAT project

19 p3270 A69-36242

Nonlinear filter theory application to PCM bit synchronization, relating bit error rates to SNR and timing jitter

19 p3270 A69-36245

High bit rate signal conditioning, bit and group synchronization of NRZ PCM, considering gain and power bandwidth limitations and delays

19 p3271 A69-36247

PCM bit synchronizer models, discussing phase errors gate and differentiating devices

19 p3271 A69-36249

Digital data transmission by pulse code modulation considered for minimum mean square error

19 p3274 A69-36282

M-ary detection for optical communication investigated for maximum likelihood detection of one of M Poisson processes in background noise

19 p3276 A69-36486

Demultiplexing of high speed multichannel optical pulse code transmission systems, based on coincidence detection using locally generated reference pulses

19 p3279 A69-36764

Split phase PCM code modulated carrier transmission characteristics determined for amplitude, phase and frequency shift keying, assuming random bit pattern and noncoherent modulation

21 p3676 A69-39451

Multiple access techniques of SSB-PM and PCM-PM frequency translation for satellite communication system, comparing performance characteristics

21 p3678 A69-39807

PCM role in FDM-FM short haul low density cable communications systems used in exchange area and tactical military systems

22 p3900 A69-40678

TDMA/PCM system for communication tests via Applications Technology Satellites, discussing time synchronization and bit and frame coherency

23 p4129 A69-42510

Effective color TV transmission via satellite using PCM/PSK modulation, noting dependence on available equipment, bandwidth, desired error rate and SNR

23 p4130 A69-42520

PCM satellite communication systems signal power and frequency bandwidth requirements, noting PCM-psk superiority over FDM-FM

24 p4283 A69-43200

PULSE COMMUNICATION

Transversal filters for equalization of data channels with pulse amplitude modulation, discussing pulse equalizability and convergence criteria for iterative search routine

01 p0027 A69-10251

Power advantage of optimum system achieved with suboptimum feedback function for sequential binary detection system

02 p0225 A69-11996

VLF system simulation for evaluating digital communications systems operating in presence of additive atmospheric noise

03 p0390 A69-13205

Linear processing effect on digital communications systems performance by channel impulse response and

input-output relationship as distributional convolution equation

03 p0391 A69-13226

Digital detection of angle modulated signals including zero crossing detectors, digital phase locked loops, differentiation and arcsine demodulator

03 p0391 A69-13230

Atmospheric noise amplitude distribution relation to rms phase errors in frequency components of VLF timing pulse

03 p0396 A69-13629

Spectrum analysis of pulse signals by point to point measurements of magnitude and phase of pulse-like time functions, using narrow band filter output

03 p0399 A69-13939

Resonant amplifier response having stages identical to radio pulse with exponential envelope

05 p0720 A69-16444

Detection characteristics of coherent pulse packet with random initial phase on Gaussian noise background of unknown intensity

06 p0887 A69-17463

Gunn effect pulse devices with resistive loading, discussing logic, circuits and low power consumption

07 p1097 A69-18453

Secondary maxima observed in pulses with binary phase shift keying for cases of large Doppler shifts

07 p1086 A69-19488

Bandwidth restriction effect on performance of linear codes for digital communication with space vehicles, noting bit and word error probabilities

08 p1276 A69-20597

Sensitivity of microwave earth stations for analog and digital communications

09 p1453 A69-21409

Optimum timing extraction /bit synchronization/ in pulse code transmission, analyzing probabilistic structure by statistical parameter estimation and deriving system

09 p1455 A69-22115

Sunde model of troposcatter channel as transmission medium in computer simulation of adaptive digital communication scheme for selective fading channels

09 p1458 A69-22471

Probability analysis of distortions caused by pulse noise action on digital information

09 p1476 A69-22678

Pulsed RF spectra analyzer displays, noting responses to CW and pulsed signals and Fourier and pulsed repetition rate lines

09 p1460 A69-22791

Tandem interleaved cyclic codes for digital HF communication with improved error rate at reduced decay time

10 p1655 A69-23530

Statistical characteristics of photocurrent pulse amplitudes during cathode exposure to gas laser outputs

11 p1834 A69-24611

Digital logic techniques for high speed satellite communications, noting general purpose logic cards

12 p2040 A69-26465

Delay time of pulse signals in radio channel transmission described by standard deviation of channel properties

13 p2218 A69-27215

Signal to noise ratio requirements for sharp cut-off biphasic digital communication channel

13 p2221 A69-27959

Gallium arsenide injection laser for communication systems with pulse frequency modulation, noting power output dependence on crystal quality

14 p2459 A69-29349

Bayesian theory to determine maximum a posteriori estimation algorithms for optimum bit synchronization in digital communication systems

14 p2413 A69-29496

Algorithm for optimal digital processing of pulse signals during multilevel quantization in Markov noise, including error analysis

15 p2571 A69-30126

Noise sensitivity of FM discriminator/limiter in digital binary communication system with FM/PCM-FM/

15 p2564 A69-30145

Resonant amplifier response having stages identical to radio pulse with exponential envelope

16 p2753 A69-32476

Unidigit and multidigit communications systems performance and transmission characteristics, emphasizing SNR improvements

17 p2918 A69-33066

Electrooptical/photomultiplier/ detection of satellite beacon flashes, establishing time of flash and measuring pulse shape and energy received

17 p2919 A69-33083

Information storage of multichannel analyzer of continuous and pulsed processes

17 p2939 A69-33900

Optimum signal design to maximize SNR for pulse communications systems with signal energy detection, considering frequency, transmission and filtering characteristics and signal duration

18 p3104 A69-35484

Nonlinear filter theory applied to digital telemetry binary processes, using continuous time stochastic process

19 p3274 A69-36281

Tropospheric influence on pulse signal propagation, measuring pulse function of propagation path, hypothesizing signal reflection from tropospheric boundary layers

19 p3279 A69-36879

Detection characteristics of coherent pulse packet with random initial phase on Gaussian noise background of unknown intensity

20 p3496 A69-37946

Tradeoff between Doppler measurement capability and subcarrier demodulation in coherent digital communication system quantitatively presented for various SNR

23 p4122 A69-41771

PULSE COMPRESSION

Pulses generated by mode locked Nd glass laser, analyzing compression by gratings

01 p0091 A69-10817

Time compression system with ultrasonic diffraction cell allows coherent light optical spectrum analyzer to function at audiofrequencies

01 p0035 A69-11283

Dispersive two port components for application to microwave pulse compression, coupling YIG crystal magnetoelectric spin wave mode to acoustic transducer

02 p0217 A69-12149

Fourier synthesis procedure optimized to design of large time bandwidth product dispersive filters employing nondispersive tapped delay lines

03 p0403 A69-13217

Passive linear FM pulse compression radar systems detection capability compared with matched filter performance

03 p0390 A69-13218

Pulse compression by optical correlation techniques, discussing laser beam control by diffraction grating in ultrasonic delay line

03 p0397 A69-13732

Line filter compression and positioning of bipolar video pulse trains for conjunctive use with moving target indicator in echo elimination

04 p0558 A69-15071

Band inversion passive generation in pulse compression radar, noting influence on signal modulation laws

04 p0558 A69-15074

Single two dimensional coherent matched filter optical processor for simultaneous synthetic radar antenna beam sharpening and pulse compression

04 p0562 A69-15475

Sequences with small correlation functions as error correcting codes in word separation, synchronization and pulse compression systems

06 p0948 A69-17868

Pulse compression radar employing same dispersive line for signal generation and reception

08 p1271 A69-19918

Mode locked He-Ne laser pulses compression by multiple reflections from interferometer after application of linear electro-optic frequency sweep

09 p1516 A69-21745

Singular shock waves formation during pulsed forward motion of conducting piston in MHD medium

09 p1551 A69-22034

Optical pulse compression experiment illustrating performance of electro-optical Doppler shifter as linearly time varying frequency shift production device

09 p1519 A69-22445

Laser pulse picosecond substructure measurements, using pulse compression and second harmonic generation techniques

10 p1703 A69-23514

Output pulse duration calculation for compressing filter in presence of pulse or continuous FM noise, using parallelogram of arguments method

11 p1844 A69-24445

Chirp radar signal compression by proton spin echo phenomena, noting compression ratio and SNR

11 p1834 A69-24566

Elliptical polarization in ultrabandwidth YIG pulse compression networks, using reflections at rod faces
13 p2230 A69-27680

Adapter between dielectrically loaded waveguides with different cut-off frequencies and sizes for pulse compression systems
14 p2423 A69-29760

Compression capabilities of combined frequency and phase shift keying in radar and sonar pulse modulation using binary noise codes
15 p2568 A69-30628

Pulse compression using Hermitian functions, noting minimal rms error requirement in real system
16 p2755 A69-32585

Attainable signal compression coefficient in recirculator and relation to recirculator ring parameters, noting feedback coefficient stability
17 p2931 A69-33907

Acoustic surface waves on thin film for pulse compression radar dispersive delay line, describing delay characteristic synthesis and control
19 p3267 A69-35929

Sensitivity improvement for inertialess microwave signal scanning and readout by applying pulse compression concepts, discussing application to real time microwave imaging and holography
20 p3545 A69-37901

Optimum wideband signal for minimum Doppler distortion, describing pulse compression by linear-period modulation
21 p3671 A69-38406

Very short pulses effect on aircraft echoes, noting echoing area reduction as resolution cell diminishes
21 p3672 A69-38755

Radio FM pulse compression for vertical ionosphere sounding
21 p3674 A69-39082

Optical ultrashort pulse compression with paired diffraction gratings in terms of phase shift frequency dependence and Fresnel diffraction analogy
23 p4171 A69-41392

Active weighted pulse compression radar receiver output waveform analysis for amplitude, phase and frequency modulation, noting effects of spectrum weighting mismatch parameter
23 p4132 A69-42548

PULSE DIFFRACTION
Solid target output pulse magnitude and direction dependence on angle of incidence of intense laser beam
06 p0935 A69-17686

Wave trains of incident pulse diffraction in thin composite rod determined by transmission and reflection coefficients of plane waves at plane interfaces
21 p3845 A69-39677

PULSE DOPPLER RADAR
NT MONOPULSE RADAR
Pulse Doppler radar operation, discussing Doppler shift, range resolution and systems components
10 p1659 A69-24084

Horizontal wind pulsations in precipitations obtained from pulsed Doppler radar data, including degree of turbulent flow anisotropy
16 p2807 A69-32271

Nanosecond pulse coherent Doppler radar for monostatic measurements of turbulent wakes in shock tunnels and ballistic ranges
19 p3293 A69-35743

Holographic system to process signals received by pulse Doppler radar, noting real time operation with availability of instantaneous development image storage media
19 p3314 A69-36598

Phase and amplitude stability measurements in airborne pulse Doppler radar
20 p3492 A69-37711

Doppler radar based on triple pulse transmission at coherent frequencies, comparing echo pulses for targets cancellation and extraction
21 p3672 A69-38436

PULSE DURATION
Ultrashort light pulses in lasers with nonlinear absorber, evaluating random intensity peak probability created by intensity fluctuations and axial modes buildup
01 p0090 A69-10791

Pulses generated by mode locked Nd glass laser, analyzing compression by gratings
01 p0091 A69-10817

Step recovery switching silicon transistor combining planar and mesa technologies, discussing charge storage and fall times
02 p0215 A69-11937

Pulsar CP 1133 pulse duration increase with decreasing RF from analysis of pulse shape data
02 p0318 A69-12093

Laser pulse parameters generated in stationary locked mode regime with resonance modulation of losses
02 p0258 A69-12641

Oscilloscope display of sample of subnanosecond light pulse, using optical analog of electronic sampling oscilloscope
02 p0259 A69-12656

Pulsar CP 1919 pulse intensity fluctuations intensity with time scales could be strong scintillations
03 p0513 A69-13770

High voltage controlled amplitude rectangular pulse generators having nanosecond buildup time
04 p0597 A69-14849

Tunnel diode univibrator, noting polarization influence on recovery time and pulse length stabilization dependence on resistive load
04 p0578 A69-15069

Line filter compression and positioning of bipolar video pulse trains for conjunctive use with moving target indicator in echo elimination
04 p0558 A69-15071

Nonstationary nonlinear wave phenomena in ultrashort high intensity light pulse formation, discussing nonstationary stimulated Raman scattering and picosecond pump reduction of Raman amplification [IEEE PAPER H-5]
05 p0774 A69-16316

Generation and amplification of ultrashort optical pulses [IEEE PAPER H-12]
05 p0774 A69-16317

Upper limit of nonradiative relaxation time between specific states of absorption bands and fluorescence state emitting R lines in ruby laser
05 p0777 A69-16335

Light pulse duration and other parameters for ruby and Nd-glass lasers operating in synchronized mode regime determined by Armstrong method
06 p0934 A69-17549

Ultrashort light pulse generation and measurement of half width, using saturable dye to mode lock Nd-glass laser
06 p0935 A69-17769

Space and immersion suits physiological evaluation by pulse duration multiplexing telemetry, using commercial FM receiver
06 p0883 A69-17845

Picosecond laser pulses application to nonlinear optics, atomic and molecular systems transient response, optically generated plasmas, spectroscopy, high speed photography, etc
07 p1148 A69-18856

Pulse broadening in MHD copper vapor laser
07 p1149 A69-18904

Optical excitation process of energy states by light pulses of short duration compared to relaxation time, predicting Raman echoes [IEEE PAPER H-3]
07 p1152 A69-19062

Spontaneous and stimulated Raman emission in liquids, obtaining picosecond pulse duration and laser light linewidth [IEEE PAPER H-6]
07 p1152 A69-19063

Laser induced gas breakdown by focusing nanosecond pulses in air and deuterium [IEEE PAPER U-3]
07 p1155 A69-19085

Wide range current-to-frequency converter with pulse frequency linear to input current
07 p1107 A69-19170

Quantum paramagnetic amplifier saturating power dependence on input pulses length and frequency determined by kinetic equations solution
08 p1325 A69-20436

Picosecond light pulse generation by solid state laser interpreted by fluctuating intensity spikes arising from random emission interference in out-of-phase modes
08 p1326 A69-20548

Gas servo design utilizing floating flapper disk switching valves and pulse-length modulated pressure waves to actuate on-off switch [AGARDOGRAPH-118]
08 p1257 A69-20950

Proportional counter pulse shapes calculation for point and extended ionization tracks, considering electron drift velocity and positive ion mobility
09 p1493 A69-21419

Far IR laser pulse shape and duration
09 p1515 A69-21424

Laser triggered spark gap and Pockels cells producing consistently repeatable controlled duration pulses
09 p1515 A69-21427

Common mode rejection technique to determine phasing differences in digital systems by measuring pulse delay
09 p1463 A69-21896

Stability conditions for nonlinear pulse width and pulse time modulation systems, considering pulse element properties and system continuous part frequency characteristic
09 p1476 A69-22672

Ultrashort light pulses nonlinear amplification in medium with finite transverse relaxation time and linear radiation losses
10 p1702 A69-23139

Pulsar NP 0532 optical pulsations period, discussing time rates of change, pulse shape, amplitude, photons, etc
10 p1774 A69-23182

Geomagnetic crochet of July 7, 1966, discussing pulsations, recombination coefficient and electron density of ionospheric D region
10 p1683 A69-23757

Mode locked ruby laser for short duration pulse production, noting relation to reciprocal linewidth
10 p1705 A69-23813

Long and short duration pulses interactions with nonlinear dielectric, calculating frequency variations and spectral transformations
10 p1658 A69-23953

Output pulse duration calculation for compressing filter in presence of pulse or continuous FM noise, using parallelogram of arguments method
11 p1844 A69-24445

Output pulse parameters of short pulse thyristor generator as function of time constant, considering rise time of switch-on process
11 p1846 A69-24615

Electro-optically Q switched Nd doped calcium tungstate laser for producing two controlled pulses, noting application to other solid state lasers
11 p1899 A69-25052

Pulsed radio source near Crab Nebula studied to estimate age of longer period pulsars and frequency of pulsar-producing events in galactic history
11 p1963 A69-25252

Microstructure of pc 3 and pc 4 geomagnetic pulsations, investigating polarization direction, period duration and latitude dependence
12 p2063 A69-25782

Selective stroboscope with explosive bright light source and microsecond pulse duration for short flash period over large area, noting single frame separation method
12 p2086 A69-26162

Framing device capable of producing four pictures within 5 nsec, using Q switch laser for light source
12 p2086 A69-26168

Regulated pulse lasers under free oscillation for photographing distant objects by illumination with shortened light pulses
12 p2089 A69-26190

Pulsed HCN sealed laser long term operation, discussing behavior of 311 and 377 micron emissions
12 p2107 A69-26391

Giant pulses from laser with electro-optical quartz shutter, noting advantageous optical and mechanical properties of quartz
12 p2108 A69-26591

Analytic expressions for predicted widths of AM and FM mode locked pulses in homogeneous lasers
13 p2270 A69-27191

Intense ultrashort pulse widths determination by two photon fluorescence patterns, using model of partial laser mode locking
13 p2270 A69-27198

Ruby and neodymium glass lasers applicability to metal working, investigating factors affecting integral pulse power stability
13 p2273 A69-28431

Physiological effects of intermittent light stimulation during helicopter flight, discussing visual and electric cortical functions at critical frequency threshold of subjective fusion
13 p2211 A69-28595

Optically swept glass slab laser design, discussing pulse length and peak power
14 p2457 A69-28930

Passive Q switch laser single pulse formation time and spectral width using balance equations
14 p2458 A69-29166

Neodymium laser having adjustable pulse duration and homogeneous spatial radiation structure developed by two photon absorption
14 p2460 A69-29670

Electromagnetic noise radiation structure during lightning flash by measuring time duration distribution between pulses

14 p2445 A69-29885

Q switched ruby laser giant pulses during pumping by another Q switched laser exhibit simple shape and low duration

15 p2634 A69-30727

Radial pulsation mode of convective envelopes in adiabatic equilibrium for variable M red supergiant stars

15 p2692 A69-30766

Two photon interaction between ultrashort light pulse and medium, showing pulse propagation through medium without absorption

15 p2634 A69-30966

Atomic coherence and inhomogeneous broadening effects on laser amplifier ultrashort electromagnetic high peak power pulses

15 p2635 A69-31239

Laser flowmeter for pulse flow of highly corrosive rocket fuels and oxidizers with measured rise times less than 10 msec

15 p2616 A69-31292

Pulse duration control by two photon absorption, using GaAs as nonlinear element inserted in neodymium-glass laser cavity

16 p2796 A69-31798

Laser cavity optimization for producing minimum short light pulse width in fast Q switching of optical maser

16 p2796 A69-31802

Vertical incidence pulse dispersion with application to Alouette 1, discussing echo width, sounder system bandwidth and frequency gradient of ionospheric virtual height

16 p2750 A69-31977

Earth ionosphere cavity model for atmospheric waveform shape, considering ELF pulse distortion after propagation through antipode

16 p2750 A69-31978

Horizontal drifts and anisotropy of irregularities in ionospheric F 2 region by pulse fading drift records

17 p2960 A69-33164

Single radio pulse reception time relations by panoramic receiver, considering short wideband and long narrowband pulses

17 p2931 A69-33910

Night sky Cerenkov light detectors observations of pulsars CP 1133, NP 0532 and NP 0527, noting instrumental limitation in detecting ultrashort light pulses

18 p3200 A69-34994

Pulsed ultrasonic flaw detectors resolving power enhancement by shunting semiconductor diodes across piezoelectric elements of scanning heads to shorten scan pulse duration

18 p3137 A69-35112

Semiconductor optical quantum amplifiers in pulse mode operation, describing arrangement for studying performance including pulse duration and current controls

18 p3153 A69-35258

Second harmonic radiation generation in nonlinear dielectric by broadband short pulse optical signals

19 p3278 A69-36693

He-Ne laser subnanosecond intracavity coupler consisting of coaxial krypton pulse generator and electrooptic modulator

19 p3339 A69-36823

Ultrashort light pulses in lasers with nonlinear absorber, evaluating random intensity peak probability created by intensity fluctuations and axial modes buildup

20 p3555 A69-38009

Very short pulses effect on aircraft echoes, noting echoing area reduction as resolution cell diminishes

21 p3672 A69-38755

Coherent light emission by molecules excited by laser pulses having duration comparable to active medium polarization relaxation time

21 p3737 A69-38999

Pulse width increase in mode locked laser caused by phase deviations, noting optical elements with quadratic dispersion of refractive index

21 p3741 A69-39683

Circadian rhythm phase shifts during ontogenesis produced by hormone concentration changes resulting from light variations

22 p3872 A69-40198

Longitudinal modes locking and ultrashort light pulse generation in laser cavity resonator with nonlinear refractive index

23 p4171 A69-41389

Mode locked ruby laser with picosecond pulses using rooftop prism cavity with helical flashtube for pumping

23 p4172 A69-41395

Average total losses of H waves transmitted over waveguide communication lines by nanosecond pulse sequences

23 p4123 A69-41949

Diffusion times for saturated region in Hipernom tubes measured for various exciting magnetic fields and pulse duration

23 p4141 A69-42222

Ultrashort laser light pulses self focusing and determination of focal points coordinates

24 p4328 A69-43068

Auroral short period pulsations in 6300 A O I, discussing percentage modulation, quenching rate, etc

24 p4309 A69-43171

Oscillographic recording of GaAs laser ultrashort radiation pulses, using isolated injection regions and semiconductor photodiode as photoelectric converter

24 p4329 A69-43740

PULSE DURATION MODULATION

Circuit for linear voltage amplitude to pulse width conversion using controlled unijunction monostable multivibrator

02 p0217 A69-12151

Frequency domain stability criterion for pulse width modulated feedback

06 p0904 A69-17942

Operational principles and characteristics of pulse width modulator designed on basis of autooscillator amplifier, giving circuit diagrams

10 p1664 A69-23817

ELDO satellite command decoder performance in presence of noise, evaluating PDM bit decoder bit error probability and false command probability

11 p1834 A69-24563

Spectral characteristics of pulsed signal with determinate repetition period and amplitude and duration modulation by correlated random processes

15 p2567 A69-30347

PDM command coder meeting NASA Tone Digital Command Standard for German central ground station

16 p2755 A69-31859

Missile response-PDM guidance and control system parameters relationship, using phase plane representation

24 p4283 A69-43252

PULSE FREQUENCY MODULATION

Multivariable PFM control system stability analysis using Liapunov function as Hermitian quadratic form

01 p0050 A69-10207

Integral and sigma pulse frequency modulation effects on white noise, analyzing autocorrelation and spectral density functions of PFM system output

01 p0034 A69-11221

Periodic cycles in linear closed loop integral pulse FM systems, discussing existence conditions, periodic formulae and stability criterion

05 p0737 A69-15865

Pulsed control systems stability with frequency pulse modulation analyzed by Liapunov direct method

05 p0740 A69-16670

Data handling equipment for Ariel 3 and future satellites emphasizing manufacturing of PFM and PCM systems

05 p0726 A69-16769

Pulse frequency signal processing continuous and discrete differentiators, analyzing time delay, constant frequency, accuracy and codes

09 p1454 A69-21755

Stability conditions for control systems consisting of linear multivariable stationary neutral plant and multivariable pulse frequency modulator, using Liapunov direct method

12 p2049 A69-26080

Multivariable PFM control system stability analysis using Liapunov function as Hermitian quadratic form

14 p2424 A69-28743

Stable operation of pulsed system with signal modulated pulse frequency described by nonlinear integral equation

14 p2425 A69-28909

Numerical solution of differential equations for two channel PFM with pulse element, applying Dirac pulse sequence to input

14 p2426 A69-29148

Gallium arsenide injection laser for communication systems with pulse frequency modulation, noting power output dependence on crystal quality

14 p2459 A69-29349

PULSE FREQUENCY MODULATION TELEMETRY

Real time pulse frequency modulation telemetry receiving system for direct readout of ionograms from topside sounders, using off-shelf components

20 p3508 A69-37862

PULSE GENERATORS

Optical pulse generator consisting of solid state laser with saturable absorber at cavity end using perturbation theory and Maxwell equations

01 p0089 A69-10179

Carbon dioxide laser pulsed mode for generating giant pulses, noting applications and electron impact role

01 p0090 A69-10781

Active medium high gain during giant pulse generation shown to lead to radiation fluctuations

01 p0091 A69-10792

Probability density function measurement for microwave noise generator

02 p0221 A69-12459

Pulsed subharmonic oscillation in nonlinear regenerative selective circuits with reference to graphical analytical method for explaining behavior

03 p0385 A69-12918

High power pulse generators with four layer p-n-p-n structure, discussing design, principles and applications of semiconductor elements as modulators and switches

03 p0402 A69-12978

Giant pulse generation by Q switched water cooled CW ruby laser in narrow spectral range, discussing laser design and operation principles

03 p0435 A69-12982

High power sinusoidal pulsed current generator using Si controlled rectifiers/thyristors/as switches

03 p0404 A69-13262

Cavity arrangement to obtain pulse durations of 0.5-10 microseconds with ruby laser

03 p0441 A69-14142

Chirp pulse generation by carbon dioxide laser, discussing carrier frequency sweep

04 p0609 A69-14333

High voltage controlled amplitude rectangular pulse generators having nanosecond buildup time

04 p0597 A69-14849

Soviet book on impulse generators in transistors covering multivibrators and pulse generators with timer circuits, crystal controlled frequency and delayed feedback

04 p0578 A69-15053

Nonstationary nonlinear wave phenomena in ultrashort high intensity light pulse formation, discussing nonstationary stimulated Raman scattering and picosecond pump reduction of Raman amplification

05 p0774 A69-16316

Generation and amplification of ultrashort optical pulses

05 p0774 A69-16317

Gunn effect pulse generator for antenna arrays operating at decimeter wavelengths with external power source

06 p0895 A69-17459

Ultrashort light pulse generation and measurement of half width, using saturable dye to mode lock Nd-glass laser

06 p0935 A69-17769

Giant pulse generation by switched laser rapid pumping of neodymium doped glass laser

07 p1146 A69-18486

Picosecond laser pulses application to nonlinear optics, atomic and molecular systems transient response, optically generated plasmas, spectroscopy, high speed photography, etc

07 p1148 A69-18856

Tunnel diode pair unidirectional pulse regenerating circuits

07 p1104 A69-18892

Dynamics of injection lasers, discussing picosecond pulse generation

07 p1153 A69-19071

Pulse generation in Q switched traveling wave laser, noting effect of field amplification

07 p1154 A69-19077

Gunn diode operating to VHF range with coaxial line to generate rectangular waves and to function as memory element

09 p1467 A69-22587

Pulse generator switch consisting of avalanche transistors in series, describing voltage production and transmission, trigger pulse jitter and pulse amplitude

09 p1468 A69-22589

Pulsed J band Gunn effect oscillators performance, noting hybrid domain mode due to high bias fields

09 p1468 A69-22594

Lumped element line generators for high power pulsed sinusoidal oscillations utilizing recurrent triggering system, noting use in plasma physics experiments
10 p1662 A69-23344

Dynamics of external loss modulation and Q switching methods of generating ultrashort pulses in mode locking laser
10 p1703 A69-23624

Avalanche transistor pulse circuits temperature increase due to power dissipation, noting effects of external resistance grounding base and pinch in
11 p1845 A69-24570

Output pulse parameters of short pulse thyristor generator as function of time constant, considering rise time of switch-on process
11 p1846 A69-24615

High power short duration diffraction limited laser pulse generation with optically swept laser glass slab forming amplifier chain
11 p1897 A69-25036

Time-pulse function generator with piecewise parabolic approximation for converting value given by DC voltage or time interval into DC voltage for arbitrary functional relation
12 p2079 A69-25968

Multiframe image converter registration of space-time ruby laser spot structure changes in Q switched regime prior to giant pulse formation
12 p2083 A69-26142

Ultrahigh speed photographic cameras with exposure times between 5 and 500 nsec, using image tube and high voltage pulse generator
12 p2083 A69-26146

Synchronized microwave harmonic energy generation by filtering using DC step source feeding modified pulse forming network
12 p2041 A69-26630

Space-time characteristics of coherent light giant pulse development in laser with instantaneous Q switching, deriving equations to describe linear and nonlinear phases
12 p2110 A69-26909

Small signal quasi-stationary characteristics of pulse transistors including gain and input impedance calculations
13 p2227 A69-27423

Avalanche diodes as high power pulsed microwave sources, noting power yields and efficiencies
14 p2418 A69-28890

Nanosecond pulse generator for powering semiconductor lasers, examining circuit diagram and elements design
15 p2633 A69-30234

AM sinusoidal current pulse generator for semiconductor lasers, describing solid state circuit
15 p2633 A69-30235

Pulse generator to accommodate electronic system testing to shock response spectrum by simulating real world shock environment
15 p2585 A69-30360

RF band multimode parametric pulsed oscillations in distributed system using one dimensional resonators
16 p2758 A69-31796

Monomode giant pulse generation from neodymium glass laser by coherent pumping
16 p2797 A69-32018

Multiple mode phase locking of He-Ne laser with fixed cavity length and laser tube fixed position in cavity, generating high speed optical pulses
17 p2980 A69-32957

Shifted pulse multichannel generator producing pulses and pulse sequences time delayed with respect to reference channel
17 p2938 A69-33899

Diathermy instrument using solid state circuits to provide square wave pulses, discussing operating parameters for bipolar coagulation and advantages over spark gap instruments
18 p3134 A69-34537

Current generator circuit designed for semiconductor laser excitation with pulses modulated by sinusoidal signals at 4.75 MHz
18 p3153 A69-35256

Nanosecond pulse generator circuits based on four layer Si diodes designed for semiconductor laser excitation
18 p3153 A69-35257

Thermoanemometer filament frequency response measured by generator of velocity pulsations compared with conventional methods
19 p3308 A69-35856

He-Ne laser subnanosecond intracavity coupler consisting of coaxial krypton pulse generator and electrooptic modulator
19 p3339 A69-36823

Gunn effect pulse generator for antenna arrays operating at decimeter wavelengths with external power source
20 p3508 A69-37942

Carbon dioxide laser pulsed mode for generating giant pulses, noting applications and electron impact role
20 p3555 A69-38004

Active medium high gain during giant pulse generation shown to lead to radiation fluctuations
20 p3555 A69-38010

PULSE HEATING

Rapid annealing data for silicon transistors after reactor neutron pulse, deriving equation for defect recombination in cluster and subsequent diffusion outside cluster
06 p0975 A69-16870

Metal heating by laser, noting heating rates exponential increase with time due to optical characteristics changes
06 p0932 A69-16915

Combustion of pulse heated single Al and Be particles in various oxidizers
[WSCJ PAPER 69-2]
16 p2830 A69-32343

PULSE MODULATION

NT DELTA MODULATION

Pulse shape influence on electromagnetic compatibility and transmitter efficiency, discussing trapezoidal, raised-sine, sliced and complete error function shapes
01 p0030 A69-10631

Transient signal propagation in lossless isotropic and homogeneous plasma for Gaussian pulse modulated carrier, discussing amplitude change and carrier phase distortion
02 p0290 A69-12351

AM/PM noise conversion in solid state FM microwave signal sources, relating baseband noise power contribution to PM baseband noise power
02 p0212 A69-12462

Optimal control of open loop aperiodically modulated discrete time systems, discussing solution of associated two point boundary problem
02 p0226 A69-12732

Nonlinear operation of pulse control system by means of triple modulation
05 p0736 A69-15764

Error probability vs SNR and power spectrum of PCM/PM signal with small phase deviation, noting applications in satellite tracking
06 p0889 A69-17656

Nonlinear computer analysis of TWT small amplitude compression and small AM to PM conversion, noting coupling and circuit breaker effects
07 p1094 A69-18422

Optimum performance from planar metal ceramic triode oscillators by pulse modulation method selection, considering plate, cathode and grid modulation
09 p1470 A69-22793

Modulated wave holography for detecting and reconstructing ultrasonic beam path, noting applicability to vibrating objects analysis
10 p1694 A69-23368

Optimized receivers synthesized for narrow band radio signal filtration, comparing noise rejection properties of various pulse modulation types during speech transmission
14 p2413 A69-29464

Fast folding algorithm for detection and correlation of digital data with weak noisy pulse trains of differing periods
14 p2416 A69-29548

Compression capabilities of combined frequency and phase shift keying in radar and sonar pulse modulation using binary noise codes
15 p2568 A69-30628

Pulsed control systems sensitivity relationship to discreteness period described via differential equations
17 p2994 A69-33143

Current generator circuit designed for semiconductor laser excitation with pulses modulated by sinusoidal signals at 4.75 MHz
18 p3153 A69-35256

Laser and quasi-laser pulse modulation technique for global satellites telemetry system
19 p3272 A69-36257

Synthetic aperture radar principles, using periodic pulse modulation to construct terrain imaging radar
20 p3489 A69-37635

Analog telemetry signals generalizing frequency and pulse position modulations over coherent channels, noting added degrees of freedom function
20 p3492 A69-37713

Two-pulse limit cycle oscillation stability relation to physical parameters of pulse modulated feedback system used for satellite attitude control
21 p3688 A69-39756

Coherent pulsed radars using pseudorandom modulation, explaining pulse position modulation and radar receiving equipment
24 p4282 A69-42743

Pulse modulated feedback system for satellite attitude control, analyzing relationship between physical parameters to ensure two pulse limit cycle oscillation stability
24 p4295 A69-43318

PULSE RADAR

NT MONOPULSE RADAR

Radar cross section laboratory, discussing experimental techniques, electromagnetic range and pulse, FM/CW and CW radars
03 p0385 A69-12912

Level crossing rate meter correction for boxcar-ed and receiver noise readings in incoherent weather radars
04 p0557 A69-14915

Pulsed radar quantum paramagnetic amplifier protection from driving pulse leakage power by transient processes
05 p0728 A69-15644

Statistical analysis of Radicord/radar digitizing and recording/ clutter and signal spectra and moving target detection by pulse radar
05 p0721 A69-16619

Range-Doppler processing in pulsed radar applied to imaging of rigid rotating body with motion compensating resolution cells
08 p1270 A69-19861

Pulse compression radar employing same dispersive line for signal generation and reception
08 p1271 A69-19918

Digital simulation optimizing parameters of digital equipment to measure target azimuths in pulsed surveillance radar system, establishing optimum echo pulse quantization threshold
15 p2563 A69-30138

Complex pulsed radar signals synthesis with uncertainty function having principal maximum and small secondary maxima for radar stations and wideband communications systems
15 p2563 A69-30140

Residual phase term influence on compressed signal shape, analyzing linearly frequency modulated signal spectrum and sidelobe suppression in pulsed radar
15 p2564 A69-30143

Direction finding accuracy of pulsed radar with binary-quantized detector signals, discussing azimuth minimum variance and quantization threshold optimization
15 p2566 A69-30333

Pulse radar quantum paramagnetic amplifier protection from saturation by transmitter power, using linear electrical bias of EPR line
15 p2579 A69-30956

Pulsed radar quantum paramagnetic amplifier protection from driving pulse leakage power by transient processes
16 p2762 A69-32501

Frequency agility techniques applied to target detection in noncoherent pulsed radar systems
17 p2917 A69-32919

Radar target simulator approximating pulse radar receiver output for evaluating amplitude-sensing video target detection devices
17 p2921 A69-33629

Sampled data system with built-in data processing for observation of fine grain characteristics of pulsed signals used in radar systems
17 p2934 A69-34076

Acoustic surface waves on thin film for pulse compression radar dispersive delay line, describing delay characteristic synthesis and control
19 p3267 A69-35929

Radar astronomy, discussing planetary surfaces study techniques, target/signal interactions, planet cross sections, delay and Doppler spectra
20 p3491 A69-37650

Very short pulses effect on aircraft echoes, noting echoing area reduction as resolution cell diminishes
21 p3672 A69-38755

Active weighted pulse compression radar receiver output waveform analysis for amplitude, phase and frequency modulation, noting effects of spectrum weighting mismatch parameter
23 p4132 A69-42548

Coherent pulsed radars using pseudorandom modulation, explaining pulse position modulation and radar receiving equipment

24 p4282 A69-42743

Optimal allocation of pulses for array radar tracking large number of targets simultaneously, using discrete time maximum algorithm

24 p4283 A69-43311

PULSE RATE

Hot gas flows turbulence linear component intensity and frequency spectrum using optical measurement of pulse velocities

06 p0926 A69-17540

Pulsating radio source pulse arrival time measurements at 1919 plus 21, determining highest SNR

07 p1214 A69-18665

Sequence pulse stuffing technique for rate equalization of digital channels, discussing coding effect and capacity for word signaling

07 p1080 A69-19094

Pulse velocity in self locked He-Ne laser, noting air turbulence effects prevention

09 p1514 A69-21347

Human physiology for exposure to acute hypoxia studied with variation pulsograms and indices of external respiration and pulmonary gas exchange

10 p1647 A69-23592

Ultrawideband DC transistor amplifier for pulsed switching circuits with subnanosecond risetimes, discussing multistages with feedback dipoles, transient response and drift problems

11 p1854 A69-25612

Angle-to-code converter designed on basis of quantum magnetometers frequency sensors, transforming vector sum of bias magnetic fields into pulse repetition rates

12 p2016 A69-25963

Statistical characteristics of stationary stochastic pulse train specified by probability generating function, noting power density

12 p2030 A69-26383

Fourier analysis of ionospheric wave reflection pulses for frequency contents and relative phase angles

14 p2440 A69-29351

Ultrasonic pulse velocity and attenuation measurement in presence of noise, using coherent detection and signal averaging

14 p2449 A69-29564

Pulsar NP 0532 period measurements at various frequencies, obtaining accuracy in timing data reduction by linking pulse arrivals over interval of months

15 p2680 A69-30232

Emission from pulsating radio sources, discussing pulse amplitude variations and frequency structure for neutron stars and white dwarf

17 p3036 A69-33636

Pulsation periods for pure He white dwarfs calculated by Chandrasekhar equation including relativity and rotation effects

17 p3037 A69-33641

NP 0532 slow down rate, using quadratic least squares method

18 p3191 A69-34317

Recording instrument paper speed effect on pulse wave measurements precision, discussing multiple observer studies of left ventricular ejection time

19 p3258 A69-36449

Coriolis acceleration effect on vestibulo-vegetative and vestibulo-somatic reflexes of humans subjected to forward tilting, noting pulse and respiration rates

20 p3472 A69-37259

Coherent radiation short pulses from mode locked laser permitting schlieren photography of plasma growth

21 p3736 A69-38795

Human performance assessed by pulse rate increment at onset of exercise on bicycle ergometer and decrement during recovery after fasting

21 p3655 A69-38910

Output power dependence of repetitively Q switched carbon dioxide laser on repetition time measured with thermopile, noting decrease in mirror system

23 p4173 A69-41566

Pulsatile flow in coronary arteries simplified model compared with experiment in anesthetized dogs

23 p4098 A69-42103

Optical detection of pulsars with emphasis on CP 1919, discussing optical variation

23 p4218 A69-42325

Errors in estimating cardiac function from aortic and peripheral pulses, using cadaver experiments

24 p4262 A69-42728

PULSE RECORDERS

U COUNTERS

PULSE TIME MODULATION

Fluidic pulse time modulated angular position sensor for two axis hydrostatically supported gyroscope

02 p0249 A69-12087

Ultrashort light pulses problems in measurements of time characteristics and instantaneous power of laser radiation

09 p1516 A69-21575

Stability conditions for nonlinear pulse width and pulse time modulation systems, considering pulse element properties and system continuous part frequency characteristic

09 p1476 A69-22672

Time/frequency technology using time-ordered reporting digital data for air traffic control to avoid airborne collision

[AIAA PAPER 69-795]

19 p3367 A69-35635

False signals formation during random pulse noise in single command channels with PTM coding, noting code value and redundancy

19 p3278 A69-36595

PULSED JET ENGINES

Multipulse thruster module design and development tests for spacecraft attitude control, noting micropulse solid propellant rocket motor

02 p0194 A69-11762

Pulsed MPD arc jet electric propulsion system requirements, examining physical constraints, pulse duration, duty cycle, power network structural details, etc

[AIAA PAPER 69-269]

09 p1560 A69-21215

PULSED LASERS

NT Q SWITCHED LASERS

Maximum power efficiency of pulsed injection laser with Fabry-Perot cavity expressed in terms of two dimensionless geometric variables

01 p0089 A69-10119

Laser CRT with beam pumped aluminumized CdS crystals, discussing single spot low duty operation

01 p0039 A69-10175

Optical pulse generator consisting of solid state laser with saturable absorber at cavity end using perturbation theory and Maxwell equations

01 p0089 A69-10179

Exploding wire heating technique using combination of focused laser beam electric field intensity and pulsed power electric current

01 p0090 A69-10666

Carbon dioxide laser pulsed mode for generating giant pulses, noting applications and electron impact role

01 p0090 A69-10787

Active medium high gain during giant pulse generation shown to lead to radiation fluctuations

01 p0091 A69-10792

Pulses generated by mode locked Nd glass laser, analyzing compression by gratings

01 p0091 A69-10817

Pulsed nitrogen laser design involving gas discharge tube fed by low impedance parallel plate transmission line

01 p0091 A69-10842

Deuterium gas ionization over high pressure range under action of short pulse Q switched neodymium glass laser, noting breakdown wave existence

02 p0255 A69-11545

Deuterium plasma evolution and creation modes obtained by short pulse laser discharge in gases, discussing detonation and phase wave ionization mechanisms

02 p0288 A69-12040

Pulsed ruby laser power supply incorporating facilities for variable output, automatic cutoff for fully charged capacitors and automatic/manual triggering

02 p0256 A69-12095

Laser pulse parameters generated in stationary locked mode regime with resonance modulation of losses

02 p0258 A69-12641

Two photon fluorescence technique for display of picosecond laser pulses, discussing mode locking and ruby laser contrast ratios

02 p0259 A69-12654

Mode locking and ultrashort pulses in giant pulses in giant pulse ruby laser with heated nitrobenzene or alpha-chloronaphthalene in resonator

02 p0259 A69-12655

Giant pulse generation by Q switched water cooled CW ruby laser in narrow spectral range, discussing laser design and operation principles

03 p0435 A69-12982

Resonance light pulse propagation in one dimensional medium containing n and m quantum emitters located in Fabry-Perot resonator

03 p0437 A69-13039

Ruby laser light beam self focusing in sodium chloride and potassium bromide crystals

03 p0438 A69-13051

Time dependent photoelectron multiplier with low noise for recording long wave laser light pulses

03 p0440 A69-13264

Light pulse narrowing in laser in linear mode operation with inertialess bleachable filter

03 p0440 A69-13716

Single picosecond mode locked optical pulse selection from train of pulses of Q switched Nd-glass laser using optics external to oscillator cavity

03 p0441 A69-14185

Laser ranging and illumination systems, discussing direction of pulsed monochromatic radiation to illuminate scene and utilization of reflected radiation for imaging

03 p0442 A69-14191

Optical pumping distortion compensation in glass laser rod by changing coolant temperature, obtaining mode locked laser pulses

04 p0609 A69-14286

Power and time characteristics of He-Ne laser pumped by microwave pulses

04 p0610 A69-14423

Relaxation rates of water vapor laser lines obtained with split discharge laser

05 p0771 A69-15810

Generation and amplification of ultrashort optical pulses

[IEEE PAPER H-12]

05 p0774 A69-16317

Self Q switching of ruby lasers at 77 K, noting saturable absorber giant pulse process obtained by shielding part of laser rod from pump

05 p0776 A69-16332

Pulsed water vapor laser with single Brewster window for operation between 20 and 120 microns, comparing performance with ordinary laser

05 p0776 A69-16334

Lunar laser ranging for testing Einstein and Brans-Dicke gravitational theories, discussing pulse transit time and dominant nonNewtonian correction

05 p0825 A69-16362

Pulsed ruby laser threshold and output energy for different relative orientations of rectangular prism and ruby crystal main crystallographic axis

05 p0777 A69-16526

Computer tape controlled pulsed externally excited gas laser mask making machine with micropositioning coordinate table for integrated circuit fabrication

06 p0931 A69-17200

Pulsed laser emission of atomic N in mixture of molecular N and He, noting effects of pressure and frequency and duration of excitation pulses

06 p0933 A69-17258

Gas laser operating on pure O-He-Ne-Ar mixture at liquid N temperatures, noting atomic O transitions, pulsed operation and energy level populations

06 p0933 A69-17259

Mode locked Nd glass laser to pump organic dye laser, obtaining continuously tunable picosecond pulses

06 p0935 A69-17759

Ultrashort light pulse generation and measurement of half width, using saturable dye to mode lock Nd-glass laser

06 p0935 A69-17769

Plasma ionization enhancement by laser line radiation matched to specific atomic transitions

[AIAA PAPER 69-47]

06 p0972 A69-18186

Emission of Nd giant pulse laser with high repetition rate and peak power to generate second harmonic radiation in lithium niobate single crystals

07 p1144 A69-18469

Giant pulse generation by switched laser rapid pumping of neodymium doped glass laser

07 p1146 A69-18486

Tandem amplifier system of glass and selenium-oxichloride liquid lasers, discussing input power/output pulse relation and population inversion density measurement

07 p1147 A69-18487

Pulse synchronism of solid state lasers Q switched by same rotating prism, discussing pulse shifting to obtain radiation in filaments

07 p1147 A69-18488

Picosecond laser pulses application to nonlinear optics, atomic and molecular systems transient response, optically generated plasmas, spectroscopy, high speed photography, etc

07 p1148 A69-18856

Pulse broadening in MHD copper vapor laser

07 p1149 A69-18904

Pulses from Q switched carbon dioxide laser for studying Q switching techniques
[IEEE PAPER G-2] 07 p1150 A69-19054

Time resolved spectrum of high current pulsed argon laser discharge, noting primary laser output and afterglow
[IEEE PAPER L-12] 07 p1152 A69-19068

Circulating liquid laser system using neodymium in selenium oxychloride, discussing cooling advantages and components
[IEEE PAPER M-70] 07 p1153 A69-19069

Laser induced gas breakdown by focusing nanosecond pulses in air and deuterium
[IEEE PAPER U-3] 07 p1155 A69-19085

Giant pulse production of Nd-glass laser with aid of coherent pumping by second harmonic of Q switched laser, noting pulse duration 07 p1156 A69-19333

Nonlinear amplification of powerful light pulses in Nd glass 08 p1323 A69-19946

Ultrashort optical pulses of coherent light, discussing propagation in inhomogeneously broadened medium of two level systems 08 p1324 A69-20083

Small signal pulsed gas laser amplification limits, discussing time dependency, temperature effects, relaxation rates and energy transfer 08 p1324 A69-20098

Reflection holograms with single mode pulsed ruby laser 08 p1313 A69-20164

Carbon dioxide laser with two gas absorption cells in cavity for emission wavelength control and HF pulsed mode of operation 08 p1327 A69-21088

Mode locking via nonlinear polarizations in multimode solid state lasers 09 p1514 A69-21344

Pulse velocity in self locked He-Ne laser, noting air turbulence effects prevention 09 p1514 A69-21347

Electro-optical shutter for Nd-glass laser with high peak power pulses, discussing switching time, contrast ratio and synchronization 09 p1493 A69-21422

Far IR laser pulse shape and duration 09 p1515 A69-21424

Laser triggered spark gap and Pockels cells producing consistently repeatable controlled duration pulses 09 p1515 A69-21427

Ultrashort light pulses problems in measurements of time characteristics and instantaneous power of laser radiation 09 p1516 A69-21575

Mode locked He-Ne laser pulses compression by multiple reflections from interferometer after application of linear electro-optic frequency sweep 09 p1516 A69-21745

Laser oscillations, discussing oscillation frequency, oscillation time, noise and spectrum width, pumping and lasing materials, line broadening and giant pulse generation 09 p1517 A69-22119

Pulsed laser radar and applications to upper atmosphere observation equipment and distance measuring devices 09 p1456 A69-22132

Pulsed ruby laser of small output for hole drilling, studying correlation of vaporization, hole diameter and depth with laser output 09 p1504 A69-22247

Heat transfer effect on population inversion time variation in pulsed carbon dioxide laser and molecules excitation rates dependence on gas mixture composition 09 p1519 A69-22289

Temperature effect on pulsed laser action on electron transitions in diatomic molecules for rotational relaxation, discussing excitation mechanisms 09 p1520 A69-22654

Alkali halide single crystals disintegration by laser radiation differs as function of crystal physicochemical properties and band structure 10 p1745 A69-23322

Noble gas additives for triggering stability of pulsed argon ion lasers, discussing repetition rate and power loss 10 p1702 A69-23341

Pulsed and CW lasers glass crystals temperature fields determination, including tangential and axial thermal stresses 10 p1702 A69-23428

Laser pulse picosecond substructure measurements, using pulse compression and second harmonic generation techniques 10 p1703 A69-23514

Dynamics of external loss modulation and Q switching methods of generating ultrashort pulses in mode locking laser 10 p1703 A69-23624

Resonator interferometry of pulsed submillimeter wave lasers, analyzing mode structure, pulse shapes and molecular mechanism of laser emission 10 p1705 A69-23810

Sulfur dioxide-helium laser pulsed and CW submillimeter outputs 10 p1706 A69-24005

Pulsed tunable lasers, emphasizing dye lasers for visible and near visible light in specialized spectroscopy 11 p1893 A69-24343

Pulsed molecular nitrogen laser positive UV and IR systems interaction under varying gas pressure, applied voltage and tube diameters 11 p1893 A69-24346

Monograph on laser stroboscopy in megahertz range covering spark photography comparison, concept of modes, resonators, applications, etc 11 p1893 A69-24368

Pulsed solid state Nd doped calcium tungstate fundamental longitudinal modes selection by insertion of Fabry-Perot interferometers, lenses and diaphragms into resonator 11 p1894 A69-24471

Ruby laser unsteady modes with ruby filter, discussing conditions for pulsed, monopulse and steady mode transitions, with formulas for steady emission 11 p1894 A69-24619

Giant pulse buildup time in Nd-glass laser with passive shutter determined by comparing Q factor and peak power ratios of different modes 11 p1894 A69-24621

Pulsed laser holography advantages for recording small objects in motion and holographic interferometry advantages for complex surfaces and time-separated events 11 p1883 A69-24682

Pulsed laser holography for recording interferograms of laser created plasma, discussing laser source properties, spatial and spectral coherence, double pulse mode, etc 11 p1895 A69-24683

Coherent pulse laser holography for front and back lighted holograms of moving objects 11 p1895 A69-24686

Holographic reconstruction of spatial distribution of laser light field within and outside resonator, noting suitability for pulsed laser analysis 11 p1885 A69-24919

Airborne pulsed laser system for altimetry, determining height by measurement of transit time for pulse traveling to ground and back 11 p1885 A69-25035

High power short duration diffraction limited laser pulse generation with optically swept laser glass slab forming amplifier chain 11 p1897 A69-25036

Far IR CW gas laser design for maximum output, discussing pulsed operation, wavelength measurement and radiation detection 11 p1898 A69-25051

Pulsed laser emission from carbon dioxide collisionally pumped by vibrationally excited DF produced by reacting fluorine oxide with deuterium 12 p2104 A69-25986

Second harmonic conversion of giant pulse Nd laser emission related to beam divergence and space-time distribution of radiation, noting energy relationship 12 p2104 A69-26022

Temperature regime of pulsed laser with pump lamp located in cylindrical rod cavity, discussing adiabatic and nonadiabatic pumping 12 p2104 A69-26025

Photoelectric recorder with timebase image converter tube for investigating ultrashort light pulse transient response of laser 12 p2083 A69-26139

Holography with pulsed lasers for high speed recording of amplitude and phase disturbances and rapid transient events, noting reconstruction evaluation problems 12 p2087 A69-26171

Deformation measurement by laser pulse holographic method, discussing laser source choice criteria 12 p2087 A69-26175

Regulated pulse lasers under free oscillation for photographing distant objects by illumination with shortened light pulses 12 p2089 A69-26190

Simultaneous HCN and HOH laser emission in pulsed discharge through mixture containing H, C, N and O 12 p2107 A69-26330

Pulsed HCN sealed laser long term operation, discussing behavior of 311 and 377 micron emissions 12 p2107 A69-26391

Nd-doped glass pulsed laser with selected second harmonic radiation and KDP crystal frequency converter operating T 12Hz and 530 nm 12 p2108 A69-26594

Standing wave theory for steady state performance of Raman laser oscillator extended for time variation of exciting laser pulse 12 p2108 A69-26634

Analytic expressions for predicted widths of AM and FM mode locked pulses in homogeneous lasers 13 p2270 A69-27191

Breakdown in air produced by picosecond mode locked laser pulses showing evidence for self focusing 13 p2270 A69-27196

FM laser pulse formation time characteristics noting modulated resonator losses 13 p2272 A69-28114

Pulsed laser satellite tracking system, noting tracking mount adjustment 13 p2222 A69-28192

Pulsed laser holographic interferometry of density field created by high speed projectile motion in air [AIAA PAPER 69-347] 13 p2263 A69-28282

Trapped aerosols below temperature inversions causing lidar echoes in troposphere layers, discussing simultaneous balloon refractometer, thermometer and ground based lidar soundings 13 p2254 A69-28475

Carbon dioxide laser inversion kinetics, combining pulse pumping with Q switching to observe rise, life and decay times 14 p2457 A69-28926

Optically swept glass slab laser design, discussing pulse length and peak power 14 p2457 A69-28930

Pulsed lasers with pure carbon dioxide and mixture with N and He, discussing inversion mechanism, peak emission power and gas temperature effects in different modes 14 p2458 A69-29162

Passive Q switch laser single pulse formation time and spectral width using balance equations 14 p2458 A69-29166

Fluorite crystal laser activated by divalent samarium, discussing characteristics in pulsed operation mode 14 p2458 A69-29328

Undulation in output waveforms of pulsed water vapor laser observed with In-doped Ge detector 14 p2461 A69-29887

Airborne pulsed lasers for near shore bathymetric measurements, discussing feasibility results 15 p2609 A69-30459

Mechanical testing of high temperature materials subjected to thermal cycling by high power pulsed laser beam 15 p2636 A69-31512

Power supplies for ruby, YAG and glass lasers, emphasizing design equations and component selection 15 p2636 A69-31527

Pulse duration control by two photon absorption, using GaAs as nonlinear element inserted in neodymium-glass laser cavity 16 p2796 A69-31798

Monomode giant pulse generation from neodymium glass laser by coherent pumping 16 p2797 A69-32018

Passive mode locking of pulsed Nd-YAG laser using saturable absorber, noting two photon fluorescence contrast ratio 16 p2797 A69-32019

Repetitively Q switched ruby laser applied to frequency conversion, stimulated Raman scattering and vacuum UV generation 17 p2980 A69-33027

GaAs diode laser pulse train emission during pumping near threshold 17 p2982 A69-33421

Laser action and spontaneous emission at atomic oxygen transition, discussing pulsed emission mode in argon-oxygen laser 17 p2982 A69-33633

Laser pulse development dynamics taking into account phase relations between field and active medium polarization

17 p2983 A69-33695

Liquid rocket combustion investigated by pulsed ruby laser holography at sea level rocket engine test stand, noting laminated glass acrylic window byproduct [AIAA PAPER 69-471]

17 p3075 A69-34200

Electrooptical distance measurement based on laser pulse traveling time and phase measurements to determine satellite range

18 p3103 A69-35199

Semiconductor optical quantum amplifiers in pulse mode operation, describing arrangement for studying performance including pulse duration and current controls

18 p3153 A69-35258

Radiation dynamics of semiconductor GaAs injection laser with pulsed and continuous modes operation of diodes

18 p3154 A69-35495

Time variation of laser flare plasma temperature related to pulse parameters, using soft X radiation from plasma

18 p3154 A69-35496

High power pulsed laser welding system for structural alloys and parts, discussing pulse length, repetition rate, shielding and applicability

19 p3320 A69-35556

Focused Gaussian laser beam expansion due to thermal changes in refractive index of air, noting focused spot area increase with pulse energy

19 p3330 A69-35601

High speed photography using multiply pulsed ruby laser, Pockels cell modulation and smear camera for isochromatic and photoelastic pattern recording

19 p3306 A69-35731

Relation between angular divergence, spectral characteristics and kinetic behavior of laser operating in various pulsed modes

19 p3333 A69-35879

Frequency shift dependence in transition of Rb 87 atoms on pulsed pumping intensity, discussing continuous and pulsed indication and peak determination

19 p3336 A69-36345

Pulse ruby lasers with mercury lamps for pumping noting improved efficiency, power and temperature regime due to reduced IR radiation

19 p3336 A69-36347

Gas laser oscillation mode selection and self synchronization based on separation in two mirror cavity with nonlinear absorption

19 p3336 A69-36350

Pulsed water vapor laser high power operation and strongest component wavelength measurement

19 p3337 A69-36416

Second harmonic radiation generation in nonlinear dielectric by broadband short pulse optical signals

19 p3278 A69-36693

Rotating mirror Q switched carbon dioxide laser for high peak powers, analyzing pulse structure and duration dependence on collision induced relaxations

19 p3338 A69-36694

Flat wire grid calorimeter used as radiation sensor in measuring pulsed ruby laser

19 p3339 A69-36755

Surface cavity profiles created by pulsed laser on Ti, Al, Cu, Pb and Zn, compared with isotherms computed from heat conduction models

20 p3552 A69-36917

A scope laser radar system using Q switched solid state laser pulses, discussing configuration and performance

20 p3487 A69-37283

Holographic image range contouring produced by multifrequency emission from resonant output reflector in pulsed ruby laser cavity

20 p3540 A69-37733

Carbon dioxide laser pulsed mode for generating giant pulses, noting applications and electron impact role

20 p3555 A69-38004

Active medium high gain during giant pulse generation shown to lead to radiation fluctuations

20 p3555 A69-38010

Nitrogen gas breakdown threshold dependence on pressure during picosecond ruby laser pulse, discussing photoionization leading to breakdown in electromagnetic wave field

20 p3555 A69-38067

Primary excitation mechanism in pulsed carbon dioxide lasers found to be electron impact

20 p3556 A69-38122

Solid state traveling medium laser pulsed emission characteristics and nonlinear intensity distribution

21 p3735 A69-38438

Gas molecule collision influence on photon echo intensity produced by two linearly polarized laser pulses incident on sulfur hexafluoride

21 p3774 A69-38589

Giant Q switched laser pulse interaction with C target in background gas showing complex luminous shock structure near target as function of time

21 p3736 A69-38942

Coherent light emission by molecules excited by laser pulses having duration comparable to active medium polarization relaxation time

21 p3737 A69-38999

Mode locked laser output intensity, studying effect of random phase variations on pulses

21 p3741 A69-39684

Power density and time history of pulsed molecular nitrogen laser, discussing dependence on fill pressure and electric circuit parameters

21 p3742 A69-39779

Pulse ruby laser-smear camera ultrahigh speed multiple frame recording system, describing applications to transmitted and scattered light photoelasticity

22 p3944 A69-40076

Time dependent mathematical double acceptor model including heat effects for analyzing Q switching and stimulated emission time delays in pulsed junction lasers

22 p3962 A69-40560

Spiking behavior detection in Q switched light output from GaAs pulsed junction laser, noting width at high pumping levels

22 p3963 A69-40563

Carbon dioxide and carbon dioxide mixture mirror Q switched laser peak power generation, using pulsed excitation

22 p3963 A69-40564

Q switched pulsed discharge carbon dioxide laser, determining peak power dependence on delay between pulse excitation and Q switching

22 p3963 A69-40566

Emission dynamics and fine pulse structure in GaAs injection lasers, determining pulse duration and amplitude dependence on current and resonator length

22 p3963 A69-40603

Photographic study of epoxy resin breakdown kinetics under pulsed laser beams, showing crack area as function of time

22 p3973 A69-40743

Spectrum characteristics of plasma generated by pulses of solid state laser radiation on metals and alloys in regular and quasi-stable regimes of emission

22 p3964 A69-40793

Frequency discrimination in optical harmonic generators, discussing spectral width of wideband laser for supershort pulses and spectral device, using frequency dependence of mode locking direction

22 p3965 A69-40964

Longitudinal modes locking and ultrashort light pulse generation in laser cavity resonator with nonlinear refractive index

23 p4171 A69-41389

Pulsed Hg ion-He laser operation, revealing transition in near IR

23 p4171 A69-41393

Mode locked ruby laser with picosecond pulses using rooftop prism cavity with helical flashtube for pumping

23 p4172 A69-41395

Laser pulse effects on bones of rats, observing metabolic deviations in Ca 45 uptake

23 p4101 A69-41464

Intensity of optical pulses from CW GaAs injection lasers observed with fast sampling techniques

23 p4173 A69-41500

Ultrashort laser light pulses self focusing and determination of focal points coordinates

24 p4328 A69-43068

High power ruby laser pulse generation by diffraction modulator, employing modulated ultrasonic traveling waves at minimum resonator transmission losses

24 p4328 A69-43163

Transitions competition in He-Ne laser pulse operating in single mode with nonuniform gain saturation

24 p4328 A69-43165

PULSED RADIATION

NT ELECTROMAGNETIC PULSES

Spectral fine structure in emission from pulsars, noting correlation between fading and spectral change

01 p0150 A69-10273

Thermoelectric radiometer for transient radiant flux short duration pulse measurement, using thermally induced depolarization of polymer film dielectric [AIAA PAPER 68-403]

02 p0250 A69-12392

Ruby laser modifications for pulse transmission mode operation and cavity dumping, noting peak power output

02 p0257 A69-12410

Additive noise measurement in microwave power amplifiers under continuous wave and pulsed conditions

02 p0221 A69-12454

Short laser radiation pulses spectral characteristics determination with device converting laser emission frequency by nonlinear electro-optical crystals

02 p0257 A69-12560

Ferroelectric strontium barium niobate as sensitive detector of single pulse IR radiation, noting application to Q switched carbon dioxide laser output

02 p0300 A69-12623

Unsteady phenomena during light pulses interaction in media with polarization, considering group delay, dispersion spreading and space-time analogy

02 p0259 A69-12646

Two photon fluorescence technique for display of picosecond laser pulses, discussing mode locking and ruby laser contrast ratios

02 p0259 A69-12654

Mode locking and ultrashort pulses in giant pulses in giant pulse ruby laser with heated nitrobenzene or alpha-chloronaphthalene in resonator

02 p0259 A69-12655

Measurements of pulsars CP 0834, CP 0950, CP 1133 and CP 1919, discussing pulse intensities and shape, submillisecond structure, intensity variations, periods and positions

02 p0328 A69-12726

Pulsed electromagnetic signal reflection from plane boundary of absorbing medium

03 p0397 A69-13711

Single picosecond mode locked optical pulse selection from train of pulses of Q switched Nd-glass laser using optics external to oscillator cavity

03 p0441 A69-14185

Single punch through silicon avalanche diode structure and two distinct modes of oscillation making possible pulsed generation of microwaves

04 p0573 A69-14334

Moment method used to determine pulsed radiation instability propagating in luminescent scattering medium

04 p0610 A69-14425

Pulsating radio sources near Crab Nebula noting possible coincidence with nebula, pulse dispersion and interstellar electron density

04 p0659 A69-14977

High repetition rate pulsed illuminator using electrodeless halogen discharge for rapid light extinction

04 p0599 A69-15021

Extensive air shower radio pulse polarization, using log periodic EW- and NS-arm antennas

04 p0595 A69-15425

Pulse radiation effect on dielectric constant of sintered CdS photoresistors, discussing capacitance dependence on intensity, type and frequency of light

05 p0806 A69-15694

Electrical properties of xenon pulse plasmas with high power dissipation, measuring discharge pressure and radiation distribution as function of voltage drop

05 p0801 A69-15746

Dynamic response of solids induced by charged particle interaction noting laser interferometric measurement of surface stresses

05 p0771 A69-15817

Probability theory and Laplace functions used to determine pulse coincidence probability of two random independent pulse streams in time

05 p0719 A69-16224

Pulsar pulse period stability, noting slowing down in several sources

05 p0825 A69-16353

Nuclear pulsed radiation dosimeter based on strain gage measurement of induced thermal expansion, noting separation of neutron and gamma ray components

06 p0922 A69-16892

Solid target output pulse magnitude and direction dependence on angle of incidence of intense laser beam

06 p0935 A69-17686

Ultrashort light pulse generation and measurement of half width, using saturable dye to mode lock Nd-glass laser

06 p0935 A69-17769

Synchronizing ruby and Nd-glass laser pulses by means of passive bleachable dye solution liquid Q switch
07 p1147 A69-18530

Universal instability theory relevance to pulsating optical auroras and fast quasi-periodic variations of auroral X ray fluxes
07 p1125 A69-18852

Q switched laser quasi-periodic short pulse emission pattern evolution from broadband noise source, using fluctuating dipole model
07 p1149 A69-18897

Dynamics of pulsed microwave breakdown in nonuniform field at waveguide fed mica aperture, noting electric field distribution change due to initial plasma configuration
07 p1107 A69-19448

Hamilton-Jacobi equations of motion for classical electron in presence of traveling pulse of electromagnetic radiation, solving radiation pulse shape orbits
08 p1377 A69-19790

Picosecond light pulse measurement by two photon excitation of photographic film
08 p1313 A69-20165

Picosecond light pulse generation by solid state laser interpreted by fluctuating intensity spikes arising from random emission interference in out-of-phase modes
08 p1326 A69-20548

Polarization variations in radio pulses from pulsar CP 0328, noting possible origin in synchrotron radiation from collimated electron beam
08 p1397 A69-20694

Time dependent behavior of atomic light emitted from pulsed helium afterglow, noting absorption measurements and spectrometric system
08 p1356 A69-20743

Image orthicon tube to detect low intensity pulsed light signals, formulating SNR in terms of resolvable image points
08 p1317 A69-21085

Plasma acceleration by pulsed electromagnetic traveling wave, discussing stable column formation and acceleration loss processes
09 p1544 A69-21301

Pulsar NP 0532 identified with Baade south preceding star in Crab Nebula, noting pulsed optical radiation
09 p1592 A69-21458

Vela pulsar polarization and periodicity observations supporting rotational model vs radial pulsations as radio emission source
09 p1592 A69-21461

Crab Nebula pulsar properties including pulse shape, dispersion and strong pulse emission
09 p1592 A69-21462

Ultrashort light pulses problems in measurements of time characteristics and instantaneous power of laser radiation
09 p1516 A69-21575

Radio emission time variation from radio object associated with Sco X-1
09 p1603 A69-22268

Gravitational waves emitted by relativistic, nonrotating, nonradially pulsating stellar model, discussing polarization and energy and momentum transport
09 p1605 A69-22417

Anomalous mode avalanche diodes for pulse power generation noting output, efficiency, mode of operation, microwave oscillations and IMPATT diodes
09 p1466 A69-22455

Anharmonic pulsations of 15.6 solar mass star in helium burning phase, discussing radiation pressure, third order terms, higher modes and magnitude variation effects
10 p1771 A69-22853

Laser pulse picosecond substructure measurements, using pulse compression and second harmonic generation techniques
10 p1703 A69-23514

Capture of parametrically coupled waves by pulses and beams of pumping radiation in case of different group velocities directions
10 p1705 A69-23956

Probability of ocular damage for illumination by pulsed laser beam transmitted through atmosphere, developing safety nomograph for eye hazard analysis
11 p1830 A69-24843

High power short duration diffraction limited laser pulse generation with optically swept laser glass slab forming amplifier chain
11 p1897 A69-25036

Carbon dioxide laser for production of high peak power pulse, discussing mw peak power design and oscillation problem in high gain amplifiers
11 p1899 A69-25053

Nonadiabatic linear oscillations of stellar atmosphere, discussing wave coupling with stellar pulsation
11 p1961 A69-25104

Optical flashes recorded from Crab Nebula M1 close to central double star with periodicity equal to radio pulses discovered earlier
11 p1962 A69-25250

Auroral zone X ray pulsations during great geomagnetic disturbance and auroral electrojet development to maximum phase, noting atmospheric feedback modulation
12 p2065 A69-26109

Repetitive Q switched laser light source for interferometry, holography and high speed photography
12 p2087 A69-26170

Q switched ruby laser application to high speed shadow photography and holography in study of gas flow around ballistic body
12 p2088 A69-26177

Elastoplastic stress wave generation by penetration of impulsive electromagnetic radiation through thin surface layer of solid
12 p2179 A69-26215

Crab Nebula X ray pulse detection attempt during balloon flight of telescope
12 p2149 A69-26226

Pulsed or continuous radiation generated in laser having active element of neodymium glass fragments
12 p2109 A69-26715

Pulsars discovery, emission, regularity, narrow frequency band and pulse changes, physical nature and aspects of Crab Nebula source
12 p2160 A69-26895

Vela pulsar investigated for optical pulsations, noting negative result for expected brightness
12 p2173 A69-27173

Intense ultrashort pulse widths determined by two photon fluorescence patterns, using model of partial laser mode locking
13 p2270 A69-27198

Nuclear energized pulsational instability of stars based on linear quasi-adiabatic theory, including models with hydrogen burning shells
13 p2340 A69-27576

Hypervelocity impact flash resolved into sub-microsecond continuum radiation pulse succeeded by slow rising long duration light pulse from neutral atomic line emission
13 p2313 A69-28296

Optical signal conversion efficiency and threshold relationships in pulsed rangefinding systems, considering effects of noise obeying Poisson distribution
14 p2412 A69-29324

Short laser pulses reflection from artificial fog and smoke, showing dependence on reflecting medium attenuation coefficient
15 p2562 A69-30077

Short laser radiation pulses spectral characteristics determination with device converting laser emission frequency by nonlinear electro-optical crystals
15 p2633 A69-30257

Solar simulator with pulsed Xe arc tube, describing operating characteristics, spectral emission and simulator-sunlight correlation
15 p2586 A69-30385

Two photon interaction between ultrashort light pulse and medium, showing pulse propagation through medium without absorption
15 p2634 A69-30966

DQ Herculis photometric measurements synchronized with white dwarf component pulsation, discussing equipment, eclipse curve and binary period dependence on time
16 p2862 A69-32373

Nanosecond optical pulses from Crab pulsar NP 0532 detection indicating negative observations
16 p2865 A69-32801

Holographic recording of temporal coherence pattern of wave train from pulsed radiation source, investigating single mode ruby laser
17 p2973 A69-33114

Pulse propagation through antipode, calculating time domain response of fields near axial caustic
18 p3100 A69-34233

Pulsed hard X radiation from NP 0532, discussing slow down rate and luminous intensity
18 p3186 A69-34316

Radiation dynamics of semiconductor GaAs injection laser with pulsed and continuous modes operation of diodes
18 p3154 A69-35495

Second harmonic radiation generation in nonlinear dielectric by broadband short pulse optical signals
19 p3278 A69-36693

Ionosphere absolute phase height measurement methods independent of virtual height, using fixed frequency CW emission and pulsed sounding
20 p3520 A69-37032

Spectra, fading and pulse structure of pulsars noting electron density, polarization, second periodic pulsation, etc
21 p3802 A69-38826

Breakdown mechanism in GaAs, Si and CdSe semiconductors under intense light pulses ascribed to thermal impact
21 p3737 A69-39042

UHF radio pulses from zenith associated with extensive air showers, estimating threshold energy of scintillation trigger system
21 p3792 A69-39613

Radio pulse emission from ionized disk of cosmic ray extensive air showers, noting importance of charge separation in geomagnetic field and selective positron absorption
21 p3792 A69-39614

Device measuring light pressure and pulse energy of laser emission by converting kinetic energy into potential energy of twisted elastic suspension thread
22 p3961 A69-40246

Polymer film breakdown under impact of supersonic plasma beam pulses from capillary discharge chamber, including photomicrographs of cavities and structural defects
22 p3974 A69-41031

Optical ultrashort pulse compression with paired diffraction gratings in terms of phase shift frequency dependence and Fresnel diffraction analogy
23 p4171 A69-41392

Pulsating aurora diurnal variations and dependence on latitude and magnetic activity, photometric observations
24 p4308 A69-43004

PULSEJET ENGINES
Induced flow determination in pulsejet ejector, solving momentum and continuity equations by method of characteristics and mathematical model
[ASME PAPER 68-WA/FE-33]
05 p0812 A69-16106

Thermodynamic cycle analysis of various gas turbines and air breathing propulsion systems noting regenerators, heat exchangers and pulsejet engine
11 p1943 A69-25584

PULSES
NT ELECTRIC PULSES
NT ELECTROMAGNETIC PULSES
NT GEOMAGNETIC MICROPULSATIONS
NT GEOMAGNETIC PULSATIONS
NT MICROPULSATIONS
Cylindrical sound pulse propagation in homogeneous layer under inhomogeneous half space
04 p0630 A69-14531

Cross correlation function for two sequences of pulses arbitrarily distributed in time, noting noise stability of diversity reception systems
04 p0557 A69-14790

Pulsed solutions with fixed, floating and distributed pulses for optimal control of systems with differential equations unbounded and discontinuous on right side
09 p1471 A69-21435

PULVERIZING
U GRINDING [COMMINUTION]
PUMP IMPELLERS
Wear ring seals evaluation program for application to high pressure high speed liquid rocket turbopumps impeller wear rings
[ASME PAPER 68-WA/LUB-1]
05 p0768 A69-16129

Internal aerodynamics of centrifugal compressor impeller, discussing impeller channel airflow model, impeller exit flow, rotating channel flow, etc
[RAES PAPER 19]
22 p3859 A69-40498

PUMP SEALS
Wear ring seals evaluation program for application to high pressure high speed liquid rocket turbopumps impeller wear rings
[ASME PAPER 68-WA/LUB-1]
05 p0768 A69-16129

Spring supported hydrostatic shaft seal with floating members isolated from structure
[ASME PAPER 68-WA/LUB-9]
05 p0768 A69-16132

Flow and pressure fields for spiral grooved pumping seal with specified groove dimensions and Reynolds number
[ASLE FICFS PREPRINT 30]
15 p2619 A69-30481

Leakage in mechanical face seals with hydrodynamic films, noting misaligned seal theories for pumping with cavities and two fluids
[ASLE FICFS PREPRINT 19]

- 15 p2621 A69-30497
Helium gas shaft seal for spacecraft electrically driven LOX pump, noting advantages of floating carbon face seal type
[ASLE FICFS PREPRINT 24]

PUMPING

- 15 p2621 A69-30498
Pumping requirements for nozzle skimmer region of neutral particle nozzle beam source, using two stage mechanical pump
04 p0600 A69-15026
Parametric amplifier gain, deriving expressions for diode pumping power and nonlinear circuit element resistance
11 p1849 A69-24957
Pressure in sealing groove and increase time due to pumping action of moving wall applied to force cycloidal of translational motion, considering liquid in groove laminar
16 p2736 A69-32135
Peristaltic pumping in circular cylindrical tube, discussing viscous fluid flow induced by axisymmetric traveling sinusoidal wave imposed on flexible tube wall
[ASME PAPER 69-APMW-3]
24 p4275 A69-43108

PUMPS

- NT CENTRIFUGAL PUMPS
NT ELECTROMAGNETIC PUMPS
NT FUEL PUMPS
NT ION PUMPS
NT JET PUMPS
NT RAMS [PUMPS]
NT TURBINE PUMPS
NT VACUUM PUMPS
Thermal transpiration for performance prediction and development of gas pump
[ASME PAPER 68-WA/ENER-4]
05 p0706 A69-16162
Compact hydraulic power transfer units in aircraft with common connecting shaft for pump/motor elements, discussing integrated power package
06 p0930 A69-17168
Displacement pumps and fluids for extreme environments, discussing fluid types and operational parameters such as speed, pressure, temperature, power, displacement and size
06 p0931 A69-17188
Montardi circuit with sectioned electrodes to simulate isotropically conducting still liquid for application in MHD pump, discussing potentials distribution
07 p1059 A69-19031
Equilibrium theory of parametric pump using cyclic flow of binary mixture through column with heated and cooled bed of solid absorbent
09 p1481 A69-21910
Pump system to obtain indocyanine green dye-dilution curves without blood loss in small animals and infants
23 p4101 A69-41450
Pneumatic driving system for heart assist or total replacement pumps, discussing design features and performance characteristics
24 p4273 A69-42983

PUNCHES

- Indentation of inhomogeneous rigid plastic solid by flat punch under plane strain conditions analyzed by perturbation method
11 p1986 A69-25244

PUNCTURING
U PIERCING

- PUPA
X irradiation and temperature effects on flour beetle *Tribolium confusum* pupae, noting wing abnormalities and pupal stage duration
17 p2910 A69-33748

PURGING

- Anisotropic porous media model for fluid motion in rectangular fuel cell cavities, analyzing pressure, velocity, stream functions and purge time
23 p4075 A69-42300

PURIFICATION

- Gas chromatography technique for separation and purification of chemical compounds for ionizing radiation detectors
02 p0249 A69-12011
Carbon formation during production of high purity semiconductor Si, using C 14 tagged hydrogen impurities and methylated chlorosilanes contained in silicon tetrachloride
03 p0486 A69-13635
Linear aliphatic polyesters preparation by acid chloride synthesis, acid exchange and ester exchange, stressing products purification
19 p3265 A69-36372

- Protective layer material for high sludge capacity filters for fine purification of liquids used in aircraft hydraulic system
22 p3869 A69-40637

- H plasmoid tail cut-off eliminating plasma impurities during injection across octupole magnetic field from coaxial source
24 p4358 A69-43474

PURIFIERS

U PURIFICATION

PURINES

- NT ADENINES
NT URIC ACID
Protein contained purine free basal and yeast ribonucleic acid diets effect on plasma and urinary uric acid production in male subjects
05 p0708 A69-15968
Purines, pyrimidines and nucleosides absorption by Li-, Na-, Mg- and Ca-montmorillonite in aqueous solutions over range pH 2-12 by cation exchange
05 p0716 A69-15973
Absorption of nucleosides, purine and pyrimidine derivatives by Co-, Cu- and Ni-montmorillonite taking place by cation exchange process
05 p0716 A69-15974
Pyrimidine and purine bases analysis by time of flight mass spectrometry and paper chromatography
11 p1832 A69-24738

PURITY

- Charge materials purity found to increase beta-Ti alloys properties
01 p0094 A69-10216
Impurity transfer in doped and undoped epitaxially grown GaAs films, studying substrate dopants effect on carrier concentration profiles
05 p0807 A69-15957
Design theory of esaki diodes relation to internal parameters of degenerate semiconductors, discussing Fermi level position and maximum state density in purity band
05 p0732 A69-16298
Charge materials purity found to increase beta-Ti alloys properties
15 p2638 A69-30272
Metal purity effect of nickel and Ni-Mo alloy on nucleation and recrystallization nuclei growth following 80 percent plastic deformation
18 p3159 A69-35449

PURSUIT TRACKING

- Minimum fuel rendezvous maneuver for two space vehicles in circular orbit, considering propelled tracking equipment nonlinear equations of motion
05 p0823 A69-16036
Differential pursuit games solved by integrating Bellman equation for value function and determining set of possible positions in game with prescribed duration
05 p0788 A69-16536
Optimum evasion tactics for aircraft pursued by missile, using steepest ascent method for maximization of distance of closest approach
06 p0866 A69-17401
Differential games method solving pursuit problem for pursuer with greater maneuverability than pursued
09 p1476 A69-22671
Target displacement and track coherence in pursuit tracking tasks experiments for human performance studies
11 p1829 A69-24737
Differential approach game for unfavorable pursued motion, examining optimum control laws
13 p2288 A69-27525
Pursuit problem involving controllable pursuing plant, deriving condition for engagement with prescribed period of time
14 p2482 A69-28800
Flight times compared for intercept and pure pursuit missile trajectories
20 p3618 A69-37716
Strapped down phased array radar tracker mechanization with digital loop closure electronics for homing missiles, noting cost advantages
[AIAA PAPER 69-873]
21 p3763 A69-39399
Numerical algorithms for nonlinear optimal pursuit problems
21 p3757 A69-39536
Optimal pursuit control at constant moving velocity and limited angular velocities, using Pontryagin principle
21 p3825 A69-39629
Guidance control systems for moving plants pursuing targets, basing design on target characteristics and plant phase coordinates
21 p3687 A69-39643

- Policies and controller design for pursuing vehicle developed in terms of pursuit-evasion differential games
24 p4341 A69-43295

- Linear-quadratic pursuit-evasion game with dynamics perturbed by additive white Gaussian noise, obtaining linear minimax solutions
24 p4341 A69-43296

PUSH-PULL AMPLIFIERS

- Push-pull pentode frequency multipliers with sinusoidal undistorted outputs, studying grid bias effects on operating characteristics
22 p3912 A69-40260

PUSHING

- HRV-1 navy research pusher amphibian aircraft, discussing hydrofoils and operational problems
10 p1633 A69-23223

PWM [MODULATION]

U PULSE DURATION MODULATION

PYLON MOUNTING

U AIRCRAFT PRODUCTION

PYRAMIDAL BODIES

- Force law determining impact processes of pyramidal and conical body penetration into smooth surface of rigid plastic metals
02 p0337 A69-11615

PYRANOMETERS

- Solar radiation actinometric and pyranometric observations during 20 May 1966 eclipse, examining IR component and spectral radiation energies
15 p2697 A69-31257

PYRAZINES

NT AZINES

- Neat alpha styryl azide transformation into 2-phenylazirine, 3,6-diphenylpyridazine and 2,5-diphenylpyrrole after one month at room temperature in brown glass bottle
10 p1651 A69-23307

PYREX [TRADEMARK]

U BOROSILICATE GLASS

PYRIDINE NUCLEOTIDES

- Pyridine nucleotide-linked D-lactate dehydrogenase stereospecificity in various species of invertebrates
01 p0018 A69-11198
Flavoprotein/cytochrome b/559/ role as branch of Halobacterium electron transport in DPNH oxidase determined by salt dependence of reduced DPNH
20 p3484 A69-37101

PYRIDOXINE

- Macaque monkey behavior after injection of monomethylhydrazine with and without pyridoxine HCl, noting effects of aversively and appetitively rewarded training
03 p0375 A69-14068

PYRIMIDINES

NT MITOCHONDRIA

- Purines, pyrimidines and nucleosides absorption by Li-, Na-, Mg- and Ca-montmorillonite in aqueous solutions over range pH 2-12 by cation exchange
05 p0716 A69-15973
Absorption of nucleosides, purine and pyrimidine derivatives by Co-, Cu- and Ni-montmorillonite taking place by cation exchange process
05 p0716 A69-15974
Pyrimidine and purine bases analysis by time of flight mass spectrometry and paper chromatography
11 p1832 A69-24738

PYROCERAM [TRADEMARK]

- Glass/resin laminates behavior at high temperature
07 p1136 A69-19515

PYROELECTRICITY

- Pyroelectric crystals transparent at laser output wavelength used for recording transmitted radiation, noting response of triglycine sulfate crystal
03 p0438 A69-13050
Ferroelectric transition of barium titanates doped in OH or oxygen vacancies, using pyroelectric method
03 p0491 A69-14059
Pyroelectric thermometry for measurements at low temperatures with emphasis on calorimetry, discussing pyroelectric coefficients, dielectric constants and resistivities
09 p1493 A69-21423
Pyroelectric conductor sensors permitting continuous measuring and recording of air inhaled during chosen time intervals
15 p2559 A69-31230

PYROGRAPHALLOY

- U COMPOSITE MATERIALS
U PYROLYTIC GRAPHITE
U REFRACTORY MATERIALS

PYROLYSIS

Thermal model for interaction of exploding wires with methane atmosphere, discussing energy transfer efficiency in high temperature pyrolyses near explosion
 01 p0119 A69-10674
 Quantitative determination of phenolic content in composite materials by pyrolysis gas chromatography method
 01 p0025 A69-11267
 Nitronium perchlorate thermal decomposition under overpressure of He and O between 80 and 170 degrees noting weight loss processes and crystal phase change
 02 p0303 A69-11897
 Lithium aluminum hydride thermal decomposition using isothermal kinetics and differential thermal and thermogravimetric analyses, noting decomposition in four stages
 02 p0304 A69-11898
 Thermal decomposition of ammonium perchlorate and ammonium perchlorate-copper chromite mixtures
 02 p0304 A69-12312
 Nuclear radiation damage vs thermal decomposition of diaminitrobenzene and hexanitrostilbene, analyzing unchanged residual compound
 02 p0304 A69-12500
 Numerical solution for ambipolar diffusion and kinetic decomposition of rotating body of complex chemical composition in ionized airstream
 02 p0191 A69-12580
 Ammonium perchlorate thermal decomposition, studying point defects role
 03 p0494 A69-12896
 Thermal reaction kinetics of pyrolytic products of proline, leucine, arginine and lysine in aqueous solution
 05 p0716 A69-15627
 Charring phenolic nylon ablator material pyrolysis and surface recession for cyclic and constant combined convective and radiative heating
 [AIAA PAPER 69-151] 06 p1036 A69-18055
 Solid propellant burning rates from condensed phase decomposition kinetics, discussing kinetic rates of thermal decomposition
 [AIAA PAPER 69-145] 06 p1039 A69-18182
 Analog simulation of chemically reacting system applied to thermal decomposition of oxygen difluoride
 [WSCIPAPER 68-49] 07 p1073 A69-18318
 Reaction kinetics package for pyrolysis and combustion of aliphatic hydrocarbon molecule, considering reaction rates definition
 [WSCIPAPER 68-37] 07 p1073 A69-18353
 Ammonium perchlorate decomposition kinetics at high temperatures by measuring loss of weight in samples and gas evolution
 08 p1375 A69-20339
 Monograph on kinetic study of fast gas reactions with shock waves covering thermal decomposition of nitrous oxide, hydrazine tetrafluoride and nitrogen tetrafluoride
 08 p1304 A69-20707
 Mass spectrometric determination of pyrolysis products generated from heated polymer samples
 09 p1448 A69-22314
 SiC part fabrication by chemical vapor deposition through pyrolysis of chlorosilanes from vapor state onto machined substrates of graphite and metals
 09 p1509 A69-22344
 Mineralizing metabolic wastes by catalytic oxidation of pyrolysis products, noting nutritive value of ash solutions for *Chlorella* cultivation
 10 p1649 A69-23579
 Metal layers deposition, structure and properties obtained by H reduction of metal halides in vapor phase
 14 p2462 A69-29209
 Borane carbonyl pyrolysis in low pressure tubular flow reactor measured by mass spectrometry, noting wall collision role in diborane bond dissociation
 14 p2410 A69-29282
 Vacuum thermal decomposition of molybdenum sesquisulfide into metallic Mo, discussing reaction kinetics, mass transfer, diffusivity of sulfur gas, etc
 14 p2467 A69-29287
 Pyrolyzed refractory laminates for high temperature applications, analyzing mechanical and thermal properties
 15 p2618 A69-30313
 Yttrium effect on rate of thermal decomposition of silver carbonate powder and pressed pellets by isothermogravimetric analysis, examining water vapor, Co 60 gamma radiation and temperature effects
 15 p2561 A69-30442
 Dynamic differential thermal analysis of dried plant and animal specimens and related substances yielding discrete decomposition peaks of exothermic type
 15 p2555 A69-31000

Dynamic differential thermal analysis with He flow performed on biological specimens, proteins and starches, showing discrete decomposition peaks monitoring pyrolysis process
 16 p2747 A69-31807

Laminar-turbulent transition in boundary layer on thermally decomposing surface, discussing gasification rate, Reynolds number effects, heat transfer and turbulence onset mechanism
 16 p2878 A69-31951

Linear pyrolysis of thermoplastics during combustion of composite solid propellants and ammonium perchlorate solid propellant deflagration mechanism studied by loose granule analog
 [WSCIPAPER 69-16] 16 p2831 A69-32354

Thermal decomposition behavior of perchlorate oxidizers studied by flash mass thermal analysis for determining propellant combustion kinetics
 [WSCIPAPER 69-19] 16 p2832 A69-32357

Granular ammonium perchlorate thermal decomposition analyzed by cinemicrography, discussing sublimation role
 [WSCIPAPER 69-20] 16 p2832 A69-32358

Radiation effect on inorganic solids isothermal decomposition induction period, deriving equations for conditions representing various kinetics combinations during irradiation
 [WSCIPAPER 69-21] 16 p2832 A69-32359

Ammonium perchlorate pyrolysis by convective surface heating, monitoring IR emission as measure of surface temperature
 [WSCIPAPER 69-23] 16 p2832 A69-32361

Premature exothermic decomposition suppression in propellant grade ammonium perchlorate, using differential thermal analysis
 [AIAA PAPER 69-503] 16 p2833 A69-32688

Ammonium perchlorate linear pyrolysis by convective surface heating, discussing propellant deflagration models
 [AIAA PAPER 69-501] 16 p2835 A69-32758

Ammonium nitrate thermal decomposition activation by dyes and halides, noting endothermic and exothermic reactions, proposing models to study impurities role
 17 p3016 A69-32830

Linear pyrolysis of polymethyl methacrylate to verify Cantrell model and surface temperature determination method
 17 p3017 A69-33132

Total gasification heat measurement during pyrolysis of polymethyl methacrylate and paraformaldehyde discussing method and calorimetric equipment
 17 p3069 A69-33133

Linear pyrolysis of condensed materials in presence of heat loss into ambient medium expressed in terms of thermonutral and thermal reactions
 17 p3069 A69-33134

Low molecular weight fluorocarbons pyrolysis and oxidation in single pulse shock tubes, using vapor phase chromatography and mass spectral analyses
 18 p3099 A69-34467

Pyrolyzed tetraethoxysilane for carburizing steels and Ti alloys at 850-1050 C
 19 p3328 A69-36161

Low pressure ethylene decomposition on high temperature W ribbon surface
 19 p3265 A69-36729

Low pressure ethylene decomposition on high temperature Re ribbon surface
 19 p3266 A69-36730

Thermal decomposition of molybdenum carbonyl, deriving general equations, noting agreement with experimental data
 20 p3558 A69-37015

Negative electric potential effect on deposition rate of Mo from molybdenum carbonyl and on deposit chemical composition during pyrolysis
 20 p3559 A69-37016

Ammonium chlorate thermal decomposition by measuring formed noncondensable gas pressure and weight loss in solid state kinetic investigation
 21 p3669 A69-38800

Proton transfer mechanism of copper chromite catalyzed thermal decomposition of ammonium perchlorate, noting electron transfer
 21 p3783 A69-38810

High temperature pyrolysis of simple organic molecules in shock tube, considering diatomic C formation and decay rate
 23 p4113 A69-41693

PYROLYTIC GRAPHITE

Heat transfer in pyrolytic graphite analyzed by hybrid computer simulation
 02 p0353 A69-12387

Material requirements for uncooled nozzles of solid propellant rocket motors burning aluminized propellants, discussing successful testing of pyrolytic graphite
 06 p0946 A69-17530

Free vibrations of plates and beams of pyrolytic graphite type materials, analyzing transverse shear deformation and rotary inertia
 [AIAA PAPER 69-55] 06 p1027 A69-18070

Pyrolytic carbon felt composite development and properties, measuring and tabulating mechanical, thermal and ablation properties
 09 p1530 A69-22364

Periodicity of magnetothermal oscillations in pressure annealed pyrolytic graphite compared with hole carriers
 14 p2504 A69-29005

Pyrolytic graphite coated composite as nozzle throat material for high energy metallized solid propellant motors
 19 p3357 A69-35539

Nernst effect in pyrolytic graphite at low temperatures including thermal EMF, electrical conductivity, thermal conductivity and magnetoresistance coefficients
 21 p3753 A69-39562

Structural features and electrical resistivity of siliconated pyrolytic graphite, analyzing dependence on preparation conditions using X ray diffraction measurements
 24 p4335 A69-42926

Negative Poisson ratio of isotropic heat shield material pyrolytic graphite, noting thermodynamic validity
 24 p4338 A69-43599

PYROLYTIC MATERIALS

High temperature capacitor consisting of thin wafers of pyrolytic boron nitride noting fabrication, dissipation factor and capacitance
 04 p0551 A69-15299

Stress graphitizing and boron codeposition effect on dynamic mechanical properties of pyrolytic carbon, noting increase in internal friction and dynamic modulus
 10 p1716 A69-23036

Pyrolyzed refractory laminates for high temperature applications, analyzing mechanical and thermal properties
 15 p2618 A69-30313

Pyrolytic zirconium carbide emissivity during initial heating compared with results for specimens prepared by powder metallurgy
 15 p2640 A69-30985

PYROMETERS

NT OPTICAL PYROMETERS
 NT RADIATION PYROMETERS
 NT THERMOCOUPLE PYROMETERS

Pyrometer for turbine rotor blades surface temperature measurement, considering purged, line-of-sight viewing tube and signal processing to reject C particles interference
 [SAE PAPER 690431] 23 p4165 A69-41649

PYROMETRY

U TEMPERATURE MEASUREMENT

PYROTECHNICS

Hand operated visual signaling devices, discussing Mini Signals and cartridge load aerial signals
 06 p0878 A69-16962

Pyrotechnic and explosive elements in space systems - Conference, Tarbes, France, July 1968
 10 p1748 A69-23003

General and classical statistical techniques for cutting effectiveness and operational reliability of cutting fuses
 10 p1749 A69-23004

Space stage separation qualification of ONERA rocket vehicles based on angular perturbation measurements during variable roll speeds
 10 p1669 A69-23005

Electrical devices for detonation initiation in pyrotechnic equipment for space applications, tabulating characteristics
 10 p1749 A69-23006

Shock ignition procedure to keep pyrotechnic composition in optimum condition in space environment, describing test layouts and theory
 10 p1749 A69-23007

Silver and cadmium nitrides, copper chlorotetraazolate and barium and potassium dinitrobenzofuroxannates compared for priming explosive applications
 10 p1750 A69-23011

Igniferous materials for electrical initiation of explosive in extreme conditions, considering nitrophenol salts and pyrotechnics
 10 p1750 A69-23015

Q

Pyrotechnical devices for two stage solid propellant ballistic rocket, discussing self priming electric cells and auxiliary power and gas generators
10 p1752 A69-23024

Pyrotechnic activated calorimeter for reentry package design of vehicles entering earth atmosphere at lunar return velocities
10 p1669 A69-23026

Explosive and pyrotechnical elements for Grillo 1, Grillo 2 and Trigone 1 hot water rockets, detailing nozzle closure and chemical reaction activation
10 p1753 A69-23028

Pyrotechnics applications to Skylark upper atmosphere sounding rocket, discussing payload heads, nose cones, sensor covers, etc
10 p1792 A69-23029

Hollow charge pyrotechnic circuit closer, noting one piece construction, transportability, safety, quick action and reproducible delay
10 p1635 A69-23030

Pyrotechnic circuit closer using jet to achieve conduction between hollow charge lining and coaxial electrode
10 p1635 A69-23031

Rocket motors for ejection of instruments from sounding rocket payloads, considering powder cartridges and solid propellant motor characteristics
10 p1635 A69-23032

Two way pyrotechnic high pressure gas valve for D2 satellite, noting resistance to leakage due to nearly monolithic construction
10 p1635 A69-23033

Nose cone ejecting system with pyrotechnic devices for two stage Centaur rockets /Sud-Aviation/ with RF mass spectrometer
10 p1635 A69-23034

Quasi CW solid state doped lasers excited by pyrotechnic pump sources with potassium perchlorate oxidant and zirconium fuel, noting power to weight ratio
13 p2272 A69-28116

Brute battlefield illumination flare configuration, candle power, burn duration and hot air balloon-type suspension system
20 p3461 A69-37166

Pyrotechnical gas generator performance tests during Europa 1 rocket second and third stage separation, including generator design, ground and flight tests
23 p4224 A69-42153

PYROXENES

NT ENSTATITE

Disordered chondritic pyroxenes, analyzing X ray patterns of meteoritic and synthetic crystals
03 p0516 A69-14083

Mossbauer spectra of Fe minerals in unequilibrated ordinary chondrites, noting ratios of olivine to pyroxene iron
19 p3408 A69-36082

Orthopyroxenes cooling history, studying order-disorder transitions between ferrous iron and magnesium
20 p3523 A69-37518

Meteorite minerals as detectors for studying fossil record of cosmic ray nuclei, emphasizing feldspars and pyroxenes
20 p3590 A69-37568

Primitive low energy Fe-group nuclei irradiation of meteoritic crystals from studies of pyroxene and feldspar from meteorites, discussing astrophysical implications
20 p3590 A69-37569

Jadeite /high pressure sodium aluminum pyroxene/ shock-induced phase assemblage from oligoclase, noting relevance to lunar rock samples investigation
22 p3941 A69-40569

Pyroxene crystallization in meteoritic chondrules, noting normal spherulite crystallization
22 p4033 A69-41065

High temperature single crystal X ray studies of natural Fe-rich orthopyroxene, detecting high-low clinopyroxene inversions
24 p4311 A69-43218

PYROXYLIN

U CELLULOSE NITRATE

PYRRHOTITE

U TROILITE

PYRROLES

NT INDOLES

NT TRYPTOPHAN

Neat alpha styryl azide transformation into 2-phenylazirine, 3,6-diphenylpyridazine and 2,5-diphenylpyrrole after one month at room temperature in brown glass bottle
10 p1651 A69-23307

Q FACTORS

Varactor Q calculation from impedance vs bias measurements, circumventing circuit loss problem by procedure based on Weissfloch equivalent circuit of lossy two port network
04 p0575 A69-14753

Semiconductor laser generation efficiency increased by using external resonator and by signal amplification
05 p0777 A69-16378

High Q magnetically tunable microwave filters using magnetodynamic modes in ferrite spheres
06 p0892 A69-16831

Q factors dependence of IMPATT diode oscillator FM noise, noting excess noise temperature correlation with diode current
06 p0899 A69-17826

Microwave resonator characteristics, deriving expressions for Q for pure or coupled electric or magnetic modes
09 p1464 A69-22096

Varactor diodes for microwave frequency tuning of resonators used for oscillators of avalanche transit time and Gunn diodes, discussing Q factors
11 p1854 A69-25610

Operational Q factor of optimal differential relay system with inertial plant during tracking process, noting cadence pulses high repetition rate influence
12 p2052 A69-26279

Automatic search-free optimization by sensitivity functions, deriving algorithms by Q factor and discrepancy extrapolation
14 p2425 A69-28823

Optical IR yttrium-iron garnet rectifier increasing light intensity and system Q factor at low external magnetic field
17 p2981 A69-33117

Metrological measuring instrument scales selection principles for ensuring constant sensitivity and Q factor
17 p2975 A69-33614

Optimum automatic system for controlling helicopter formation flight, stressing transient response Q factor and transmission ratios
18 p3090 A69-34656

Q factors of ideal antenna enclosed in imaginary sphere with excited TE and TM modes
20 p3506 A69-37836

Design and performance of microwave open resonators with diffraction grating in mirror, describing Q factor calculation
23 p4139 A69-42045

Q SWITCHED LASERS

Target production device for deuterium plasma clouds in vacuum with Q switched neodymium laser
01 p0090 A69-10222

Optical radar for studying atmospheric water vapor, density, temperature and aerosols
01 p0090 A69-10540

Ultrashort light pulses in lasers with nonlinear absorber, evaluating random intensity peak probability created by intensity fluctuations and axial modes buildup
01 p0090 A69-10791

Amplification equations for calculating unsteady lasing in Q switched ruby laser, considering changes in populations and fields along cavity
01 p0092 A69-10888

Q switched laser excitation flash spectroscopic analysis of naphthalene, describing equipment arrangement and experimental results
02 p0254 A69-11544

Energy characteristics of laser with passive Q switch, taking into account internal reflections
02 p0256 A69-11999

Laser with passive Q switching with Faraday cell switch, studying induced recombination and Mandelsham-Brillouin scattering
03 p0435 A69-12983

Efficient conversion of Q switched neodymium-glass laser output into second harmonic obtained for low output levels at fundamental frequency
03 p0437 A69-13046

Q switched lasers powerful outputs obtainable at sum frequency, discussing frequency mixing in nonlinear dispersive media
03 p0438 A69-13047

Q switched neodymium-glass laser output conversion into second optical harmonic by passing beam through double Galilean telescope with adjustable focus
03 p0438 A69-13048

Q switched laser based on light waves parametric interaction in nonlinear medium operating at wavelengths from UV to IR
03 p0439 A69-13054

Q switched ruby laser nonlinear absorption in optically transparent organic liquids attributed to two quantum process with large cross section
03 p0439 A69-13055

Electromechanical retracting pedestal for solid target injection into vacuum system and ionization by focused Q switched laser beam
03 p0439 A69-13105

Solid state laser Q switched by rotating prism emitting giant pulse before two mirrors in parallel
03 p0440 A69-13365

Gallium phosphide luminescence near indirect transition during multiphoton excitation by Q switched ruby and Nd laser beams
03 p0489 A69-13892

High speed shadow photographs of Q switched laser triggered spark gap air discharge, showing sonic waves and development of discharge channel
04 p0610 A69-14349

Q switched Ruby laser metastable state population kinetics and resonator losses, discussing internal energy redistribution with subsequent absorption spectrum changes
04 p0610 A69-14381

Q switches transparency as function of incident light intensity
04 p0610 A69-14385

Pressurized spark gap triggered by focused Q switched laser beam introduced along axis
04 p0612 A69-15204

Output characteristics of slowly Q switched neodymium in calcium tungstate laser
04 p0612 A69-15206

Plasma production by ultrashort pulse Q switched laser beam, discussing avoidance of initiation of breakdown wave
05 p0770 A69-15584

Passive Q switching of solid state lasers based on stimulated Mandelstam-Brillouin light scattering
05 p0770 A69-15699

Phase grating formation in giant pulse laser Q switching liquid by reflecting light beam from Lippman plate at Bragg angle
05 p0771 A69-15811

Radiative flux density, spectrum and temporal behavior of Q switched laser induced underwater sparks
05 p0771 A69-15818

Line broadening possibility for Q switched iodine laser with aid of magnetic effect /Zeeman effect/, noting energy storage capability increase
05 p0773 A69-16288

Tunable Raman upconverter as coherent light generator, using Q switched Nd-YAG laser beam [IEEE PAPER B-2]
05 p0774 A69-16309

Mode locked laser as stroboscopic light source potential by investigating expansion of laser produced plasma by schlieren photography [IEEE PAPER H-1]
05 p0774 A69-16315

Self Q switching of ruby lasers at 77 K, noting saturable absorber giant pulse process obtained by shielding part of laser rod from pump
05 p0776 A69-16332

Radiation of laser active element with random inhomogeneities of refractive index, discussing beam divergence, operation modes and Q switched operation
05 p0777 A69-16550

Carbon dioxide Q switched laser nonlinear amplification characteristics in vibrational-rotational bands
06 p0933 A69-17118

Semiconductors reflectivity enhancement by irradiating with Q switched ruby laser output
06 p0935 A69-17768

Q switching and mode locking of neodymium selenium oxygen chlorine liquid laser, discussing power output and nature of pulses
06 p0935 A69-17776

Dynamics of Q spoiled neodymium laser created plasma expanding in vacuum magnetic field
06 p0970 A69-17952

Q switching of continuously pumped Nd/YAG laser using variable spacing Fabry-Perot interferometer as variable output coupler
06 p0938 A69-18229

Quantum electronics trends, discussing output power, mode control, stability and lifetime of CW and Q switched lasers and parametric interactions in nonlinear optics
07 p1144 A69-18468

Pulse synchronism of solid state lasers Q switched by same rotating prism, discussing pulse shifting to obtain radiation in filaments

07 p1147 A69-18488

Synchronizing ruby and Nd-glass laser pulses by means of passive bleachable dye solution liquid Q switch

07 p1147 A69-18530

Time stabilization method for lasing in electro-optically Q switched ruby laser with saturable absorber in cavity

07 p1147 A69-18531

Fresnel pulse holograms of three dimensional diffuse objects by single mode ruby laser with or without Q switching

07 p1132 A69-18801

Q switched laser quasi-periodic short pulse emission pattern evolution from broadband noise source, using fluctuating dipole model

07 p1149 A69-18897

Pulses from Q switched carbon dioxide laser for studying Q switching techniques [IEEE PAPER G-2]

07 p1150 A69-19054

Pulse generation in Q switched traveling wave laser, noting effect of field amplification [IEEE PAPER Q-5]

07 p1154 A69-19077

Spatially nonuniform laser model allowing for photon density and inversion variations, noting self Q switching mechanisms from stimulated scattering processes [IEEE PAPER Q-6]

07 p1154 A69-19078

Saturable dye filters used with ruby lasers, discussing relaxation time, residual absorption source and transient spectral hole burning

07 p1155 A69-19089

Stable limiting cycles of laser resulting from mutual synchronization of phase shifted oscillation modes

07 p1158 A69-19752

Frequency doubling of laser light with variable Q switched resonator

07 p1158 A69-19753

Q switched single mode ruby laser pulse passage through traveling wave amplifier decreases beam divergence

08 p1326 A69-20542

Formation and characteristics of flash produced in air by single pulse of Q switched ruby laser, using holographic interferograms

08 p1317 A69-21022

Pulsed plasma production when focusing Q switched laser on solid target surface, noting high temperature effects and optical diagnostics methods

09 p1520 A69-22656

Triplet-triplet transitions for Q switching, examining organics for passive Q switches

09 p1520 A69-22682

Q switching combined with pulsed pumping of carbon dioxide laser for observing optimal Q switching instant, noting pulse energy increase

10 p1703 A69-23619

Dynamics of external loss modulation and Q switching methods of generating ultrashort pulses in mode locking laser

10 p1703 A69-23624

Nd glass laser for emission of high radiance diffraction limited pulses, noting long path air breakdown and second harmonic generation

10 p1704 A69-23654

Traveling wave passive Q switched laser with bleachable absorber filter, analyzing unsteady processes without expanding field along natural resonator modes

10 p1705 A69-23949

Holographic motion picture recorded using CW Q switched laser and conventional camera

10 p1697 A69-24002

Q switching techniques for solid state lasers at room temperature for high peak power, discussing mechanical systems, electro-optic and magneto-optic shutters

10 p1706 A69-24018

Q switched carbon dioxide laser power increased by placing bleachable /boron tetrachloride/ filter in resonator

11 p1894 A69-24454

Electro-optically Q switched Nd doped calcium tungstate laser for producing two controlled pulses, noting application to other solid state lasers

11 p1899 A69-25052

Carbon dioxide laser for production of high peak power pulse, discussing mw peak power design and oscillation problem in high gain amplifiers

11 p1899 A69-25053

Gain decrease due to saturation during amplification of pulses from Q switched carbon dioxide laser oscillator, noting rotational sublevels relaxation rate

11 p1899 A69-25055

Q switching of ruby lasers by natural chlorophyll a and derivatives pheophytin a and Cu chlorophyllin Na

11 p1900 A69-25581

Gallium phosphide luminescence near indirect transition during multiphoton excitation by Q switched ruby and Nd laser beams

11 p1939 A69-25693

Transformation of Q switched neodymium laser radiation into Stokes component during stimulated combination scattering in liquid nitrogen

11 p1900 A69-25751

Emission from solutions of organic luminophores excited by harmonics of Q switched neodymium laser

12 p2104 A69-26030

Multiframe image converter registration of space-time ruby laser spot structure changes in Q switched regime prior to giant pulse formation

12 p2083 A69-26142

Ultrahigh speed multiple framing photography system using sequentially modulated ruby laser and smear type camera applied to dynamic photoelasticity

12 p2086 A69-26166

Q switched ruby laser stroboscope for high speed photography, using electro-optical crystals for Q switch

12 p2086 A69-26167

Framing device capable of producing four pictures within 5 nsec, using Q switch laser for light source

12 p2086 A69-26168

Repetitive Q switched laser light source for interferometry, holography and high speed photography

12 p2087 A69-26170

Q switched ruby laser application to high speed shadow photography and holography in study of gas flow around ballistic body

12 p2088 A69-26177

Slow theta pinch helium plasma measurements by Mach-Zender interferometer with Q switched laser

12 p2091 A69-26394

Q switched ruby laser with rotating prism, considering single pulse operation by increasing switching rate

12 p2107 A69-26588

Optical alignment for lasers with electro-optical Q switching and mutually misaligned ruby rod, KDP crystal and polarizing prism

12 p2107 A69-26589

Giant pulses from laser with electro-optical quartz shutter, noting advantageous optical and mechanical properties of quartz

12 p2108 A69-26591

Amplification equations for calculating unsteady lasing in Q switched ruby laser, considering changes in populations and fields along cavity

12 p2109 A69-26652

Space-time characteristics of coherent light giant pulse development in laser with instantaneous Q switching, deriving equations to describe linear and nonlinear phases

12 p2110 A69-26909

Single frequency ruby laser emission spectrum coincidence with interacting laser radiation at instant of Q switching

13 p2272 A69-27911

Passive Q switching of carbon dioxide laser with mixture of sulfur hexafluoride and chlorotrifluoro-ethylene gases within resonator

13 p2274 A69-28659

Q switched ruby laser metastable state population kinetics and resonator losses, discussing internal energy redistribution with subsequent absorption spectrum changes

14 p2456 A69-28754

Q switches transparency as function of incident light intensity

14 p2456 A69-28758

Carbon dioxide laser inversion kinetics, combining pulse pumping with Q switching to observe rise, life and decay times

14 p2457 A69-28926

Submillimeter wave generated in ZnTe by difference frequency mixing of Q switched ruby laser, discussing beat power [IEEE PAPER B-4]

14 p2457 A69-28927

Passive Q switch laser single pulse formation time and spectral width using balance equations

14 p2458 A69-29166

Electro-optical Q switched lasers with prismatic reflectors and phase shifter studied using Johns matrices for polarizer, Kerr cell and Porro prism elements

14 p2459 A69-29390

Q switched ruby laser designed for lidar probing of cosmic bodies and earth atmosphere

14 p2460 A69-29660

Plasma diagnostics facilities design, circuit diagrams and operation based on Q switched ruby laser and optical recording system

14 p2461 A69-29782

Pulsed IR laser optimal Q switching mode by using semiconductor mirror with nonparabolic dispersion law and changing mirror opening moment delay time

15 p2633 A69-30064

Q switched ruby laser giant pulses during pumping by another Q switched laser exhibit simple shape and low duration

15 p2634 A69-30727

Statistical characteristics of Q switched He-Ne laser emission gain fluctuations during transient process from subthreshold to superthreshold value

15 p2634 A69-30960

Q switched laser produced blast waves in low pressure Ar, discussing gas density and time dependence roles

16 p2796 A69-31705

Laser cavity optimization for producing minimum short light pulse width in fast Q switching of optical maser

16 p2796 A69-31802

Passive Q switching of chemical laser operating on vibrational-rotational line of vibrational transition of HCl

16 p2796 A69-31840

Spontaneous self pulsing and cavity dumping in carbon dioxide laser Q switched by internal GaAs electro-optic cell without saturable absorber

16 p2797 A69-32014

Tunable far IR radiation generated from difference frequency between two Q switched ruby lasers using lithium niobate and quartz as mixing crystals

16 p2798 A69-32603

Self Q switching of pumped neodymium-doped YAG and ruby lasers obtained by static misalignment of mirror and pumped laser filament

17 p2979 A69-32916

Repetitively Q switched ruby laser applied to frequency conversion, stimulated Raman scattering and vacuum UV generation

17 p2980 A69-33027

Q switching of CW 337 mu maser, gain factor measurements for pulse discharges and data on saturation and time dependence

17 p2981 A69-33088

Polymethine dyes in passive Q switches of neodymium lasers, noting effects of absorption band intensity, width and position on single pulse laser energy yield

17 p2983 A69-33968

Stable passive Q-switch of neodymium laser, presenting single pulses energy, time and spectral characteristics

17 p2983 A69-33969

Neodymium laser emission temporal structure in mode self locking regime with Q switching by saturable filter

18 p3152 A69-35016

Two photon excitation of luminescence in complex uranyl compound single crystals using Q switched ruby laser

19 p3334 A69-35982

Ruby laser Q switching with electro-optical shutter based on Li metaniobate crystals by applying static, single pulse or periodic potential to Pockels cell

19 p3336 A69-36346

Rotating mirror Q switched carbon dioxide laser for high peak powers, analyzing pulse structure and duration dependence on collision induced relaxations

19 p3338 A69-36694

Holographic camera using Q switched laser for recording high speed interferograms in plasma diagnostics

19 p3315 A69-36726

A scope laser radar system using Q switched solid state laser pulses, discussing configuration and performance

20 p3487 A69-37283

Ultrashort light pulses in lasers with nonlinear absorber, evaluating random intensity peak probability created by intensity fluctuations and axial modes buildup

20 p3555 A69-38009

Q switched laser pulse propagation in nonlinear laser amplifier using bitemporal relativity theory, deriving five dimensional wave equation revealing superlight signal existence

21 p3770 A69-38839

Giant Q switched laser pulse interaction with C target in background gas showing complex luminous shock structure near target as function of time
21 p3736 A69-38942

Fresnel pulse holograms of three dimensional diffuse objects by single mode ruby laser with or without Q switching
21 p3724 A69-38946

Spectral characteristics of Q switched single frequency ruby laser with tunable emission frequency in giant pulse mode
21 p3737 A69-38991

Deposited beta active thallium isotope materials angular distribution after vaporization by Q switched laser beam determined by target fragment recoil
21 p3737 A69-38992

Emission from polymethine dye solution during optical pumping with pulses from Q switched Nd glass laser, discussing emission spectral, temporal and energy characteristics
21 p3739 A69-39542

Emission kinetics of passive Q switched laser without constraints on relaxation time and switching characteristics of absorption centers and medium
21 p3740 A69-39550

Peak power ranges of Q switched CO-air-He molecular laser, noting recovery time and CO vibrational temperature
21 p3742 A69-39742

Transverse mode selection in rotating mirror neodymium doped calcium tungstate laser by inserting slit and edge into resonator
22 p3961 A69-40316

Time dependent mathematical double acceptor model including heat effects for analyzing Q switching and stimulated emission time delays in pulsed junction lasers
22 p3962 A69-40560

Digital computer determination of stimulated emission time delay, Q switching temperature and current region and impurity profile effect across junction in junction lasers
22 p3962 A69-40561

Spiking behavior detection in Q switched light output from GaAs pulsed junction laser, noting width at high pumping levels
22 p3963 A69-40563

Carbon dioxide and carbon dioxide mixture mirror Q switched laser peak power generation, using pulsed excitation
22 p3963 A69-40564

Q switched pulsed discharge carbon dioxide laser, determining peak power dependence on delay between pulse excitation and Q switching
22 p3963 A69-40566

Output power dependence of repetitively Q switched carbon dioxide laser on repetition time measured with thermopile, noting decrease in mirror system
23 p4173 A69-41566

Q VALUES

Earth and planets shallow seas tidal dissipation reflected in Q values, noting larger planet pressure effect
08 p1393 A69-20581

Metallicity index Q value difference between cluster and noncluster galaxies determined from UV, blue and violet observation data
10 p1774 A69-22964

Q multiplier UHF device as preselection filter for closely spaced channel signals, discussing channel interference reduction
23 p4141 A69-42220

QSO [RADIO SOURCES]

U QUASARS

QUADRATIC EQUATIONS

Quadratic form representation of multivariable polynomials expressing sufficient condition for positive definiteness of real multivariable polynomial
07 p1173 A69-18641

Quadratic programming and theory of elastic perfectly plastic structures under holonomic laws, proving theorems of limit analysis
07 p1235 A69-19443

Linear, quadratic, optimal control problems solved by sweep method, discussing time role, feedback control law and use of matrix equations
12 p2053 A69-26512

Minimum theorems for plastic strain rates and plastic strains governed by holonomic elastoplastic theory utilizing quadratic functions
13 p2370 A69-28629

Asymptotic solutions of optimum control for systems with constraints as linear differential equations and quadratic type functional
15 p2583 A69-31234

Quadratic programming method for equations of elastic perfectly plastic solid applied to stress distribution in plate torsion and bending
18 p3218 A69-34661

Computer quadratic method of evaluating ray propagation data for estimating inhomogeneous media properties
18 p3172 A69-34667

Quadratic Liapunov function existence for exponentially stable linear system with varying coefficients described by vector differential equations
19 p3359 A69-35617

Mathematical properties of involutorial matrix solutions to simple quadratic equation, obtaining symmetry properties, eigenvalues and recursion formulas
20 p3568 A69-37579

Biquadratic plane wave dispersion relation for gyrotropic waveguides with dielectric and magnetic properties, discussing associated quartic equation for refractivity
21 p3675 A69-39285

Memory gradient algorithm for reducing computing time by minimizing quadratic function of unconstrained variables compared with Fletcher-Reeves algorithm
24 p4340 A69-42957

QUADRATURE APPROXIMATION

U QUADRATURES

QUADRATURES

N-body problem in celestial mechanics, using differential equations, reduced to quadratures [UN PAPER 68-95268]
01 p0150 A69-10476

Optimum addition of abscissas in quadrature formulas by expansion of abscissas equation in Legendre polynomials
03 p0455 A69-13372

Approximate solution of celestial mechanics differential equations by reducing to quadratures for n body problems
06 p1006 A69-17566

All-pass transfer functions of new class type for design of quadrature filter networks, using Chebyshev approximation
08 p1277 A69-21167

Riemann sum definition and development of bounds for error in approximating integral, showing quadrature formulas as Riemann sums
10 p1719 A69-23521

Quadratic approximation at matrix level of dynamic equations for rotating bodies applied to gravity gradient satellite exhibiting nonlinear resonances
18 p3174 A69-35298

Iterative integration method of numerical quadrature over finite interval for analytic function, taking into account simple nonanalytic singularities in integrand
24 p4341 A69-43229

QUADRUPOLE NETWORKS

Direct couplings of autonomous noisy quadrupoles used for noise matching
01 p0043 A69-10591

Lumped element circuit producing directional coupling by electric and magnetic coupling of reactance quadrupoles, discussing insufficient coverage of calculated frequency range
16 p2763 A69-32581

Dispersive quadrupole network design using algorithm method
19 p3287 A69-36740

Quadrupole network transfer matrix calculation from known octupole matrix, describing frequency response determination of coupled transmission lines
22 p3912 A69-40257

Small losses measurement in circulators and reciprocal quadrupoles, using scattering matrix to eliminate mismatch errors
22 p3875 A69-40259

Transient processes in microwave quadrupoles with ferrite resonators
23 p4139 A69-41948

QUADRUPOLES

Cl 35 nuclear quadrupole resonance spectra of 3,6-dichloropyridazine, tetrachloropyridazine, 2,6-dichloropyrazine and chloropyrazine
01 p0123 A69-10290

Benzene quadrupole moment estimates from second virial coefficient data with polarizability in intermolecular potential function and from molecular susceptibility anisotropy
01 p0124 A69-10687

Alkali metal quadrupole spectral doublets used as diagnostic for determining alkali-metal plasma electron temperature
02 p0286 A69-11584

Hybrid loop properties determination using quadrupole algebra, noting frequency dependence of input impedance and voltage transmission
04 p0582 A69-15072

Electric quadrupole parameters, discussing relationship between voltages at terminals
04 p0579 A69-15228

Tsao-Curnutte line broadening calculations extended to include Raman scattering and quadrupole absorption
04 p0633 A69-15231

Stabilization of plasma filament with alternating current by quadrupole magnetic field
07 p1191 A69-18987

Electromagnetic diffraction for waves generated by electric quadrupole on perfectly conducting wedge, discussing finiteness and radiation emission
09 p1455 A69-22082

Nonmagnetic quadrupole ionization gauge, discussing systems design and electron oscillations
13 p2262 A69-28020

Nonmagnetic ionization gage consisting of quadrupole lens systems excited at HF, discussing electron focusing during operation
13 p2263 A69-28084

Earth quadrupole moment effects on precession of gyroscope in satellite in equatorial orbit
17 p2972 A69-33072

Electric quadrupole coupling for N 14 in aminedissulfonite studied by observation of second order transitions in electron spin resonance spectra
18 p3178 A69-35474

Boron 11 nuclear quadrupole coupling constants in solid boron halides, finding fine structure on nuclear magnetic resonance in boron fluoride
20 p3483 A69-36935

Pure quadrupole resonance spectrum of iodine-127 in solid stannic iodide measured in specific temperature range at atmospheric pressure
22 p3986 A69-40726

Quadrupole self and cross correlations of directional jet noise patterns, including frequency spectra and corrections
22 p3931 A69-40891

QUALIFICATIONS

Apollo spacecraft equipment qualification program for margin assurance, discussing ground and flight tests
19 p3430 A69-36015

QUALITATIVE ANALYSIS

Rarefied plasma self similar motion qualitatively analyzed, particularly penetration and expansion, taking into account electric/magnetic field effects
08 p1359 A69-19951

Friedrich qualitative analysis of ordinary differential operators modified to obtain quantitative information regarding eigenvalues distribution
17 p2995 A69-33404

QUALITY CONTROL

Ultrasonic quality control test methods for melt through welds in hydraulic line assemblies, noting equipment and surface roughness requirements
02 p0252 A69-11810

Undetected defects and false alarm probabilities for automatic test equipment, emphasizing quality and confidence limits
03 p0428 A69-13187

Human inspection performance in quality control operations to assess visual inspection tasks accuracy
03 p0433 A69-13386

Product assurance role in spacecraft sterilization to maintain planetary biological environments integrity in space programs for extraterrestrial life determination
03 p0379 A69-13400

Quality control of semiconductor materials, analyzing homogeneity by statistical distribution of nonequilibrium carriers based on photoconductivity measurement
04 p0642 A69-14856

Nondestructive testing of quality of electroexplosive devices based on determination of heat flow between bridge wire and surroundings
04 p0607 A69-14973

Quality control in welding from design through experimental manufacture, product testing, large scale production and improvements
04 p0608 A69-15485

Self acting gas lubricated bearings production, discussing manufacture to ultraprecision tolerances by semiskilled labor [ASME PAPER 68-WA/LUB-4]
05 p0768 A69-16130

Quality control for TV transmissions via communication satellites, considering transmission accuracy improvement and error measurement automation [UN PAPER 68-95773] 06 p0886 A69-17047

Holography for display devices, nondestructive testing, quality control, high speed, microscopy, acoustic testing, sonar, data storage, etc 06 p0928 A69-17873

Mechanical, electromagnetic and chemical signatures monitoring and analysis during system operation 06 p0932 A69-17875

Ti alloy blanks production technology and quality control, noting rolling of sectional profiles 07 p1161 A69-18765

Imaging systems for weld inspection, discussing physical factors and selection of radiation 07 p1139 A69-18796

Nondestructive tests for determining braze bond quality of open face honeycomb seal rings, using low viscosity liquids with fluorescent additives 07 p1140 A69-18797

Electromagnetic interference (EMI) created by noise coupling through conductive paths, discussing responsibility for control within systems management 07 p1079 A69-18944

Management control systems, discussing malfunction, inefficiency and needs of human elements 07 p1244 A69-18963

Direct bead sampling by aspiration of molten metal in open hearth furnaces and converters 07 p1141 A69-19341

Alumina radomes fabrication and control techniques to assure reproducibility of electrical and mechanical properties, detailing finished product inspection methods 07 p1142 A69-19529

High pressure storage vessels for gaseous hydrogen, discussing failure, manufacturing controls and access for internal nondestructive inspection [ASM PAPER D8-14.1] 07 p1143 A69-19666

Fabrication and processing techniques, tooling concepts and quality control for composite materials used in large aircraft, discussing honeycomb and sandwich structures [ASM PAPER D8-25.4] 07 p1172 A69-19670

Weld defects, discussing criteria for rejection, harmful and harmless defects, welding process and procedures and weld vs base metal defects 07 p1244 A69-19696

Integrated nondestructive testing systems to ensure welded assemblies reliability for Saturn 5 program, including surface defect detection 07 p1117 A69-19699

Components production process effect on reliability based on values and functional relations of internal parameters, noting influence on accelerated testing 08 p1319 A69-20346

Electronic components reliability tests, determining correlation between material quality and failure 08 p1293 A69-21109

Process control data in acceptance procedures for high reliability electronic components, discussing supplier and user cooperation 08 p1293 A69-21110

Bubble leak testing of components to understand effects of gas and liquid viscosity, surface tension, pressure differential and temperature 09 p1503 A69-21391

Efficiency of weather forecasts taking into account quality criteria and integrating index number, discussing optimization principle for new parameter 09 p1534 A69-21510

Quality control tests for adhesives used in structural parts including ultrasonic and nondestructive tests 09 p1513 A69-22564

Tests and quality control equipment used in German aeronautical and astronautical industries 09 p1513 A69-22565

Tumbling motion for testing gyroscopic devices quality 10 p1689 A69-22927

FM Lamb wave system for flaws and defects detection in thin metal sheets 10 p1699 A69-23048

Radiographic, ultrasonic, thermographic and leak test quality control for brazed liquid propellant rocket engine components 10 p1699 A69-23054

Welding defects, processes, inspection and personnel training problems 10 p1700 A69-23372

Metal surface distribution of electromagnetic field from striding transducer in eddy current flow detection, calculating magnetic field component 10 p1697 A69-24071

Mechanical damping and electrical matching effects on bandwidth of piezotransducer in ultrasonic flaw detection equipment 10 p1697 A69-24073

Flow detection inaccuracies in shadow method due to interference effects when using Babinet principle 10 p1675 A69-24075

Environmental requirements of military specifications tabulated according to tests for altitude, temperature, vibration, shock, humidity, temperature/altitude, etc 11 p1862 A69-24331

Passenger aircraft flight readiness verification, discussing flaw and corrosion detection and rivet joint inspection methods 11 p1822 A69-24526

Integrated management information system (IMIS), discussing logistics, reliability and quality assurance disciplines 11 p2005 A69-25304

TV test chart for evaluating Surveyor lunar spacecraft TV system covering resolution, photometric and colorimetric response and sun angular position [SMPT PAPER 105-71] 12 p2078 A69-25771

Reliability-quality control - Conference, Buffalo, May 1968 12 p2100 A69-25845

Descriptive statistics in quality control dealing with variability and probability, discrete and continuous variables, frequency distributions and measures of central tendency and dispersion 12 p2100 A69-25846

Configuration management, establishing uniform and mutually supporting methods of configuration identification, control and accounting for systems and equipment 12 p2192 A69-25849

Reliability-quality control - Conference, Ontario, April 1969 12 p2101 A69-25969

Reliability planning role in directing business functions to quality efforts integration in engineering, production and testing of electronic equipment 12 p2102 A69-25971

Graphite improvement for high temperature applications by computerized properties analysis, failure criterion and improved testing for defective billets 12 p2115 A69-26845

Soviet book on quality control of materials and machine parts by ionizing radiation covering radiation hazards and protection 13 p2268 A69-27935

Value engineering and component/products improvement incentive contract clauses role in defense product quality improvement 13 p2383 A69-28100

Titanium alloys for thermionic nuclear converters, discussing melting, forging, drawing and quality control of mechanical and physical properties 14 p2462 A69-29217

Electronic systems packaging substitution method for optimized malfunction isolation at succeeding levels to final discard-at-failure 14 p2420 A69-29494

Stainless steels stress corrosion susceptibility, detecting chromium carbide in martensitic matrix by galvanic nondestructive test method 14 p2466 A69-29935

Systems engineering approach to aerospace product defects minimization, discussing scope, contract development, mainstream functions, component development, design data and subsystem integration 15 p2719 A69-30085

Quality control of semiconductor materials, analyzing homogeneity by statistical distribution of nonequilibrium carriers based on photoconductivity measurement 15 p2667 A69-30248

Cost effectiveness of test selection when statistical distribution of load and strength are known, presenting curves for equally dispersed normal parameters distribution 15 p2720 A69-30401

Reliability control of 1/4-W resistors of tin oxide on glass substrate manufactured in quantity 15 p2627 A69-30837

Metal film resistor reliability for conventional and space use, outlining guidelines for fabrication and quality control 15 p2628 A69-30847

Quality assurance impact energy attenuation testing of U.S. Army flyer protective helmet, considering combined interaction of shell, foam liner and plastic pads 15 p2559 A69-30851

Quality control - ASQC Conference, Los Angeles, May 1969 15 p2721 A69-31119

Sterilization assembly development laboratory (SADL) quality assurance program for microbiological monitoring according to NASA planetary quarantine requirements 15 p2559 A69-31123

Electronic hardware optimum quality assurance selected by dynamic programming in terms of failure mechanism detection efficiency per source allocation 15 p2722 A69-31127

Quality control of high volume microelectronic circuit assembly of military computer emphasizing preventive action 15 p2580 A69-31129

Integrated circuits screens, developing sequence of life and environmental tests to remove units of potential reliability hazards 15 p2580 A69-31130

Large scale integrated MOS devices tests for space applications, establishing quality specifications 15 p2580 A69-31131

Integrated circuits failure analysis in space program applications, describing electrical analog for notification, fact gathering, part analysis and corrective action functions 15 p2580 A69-31132

High temperature ultrasonic testing to measure and control solid materials early in processing 15 p2632 A69-31514

Eddy current and ultrasonic applications to aircraft engine inspection, discussing electric and magnetic methods for quality control during fabrication 15 p2632 A69-31516

High reliability space system electronic parts control program to assure success of unmanned space missions 16 p2793 A69-31714

Book on ultrasonic testing of materials covering ultrasonics application to nondestructive testing, flaw detection and quality control 16 p2790 A69-32125

FORTAN computer program for quality control and calculation of total ozone measurements and lamp tests for Dobson ozone spectrophotometer 16 p2787 A69-32644

Solid propellant thrusters fabrication procedures, design considerations and quality control, stressing stress analysis and propellant choice with respect to geometry 17 p3018 A69-33331

Physics of Control program for electronic devices reliability, discussing qualified parts, chemical, physical and electrical properties, parameter ranges, specifications and corrective action 18 p3143 A69-34488

Semiconductor reliability evaluation program for economical experimental design, noting stress tests 18 p3232 A69-34496

Failure analyses of semiconductor devices for military use, suggesting modifications to MIL-STD reliability screen tests 18 p3108 A69-34499

Prefailure detection of unreliable electronics parts from random samples of received parts lots, noting cost reductions 18 p3146 A69-34508

Agna rocket vehicle production reliability evaluation program, testing specific representative equipment randomly selected from production stores 18 p3146 A69-34510

Automatic ultrasonic instrument monitoring on-line welding conditions of RF longitudinally seamwelded tubes 18 p3136 A69-34778

Betatrions for nondestructive quality control for materials and products under special conditions 18 p3136 A69-34779

Machining processes effect on surface integrity of machine parts and effects on product quality 18 p3149 A69-35129

X ray analyzer for residual stress measurement applied to quality control 18 p3150 A69-35423

Holographic interferometry for nondestructive testing of aircraft materials, discussing applications to quality control 19 p3322 A69-35576

System reliability evaluation based on failure analysis illustrated with examples covering initial requirement through parts production monitoring and control
19 p3454 A69-35782

Closed-loop system for test, failure analysis and corrective action in avionics reliability growth, showing cost effectiveness relationship to test program
19 p3282 A69-35784

Microwave equipment reliability considered in terms of various subsystems and components, showing carefully formulated and executed test program as essential
19 p3282 A69-35785

Microelectronics and IC process and quality control check list including conductor screening, resistor abrading and discrete part attachment
19 p3283 A69-36020

Cylindrical concave surface quality control by contactless comparison with reference surface, using interferometer with Twyman system and continuous laser
19 p3311 A69-36196

Quality control and dimensional accuracy in air-frame structures fusion welding
20 p3549 A69-37446

Fusion welding for thin gauge corrugated core sandwich airframe structures capable of operating at high temperature, discussing equipment, techniques and quality control
[SBAC PAPER 9] 20 p3549 A69-37448

Welding quality control in aircraft structures, considering weld design, process, weld and materials specifications, welding equipment and inspection
[SBAC PAPER 15] 20 p3550 A69-37452

Precision azimuth reference accuracy standards with confidence limits for gyrocompass evaluation, emphasizing astro and transfer angle repeatability
[AIAA PAPER 69-859] 21 p3725 A69-39387

Reliability testing and parts screening of electronic systems for best parts selection
22 p3953 A69-40029

Part selection, source control and application program for reliability of equipment design, noting derating
22 p3953 A69-40031

Engine oil analysis applied to commercial airline operations, ensuring lubricating qualities retention and detecting oil-wetted component failures
[SAE PAPER 69-0423] 23 p4169 A69-41647

Quality and reliability of electronic spacecraft devices and structural components produced in limited quantity, discussing documentation of production and testing
23 p4171 A69-42474

Management role in ensuring products and components quality and reliability, analyzing failure reasons
24 p4416 A69-42778

Self acting gas lubricated bearings production, discussing manufacture to ultraprecision tolerances by semiskilled labor
[ASME PAPER 68-WA/LUB-4] 24 p4320 A69-43035

Acrospace systems failures caused by stress corrosion, fatigue, overload, improper designing or inadequate processing control
24 p4323 A69-43428

Damage tolerance design concepts required to obtain reliability, maintainability and operational safety of complex aircraft
[ICAS PAPER 68-23] 24 p4254 A69-43717

QUALITY FACTORS U Q FACTORS

QUANTITATIVE ANALYSIS

Exploding wires as light source for quantitative spectroscopy, noting optically thin plasma clouds with radial symmetry
01 p0117 A69-10658

X Ray fluorescence of rock samples as applied to geological problems, noting standard deviations for element distribution
01 p0082 A69-10890

Quantitative determination of phenolic content in composite materials by pyrolysis gas chromatography method
01 p0025 A69-11267

Chemical composition of various types of chondrites, determining quantitative proportions soluble and insoluble in acids
01 p0026 A69-11381

Gas chromatographic determination of hydrocarbon quantity in methane in parts per billion range
03 p0382 A69-14115

Trace analysis /parts per billion/ of methane in helium, hydrogen and neon
03 p0382 A69-14116

Quantitative analysis of nonsteady temperature field in long cylinder for sudden heating of semiinfinite axisymmetric lateral surface
05 p0845 A69-15797

Quantitative spectroscopy and spectral photometry, discussing developed image properties and connection between exposure and image
08 p1315 A69-20467

Quality assessment of quantitative data on chemical composition of stony meteorites, considering precision and accuracy
11 p1953 A69-24359

Direct analysis of lunar surface chemical composition, considering soft landing probe and X ray isotope fluorescence method
11 p1832 A69-24629

Quantitative schlieren technique for one dimensional recording of light refraction in density gradients of high speed flow fields
12 p2088 A69-26181

Quantitative interferometric analysis of shock induced wavelength variations in glass and polished steel plates using Q switched ruby laser light source
12 p2089 A69-26185

Radioactivity induced in solid materials for components microautoradiography and radiograph information quantitative evaluation
13 p2297 A69-28157

Dispersion-strengthened alloys from extraction replicas, determining volume fraction and spacing of dispersed phase particles
13 p2282 A69-28167

Quantitative gas-liquid chromatography of sulfur amino acids trimethylsilyl derivatives
13 p2217 A69-28259

Quantitative gas-liquid chromatographic analysis of nucleic acid components including purine and pyrimidine bases, nucleosides or nucleotides
13 p2217 A69-28260

Quantitative analysis for N-acetylneuraminic acid by gas-liquid chromatography using trimethylsilyl derivative
13 p2217 A69-28315

Microstresses and distortions in quasi-isotropic solid bodies under strain evaluated by correlation functions
14 p2531 A69-28806

Quantitative analysis of interaction between spray and ambient atmosphere, discussing atomization of flat sheet and drop behavior relationship to operating conditions
15 p2717 A69-30465

Friedrich qualitative analysis of ordinary differential operators modified to obtain quantitative information regarding eigenvalues distribution
17 p2995 A69-33404

Quantitative analysis and classification of stony meteorites, including carbonaceous chondrites, by Mossbauer characteristics, discussing Prior plot and weather influence role in finds and falls
19 p3408 A69-36083

Quantitative mineralogical characterization of chondrites by modal analysis using electron microprobe
19 p3416 A69-36125

Spectroscopic quantitative analytical method for measuring atomic absorption in flame based on determining integral absorption magnitude during evaporation
20 p3539 A69-37605

QUANTIZATION

U MEASUREMENT

QUANTIZER

U COUNTERS

QUANTUM AMPLIFIERS

Quantum paramagnetic amplifier using andalusite single crystal and operating with three level pumping system
04 p0577 A69-14780

Quantum paramagnetic amplifier using natural andalusite single crystal and operating with four level pumping
04 p0577 A69-14781

Radio spectrometer with paramagnetic quantum amplifier for astronomical spectral measurements in 8 mm range
04 p0597 A69-14851

Pulsed radar quantum paramagnetic amplifier protection from driving pulse leakage power by transient processes
05 p0728 A69-15644

Quantum devices operation analyzed by introducing quasi-linear negative conductance into system by active substance, deriving equations to characterize saturation effects
05 p0719 A69-16223

Quantum paramagnetic amplifier saturating power dependence on input pulses length and frequency determined by kinetic equations solution
08 p1325 A69-20436

Radio spectrometer with paramagnetic quantum amplifier for astronomical spectral measurements in 8 mm range
15 p2607 A69-30243

Pulsed radar quantum paramagnetic amplifier protection from driving pulse leakage power by transient processes
16 p2762 A69-32501

Collection of papers on quantum electronics covering microwave, optical quantum generators and amplifiers, paramagnetic resonance, molecular excitation, etc
18 p3178 A69-35401

Gas and solid state microwave quantum generators and amplifiers, discussing radiation characteristics
18 p3153 A69-35407

Andalusite crystals as active media in paramagnetic quantum amplifiers, discussing design and performance
19 p3335 A69-35881

Possibility of combining individual yttrium ferrite single crystals to obtain noninteracting element for quantum paramagnetic traveling-wave amplifier operating at liquid nitrogen temperature
19 p3334 A69-35883

Amplitude and output spectra of optical quantum amplifier based on GaAs injection laser, noting values in traveling wave and regeneration mode
19 p3336 A69-36348

QUANTUM COUNTERS

Quantizing noise effect on reconstructed analog signal at reception terminal of digital data transmission system
01 p0027 A69-10250

Spectrum of clipped noise in optical spectroscopy, considering double clipping at zero photon number
15 p2571 A69-31486

QUANTUM ELECTRODYNAMICS

Cosmology and quantum electrodynamics, discussing zero point oscillations and predicted spontaneous emission rate
01 p0149 A69-10139

Microwave generation and amplification, noting microwave transit time tubes, semiconductor devices and methods utilizing quantum electronic effects to generate and amplify EHF oscillations
03 p0395 A69-13611

Quantum electrodynamics of radiation scattering from ionized interacting plasma, considering electron interactions
04 p0636 A69-15044

Multiphonon orbit lattice relaxation of excited states of rare earth ions in crystals, using results to design quantum electronic devices
[IEEE PAPER I-9] 05 p0774 A69-16318

Quantum electronics trends, discussing output power, mode control, stability and lifetime of CW and Q switched lasers and parametric interactions in nonlinear optics
07 p1144 A69-18468

Finite formulation of field theory applied to quantum electrodynamics, assuming Bogoliubov causality and TCP invariance of S operator
07 p1181 A69-18957

S matrix theory of electromagnetic interactions, obtaining equivalence of results with quantum electrodynamics by choice of subtraction constants
08 p1351 A69-20211

Interstellar extinction models of classical Mie particles and quantum mechanical polycyclic aromatic molecules
10 p1781 A69-23679

Relativistic coherence theory of black body radiation in transparent medium, deriving expressions for second order correlation tensors by phenomenological quantum electrodynamics
11 p1920 A69-25563

Transverse quantum thermodynamic phenomena in thin semiconducting films, noting effects of inelastic electron scattering at acoustic lattice vibrations
13 p2318 A69-27890

Magnetoquantum-electric effect, analyzing center motion of cyclotron orbit during photon and phonon absorption and current quantity
16 p2826 A69-31823

Quantum mechanical microwave frequency doubling in ruby, discussing output power variation with orientation
17 p3015 A69-33024

Quantum electronics theory, Volume 1, covering radiation-matter interactions, relaxation processes, spontaneous and stimulated emission, etc
17 p2982 A69-33686

Level shifts and spontaneous transitions in steady state of universe by path integral method of first quantization, considering time symmetric electromagnetic theory
22 p3980 A69-40169

Steady state cosmology for classical and quantum electrodynamics in local vicinity, deriving Lorentz-Dirac equation from variational principle
23 p4215 A69-42116

GaAs laser diodes differential external quantum efficiency and gain per unit length dependence on laser reflectivity, taking into account optical losses
24 p4330 A69-43766

GaAs laser diodes differential external quantum efficiency and gain per unit length dependence on laser resonator length, taking into account optical losses
24 p4330 A69-43767

QUANTUM GENERATORS
U STIMULATED EMISSION DEVICES

QUANTUM MECHANICS

Representation for real functions of quantum mechanical momentum operator obtained by functional integration in phase space
01 p0106 A69-10930

Conceptual problems of quantum optics, considering quantum mechanical and classical descriptions of effect of field on matter for damped and undamped modes
03 p0467 A69-13474

Maser model of single mode field coupled to N identical two level atoms, deriving threshold, stable and unstable steady states, relaxation oscillations, etc
03 p0441 A69-14108

Matrix elements calculation for one dimensional quantum-mechanical problems using transformation theory
04 p0632 A69-14866

Free energy of low density quantum plasmas derived statistically from exact two particle scattering phase shifts
05 p0799 A69-15629

Photon number and amplitude fluctuations of laser radiation in case of inhomogeneously broadened atomic line and for steady state condition
05 p0770 A69-15631

Quantum geometrodynamics in superspace, noting dynamical evolution of geometry with no real mass energy sources
05 p0793 A69-15773

Atomic hydrogen-bromine linear collision reaction intermediate formation and reactive scattering cross sections quantum mechanical calculation, using perturbed Morse oscillator approximation
05 p0796 A69-15911

Quantum oscillations of Maggi-Righi-Leduc (MRL) effect in n-InSb and n-InAs samples from single crystals at liquid helium temperature
06 p0979 A69-16992

Cyclotron resonance measurements of quantum effects in Ge valence bands by CW molecular gas laser, developing tunable submillimeter maser [IEEE PAPER C-6]
07 p1150 A69-19051

Experiments on Josephson tunneling junctions and superconducting contacts to demonstrate quantum electronic properties of superconductors [IEEE PAPER D-7]
07 p1200 A69-19052

Delta functions use in extending domain of Laplacian operator in quantum mechanics
07 p1174 A69-19495

Quantum theory of laser, discussing stationary photon distribution and correlation function for intensity fluctuations
08 p1324 A69-20221

Quantum mechanical description of ionizing reactions of highly charged positive ions in solar corona, obtaining approximate sum and selection rules
09 p1596 A69-22054

Fluid dynamical aspect of Schroedinger quantum mechanics and thermal equilibrium
09 p1541 A69-22394

Intrinsic quantum-mechanical behavior of fully ionized gas at high temperature and low density, defining classical limit
14 p2502 A69-29992

Master equation in quantum optics phase-space formulation based on Schroedinger equation of motion, noting application to Volterra integral equation and Born approximation
15 p2633 A69-30307

Quantum mechanics method for obtaining photocount distribution from optical maser photoelectron counting statistics
15 p2635 A69-31238

Klein theorem kinetic energy corrections taking into account breakdown of equipartition theorem
16 p2823 A69-32469

Collection of papers on quantum electronics covering microwave, optical quantum generators and amplifiers, paramagnetic resonance, molecular excitation, etc
18 p3178 A69-35401

Mathematical methods for quantum mechanical problems caused by electromagnetic field interaction with matter
18 p3175 A69-35402

Quantum transitions between molecular or atomic energy levels noting microwave spectroscopy utilization
18 p3099 A69-35405

Bogoliubov averaging method of perturbation in wave mechanics for radiation and matter interaction, considering monochromatic and broad spectral incident wave for resonance study
18 p3175 A69-35483

Paradox of incoming photons detection at two antennas without interference pattern disturbance explained by classical and quantum physics
20 p3538 A69-37415

Soviet book on quantum electronics covering electronic devices, nonrelativistic quantum mechanics, radiation field and matter interaction, black body radiation spectra, etc
20 p3556 A69-38210

Unified theory of elementary particles assuming quantum mechanics as consequence of changes in time within microcosmos and particle-universe interaction
21 p3816 A69-39622

Quantum-mechanical theory of unimolecular kinetics and predissociation developed from generalized Fano theory of resonant scattering
22 p3986 A69-40724

Quantum mechanical multimode correlation functions derivation and applications to laser theory
22 p3965 A69-41152

Quantum mechanical systems dynamics in diagonal coherent state representation, discussing applications
22 p3983 A69-41259

Variational formulation of nonlinear differential equations, treating vector fields in Hilbert spaces, finding relations useful in quantum mechanics
23 p4181 A69-41723

Collective rotational motion separation from internal motion in system of n point masses based on wave mechanics, emphasizing three body problem
24 p4349 A69-42650

QUANTUM NUMBERS

Absorption coefficient in three microwave lines of O with different rotational quantum numbers calculated, examining Zeeman effect in geomagnetic field
15 p2597 A69-30941

Transformed kinetic equation used to study relaxation of quantum oscillator to thermodynamic equilibrium state
18 p3152 A69-35126

QUANTUM STATISTICS

High temperature, fully ionized plasma equation of state, using quantum statistical theory of low density electron-ion plasma in thermal equilibrium
01 p0128 A69-10346

Self consistent field calculations of effective quantum numbers for nd, nf and ng electrons for atomic configurations from 2-126 Z
08 p1355 A69-20734

Chebyshev series approximations for Bose-Einstein functions of orders one to ten, noting computability of Fermi-Dirac functions and polylogarithms
24 p4341 A69-43231

QUANTUM THEORY

Quantum theory of electrical birefringence of noninteracting diamagnetic molecules /Kerr effect/ subjected to static electric field and polarized plane wave
02 p0279 A69-11538

Optimal reception of quantum signals at recording device aperture
02 p0206 A69-11607

Light tachyons, tachyon velocity and relation to gravitational quanta
02 p0282 A69-12746

First order equations for gravitational field quantized by methods developed for relativistic wave equations, describing elementary particles
03 p0466 A69-13422

Static formations in general theory of relativity and plankions
05 p0793 A69-15776

Symmetrical formulation of quantum theory of three wave optical parametric interactions in crystals
06 p0958 A69-17710

Model for phase transition mechanism quantum-Coulomb plasmas, finding transition temperature for white dwarfs
06 p0968 A69-17785

Difference frequency generation by multiple quantum transition from laser medium considered as resonant optical frequency mixing device
07 p1144 A69-18470

Quantum theory of electron gas with anomalous magnetic moments in intense magnetic fields, noting pair creation from thermodynamic energy in system
08 p1353 A69-19782

Quantum theory of laser, discussing stationary photon distribution and correlation function for intensity fluctuations
08 p1324 A69-20221

Quantum theory of line broadening and shift, relating adiabatic and diabatic collisions to elastic and inelastic scattering of perturbors
08 p1363 A69-20464

Laser operation through semiclassical dispersion theory, presenting dipole moment and population density equations derived from quantum theory
08 p1326 A69-20571

Quantum oscillations of magnetization, undamped magnetoplasma waves development and sound amplification by electron drift in crossed fields observed in semimetals
09 p1556 A69-21615

Functional equations of physical systems in strong coupling solved by quantum theory model of anharmonic oscillator, discussing relativistic invariant field theories
09 p1541 A69-22393

Universe origin, discussing big bang theory, effects of expansion time and temperature on elementary particles, RF quanta, etc
11 p1953 A69-24352

Coherence theory of electromagnetic field from classical /wave/ or quantum /particle/ standpoint, stressing information theory
11 p1915 A69-24455

Optimal reception of quantum signals at recording device aperture
11 p1835 A69-24714

Book on stellar atmospheres covering radiation theories, thermal equilibrium, measurement techniques, spectral analysis, etc, emphasizing sun
11 p1961 A69-25084

Quantum oscillators interaction with two level molecules system in circular laser
11 p1899 A69-25325

Maxwell theory-basis of special theory of relativity, discussing universal length constant
11 p1920 A69-25562

Stellar physics, Volume 1, covering stellar structure, evolution, physical processes, statistical physics, quantum theory, classical mechanics, etc
12 p2152 A69-25785

Shubnikov-de Haas effect and quantum limit phenomena concerning oscillatory magnetoresistance in semiconductors
16 p2827 A69-31826

Particle production by gravitational fields in universe via quantum field theory, considering cosmological models
17 p3008 A69-33003

Quantum electronics theory, Volume 1, covering radiation-matter interactions, relaxation processes, spontaneous and stimulated emission, etc
17 p2982 A69-33686

Quantum electronics, Volume 2, Maser amplifiers and oscillators
17 p2982 A69-33687

Laser action in quantum system, analyzing absorption constant relation to spontaneous/ stimulated emission constants, energy level population inversion, pumping, etc
17 p2984 A69-34150

Static formations in general theory of relativity and plankions
18 p3173 A69-35029

Soviet collection of papers on quantum electronics covering ruby laser actions, harmonic generation, laser outputs, etc
19 p3330 A69-35862

- Parametric conversion kinetics of monochromatic light waves in nonlinear crystals, using quantized electromagnetic field to study amplification and generation 19 p3332 A69-35870
- Lasers and maser devices in radio quantum electronics, discussing optical parametric and microwave devices including transistors, diodes, magnetrons, etc 19 p3284 A69-36433
- Electric field correlation to magnetic fields in quantum theory of coherence, deriving dynamical equations governing space-time development of correlation matrix 20 p3575 A69-37304
- Collection of papers on mechanics including quantum theory, mechanics of micropolar continua, elasticity and plasticity, rheology, etc 20 p3623 A69-37580
- Observations in quantum theory, considering object state, apparatus effects, eigenvalues probability distribution, etc 20 p3576 A69-37581
- Universe evolution from hot initial state, discussing element synthesis, quanta, radiation particles, etc 21 p3795 A69-38401
- Quantum theory for single mode laser radiation, considering photon distribution function and mean field damping decrement by phase quantum fluctuations 21 p3737 A69-38996
- Cavity Q dependence of intensity of single mode He-Ne laser above threshold for quantum and semiclassical theories 22 p3961 A69-40415
- Multiquantum photoemissive effect in metals, semiconductors and dielectrics emphasizing laser application for studying electromagnetic field 22 p3964 A69-40690
- Planck law for black body radiation spectrum theoretically derived on basis of classical Lorentz-invariant electromagnetic radiation at absolute zero temperature without quantum assumption 22 p3982 A69-41001
- Incoherent object threshold light detection by quantum limited optical system in presence of radiant thermal energy 23 p4191 A69-42147
- Quantum optics or electronics, discussing electromagnetic waves control and interactions with matter, maser oscillators theory and characteristics, nonlinear optics, induced transparency, etc 23 p4174 A69-42315
- Gravitational field quantization according to Einstein theory using classical Hamiltonian dynamics and quantum rules for constraints 23 p4192 A69-42332
- Laser quantum theory compared to stationary atoms semiclassical theory, emphasizing role of cavity mode spatial structure 24 p4327 A69-42789
- QUARKS**
- Leptonics quarks with various charges in cosmic rays, determining upper limit of flux in underground measurements 02 p0306 A69-11547
- Quark model to account for enormous energy from quasars 09 p1597 A69-22084
- Cosmic ray particles with fractional charge at sea level searched by scintillation counters with spark chambers, estimating quark flux intensity 13 p2333 A69-28425
- Quark detection in cosmic rays at sea level using scintillation counter and streamer chamber system 15 p2674 A69-30308
- Solar energy release by quark fusion catalysis of alpha reaction without production of neutrinos, noting temperature dependent reaction rate 18 p3186 A69-34643
- Quarkian core substance in superstars of great masses, discussing existence as primordial state forming baryon and nuclei and origin in stellar gravitational contraction 19 p3401 A69-35912
- Quark mass and charge interpretation during particle track photographic analysis of air shower cores by delayed expansion Wilson cloud chamber 24 p4383 A69-42945
- QUARTZ**
- Sustained high deceleration load effects on quartz crystals during atmospheric entry studied by centrifuge test program on oscillator circuits 01 p0042 A69-10417
- Tube and transistor type quartz crystal FM oscillators circuitry and operating characteristics, discussing generation of three frequencies 05 p0732 A69-16532

- Z magnetometer with quartz sensitive element suspended by thread in silicone oil design and operation 09 p1494 A69-21539
- Gas film protection of quartz tube wall transparency loss due to hot plasma contact used to study UV emission during high power pulse discharges 11 p1926 A69-24616
- UV radiation decreased transmittance through quartz exposed to plasma at high temperature and pressure, showing dependence on heated surface layer absorption 14 p2490 A69-29159
- Quartz oscillator with electronic temperature compensation, noting reduced size, weight and power consumption 14 p2420 A69-29398
- Quartz oscillator amplitude and frequency fluctuations due to elements tolerance fluctuations, examining oscillator parameters contributions to spectral line width 15 p2579 A69-30944
- Z magnetometer with quartz sensitive element suspended by thread in silicone oil design and operation 16 p2792 A69-32534
- Quartz fiber adhesion to Re measured in LEED/low energy electron diffraction/ apparatus for clean and O layer surfaces, noting brittle fracture 18 p3156 A69-35182
- Fiber reinforced carbon and graphite with application to reentry and propulsion systems and high temperature gas turbines, noting three dimensional woven quartz 19 p3354 A69-35519
- Elastic properties of hot pressed polycrystalline quartz and rutile as function of pressure, obtaining pressure coefficients of compressional and shear wave velocities 20 p3583 A69-37502
- Lummer-Gehrcke plate type polarizer made of birefringent material for Nd glass laser, discussing reflection coefficients in quartz crystals 21 p3739 A69-39541
- Quartz compasses designed for orientation of electronic devices with respect to magnetic meridians at low horizontal component values 23 p4166 A69-41869
- QUARTZ LAMPS**
- IR heating, discussing operation of IR emitters employing glass and quartz envelopes 03 p0411 A69-13548
- QUARTZ TRANSDUCERS**
- Rocket engines transient thrust measurement by quartz transducers 08 p1301 A69-20589
- Magnetosensitive quartz element with suspended magnet and two mirrors for recording magnetic variations 14 p2446 A69-29084
- QUASARS**
- Red shift pattern in quasar emission spectra consistent with fractional screening charges on emitting atom nuclei 01 p0153 A69-10855
- Cosmic rays properties and sources, considering origin in supernovae, galaxies, quasars and unknown sources 02 p0308 A69-12158
- Light fluctuations rise time, electron density, emission temperature and peak luminosity estimated for quasars powered by local gravitational collapse events 02 p0325 A69-12590
- Absorption and emission redshift distribution in quasars, N systems and similar compact and radio galaxies 02 p0325 A69-12591
- Linear polarization measurements at 2.07 cm for 29 radio sources 02 p0326 A69-12705
- Plasmas in galaxies, spiral structures and radio galaxies, discussing quasar line and continuum spectra 02 p0329 A69-12790
- Radio galaxies and quasars, discussing radio structure, observation methods, polarization, time variation, etc 02 p0329 A69-12791
- Energy sources and properties of quasars and radio galaxies by X ray astronomy 02 p0310 A69-12793
- Plasma model of quasars and radio galaxies for observations of high energy radiation 02 p0329 A69-12794

- Radio galaxies and quasars X ray emissions, calculating radiation fluxes produced by scattering of synchrotron radiation quanta at relativistic electrons 03 p0500 A69-13079
- Radio emission center of gravity from 3C 273 quasar determined by radio telescope together with A and B component fluxes 03 p0506 A69-13092
- Spectral line identification in quasars, noting emission lines characteristic of emission nebulas and absorption lines of stellar atmospheres 03 p0508 A69-13173
- Empirical growth curve determined by using equivalent widths of absorption lines of quasar 3C 191 concluding ionization is mainly due to collisional processes 03 p0514 A69-13962
- Radio spectra differences of quasars and radio galaxies, noting influence of frequency levels 04 p0652 A69-14418
- Continuum radiation of quasars, adopting cosmological interpretation of red shift 04 p0648 A69-14565
- Seyfert galaxies high excitation broad emission lines and quasars resemblance, discussing causes of spiral galaxies violent nuclear activity 04 p0657 A69-14689
- Optical variability of quasar 3C 273, suggesting radiation emission from single bodies rather than from large complex of independent sources 04 p0662 A69-15235
- Emission lines structure in quasar spectra, analyzing problem of weak absorption lines identification 04 p0662 A69-15236
- Evolutionary theory of origin and properties of Seyfert galaxies and quasars, postulating collisions within superdense clusters leading to supermassive stars and supernovae 05 p0819 A69-15703
- Radio observations of radio galaxies and quasars, noting double structure of many sources, some complex structures and association with optical objects 05 p0820 A69-15836
- Optical observations of radio galaxies and quasars, noting evidence for galactic explosions, surface distribution, physical properties, radio quiet quasars, etc 05 p0820 A69-15833
- Theoretical models explaining observed properties of radio galaxies and quasars, discussing quasar distance 05 p0821 A69-15851
- Quasar and radio galaxy evolution, discussing energy release rate and particle acceleration effects on radio and optical emissions 05 p0822 A69-15852
- MHD quasar model consisting of galaxy with supermassive plasma nucleus moving in magnetic field 05 p0822 A69-15853
- Variability in quasi-stellar objects, tabulating results of optical photographic survey 05 p0826 A69-16387
- Stimulated Compton effect for energy transfer between relativistic electrons and radio photons in quasi-stellar objects 05 p0828 A69-16652
- Quasars, stressing local Doppler and gravitational hypotheses for observed red shifts 06 p0998 A69-16968
- Optical mean energy distribution of quasars, discussing red shift effects, significance of physical origin of optical continuum radiation and K-term magnitude determination 06 p0999 A69-16975
- Relativity and stellar model stability, discussing energetics of quasars and gravitational collapse of supermassive stars 06 p1002 A69-17315
- Complex distribution of quasar red shift interpreted as due to two simple distributions of cosmological and gravitational red shift 06 p1009 A69-17968
- Cosmological model describing relation between red shift and magnitude of quasars 07 p1211 A69-18406
- Red shifts and intrinsic powers of radio galaxies and quasars, discussing local luminosity distribution, function of sources and cosmology 07 p1206 A69-19270
- Radio galaxies, quasars and radio stars between declinations plus 20 and plus 27 degrees, obtaining accurate positions and optical identifications 07 p1218 A69-19273

Cosmological models with antipole, determining models consistent with spatial distribution of quasars and radio galaxies

07 p1219 A69-19284

Radio spectrum of quasi-stellar object identified as Parkes 2134 plus 004

07 p1224 A69-19708

Relativistic astrophysics, discussing quasar phenomenology, red shift cosmology and relationship with galaxies

08 p1388 A69-20222

Quasars optical and electrical properties, distance, nature and role in cosmology

08 p1390 A69-20377

Focal antennas and receivers of Nancy radio telescope to measure flux density and incoming waves polarization, noting circular polarization in quasars

08 p1392 A69-20567

Quasar 3C454.3 optical variations, noting photographic and photometric evidence for period of 340 days

08 p1397 A69-20701

Quasi-stellar radio sources /QSS/ and radio galaxies structure and evolution, discussing nucleus nonuniform model

09 p1592 A69-21500

Theoretical models describing quasi-stellar objects and radio galaxies, noting objects locality, semilocality and cosmological distances

09 p1594 A69-21693

Quark model to account for enormous energy from quasars

09 p1597 A69-22084

Quasar red shifts due to cosmological and gravitational factors, assuming correlation of QSO intrinsic luminosity with gravitational red shift values

09 p1597 A69-22151

Red shifts of quasi-stellar objects obtained with image tube spectrograph, noting photoelectric magnitudes and colors

09 p1602 A69-22225

Spectroscopic observation of quasi-stellar objects noting red shifts

09 p1602 A69-22226

Absorption red shifts in quasi-stellar source due to dead galaxies in cosmologically flat model of universe

09 p1602 A69-22228

Absorption red shifts in quasar spectra from spectroscopic observations of PHL 5200 and B194

09 p1604 A69-22271

Quasi-stellar objects photometric selection in near IR

09 p1604 A69-22272

Quasars and explosive processes in galaxies as cosmic ray sources in expanding universe, studying relation between galactic and metagalactic cosmic rays

10 p1756 A69-22815

Homogeneous anisotropic cosmological models of pancake and cigar forms, discussing quasars and emission time effects on red shift and luminosity distance

10 p1771 A69-22856

Energy release in quasars through nonmassive gravitational collapse compared with local objects, noting cosmological luminosities

10 p1785 A69-24091

Spectroscopic observations of faint quasar near double galaxy NGC 3561, noting red shifts

10 p1785 A69-24092

Faint blue objects in intermediate to high galactic latitudes, summarizing results of UVB photoelectric photometry

10 p1788 A69-24123

Radiation probability of transmission through intervening galaxy and screening of quasar emission in universes with positive cosmological constant

10 p1790 A69-24135

Quasi-stellar radio sources interferometric observations at 2695 MHz, determining centroid of radio emission

10 p1790 A69-24138

Quasars optical polarization data, showing variable polarization for 3C 273

10 p1790 A69-24139

Quasar and radio galaxy spectra obtained on Cassegrainian focusing diffraction spectroscope

11 p1951 A69-24236

Quasars time dependent flux density variations at 6.6 cm, noting spectrum peaks tendency toward lower frequencies with time

11 p1954 A69-24382

Flux density of quasars 3C 270 and 3C 278 at 40 cm determined by digital computer with point source program

11 p1954 A69-24383

Electromagnetic wave buildup by induced Compton effect as possible radio emission source, considering data for quasars and pulsars

11 p1957 A69-24402

Plasmas role in emission mechanisms active in celestial sources of radiation, discussing sun and quasars

12 p2159 A69-26619

Quasars and radio-quiet objects numbers and properties, discussing red shifts interpretation by cosmological, gravitational and Doppler theories

12 p2161 A69-26937

Statistical data on space density of bright elliptical galaxies, radio galaxies, quasars, noting relation between space density and age

12 p2165 A69-27033

Polarization and structure of magnetic fields of quasars, E galaxies, normal galaxies and other extragalactic radio sources

12 p2165 A69-27034

Galactic and quasar radio sources distribution, discussing spectral indices

12 p2166 A69-27036

Radio sources angular dimensions determined by microwave interferometry, discussing distinctions between quasars, galaxies and unidentified sources

12 p2166 A69-27039

Frequency spectra of radio galaxies, supernova remnants and quasars observed by radio telescope operating in decimeter wave range

12 p2167 A69-27041

Quasars optical properties, hypotheses on nature, energy distribution, red shift, stellar magnitude and distance estimation on basis of absorption

12 p2167 A69-27042

Quasar spectra changes observed from 1962 to 1966 including flux density and antenna temperature for 3C 279 at cm wavelengths

12 p2167 A69-27043

Luminosity changes in quasar 3C 273, describing corrections introduced into luminosity curve obtained by iris photometer

12 p2167 A69-27044

Quasars intensity variations at various cm wavelengths confirming wavelength dependence

12 p2167 A69-27045

Quasar spectra, discussing 3C 345, 3C 191 absorption lines and model explaining quasar spectra

12 p2167 A69-27046

Red shift determinations and line identifications for quasars, using spectrograph with electro-optical converter

12 p2168 A69-27048

Quasar properties from cosmological nature, discussing red shift, luminosity, radiation intensity, absorption features, distribution, chemical composition, etc

12 p2168 A69-27049

Coherent radio emission mechanism in quasars and supernova remnants, discussing magnetic effects

12 p2168 A69-27050

Spectral energy distribution in quasars, using photoelectric spectral scanner in several wavelength ranges

12 p2168 A69-27051

Law of optical radiation and photometric characteristics of quasars, noting photometric effect of strong emission lines and color dependence on red shift

12 p2168 A69-27052

Optical identification of radio source 3C 230, suggesting removal from quasar list

12 p2173 A69-27171

Absorption line spectrum of quasar Ton 1530, discussing line widths and red shifts

13 p2334 A69-27306

Statistical tests for cosmological hypothesis for origin of absorption lines in spectra of quasars, considering red shifts

13 p2334 A69-27307

Photographic observations of quasi-stellar objects for position determination

13 p2334 A69-27308

Variable star BL Lacertae absolute spectral energy distribution in visible and IR regions, noting synchrotron features and possible quasar nature

13 p2335 A69-27315

Quasar applications as gravitational lenses within Hoyle-Fowler quasar model

13 p2340 A69-27575

IR extragalactic radio sources including normal radio galaxies, quasars and Seyfert galaxies

13 p2342 A69-27597

IR emission from quasars, noting quasar 3C 273 B and synchrotron mechanism probability

13 p2342 A69-27598

Quasar red shifts distance dependence indicated by visually bright quasar faintness in radio range

13 p2344 A69-27635

Extragalactic radio sources parameters analyzed for distinguishing quasars from dominant luminous radio galaxies by radio spectra

13 p2348 A69-27801

Extragalactic radio sources, observing nonlinear LF spectra for quasars and linear LF spectra for radio galaxies

13 p2351 A69-27867

Radio galaxies and quasars X ray emissions, calculating radiation fluxes produced by scattering of synchrotron radiation quanta at relativistic electrons

14 p2509 A69-28761

Radio emission center of gravity from 3C 273 quasar determined by radio telescope together with A and B component fluxes

14 p2516 A69-28774

Linear polarization of quasars, radio or normal spiral galaxies, galactic objects, etc, observed by Parkes telescope

14 p2526 A69-29770

Polarization characteristics of quasars, radio galaxies and galactic objects suggesting separate evolutionary processes

14 p2526 A69-29771

Symmetry between koinomatter and antimatter in universe, discussing koinonucleons production, big bang theory, protogalaxy model, quasi-stellar objects, galaxy evolution, etc

15 p2690 A69-30670

Quasar multiple absorption red shift lines caused by gas in extended galaxy halos, assuming broadened galactic cross section area

15 p2695 A69-30884

Quasi-stellar and related objects emission and absorption red shifts tabulation suggesting absorption lines origin

15 p2701 A69-31532

Quasi-stellar objects anomalous Hubble plot, suggesting explanation for steeper plot under assumption on red shift vs apparent magnitude relation

15 p2701 A69-31536

UBV photometry of southern quasars, radio galaxies and normal galaxies including two color diagrams, radio luminosity, brightness and color distribution

16 p2859 A69-32228

Accurate optical position of quasars determined by plate overlap for radio interferometer calibration

16 p2859 A69-32229

Accurate positions at 2700 MHz and optical identification of radio sources with galaxies and quasi-stellar objects

17 p3035 A69-33611

CP 0950 and CP 1133 pulsating stars position, using radio telescope at two frequencies

17 p3036 A69-33639

Quasars and intergalactic hydrogen density, using Schmidt law of increase in number density of quasars to construct plausible models

18 p3190 A69-34288

Radio sources identified as quasi-stellar objects through photographic detection of large brightness changes

18 p3201 A69-35206

Forbidden emission lines in spectra of normal, radio and Seyfert galaxies and quasars, giving information about quasi-stellar mean densities, temperatures, ionization, etc

19 p3424 A69-36236

Cosmological constant and elementary particle theory

20 p3606 A69-38013

Electron ejections from nuclei of radio galaxies and quasars explained on basis of plasma stability, discussing role of relativistic electrons and resulting unstable pinch

20 p3606 A69-38032

Induced Compton scattering of plasma and electromagnetic waves under astrophysical conditions, discussing HF radio emission spectra from cosmic objects and quasar

20 p3607 A69-38035

Cosmic ray electron role in energetics of solar flares, stellar flares and explosions, galactic eruptions and quasars

21 p3790 A69-38823

Quasars observations interpretation, discussing red shift origin, gravitational collapse, lifetime, distribution, cosmological aspects, etc

21 p3802 A69-38825

Quasi-stellar objects identification, distribution, emission lines interpretation, energy distribution, absorption spectra, radio properties, etc

21 p3811 A69-39515

Galactic nuclei as collapsed old quasars from dynamics of gas cloud collection in galactic nucleus, discussing cosmic radiation emission from synchrotron mechanism

21 p3815 A69-39610

Quasars red shifts distribution interpreted as due to cosmological and gravitational red shifts distribution, noting analysis error

22 p4024 A69-40580

Quasars observation failure for red shifts beyond z suggested due to absorption of intergalactic neutral H

22 p4024 A69-40582

Quasar features compared to pulsars, noting complete analogy except for energy output scale

22 p4029 A69-40762

Quasar association with galactic clusters, noting red shift and spectral correspondence

22 p4029 A69-40763

Radio galaxies and quasars number-flux density relations role in cosmology, discussing object identification, population, angular sizes, etc

23 p4218 A69-42324

Observational cosmology in terms of relation between red shift and apparent luminosity of galaxies /Hubble relation/

23 p4219 A69-42328

Red shift determinations and line identifications for quasars, using spectrograph with electro-optical converter

24 p4375 A69-42551

Law of optical radiation and photometric characteristics of quasars, noting photometric effect of strong emission lines and color dependence on red shift

24 p4375 A69-42552

Radio galaxies differences from quasi-stellar objects indicating relativistic particles generation from violent explosions releasing energy comparable with powerful supernova

24 p4378 A69-42697

Explosions mechanism in radio galaxies and quasars mechanism based on observed phenomena, emphasizing galactic flares

24 p4378 A69-42698

Book on physics and evolution of galaxies covering properties, stellar content, interstellar matter, high energy particles and radio galaxies

24 p4384 A69-43167

Quasars time dependent flux density variations at 6.6 cm, noting spectrum peaks tendency toward lower frequencies with time

24 p4389 A69-43772

Flux density of quasars 3C 270 and 3C 278 at 40 cm determined by digital computer with point source program

24 p4389 A69-43773

Electromagnetic wave buildup by induced Compton effect as possible radio emission source, considering data for quasars and pulsars

24 p4391 A69-43792

QUASI-PARTICLES

U ELEMENTARY EXCITATIONS

QUASI-STEADY STATES

Continuous emission spectrum and continuous plasma absorption spectral coefficients for optically dense quasi-steady state electrical discharge plasma in sulfur capillary

06 p0964 A69-17251

Quasi-steady state plasma acceleration in coaxial electrode geometry during synchronized application of tailored pulses of mass flow and current [AIAA PAPER 69-267]

09 p1563 A69-21234

Discrete automatic control systems determination by adjustable model, considering quasi-steady state conditions

13 p2238 A69-27253

Spectral distribution of fluctuations in stable plasma in absence of external fields, emphasizing electric field fluctuations, quasi-steady states, isotropic plasmas and thermodynamic equilibrium

14 p2490 A69-29103

Quasi-steady state supersonic gas flow past two closely spaced coaxial separating bodies at different velocities, showing dependence on separation rates

14 p2391 A69-29617

Validity range of nuclear quasi-equilibrium approximation for stellar silicon burning, discussing time rates of nuclear abundance changes and temperature effect

14 p2529 A69-29984

Kinetic theory of stationary laser emission under quasi-equilibrium conditions, analyzing emission modes

19 p3332 A69-35874

Laser multimode emission kinetic theory, discussing quasi-equilibrium disturbance effects and nature of inhomogeneity

19 p3333 A69-35875

Laser emission during disturbed quasi-equilibrium, considering emission spatial inhomogeneity due to arbitrary radiative transitions

19 p3333 A69-35876

Laser emission in system of four level centers, determining nonuniform emission line broadening due to disturbed quasi-equilibrium distribution of electron subsystem elementary excitations

19 p3333 A69-35877

QUASI-STELLAR RADIO SOURCES

U QUASARS

QUASILINEARITY

U NONLINEARITY

QUATERNARY ALLOYS

Ti rich Ti-Al-Mo-Zr alloys phase diagrams at high temperatures, noting presence of solid solutions

07 p1161 A69-18769

Heat resistance of Ti-Al-Mo-Zr alloys analyzed by bend tests, discussing phase diagrams

07 p1163 A69-18779

Dislocations effect on intermediate body centered tetragonal phase precipitation in Fe-Ni-Cr-Be alloy using transmission electron microscopy

08 p1333 A69-20447

Heat resistant fiber composites produced by oriented eutectic crystallization in Co and Ni quaternary alloys [ONERA-TP-710]

16 p2799 A69-31765

Fracture toughness of AlZnMgCu alloys, employing sharp notch tension, tear and precracked Charpy impact tests

16 p2800 A69-31780

Metallurgy, properties and applications of Co-Ni-Mo-Cr ultrahigh strength alloy, discussing corrosion

18 p3154 A69-34307

Tungsten influence on morphology and lattice parameter of fcc gamma prime phase in Ni-Cr-Ti-Al alloys

20 p3558 A69-36962

Corrosion and stress effects separation in stress corrosion of Al-Zn-Mg-Cu alloy, considering machined surface finishing role

21 p3747 A69-39435

QUATERNIONS

Programming technique using quaternion parameters for error reduction in simulation of spinning rigid body

05 p0724 A69-16469

Multispacecraft simultaneous simulation on hybrid computer using Encke perturbation method for translational motion and Hamilton quaternion method for inertial transformations [AIAA PAPER 69-937]

22 p4036 A69-40320

QUENCHING

Plasma spray quenched Al-V alloys resulting in dispersion strengthening of material

13 p2277 A69-27409

IR quenching of photocurrent under field effect in CdS crystal

16 p2827 A69-32044

QUENCHING [COOLING]

Precipitation hardening of gamma phase in austenitic stainless steels studied for phase transformations by dilatometry after aging and quenching

01 p0096 A69-10613

Heat transfer principles analyzed in development of new quenchants for aluminum, noting properties of inversely water soluble polyalkalene glycols

01 p0087 A69-10900

Migration and penetration of vacancies in quenched magnesium analyzed by electrical resistivity measurements and electron microscopy

02 p0267 A69-12187

Heat of solution and diffusivity of nitrogen in molybdenum analyzed by quenching technique and resistivity measurements at liquid helium temperature

02 p0267 A69-12188

Transitional hexagonal omega phase of Ti-Fe alloys quenched in water and tempered

03 p0451 A69-13999

Crystal lattice and orientation of precipitate responsible for hardening water quenched Ni-Cr-Nb alloy

08 p1334 A69-20852

Organic quenchant additive for distortion free heat treatment of dip-brazed aluminum parts

09 p1504 A69-22065

Supersaturation of dissolved B in splat quenched Fe-Ni-B alloys, noting interstitial and substitutional B in martensitic and austenitic phases

10 p1707 A69-22987

Quenched titanium-niobium alloy structure effect on superconductivity properties, using electron microscope and X rays

12 p2112 A69-26040

Nital etchant and sodium bisulfite stain for morphology of quenched dilute alloy Fe-Ni martensite

13 p2282 A69-28166

Electrical resistivity decrease in niobium-hydrogen alloys during isothermal aging at low temperature attributed to hydride precipitation, noting reaction rate and activation energy

14 p2463 A69-29288

Oil quench vacuum furnace with graphite cloth heating elements

14 p2456 A69-29894

Polyurethane with additives for fuel fire control in aircraft structures, achieving desired protection without impairing foams mechanical properties

15 p2561 A69-30311

Al cryogenic quenching using liquid N for slow and uniform heat removal to eliminate distortion

18 p3150 A69-35419

Quenching temperature and deformation conditions for Ti alloy bars optimal mechanical properties, emphasizing effect of primary structure

19 p3328 A69-36152

Ni-Ti maraging steel hardness impact strength and thermal EMF changes during quenching

19 p3345 A69-36154

Quench rate effect on martensite start temperature and fine structure of Fe-C and Fe-C-Ni steel, using transmission electron microscopy

20 p3557 A69-36956

Ti-Al-V sheets quenched from alpha plus beta field into salt bath at various high temperatures, studying effects of bath temperature and holding time on aging and mechanical properties

21 p3730 A69-38667

QUEUEING THEORY

Validation study of pilots visual sampling behavior, using queueing model based on instrument and eye movement data from Link trainer mission flights

02 p0202 A69-11954

Bulk queueing with service time distribution assuming customer arrival in batches and service discontinuance

02 p0271 A69-12060

Iterative method for numerical solution of linear algebraic equations for stationary probability distributions in queueing and reliability theory

10 p1721 A69-23691

State probabilities of finite stochastic queueing system for calculating equipment reliability parameters

10 p1664 A69-23693

Fluctuations effect in flow problems analyzed by waiting line theory to improve systems design based on operational needs

18 p3145 A69-34495

Parameters distinguishing analytic queueing models of time sharing algorithms, emphasizing techniques used for analyzing round-robin and multiple level queueing models

19 p3279 A69-35600

Equipment reliability determination from relations for efficiency characteristics of stochastic queueing system with finite number of sources having Markov character

24 p4287 A69-43129

R

RABBITS

Insignificant or recoverable changes observed in blood acetylcholine content and cholinesterase activity of rabbits subjected to 8 g acceleration

02 p0197 A69-11491

Increasing hypoxia effects on rabbit EEG and light flash conditioned alimentary reflex for simulated altitude ascent, noting subcortical stimulation

02 p0197 A69-11492

Retinal burns from intense light sources using rabbit eyes as function of irradiation rate, exposure time and image size

02 p0204 A69-12496

Transient changes in oxygen consumption, carbon dioxide elimination and respiratory quotients during and after induced hypoxia to rabbits

06 p0876 A69-18026

Oculomotor muscular tonus of rabbit during rocket flight acceleration and weightlessness

07 p1062 A69-18590

High oxygen concentration effect on conditioned reflex and associated EEG responses to light flash in rabbits occurs in well defined sequences

07 p1065 A69-18976

Clinicomorphological changes in rabbit eyes vascular system by exposing transverse accelerations
08 p1262 A69-19832

Transverse acceleration effect on male rabbit frontal hypothalamus nuclei neurosecretory function, noting blood plasma antidiuretic activity
08 p1262 A69-19930

Pulsed and CW microwave power effects on rabbit eyes, noting lens opacities produced
10 p1648 A69-23185

Corticosteroid and catecholamine metabolism change in rabbits during sharp limitation of motor activity
12 p2021 A69-26973

Central adrenergic mechanisms role in neurosecretory function of hypothalamo-hypophyseal system of rabbits under transverse accelerations in centrifuge
15 p2554 A69-30055

Myocardial changes in rabbits after general chronic ionizing irradiation attributed to lower cardiac activity, hypotrophy and dystrophy
17 p2906 A69-32929

Motion sickness prophylaxis for rabbits subjected to rotation, investigating effects of adrenalin, ephedrine, sympatholitin, piperoxane and pyridoxyphene on nystagmus and respiration
20 p3472 A69-37265

Nystagmus reactions in rabbits subjected to rotating vestibular tests, noting decrease following previous adaptation to stimulus
20 p3473 A69-37267

High oxygen concentration effect conditioned reflex and associated EEG responses to light flash in rabbits occurring in well defined sequences
20 p3479 A69-38224

Ventilatory responses to hypercapnia and hypoxia in anesthetized and unanesthetized rabbits before and after bilateral cervical vagotomy
21 p3651 A69-38390

Hyperbaric oxygen convulsions origin and site, studying pressure effect on brain electrical activity in rabbit by EEG
21 p3656 A69-38977

Single large X ray dose depressive effect on aminotransferase activity in rabbit blood serum, liver, kidney, heart, spleen, lungs, etc
21 p3657 A69-39051

Enzyme activity changes in liver, heart and cerebrum of X ray exposed rats and rabbits, noting individual enzyme differences in same X rayed organ
21 p3658 A69-39054

Single X ray dose effect on alpha-amylase and alpha-glucanophosphorylase in rabbit liver tissues and blood serum
21 p3658 A69-39055

Ionizing radiation histological and neurohistological effects in rabbits esophagus, stomach and ileocecal region intramural plexes
21 p3659 A69-39063

Electroretinogram a-wave relationship to early inhibition and excitation of retinal ganglion cells produced by flash superimposition in rabbits
22 p3878 A69-40836

Hemodynamic characteristics of decortication in rabbits, noting upsets of compensatory and adaptive capabilities of cardiovascular system
22 p3888 A69-41271

Positive phase shift relation to elastic modulus enhancement of smooth muscles of rabbit, cat and dog bladder, pulmonary artery and large veins
23 p4083 A69-41459

Rabbits long term reversible retinal function changes due to short high intensity light flashes, noting ERG suppression
23 p4084 A69-41468

Rhythmic wavelets electroretinogram recorded from rabbit retina in vitros preparation indicating dominant relatively low voltage waves compared to in vivos waves
23 p4101 A69-41471

Isolated pacemaker tissue from rabbit heart under dynamic and static stretching, discussing spontaneous frequency phenomena
23 p4096 A69-42092

Cardiovascular autonomic effects dynamic characteristics under severe arterial hypoxia in unanesthetized rabbit
24 p4258 A69-42632

Neural integration of cardiorespiratory responses and suprabulbar control during arterial hypoxemia in rhinencephalic thalamic pontine rabbits
24 p4258 A69-42635

Test animals prolonged deep submersion in water, in mixed oxygen-H atmosphere at elevated pressure, noting EEG and EKG activities
24 p4262 A69-43025

RACON BEACONS
U RADAR BEACONS

RADANT

Integrated radome antenna system design /radant/, comparing electrical performance with conventional systems
07 p1109 A69-19513

RADAR

NT COHERENT RADAR
NT CONTINUOUS WAVE RADAR
NT DOPPLER RADAR
NT METEOROLOGICAL RADAR
NT MONOPULSE RADAR
NT MOVING TARGET INDICATORS
NT OPTICAL RADAR
NT PULSE DOPPLER RADAR
NT PULSE RADAR
NT RANGE AND RANGE RATE TRACKING
NT SATELLITE-BORNE RADAR
NT SEARCH RADAR
NT SECONDARY RADAR
NT SIDE-LOOKING RADAR
NT SURVEILLANCE RADAR
NT TRACKING RADAR

Band inversion passive generation in pulse compression radar, noting influence on signal modulation laws
04 p0558 A69-15074

Digital signal processing in radar, sonar and communication
05 p0718 A69-15749

Book on new concepts in radars covering ideal reception, moving targets, autocorrelation, SNR, amplitude distribution, clutter, etc
24 p4283 A69-43168

RADAR ALTIMETERS
U RADIO ALTIMETERS

RADAR ANTENNAS

Nomograph for planning circular planar aperture antenna arrays, discussing element totalling and spacing, layout geometry, sidelobe suppression and scan loss from broadside
01 p0037 A69-10017

Phased array radar antennas emphasizing beam steering of transmitting linear array with number of phase shifters
01 p0049 A69-11390

Geodesic lens radar antennas, discussing air filled devices operated in TEM mode, inclusive Luneberg lenses, double layer pillboxes and parabolic lenses
03 p0402 A69-13184

Millimeter waves in communication navigation and research, discussing radar range resolution and remote sensing
03 p0397 A69-13722

Semiconductor microwave phase shifters for electronic steering of phased array radar antennas noting cost, reliability and properties of steerable antennas
04 p0572 A69-14319

HAPDAR-TACOL phased array radar design, discussing array patterns and multitarget tracking performance
04 p0556 A69-14324

Reflected radar signal random fluctuations suppressed by using antenna, receiving channels and logarithmic amplifiers
04 p0556 A69-14490

Contour pattern analysis of AN/FPQ-6 monopulse radar Cassegrainian antenna, giving three dimensional drawings
04 p0576 A69-14769

Electrohydraulic radar antenna telecontrol system, discussing pump assembly, hydraulic motor and pump control servojack
04 p0551 A69-15185

Military rotor blade radar antennas for all-weather low level flight and fire control
04 p0559 A69-15197

Single two dimensional coherent matched filter optical processor for simultaneous synthetic radar antenna beam sharpening and pulse compression
04 p0562 A69-15475

Electronically scanned X band array used as receiving antenna for target recognition radar
04 p0562 A69-15476

Secondary radar equipment functions and features forming IFF-SIF chain, discussing displacement controller and minor lobe suppression functions technical problems
05 p0721 A69-16591

Biological effects of VHF electromagnetic radiation from radar antennas
05 p0715 A69-16701

Integrated radome antenna system design /radant/, comparing electrical performance with conventional systems
07 p1109 A69-19513

Measurement bases in general, discussing theoretical data justifying ground level base and measurements results
07 p1136 A69-19516

Radioelectric axis deviation of radome in front of monopulse radar antenna
07 p1111 A69-19524

Paper-honeycomb sandwich radome structure for protecting monopulse UHF radar antennas used in BMEWS
07 p1111 A69-19537

Radiation pattern deformation due to sharp angle radome studied by analyzing diffraction in antenna dihedron system
07 p1112 A69-19539

Angular separation of two point sources measured through expressing antenna resolving power by a posteriori probability laws
08 p1288 A69-20961

Electronic multibeam switching X band antenna system design with separate transmitting and receiving antennas for use on continuous wave surveillance radar
08 p1289 A69-20967

Antenna noise temperature at earth station due to rain on radomes, solar and cosmic noise, noting SNR degradation
09 p1461 A69-21283

Radar transmitter and receiver antennas polarization parameters selection for obtaining maximum SNR at reception point
11 p1833 A69-24442

Microwave antenna testing on small indoor ranges, discussing reflectors and feeds for generation of approximately uniform plane waves for antenna illumination
11 p1852 A69-25314

Statistical gain characteristics of radar antennas at very short Fresnel zone ranges compared to Fraunhofer zone
12 p2040 A69-26470

Southern radio auroral zone observation with rhombic antennas, noting diffuse and discrete zones associated with proton and electron precipitation
12 p2033 A69-26950

Radar antenna radiation effects on man and biological material dependent on absorption degree and emission characteristics including wavelength, peak and mean power
13 p2215 A69-28597

Stepped scanned ring monopulse array, discussing pattern analysis, directivity, co-phased and quasi-phased model
14 p2419 A69-28894

Electronic boresight shift in space-borne monopulse radar system, expressing antenna and signal parameters in terms of equivalent branch and channel asymmetries
14 p2411 A69-28895

Radar calibration and precipitation measurements equation taking Gaussian approximation for antenna radiation pattern
16 p2806 A69-32264

Doubly curved reflectors for rotating search radar directional antenna, noting assembly of elliptical strips constituting segments of parabolic dishes and sidelobe suppression
16 p2763 A69-32790

Transmitting antenna design of multistation radar system for meteors and upper atmosphere investigation, discussing amplitude and phase of electromagnetic field
19 p3278 A69-36661

Phase error in synthetic aperture radar, discussing tolerance level, sources classification and effect on average response, resolution and ambiguity function
20 p3490 A69-37642

Biological and physiopathological effects of UHF electromagnetic radiation of radar antennas, reviewing localized effects
24 p4273 A69-42996

Microwave integrated circuit applications to reflective and transmissive phased arrays, discussing radar system elements
24 p4286 A69-43109

RADAR APPROACH CONTROL

FAA coded broadcasting to transponder equipped aircraft for air traffic control, navigation, collision avoidance and airfield approach
04 p0629 A69-15478

Lidar data obtained at Hamilton AFB, Calif., computer analyzed for lidar operational utility, determining cloud ceiling and visibility for aircraft landing operations
15 p2651 A69-30895

Air traffic control ground equipment developments including radio direction finders, surveillance radar, interconsole marking, etc
18 p3168 A69-34806

ATC medium range radar /SRE-LL1/, describing reflectors positions, information rate, installation, antenna parameters, etc
20 p3496 A69-37932

RADAR ASTRONOMY

Meteor grouping in meteor streams analyzed using radar records of meteor showers
01 p0154 A69-10873

Backscattering diagram of Venus at 40 cm determined from Doppler spectrum and reflected signals range energy distribution
02 p0314 A69-11639

Radar observations of sun, determining reflected radio signal component formed by combination scattering in coronal plasma oscillation
03 p0505 A69-13082

Diffusive scattering effects on planetary surface reflection coefficient determined by radar observations
04 p0662 A69-15245

Radar determination of exponent s for describing mass distribution of Geminid and Quadrantid meteoric bodies
05 p0823 A69-16033

Radar probing of solar system noting contributions to knowledge on planets
09 p1595 A69-21765

Mars photographic and radar data correlation indicating smoothness of dark areas and roughness of desert areas
11 p1964 A69-25406

Radar observations of sun, determining reflected radio signal component formed by combination scattering in coronal plasma oscillation
14 p2515 A69-28764

Received radar signal power maximizing problems in planetary exploration, analyzing abelian group real line and circle problems
17 p2993 A69-32831

Radio and radar astronomy with reference to extragalactic sources and solar system, noting astronomical instrumentation
19 p3425 A69-36430

Radar astronomy, discussing planetary surfaces study techniques, target/signal interactions, planet cross sections, delay and Doppler spectra
20 p3491 A69-37650

Astronomical unit determination, discussing dynamical and radar methods and Doppler shift of neutral hydrogen line spectra in radio astronomy method
22 p4022 A69-40464

Statistical model of cratered planetary surface slopes and elevation applied to radio wave scattering by moon and Venus
23 p4209 A69-41322

RADAR ATTENUATION

Altitude effects on radar attenuation in nonequilibrium solid propellant afterburning rocket exhaust plumes
04 p0685 A69-14730

Rocket exhaust plume models for signal attenuation predictions, considering inhomogeneous plasma medium with varying electron density and collision frequency
24 p4408 A69-43253

RADAR BACKSCATTER

U BACKSCATTERING

RADAR BEACONS

Interim radar improvement program for air route traffic control centers pending development of automated terminal radar programs
01 p0114 A69-11357

Radar detector for survivors, using inexpensive microwave mixer detector crystal
06 p0878 A69-16964

Airborne radar navigation with emphasis on semiautomatic fixing, describing beacon mode, map matching and airborne weather radar
18 p3169 A69-34851

RADAR BEAMS

Quantitative estimations of cloud and precipitation by radar meteorology, assuming homogeneous reflectivity distribution of clouds
04 p0626 A69-14507

Multiple target monopulse radar signal processing technique
04 p0562 A69-15470

Doppler navigation, explaining radar beam mechanization, Doppler spectrum, scanning noise, spectral compression and tracking
18 p3169 A69-34849

Optical correlation for radar signals phase modulated by pseudorandom codes
24 p4282 A69-42742

RADAR CHAFF

U CHAFF

RADAR CLUTTER MAPS

Clutter rejection using coded burst waveform for airborne early warning /AEW/ and airborne attack type radars
03 p0388 A69-13185

RADAR CORNER REFLECTORS

Radar cross section enhancement effect of corner reflectors, multiple reflectors and dielectric lenses
03 p0384 A69-12909

Geodesic lens radar antennas, discussing air filled devices operated in TEM mode, inclusive Luneberg lenses, double layer pillboxes and parabolic lenses
03 p0402 A69-13184

RADAR CROSS SECTIONS

Radar cross sections for arbitrary bodies calculated with computerized ray optics method taking into account depolarization
02 p0209 A69-12332

Book on calculating radar cross section characteristics of geometrically complex shapes using reflectivity characteristics, including electromagnetic theory and data interpretation
03 p0383 A69-12901

Electromagnetic diffraction theory for radar cross section of aircraft, missiles and satellites, discussing mathematical representation of electromagnetic field for extreme wavelengths
03 p0383 A69-12902

Scattering matrices of complex configuration specified by cross polarized radar cross sections based on Green function, noting wire loop and wedge scatterers
03 p0384 A69-12904

Monostatic radar cross section of simple shapes estimated using optics and Rayleigh region approximation with emphasis on multiple reflection
03 p0384 A69-12905

Bistatic radar cross sections of simple shapes calculated based on optics and resonance region, noting forward, nonforward and Rayleigh scattering
03 p0384 A69-12906

Mode theory of backscattered radar cross section of elongated dielectric bodies capable of sustaining traveling wave
03 p0384 A69-12907

Scattering from coated absorbing conducting bodies, considering flat plane and curved surfaces in Rayleigh region
03 p0384 A69-12908

Radar cross section enhancement effect of corner reflectors, multiple reflectors and dielectric lenses
03 p0384 A69-12909

Missile radar cross section based on modeling from simple forms, noting computer program
03 p0384 A69-12910

Radar cross section of missile and aircraft configurations, comparing theoretical and experimental results for Convair 990 static test model
03 p0384 A69-12911

Radar cross section laboratory, discussing experimental techniques, electromagnetic range and pulse, FM/CW and CW radars
03 p0385 A69-12912

Radar cross section data interpretation, discussing calibration, unwanted signals, averaging, scattering matrix and power spectra
03 p0385 A69-12913

Charts of horizontal cross sections of radio echo foci for radio echo reflections from cumulonimbus clouds
03 p0459 A69-13288

Scattering characteristics of planet Venus at 3.8 cm wavelength, discussing frequency power spectra and radar cross section
13 p2349 A69-27818

Electromagnetic and plasma waves scattering by space vehicle excited by ground source in isotropic warm plasma, obtaining radar cross sections
13 p2221 A69-27965

Statistical distribution functions for radar cross section of flying aircraft
14 p2414 A69-29500

Radar cross section of bird represented as unit density dielectric spheroid for bird hazard monitoring, discussing meteorological, insect and bird echoes
17 p2919 A69-33366

Plane electromagnetic wave scattering by motion of small ellipsoid in vacuum, noting total scattering and radar cross sections dependence on ellipsoid velocity
18 p3105 A69-35485

Radar design for target detection, tracking and identification, modeling plasma effects on radar cross section of reentry vehicles based on wave-plasma interactions
20 p3485 A69-36925

Numerical evaluation of geometrical optics radar cross sections of general doubly curved convex conducting body using surface fitting method
20 p3494 A69-37848

Moving model target for laboratory measurements of radar cross section to simulate satellite or reentry vehicle precession motion, noting signature data analysis
20 p3511 A69-37850

Satellite rotation from radar data analysis, requiring two full rotations and body characteristics to produce distinctive lobes in radar cross section
22 p3900 A69-40682

Randomly oriented disks and rods scatter pattern used to determine causes of log-normal distribution of radar cross section fluctuations
23 p4116 A69-41592

Bistatic radar scattering cross sections for reentry vehicle with ionized wake
23 p4116 A69-41593

Monostatic radar cross sections /RCS/ for 5 and 11 wavelength straight wires obtained from induced current integral equation solutions
23 p4116 A69-41594

RADAR DATA

Venus atmosphere and radius measurements by Mariner 5, Venera 4 and radar, comparing values
01 p0157 A69-11197

Ground based control system via cockpit PPI display on transponder equipped aircraft broadcast with digital coding
03 p0464 A69-13244

Multimode digital radar control paths and operating communication, discussing radar data, triggers, real time data and error localization
05 p0718 A69-15750

Optical processing of planetary radar data for range Doppler image generation
08 p1270 A69-19816

Radar and satellite TV clouds observation in meso and macroscale cloud systems
13 p2294 A69-27853

Graphical method for plotting contours of Rice distribution function as rocket-borne radar reflection data, determining leakage factor
14 p2416 A69-29536

Bird warning and forecast systems based on radar data covering 50 mile radius from airport
17 p2899 A69-33367

High speed analog to digital multiple channel wide-band data acquisition system designed for short pulse Doppler radar and probe measurements
19 p3307 A69-35745

Transport aircraft automatic altitude transmission requirements, discussing altimeter-transponder radar system to aid air traffic control
19 p3371 A69-36700

Storm location and severity prediction by pattern recognition theory, using quantized radar data, compared with statistical prediction
21 p3678 A69-39458

RADAR DETECTION

Adaptive detection mode for surveillance radar, using detection threshold proportional to spatially sampled clutter level estimates for regulation of false alarm probability
01 p0026 A69-10178

Radar attitude sensing system for determining vehicle roll, pitch, yaw, altitude and velocity of earth and lunar orbital vehicles
03 p0388 A69-13183

Digital modified discrete Fourier transform Doppler radar processor for tactical aircraft
03 p0389 A69-13196

Automatic sequential detector for noncoherent moving target indicator radar, describing noise and clutter residue control
03 p0389 A69-13197

Radar or ECM/ECCM system simulation by digital computer, using signal and jamming spectral inputs
03 p0400 A69-13200

Passive linear FM pulse compression radar systems detection capability compared with matched filter performance
03 p0390 A69-13218

Moving window radar detector design for moving targets, giving chart for SNR derivation to obtain given detection probability

04 p0558 A69-15073

Radar signal matched filters synthesis using linear digital filters and digital correlators noting role in radar detection

05 p0722 A69-16733

Radar detector for survivors, using inexpensive microwave mixer detector crystal

06 p0878 A69-16964

Antenna pattern loss factor for determination of average probability of detection vs SNR curves for three dimensional or pencil beam radars

08 p1270 A69-19858

Radar target detection and angular location estimation in amplitude comparison monopulse radar by simultaneous observation with group of antennas

09 p1452 A69-21312

Phased array radar system for UHF detection, identification and tracking of orbiting objects and ballistic missiles, noting system design and hardware

12 p2028 A69-25906

Radar SEP /spherical error probable/ for defining error ellipsoid in three dimensional accuracy and CEP /circular error probable/ for defining two dimensional accuracy

13 p2221 A69-27963

Panchromatic illumination in radar systems for image quality, tracking and detection problems, suggesting application to polypanchromatic radar

14 p2416 A69-29529

Frequency agility techniques applied to target detection in noncoherent pulsed radar systems

17 p2917 A69-32919

Radar geoscience application, discussing radar return relation to illuminated terrain in detecting buried river channels

20 p3491 A69-37651

Radar digital processing and display system for air traffic control with IC central processor and discrete data transmission over telephone lines from remote sites

21 p3760 A69-38328

Compound fading exponential /CFE/ clutter model for radar target detection, describing automatic detection applications

23 p4117 A69-41604

Radar detection performance evaluation procedures based on integration, collapsing and fluctuation losses estimates for swirling target models and partially correlated targets

23 p4132 A69-42547

Wavelike structure observed near tropopause with sensitive radar system, suggesting clear air turbulence as cause of breakdown of gravitational wave

24 p4342 A69-42893

RADAR DIRECTION FINDERS

U RADIO DIRECTION FINDERS

RADAR DISPLAYS

U RADARSCOPES

RADAR ECHOES

NT ANGELS

NT CLUTTER

NT LUNAR RADAR ECHOES

NT SOLAR RADAR ECHOES

NT VENUS RADAR ECHOES

Radar reflectivity and refractive index spectra in clear atmosphere simultaneously measured and compared with theoretical calculations

01 p0032 A69-10969

Sequential logic for improved signal detectability in frequency-agile search radars, discussing target echo fading models in radar range performance prediction

01 p0033 A69-11008

Fluctuating radar echoes from cloud targets with vibrating drops, noting amplitude modulation effect of changing cross section on backscattered signals

02 p0208 A69-12021

Radar target amplitude, angle and Doppler scintillation from analysis of echo signal propagation in space

02 p0211 A69-12447

Book on calculating radar cross section characteristics of geometrically complex shapes using reflectivity characteristics, including electromagnetic theory and data interpretation

03 p0383 A69-12901

Monostatic radar cross section of simple shapes estimated using optics and Rayleigh region approximation with emphasis on multiple reflection

03 p0384 A69-12905

Radar return signal generation for computer simulations of airborne radar systems, using digital computer program for time varying radar backscatter

03 p0429 A69-13199

Wind shear and reflectivity gradient effects on Doppler radar spectra

03 p0461 A69-13341

Reflected radar signal random fluctuations suppressed by using antenna, receiving channels and logarithmic amplifiers

04 p0556 A69-14490

Quasi-specular bistatic radar measurements of oblique scattering properties of lunar surface using telemetry carrier from Explorer 35 as lunar orbiting radar beacon

04 p0655 A69-14657

Sporadic background separation from radar observations of meteor showers, using echo range distribution, head echoes and antenna direction change

04 p0659 A69-15035

Sonar receiver reduced averaging processing in presence of extended and point targets compared with full averaging processor

04 p0562 A69-15477

Radar determination of exponent s for describing mass distribution of Geminid and Quadrantid meteoric bodies

05 p0823 A69-16033

Radio aurora radar measurement, determining echo and Doppler velocity distribution and dependence on aspect angle, magnetic latitude, height, azimuth and time

05 p0754 A69-16265

Radar echoes signal amplitude and phase digital recording with Radicord /radar digitizing and recording/ device

05 p0721 A69-16618

VHF radar observations of electron density irregularity in nighttime equatorial electrojet, comparing day and night time electron drift rates and directions

10 p1769 A69-23837

Chirp radar signal compression by proton spin echo phenomena, noting compression ratio and SNR

11 p1834 A69-24566

Trapped aerosols below temperature inversions causing lidar echoes in troposphere layers, discussing simultaneous balloon refractometer, thermometer and ground based lidar soundings

13 p2254 A69-28475

Equatorial electrojet VHF radar observations indicating nontwo stream electron concentration irregularities related to electron drift velocity

14 p2511 A69-28953

Doppler echo from random rough surface, discussing average power return, frequencies, amplitudes, antenna beamwidth and radar data correlation

14 p2413 A69-29488

Radar echoes observed from clear atmosphere, discussing scattering mechanisms of thin stable inversions, convective thermals, Benard convection cells, breaking gravity waves, etc

14 p2415 A69-29518

Earth radar studies, relating echo behavior to rocket altitude and surface electrical characteristics

14 p2416 A69-29531

Graphical method for plotting contours of Rice distribution function as rocket-borne radar reflection data, determining leakage factor

14 p2416 A69-29536

Ultrasonic pulse-echo-overlap method modified for simultaneous measurement of time delay and relative voltages in determining sound velocities and attenuation of solids

14 p2450 A69-29567

Relation between radar echoes spatial extent and synoptic conditions with reference to various fronts, noting significance for aviation

14 p2474 A69-29738

Algorithm for processing binary-quantized echo signal packets, obtaining useful and noise signals relation

15 p2571 A69-30331

Binary-quantized signal packet center for target azimuth determination, discussing antenna radiation pattern role

15 p2566 A69-30332

Digital method to produce radar reflectivity from analog audio frequency Doppler data extracted from terrain echo signal of CW scatterometer radar

15 p2572 A69-31111

Martian topography during rotation observed using radar round trip echo delay at 7840 MHz, discussing dark areas relation to elevation

16 p2860 A69-32238

Precipitation intensity measurements, obtaining distribution parameters from radar reflectivity at two wavelengths and microwave attenuation factor at third wavelength

16 p2806 A69-32265

Received radar signal power maximizing problems in planetary exploration, analyzing abelian group real line and circle problems

17 p2993 A69-32831

Radar cross section of bird represented as unit density dielectric spheroid for bird hazard monitoring, discussing meteorological, insect and bird echoes

17 p2919 A69-33366

Centrifugation effects on body composition and growth of mice

17 p2910 A69-33746

Range effects on apparent height and frequency biases of radar precipitation echoes determined by regression technique for several stations

18 p3101 A69-34826

Field aligned ionospheric F layer ion density irregularities, using simultaneous hourly radar echo and spread F data and detailed ray path calculations

18 p3129 A69-34958

Wind shear effects on radar echo decay constant for finite meteor trail, considering roles of trail length and electron density variations

19 p3276 A69-36482

Terrain radar returns emphasizing surface roughness influence in man-made target backscatter, determining radar cross section with radar range equation

20 p3490 A69-37646

Range-Doppler data processing of radar echoes from spread targets, considering quadratic filter theory, emphasizing received signal correlation functions

20 p3490 A69-37648

Radar geoscience application, discussing radar return relation to illuminated terrain in detecting buried river channels

20 p3491 A69-37651

Doppler radar based on triple pulse transmission at coherent frequencies, comparing echo pulses for targets cancellation and extraction

21 p3672 A69-38436

Very short pulses effect on aircraft echoes, noting echoing area reduction as resolution cell diminishes

21 p3672 A69-38755

Surface reflectivity mapping of Venus by radar interferometry at 3.8 cm, noting low reflectivity circular regions

21 p3806 A69-39331

Radar reflection techniques for planetary surface studies, considering surface properties effects on reflectivity and reflected wave characteristics, instrumentation and data for moon and planets

21 p3811 A69-39509

Monograph on selection of radar echoes from nearly colocated reflection centers, discussing guided missile multiple target resolution

22 p3899 A69-40533

Radar return from clutter target with circular polarization, finding probability density functions and cumulative distributions of power ratio

23 p4131 A69-42540

Thunderstorm turbulence relationship to weather radar echoes from storm penetrations in Oklahoma by instrumented aircraft

24 p4347 A69-43720

RADAR EQUIPMENT

NT PLAN POSITION INDICATORS

NT RADARSCOPES

Phased array radar cost improvement based on solid state devices and microwave integrated circuits application

01 p0048 A69-11039

Electron tubes in phased array radar systems, discussing replacement limits by solid state devices, reliability and cost reduction

01 p0048 A69-11040

Transistors vs electron tubes as microwave power sources in UHF phased array radars, noting transistor cost competitive limit

01 p0048 A69-11041

Radar cross section laboratory, discussing experimental techniques, electromagnetic range and pulse, FM/CW and CW radars

03 p0385 A69-12912

Array radar technology development offering multifrequency operations from common aperture

03 p0388 A69-13182

Millimeter wave lunar radar system component specifications and design with paraboloidal antenna, emphasizing reflectivity of moon

03 p0397 A69-13725

High power radar for investigating ionosphere by incoherent scatter technique

03 p0398 A69-13768

Digital radar systems, discussing control computers, beam steering computers, signal processors, mode control, displays and chirp networks 05 p0718 A69-15748

Stationary coherent /hologram/ radar and sonar using zone plate action to provide range information 05 p0721 A69-16578

Ferrite Y junction E plane circulator for airborne high power X band radar 07 p1100 A69-18639

Dielectric constant and loss angles measurement in Ku band used for onboard radars 07 p1112 A69-19544

Small amplitude surface irregularities effect on backscattering properties of radar calibration metal sphere, using full wave boundary perturbation method 08 p1273 A69-20027

Range measurement accuracy of radar automatic equipment, discussing nomograms for split-gate tracker, cyclic and pulse length errors and multipath reflections 08 p1275 A69-20228

Analog video processor in omnidirectional radar system for flight safety, discussing construction, transistorization and circuitry 08 p1276 A69-20605

Analysis and optimization of side-looking synthetic aperture radars carried out for resolution, SNR and least squares estimation of target field 08 p1277 A69-20960

Electronic beam-rotation systems operation using matrix network to feed circular arrays, noting applicability to direction finding or radar systems 08 p1288 A69-20964

Microelectronic multimode airborne radar system with modular construction, discussing system design, development, flight testing and operational results [AGARDOGRAPH-114] 08 p1277 A69-20989

Pulsed laser radar and applications to upper atmosphere observation equipment and distance measuring devices 09 p1456 A69-22132

Pulsed J band Gunn effect oscillators performance, noting hybrid domain mode due to high bias fields 09 p1468 A69-22594

Electrical, thermal and mechanical requirements in design of Landing Radar Electronic Assembly for Apollo Lunar Module 10 p1663 A69-23537

Secondary radar for air traffic control automation in France, discussing onboard equipment 10 p1723 A69-23705

Pulse Doppler radar operation, discussing Doppler shift, range resolution and systems components 10 p1659 A69-24084

Radar remote sensing for terrain data acquisition 12 p2098 A69-27005

Designs and capabilities of digital processing systems for automatic air traffic control radar information stressing future use of display for computerized control 13 p2295 A69-27332

Solid state radar feasibility, discussing circuit components, circuit design problems involving striplines and monoblocks, phase controlled antenna, solid state computers, etc 13 p2230 A69-27928

SHF solid state phased array radar with Gunn effect modular microwave IC design, discussing air and ground applications 14 p2420 A69-29435

Collection of papers on radar theory and technology, Volume 2, covering radar tracking, measurement, target acquisition, trajectory analysis, etc 15 p2565 A69-30330

Moving target selector radars subsystems amplitude and phase instability effects on interference signal suppression 15 p2576 A69-30339

Multifunctional radar errorless operation determined from relations between amount of received information, number of channels and SNR 15 p2576 A69-30354

Primary-secondary radar /SECAR/ integration for air traffic control, discussing problems of simultaneous display, transmission synchronization, signal multiplexing, etc 15 p2570 A69-31222

Semiconductor technology including radar, Gunn and limited space charge accumulation oscillators, phase locked antennas, data processing and solid state computerization 15 p2581 A69-31521

Radar control system based on load waveform monitoring by coupled control and modulating circuits 16 p2753 A69-32439

Microphonic noise measuring systems for airborne radar system design for noise reduction 17 p2937 A69-33628

Apollo lunar module landing radar, discussing descent phases, operating modes, assemblies and Surveyor radar 19 p3267 A69-35797

Onboard radar for light interceptor aircraft /Aida II/, discussing navigation, low altitude penetration and air to air missile interception 19 p3278 A69-36701

Secondary radar IFF/SIF /Identification Friend or Foe-Selective Identification Feature/ system, describing ground and onboard radar and data processing equipment 19 p3278 A69-36702

Imaging radars - Conference, University of Michigan, July-August 1969 20 p3488 A69-37631

Linear radar system theory including Fourier transforms, linear superposition and input/output ratio for deterministic and random signals, discussing filter and sampling theory 20 p3489 A69-37633

Synthetic aperture radar principles, using periodic pulse modulation to construct terrain imaging radar 20 p3489 A69-37635

Signal amplitude no memory nonlinearity effect on performance of synthetic aperture terrain imaging radar systems and simulation of CRT film systems 20 p3490 A69-37643

Airborne imaging radar drawbacks and advantages, describing techniques to overcome defects 20 p3493 A69-37735

MERA /Molecular Electronics for Radar Applications/ modules testing in planar array simulator, measuring far field amplitude patterns in transmitting and receiving modes 22 p3912 A69-40067

Amplitrans use as broadband microwave amplifiers in high power radar systems with frequency agility, involving modified high vacuum tube modulator and modulator circuit 23 p4135 A69-41384

Polymeric polyurethane protective coatings for radar radome covers with improvement in service life, discussing performance properties and production method 24 p4338 A69-43456

RADAR FILTERS

Clutter rejection using coded burst waveform for airborne early warning /AEW/ and airborne attack type radars 03 p0388 A69-13185

Digital processing of Doppler radar signals using matched filter concept 03 p0393 A69-13291

RADAR MAPS

Radar range height angle charts for plotting earth based radio or radar system vertical plane coverage diagrams 01 p0031 A69-10633

Satellite high resolution radar mapping of planets, discussing synthetic aperture and linear FM transmission radar techniques 03 p0430 A69-13399

Side looking radar for earth resources sensing, discussing geological and hydrographical mapping, oceanography, agricultural and biological phenomena 06 p0923 A69-17119

HF ionospheric radar ground scatter map showing separated land-sea backscattered radio waves by Doppler technique 09 p1454 A69-21681

Radar remote sensing for terrain data acquisition 12 p2098 A69-27005

Mathematical expressions for measuring heights of vertical and nonvertical features with both slant and ground range radar images 13 p2263 A69-28198

APQ-97 side-looking radar for topographic mapping of continually cloud covered areas, noting data reduction and compilation methods 20 p3519 A69-36928

Surface reflectivity mapping of Venus by radar interferometry at 3.8 cm, noting low reflectivity circular regions 21 p3806 A69-39331

RADAR MEASUREMENT

Specific effective scattering area on lunar surface using Luna 13 signals from Oceanus Procellarum measured with radar employing antenna with narrow radiation pattern 01 p0158 A69-11312

Book on compound signals and uncertainty principle in radar observations, considering Woodward ambiguity function, determining accuracy and resolution of range and velocity measurements 03 p0385 A69-13000

Radar method to estimate turbulent motions in clouds 03 p0459 A69-13289

Venus radius determined by planetary radar and Mariner 5 radio tracking data 03 p0508 A69-13348

Quasi-specular bistatic radar measurements of oblique scattering properties of lunar surface using telemetry carrier from Explorer 35 as lunar orbiting radar beacon 04 p0655 A69-14657

Level crossing rate meter correction for boxcar-ed and receiver noise readings in incoherent weather radars 04 p0557 A69-14915

Threshold signals and optimum signal parameters in radar range and velocity measurements 04 p0560 A69-15403

Radio aurora radar measurement, determining echo and Doppler velocity distribution and dependence on aspect angle, magnetic latitude, height, azimuth and time 05 p0754 A69-16265

Langmuir probe experiment measurement of upper region electron temperature on Explorer 32 conflict with Jicamarca Radar Observatory measurements 05 p0756 A69-16283

Randomly rough surface physical and geometrical remote determination by polychromatic bistatic radar 05 p0721 A69-16572

Meteoroid mass distribution determined by radar observations of underdense meteor trails at Springhill Meteor Observatory 06 p1003 A69-17493

Receiving system of CENFAM multistation radar project for meteoric and upper atmosphere studies composed of antennas connected to form product-interferometer pairs 07 p1077 A69-18674

Radar signal parameters measurements consisting of SNR estimation and optimum energy supply determination from SNR estimation 07 p1085 A69-19153

Quantitative radar determinations of radio wave scattering cross section of lunar surface layer 07 p1087 A69-19621

Wind vector in respect to orientation of large scale cirrus bands based on stereophotogrammetry and radar observations 08 p1346 A69-20442

Electron content of earth-Venus interplanetary medium measured by observing relative propagation time of radar pulses to Venus 09 p1594 A69-21697

Laser radar atmospheric applications, noting particulate matter mapping, backscatter density profiles and use of lidar 09 p1521 A69-22795

Remote geoscience sensing using properties of radar return noting scatterometry, imagery, altimetry and penetration measurements 11 p1835 A69-24692

Surface dielectric constant and microwave opacity of Venus atmosphere as function of wavelength determined by radar observations 12 p2153 A69-25805

Adaptive pattern recognition system simulated and tested with agricultural radar images, describing predictive environmental model mathematically 12 p2097 A69-26990

Cloud drift radar measurements for determining wind velocity profiles in mesosphere, using rocket released dipole reflectors 13 p2253 A69-27848

Refraction error in measurements with simple and radar interferometers, considering atmospheric effect 13 p2221 A69-27961

CENFAM radar receiving system for meteoric and upper atmospheric data on amplitude, range and direction of meteor echoes through interferometer pairs 13 p2354 A69-28649

Radar radiometer by adding radar to scanning microwave radiometer, discussing applications to spacecraft measurement of oceanic winds, waves and precipitation 14 p2421 A69-29528

Aerosol content of mesosphere with noctilucent clouds measured with optical radar in Norway 14 p2444 A69-29877

Binary-quantized signal packet center for target azimuth determination, discussing antenna radiation pattern role
15 p2566 A69-30332

Autonomous radiometers signals statistical properties used in space technology, discussing radar signals phenomenological models, measurement errors and energy characteristics
15 p2566 A69-30337

Regional slope measurement from two monoscopic radar images of same terrain area, discussing accuracy and applications to geomorphology and hydrology
15 p2610 A69-30710

Mercury, Venus, Mars, earth and lunar mass determinations by radio tracking and planetary radar systems
15 p2697 A69-31305

Planet Venus data from Venera 4, Mariner 5, radio astronomical and radar measurements
15 p2698 A69-31360

Martian topography during rotation observed using radar round trip echo delay at 7840 MHz, discussing dark areas relation to elevation
16 p2860 A69-32238

Cumulonimbus clouds phase structure and spatial distribution based on radar signal polarization analysis, showing high nonuniformity and variability
16 p2806 A69-32266

Vertical wind velocity pulsations in precipitation and passage through subfrontal clouds measured by pulse radar
16 p2807 A69-32272

Temperature profiles and associated wind profiles obtained with Jimsphere/FPS-16 radar system at Cape Kennedy, discussing remote CAT detector assessment
17 p2999 A69-33739

Meteoritic matter distribution by calculating orbital elements of 12,500 meteors from radar data, using diversity reception for radio waves scattered at meteor trails
17 p3041 A69-33894

Nanosecond pulse coherent Doppler radar for monostatic measurements of turbulent wakes in shock tunnels and ballistic ranges
19 p3293 A69-35743

Wind speed and direction determination accuracy of radar or theodolite methods
20 p3572 A69-37698

Mesospheric wind measurement by meteorological rockets based on radar determination of drift trajectories of chaff clouds
20 p3529 A69-37797

Radar observations of convective pattern types in clear atmosphere consisting of thermal- and Benard-like convection cells
20 p3573 A69-38059

Handbook of radar measurement covering noise measurement, error analysis, antenna performance, etc
21 p3678 A69-39668

RADAR NAVIGATION

Aircraft traffic control with cockpit self sufficiency for accurate and reliable navigation capability, discussing radar vector navigation and communication
07 p1177 A69-19210

Aircraft nose-mounted radome refraction errors influence on directional tracking and navigation, considering fire control and terrain following radars
07 p1086 A69-19512

Multifunction helicopter rotor blade radar for navigation, IFR approach and fire control, including flight test results
[AHS PAPER 315] 17 p2920 A69-33535

Airborne radar navigation with emphasis on semiautomatic fixing, describing beacon mode, map matching and airborne weather radar
18 p3169 A69-34851

Onboard radar for light interceptor aircraft/Aida II, discussing navigation, low altitude penetration and air to air missile interception
19 p3278 A69-36701

V/STOL aircraft radar inertial navigation system, describing approach and landing phase flight test results
[AAS PAPER 69-401] 24 p4252 A69-42831

RADAR PHOTOGRAPHY

Earth space image interpretation in various spectral regions, discussing effectiveness of photography, spectrophotometry, radar and microwave observations
05 p0763 A69-16054

Remote geoscience sensing using properties of radar return noting scatterometry, imagery, altimetry and penetration measurements
11 p1835 A69-24692

Imaging radar systems for employment on small spacecraft, fabricating small lightweight radar systems packages with integrated circuit techniques
11 p1835 A69-24695

Radar imagery for agricultural land mapping, noting field and crop discrimination and parameters influencing radar return
12 p2097 A69-26986

Integrated landscape analysis with radar imagery for earth resources
15 p2608 A69-30454

Aerial multiband remote sensors for wildland resources, considering multilens photographic systems, optical mechanical scanners and radar devices
15 p2609 A69-30458

Regional slope measurement from two monoscopic radar images of same terrain area, discussing accuracy and applications to geomorphology and hydrology
15 p2610 A69-30710

Side-looking radar and thermal IR photography as mapping system, discussing resolution and distortion
15 p2612 A69-31162

Atmospheric turbulence in cloudless region above thunderstorms and relation between turbulence and radar pictures of storms
15 p2649 A69-31211

Anamorphic holography, discussing optical and nonoptical wavelength processes and generation and reconstruction of holograms for radar applications
17 p2976 A69-34062

Imaging radar study based on optical imaging and electromagnetic wave processes, discussing Doppler signal processing, synthetic aperture radars and microwave holography
20 p3489 A69-37632

Airborne imaging radar motion compensation and sensing problems concerning perturbed signal correction, discussing spatial sensitivity measures and constraints
20 p3490 A69-37645

Atmospheric phenomena effects on terrain imaging radar systems performance, discussing tropospheric turbulence and ionospheric irregularities
20 p3490 A69-37647

Imaging radar applications noting military surveillance, navigation assistance, iceberg detection, sea rescue operations, all-weather traffic surveys, terrain mapping, etc
20 p3491 A69-37649

Radar astronomy, discussing planetary surfaces study techniques, target/signal interactions, planet cross sections, delay and Doppler spectra
20 p3491 A69-37650

Geological radar in regional and detail studies, discussing area side scanning imagery and lithology changes detection
20 p3491 A69-37652

Earth space image interpretation in various spectral regions, discussing effectiveness of photography, spectrophotometry, radar and microwave observations
20 p3545 A69-37964

RADAR RANGE

NT RANGE AND RANGE RATE TRACKING

Radar range height angle charts for plotting earth based radio or radar system vertical plane coverage diagrams
01 p0031 A69-10633

Pseudorandom radar ranger/DIOMEDE/ using optical correlator and phase loop
03 p0393 A69-13254

Millimeter waves in communication navigation and research, discussing radar range resolution and remote sensing
03 p0397 A69-13722

Radar range determination on any target based on parametric method and nomograms in decibels
04 p0560 A69-15227

Slide rule for radar range determination based on Neuvy formula
04 p0560 A69-15230

Threshold signals and optimum signal parameters in radar range and velocity measurements
04 p0560 A69-15403

Range measurement accuracy of radar automatic equipment, discussing nomograms for split-gate tracker, cyclic and pulse length errors and multipath reflections
08 p1275 A69-20228

Range effects on apparent height and frequency biases of radar precipitation echoes determined by regression technique for several stations
18 p3101 A69-34826

Optimal structural parameters of radar digital ranging servosystems derived from reproduction error, including computer simulation data
19 p3278 A69-36593

Radar data optical spatial-domain processor providing azimuth processing in range channels without range compression capability, reviewing coherent optical channels properties
20 p3489 A69-37636

Radar propagation in surface duct over water, describing range distribution estimation procedure
20 p3495 A69-37854

Ultrasonic diffraction delay lines technique to extend radar systems range without affecting target pinpointing capability
24 p4286 A69-42901

RADAR RECEIVERS

High range resolution by pulse to pulse frequency shifting, utilizing existing low resolution equipment by adding signal processing capability to receiver
03 p0388 A69-13181

Optimum gain control for diversity receivers used for radar and digital data transmission through fading media
03 p0410 A69-13833

Coherent moving target indicator radar receiver behavior as function of input situation, using improvement factor
04 p0556 A69-14338

Reflected radar signal random fluctuations suppressed by using antenna, receiving channels and logarithmic amplifiers
04 p0556 A69-14490

Level crossing rate meter correction for boxcar-ed and receiver noise readings in incoherent weather radars
04 p0557 A69-14915

Secondary radar equipment functions and features forming IFF-SIF chain, discussing displacement controller and minor lobe suppression functions technical problems
05 p0721 A69-16591

Receiving system of CENFAM multistation radar project for meteoric and upper atmosphere studies composed of antennas connected to form product-interferometer pairs
07 p1077 A69-18674

Transmit-receive device noise contribution effect on receiving system noise factor for device insertion immediately before low noise microwave amplifier
09 p1469 A69-22605

Radar transmitter and receiver antennas polarization parameters selection for obtaining maximum SNR at reception point
11 p1833 A69-24442

Ideal quantum receiver to detect coherent narrow band optical signal in presence of thermal background radiation, noting error probability
14 p2414 A69-29502

Microwave filter tailored for frequency response in L through S band regions for high range resolution radar receiver
14 p2423 A69-29759

AC ignitor priming of quartz-chlorine gas discharge X band waveguide limiter with fast recovery used as radar receiver protector
15 p2573 A69-30035

Digital receiver of radar signals for performing binary quantization of input data with subsequent processing by digital computer
15 p2563 A69-30136

Pulsed noise sensitivity in radar receivers having noise limiter for simple and complex signals
15 p2563 A69-30137

Pulse radar quantum paramagnetic amplifier protection from saturation by transmitter power, using linear electrical bias of EPR line
15 p2579 A69-30956

Automatic conversion receiver of meteorological radar data, examining reception amplitude sensitivity and frequency characteristics
16 p2791 A69-32280

Optimal radar receivers and waveforms with limited dynamic range for detecting point target masked by thermal noise and clutter returns
17 p2921 A69-33625

Radar target simulator approximating pulse radar receiver output for evaluating amplitude-sensing video target detection devices
17 p2921 A69-33629

Parametric tunable amplifier as prestige for radar receiver, discussing pump frequency and midband gain stabilization
18 p3104 A69-35457

RADAR RECEPTION

Fixed-tuned telemetry receiver as miss distance indicator /MDI/ to provide information in missile performance program 23 p4138 A69-41781

Active weighted pulse compression radar receiver output waveform analysis for amplitude, phase and frequency modulation, noting effects of spectrum weighting mismatch parameter 23 p4132 A69-42548

RADAR RECEPTION

Received radar signal power maximizing problems in planetary exploration, analyzing abelian group real line and circle problems 17 p2993 A69-32831

Pseudorandom code development and possibilities for radar applications, considering signal processing, antenna requirements, radar signal phase modulation, etc 24 p4281 A69-42741

RADAR REFLECTORS

Plane reflector with variable reflection coefficient for electromagnetic centimeter waves, consisting of plane grating of semiconductor diodes mounted in waveguide 03 p0406 A69-13938

RADAR RESOLUTION

Satellite high resolution radar mapping of planets, discussing synthetic aperture and linear FM transmission radar techniques 03 p0430 A69-13399

Distribution free sequential probability ratio procedure for detecting signal in multiple resolution element radar 05 p0717 A69-15609

Book on high resolution radar covering waveform analysis, resolution theory, radar mapping, target detection, etc 08 p1275 A69-20370

Analysis and optimization of side-looking synthetic aperture radars carried out for resolution, SNR and least squares estimation of target field 08 p1277 A69-20960

Angular separation of two point sources measured through expressing antenna resolving power by a posteriori probability laws 08 p1288 A69-20961

Airborne imaging radar motion compensation and sensing problems concerning perturbed signal correction, discussing spatial sensitivity measures and constraints 20 p3490 A69-37645

Monograph on selection of radar echoes from nearly colocated reflection centers, discussing guided missile multiple target resolution 22 p3899 A69-40533

Optimum signals for high resolution radar and communication systems, using transmitter waveform design of autocorrelation and cross correlation functions 23 p4132 A69-42545

RADAR SCANNING

Areas of expectation for single radar automatic tracking of flying objects derived on basis of equation of circle in polar coordinates 01 p0035 A69-11296

Radar method of spiral scanning clouds and precipitation at constant altitude 03 p0459 A69-13286

Electronic scanning radar systems design, discussing beam types, bandwidth, tracking, target acquisition, etc 04 p0556 A69-14301

Hybrid mode Ku-band mixer steering electronic scanning phased array design 04 p0572 A69-14325

Antenna pattern loss factor for determination of average probability of detection vs SNR curves for three dimensional or pencil beam radars 08 p1270 A69-19858

Signal processing method for achievement of very rapid space scanning with antenna array noting application to radar system 10 p1657 A69-23801

Real time electronically scanned radar control using digital computer with input and output conversion for information handling, noting interface equipment 11 p1834 A69-24544

Probability matrix for n order transition independent of decision taking method, applying fundamental matrices to analysis of mean number of false targets 14 p2410 A69-28836

Doppler navigation, explaining radar beam mechanization, Doppler spectrum, scanning noise, spectral compression and tracking 18 p3169 A69-34849

Side-looking radar and IR line scanning as method for simultaneous stereo height mapping, using images produced from same vantage point 20 p3536 A69-36929

Geometrical configuration for synthetic aperture terrain imaging radar scanning system, noting scanning methods in range and azimuth directions 20 p3489 A69-37634

Synthetic aperture radar principles, using periodic pulse modulation to construct terrain imaging radar 20 p3489 A69-37635

Signal spectrum and SNR of synthetic aperture terrain imaging radar using model, including two dimensional signal and Gaussian additive noise 20 p3489 A69-37638

Synthetic aperture terrain imaging radar system optimal design, considering noise-free and random noise conditions using least squares method and signal to noise ratios 20 p3489 A69-37639

RADAR SCATTERING

Tracking radar glint analysis model using diffraction theory to evaluate parameters of fields received from scattering centers on target aircraft 01 p0033 A69-11007

Specific effective scattering area on lunar surface using Luna 13 signals from Oceanus Procellarum measured with radar employing antenna with narrow radiation pattern 01 p0158 A69-11312

Backscattering diagram of Venus at 40 cm determined from Doppler spectrum and reflected signals range energy distribution 02 p0314 A69-11639

High power radar for investigating ionosphere by incoherent scatter technique 03 p0398 A69-13768

Correspondence between HF radar backscatter, optical aurora and electron precipitation, noting application to gross tracking of auroral oval 06 p0918 A69-17383

Radar scattering cross section of finite perfectly conducting wedge for case of illumination by polarized plane wave 08 p1274 A69-20047

Disturbed index of refraction scattering cross sections and aircraft acceleration increments for clear air turbulence, deriving correlation for measurements 10 p1656 A69-23651

Reversible ion heating by atmospheric tides, noting radar Thomson scatter observations of E region ion temperature height profiles 11 p1879 A69-25159

Radar backscatter and rocket profiles of ionospheric electron temperature, noting agreement in daytime flight measurements 11 p1951 A69-25162

Data analysis techniques for discrimination and identification of terrain surfaces from radar scatterometry information 12 p2099 A69-27010

Scattering characteristics of planet Venus at 3.8 cm wavelength, discussing frequency power spectra and radar cross section 13 p2349 A69-27818

Incoherent scatter observations of ionosphere, discussing radar equipment and measurement of electron density and temperature, ionic temperature and composition, etc 14 p2415 A69-29522

Radar backscatter analysis for Arctic ice identification, deriving ice surface roughness factors from Kirchhoff-Huygens principle 14 p2416 A69-29530

Radar Thomson scatter from nonthermal steady state level of plasma waves in ionosphere measured, studying role of angle between wave vector and magnetic field 16 p2818 A69-31678

NonMaxwellian electron velocity distribution influence on ionospheric measurements by Thompson scattering, explaining disagreement between scattering and probe measurements of electron temperature 16 p2788 A69-32647

HF radar scattering by finite circular cone as function of frequency and aspect angle using modified diffraction pattern theory 20 p3495 A69-37849

Modified geometrical diffraction theory applied to determination of vertically polarized radar backscattering from rear of cylinders and frustums 20 p3495 A69-37851

RADAR SIGNATURES

Simulation and display for radar ground-backscatter signatures by computer ray tracing, using model ionosphere containing realistic traveling disturbances 21 p3717 A69-39280

Satellite rotation from radar data analysis, requiring two full rotations and body characteristics to produce distinctive lobes in radar cross section 22 p3900 A69-40682

RADAR TARGETS

Tracking radar glint analysis model using diffraction theory to evaluate parameters of fields received from scattering centers on target aircraft 01 p0033 A69-11007

Radar target amplitude, angle and Doppler scintillation from analysis of echo signal propagation in space 02 p0211 A69-12447

Moving window radar detector design for moving targets, giving chart for SNR derivation to obtain given detection probability 04 p0558 A69-15073

Radar range determination on any target based on parametric method and nomograms in decibels 04 p0560 A69-15227

Weighted pulse trains for clutter suppression during radar target detection 04 p0562 A69-15467

Multiple target monopulse radar signal processing technique 04 p0562 A69-15470

Electronically scanned X band array used as receiving antenna for target recognition radar 04 p0562 A69-15476

Statistical analysis of Radiorcord /radar digitizing and recording/ clutter and signal spectra and moving target detection by pulse radar 05 p0721 A69-16619

Radar target detection and angular location estimation in amplitude comparison monopulse radar by simultaneous observation with group of antennas 09 p1452 A69-21312

Alphanumeric characters to identify radar targets on PPI display for air traffic control, considering technique for reducing smear 09 p1495 A69-21675

Digital signal tracking module operation and stability, considering use of interconnecting modules to achieve adaptive tracking 09 p1459 A69-22477

Digital simulation optimizing parameters of digital equipment to measure target azimuths in pulsed surveillance radar system, establishing optimum echo pulse quantization threshold 15 p2563 A69-30138

Airborne Doppler radar, estimating velocity distribution and density of pulse signals reflected from air and ground targets 15 p2567 A69-30349

Frequency agility techniques applied to target detection in noncoherent pulsed radar systems 17 p2917 A69-32919

Radar target simulator approximating pulse radar receiver output for evaluating amplitude-sensing video target detection devices 17 p2921 A69-33629

Pulse-to-pulse carrier frequency stability of microwave radar transmitter tube for fixed target suppression 20 p3485 A69-36943

Ambiguity function interaction with target scattering function in range-Doppler radar, discussing matched filtering application 20 p3490 A69-37641

Terrain radar returns emphasizing surface roughness influence in man-made target backscattering, determining radar cross section with radar range equation 20 p3490 A69-37646

Range-Doppler data processing of radar echoes from spread targets, considering quadratic filter theory, emphasizing received signal correlation functions 20 p3490 A69-37648

Doppler radar based on triple pulse transmission at coherent frequencies, comparing echo pulses for targets cancellation and extraction 21 p3672 A69-38436

Compound fading exponential /CFE/ clutter model for radar target detection, describing automatic detection applications 23 p4117 A69-41604

Radar return from clutter target with circular polarization, finding probability density functions and cumulative distributions of power ratio 23 p4131 A69-42540

Ultrasonic diffraction delay lines technique to extend radar systems range without affecting target pinpointing capability
24 p4286 A69-42901

RADAR TRACKING

Radar observation of Icarus at time of close approach, giving values of radius, rotation period and Doppler shift derived from spectrograms
02 p0323 A69-12300

Space surveillance radar system sensor misassociation of one space object for another, noting applicability to sonar and optical sensors
02 p0210 A69-12388

Errors in wind data due to wind response of parachute-borne sensor corrected with radar tracking, comparing corrected and uncorrected data
02 p0276 A69-12700

Automated real time monoradar surveillance system based on azimuthal monotonicity of radar plots and flexible tracking strategies
03 p0383 A69-12872

Delay line bandwidth reduction for video or digital information, noting radar tracking application
03 p0392 A69-13251

HAPDAR-TACOL phased array radar design, discussing array patterns and multitarget tracking performance
04 p0556 A69-14324

Sporadic background separation from radar observations of meteor showers, using echo range distribution, head echoes and antenna direction change
04 p0659 A69-15035

Wind turbulence measurement by shock wave tracking using Doppler radar, stressing relative location of antenna and sound source
04 p0628 A69-15149

Conversion of range telemetry systems /CORTS/ program noting installations and standardization
05 p0743 A69-16306

Correspondence between HF radar backscatter, optical aurora and electron precipitation, noting application to gross tracking of auroral oval
06 p0918 A69-17383

Aircraft nose-mounted radome refraction errors influence on directional tracking and navigation, considering fire control and terrain following radars
07 p1086 A69-19512

Signal processors for implementation of monopulse tracking radar with three instead of four beams, investigating accuracy
08 p1270 A69-19855

Anti-interference TV circuit using delay lines applied to radar systems, discussing false alarm probability and detection probabilities
08 p1271 A69-19919

Experimental circuit for simulating radar target tracking system based on split range gating, noting tracking role of error signal
08 p1300 A69-20109

Simultaneous photographic and radar observations of meteors, determining absolute stellar magnitude of meteor as function of parameters
08 p1390 A69-20337

Venus research, discussing Mariner 5 and Venera 4 data, radar tracking, orbit, diameter, gravity, density distribution, etc
08 p1391 A69-20456

Angel type radar echoes from coherent pulses in centimeter and decimeter wavelengths characterized by daytime convection and presence of inversion/ isothermal layers
09 p1491 A69-22706

Aircraft safety hazards due to birds, discussing radar role in plotting bird migrations
11 p1837 A69-25247

Kalman sequential estimation adaptation to target maneuvers without sacrificing tracking accuracy in nonmaneuvering portions of trajectory
11 p1861 A69-25455

Phased array radar system for UHF detection, identification and tracking of orbiting objects and ballistic missiles, noting system design and hardware
12 p2028 A69-25906

Radar application to meteorology, entomology and ornithology, discussing clear air turbulence detection and flight tracking of birds and insects
12 p2034 A69-27004

Secor 6 satellite /1966-51A/ orbital parameters determined from optical and radar observations noting use for upper atmosphere density and rotational speed studies
14 p2522 A69-29631

Moving targets trajectories determination from radar data, using posteriori probability distribution represented by Markov chain
15 p2566 A69-30334

Target trajectories determination based on radar data with allowance for association between neighboring readings, using statistical characteristics obtained with Markov chains
15 p2566 A69-30335

Airborne Doppler radar, estimating velocity distribution and density of pulse signals reflected from air and ground targets
15 p2567 A69-30349

Systematic error pattern in raw data obtained during tracking ROSE balloons by two radar systems, estimating range resolver error
15 p2649 A69-30897

Doppler tracking data from Lunar Orbiter missions for studying lunar gravity anomalies, plotting acceleration on lunar surface Mercator projection
15 p2697 A69-31313

Angle nature from backscattering patterns at radar station with one transmitting and two receiving antennas
16 p2779 A69-32275

Angel sources rate of motion observed at automatic tracking coherent pulse station, obtaining coincidence with wind and insect velocities
16 p2779 A69-32276

Angel type radar echoes from coherent pulses in centimeter and decimeter wavelengths characterized by daytime convection and presence of inversion/ isothermal layers
16 p2753 A69-32486

Meteor trails radar observations to measure zonal wind profiles between 80-110 km, noting short period oscillations
16 p2865 A69-32609

Centrifugation effects on body composition and growth of mice
17 p2910 A69-33746

Meteor trail drift radar observations in Kharkov, giving wind velocity diurnal and seasonal variations
17 p3041 A69-33897

Radar unit for network component /wind patrol/ in statistical observations of wind drift conditions in meteor trails
17 p2939 A69-33901

Automatic radar station for meteor observations, discussing separate transmitting and receiving antennas directive gain and radio echo power
17 p2939 A69-33902

Associative processor applied to interceptor radar system, noting processing time independence from target number and compatibility with real time systems
17 p2931 A69-34071

Doppler navigation, explaining radar beam mechanization, Doppler spectrum, scanning noise, spectral compression and tracking
18 p3169 A69-34849

Satellite observation data association, estimating consistency of radar object with orbiting prediction, using computer program including Monte Carlo run
18 p3103 A69-35098

Book on statistical communication and applications to radio and radar systems technology to provide guidelines for design decisions
19 p3267 A69-35900

Meteor radio electronics principles, methods and equipment, discussing ionized meteor trail formation, radar tracking and utilization of trails for communications
19 p3277 A69-36591

Radar design for target detection, tracking and identification, modeling plasma effects on radar cross section of reentry vehicles based on wave-plasma interactions
20 p3485 A69-36925

Satellite configurations and rotation parameters determined by radar analysis
20 p3488 A69-37295

Near-polar circular orbiting satellite for calibrating and evaluating ground-based radars observing space objects
20 p3617 A69-37714

ATC medium range radar /SRE-LL1/, describing reflectors positions, information rate, installation, antenna parameters, etc
20 p3496 A69-37932

Navigational accuracy of two way Doppler tracking of interplanetary spacecraft during heliocentric and planetary encounter trajectory phases
21 p3761 A69-39334

Strapped down phased array radar tracker mechanization with digital loop closure electronics for homing missiles, noting cost advantages
[AIAA PAPER 69-873] 21 p3763 A69-39399

Monopulse telemetry tracking system, describing equipment and mobile operation
22 p3900 A69-40681

Assignment algorithm for target recognition in multiradar tracking systems
22 p3902 A69-41250

Qualitative model of atmospheric mass circulation constructed from radar meteor trail drift observations, considering solar thermal radiation and zonal wind direction
23 p4214 A69-41862

Optimal allocation of pulses for array radar tracking large number of targets simultaneously, using discrete time maximum algorithm
24 p4283 A69-43311

RADAR TRANSMISSION

Reduction of ATR switch pulse peak in automatic frequency control system of radar station
01 p0047 A69-10784

Radar FM signal design with zigzag frequency variation, discussing relation between waveform characteristics and associated ambiguity function features
01 p0033 A69-11001

Digital processing of Doppler radar signals using matched filter concept
03 p0393 A69-13291

Continuous wave and pulsed IR signals amplification on carbon dioxide laser amplifiers, discussing design, construction and performance of transmitter
[IEEE PAPER J-1] 07 p1152 A69-19064

Long term weather and radar transmission effects on three ply fabric cloth fire-retardant polyester resin radome panel
08 p1414 A69-20485

Reduction of ATR switch pulse peak in automatic frequency control system of radar station
10 p1661 A69-23113

Radar signal cross correlation function calculation with reference function, applying acousto-optical modulator
10 p1694 A69-23539

Optical correlator for radar signal processing based on filtering first order diffracted light and integration on photomultiplier
12 p2028 A69-25911

Complex pulsed radar signals synthesis with uncertainty function having principal maximum and small secondary maxima for radar stations and wideband communications systems
15 p2563 A69-30140

Long distance FM radar signal relating to central station image processing, showing wideband sum signal especially suitable for transmission
16 p2750 A69-31862

Transmitting antenna design of multistation radar system for meteors and upper atmosphere investigation, discussing amplitude and phase of electromagnetic field
19 p3278 A69-36661

Optimal radar phase modulated waveform with optimal ambiguity function synthesized by solving variational equations for orthogonal series coefficients of expanded modulation
20 p3492 A69-37708

Radar signal design, considering ambiguity and modulation functions, envelope surfaces, coding conditions, etc
20 p3496 A69-37904

RADAR TRANSMITTERS

Pulse-to-pulse carrier frequency stability of microwave radar transmitter tube for fixed target suppression
20 p3485 A69-36943

RADARSCOPES

NT PLAN POSITION INDICATORS

Mathematical model of radar display, considering radar construction tube resolution, environment and eye perception parameters.
07 p1136 A69-19504

Cockpit TV-radar for providing pilots with navigation, weather and traffic data, discussing safety factors and radar picture transmission quality
[SAE PAPER 690327] 11 p1833 A69-24506

RADIAL DISTRIBUTION

Electron radial distribution determination in positive Hg plasma column using simultaneous measurements with two different microwave cavities
02 p0290 A69-12404

Radial diffusion coefficient for trapped electrons moving across field lines, obtaining time dependent solutions of Fokker-Planck equation
03 p0502 A69-14002

Horizontal and vertical downward velocity components in developed solar active regions
04 p0651 A69-14370

Radial profile measurement technique for individual emission line intensities in plasma applied to populations of excited atomic and ionic Ar in capillary discharges
04 p0634 A69-14441

Radial temperature profile in induction coupled argon plasmas at low and atmospheric pressures
06 p0964 A69-17193

Radial distribution of azimuthally averaged temperature and amplitude vacillation characteristics in rotating differentially heated fluid annulus determined by multiprobe technique
07 p1126 A69-19040

Radial distribution of H II regions in spiral galaxies, noting peak at 1/4 distance from center
08 p1384 A69-20052

Electron temperature and electron density variations with radial distance in 10 MHz electrodeless ring discharge in H, noting electric field
08 p1361 A69-20230

Ar-H plasma arc radial temperature distribution determined by photoelectric spectroscopy in visible range
08 p1366 A69-20758

Kaufman thruster with predominant radial field, noting electron mobility across ion extraction screen and advantages of uniform plasma distribution [AIAA PAPER 69-259]
09 p1569 A69-21877

Fundamental solutions of initial value problems related to Euler-Poisson-Darboux equation generalized for radially symmetric case, developing convolution integrals
09 p1533 A69-22796

Rotating plasma behavior in magnetic mirror trap, using radial electric field
10 p1740 A69-23716

Radial distribution profiles of charge carriers in low temperature gas discharge plasma accounted for in terms of volume recombination
11 p1925 A69-24330

Electrical conductivity radial distribution in plasma flux from changes in Q factor and circuit inductance in presence and absence of skin effect
11 p1928 A69-25221

Numerical solution to partial differential equations describing helical discharge in Ar with gas injection, discussing initial temperature distribution and radial distribution effects
12 p2141 A69-27131

Velocity, enthalpy and mass flux radial distributions in laminar boundary layer from calorimetry of argon subsonic flow [ASME PAPER 68-HT-6]
13 p2374 A69-27776

Nonreacting turbulent far wake problems, discussing centerline decay of viscosity models, similarity profiles and radial distributions at various Mach numbers
13 p2200 A69-28500

Radial velocities of planetary nebulae in Magellanic Clouds and Galaxy, discussing Population I and II kinematics
14 p2520 A69-29377

Radial distribution functions for dense hydrogenous plasma near ionization temperature by solving Percus-Yevick equations
14 p2502 A69-29998

Numerical analysis of charged particles radial distribution in radiation belts extended to geomagnetic tail for low energy auroral electrons
16 p2850 A69-32102

Cosmic ray shower axis mean logarithmic distance from apparatus calculated by transforming shower recording frequency radial distribution to lin-log coordinate system
17 p3024 A69-33581

Radial oscillation periods of Hamada-Salpeter white dwarf models graphically compared with models by Harrison-Wheeler Wakano equation of state
17 p3037 A69-33642

Electron intensities in Starfish belt /1963- 1965/, discussing radial diffusion loss mechanism and pitch-angle diffusion
18 p3187 A69-34945

Interplanetary proton and alpha particle radial gradients determined from Mariner data, considering Forbush decrease, particle solar origin, galactic cosmic radiation, etc
20 p3592 A69-38096

Radial pressure distribution in steady state rotationally symmetrical plasma jet subjected to axial magnetic field, emphasizing mass entrainment effect [DGLR-69-024A]
23 p4202 A69-41924

RADIAL FLOW

Magnetic knots /intergranular space strong small scale magnetic fields near sunspot/, longitudinal and transversal fields and radial velocities
07 p1217 A69-19244

Compressibility parameters role in pressure distribution derived for radial laminar compressible fluid flow between two disks
07 p1121 A69-19321

Off design performance prediction method for radial inflow turbines compared with experimental results for small turbine and Brayton space power plant
10 p1754 A69-23891

Radial liquid flow between flat annular rings /face seals/, discussing film cavitation
13 p2267 A69-27365

Arc plasma jets radial velocity profiles measured by two probes in cyclic movement between jet edge and middle, including error estimation
13 p2307 A69-27611

Azimuthal electric currents generation by Coriolis forces in hot stars with intensive radial flows in convective zones
13 p2350 A69-27862

Stationary radial source flow of liquid particles into vacuum, discussing boundary value problem equations, parameters effects on flow structure and flow field characteristics
13 p2248 A69-28210

Supersonic radial flow compressor producing flow with meridional component exceeding velocity of sound
17 p2889 A69-32992

Similarity solutions of viscous transonic equation describing spiral and radial flows, containing shock-like transitions of corresponding inviscid solutions
18 p3121 A69-34787

Turbocompressors, reviewing axial and radial compressors
19 p3395 A69-36749

Heat transfer in radial flow between two parallel plates, calculating Nusselt number for laminar and turbulent flows
20 p3633 A69-38176

Magnetic field and radial gas motion in sunspots from Crimean magnetograph observations at different depths of solar atmosphere
20 p3615 A69-38299

Flow field induced by spiral vortex sheet, noting existence of radial velocity component
21 p3692 A69-38610

Laminar boundary layer on funnel wall, considering internal vortical and radial flow
21 p3692 A69-38611

Gas flow characteristics in shrouded and unshrouded turbine wheel assemblies, emphasizing radial flow role in efficiency
21 p3785 A69-38865

Omicron Andromedae radial velocity measurements /1961-1966/ during normal B star periods
22 p4028 A69-40755

Pressure distribution in gas lubrication layer of infinite radial sliding bearings, approximating differential equation by simple formulas
23 p4168 A69-41412

RADIANCE

Outer solar coronal IR radiance measured by ground telescope and stratosphere balloon flight, noting interplanetary dust thermal emission
09 p1600 A69-22205

Statistical properties of spatial radiance distribution of sky and forest backgrounds in IR, noting one dimensional Wiener spectra
12 p2131 A69-27072

Mathematical model for determining time dependent terrain surface temperatures and radiances, considering radiative transfer convection, evaporation, ground vegetation temperature, etc [AIAA PAPER 69-592]
17 p3071 A69-33263

Superradiance and recombination radiation from CdTe with high compensation, using model assuming narrowing from superradiance onset for analysis
19 p3389 A69-36550

RADIANT COOLING

Long wave radiative water vapor cooling in troposphere determined by numerical prediction model, including vertical distribution of cloud and moisture effects
07 p1175 A69-18896

Radiative cooling layer behind shock front from neutral interstellar hydrogen cloud collision at Mach 20, discussing molecular hydrogen abundance during cooling
08 p1381 A69-19796

Semiempirical relation for electron cooling modified by plasma heating of thermionic converters, including effects of plasma density, diode spacing and surface potential difference
09 p1440 A69-21831

Phase equilibrium and dynamics of gas volume heated by cosmic rays and cooled by radiation
10 p1760 A69-23136

Radiative cooling rates of bounded plasma of hydrogen isotopes, comparing dense deuterium plasma analytical results with brightness measurement
11 p1927 A69-25218

Thermosphere radiative cooling by atomic O 62 micron line, noting cooling and heating rates
12 p3084 A69-26009

Nongray absorption and radiation cooling on smooth symmetric blunt bodies included in modified Maslen flow field method for radiation and large blowing [AIAA PAPER 69-637]
17 p2891 A69-33290

Heat pipe devices applied to radiative body heat transfer in space suit temperature control [AIAA PAPER 69-619]
17 p2914 A69-33293

Radiative and conductive heat transfer in heated finite gaseous body with emphasis on collisional and radiative relaxation, noting cooling as two stage process [AIAA PAPER 69-638]
17 p3073 A69-33311

Radiative energy emission by blunt vehicle shock layer under severe entry conditions, discussing flow properties and radiative transfer coupling [AIAA PAPER 69-719]
18 p3084 A69-34416

Radiation cooling behind strong shock in Kr as function of plasma luminosity near end of relaxation zone
18 p3171 A69-34450

Materials integral hemispheric radiative capacity determination based on cooling rate of thin walled specimen in vacuum, considering stainless steel, Ni and Cu
18 p3156 A69-34698

Long wave radiation influx toward atmospheric layers generated naturally by clouds, discussing radiation cooling of atmosphere in cloudy and clear weather
21 p3758 A69-39112

Ionization equilibrium and radiative cooling of high temperature low density plasma, noting cosmic gas cooling curve of line emission from oxygen ion transitions
24 p4376 A69-42661

Radiative cooling models for various midlatitude synoptic features, including stationary front and cyclones
24 p4343 A69-43064

RADIANT ENERGY

U RADIATION

RADIANT FLUX DENSITY

NT ELECTRON FLUX DENSITY

NT ILLUMINANCE

NT IRRADIANCE

NT LUMENS

NT LUMINANCE

NT LUMINOUS INTENSITY

NT NEUTRON FLUX DENSITY

NT PARTICLE FLUX DENSITY

NT PROTON FLUX DENSITY

NT RADIANCE

NT SOLAR CONSTANT

NT SOLAR FLUX DENSITY

Energetic X ray intensities from large and small Magellanic clouds investigated by balloon flight sky survey, noting energy flux upper limits
01 p0150 A69-10370

Ultrashort light pulses in lasers with nonlinear absorber, evaluating random intensity peak probability created by intensity fluctuations and axial modes buildup
01 p0090 A69-10791

13-day cycle variation in cosmic radiation intensity confirmed by Vercelli method, giving values of amplitudes and correlation coefficients among variations
01 p0145 A69-11031

Surface radiation balance measurements in India during IQSY, discussing diurnal, seasonal and spatial variations of net radiation
02 p0307 A69-11820

Ruby laser limiting gain, stimulated emission loss, noise loss and spectral distribution determined by radiation intensity, pumping power and mirror reflection
02 p0256 A69-12000

- Solar continuum intensity determination in middle IR, obtaining solar disk center brightness temperature measurement by comparison with black body model
02 p0318 A69-12041
- Thermoelectric radiometer for transient radiant flux short duration pulse measurement, using thermally induced depolarization of polymer film dielectric [AIAA PAPER 68-403]
02 p0250 A69-12392
- Retinal burns from intense light sources using rabbit eyes as function of irradiation rate, exposure time and image size
02 p0204 A69-12496
- Microcalorimetric measurement of radiation flux of flames of condensed burning material, noting surface temperature distribution
02 p0355 A69-12671
- Soft X ray spectrum of Sco XR-1, noting intensity change from previous measurement
02 p0309 A69-12711
- Free excited H atom Lyman alpha radiation intensity study using beam-foil excitation method
03 p0471 A69-13167
- Mean atmospheric downward radiation fluxes for large territories, using simple model atmospheres in derivation of computational formulas
03 p0422 A69-13410
- Bolide fireball radiation maximum efficiency from observed spectra, using monochromatic radiation efficiency data for rarefied atoms and ions in meteor comas
03 p0512 A69-13692
- Directional intensity of radiation emerging from top and bottom of Rayleigh scattering atmosphere
03 p0426 A69-14026
- High temperature air plasma total radiant intensity measurements in shock tube
04 p0685 A69-14719
- Photographs of intensity of radio emission in millimeter band, using luminophor based on ZnS and CdS
04 p0560 A69-15272
- Radiative flux density, spectrum and temporal behavior of Q switched laser induced underwater sparks
05 p0771 A69-15818
- Radiation intensity distribution from first negative and positive nitrogen system in equilibrium gas flow behind propagating shock front, discussing kinetics mechanism and electronic states
05 p0745 A69-15890
- Meteorological rocket measurement of corpuscular radiation intensity in upper atmosphere at various latitudes
05 p0814 A69-16052
- Jupiter microwave radiation flux density at 81 MHz, noting spectrum of microwave emission
05 p0827 A69-16506
- Arc cloud thermal conductivity effects on discharge temperature and radiation intensity, solving energy balance equation
06 p0964 A69-17254
- Primary cosmic ray intensity variation with cut-off energy of particular secondary component, using ground based monitors
06 p0925 A69-17295
- Large area scintillation telescopes with cubic geometry, measuring cosmic rays intensity from vertical and slant directions
06 p0925 A69-17296
- Isotropic background cosmic X ray flux measurements using low latitude balloon to minimize atmospheric background, obtaining hard solar X ray flux upper limits
06 p0992 A69-17311
- X ray sources intensity and spectrum variation with time, describing proposed balloon experiments with equatorial launching for performing measurements
06 p0992 A69-17312
- Flux density spectral dependence disagreement with power law for synchronous radiation mechanism for radio sources in 12.6 to 25 MHz interval
06 p1004 A69-17538
- Pulse intensity variations in pulsars observed at 113 MHz with parabolic antenna using photographic recording techniques, noting lack of periodicities
06 p1009 A69-17964
- Radiation measurements inside Apollo 4 and 6 command modules during passage through trapped radiation belts [AIAA PAPER 69-17]
06 p0884 A69-18202
- Shock tube measurements of radiation from simulated Jupiter atmosphere related to thermodynamic conditions encountered by entry probe [AIAA PAPER 69-184]
06 p0908 A69-18207
- Statistical study of solar radio flux fluctuations incidence, observing absorption and polarization effects
07 p1215 A69-18819
- Spectra and flux densities of cm wavelength radio sources
07 p1218 A69-19256
- Background radiation intensity upper limits for mm and submillimeter wavelengths in interstellar medium, noting intense flux in far IR
07 p1221 A69-19404
- Radio source counts log N-log S diagram slope uncertainty due to finite source number, discussing statistical analysis methods accuracy
08 p1383 A69-20048
- Temperature profile calculations for high pressure electric arcs using diffusion approximation for radiant flux density, taking energy transfer into account
08 p1420 A69-20148
- Power radiated by oscillating magnetic and electric dipoles in cold streaming plasma calculated by Poynting vector method
09 p1544 A69-21329
- Flux density variability and component age of radio sources at frequency of 5769 MHz measured by radio telescope
09 p1588 A69-21361
- Geomagnetic field irregular pulsations relationship with polar aurora and ULF radiation pulsations, stressing choruses appearance
09 p1485 A69-21536
- Cosmic ray intensity temperature dependence in stratosphere and anisotropy in interplanetary space determined from measurements over Arctic and Antarctic regions
09 p1575 A69-21542
- Cosmic ray intensity diurnal variations from super neutron monitor observations, discussing anisotropy resulting from reduced intensity in gardenhose direction in ecliptic plane
09 p1576 A69-21706
- Radiant flux reflected by mirror and incident on receiver for paraboloidal solar devices, obtaining heat loads and radiant energy formulas
09 p1436 A69-21803
- Circular central shading effect on energy distribution parameters of paraboloidal mirrors, noting reflected radiant flux power limitation
09 p1436 A69-21804
- Impurity concentrations in expansion tube flow, measuring radiation intensities [AIAA PAPER 68-371]
09 p1477 A69-21961
- Impulsive solar microwave bursts observed by parabolic reflector, obtaining bursts spectra and total flux density
09 p1579 A69-22178
- Weak X ray sources at 20-100 KeV photon energies observed during balloon flight, finding hard rays from Ara XR-1 and Nor XR-1
09 p1583 A69-22763
- Spectrum of high energy X ray flux from Sco XR-1 during balloon flight using active collimator detector and graded shield detector
09 p1584 A69-22766
- Solar activity influence on cosmic ray intensity 11 year variation, taking into account heliolatitudinal movement of sunspot regions in solar cycle as evidence of density gradient
10 p1754 A69-22802
- Neutrino groups generation in internal regions of sun, analyzing flux ambiguities due to error of cross section parameter of nuclear reactions
10 p1757 A69-22827
- Cosmic ray anisotropy and diurnal density variation, analyzing influence of interplanetary magnetic field and subsonic solar wind
10 p1757 A69-22828
- Galactic and solar cosmic ray modulation in interplanetary space during different phases of 11 year solar activity cycle
10 p1758 A69-22833
- Cosmic ray intensity variations by spectrographic method, noting geomagnetic effects
10 p1759 A69-22836
- Solar activity and 19 to 24 day variations in cosmic ray intensity
10 p1759 A69-22843
- Flux density and spectra measurements at 5 GHz for extraterrestrial and other discrete radio sources, noting spectral indices
10 p1773 A69-22958
- Relative band intensities of atmospheric and IR atmospheric systems of molecular oxygen compared with Franck-Condon factor calculations
10 p1681 A69-23163
- Two photon photoelectron counting statistics and intensity fluctuations of incident radiation compared with single photon detectors and applied to laser outputs
10 p1704 A69-23658
- Low energy cosmic ray intensity increase on July 7, 1966 registered with high latitude neutron monitors
10 p1766 A69-23762
- Secondary corpuscular stream effect on diurnal variations in cosmic ray intensity obtained from statistical analysis
10 p1769 A69-23904
- Interplanetary magnetic field sectoral structure effect on diurnal cosmic ray intensity and geomagnetic field, noting field direction influence
10 p1769 A69-23905
- High altitude balloon measurements of secondary gamma quanta intensity vertical distribution, using scintillation counter with CsI/Tl crystal
10 p1770 A69-23924
- Radio brightness map at 22.25 MHz of galactic plane including H II regions IC 1805 and IC 1848, discussing LF absorption
10 p1787 A69-24115
- Spectral lines relative intensities for bright medium excitation gaseous planetary nebula IC 3568, using photoelectric spectrum scanner and spectrophotometry technique
10 p1787 A69-24117
- Radio sources log N-log S diagram, red shifts and luminosity functions in zero cosmological constant and Lemaitre type Friedmann universes
10 p1789 A69-24134
- Nitrogen plasma total radiation intensity under pressure and at high temperatures calculated from radiation spectrum
11 p1922 A69-24231
- Mean absolute solar spectrum energy distribution from 1800 A to 4 mm, noting solar constant and radiation intensity determination
11 p1951 A69-24242
- Quasars time dependent flux density variations at 6.6 cm, noting spectrum peaks tendency toward lower frequencies with time
11 p1954 A69-24382
- Flux density of quasars 3C 270 and 3C 278 at 40 cm determined by digital computer with point source program
11 p1954 A69-24383
- Brightness temperatures and spectra of Venus, Mars, Jupiter and moon measured from 8 to 14 microns by reflector and prismatic spectrometer
11 p1956 A69-24395
- Specific level role in emission of optical radiation by ruby laser stimulated calcium fluoride crystals doped with divalent Dy ions
11 p1894 A69-24618
- Brightness temperature distributions from intensity interferometric measurements reconstructed by computation
11 p1888 A69-25256
- Calculated UV spectra of solar radiation reflected from atmosphere compared with satellites photometric measurements, attributing radiation intensity distribution asymmetries to seasonal dependence of ozone content
12 p2064 A69-25952
- Auroral zone X ray pulsations during great geomagnetic disturbance and auroral electrojet development to maximum phase, noting atmospheric feedback modulation
12 p2065 A69-26109
- Primary cosmic ray energy spectrum studies during 11-year cycle based on changes in intensity at various altitudes
12 p2149 A69-26682
- Cosmic radiation recorder designed for use onboard satellite to measure intensity space-time distribution under geomagnetic effect
12 p2094 A69-26697
- Radio galaxies luminosities distribution and spectral indices, galactic structures and diameters, considering relations between radio emission parameters
12 p2165 A69-27031
- Absolute radio luminosity relation to surface brightness of extragalactic radio sources, finding volume radiation coefficient of spiral and radio galaxies
12 p2166 A69-27035
- Quasars intensity variations at various cm wavelengths confirming wavelength dependence
12 p2167 A69-27045
- Extragalactic radio sources, discussing brightness distribution measurements and radio star scintillations
12 p2168 A69-27053

Variable radio sources observation at 9.55 mm wavelength, discussing flux density and electron cloud expansion

13 p2334 A69-27309

IR observations of ETA Carinae to 20 microns, noting continued increase in flux density into IR

13 p2335 A69-27316

Exterior field equations for radiating spheres with zero limb darkening in relativity and Bondi coordinates, determining radiative flux and pressures

13 p2339 A69-27566

Structure and thermometry of solar interior from measuring neutrino fluxes intensities emitted by unit mass

13 p2333 A69-28434

Diurnal variation of cosmic ray muon intensity near geomagnetic equator and primary anisotropy monitored by cubical counter telescope

14 p2512 A69-28966

Cosmic ray intensity preceding Forbush effects as function of chromospheric flares solar longitude and solar wind velocity

14 p2512 A69-29044

Frequency distribution of sudden cosmic ray intensity increases, considering Forbush phenomenon

14 p2514 A69-29773

Cosmic ray intensity during solar cycles, considering minima relationship to Bartel index maxima and solar wind modulation theory

14 p2515 A69-29967

Cosmic ray intensity underground measurements, discussing solar modulation processes, sidereal day variations and interplanetary magnetic field influence

15 p2673 A69-30013

Crab Nebula lunar occultation observed by Cassegrain array of deep space communication facility, finding radio brightness distribution similar to optical

15 p2687 A69-30539

Solar neutrino fluxes sensitivity to localized changes in opacity and equation of state, discussing solar models

15 p2675 A69-30768

Global multielement radio interferometer with autonomous reception synthesized for studying spatial radio brightness distribution over radiation sources

15 p2578 A69-30936

Radio interferometer with independent heterodynes to obtain radio brightness distribution over source by varying antenna spacing and reception frequency

15 p2578 A69-30937

Flux densities at 2695 MHz for radio sources, tabulating measured data, discussing spectral distribution indices

15 p2696 A69-31206

Corpuscular radiation intensity during geomagnetic disturbances measured during rocket flights at 50-100 km, discussing effects on lower ionospheric radio absorption

15 p2677 A69-31327

Discrete radio sources interferometer observations using trans-Pacific baseline, noting spectra and radiation intensity variations

15 p2701 A69-31530

Thick gas model for monochromatic one dimensional radiant flux near diffusely emitting and reflecting boundaries, discussing gray gas and exponential kernel approximations

16 p2769 A69-31871

Explorer 33 and Explorer 35 observations of solar flare of 8 July 1969 soft X rays, discussing absolute flux

16 p2849 A69-31988

Radio sources spectral flux densities at 22 MHz, considering ionospheric conditions, calibration and reduction

16 p2860 A69-32231

Geomagnetic field irregular pulsations relationship with polar aurora and ULF radiation pulsations, stressing choruses appearance

16 p2783 A69-32531

Cosmic ray intensity temperature dependence in stratosphere and anisotropy in interplanetary space determined from measurements over Arctic and Antarctic regions

16 p2851 A69-32537

Ozone and temperature profiles influence on atmospheric radiation intensities measurement by satellite in five spectral regions, noting pressure broadening effect

16 p2786 A69-32633

Reradiation and multiple reflection effects on radiant flux density distribution in cylindrical receivers of solar power installations

16 p2741 A69-32799

Line width and intensity correlation of laser radiation noting damping constant

17 p2980 A69-33012

Slowly varying component of solar radio emission /S component/, correlating 35 GHz S component flux and corresponding phase, discussing magnetic fields and electron density

17 p3030 A69-33056

Cosmic X rays diffused component absolute intensity measurement using rotating collimator borne on sounding rocket, noting flat spectrum and Sco X-1 intensity variation

17 p3023 A69-33068

Stellar photometric data for various photocathode materials used to calculate radiant energy falling on earth

17 p2973 A69-33092

RF high pressure plasma discharges contained within radial inflow vortex, measuring radiation efficiencies, power densities and radiation fluxes [AIAA PAPER 69-695]

17 p3010 A69-33442

Red dwarf star YZ CMi corona structure showing possible estimation of additional carried energy by shock waves after flare

17 p3043 A69-34166

Cosmic ray intensity short term stochastic variations in solar system related to turbulent solar wind day-to-day variations

18 p3186 A69-34300

Extrasolar X rays and sources from studying distribution, luminosity, diameters and variability of rays

18 p3193 A69-34364

Continuum survey at 1415-MHz between declinations of zero and 20 degrees N with radio telescope, noting flux densities and contour maps of sources

18 p3195 A69-34428

Flux density variability and component age of radio sources at frequency of 5769 MHz measured by radio telescope

18 p3197 A69-34751

Occurrence frequency distributions at microwave frequencies as function of peak intensity and directivities of solar bursts

18 p3187 A69-34969

Low energy cosmic ray density in Galaxy due to pulsar PSR 0833-45 caused by mass ejection

18 p3187 A69-34995

UV excitation intensity increased for improving luminescent nondestructive testing, describing UV dosimeter and irradiation standards

18 p3138 A69-35115

Radio sources spectrum measurement results at cm wavelengths in tabular form, noting flux density relationship to frequency

18 p3200 A69-35132

Ionization effects in hydrodynamic model of radiation driven breakdown wave propagation, obtaining wave velocity and absorbed laser flux density relationship

18 p3174 A69-35286

Radiometric measurement, discussing characteristics and calibration of instruments for measuring radiant intensity or radiance

19 p3311 A69-36071

Memory matrices sensitivity to laser beams with various emission power densities, considering matrices of thin metal layers on transparent base

19 p3335 A69-36198

Crab Nebula radio brightness at 2.16 and 8.2 mm measured and compared to Jupiter flux density

19 p3428 A69-36875

Radio emission intensity of Cas-A and Cyg-A at 30-60 cm, giving spectral indices

19 p3428 A69-36876

Intensities of translational lattice mode absorptions of alpha phase solid molecular nitrogen in far IR, noting temperature dependence

20 p3579 A69-37346

Solar radio emission parameters calculated, determining basic 327 MHz emission component and flux density-sunspot area correlation coefficient

20 p3588 A69-37478

Solar bremsstrahlung intensity dependence on heliographic longitude, noting maximum intensity shift toward electron beam direction

20 p3589 A69-37552

Radiative transport equation solution in two flow approximation for plane layer, considering absorption and dispersion characteristics dependence on radiation density

20 p3553 A69-37608

Threshold power, gain, output power and radiation energy during optical pumping of Q switched molecular laser by black body radiation

20 p3554 A69-37722

Meteorological rocket measurement of corpuscular radiation intensity in upper atmosphere at various latitudes

20 p3591 A69-37962

Ultrashort light pulses in lasers with nonlinear absorber, evaluating random intensity peak probability created by intensity fluctuations and axial modes buildup

20 p3555 A69-38009

Diurnal variations in cosmic ray intensity from observations by inclined meson telescopes scanning equatorial plane

20 p3593 A69-38109

Radio source flux density values in revised 3C catalog determining spectrum, discussing effects of relativistic electron energy distribution, self absorption and spatial distribution

20 p3609 A69-38138

Balloon-borne proportional counters to measure X rays intensity and spectral distribution from Taurus X-1 and Cygnus X-1

20 p3593 A69-38153

Variable BL Lac SHF flux density measurements, discussing periodicity and maxima spacing

21 p3798 A69-38545

Photodetector responses to radiant energy from many stars tabulated for various photocathode materials and silicon detector

21 p3800 A69-38680

Galactic radio sources high resolution observations at 178 MHz, determining flux densities and angular structures, noting supernovae remnants

21 p3801 A69-38701

X rays and gamma rays extragalactic components, calculating background component intensity for given model of universe

21 p3789 A69-38818

Primary and secondary cosmic ray intensity variation with altitude from ascending balloon data, noting absorption length role

21 p3791 A69-39249

Power density and time history of pulsed molecular nitrogen laser, discussing dependence on fill pressure and electric circuit parameters

21 p3742 A69-39779

Mean intensity profiles of photospheric H alpha radiation illuminating solar prominences moving at different heights

22 p4011 A69-39995

Diffuse galactic radiation intensity and distribution from photoelectric measurements compared with radiative transfer calculations using various interstellar dust models

22 p4013 A69-40096

Flux measurements of radio sources at 4.3 mm by 36 ft parabolic antenna, noting flux densities relative to Jupiter

22 p4014 A69-40126

Flux densities of radio sources in 3CR catalog measured at 2.8 cm wavelength

22 p4014 A69-40127

Declination measurements of sources in 4C Catalogue by Arecibo 1000 ft radio telescope

22 p4014 A69-40128

Radio observations of supernova remnant HB 21 at 2695 MHz, noting spectral brightness and curvature of northern shell segment

22 p4014 A69-40129

Photoelectric methods for pulsed and CW lasers output power and energy measurements

22 p3961 A69-40239

Radiant energy diffusion from spherical expanding matter for masses and velocities of model supernova outbursts, discussing thermonuclear and neutron star origins of supernovae

22 p4026 A69-40649

Quasar features compared to pulsars, noting complete analogy except for energy output scale

22 p4029 A69-40762

Flux density variations of radio sources at 2.8 and 4.6 cm wavelengths, suggesting relativistic particles prolonged injection into optically thin sources

22 p4029 A69-40764

Corpuscular radiation intensity measurements in upper atmosphere at midlatitudes by meteorological probe during geomagnetic storm, noting radio wave absorption

22 p4008 A69-41104

Stellar and diffuse galactic radiation intensity observations to obtain albedo values of interstellar dust particles

22 p4034 A69-41112

Electromagnetic waves emission intensity in one dimensional resonator, allowing for wave interference effects

22 p3966 A69-41172

Spectral emissivity and radiation intensity spectral distribution measurements for heat-resistant materials at high temperature, using photographic method

23 p4238 A69-41330

Radiative properties of Ta, Mo, Nb, graphite and niobium carbide at high temperatures

23 p4175 A69-41331

Day-to-day variability of daily variation of cosmic ray intensity during quiet solar activity period using high latitude neutron monitor data

23 p4204 A69-41484

Electric fields reducing recombination radiation intensity from bulk ionized GaAs and InP and shifting spectrum to lower energies, discussing self absorption

23 p4198 A69-41499

Instrumentation and data interpretation method for particle size determination by low-angle light scattering

24 p4313 A69-42764

Pulsars relation with supernovae remains and radiation patterns and fluxes analysis, ascribing radio emission to relativistic plasma

24 p4383 A69-42985

Cosmic ray albedo-neutron decay source role in intensity measurements of high energy protons trapped on low L shells during satellite flights

24 p4367 A69-43176

Solid propellant flame zone radiant energy flux emitted through side port of internal burning cylindrical rocket motor related to total heat flux at burning surface

24 p4415 A69-43595

Scanning Fabry-Perot interferometer interaction with laser source, calculating laser intensity and oscillation frequency changes for weak mode coupling

24 p4329 A69-43756

Quasars time dependent flux density variations at 6.6 cm, noting spectrum peaks tendency toward lower frequencies with time

24 p4389 A69-43772

Flux density of quasars 3C 270 and 3C 278 at 40 cm determined by digital computer with point source program

24 p4389 A69-43773

Brightness temperatures and spectra of Venus, Mars, Jupiter and moon measured from 8 to 14 microns by reflector and prismatic spectrometer

24 p4390 A69-43785

RADIANT HEATING

Instability of struts subjected to axial force and radiant heat, considering elastic and thermal deformation

02 p0337 A69-11716

Radiation heating characteristics of shock layer gases surrounding Venus entry vehicle, noting domination of carbon monoxide band and UV spectrum

02 p0351 A69-11751

Quantitative determination of reentry shock precursor absorption level and effect on surface radiation heating, calculating radiative flux from shock layer enthalpy distribution

02 p0354 A69-12528

Heavy ion track thermal spike model to account for LET and temperature effects in radiation biology and chemistry

03 p0371 A69-13479

IR heating, discussing operation of IR emitters employing glass and quartz envelopes

03 p0411 A69-13548

Book of engineering compendium on nuclear radiation shielding, discussing radiation sources, attenuation methods, induced heat generation, ducts and voids in shielding technology and design

05 p0791 A69-15830

Contact thermocouples to measure temperature of wall exposed to radiation, evaluating errors

17 p2975 A69-33596

Cryogenic liquid level temperature transducer with radiantly heated thermocouple sensitive element

17 p2975 A69-33670

Temperatures of radiantly heated sun and shade leaves of white oak measured in low speed wind tunnel, considering differences in convective heat dissipation

18 p3095 A69-34540

Equations governing stress waves generated by rapid nonuniform heating of solids, comparing elastoplastic with purely elastic solutions

21 p3837 A69-39158

Thermal buckling of skew plates clamped along all edges under radiant heating, measuring various characteristics, solving differential equations by difference method

22 p4044 A69-40599

Teflon dielectric properties evaluated during fast laser beam heating, noting presence of C by microwave measurement

24 p4336 A69-43266

RADIATION

Open cosmological model containing radiation and matter, noting matter density relationship to visible matter average

01 p0150 A69-10371

Arend-Roland comet head luminescence intensity, considering radiation scattering by dust component

21 p3804 A69-39080

RADIATION ABSORPTION

NT ATMOSPHERIC ATTENUATION

NT AURORAL ABSORPTION

NT ELECTROMAGNETIC ABSORPTION

NT MOLECULAR ABSORPTION

NT PHOTOABSORPTION

NT POLAR CAP ABSORPTION

NT SELF ABSORPTION

NT X RAY ABSORPTION

Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels

01 p0090 A69-10381

Thermodynamics in homogeneous steady state fog over rough terrain representing absolutely absorbing surface

02 p0274 A69-11442

Kinetics of vaporization of metals with surface subjected to incident radiation flux noting pulse duration

02 p0350 A69-11577

Radiation attenuation cross sections of monatomic and diatomic xenon gas from UV absorption measurements near resonance line

02 p0284 A69-12551

Thermal tidal oscillations in earth atmosphere using circulation model attributed to solar radiation absorption by atmospheric vapor and ozone

03 p0457 A69-13030

Radiation absorption variations in KC-19 CdSe glass during ruby laser radiation, noting microcrystals and nonlinear effects role in determining optical properties

03 p0436 A69-13036

Ruby laser radiation nonlinear absorption coefficient measurement in CdS, ZnS and SiC semiconductor crystals, noting light limiting effects

03 p0436 A69-13038

Heavy ion track thermal spike model to account for LET and temperature effects in radiation biology and chemistry

03 p0371 A69-13479

Solar emission line absorption by oxygen and nitrogen atomic lines, discussing effect on upper atmosphere composition measurements

03 p0425 A69-14019

Observable horizons in expanding universe, considering absorption of extragalactic radiation

04 p0648 A69-14566

Viscoelasticity effect on tensile stress in absorption layer for free surface uniaxial motion

04 p0676 A69-14705

Nongray radiation absorption coefficients reformulation employing alternative angular moment averaged absorption coefficients with emission/Planck/

04 p0686 A69-14744

Book of engineering compendium on nuclear radiation shielding, discussing radiation sources, attenuation methods, induced heat generation, ducts and voids in shielding technology and design

05 p0791 A69-15830

Spectrophotometer and integral methods to determine solar radiation absorptivity for steady/ unsteady thermal regimes in solids

05 p0846 A69-15901

Cosmic radio noise absorption in ionosphere, discussing diurnal, seasonal and longer variations of integral absorption

06 p1008 A69-17727

Radio spectra analyzed for NGC 1052 and NGC 4278 elliptical galaxies, discussing 178 MHz flux density, anomalies and radiation absorption mechanisms

06 p1009 A69-17959

Terrestrial and Martian aerosols estimation based on carbon dioxide spectral and Mariner 4 RF occultation measurements

[AIAA PAPER 69-52] 06 p1011 A69-18199

Saturated absorption by Ne inside 6328 A He-Ne laser, discussing selection of Ne isotopes in gain and loss tubes

07 p1149 A69-18898

Single mode output power from 6328 A He-Ne laser through mode coupling induced by added absorption cell containing excited Ne

07 p1149 A69-18901

Relativistic cosmological models with radiation and matter, analyzing conversion from radiation-like models to dust-like models

07 p1222 A69-19587

Algorithm for high speed digital computers to evaluate stellar radiative opacities

07 p1222 A69-19589

Electron cyclotron resonance absorption of injected radiation magnetic mirror, noting effect of RF heating on plasma electron distribution

08 p1364 A69-20519

Laser stimulated gamma-optical transitions illustrated by gamma-optical absorption detection in dysprosium ethyl sulfate

08 p1328 A69-21185

Ruby laser emission absorption in transparent dielectrics, noting crack formation and propagation producing opacity

09 p1520 A69-22655

Cosmic ray absorption and modulation in lower ionosphere at midlatitudes, considering 11 year variations, Forbush effects and solar radiation on electron concentration

10 p1759 A69-22840

Starlight extinction by interplanetary medium evidenced from confirming correlation between star brightness on ecliptic and elongation

10 p1775 A69-23198

Radio brightness map at 22.25 MHz of galactic plane including H II regions IC 1805 and IC 1848, discussing LF absorption

10 p1787 A69-24115

Effective cross sections of UV radiation absorption by molecular oxygen in Schumann-Runge bands at high temperatures

11 p1921 A69-24617

Radiation attenuation in hazy lower atmosphere, calculating attenuation coefficients and using spherical model of haze particles and empirical formula for haze spectra

11 p1913 A69-25571

Gas motion and heating by radiation behind shock wave front, noting ionization and radiation absorption occurrence

12 p2061 A69-25880

Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels

12 p2109 A69-26676

Monograph on atmospheric radiation transfer including absorption, scattering, direct, diffuse, global, thermal and net radiation

12 p2073 A69-26918

Hydrogen atoms in interstellar grains as source of stellar flux absorption, noting crystal environment effect on atomic hydrogen Lyman alpha transition

13 p2337 A69-27518

Synchrotron spectrum radiated by relativistic electrons below Razin cut-off, considering relation to radio spectra curvature of variable extragalactic sources

13 p2339 A69-27573

Germanium surface IR radiation absorption in vacuum at low temperatures, obtaining modulated interval reflection spectra

13 p2317 A69-27879

Gallium arsenide diode nonequilibrium carriers absorption of He-Ne laser radiation under emission conditions

13 p2272 A69-27893

Radiative transfer between two concentric gray opaque spheres separated by radiating gray gas, employing Fredholm equations

13 p2377 A69-28149

Laser radiation absorption in xenon plasma, noting dependence on intensity due to atoms ionization

13 p2314 A69-28442

Plasma temperature measurement by resonant laser radiation absorption, assuming Saha-Boltzmann relation

14 p2501 A69-29954

Synchrotron radiation and reabsorption theories

15 p2674 A69-30421

Molecular dissociation by line radiation absorption, applying results to hydrogen molecules in H I region dissociated by photons of mean interstellar UV radiation field

15 p2693 A69-30783

Distribution model for ionized interstellar gas over galactic disk for explaining radio emission absorption and depolarization from discrete sources

15 p2695 A69-30935

Partially coherent radiation scattering determined using Heisenberg operator, noting radiation absorption dependence on interfrequency band coherence

16 p2797 A69-32050

Asymptotic formulas for X and Y functions for resonance radiation scattering in layer, analyzing Doppler absorption and line profiles

16 p2813 A69-32588

Nongray absorption and radiation cooling on smooth symmetric blunt bodies included in modified Maslen flow field method for radiation and large blowing [AIAA PAPER 69-637] 17 p2891 A69-33290

Molecular gas absorption coefficient dependence on laser emission energy density, considering disturbed equilibrium distribution of molecules 17 p2983 A69-33973

UV absorption coefficients of high temperature air measured in shock tube reflected region 18 p3230 A69-35073

Laser stimulated gamma-optical transitions illustrated by gamma-optical absorption detection in dysprosium ethyl sulfate 18 p3152 A69-35154

Gas laser oscillation mode selection and self synchronization based on separation in two mirror cavity with nonlinear absorption 19 p3336 A69-36350

IR absorption in n-type gallium phosphide doped with telluride or Si in 1.5-2.0 micron range, analyzing wavelength dependence 19 p3385 A69-36518

Molecular oxygen rate of dissociation resulting from absorption in Schumann-Runge bands, calculating effects on chemistry of lower thermosphere and upper mesosphere 20 p3534 A69-38089

Absorption mean free path for radiation absorbed by given medium, using zenith angle distribution from particle counter telescope 21 p3723 A69-38841

Laser radiation increased absorption in opaque solid body attributed to vaporization, analyzing factors determining thermodynamic equilibrium between condensed and gaseous phases 21 p3736 A69-38962

Primary and secondary cosmic ray intensity variation with altitude from ascending balloon data, noting absorption length role 21 p3791 A69-39249

Synchrotron radiation and reabsorption for rapidly moving cloud of relativistic particles, considering errors 21 p3772 A69-39513

Radiation absorption and emission problem for material of unit density at rest solved by finite difference scheme 21 p3773 A69-39666

Vacuum integrating sphere for measuring solar absorptance in space environment to determine thermal control coatings qualifications [AIAA PAPER 69-1021] 22 p3923 A69-40392

Quasars observation failure for red shifts beyond z suggested due to absorption of intergalactic neutral H 22 p4024 A69-40582

Free-free intergalactic absorption at LF as function of red shift for uniform zero pressure cosmological models 22 p4025 A69-40640

Molecular collision pumping mechanism for anomalous microwave absorption by formaldehyde rotational transition in Galaxy dust cloud 22 p4029 A69-40768

Rocket measurement of far UV spectral intensity of theta Orionis for far UV interstellar extinction law in Orion nebula region 22 p4030 A69-40770

Interstellar extinction in UV from zeta and epsilon Persei spectra obtained with scanner attached to telescope mounted in pointed Aerobee rocket 22 p4030 A69-40772

Gaseous absorption cell variable attenuator for carbon dioxide laser radiation at specific wavelength, using forced convection to eliminate thermal defocusing effects 23 p4172 A69-41396

Fast neutron irradiation effect on IR absorption in single crystal GaAs for various fluences 23 p4198 A69-41540

Pure water vapor and water vapor-air mixture continuum absorption of carbon dioxide laser radiation measured to determine atmospheric attenuation 23 p4173 A69-41631

Radiation contribution to large scale atmospheric mass circulation simulation, considering short wave radiation, temperature variations, exponential and aerosol attenuation 23 p4184 A69-42487

Solar grazing ray absorption calculated by tracing through earth atmosphere, noting extinction for arbitrary ozone and aerosol profile 24 p4350 A69-43013

Ellipsometric liquid immersion method for optical parameters determination of system with nonabsorbing surface film on absorbing substrate 24 p4316 A69-43321

RADIATION BELTS

NT ARTIFICIAL RADIATION BELTS

NT INNER RADIATION BELT

NT OUTER RADIATION BELT

NT PROTON BELTS

Optimum control determination for low thrust spacecraft to minimize time for passing through radiation belt 01 p0113 A69-10571

Soviet book on dynamics of radiation belts of earth covering theories concerning magnetosphere, magnetic fields and plasma and electromagnetic pulsations 02 p0307 A69-11799

Radial diffusion coefficient for trapped electrons moving across field lines, obtaining time dependent solutions of Fokker-Planck equation 03 p0502 A69-14002

Bounce resonant scattering of particles trapped in geomagnetic field 03 p0503 A69-14014

Charged particles injection into captured radiation zone of Van Allen belts during main phase of magnetic storm indicated by proton data analysis 05 p0815 A69-16057

Particle and field environment of earth, discussing solar wind, bow shock, magnetosheath, magnetopause, magnetosphere and particle population 06 p1001 A69-17158

Synchrotron radiation from trapped high energy electrons in Van Allen belt 06 p0992 A69-17324

Particle flux and dose rates in Jupiter Van Allen belts based on assumed synchrotron radiation from trapped electrons in dipole magnetic field [AIAA PAPER 69-18] 06 p0997 A69-18129

Radiation measurements inside Apollo 4 and 6 command modules during passage through trapped radiation belts [AIAA PAPER 69-17] 06 p0884 A69-18202

Cyclotron- and bounce-resonance scattering of electrons trapped in geomagnetic field for pitch-angle scattering, noting whistler mode disturbances 07 p1208 A69-19367

Monte Carlo method applied to calculation of radiation transmission and dosage behind space vehicle shields during passage through earth radiation belt 08 p1377 A69-19843

Quasi-trapped particle currents having discontinuities on daytime and nighttime sides of earth 09 p1577 A69-21767

Multiple Coulomb scattering and range straggling effects in shielding against solar flare protons and trapped protons in Van Allen belt 10 p1723 A69-23164

Primary cosmic rays, radiation belts and solar wind studies by semiconductor detectors installed on orbiting satellites 10 p1662 A69-23294

Geomagnetic field Pc 3 and Pc 4 pulsation generation mechanism explained by resonance of MHD waves in force tubes adjoining radiation belt maximum 10 p1689 A69-24206

Solar wind particles acceleration and transformation into radiation belt particles 11 p1948 A69-24855

Geomagnetically trapped particle loss processes and equilibrium distribution resulting from MHD wave field interaction described using sandbox model 11 p1948 A69-24856

Stable particle trapping zone in magnetosphere, discussing results of adiabatic theory application to charged particle motion in earth magnetic field 11 p1948 A69-24858

B. L. coordinates for mapping geomagnetically trapped particles distribution computed by perturbation method, using perfect dipole as zero order approximation 11 p1949 A69-24861

Earth radiation belts formation as function of particle injection into trapped radiation zones or proton and electron leakage 12 p2150 A69-26742

Pitch angle diffusion of trapped electrons in terrestrial radiation zones, discussing diffusion theory based on Fokker-Planck equation, atmospheric Coulomb scattering mechanism, etc 12 p2150 A69-26746

Solar wind induced magnetospheric convection for interpretation of geomagnetic storms, aurora and trapped particle belts, noting electric fields 12 p2073 A69-26749

Model for self consistent time independent ring current of charged particle distribution under combined field of earth dipole and particle motion current 12 p2151 A69-26948

Plasmopause, plasma sheet and energetic trapped electrons in earth magnetosphere, considering slot, peak intensity and trapping boundary 12 p2151 A69-26953

Van Allen radiation belts proton and electron components recorded by Soviet lunar probes and Cosmos and Elektron satellites 13 p2326 A69-27350

Relativistic electron confinement within geomagnetic tail neutral sheet measured by Pioneer 7 deep space probe, confirming kinetic energy observations of IMP 1 satellite 14 p2433 A69-28934

Nonuniform ring current belt growth, discussing associated magnetospheric substorms 14 p2513 A69-29123

Saturated signals of GM counter from solar radiation monitoring satellite, showing Van Allen belt high energy particle origin 14 p2514 A69-29383

Earth radiation belt data, discussing origin, density, distribution, etc, of protons, electrons and alpha particles 15 p2674 A69-30016

Optimum control determination for low thrust spacecraft to minimize time for passing through radiation belt 15 p2651 A69-30741

Magnetic storm effects on electrons and protons in outer belt, using satellite data for intensity and differential energy spectra 15 p2676 A69-31314

Self consistent ring current of radiation belt under combined influence of earth dipole field and field due to currents of particle motions 16 p2776 A69-32096

Numerical analysis of charged particles radial distribution in radiation belts extended to geomagnetic tail for low energy auroral electrons 16 p2850 A69-32102

Spatial and temporal dependence of trapped particle energy spectra on basis of bimodal diffusion 16 p2852 A69-32619

Trapped particle acceleration by random bimodal diffusion in inhomogeneous magnetic field accounting for high energy particles trapped in earth radiation belts 18 p3186 A69-34808

Electron intensities in Starfish belt /1963- 1965/, discussing radial diffusion loss mechanism and pitch-angle diffusion 18 p3187 A69-34945

Pressure dependence of trapped spontaneous decay of resonant radiation carbon dioxide 18 p3179 A69-35478

Kinetic equation describing dynamics of inhomogeneous cloud of fast electrons and ions trapped in earth magnetic field 20 p3520 A69-37029

Solar protons captured in earth dipole trap, discussing conditions for nonadiabatic escape 20 p3587 A69-37042

Charged particles injection into captured radiation zone of Van Allen belts during main phase of magnetic storm indicated by proton data analysis 20 p3591 A69-37967

Dungey reconnection model of magnetosphere with dayside current sheet and pseudotrapping region compared with dayside observations of precipitation regions 21 p3711 A69-38511

Magnetospheric instabilities and whistler mode turbulence relationship to loss of high energy electrons from Van Allen belts 24 p4306 A69-42692

Geomagnetically trapped protons and alpha particles, analyzing OGO 4 data 24 p4368 A69-43184

RADIATION COUNTERS

NT CERENKOV COUNTERS

NT ELECTRON COUNTERS

NT GEIGER COUNTERS

NT NEUTRON COUNTERS

NT PARTICLE TELESCOPES

NT PROPORTIONAL COUNTERS

NT QUANTUM COUNTERS

NT SCINTILLATION COUNTERS

NT SPARK CHAMBERS

Distance between measurement equipment and extensive air showers axis varied as function of particles number and number of hit 01 p0144 A69-10749

- Cellulose nitrate sheets applicability in detecting cosmic ray relativistic heavy nuclei, considering etchable tracks
06 p0924 A69-17286
- Particle dynamics measured by ATS satellite synchronous orbit, discussing flux time variations during geomagnetic disturbances
07 p1209 A69-19371
- Nuclear particle plastic dielectric track detectors to record distribution of fissionable and heavy elements in nature and cosmic radiation
08 p1401 A69-20899
- Solar proton monitoring by particle detectors on-board rockets and IMP satellite
08 p1318 A69-21142
- Solid state AC voltage circuitry for measuring and controlling charged particle detector signals
10 p1662 A69-23256
- Differential energy losses of fission fragments in thin carbon films as function of mass and initial energy mapped by time of flight method
10 p1694 A69-23348
- Two photon photoelectron counting statistics and intensity fluctuations of incident radiation compared with single photon detectors and applied to laser outputs
10 p1704 A69-23658
- Extensive cosmic ray showers structure at sea level, using multiple hodoscopic counters and control system
13 p2332 A69-28405
- Spectrometric characteristics of He, H and molecular H ion recording counters as function of temperature
14 p2452 A69-29811
- Energetic gamma rays emission from radio source Cassiopeia A by high altitude balloon observations, using high resolution telescope
15 p2675 A69-30760
- Low velocity heavy mass particle detection in sea level cosmic radiation, assuming deuterons
16 p2846 A69-31600
- Low level beta, X and gamma radiation detector incorporating Geiger, proportional and scintillation counting features in various modes suiting radionuclide decay scheme
17 p2975 A69-33747
- NASA lunar receiving laboratory for lunar rock samples examination by gamma ray spectrometry for induced radioactive nuclides and naturally occurring isotopes
20 p3512 A69-38271
- Silicon junction radiation detectors applications in cryogenics, measuring junction response to beta particles at low temperatures
20 p3546 A69-38275
- Trans-iron nuclei flux in primary cosmic radiation determined through high altitude balloon exposure of interleaved layers of nuclear photographic emulsion and plastic detectors
21 p3787 A69-38327
- Cosmic ray muons for calibrating dE/dx counter used in particle identification by determining cosmic particles distribution as function of energy losses due to ionization
21 p3724 A69-39075
- Auroral zone X rays measurement counting rate vs time patterns from balloon flights at Kiruna
21 p3791 A69-39252
- Environmental neutron flux measured by various techniques, studying effects of soil and moisture on density
22 p4002 A69-40094
- Detection of metastable He, H, Ne, Ar, Kr, Xe and molecular nitrogen with continuous channel electron multipliers
22 p3917 A69-41235
- ### RADIATION DAMAGE
- Radiation damage and recovery of lithium-diffused silicon p-n solar cells, measuring photovoltaic parameters as function of gamma radiation fluence
19 p3251 A69-35694
- Solar cell integral covers optical losses in vacuum as function of degradation by UV exposure, noting accelerated testing for time-cost reduction
19 p3253 A69-35703
- Solar cell radiation damage during 416.8 days in synchronous orbit on satellite ATS 1, discussing radiation shields
19 p3253 A69-35704
- Physiological and somatic effects on insects of radiation source onboard biosatellite 2, discussing wing abnormalities in flour beetle
20 p3476 A69-37619
- Changes in CdS crystals spontaneous and coherent emissions caused by electron beam radiation damage, determining intensity and spectral composition dependence
21 p3780 A69-39047
- Nerve tissue oxidation processes relation to nervous system radiation sensitivity in dogs with cerebellum X rayed after enzyme poisons administration
21 p3658 A69-39053
- Enzyme activity changes in liver, heart and cerebrum of X ray exposed rats and rabbits, noting individual enzyme differences in same X rayed organ
21 p3658 A69-39054
- White rats hyperglycemia during blood sugar changes following single X ray dose, indicating increased sugar benefit in radiation damage treatment
21 p3658 A69-39057
- Pathological effects of single 120 Mev proton doses on rats blood in rotating cylinder, discussing leukopenia and benign and malignant tumors development
21 p3658 A69-39058
- Nervous system reactions and resistance to ionizing radiation noting role of functional, morphological and physicochemical changes in nerve tissues
21 p3659 A69-39061
- Histological changes in internal organs of rats after exposure to 400 r fast neutron dose, showing destructive processes followed by compensation reactions of cellular proliferation
21 p3659 A69-39062
- Ionizing radiation histological and neurohistological effects in rabbits esophagus, stomach and ileocecal region intramural plexes
21 p3659 A69-39063
- Pathological changes in solar ganglia cells of white rats following X ray exposure, using electron microscope
21 p3659 A69-39064
- Structural changes in Mo single crystal under action of laser radiation of various power densities
21 p3750 A69-39842
- Laser safety factors in open air applications, discussing pulse length, energy spatial distribution, atmospheric attenuation, human eye sensitivity, etc
22 p3892 A69-40241
- Polymer film breakdown under impact of supersonic plasma beam pulses from capillary discharge chamber, including photomicrographs of cavities and structural defects
22 p3974 A69-41031
- X ray radiation damage to white mice blood serum proteins disappearing following intraperitoneal administration of imidazole or benzimidazole
23 p4077 A69-41300
- Bacteriophage desoxyribonucleic acid (DNA)/degradation by gamma irradiation in vitro by Co 60, discussing breaks, cross links and molecular weight
23 p4079 A69-41402
- Lithium doped silicon acceptor concentration resulting from electron irradiation damage decreased by annealing at 300 degrees K
23 p4197 A69-41498
- Radiation hardened microcircuits and transistors for protection against transient radiation released by nuclear weapons
23 p4135 A69-41528
- Biological effects by cosmic ray heavy ions and solar flares, using direct correlation between damages caused and trajectories
23 p4089 A69-41831
- Radiation damage in chlamydomonas, discussing dark repair activities
23 p4090 A69-41964
- Microwave absorption by biological materials, noting energy distribution between reflected, transmitted and absorbed radiation as function of medium physical properties
24 p4270 A69-42574
- Solar protons and alpha particles measurements at synchronous orbit altitudes providing data for solar cell shield design to prevent radiation damage
24 p4369 A69-43265
- ### RADIATION DETECTORS
- #### NT DOSIMETERS
- #### NT SILICON RADIATION DETECTORS
- #### NT THRESHOLD DETECTORS [DOSIMETERS]
- DC biased microwave bolometer /barretter/ detector, describing small signal dynamic equivalent circuit for output voltage
01 p0044 A69-10626
- Distance between measurement equipment and extensive air showers axis varied as function of particles number and number of hit
01 p0144 A69-10749
- Gas chromatography technique for separation and purification of chemical compounds for ionizing radiation detectors
02 p0249 A69-12011
- Ferroelectric strontium barium niobate as sensitive detector of single pulse IR radiation, noting application to Q switched carbon dioxide laser output
02 p0300 A69-12623
- Low energy electrons on day side of magnetosphere observed with MIT electron detector onOGO 3 satellite
03 p0503 A69-14027
- Thermal conduction of chambers for selective and nonselective film detectors at low obturation frequencies
03 p0432 A69-14216
- Photoelectron counting in extreme UV using windowless photomultiplier detectors as photon counters
04 p0595 A69-14277
- Superconductors, discussing properties and materials for magnets, power systems, radiation detectors, HF devices and computer elements
04 p0642 A69-14584
- Magnetic electron multiplier used as particle detector in time-of-flight (TOF)/mass spectrometers can introduce mass discrimination effects
04 p0599 A69-15014
- Solar and terrestrial thermal radiometer absolute calibration noting standards and methods
04 p0602 A69-15429
- Balloon-borne SPARMO detector SC 67 used for measuring radiation at high altitudes
05 p0762 A69-15823
- Thin film thermocouple detector for molecular lasers operating in middle and far IR range
05 p0773 A69-16284
- Dynamics of laser response in IR detection by means of optical mixing in He-Ne laser, noting bandwidth
05 p0776 A69-16331
- Chemical composition of nuclear cosmic rays with Z greater than 22, noting etching techniques for utilizing meteoritic minerals as detectors
05 p0816 A69-16355
- Large area X ray collector, matrix detector for ionizing radiation and inflatable gas counter, considering application to X ray optics and astronomy
05 p0794 A69-16587
- Solar neutron production and propagation to earth, discussing particle detectors
06 p0989 A69-17281
- Multiplicity of secondary neutrons counted by IGY neutron monitor detecting cosmic radiation
06 p0925 A69-17297
- Low energy muons and nuclear active particles measured with extensive air showers array composed of scintillation detectors, spectrometer and Geiger counters
06 p0990 A69-17299
- Solar flare in-flight radiation detection and warning system for Concorde SST, noting radiation hazards due to solar cosmic rays
07 p1131 A69-18551
- Ag-GaAs Schottky barrier photodiodes, describing fabrication and use as UV radiation detectors
09 p1462 A69-21334
- Phototubes, photodiodes, photoconductors, quantum detectors, nonlinear optical detectors and heterodyne receiving systems for photodetection of laser outputs
09 p1518 A69-22126
- Slow atmospheric neutron energy spectrum determined by resonance detectors and l/v detectors, measuring cadmium ratio dependence on longitude and latitude
10 p1758 A69-22831
- Primary cosmic rays, radiation belts and solar wind studies by semiconductor detectors installed on orbiting satellites
10 p1662 A69-23294
- High energy cosmic radiation using Conversi detectors, noting design and internal efficiency
10 p1693 A69-23296
- Two photon photoelectron counting statistics and intensity fluctuations of incident radiation compared with single photon detectors and applied to laser outputs
10 p1704 A69-23658
- Solar UV radiation measurements by balloon-borne monochromatic illuminator, using Cd-cathode photomultiplier detector
11 p1945 A69-24410
- Low energy charged particle detectors reliability, analyzing windowless electron multipliers and effects of secondary emission layers on sensitivity
11 p1848 A69-24868

GaAs photoelectric devices for radiation detection and light to electric energy conversion, considering photoresistors, photodiodes and solar cells
13 p2203 A69-27465

Freons applications to radiation detector cooling, calculating specific volumes and compressibility factors for Freon 14
14 p2447 A69-29330

High energy gamma rays detection by balloon near geomagnetic equator, observing enhanced flux from galactic disk
15 p2675 A69-30695

Energetic gamma ray emission from Cygnus A and X-1, describing high altitude balloon telescope observation and gamma ray emulsion process
15 p2676 A69-30888

Gravitational radiation indicated by coincidences of detector observations over 1000 km, eliminating seismic and electromagnetic effects
16 p2784 A69-32565

Homodyne detection of IR radiation from carbon dioxide laser scattered from moving diffuse target, noting applicability to IR radar, heterodyne spectroscopy, etc
17 p2971 A69-32913

Pulse height distributions, gain and counting rate characteristics of two magnetic strip multipliers and two channel multipliers in 1.5 to 44 A region of soft solar X-rays
17 p2972 A69-33082

Low level beta, X and gamma radiation detector incorporating Geiger, proportional and scintillation counting features in various modes suiting radionuclide decay scheme
17 p2975 A69-33747

Lunar surface uppermost layer physical and mechanical properties investigated by soilmeter-penetrometer and radiation densimeter on Luna 13
18 p3113 A69-34239

Solar thermonuclear reactions studied by emitted neutrinos detection, plotting energy spectra for sensitivity of CI 37 detection system
18 p3185 A69-34278

Instruments for gamma ray astronomy including Ranger low energy detector, howitzer detector and cosmic spark chamber
18 p3138 A69-35135

Aircraft nucleonic fuel gauging system, using radioactive gas to emit gamma rays for fuel mass sensing
18 p3139 A69-35468

Coherent radiation detection using laser optical sine waves, considering detection by heterodyning, laser preamplifier and parametric amplification
19 p3335 A69-36070

Regenerative Josephson effect detector with feedback-narrowed far IR response as tunable millimeter and submillimeter wave radiation detector
19 p3313 A69-36417

Flat wire grid calorimeter used as radiation sensor in measuring pulsed ruby laser
19 p3339 A69-36755

Electromagnetic radiation detectors in nonphotographic sensing systems, describing performance as function of time constant, spectral response, cooling requirements and signal handling
20 p3540 A69-37736

Thermal scanner model block diagram presented including lens, filter, detector, CRT and camera, considering environmental factors affecting image character
20 p3541 A69-37740

Thermistor radiation detectors bias condition defined from equations and optimized in terms of responsivity, time constant and noise
21 p3727 A69-39782

Frequency response of thin film thermal detectors, discussing steady state harmonic response proportionality to film thickness and thermal conductivity
23 p4163 A69-41549

Cosmic ray detectors design for medium, low and very low energy events on IMP-1 spacecraft, noting PCM format
23 p4118 A69-41738

Einstein general theory of relativity and apparatus for gravitational radiation detection, discussing Dicke experiments and Riemann tensor measurement
23 p4192 A69-42331

RADIATION DISTRIBUTION

NT ANTENNA RADIATION PATTERNS

NT DIFFRACTION PATTERNS

NT SIDELOBES

Emission and frequency shift angles of antiStokes radiation from trapped filaments of laser light in liquids
01 p0114 A69-10012

Reflected and transmitted radiation fields for dielectric loaded infinite phased array of parallel plate waveguides as function of scan angle
02 p0218 A69-12326

Transverse radiation field distribution in CW laser found by geometrical optics approximation, assuming active two level medium and mode close to threshold
02 p0258 A69-12642

Ring lasers emission modes, studying nonlinearity effects on radiation field spatial-temporal distribution
03 p0437 A69-13040

Small silicon diodes to explore depth-dose distributions in water phantom of proton beams
03 p0430 A69-13481

Directional intensity of radiation emerging from top and bottom of Rayleigh scattering atmosphere
03 p0426 A69-14026

Outgoing radiation field based on interpretation of broad sector radiometer measurements made from meteorological earth satellites
04 p0627 A69-15032

Nonquadrupole nature of cosmological radio emission intensity distribution demonstrated for anisotropic homogeneous cosmological models without flat space
04 p0662 A69-15238

Large scale pattern in solar magnetic field correlated with interplanetary magnetic field
04 p0665 A69-15532

High power single mode ruby laser, using multielement rods with plane-parallel end surfaces for generating longitudinal and transverse mode
05 p0770 A69-15700

Latitudinal distribution of auroral and airglow emissions in Northern Hemisphere photometrically surveyed by jet aircraft
05 p0754 A69-16258

Active element inverse population distribution effects on laser radiation angular divergence during lower and higher oscillation modes
06 p0932 A69-16913

Slope optimization of antenna array difference radiation patterns coinciding with antenna directive gains
06 p0895 A69-17461

Flux density spectral dependence disagreement with power law for synchronous radiation mechanism for radio sources in 12.6 to 25 MHz interval
06 p1004 A69-17538

Actinometric and nephelometric data on outgoing short wave radiation obtained by Cosmos 122 satellite, tabulating cloud cover data, digital radiation data and brightness curves
06 p0952 A69-17983

Short wave radiation field reflected anisotropically from underlying surface into atmosphere calculated from brightness coefficient
06 p0952 A69-17985

Radiation profiles in ablating flat plate air-Teflon laminar boundary layer, discussing visible, UV and IR wavelengths
[AIAA PAPER 69-99] 06 p1037 A69-18086

Radiative transfer problems in inhomogeneous anisotropically scattering plane parallel planetary atmospheres with internal source distributions solved by recursive method
07 p1213 A69-18610

Green function applied to isotropic scattering of radiation in three dimensional homogeneous space
07 p1241 A69-18808

Irregularities producing partial radio wave reflection from midlatitude D region attributed to insufficient distribution
07 p1078 A69-18914

Solar photosphere model with two stream columnar representation of granulation for predicting continuous radiation field
07 p1217 A69-19238

Aircraft tire wear determination by measuring intensity of radiation originating from point source within thread, using thulium 170 isotope
07 p1143 A69-19703

Black body cavity radiation distribution as seen by observer in arbitrary uniform motion with respect to radiation mass center
08 p1380 A69-19784

Monte Carlo method applied to calculation of radiation transmission and dosage behind space vehicle shields during passage through earth radiation belt
08 p1377 A69-19843

Thermal and nonthermal radiation of hot gases using spectroscopic plasma diagnostics
08 p1363 A69-20463

Earth reflected solar radiation and stability of satellite thermal control coatings, noting intensity distribution shifting toward UV region and coatings degradation rate
09 p1579 A69-22174

Limits in applicability of earth equivalent radius to measuring microwave diffraction field in atmosphere
09 p1456 A69-22284

Radiation fields of Lyman alpha to Lyman 10 calculated for model planetary nebulas with constant and exponential density distributions in spherical symmetry
09 p1604 A69-22407

Radiation field at optical depths within plane parallel Rayleigh scattering atmosphere subjected to generalized free surface boundary conditions
09 p1606 A69-22441

Ultrashort light pulses nonlinear amplification in medium with finite transverse relaxation time and linear radiation losses
10 p1702 A69-23139

Amplification factor of He-Ne traveling wave light amplifier, discussing frequency stability and telescopic wave front broadening for uniform radiation distribution
11 p1894 A69-24623

Atmospheric scintillation effect on planetary brightness distribution over disk from photometric measurements
11 p1960 A69-24729

Two dimensional autocorrelation functions of outgoing radiation fields usable as quantitative characteristics of cloud distribution structures
11 p1913 A69-24832

Bias elimination in intensity pattern of incoherent holograms by introducing narrow band time modulation of light
11 p1885 A69-24846

Model for radiative transfer in atmosphere-ocean system by Monte Carlo method, considering Rayleigh and Mie scattering
11 p1877 A69-24851

Biological effects of cosmic ionizing radiation in supersonic commercial aircraft at high altitudes, showing spatial distribution based on balloon experiments
11 p1830 A69-24865

Radiating collinear open ended waveguides and near field coupling analyzed using simultaneous integral equations and Fourier series expansion of aperture field
11 p1850 A69-24984

Two dimensional radiation from apertures in conducting cylinders of arbitrary cross section, solving current distribution, admittances and radiation patterns
11 p1836 A69-24985

Long wave radiation fields calculations based on radiation transport equations, identifying differences between associated transmission functions
12 p1215 A69-25951

Second harmonic conversion of giant pulse Nd laser emission related to beam divergence and space-time distribution of radiation, noting energy relationship
12 p2104 A69-26022

Mode interaction in lasers with homogeneous line broadening, analyzing rate equations for radiation fields of operating modes for asymptotic values of mode intensities
12 p2106 A69-26323

Southern radio auroral zone observation with rhombic antennas, noting diffuse and discrete zones associated with proton and electron precipitation
12 p2033 A69-26950

Cosmic rays during 11-year solar cycle, short term variations and radial gradient based on Luna, Zond and Venera probes and Cosmos observations
13 p2326 A69-27351

Radiation fields and large scale atmospheric disturbances analyzed, using radiation maps from Cosmos satellites
13 p2291 A69-27727

Transport equation numerical solution for unsteady radiation field by straight lines method, allowing for scattering indicatrix forms with passage of time
13 p2350 A69-27858

Atomic and molecular spins dynamic orientation in anisotropic radiation field, examining medium properties and astrophysical consequences
13 p2350 A69-27861

Radiation field from sources on conical surface using Green functions
13 p2223 A69-28569

Solar cosmic rays diffusion enclosure in interplanetary space magnetic boundary suggested from balloon, satellite and ground observations of solar flare neutron component
14 p2513 A69-29067

Neodymium laser having adjustable pulse duration and homogeneous spatial radiation structure developed by two photon absorption

14 p2460 A69-29670

Plane electromagnetic wave refraction and scattering in solar corona during eclipsed observations of cosmic sources, calculating angular distribution of radiation intensity

15 p2688 A69-30555

Characteristics of neodymium-glass laser with unstable resonator noting transverse modes and radiation angular distribution

15 p2634 A69-30730

Relative motion of 3 K cosmic background radiation with covariant photon equilibrium distribution

15 p2657 A69-31494

Radiation diffusion in plane-parallel isothermal gas layer of two and three level atoms, considering stimulated emission and frequency redistribution

16 p2864 A69-32587

Reradiation and multiple reflection effects on radiant flux density distribution in cylindrical receivers of solar power installations

16 p2741 A69-32799

High energy cosmic ray proton, electron and photon propagation through cosmic microwave background, discussing mean free paths

16 p2852 A69-32819

Center to limb variation of solar hard X ray bursts, suggesting inverse Compton effect and bremsstrahlung from anisotropic electrons

17 p3023 A69-33055

Mode patterns and far field distribution for gas lasers operated in lowest order Gaussian transverse mode

17 p2981 A69-33090

Holographic recording of temporal coherence pattern of wave train from pulsed radiation source, investigating single mode ruby laser

17 p2973 A69-33114

Angular dependence of lunar nighttime IR radiation by invariant tensor techniques, noting surface roughness effect on radiation pattern [AIAA PAPER 69-597]

17 p3032 A69-33276

Line source excited ferrite layer radiation pattern reduced to one dimensional form by Fourier transform, obtaining angle of maximum leaky wave radiation

17 p2926 A69-33852

Extrasolar X rays and sources from studying distribution, luminosity, diameters and variability of rays

18 p3193 A69-34364

Macroscopic roughness effect on surface radiation characteristics for special cases

18 p3229 A69-34711

Local radiation characteristics calculation method, consisting of reducing integral equations to linear algebraic equations, applied to solve radiative heat exchange problems

18 p3229 A69-34713

Variable star in Large Magellanic Cloud having unusual light curve with complex maximum lasting 300 days

19 p3403 A69-35965

IR detector limiting noise voltage/phonon noise/ due to photon arrival fluctuations at responsive element determined using Planck radiation law

19 p3309 A69-36059

Numerical program for gas dynamics of hydrodynamic flow and radiation transport in diffusion and grey body approximations

19 p3450 A69-36356

Spectral line scattering during propagation of radiation in turbulent plasma

19 p3396 A69-36573

Photographic photometry investigation of Light distribution in spiral galaxies NGC 681, 972 and 1084, discussing mass distribution

20 p3599 A69-37476

M 31 nebula radio continuum survey, describing discrete sources catalog and Andromeda nebula radiation distribution

20 p3601 A69-37493

Lunar brightness variations during eclipse on 13 April 1968 measured photoelectrically, suggesting nonuniform diurnal distribution of atmospheric scatterers for observed asymmetry

20 p3601 A69-37510

Electromagnetic radiation from slot excited ground plane covered by inhomogeneous plasma layer, considering far field radiation pattern

20 p3495 A69-37852

Slope optimization of antenna array difference radiation patterns coinciding with antenna directive gains

20 p3508 A69-37944

Vertical turbulent diffusion and altitude distribution of radioactivity from short lived radon decay products in atmosphere

20 p3533 A69-38076

Atomic sources local multipolar field in anisotropic dielectrics determined from magnetic dipole radiation spatial distribution measurements

21 p3779 A69-38531

Monochromatic radiation diffusion in one dimensional bounded medium, deriving equations for probability density of quantum yield and intensity of light fluxes

21 p3769 A69-38586

Radiation field several wavelengths from dipole above plane earth, simplifying rigorous integral expression for Hertz vector by method of operators

21 p3770 A69-38748

Radiation fields from energetic electron moving in helical orbit in magnetoactive plasma, using Maxwell equations

22 p4008 A69-39965

Diffuse galactic radiation intensity and distribution from photoelectric measurements compared with radiative transfer calculations using various interstellar dust models

22 p4013 A69-40096

Surface integration technique used in conjunction with wedge diffraction theory to analyze TEM radiation patterns of parallel plate waveguides

23 p4136 A69-41581

Ionospheric perturbations generation by time variable alternating electrical currents at polar latitudes, constructing radiation patterns for gravitational waves

23 p4155 A69-41842

Anomalies of isotropic cosmic ray secular variations at high latitudes based on supermonitor neutron data

23 p4206 A69-41854

Numerical methods for radiation transport for inviscid stagnation flows, detailing spectral nature of radiation emission and absorption [AIAA PAPER 68-664]

23 p4059 A69-41890

Optimum design of spherical and ellipsoidal pumping chambers for solid state lasers determined from numerical calculation of radiation transfer efficiency

24 p4327 A69-42986

RADIATION DOSAGE

Surface dose rate and depth dose distribution for materials used for space vehicle and biological tissue protection from cosmic and internal radiation [UN PAPER 68-95260]

01 p0144 A69-10477

Nuclear radiation dose rate and atmospheric ionization from radioactive fallout and natural sources, discussing fallout effect on population

01 p0145 A69-10982

Inner Van Allen belt proton dose rate and spectral charged particle environment profiles correlated, noting agreement with theoretical values

01 p0145 A69-11081

Chronic gamma radiation biological damage in rats exposed to maximum nonlethal to minimum lethal doses for various periods

02 p0197 A69-11494

Solar flare radiation hazard in long duration space flight, discussing radiation distribution and dosage in human body

03 p0371 A69-13480

Small silicon diodes to explore depth-dose distributions in water phantom of proton beams

03 p0430 A69-13481

Radiation effects in man, searching for dose relationships in prodromal syndrome

03 p0374 A69-13503

Public health aspects of galactic radiation exposure at supersonic transport altitudes

03 p0375 A69-14072

Gamma radiation effects on transistors and diodes, discussing dosage and thermal changes within operational temperature range of germanium devices

05 p0728 A69-15695

High energy proton and neutron fluxes and spectra from nuclear emulsion stacks on Cosmos satellites, calculating cosmic radiation doses

05 p0814 A69-16051

Permissible radiation doses for extended space missions, discussing clinical tests on dogs

05 p0708 A69-16508

Kinetics of homogeneous and heterogeneous growth of centers of new phase of semiconductor during ion bombardment as function of radiation dose

06 p0978 A69-16985

Solar flare radiation protection requirements, considering bulk and plasma radiation shielding [AIAA PAPER 69-15]

06 p0884 A69-18079

Particle flux and dose rates in Jupiter Van Allen belts based on assumed synchrotron radiation from trapped electrons in dipole magnetic field [AIAA PAPER 69-18]

06 p0997 A69-18129

Solar cosmic ray dose rate and total dose magnitude predictions based on Epeak and isotropic diffusion models [AIAA PAPER 69-14]

06 p0997 A69-18160

Radiation measurements inside Apollo 4 and 6 command modules during passage through trapped radiation belts [AIAA PAPER 69-17]

06 p0884 A69-18202

Energy deposits from decay of tritium incorporated into bacteria, using computer simulation for radiation dose distribution

07 p1068 A69-19490

Permissible irradiation doses established for spacecraft crews making short and long flights, considering roles of life span, somatic effects, leukemia and genetics

07 p1069 A69-19618

Monte Carlo method applied to calculation of radiation transmission and dosage behind space vehicle shields during passage through earth radiation belt

08 p1377 A69-19843

Rabbit corneal damage thresholds for Gaussian beams of carbon dioxide laser IR radiation at various exposure times

11 p1830 A69-24844

Calculation of radiation doses in space - Conference, Toulouse, France, February 1968

11 p1947 A69-24854

Cosmic ray cut-off energy for synchronous satellites computed by trajectory tracing method using magnetospheric model

11 p1949 A69-24860

Electron and proton radiation doses impinging on orbiting satellites computed using orbit calculation and B, L coordinates

11 p1949 A69-24862

Computer program for electron and proton fluxes impinging on spacecraft, performing computation for Van Allen belts and solar flares

11 p1949 A69-24863

Supersonic aircraft radiation hazard due to solar flare proton exposure, using Monte Carlo method to estimate dosage as function of tissue slab

11 p1949 A69-24864

Biological radiation doses and protection from galactic, solar particle and trapped radiation in space, noting secondary radiation and bremsstrahlung in absorber

11 p1831 A69-24866

D-2 satellite radiation dose based on upper atmosphere electron and proton distribution model, simulating electron bombardment and aging of materials and subsystems

11 p1949 A69-24869

Radiation dose and radioactive isotopes induced in astronaut body by cosmic rays of various energies

11 p1831 A69-25463

Radiation dosimetry and shielding onboard Cosmos 110 artificial satellite, noting earth belt proton radiation

13 p2356 A69-27702

Admissible radiation doses for space crews and ionizing radiation protection, studying long term radiation effects on dogs

15 p2557 A69-31344

Proton dose in receiver behind combination electromagnetic and material shield, calculating dose for Van Allen and solar proton event spectra

15 p2652 A69-31522

Ground based solar proton monitoring, considering particle intensities and radiation dose rates from riometer absorption as function of time

16 p2850 A69-32321

Free radicals destruction rates by gamma irradiation at 77 K measured as first order function of dosage, using electron spin resonance spectroscopy

19 p3265 A69-36376

Supralethal doses of pulsed mixed gamma-neutron radiations from TRIGA reactor administered to unshielded, head shielded and trunk shielded beagles

19 p3259 A69-36459

High energy proton and neutron fluxes and spectra from nuclear emulsion stacks on Cosmos satellites, calculating cosmic radiation doses

20 p3591 A69-37961

Single large X ray dose depressive effect on aminotransferase activity in rabbit blood serum, liver, kidney, heart, spleen, lungs, etc

21 p3657 A69-39051

Single X ray dose effect on alpha-amylase and alpha-glucanophosphorylase in rabbit liver tissues and blood serum
21 p3658 A69-39055

White rats hyperglycemia during blood sugar changes following single X ray dose, indicating increased sugar benefit in radiation damage treatment
21 p3658 A69-39057

Histological changes in internal organs of rats after exposure to 400 r fast neutron dose, showing destructive processes followed by compensation reactions of cellular proliferation
21 p3659 A69-39062

Air ionization and beta and gamma dose rates measurements for natural radiation from cosmic rays compared to nuclear weapons tests fallout, considering biological effects
22 p4007 A69-40915

Absorbed dose and dose equivalent radiation rates at various depths in atmosphere due to proton spectrum of energetic solar flare
23 p4204 A69-41337

Exposure rate influence on mechanical properties of polymer binder cross-linked by gamma radiation exposure from cobalt isotope source
23 p4179 A69-41711

RADIATION EFFECTS

NT RADIOLYSIS

Cosmic radiation interactions with living viruses, considering X ray effects and optimal radiation dosage for cancer cell destruction
01 p0013 A69-10157

Electron cyclotron harmonic waves in magnetoplasma irradiated by external microwaves
01 p0127 A69-10335

Electron production rate and density created by galactic and solar cosmic rays in lower D region, considering ionization for PCA
01 p0063 A69-10426

Photographic film blackening under high intensity laser radiation indicating two photon mechanism as responsible
01 p0080 A69-10429

Irradiation influence on chromium transition temperature explained by defect clusters and embrittling impurity redistribution
01 p0095 A69-10604

Irradiation influence on yield stress of Ni-Al intermetallics noting temperature dependence and electron dosage
01 p0095 A69-10608

Photochemistry and radiation chemistry - Conference, Natick, Massachusetts, April 1968
01 p0024 A69-10617

Long lived low level chemiluminescence due to gaseous reactions at low concentrations induced by mercury lamp irradiation or Tesla coil discharge
01 p0024 A69-10618

Sulfur trioxide production in photolysis of sulfur dioxide at 1849 angstroms, noting oxygen addition effect on quantum yield
01 p0024 A69-10619

Photodegradation of organic polymers by UV radiation exposure, emphasizing polyvinyl chloride photochemistry and radiation stabilization
01 p0102 A69-10861

Photoinhibition of cell division and growth in Euglenoid flagellates by fluorescent and incandescent visible light
01 p0014 A69-10903

Cosmic radiation genetic, cytological and histological changes, particularly of pathological nature, on ecological systems employed in long duration Soviet manned flights
01 p0016 A69-10948

Nuclear radiation dose rate and atmospheric ionization from radioactive fallout and natural sources, discussing fallout effect on population
01 p0145 A69-10982

Shock layer gas radiation influence on deep space missile shape, noting evaluation by flow equations
01 p0007 A69-11070

UV and visible light interaction effect on biological activity of Paramecia unicellular infusoria, noting cell division rates and cell deaths
01 p0017 A69-11085

Lethal effect of solar UV radiations on dried Coliphage T-1 exposed to space at sounding rocket altitudes
01 p0017 A69-11086

Terrestrial microorganism survival in space aboard Gemini satellite, discussing lethal effects of solar radiation
01 p0018 A69-11087

Ionospheric and stratospheric UV radiation effects on survival of microorganisms
01 p0018 A69-11088

Electron irradiation induced damage in undoped GaSb single crystals at 77 K, noting dependence on energy and orientation
01 p0141 A69-11256

P32 distribution in protein of blood serum, liver and brains of rats bombarded with high energy protons
02 p0198 A69-11507

Mathematical models for Chlorella cell and biomass growth under illumination during space flight, noting ionizing radiation presence
02 p0198 A69-11508

Hypersonic gas flow past blunt body problem solved by integral correlation method, taking into account radiation effects and gas dynamic parameter distribution in shock wave layer
02 p0188 A69-11651

Thermal radiation effects on two dimensional steady MHD jet of conducting ionized gas confined by magnetic field
02 p0287 A69-11831

Radiation and electrical precursor effects in expansion tube of electromagnetic shock tube, discussing primary causes
02 p0229 A69-11936

Neutron and gamma irradiation effects on CdS crystals structure and properties, outlining electron energy level scheme
02 p0298 A69-12119

Nuclear radiation damage vs thermal decomposition of diaminitrobenzene and hexanitrostilbene, analyzing unchanged residual compound
02 p0304 A69-12500

Radiation effect enhancement in supersonic plasma jet cooled by rapid expansion, giving energy equation for electron cooling rates to analyze electron temperature
02 p0292 A69-12557

Radiation damage in CdS irradiated by normal mode or Q-switched ruby laser, discussing stimulated Brillouin scattering
02 p0257 A69-12614

Information theory application to study of biologically stimulating effects of low ionizing radiation doses, thermal energy and other environmental factors
03 p0369 A69-13434

Small silicon diodes to explore depth-dose distributions in water phantom of proton beams
03 p0430 A69-13481

Slow proton irradiation of ribonuclease thin layers, determining differential inactivation cross section for various proton energies
03 p0371 A69-13482

Inactivation by heavy ions of esterase activity of dried trypsin as function of temperature during irradiation
03 p0372 A69-13483

Long lived radicals produced in crystalline ribonuclease and lysozyme by 120-Mev protons studied by ESR spectroscopy
03 p0372 A69-13485

Trapped radical relationship to inactivation of trypsin exposed to UV by measuring radical concentration and inactivation degree
03 p0372 A69-13486

UV induced excited-state properties of DNA using optical emission and electron spin resonance methods
03 p0372 A69-13488

Genetic effects in yeast induced by heavy ion radiation, studying lethality, mitotic segregation, allelic recombination and reverse mutation
03 p0373 A69-13491

Biological effects of proton irradiation of monkeys investigated to provide improved protective shield design data with minimum weight penalty
03 p0373 A69-13496

Acute somatic effects in monkeys irradiated with protons of various discrete energies representing significant portions of space proton spectrum
03 p0374 A69-13497

Biological effects on rhesus monkeys of high energy protons compared to effects of cobalt 60 gamma radiation
03 p0374 A69-13498

Mammalian radiobiological studies of effects of heavy particles, discussing therapeutically advantageous characteristics
03 p0374 A69-13499

Biological effects in man due to heavy particles emission during major solar cosmic ray events, noting protective effect of human body
03 p0374 A69-13500

Radiation effects in man, searching for dose relationships in prodromal syndrome
03 p0374 A69-13503

Electrical resistance temperature dependence below room temperature for polycrystalline epitaxially grown Au and Ag films, noting effects of alpha irradiation
03 p0486 A69-13582

High energy X ray irradiation of head of Macaca mulatta, determining effect on cerebral blood flow and blood pressure
03 p0376 A69-14075

Aircraft cockpit and surface temperatures after solar radiation exposure in desert, showing inadequacies of meteorological data for thermal stress predictions
03 p0381 A69-14077

Reflection indicatrices of aluminum oxide, MgO, Au and Pt surfaces for normal irradiation noting temperature and surface treatment effects
03 p0534 A69-14161

Optical materials behavior after irradiation by high energy electrons, gamma rays or protons
03 p0493 A69-14190

Neodymium glass properties degradation during laser operation due to short wave pumping radiation and stimulated emission
03 p0442 A69-14219

Luminescence spectra due to radiative recombination of optically injected carriers in Co 60 gamma ray and neutron irradiated Si at low temperature
03 p0494 A69-14243

Explosive containment capsule for nuclear reactor irradiation
04 p0629 A69-14480

Radiation effects on III-V compounds, considering damage in solar cells and luminescence, light emitting and Esaki diodes
04 p0641 A69-14504

Radiation processed wood-plastic materials produced by impregnating natural wood with liquid monomer followed by ionizing radiation induced polymerization
04 p0605 A69-14582

Monograph on radiation gas dynamics, thermal radiation, applied spectroscopy and ablation and applications in high speed atmospheric entry
04 p0685 A69-14597

Burning rate of composite propellant with gamma irradiated ammonium perchlorate, noting enhancement at atmospheric pressure
04 p0647 A69-15519

Pulse radiation effect on dielectric constant of sintered CdS photoresistors, discussing capacitance dependence on intensity, type and frequency of light
05 p0806 A69-15694

Gamma radiation effects on transistors and diodes, discussing dosage and thermal changes within operational temperature range of germanium devices
05 p0728 A69-15695

Microorganisms and viruses susceptibility to sterilization by ionizing radiation, heat and combination of radiation and heat, considering space materials damage elimination
05 p0713 A69-15947

Earth radiation effect on space vehicle, using diffusely radiating sphere model
05 p0824 A69-16053

Polymer films tensile properties after exposure to gamma radiation in vacuum, noting chain scission and cross linking
[ASME PAPER 68-WA/RP-6]

Nuclear radiation influence on pool boiling heat transfer to liquid helium, using irradiated copper as boiling surface
[ASME PAPER 68-WA/PID-3]

Space flight factors, ionizing radiation and combined effects on vitamin C content in onion bulbs
05 p0791 A69-16164

Radiosensitivity of potatoes to gamma ray and proton irradiation applied to whole tubers and to isolated eyes before planting
05 p0708 A69-16510

Electric field effects on thermal annealing of electron irradiation damage in p-channel MOSFET device
05 p0733 A69-16562

Interaction between point defects and magnesium atoms in aluminum irradiated by neutrons, analyzing magnesium concentration effect on recovery
05 p0781 A69-16613

Nuclear and space radiation effects - IEEE Conference, University of Montana, July 1968
06 p0973 A69-16861

- Radiation defects stability in semiconductors, noting low temperature electron irradiation of Ge and effects of annealing 06 p0974 A69-16863
- Carrier scattering from defects in neutron irradiated semiconductors, noting mobility and relaxation time 06 p0974 A69-16864
- Recovery of carrier concentration and lifetime in n- and p-type Si during annealing after irradiation by 10 Mev electrons, noting impurities effects 06 p0974 A69-16865
- Recovery rate at room temperature in Li-doped p-n Si diodes and solar cells after 1 Mev electron irradiation, noting capacitance changes 06 p0974 A69-16867
- Neutron irradiation produced defects in p-type Si at 76 K, measuring Hall effect and electrical conductivity 06 p0975 A69-16868
- Majority and minority carrier trapping in neutron irradiated Si diodes, measuring transient junction capacitance recovery 06 p0975 A69-16869
- Neutron irradiated Si transistors radiation and annealing characteristics determined for inverse configuration 06 p0975 A69-16872
- Nearly abrupt X band Si avalanche IMPATT diodes irradiated by fast neutrons, noting effects on DC and microwave characteristics 06 p0976 A69-16874
- Neutron radiation effects on MOSFET, presenting model for neutron produced ionization in oxide layer 06 p0976 A69-16875
- Gamma radiation effects on gate threshold voltages in modified oxide insulators in MOS structures 06 p0976 A69-16876
- Electron radiation damage in MOSFET devices using bias temperature treatments 06 p0976 A69-16877
- Recovery and long term reliability of Si n-p-n transistors subject to gamma radiation, using military specifications for failure 06 p0976 A69-16878
- Prediction technique for surface effect causing Si bipolar transistors gain degradation under ionizing radiation 06 p0976 A69-16879
- Gain degradation under applied voltage and injection current during low dose gamma irradiation by Co-60 source for bipolar transistors 06 p0977 A69-16880
- Temperature effects on primary photocurrent of base collector and collector substrate junctions of isolated transistors from microcircuits 06 p0977 A69-16881
- Radiation effects on NERVA out-of-core instrumentation, discussing cryogenic temperature measurements and transducer measuring pressure at gamma heating rates 06 p0956 A69-16882
- Inverted transistor parameters required for accurate prediction of electrical and radiation storage time, discussing computer predictions of radiation responses 06 p0977 A69-16884
- Models to predict transient radiation responses in microcircuits, discussing model accuracy for junction and dielectrically isolated circuits 06 p0977 A69-16887
- Combined neutron degradation and gamma induced effects on closed loop system simulated by SECURE program 06 p0899 A69-16889
- Neutron and X ray radiation effects upon gallium arsenide devices including Gunn oscillators, transistors, Schottky barrier diodes and optoelectronic pulse amplifiers 06 p0978 A69-16890
- Radiation tests on Ovonic threshold switches performed with fast neutrons and broadband X rays 06 p0978 A69-16891
- Nuclear pulsed radiation dosimeter based on strain gage measurement of induced thermal expansion, noting separation of neutron and gamma ray components 06 p0922 A69-16892
- Spectral line shapes broadened by electron impacts, taking into account contribution of radiation produced by perturbing electrons 06 p0961 A69-17136
- Space radiation effect on spacecraft components and materials simulated by proton and fast electron bombardment of silicon, glass and skin materials 06 p0906 A69-17612
- Electron formation in lower ionosphere due to cosmic ray-atmosphere interaction, analyzing ionization of subrelativistic and relativistic solar and galactic cosmic rays 06 p0920 A69-17726
- Electron irradiation annealing and modification of 35 and 65 K defects in n-type Ge induced by 1 Mev electrons at low temperature 06 p0980 A69-17757
- Temperature dependence of laser induced damage in plastic Q switch made of polyethylmethacrylate and vanadyl phthalocyanine for ruby laser 06 p0936 A69-17777
- Distribution characteristics of radiation defects in materials irradiated by monoenergetic beams of protons and alpha particles 06 p0981 A69-17878
- Flour beetle under irradiation and weightlessness during space flight, analyzing effects on somatic wing development, germ cells and pupal period 06 p0876 A69-18177
- Storable tubular extendible member (STEM) booms for gravity gradient applications, emphasizing reflective coatings to minimize deflection by solar radiation 07 p1226 A69-18327
- Approximate solution to differential equations describing primary radiation defects transformation into secondary defects in semiconductors 07 p1199 A69-18679
- Hypersonic flow past blunt body near stagnation point, noting surface layer characterized by increased density and decreased entropy of gas 07 p1050 A69-18755
- Boundary value problem of temperature field and heat conduction in transparent media heated by laser radiation producing thermoelastic stresses leading to breakdown 07 p1149 A69-18925
- Vacuum, radiation and freeze drying effects on survival rate of microorganisms, noting influence of protective materials on extent of damage 07 p1064 A69-18943
- Permissible irradiation doses established for spacecraft crews making short and long flights, considering roles of life span, somatic effects, leukemia and genetics 07 p1069 A69-19618
- Inhibition of gamma ray induced DNA degradation by infection with bacteriophage 07 p1069 A69-19709
- Radiation effects on integrated circuits, stressing components design for maximum tolerance 07 p1113 A69-19779
- Bone marrow distribution in dogs as basis for study of compensatory reactions of hemopoietic organs in response to radiation damage 08 p1262 A69-19835
- Propyl gallate radiation shielding effect variations with proton and gamma ray bombardment, noting growth and development of potato tuber eyes 08 p1262 A69-19927
- Local shielding effectiveness of dogs against proton irradiation at minimum lethal dose, noting bone marrow role 08 p1263 A69-19939
- Transparent dielectrics destruction by laser radiation noting stress development in medium 08 p1324 A69-19947
- Linivll model for describing elementary phenomena of electronic equipment in terms of physical data applied to irradiated semiconductor diode and transistor 08 p1280 A69-19974
- Highly ionized low density plasmas production by strong UV radiation 08 p1360 A69-20080
- Synergistic effects of prolonged heat exposure and whole body irradiation with ionizing radiation on survival time in hamsters 08 p1263 A69-20174
- Collection of papers on thermal problems in aerospace medicine covering intense heat, cutaneous vasomotor and sudomotor control, water immersion, etc 08 p1263 A69-20667
- Aircrew members skin temperature changes in response to intense diffuse thermal radiation, noting psychological response to exposure [AGARDOGRAPH-111] 08 p1264 A69-20669
- Thermoregulatory reactions of human body to sharp increase of ambient radiant temperature [AGARDOGRAPH-111] 08 p1264 A69-20670
- Skin and subcutaneous temperature during exposure to intense thermal radiation, discussing estimation of subcutaneous temperature from skin temperature data [AGARDOGRAPH-111] 08 p1264 A69-20671
- Thermal radiation effects on cutaneous vasomotor and sudomotor control of human organism [AGARDOGRAPH-111] 08 p1265 A69-20672
- Protection against burn producing intense thermal exposures, noting double layer of fire resistant material [AGARDOGRAPH-111] 08 p1266 A69-20674
- Human reactions to increasing heat exposure, noting thermoregulation and metabolic and evaporative heat loss [AGARDOGRAPH-111] 08 p1265 A69-20675
- Biological effects of laser radiation on mammalian retina, noting thermal injury [AGARDOGRAPH-111] 08 p1266 A69-20676
- Microwave radiation effects on body weight and peripheral blood hemograms of mice, discussing maximum safe exposure related to generator output 08 p1266 A69-20678
- Visceral lesions observed in mice and rats exposed to ultrashort waves indicating no pathological modification of physiology of reproduction [AGARDOGRAPH-111] 08 p1266 A69-20679
- Nongray radiation effects on compressible turbulent free jet mixing of nonsimilar gases, using stepwise spectral absorption coefficient and Beer law 08 p1253 A69-20844
- Ionizing radiation effects on space charge of MOS devices, showing electron-hole pairs within oxide and electron injection from cathode 08 p1373 A69-20864
- Meteorites radiogenic and cosmic ray exposure ages, orbits and parent bodies, discussing H and L group chondrites 08 p1405 A69-20928
- Ablation rate of Saint-Severin amphoterite based on heavy primary cosmic ray track densities in surface samples 08 p1406 A69-20933
- Luminous discharge at nonabsorbing surface when exposed to single pulse ruby laser beam, suggesting photoionization in surface layer 08 p1327 A69-21021
- Angular distribution of photon radiance of spherical satellite irradiated by Lambertian earth, assuming nonemissive satellite 08 p1311 A69-21095
- Electron bombardment effects on performance characteristics of UV gratings 08 p1318 A69-21097
- Alkali halide crystals destruction by laser radiation for estimating optical strength, discussing impact ionization hypothesis 08 p1328 A69-21188
- Solid state laser radiation damage in polymers during tensile and compression loads using microstructural analysis 08 p1328 A69-21190
- Dislocation channeling process in polycrystalline Nb subject to tensile deformation after neutron irradiation 09 p1521 A69-21345
- Photoelectric ejection of grain electrons by solar quanta balance with solar wind electron capture by grain for interplanetary grain equilibrium potential 09 p1593 A69-21655
- Upper atmospheric density relation to AE indices sum and solar radio flux during geomagnetic disturbances 09 p1488 A69-21657
- Electron irradiation effect on surface potential of thermally grown silicon dioxide layers, noting conductivity and annealing effects 09 p1557 A69-21743
- Earth reflected solar radiation and stability of satellite thermal control coatings, noting intensity distribution shifting toward UV region and coatings degradation rate 09 p1579 A69-22174
- Electron beam radiation curing of mercaptan terminated butadiene-acrylonitrile liquid copolymers at ambient temperatures in air 09 p1512 A69-22368
- X ray irradiated dogs subjected to heat stresses to determine thermoregulatory ability 09 p1445 A69-22548
- Pulsed and CW microwave power effects on rabbit eyes, noting lens opacities produced 10 p1648 A69-23185
- Chemical and biological means of safeguarding body of astronaut against ionizing radiation and vibration 10 p1648 A69-23297
- Alkali halide single crystals disintegration by laser radiation differs as function of crystal physicochemical properties and band structure 10 p1745 A69-23322

IR radiation effects in cadmium sulfide crystals with green edge emission at low temperatures, discussing luminescence, photoconductivity and conductivity glow curves

10 p1746 A69-23565

Stress effect on laser damage crack orientation in transparent organic dielectrics, estimating gas pressure in cracks

10 p1703 A69-23621

Electron bombardment produced clustered displacements, paired vacancies and interstitial atoms in Si, discussing possible mechanism for developing defects

10 p1747 A69-23713

Early disturbances in active migration of potassium 42 ions in irradiated erythrocytes in rats, showing relation between influx and energy exchange in cells

10 p1647 A69-23966

Polyesters reaction with dimethyl p-phenylene diamine compared under UV exposure from carbon arc and natural sunlight

10 p1716 A69-23978

Annealing temperature of radiation defects in phosphorus doped silicon, discussing isochronal recovery characteristics of solar cells with different donor and oxygen concentrations

10 p1747 A69-24006

Soviet book on space radiobiology, discussing somatic effects, influence of flight factors, relative biological effectiveness of various radiations and radiation safety

11 p1827 A69-24263

Threshold criteria of gas phase thermal ignition for cellulose materials, considering heating by radiant energy

11 p1940 A69-24474

High energy radiation effects on electronic components in space missions, noting simulation tests and shielding

11 p1946 A69-24521

Nonthermal intergalactic bremsstrahlung model as isotropic X ray background due to subcosmic electron interactions with thermal ionized gas in expanding universe

11 p1947 A69-24595

Probability of ocular damage for illumination by pulsed laser beam transmitted through atmosphere, developing safety nomograph for eye hazard analysis

11 p1830 A69-24843

Rabbit corneal damage thresholds for Gaussian beams of carbon dioxide laser IR radiation at various exposure times

11 p1830 A69-24844

Biological effects of cosmic ionizing radiation in supersonic commercial aircraft at high altitudes, showing spatial distribution based on balloon experiments

11 p1830 A69-24865

Solar cells degradation by charged particles in space, considering protection by filter, silicon properties and use of cadmium cells

11 p1825 A69-24870

Electron, proton and gamma ray radiation effects on thin film CdS, GaAs and CdTe solar cells

11 p1825 A69-24872

Drift and tunnel effect of MOS transistors under ionizing electron and X ray irradiation, considering fabrication, electrical characteristics and D-2 satellite tests

11 p1848 A69-24873

Planar transistor gain degradation under weak ionizing radiation, considering operating voltage and temperature conditions

11 p1848 A69-24874

Laboratory simulation methods for cosmic nuclear radiation, discussing dosimetry methods

11 p1862 A69-24875

Single crystal solar cell degradations in space, duplicating radiation effect on minority carriers lifetime by laboratory tests

11 p1826 A69-24876

Lasers applied to simulation of effects of X ray or gamma ray bursts on semiconductor devices

11 p1896 A69-24877

Spherical and rod-plate spark gap response voltage as function of sawtooth wave, cosmic, gamma and UV radiation

11 p1851 A69-25086

Ionizing radiation effects on combustion of ammonium perchlorate compacts with and without fuel addition, considering X ray, electron and plasma radiation

11 p1941 A69-25194

Microorganism survival in space for exposure to solar UV radiation on balloons, rockets and satellites

11 p1828 A69-25457

Abiogenic synthesis of prebiological membranes under assumed primitive earth conditions by UV radiation of alkanes on phosphate and Mg ions aqueous solutions

11 p1828 A69-25462

Calcite crystals stability anisotropy to ruby laser radiation, studying threshold power as function of beam polarization

11 p1900 A69-25553

Laser radiation in vacuum effects on metals and alloys

11 p1906 A69-25684

Gas ionization by UV radiation emitted by pellet, target or portion of gas in laser beam focus, using polished metallic mirrors

11 p1901 A69-25754

Resonance radiation output effect on electron distribution according to energies and concentration in low temperature plasma, solving relevant kinetic equations

11 p1935 A69-25757

Laser beam damage in glass blocks, noting high speed photographic study and absorption of light by inclusions

12 p2117 A69-26193

Morphological microchanges in solar plexus ganglia of white rats after X irradiation

12 p2019 A69-26347

Soviet monograph on nuclear radiation effect on structure and properties of metals and alloys covering electron, gamma and neutron radiation

12 p2114 A69-26469

Solar flare proton radiation effects on earth satellites and solar probes, considering sunspot cycle 20, earth magnetic field shielding and Van Allen radiation belts

12 p2151 A69-26873

Neutron irradiated Nb single crystals tensile tested over temperature range, discussing athermal radiation hardening

13 p2275 A69-27368

MOS and junction transistors damage due to radiation, noting decrease in collector current under fast neutron dose

13 p2227 A69-27514

Frenkel defects in light irradiated p-type InSb single crystals at subthreshold radiation energies

13 p2318 A69-27885

Outgassed condensation effects in vacuum on magnesium difluoride overcoated UV irradiated Al mirrors, including temperature effects, Lyman alpha reflectance and IR analysis of deposits

13 p2299 A69-28015

Sublethal ionizing radiation doses effect on hemolytic immunocompetent spleen cells in mice upon using chemical radiation protectors

13 p2210 A69-28334

Forward current decrease in Si mesa diodes under fast neutron irradiation ascribed to increase in base resistance

13 p2236 A69-28549

Radar antenna radiation effects on man and biological material dependent on absorption degree and emission characteristics including wavelength, peak and mean power

13 p2215 A69-28597

Distribution characteristics of radiation defects in materials irradiated by monoenergetic beams of protons and alpha particles

14 p2503 A69-28787

Book on defects and radiation damage in metals covering collision cascades, point defects clustering and impurities behavior

14 p2503 A69-28889

Radiation damage in yeast cells irradiated by high energy C 12 ions evaluated from survival rate study

14 p2406 A69-28915

Ruby laser beam effects on CdS crystals optical properties, measuring absorption spectrum and light dispersion in crystal

14 p2457 A69-28999

Optical rectification effect in lithium metaniobate crystals under neodymium laser radiation, comparing results with data for potassium dihydrophosphate crystals

14 p2458 A69-29168

Sirene 302 thermionic converter lifetime during irradiation in Triton immersion pile, considering effects on conversion efficiency

14 p2481 A69-29198

Cylindrical in-core thermionic converters performance and life tests, discussing diode design, operation data and irradiation studies

14 p2399 A69-29199

Postirradiation investigation of uranium dioxide fuelled thermionic emitters by evaluating released fission gases, noting different neutron fluxes metallurgical effects

14 p2481 A69-29200

Radiation effects on Cs thermionic converter, discussing radiation interaction with alkaline atoms to complete space charge neutralization by supplementary ion creation

14 p2404 A69-29261

Histological changes in rat skin after 13 Mev proton irradiation, evaluating biopsies in tissue culture

14 p2407 A69-29299

Solar radiation pressure effects on satellite models in circular equinoctial orbits

14 p2522 A69-29595

Radiative effect on rotating gaseous magnetic mass stability in thermodynamic equilibrium, including small oscillations stability

14 p2522 A69-29596

Heat transfer at gas flow stagnation point past blunt body under radiation from air layer in shock wave wake, using gray gas model

14 p2390 A69-29614

Solar UV radiation effects on processes in comet head, interpreting surface brightness distribution of comet 1959k in terms of photodissociation

14 p2525 A69-29717

Neutron irradiation effect on efficiency and other parameters of IMPATT diode

14 p2423 A69-29761

Slow neutrons irradiation compensated high resistivity p-InSb current instability

15 p2666 A69-30058

Protostars collapse and flare up computations, including radiative and convective energy flow terms in hydrodynamic equations of motion

15 p2680 A69-30206

Radiation effect enhancement in supersonic plasma jet cooled by rapid expansion, giving energy equation for electron cooling rates to analyze electron temperature

15 p2658 A69-30254

Computer codes describing nuclear weapons effects associated with X ray transport, neutron transport and X ray interactions with material, fireball, blast environments, etc

15 p2652 A69-30381

Mortality kinetics of *Drosophila melanogaster*, comparing effects of gamma radiation-induced life shortening and natural aging

15 p2555 A69-30444

MOS devices for radiation environments utilizing aluminum oxide as gate insulator for developing resistance to radiation damage

15 p2577 A69-30595

Planar bipolar transistors degradation under thermal and ionizing radiation stresses, analyzing surface recombination currents of silica films and silica-silicon interfaces

15 p2625 A69-30826

Electrical parameters measurement for homogeneous batches of planar silicon transistors subjected to cobalt 60 gamma rays, considering isochronal and isothermal annealing

15 p2625 A69-30827

High temperature effects on electron and X ray irradiated MOS transistors for space charge analysis and defects in silica films

15 p2625 A69-30828

MIS devices with dielectric properties avoiding positive space charge formation, discussing radiation effect

15 p2625 A69-30829

Logic family with low power consumption subjected to 1 Mev electrons analyzed within telemetry circuit concept for space application

15 p2625 A69-30830

Unitary sorting influence on reliability of planar transistors subjected to irradiation recovery cycles and scaled stresses

15 p2626 A69-30834

Passive components reliability subjected to ionizing radiation for families, types, batches and individuals

15 p2627 A69-30838

Thermal radiation effects on subsonic flow of ideal gray gas, calculating streamwise variations of flow properties

15 p2717 A69-30908

Radiobiology of *Tradescantia* clone orbited in Biosatellite 2, analyzing space effects on spontaneous and radiation induced mutation and cytological changes

15 p2556 A69-31321

- Admissible radiation doses for space crews and ionizing radiation protection, studying long term radiation effects on dogs
15 p2557 A69-31344
- Escherichia coli B/r survival in high vacuum at different temperatures irradiated with UV or X rays tested as colony forming ability
15 p2557 A69-31388
- Mathematical solutions of Einstein cosmological equations for radiation universe, discussing model limitations for universes older than 5-6 billion years
15 p2700 A69-31496
- Microwave induced ionization wave propagation in rare gases, noting rapid electron density increase at wave front and subsequent slow plasma decay
16 p2818 A69-31671
- Lasing influence on electron energy distribution in gas discharge measured with Langmuir probe, showing electron-electron interaction insufficient to maintain equilibrium
16 p2796 A69-31772
- Gravitational effect of electromagnetic radiation evaluated on test particle using Einstein field equations
16 p2812 A69-32049
- Shock wave propagation in isothermal atmosphere, discussing radiation and ionization effects on thermal jump
16 p2858 A69-32207
- Solar corpuscular and UV radiation variation relationship to midlatitude airglow intensity in O I line
16 p2850 A69-32322
- Radiation effect on inorganic solids isothermal decomposition induction period, deriving equations for conditions representing various kinetics combinations during irradiation
[WSCI PAPER 69-21] 16 p2832 A69-32359
- Radiation and multiple reflection effects on radiant flux density distribution in cylindrical receivers of solar power installations
16 p2741 A69-32799
- Dielectric breakdown thresholds and cavitation in organic liquids observed during Q switched and pulsed ruby radiation
17 p2979 A69-32826
- Neutron bombardment and ionizing radiation resistance of aluminum oxide MOS devices using gate insulator fabricated by plasma anodization
17 p2935 A69-32888
- Myocardial changes in rabbits after general chronic ionizing irradiation attributed to lower cardiac activity, hypotrophy and dystrophy
17 p2906 A69-32929
- Corneal epithelium chromosome rearrangements in gamma irradiated white adult mice, noting radiation dosage and duration
17 p2907 A69-32944
- Aluminum capsule used in test reactor to irradiate explosive and propellant samples, determining radiation effects
17 p3004 A69-32945
- Simulated solar wind environment effects on zinc oxide/potassium silicate and lanthanum oxide/potassium silicate spacecraft thermal control coating pigments
[AIAA PAPER 69-642] 17 p2991 A69-33273
- UV irradiation effects on ZnO spacecraft thermal control coating pigments, discussing photo-Hall, luminescence and electron paramagnetic resonance measurements
[AIAA PAPER 69-639] 17 p2992 A69-33288
- Gas products evolved from selected thermal control coating materials during UV radiation in vacuum, noting permanent reflectance loss
[AIAA PAPER 69-640] 17 p2992 A69-33289
- Nonuniform wall radiation production of radiative equilibrium temperature and flux distributions in gray medium, discussing various approximation methods of solution
[AIAA PAPER 69-633] 17 p3072 A69-33294
- Electron energy effects on reflectance degradation and recovery of thermal control materials in vacuum, reporting test results for various protective coatings
[AIAA PAPER 69-643] 17 p3005 A69-33306
- Cosmic ionizing radiation effects on electronic elements operation based on radiation and matter interaction principles
17 p2937 A69-33583
- X irradiation and temperature effects on flour beetle/Tribolium confusum/ pupae, noting wing abnormalities and pupal stage duration
17 p2910 A69-33748
- Fast neutron irradiation effect on niobium nitride current carrying capacity, showing enhancement
17 p3008 A69-33765
- Damage thresholds to ocular tissues from laser radiation, presenting comparative theoretical curves and recommended safe working levels
18 p3097 A69-34312
- Space flight factors, ionizing radiation and combined effects on vitamin C content in onion bulbs
18 p3095 A69-34729
- Radiosensitivity of potatoes to gamma ray and proton irradiation applied to whole tubers and to isolated eyes before planting
18 p3095 A69-34730
- Radiation effects produced by high temperatures of shock waves and nuclear explosion fireballs, air cooling, laser emission-matter interaction and optical phenomena
18 p3230 A69-34926
- Photodisintegration of ultrahigh energy cosmic rays by universal radiation field, analyzing implications on origin and propagation time
18 p3188 A69-35006
- Alkali halide crystals destruction by laser radiation for estimating optical strength, discussing impact ionization hypothesis
18 p3152 A69-35157
- Solid state laser radiation damage in polymers during tensile and compression loads using microstructural analysis
18 p3152 A69-35159
- Nuclear environment irradiation effects on materials, emphasizing radiation chemical processes affecting polyimide and copolymer of styrene and alpha-methylstyrene
19 p3356 A69-35530
- Lithium doped solar cell irradiation by strontium 90 radioisotope, discussing electron flux rate, spectrum and recovery rates
19 p3251 A69-35693
- Imperfection photoconductivity in electron irradiated Li-doped Si annealed at room temperature, noting level rearrangement in O rich material
19 p3382 A69-35696
- Proton irradiation effects on current degradation at fixed voltages of silicon solar cells with coverslips
19 p3252 A69-35701
- Optimum solar cell cover glass systems selected by studying interplanetary space environment effects of proton impact, temperature and concurrent illumination on radiation damage
19 p3253 A69-35702
- Cadmium sulfide solar cells and Kapton coverslips under proton irradiation, noting annealing of damage in samples exposed to air
19 p3253 A69-35705
- Postirradiation growth of cultured Chinese hamster cells exposed to UV light, including comparison with X irradiation
19 p3257 A69-35975
- Biological effects of radioactivity and X rays irradiation of whole body and cells, considering DNA degradation
19 p3257 A69-35978
- Cosmic ray produced radionuclides and rare gas isotopes from Saint-Severin meteorite surface, showing relative Kr spallation mass yields dependence on cosmic ray energy spectra
19 p3410 A69-36093
- Meteoritic cosmic ray exposure time from method based on spallogenic Ar 36/Ar 38 ratio, noting impracticality for exposures longer than 5 million years
19 p3418 A69-36138
- Inelastic collisions and radiation effects on transport properties and shock structure in high temperature gases, obtaining density and temperature profiles
19 p3448 A69-36149
- Photocurrents and recombination luminescence in n-type diamonds subjected to UV, TI 204 and X ray irradiation indicating local electron centers formation
19 p3383 A69-36167
- Gas dynamics of material slah under radiation impact assuming thermal equilibrium reemission, discussing equations of motion and mean free path as function of frequency
19 p3449 A69-36355
- Free radicals destruction rates by gamma irradiation at 77 K measured as first order function of dosage, using electron spin resonance spectroscopy
19 p3265 A69-36376
- Photomechanical and electromechanical effects in semiconductors, considering indentation microhardness decrease caused by light irradiation or electric field
19 p3386 A69-36526
- Statistical relation between expansion velocities and radii of planetary nebulae due to Lyman-c and diffuse Lyman-alpha radiation
19 p3426 A69-36575
- Previous radiation exposure effect on photographic film noting increased sensitivity at UV frequencies
19 p3314 A69-36626
- Amorphous semiconductors based on noncrystalline materials compared to crystalline materials, noting radiation damage resistance
19 p3392 A69-36660
- N-type GaAs optical properties after proton irradiation, noting transmission spectra dependence on initial electron concentration and irradiation dose
20 p3582 A69-36969
- UV solar radiation variation effects on Mars and Venus upper atmosphere temperatures
20 p3595 A69-37136
- Astronomical observatory photomultiplier cell dark current fluctuations, showing statistical resemblance to binomial distribution
20 p3599 A69-37470
- Primitive low energy Fe-group nuclei irradiation of meteoritic crystals from studies of pyroxene and feldspar from meteorites, discussing astrophysical implications
20 p3590 A69-37569
- Life sciences and space research on biological effects of radiation in space - COSPAR Conference, Tokyo, May 1968
20 p3474 A69-37612
- Microorganisms death by exposure to high intensity visible and UV light, discussing effect of endogenous photosensitized oxidation on caratoid-containing Rhodotorula glutinis
20 p3475 A69-37613
- Radiation effects on microorganisms and plants during space flight on Biosatellite 2 and Gemini 11 missions
20 p3476 A69-37617
- Insects mutational responses to space flight and associated radiation on biosatellite 2 compared with ground based controls
20 p3476 A69-37618
- Biological effects of cosmic radiation on crewmen and protection measures, noting ground radiobiological and medical hygienic investigations
20 p3478 A69-37628
- Aluminum doped silicon solar cell energy loss coefficient under proton and high energy electron irradiation
20 p3465 A69-37911
- Radiation effects due to high altitude thermonuclear explosion measured by satellite, estimating fragments longitudinal drift velocity, plasma cloud expansion rate and fragment distribution
20 p3532 A69-37960
- Earth radiation effect on space vehicle, using diffusely radiating sphere model
20 p3606 A69-37963
- Transient effects of nuclear radiation bursts on dielectric properties of refractory low loss ceramics at L, S and X bands
20 p3584 A69-38065
- Nitrogen gas breakdown threshold dependence on pressure during picosecond ruby laser pulse, discussing photoionization leading to breakdown in electromagnetic wave field
20 p3555 A69-38067
- Gamma radiation effects on behavior of nickel and cadmium electrodes in alkaline solution
20 p3466 A69-38072
- Fast neutron irradiation effect in Ge crystals, using X ray diffraction and volumetric measurements
20 p3584 A69-38125
- Photospheric radiation field role in temperature inversion of stellar chromospheres with dominant H ion opacity, postulating mechanical energy dissipation
20 p3613 A69-38173
- OH emission rise after sunset and decay at sunrise attributed to strong solar dissociation of ozone
21 p3712 A69-38520
- Breakdown mechanism in GaAs, Si and CdSe semiconductors under intense light pulses ascribed to thermal impact
21 p3737 A69-39042
- Collection of papers on mechanisms of biological action of ionizing radiation covering radiation sickness dynamics, radiation damage, X ray effects, etc
21 p3656 A69-39049
- Intraperitoneal high polymer DNA administration normalizing effect on DNA and RNA contents in liver, spleen and intestinal mucosa of white rats exposed to X rays
21 p3657 A69-39050

Single large X ray dose depressive effect on aminotransferase activity in rabbit blood serum, liver, kidney, heart, spleen, lungs, etc

21 p3657 A69-39051

Cholesterol-protein metabolism in muscles, liver and cerebrum of lethal X ray exposed guinea pigs compared with unexposed group

21 p3657 A69-39052

Single X ray dose effect on alpha-amylase and alpha-glucanophosphorylase in rabbit liver tissues and blood serum

21 p3658 A69-39055

Successive X ray doses effect on oxidative phosphorylation of vitamin B 1 in white rats liver tissue ultrastructure during and after irradiation, establishing thiamine biosynthesis suppression

21 p3658 A69-39056

Photographic and photometric study of absorption and reflection of ruby laser light incident on biological objects

21 p3665 A69-39060

Ionizing radiation histological and neurohistological effects in rabbits esophagus, stomach and ileocecal region intramural plexes

21 p3659 A69-39063

Frenkel defects in light irradiated p-type InSb single crystals at subthreshold radiation energies

21 p3782 A69-39144

Somatic radiation effects on human organism related to manned space flights

21 p3660 A69-39172

Pumping and excitation spectra of solid solutions of cryptocyanine in glycerine irradiated by ruby laser, discussing population inversion and scattering and vibrational transitions

21 p3740 A69-39546

Particles integral and differential fluxes spectral distribution calculation for determining radiation load for synchronous satellite

22 p4035 A69-39909

Microwave radiation hazard data from experimental animals and surveys on humans, considering nonthermal effects, genetic and neurological effects, etc [MPI PAPER DA-6]

22 p3889 A69-40104

Curvature and temperature distribution in nonrotating long solid cylinders under solar radiation in interplanetary space

22 p4043 A69-40546

Restoration processes in *Chlorella pyrenoidosa* to distinguish intense and less intense gamma ray irradiations

22 p3878 A69-40792

Gain modification from spectral splitting of optical transition by incident light wave on higher frequency coupled transition

22 p3965 A69-41125

Hemoglobin inhomogeneity in rats irradiated with lethal doses of X rays and fast neutrons, using fractions prepared by column chromatography

22 p3888 A69-41274

Thin films of infectious DNA of bacteriophage bombarded by slow protons, determining differential inactivation cross sections

23 p4081 A69-41431

Laser pulse effects on bones of rats, observing metabolic deviations in Ca 45 uptake

23 p4101 A69-41464

Rabbits long term reversible retinal function changes due to short high intensity light flashes, noting ERG suppression

23 p4084 A69-41468

S-4 human blood experiment during Gemini 2 flight, studying spaceflight ionizing radiation interaction effects on single and multiple break chromosome aberrations

23 p4085 A69-41600

Exposure rate influence on mechanical properties of polymer binder cross-linked by gamma radiation exposure from cobalt isotope source

23 p4179 A69-41711

Radiation effects on population kinetics of granulocyte system forming bone marrow, discussing radiosensitivity and radiation-induced granulocytopenia

23 p4090 A69-41965

Insect gametes response to space flight and radiation in reduced gravity including plants and microorganisms

23 p4091 A69-42050

Oxygen effect on X ray induced somatic crossing over frequency in *Drosophila melanogaster*, noting bristle spots number modification on abdominal tergites

23 p4099 A69-42118

Whole body X irradiation effect on protein degradation in mice, using radioactive I labeled albumin

23 p4099 A69-42151

Apollo 11 observations of lunar surface glazing, considering radiation heating due to solar outbursts, rocket exhaust effects, shock heating or volcanism, erosion, etc

23 p4216 A69-42202

Human body responses to microwave irradiation, discussing thermal and nonthermal effects and damage to eyes and to information storage in living systems

23 p4111 A69-42216

Neodymium laser radiation effect on electrical and histomorphological properties of liver in rats and hamsters

23 p4111 A69-42344

Gamma radiation effect on AgCl-Cu redox state in AgCl activated, heat treated Na-Al-B-Si glass, using EPR method

23 p4180 A69-42471

X band pulsed microwaves effect on skin metabolism including respiratory activity, biochemistry and biosynthesis of intercellular materials, etc

24 p4270 A69-42575

Albino guinea pigs respiration rates and ear skin histology after exposures to coherent ruby laser light

24 p4270 A69-42578

Microwave radiation effects on biological systems, discussing categories according to radiation protection guide /RPG/ numbers, tissue properties and interactions

24 p4270 A69-42579

Cosmic rays properties and dynamical effects in Galaxy disk including origin, lifetime, magnetic field instability, etc

24 p4366 A69-42695

Biological and physiopathological effects of UHF electromagnetic radiation of radar antennas, reviewing localized effects

24 p4273 A69-42996

Thermal calculations of objects near lunar surface, considering IR emission directivity effects

24 p4385 A69-43254

Stagnation region heat transfer with nongray gas subjected to external radiation using two step continuum absorption coefficient model

24 p4415 A69-43590

Contraststreaming self gravitating gas streams stability taking into account thermal conduction and radiation effects

24 p4388 A69-43638

Measurement technique using dielectric waveguides for studying microwave fields influence on and energy imparted to body tissue

24 p4279 A69-43705

RADIATION HAZARDS

Laser radiation hazards due to direct or reflected viewing determined by evaluating output characteristics and environmental factors effects

02 p0204 A69-12497

Solar flare radiation hazard in long duration space flight, discussing radiation distribution and dosage in human body

03 p0371 A69-13480

Radiation accidents involving sudden brief exposure to penetrating radiation

03 p0374 A69-13502

Biological effects of VHF electromagnetic radiation from radar antennas

05 p0715 A69-16701

Pilot protection against laser hazards, discussing protective eyeglasses, fireproof clothing and materials

07 p1072 A69-19436

Radiation hazards during long duration space flights and suitable radiation shield design through radiobiological investigation

08 p1261 A69-19826

Air carrier liability for nuclear weapons damage, discussing international agreements

11 p2003 A69-24260

Probability of ocular damage for illumination by pulsed laser beam transmitted through atmosphere, developing safety nomograph for eye hazard analysis

11 p1830 A69-24843

Laser radar eye hazard for fixed and variable transmitter intensities, considering eye damage magnitude and successful detection magnitude of transmitter intensity

11 p1830 A69-24845

Soviet book on quality control of materials and machine parts by ionizing radiation covering radiation hazards and protection

13 p2268 A69-27935

Radar antenna radiation effects on man and biological material dependent on absorption degree and emission characteristics including wavelength, peak and mean power

13 p2215 A69-28597

Radiation exposure during orbital flight assessed for adverse effect on space stations and laboratories personnel, discussing shielding and dose rate tables

20 p3481 A69-37339

Cosmic radiation exposure of passengers and crew in supersonic transport at high altitude

22 p4002 A69-40093

Microwave radiation hazard data from experimental animals and surveys on humans, considering nonthermal effects, genetic and neurological effects, etc [MPI PAPER DA-6]

22 p3889 A69-40104

Solar flare radiation hazard to SST crew and passengers, discussing onboard and ground based warning systems and ICAO requirements

23 p4063 A69-41830

Human body responses to microwave irradiation, discussing thermal and nonthermal effects and damage to eyes and to information storage in living systems

23 p4111 A69-42216

Radio and microwaves biological effects, discussing differences between U.S. and Soviet assessments of radiation hazards

23 p4099 A69-42516

Laser hazard probability assessment in various applications, discussing power characteristics, attenuation by absorption and scattering and radiant energy spatial distribution

24 p4327 A69-42576

RADIATION HEATING

U RADIANT HEATING

RADIATION INDICATORS

U DOSIMETERS

U INDICATING INSTRUMENTS

RADIATION INJURIES

Prophylactic and therapeutic vitamin and organic compounds complexes in radiation damage reduction and death prevention for dogs exposed to X rays

02 p0197 A69-11493

Chronic gamma radiation biological damage in rats exposed to maximum nonlethal to minimum lethal doses for various periods

02 p0197 A69-11494

Radiation structural and transcription damage to deoxyribonucleic acid /DNA/, noting postirradiation repair on molecular level

03 p0372 A69-13489

Mammalian cell survival, chromosome abnormalities and recovery from heavy ion and X ray irradiation

03 p0373 A69-13492

Radiation accidents involving sudden brief exposure to penetrating radiation

03 p0374 A69-13502

Cosmic radiation and hibernation physiopathology of human organism, noting beryl as radiation resisting agent in spacecraft design

06 p0874 A69-17645

Dermal injury predictability for exposure to thermal radiation based on mathematical model using temperature-time histories

06 p0875 A69-17840

Microvillar bleb formation in proton irradiated primate hepatocytes with electron microscope, noting sinusoidal lumen

10 p1641 A69-23045

Laser radar eye hazard for fixed and variable transmitter intensities, considering eye damage magnitude and successful detection magnitude of transmitter intensity

11 p1830 A69-24845

RADIATION INTENSITY

U RADIANT FLUX DENSITY

RADIATION LAWS

NT KIRCHHOFF LAW OF RADIATION

Radiation problem in general theory of relativity investigated by momentum energy tensor, formulating criterion for gravitational radiation

01 p0116 A69-10435

Radiation models using discrete radiator ensembles having applications to analysis of forward and backscatter from rough surfaces, clutter and chaff models, etc

01 p0030 A69-10556

Planck law for black body radiation spectrum theoretically derived on basis of classical Lorentz-invariant electromagnetic radiation at absolute zero temperature without quantum assumption

22 p3982 A69-41001

RADIATION MEASUREMENT

Auroral zone X ray measurements emphasizing temporal intensity variations, energy spectra changes and source region movements during magnetospheric substorms

08 p1379 A69-20534

Energy spectra of carbon and oxygen nuclei in primary cosmic radiation, comparing results to earlier measurements and satellite observation

08 p1380 A69-20632

Aircraft measurements of earth atmosphere radiance in 8-14 micron window compared to calculated values as functions of altitude

08 p1311 A69-21094

Taurus A flux density measurement at 4.3 mm with 36-ft antenna at National Radio Astronomy Observatory to determine spectrum unambiguously

09 p1591 A69-21450

Cosmic ray intensity diurnal variations from super neutron monitor observations, discussing anisotropy resulting from reduced intensity in gardenhose direction in ecliptic plane

09 p1576 A69-21706

Solar flare energetic electron access to polar zones from measurements made by nine channel magnetic spectrometer on polar orbiting vehicle

09 p1577 A69-21709

Elektron 4 satellite radio emission data transmitted from July to December 1964, noting month-to-month variations in mean radiation level

09 p1578 A69-21776

Contour maps of supernova remnants HB 9, Simeis 147 and IC 443, noting spectra showing radiation nonthermal

09 p1604 A69-22408

Atmospheric thermal sounding by measuring outgoing thermal radiation with infinite resolution device, describing regularization method

09 p1491 A69-22707

Weak X ray sources at 20-100 Kev photon energies observed during balloon flight, finding hard rays from Ara XR-1 and Nor XR-1

09 p1583 A69-22763

High energy X ray observational data for Sagittarius sources scanned by active telescope during February 1968 balloon flight

09 p1583 A69-22764

Diffuse cosmic X ray background measured during balloon flight with actively shielded and collimated detector

09 p1584 A69-22767

Excess radiation in equatorial regions studied on-board Cosmos 137, noting contribution of primary particle multiplication to secondary radiation

10 p1783 A69-23922

Solar UV radiation measurements by balloon-borne monochromatic illuminator, using Cd-cathode photomultiplier detector

11 p1945 A69-24410

Small microwave antenna calibration by method of two black bodies exposed to different temperatures, reducing influence of cloudiness and humidity

11 p1844 A69-24450

Radiation measurements quality by wide angle receivers of Cosmos 122 satellite analyzed, showing agreement with data by other methods

11 p1912 A69-24830

Second tacite sounding rocket test for measuring UV radiation in transition zone between upper ionosphere and space

11 p1887 A69-25213

Radiation dose and radioactive isotopes induced in astronaut body by cosmic rays of various energies

11 p1831 A69-25463

H beta emission line in night sky spectrum measured with gas pressure scanned Fabry-Perot interferometer in Italian alps

12 p2074 A69-26963

Solar radiation in short wave, UV and X ray range recorded by rockets, probes and satellites, notably Elektron 2 probe

13 p2326 A69-27355

Cosmic X ray background measurements and Crab Nebula observation during sounding rocket flight

13 p2326 A69-27570

Dynamic Michelson interferometer equipped with Ge detector to obtain spectra of airglow from 1.2-1.6 microns

13 p2252 A69-27587

IR emission from quasars, noting quasar 3C 273 B and synchrotron mechanism probability

13 p2342 A69-27598

Radiation measurements by Cosmos 122 satellite over various regions, determining radiation temperature, long wave heat flux and albedo

13 p2291 A69-27726

Medium energy trapped and dumped protons at high latitudes and auroral zone, using semiconductor radiation detectors on ESRO 1 satellite

13 p2328 A69-27756

Cardiac output determined simultaneously in adult male humans by thoracic impedance changes and radioisotope dilution

14 p2408 A69-29304

Meteorological elements variation from measuring earth radiation in different spectral regions by satellites, determining temperature and humidity profiles

14 p2477 A69-29828

Periodic stellar radiation at 3.5 mm from pulsar CP1919 measured by paraboloid antenna and radiometer

14 p2529 A69-29978

Flux densities at 2695 MHz for radio sources, tabulating measured data, discussing spectral distribution indices

15 p2696 A69-31206

Disk and transmission line microstrip resonators radiation, measuring fractional amount of radiated power

16 p2760 A69-31946

Diurnal variations of IR atmospheric oxygen bands in airglow observed with filter photometer on balloon flights

16 p2776 A69-32091

Continuum radiation measurements for bremsstrahlung and recombination of neutral and ionized nitrogen

16 p2823 A69-32466

Atmospheric thermal sounding by measuring outgoing thermal radiation with infinite resolution device, describing regularization method

16 p2782 A69-32487

Neutron and photon transport properties in liquid hydrogen obtained from measuring radiation environment in propellant tank mockup suspended above NERVA reactor

[AIAA PAPER 69-475] 16 p2810 A69-32716

Antenna three dimensional radiation patterns, describing error analysis of various pattern measurement techniques

17 p2942 A69-34086

Metallic aerosol generator application in shock tube spectrometric measurements of radiation by molecules occurring as solids before decomposition to vapor phase

18 p3099 A69-34461

Differences concerning utilization of IR detectors, discussing nomenclature, fluctuations and definitions of detection, translation and readout

19 p3308 A69-35905

Spectral parameters effect on IR instrument SNR, discussing range equations of point and extended sources and radiation-noise-limited detectors

19 p3310 A69-36061

Radiometric measurement, discussing characteristics and calibration of instruments for measuring radiant intensity or radiance

19 p3311 A69-36071

Injection lasers external quantum efficiency, stimulated and spontaneous emission and photoluminescence measurements

19 p3337 A69-36528

Spherical, cylindrical and toroidal electrostatic analyzers with symmetrical angular characteristics for solar wind investigations

19 p3396 A69-36632

OGO-F neutron monitor for measuring cosmic ray neutron flux near earth, locating sensor on boom to minimize spacecraft produced neutrons

19 p3314 A69-36678

Solar protons in subpolar stratosphere during solar activity minimum indicated from proton measurements at Tiksi Bay

20 p3587 A69-37044

Electron and gamma quanta concentrations measurements by high altitude balloon, noting fluctuations at various altitudes

20 p3587 A69-37046

Spectral emissivity measurement of ablating phenolic graphite heated by subsonic air stream to high temperature to simulate reentry condition

20 p3565 A69-37187

Solar neutrinos capture rate estimation by using Li 7 as detector

20 p3588 A69-37420

Optical system for cosine-corrected radiation point to areal source measurement, discussing adaptation to spectral instruments, photocells and photoelements

20 p3538 A69-37429

Gamma ray emission of meteorite of 25 April 1969 measured by scintillation spectrometry, attributing peaks to annihilation radiation, Cs 137, Mn 54, etc

20 p3590 A69-37571

Pulsed X ray emission associated with pulsar NP 0532 in Crab Nebula measured by six element detector on Aerobee 150 rocket

20 p3590 A69-37574

Unresolved background radiation at 2695 MHz surveyed for galactic wing extent determination

20 p3606 A69-37830

Interplanetary proton and alpha particle radial gradients determined from Mariner data, considering Forbush decrease, particle solar origin, galactic cosmic radiation, etc

20 p3592 A69-38096

Solar cycle variation of extreme UV radiation from total solar disk under nonflare conditions by photoelectric measurements

20 p3592 A69-38103

X ray emission from high voltage microwave devices during high velocity electron braking measured using X ray sensitive film with superimposed aluminum scale

21 p3664 A69-39059

Quantitative criteria imposed on balloon measurements of auroral emissions from Kiruna, considering times of sunrise and sunset at different altitudes

21 p3716 A69-39250

Ariel 3 satellite attempted background radiation measurement between 2-4 MHz to show absorption onset in Galaxy

21 p3806 A69-39258

Electromagnetic radiation measurements in shielded enclosures, describing equipment and effects of frequency

21 p3683 A69-39439

Daily measurement of solar radio intensity at 810 MHz during 1964 minimum solar activity period

22 p4010 A69-39989

Photoelectric methods for pulsed and CW lasers output power and energy measurements

22 p3961 A69-40239

Calorimeters for laser energy measurement, discussing radiation damage avoidance and modifications for various modes

22 p3961 A69-40243

Neutron flux measurements on Cosmos 53, discussing equipment and calculation of secondary neutrons due to bombardment of satellite components

22 p4003 A69-40274

Auroral UV and 3914 A radiation during charged particle precipitation measured by satellite

22 p3939 A69-40507

Air ionization and beta and gamma dose rates measurements for natural radiation from cosmic rays compared to nuclear weapons tests fallout, considering biological effects

22 p4007 A69-40915

Quantization sidelobe characteristics of phased array with triangular and rectangular element arrangement

23 p4137 A69-41591

Day-to-day changes of cosmic ray diurnal variation measured on meson and neutron components, showing relationship with interplanetary magnetic field

23 p4206 A69-42012

Total solar radiation correlation with bright sunshine hours measured monthly on solarimeters and Campbell-Stokes recorders at various tropical stations

23 p4206 A69-42178

Forbidden O I 5577 A dayglow isotope equatorial measurements with rocket photometer, discussing altitude profiles and excitation mechanism

24 p4314 A69-43005

Cosmic ray albedo-neutron decay source role in intensity measurements of high energy protons trapped on low L shells during satellite flights

24 p4367 A69-43176

Solar protons and alpha particles measurements at synchronous orbit altitudes providing data for solar cell shield design to prevent radiation damage

24 p4369 A69-43265

IR measurements applications to meteorology, discussing IR radiation characteristics, atmospheric effects, thermal radiation detection and differences between real and black bodies

24 p4316 A69-43507

Solar cosmic ray anisotropy measurement by Explorer 34 satellite during solar flare events

24 p4373 A69-43619

Meteorological rocket measurement of ionizing radiation flux in upper atmosphere, noting flux decrease with increasing electron energy
 01 p0144 A69-10586

Space X ray background measurements, considering relativistic electrons Compton emission and metagalactic gas bremsstrahlung as possible sources
 01 p0147 A69-11310

Orbital spectroscopic and radiometric IR experiments, considering moon and Mars surface
 [AAS PAPER 68-196] 02 p0312 A69-11474

Lunar composition analysis by measuring atomic and nuclear radiation emission from orbiter
 [AAS PAPER 68-197] 02 p0312 A69-11475

Radiation sensor PCM data processing by computer to detect radiation level using data decorrelation, data normalization and threshold test
 03 p0400 A69-13313

Linear polarization of cosmic radio emission, discussing original measurement method and revised version based on discrimination of useful signal
 03 p0501 A69-13705

Stratospheric air sampling reliability instrumentation as part of radioactivity fallout detection program
 05 p0766 A69-16751

Solar constant measurement, reviewing instruments and results of Eppley-JPL program using high altitude jet aircraft and rocket research vehicle
 09 p1576 A69-21647

Gamma ray scattering gauge design optimum parameters to measure Mars atmospheric density
 09 p1495 A69-21842

Cosmos 149 meteorological satellite telephotometer, radiometer and other electronic equipment for measuring atmosphere and underlying surfaces physical parameters
 14 p2447 A69-29403

Cosmos 149 meteorological satellite telephotometers for measuring reflected solar radiation from earth
 14 p2447 A69-29404

Airglow research, discussing emission features, observation methods and instruments, ground station network, etc
 15 p2594 A69-30020

Meteorological rocket measurement of ionizing radiation flux in upper atmosphere, noting flux decrease with increasing electron energy
 15 p2675 A69-30756

Earth albedo instrument on OSO 3 spacecraft to measure solar reflectance of earth at various wavelengths
 15 p2614 A69-31279

UV excitation intensity increased for improving luminescent nondestructive testing, describing UV dosimeter and irradiation standards
 18 p3138 A69-35115

Probe for spectral radiation from luminous gas-cap stagnation region to determine driver gas in test section of hypersonic shock tunnel
 19 p3294 A69-35753

Measuring devices for near earth space radiation measurements
 20 p3591 A69-38018

Device measuring light pressure and pulse energy of laser emission by converting kinetic energy into potential energy of twisted elastic suspension thread
 22 p3961 A69-40246

RADIATION MEDICINE

U RADIOBIOLOGY

RADIATION NOISE

U ELECTROMAGNETIC NOISE

RADIATION PRESSURE

NT ELECTRON PRESSURE
 NT ILLUMINANCE
 NT LUMENS
 NT LUMINANCE
 NT LUMINOUS INTENSITY
 NT SOUND PRESSURE

Artificial lunar satellite orbital motion calculated by numerical integration, including solar and lunar electromagnetic radiation pressure effects
 04 p0662 A69-15251

Direct light pressure effect on evolution of limited planetocentric orbits of small bodies, noting longitudes of ascending node and pericenter
 05 p0823 A69-16043

Radiation pressure effects on laser produced carbon plasma in vacuum, discussing target surface superheating, plume boundary, plume density precursor and electron and ion temperature merging
 07 p1190 A69-18902

Time-averaged value of forces of electromagnetic wave falling from vacuum and acting on magnetoactive plasma
 08 p1361 A69-20200

Metagalaxy stationary model in terms of relativity theory, investigating radiation pressure balancing of gravitation as imaginary situation
 08 p1389 A69-20263

Solar wind-magnetosphere pressure balance and proton density of solar wind
 09 p1577 A69-21711

Uniformly rotating star models within first order perturbation theory in convective equilibrium and with radiation pressure, discussing radiative and gas pressure ratio
 09 p1606 A69-22422

Solar radiation pressure on interplanetary dust particles calculated as function of radius and density, noting asteroidal origin of dielectric and absorbing particles
 11 p1956 A69-24397

Temporal variation of metal content in galaxy, discussing stellar radiation pressure effects on heavy element abundance of interstellar gas
 12 p2160 A69-26854

Exterior field equations for radiating spheres with zero limb darkening in relativity and Bondi coordinates, determining radiative flux and pressures
 13 p2339 A69-27566

Potassium vapor radiative perturbation by ruby laser radiation in glass cell with end windows, studying emission line structure
 13 p2271 A69-27656

Solar radiation pressure effects on satellite models in circular equinoctial orbits
 14 p2522 A69-29595

Rapid orbit prediction method for planning satellite observation programs, considering oblateness and radiation pressure effects
 15 p2697 A69-31310

Earth reflected radiation pressure and perturbing effect on satellites
 15 p2599 A69-31324

Direct light pressure effect on evolution of limited planetocentric orbits of small bodies, noting longitudes of ascending node and pericenter
 20 p3606 A69-37952

Three dimensional coupled flexural and attitude dynamics of libration-damped cruciform gravity gradient satellite, discussing effects of orbital eccentricity, solar radiation pressure, etc
 [AAS PAPER 68-126] 21 p3819 A69-39211

Solar radiation pressure windmill effect in rotational bursting and elimination from solar system of small magnetic celestial bodies
 21 p3814 A69-39584

Device measuring light pressure and pulse energy of laser emission by converting kinetic energy into potential energy of twisted elastic suspension thread
 22 p3961 A69-40246

Light pressure induced secular effect contributing to planetary satellites and lunar orbits evolution calculated by numerical integration
 22 p4033 A69-41084

Class of one dimensional nonlinear waves and shock structure reduced to steady flows in radiation gas dynamics
 23 p4240 A69-42466

Solar radiation pressure on interplanetary dust particles calculated as function of radius and density, noting asteroidal origin of dielectric and absorbing particles
 24 p4390 A69-43787

RADIATION PROTECTION

NT SOLAR RADIATION SHIELDING

Surface dose rate and depth dose distribution for materials used for space vehicle and biological tissue protection from cosmic and internal radiation
 [UN PAPER 68-95260] 01 p0144 A69-10477

Prophylactic and therapeutic vitamin and organic compounds complexes in radiation damage reduction and death prevention for dogs exposed to X rays
 02 p0197 A69-11493

Solar radiation protection of radiometers and spectrometers on reentry vehicle by launching times and solar view field selection
 04 p0666 A69-15511

Radiation protection plan for Apollo lunar mission based on real time monitoring of solar activity and radiation in spacecraft
 [AIAA PAPER 69-19] 06 p0996 A69-18113

Pilot protection against laser hazards, discussing protective eyeglasses, fireproof clothing and materials
 07 p1072 A69-19436

Radiation resistance of animals in hibernation and hypothermia, noting temperature dependence of protective effect
 10 p1643 A69-23126

Chemical and biological means of safeguarding body of astronaut against ionizing radiation and vibration
 10 p1648 A69-23297

Biological radiation doses and protection from galactic, solar particle and trapped radiation in space, noting secondary radiation and bremsstrahlung in absorber
 11 p1831 A69-24866

Soviet book on quality control of materials and machine parts by ionizing radiation covering radiation hazards and protection
 13 p2268 A69-27935

Organosilicon-containing derivatives of 2-aminoethanethiols and 2-aminoethanethiosulphuric acids as radiation protective agents
 13 p2210 A69-28486

Admissible radiation doses for space crews and ionizing radiation protection, studying long term radiation effects on dogs
 15 p2557 A69-31344

Radiation resistant devices for minimizing neutron and gamma radiation effects on military electronic components, discussing selection features and sampling lot sizes
 18 p3144 A69-34491

Proton irradiation effects on current degradation at fixed voltages of silicon solar cells with coverslips
 19 p3252 A69-35701

Biological effects of cosmic radiation on crewmen and protection measures, noting ground radiobiological and medical hygienic investigations
 20 p3478 A69-37628

Radioprotective effects of 5-azacytidine on bone marrow and blood leukocytes of X ray irradiated AKR mice
 23 p4080 A69-41429

Co 60 kernel heat source for multimikrowatt space power supplies, stressing design for maximum safety
 23 p4187 A69-42257

Integral coverslip development for Si solar cells, considering borosilicate glass fusing on cell surface and RF and high vacuum ion beam sputtering
 23 p4070 A69-42272

Microwave radiation effects on biological systems, discussing categories according to radiation protection guide /RPG/ numbers, tissue properties and interactions
 24 p4270 A69-42579

RADIATION PYROMETERS

Thermistors for total optical radiation pyrometer and for temperature control system based on radiation pyrometer, noting thermistor response and control circuit
 04 p0601 A69-15119

RADIATION SHIELDING

NT SOLAR RADIATION SHIELDING

Biological effects of proton irradiation of monkeys investigated to provide improved protective shield design data with minimum weight penalty
 03 p0373 A69-13496

Radiation compensating thermocouple for gas temperature measurement, noting advantage over single thermocouples
 04 p0598 A69-14916

Book of engineering compendium on nuclear radiation shielding, discussing radiation sources, attenuation methods, induced heat generation, ducts and voids in shielding technology and design
 05 p0791 A69-15830

Radiation hazards during long duration space flights and suitable radiation shield design through radiobiological investigation
 08 p1261 A69-19826

Propyl gallate radiation shielding effect variations with proton and gamma ray bombardment, noting growth and development of potato tuber eyes
08 p1262 A69-19927

Local shielding effectiveness of dogs against proton irradiation at minimum lethal dose, noting bone marrow role
08 p1263 A69-19939

Proton flux density at axial point of thin cylindrical and slab shell shields bombarded by isotropic inverse power law spectrum of protons in space
10 p1723 A69-23165

Cryostat design, discussing vapor and radiation shielding, construction and insulation materials, safety features, cost considerations, etc
10 p1810 A69-24015

Solar cells degradation by charged particles in space, considering protection by filter, silicon properties and use of cadmium cells
11 p1825 A69-24870

Radiation dosimetry and shielding onboard Cosmos 110 artificial satellite, noting earth belt proton radiation
13 p2356 A69-27702

COHORT-II Monte Carlo computer program written in Fortran IV to model radiation shielding problems
14 p2417 A69-29004

Shock wave radiation screening by thermodynamically unstable gas, discussing brightness and gas temperature relative to shock wave front position
14 p2493 A69-29673

Proton dose in receiver behind combination electromagnetic and material shield, calculating dose for Van Allen and solar proton event spectra
15 p2652 A69-31522

Lunar module multilayer radiation insulation for thermal control, testing aluminum coated Mylar and Kapton sheets
[AIAA PAPER 69-609] 17 p3073 A69-33304

Monte Carlo method application to neutron streaming in hemispherical air-filled ducts in water tank to determine leakage through nuclear reactor shields
18 p3171 A69-35178

Multifoil thermal insulation for radiation shields from cryogenic temperatures to 3500 F, noting thermal conductivity
19 p3341 A69-35540

Solar cell radiation damage during 416.8 days in synchronous orbit on satellite ATS 1, discussing radiation shields
19 p3253 A69-35704

Supraethal doses of pulsed mixed gamma-neutron radiations from TRIGA reactor administered to unshielded, head shielded and trunk shielded beagles
19 p3259 A69-36459

Positive effect of shielding and cystamin administration on tonic and evacuator functions of rats gastrointestinal tract after gamma irradiation
22 p3877 A69-40285

Solar protons and alpha particles measurements at synchronous orbit altitudes providing data for solar cell shield design to prevent radiation damage
24 p4369 A69-43265

RADIATION SICKNESS

Radiation effects in man, searching for dose relationships in prodromal syndrome
03 p0374 A69-13503

Pathomorphological aspects of radiation sickness in animals irradiated by high energy protons, showing changes in lymph node, stellate ganglion and spleen
05 p0708 A69-16509

Pathomorphological aspects of radiation sickness in animals irradiated by high energy protons, showing changes in lymph node, stellate ganglion and spleen
18 p3095 A69-34728

Collection of papers on mechanisms of biological action of ionizing radiation covering radiation sickness dynamics, radiation damage, X ray effects, etc
21 p3656 A69-39049

RADIATION SOURCES

NT MONOCHROMATORS

NT NEUTRON SOURCES

NT POINT SOURCES

IR emission in NGC 7027 spectrum and role of discrete line emissions, discussing magnetic dipole transitions, temperature and density
01 p0148 A69-10051

Spectral lines source functions for formation in multiple atom and radiative transfer in atmosphere of three level Na atoms and four level O atoms
01 p0124 A69-10962

Cosmic rays properties and sources, considering origin in supernovae, galaxies, quasars and unknown sources
02 p0308 A69-12158

X ray source in constellation Vela lying close to galactic plane observed by attitude controlled Aerobee 150 rocket
02 p0308 A69-12594

Cosmic ray air shower distribution from Crab Nebula, M87, M82, quasars, X ray sources and recent supernovae
02 p0308 A69-12597

Soft X ray spectrum of Sco XR-1, noting intensity change from previous measurement
02 p0309 A69-12711

Structure of sources of noise storm enhancements and stationary type 4 bursts, discussing head and tail components
02 p0328 A69-12753

Metagalactic cosmic rays, galactic halo and sources of cosmic rays in Galaxy, noting models, electron component of cosmic rays and evolutionary cosmology
03 p0497 A69-12929

Galactic X ray sources, discussing location along spiral arms, age and properties of stars responsible for emission
03 p0497 A69-12930

Cosmic ray origins, considering hard protons, X rays, gamma rays, very soft protons, background radiation, charged particles and neutrinos
03 p0497 A69-12932

Cosmic X ray sources resolved against diffuse background radiation lying close to galactic plane
03 p0501 A69-13767

IR object discovered during T Tauri objects and diffuse nebulae study, discussing peculiarity
04 p0655 A69-14665

Planetary nebulae as possible low energy galactic X ray source
04 p0661 A69-15144

Optical variability of quasar 3C 273, suggesting radiation emission from single bodies rather than from large complex of independent sources
04 p0662 A69-15235

X ray astronomy, discussing sources associated with bremsstrahlung or synchrotron radiation, astrophysical models, black body radiation, relativistic electrons, etc
04 p0662 A69-15326

Earth X ray flux due to solar X rays reflected in atmosphere observed by Skylark rockets, noting observations of Sco XR-1 and Cen XR-2
04 p0649 A69-15440

Solar X ray source identification using D layer ionization behavior during eclipse
04 p0650 A69-15533

Cathode emission site analysis by measuring prebreakdown current under ultrahigh vacuum conditions
05 p0800 A69-15740

Book of engineering compendium on nuclear radiative shielding, discussing radiation sources, attenuation methods, induced heat generation, ducts and voids in shielding technology and design
05 p0791 A69-15830

X ray astronomy techniques, discussing X ray spectrographs, heliographs and nonsolar celestial X ray sources
05 p0762 A69-15840

Galactic X ray sources noncoincident with conspicuous visible or radio objects, identifying visible and radio counterparts by determination of accurate celestial coordinates
05 p0813 A69-15845

Tunable Raman upconverter as coherent light generator, using Q switched Nd-YAG laser beam [IEEE PAPER B-2]
05 p0774 A69-16309

Celestial X ray sources astronomy, discussing emission mechanism in 2 to 100 kev range and balloon observations in Cygnus and Taurus constellations
05 p0817 A69-16715

X ray sources intensity and spectrum variation with time, describing proposed balloon experiments with equatorial launching for performing measurements
06 p0992 A69-17312

Photoelectric observation of Sco X-1 variations with 91-cm reflector, tabulating results and estimating accuracy
06 p1008 A69-17695

Plasma instability role in radiant energy release from astronomical objects, noting plasma instabilities in solar system, cosmic rays, galactic and extragalactic objects
06 p1009 A69-17967

Galactic soft X rays observation with two rocket-borne gas filled counters, noting source near Wolf-Rayet star Gamma Velorum in Vela
07 p1204 A69-18599

Radiative transfer problems in inhomogeneous anisotropically scattering plane parallel planetary at-

mospheres with internal source distributions solved by recursive method
07 p1213 A69-18610

Organic lasers, discussing coherent laser light emission induced from organic dye molecules
07 p1149 A69-18908

Relaxation theory of highly ionized hydrogen plasma noting applications to stimulated emission, radiation source development and electromagnetic radiation amplification
07 p1191 A69-18996

Pulsar characteristics absence in X ray sources, noting data for Scorpius XR-1
07 p1218 A69-19254

Balloon observations of cosmic X ray sources in Cygnus and Crab Nebula, discussing data application to energy spectra analysis
07 p1210 A69-19716

Low energy multiply charged cosmic ray nuclei propagation and source characteristics, considering two component model based on OGO satellite measurements
08 p1378 A69-20068

Discrete source hypothesis for interpreting high energy cosmic gamma ray measurements obtained by OSO-3 spacecraft
08 p1380 A69-20699

OH emission source in constellation Canis Major discovered with interferometer in October 1968, noting nearby IR object
09 p1591 A69-21448

Low energy X ray spectra of Sco X-1 and Sagittarius sources measured by Be and Al window proportional counters during rocket flight
09 p1574 A69-21460

Temporal and spatial coherence effects of optical fields and relationship to multipole coherence effect
09 p1540 A69-22083

Sco X-1 optical spectrum magnitude and color changes, proposing variable black body model
09 p1601 A69-22213

Bright celestial IR sources in Ursa Major detected in spectral region by rocket-borne telescope, discussing luminosities of quasi-stellar sources
09 p1603 A69-22230

Iron line absence in emission spectrum of thermal X ray sources, constraining proposed thermal models
09 p1580 A69-22231

Far IR source in galactic center detected at 100 microns, noting thermal emission of interstellar dust grains as possible mechanism
09 p1603 A69-22264

X ray astronomy, tabulating properties of 22 discrete sources and discussing spectra, radio emission, optical identification, X ray production, etc
09 p1583 A69-22762

Weak X ray sources at 20-100 Kev photon energies observed during balloon flight, finding hard rays from Ara XR-1 and Nor XR-1
09 p1583 A69-22763

High energy X ray observational data for Sagittarius sources scanned by active telescope during February 1968 balloon flight
09 p1583 A69-22764

Quasars and explosive processes in galaxies as cosmic ray sources in expanding universe, studying relation between galactic and metagalactic cosmic rays
10 p1756 A69-22815

Modulation collimators determining angular sizes and celestial positions of X ray sources Sco X-1 and Taurus XR-1
10 p1678 A69-23326

Celestial X ray source positions from rotating modulation collimator, predicting performance of collimator
10 p1722 A69-23328

Antenna point and astigmatic sources due to phase centers and phase diagrams relations and antenna caustic curves
10 p1664 A69-23798

Spectra of low energy X ray source at position of Large Magellanic Cloud, noting flux
10 p1770 A69-24093

Spectroscopic observations of optical object identified with X ray source Cygnus X-2 noting radial velocity in absorption and emission lines
10 p1785 A69-24097

Double structure in IR near Trapezium region of M42 in Orion Nebula center
10 p1786 A69-24105

Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars
11 p1954 A69-24379

Vacuum spark light source for extreme UV noting mechanical trigger, compatibility with clean vacuum system and magnetic confinement of ions
11 p1885 A69-24839

Radiation studies of pressure driven shock tubes with atomic ionization at high temperatures, discussing thermal light sources, autoionization, etc
11 p1863 A69-25014

Electroluminescence and electroluminescent devices, considering semiconductor lasers, radiation sources and image amplifiers
11 p1899 A69-25198

Crab Nebula X ray pulse detection attempt during balloon flight of telescope
12 p2149 A69-26226

Specularly vs diffusely reflecting cylinders for cavity type sources of approximately black body radiant energy, noting ray tracing of cones
12 p2130 A69-26245

Gravitational recoil due to gravitational emission of source analyzed in terms of Einstein equations
12 p2130 A69-26338

Plasmas role in emission mechanisms active in celestial sources of radiation, discussing sun and quasars
12 p2159 A69-26619

Correlation coefficients, comparing galactic X ray sources distribution with classical cepheids, old novae, planetary nebulae and Wolf-Rayet stars
12 p2171 A69-27155

Scorpius XR-1 X ray emission spectra, discussing Fe emission line near 7 kev plasma models, supernova mass and cosmic abundance
13 p3235 A69-27313

Microwave background radiation by intense sources studied by homogeneous and isotropic Friedmann and steady state models
13 p2339 A69-27574

Geomagnetic storm induced temporary radiation zones located by determining Explorer 30 attitude and spin axis orientation
14 p2514 A69-29384

Solar ionizing radiation sources, discussing activity at sunspot minimum, temperature, density and solar wind effects, X ray and UV spectra, etc
15 p2673 A69-30007

Decametric radio astronomy at frequencies from 10 to 40 MHz on wideband telescopes, discussing spectral types of discrete radiation sources
15 p2682 A69-30501

Global multielement radio interferometer with autonomous reception synthesized for studying spatial radio brightness distribution over radiation sources
15 p2578 A69-30936

Energy transfer during fast electrons and photons interactions, indicating Compton energy losses related to space X ray and gamma radiation sources
15 p2676 A69-30953

Extraterrestrial X ray galactic and extragalactic sources research fields, emphasizing identification with optical objects
15 p2696 A69-31213

Time variation of optical intensity of Sco X-1 X ray source, evaluating photometric data by power spectral analysis
16 p2852 A69-32805

Solar eclipse of 20 May 1966, comparing satellite-borne X ray and UV photometry with radio astronomical observations
17 p3023 A69-33058

Galactic X ray sources density nearly proportional to interstellar gas density squared, discussing X ray intensities estimation, galactic age, etc
17 p3030 A69-33069

Nocturnal D region conductivity enhancement relation to X radiation from Scorpius XR-1 and other sources, calculating ion production rate
17 p3024 A69-33378

Correlated bursts from separate distant sources on sun, noting occurrence in quiet periods and strength
17 p3024 A69-33804

Solar radio emission sources position changes observed in solar storm center
17 p3024 A69-33805

Line source excited ferrite layer radiation pattern reduced to one dimensional form by Fourier transform, obtaining angle of maximum leaky wave radiation
17 p2926 A69-33852

X ray absorption in surrounding gas sphere as function of continuous absorption, electron scattering and diffuse ionizing radiation, using radiative transfer theory
18 p3186 A69-34296

Extrasolar X rays and sources from studying distribution, luminosity, diameters and variability of rays
18 p3193 A69-34364

Source requirements for cosmic radiation origin model, noting fluctuations in momentum changing process
18 p3188 A69-35005

X ray sources model, describing possible ring of matter around white dwarf near end of active evolution
18 p3188 A69-35204

Source position of cosmic ray diurnal anisotropy relative to ecliptic plane from neutron monitor data at Mawson and Churchill stations
18 p3189 A69-35441

Thermal molecular beam sources fabricated from multichannel arrays, describing molecular flux leak rates and angular distributions
19 p3376 A69-36175

Continuous IR radiation source using electrically heated Mo ribbon, comparing emission from V shape and flat portions
19 p3313 A69-36491

Optical system for cosine-corrected radiation point to areal source measurement, discussing adaptation to spectral instruments, photocells and photoelements
20 p3538 A69-37429

Radiation emission mechanism for NP 0532 associated with Crab Nebula, discussing shock- neutral sheet interaction
20 p3604 A69-37572

Asymptotic evaluation of complex frequency integrals in theory of radiation from transient sources in dispersive media, interpreting results in terms of space-time rays
20 p3494 A69-37841

X ray spectra of Sco XR-1, Cyg XR-1 and Cyg XR-2 for proton energy range 1.5-13 kev from proportional counter measurements
20 p3593 A69-38152

Radiation sources fields and propagation in homogeneous lossy magnetoplasma, deducing wave equations for electric and magnetic current electron flux and mechanical body force sources
21 p3775 A69-38434

Interstellar absorption of 10 A X rays from sources in Scorpio-Sagittarius region, noting gas density between earth and Crab Nebula
21 p3788 A69-38648

Galactic nucleus observations in 1.65-19.5 micron range with evidence for strong radiation at 10 and 20 microns, noting mechanisms for IR radiation
21 p3799 A69-38650

Differential approximation for radiant energy loss in nonequilibrium plasma generated from truncated Taylor series expansion of radiation source function
22 p3988 A69-40102

Distinction between faint and bright sources of slowly varying solar microwave emission components applied to geomagnetic activity statistics
22 p4020 A69-40306

Identification, position and temperature of solar X ray sources derived from D layer ionization radio absorption behavior during eclipses and lunar reflection
22 p4004 A69-40308

Antenna array synthesis optimization for limited deviations of source distribution function from prescribed function
22 p3916 A69-40952

Galactic X ray sources observed in EM spectrum high energy region, discussing hot plasma cloud thermal radiation and electrons synchrotron radiation as emission sources
23 p4206 A69-42318

Distribution function for thermalization distances derived for infinite atmosphere with plane source in noncoherent light scattering
23 p4192 A69-42403

Transient sources of cosmic rays, discussing possible time variable intensity and momentum spectrum of Galaxy
24 p4367 A69-43006

Cosmic ray albedo-neutron decay source role in intensity measurements of high energy protons trapped on low L shells during satellite flights
24 p4367 A69-43176

Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars
24 p4389 A69-43769

NT VIBRATIONAL SPECTRA

Radiative heat transfer through transmission layers sandwiched between black bodies with variable blackness spectra
02 p0350 A69-11578

Solar flare X ray line and continuum spectra measured with crystal spectrometers aboard orbiting solar observatory
02 p0308 A69-12297

Extensive air showers at sea level, presenting experimental data for muon and electron numbers spectra
03 p0498 A69-12937

Solar X ray flares measurement by rocket and satellite, discussing X ray spectrum hardening, hard flares and SID
03 p0500 A69-13225

Continuum radiation of quasars, adopting cosmological interpretation of red shift
04 p0648 A69-14565

High power stable modes of operation of argon laser, observing stable output spectra
05 p0773 A69-16292

Radiative transfer equation solution for spectral line formed in two dimensionally varying atmosphere extended to continuum radiation in inhomogeneous atmospheres
08 p1386 A69-20077

Photon momentum distribution role and relation to thermal radiation spectrum in fully ionized gases
08 p1357 A69-20747

Radiation spectrum in nonrelativistic fully ionized gas in thermal equilibrium, obtaining dispersion relation for transverse electromagnetic waves and dielectric constant
08 p1357 A69-20748

Argon laser frequency spectrum instability caused by competing axial oscillations
08 p1327 A69-21023

Differential brightness of night airglow spectrum, obtaining rotational temperature by comparison with synthetic spectra
09 p1488 A69-21656

Continuous radiation spectrum of Taurus A in far IR using indium antimonide detector of Rollin type
09 p1597 A69-22156

Spectrum of high energy X ray flux from Sco XR-1 during balloon flight using active collimator detector and graded shield detector
09 p1584 A69-22766

Superhigh energy cosmic ray interaction with neutrinos in universe, shape of cosmic ray spectrum and universe development
10 p1757 A69-22826

Laser radiation spectrum scattered by low temperature plasma electrons at atmospheric pressure
11 p1922 A69-24233

Power output and radiation spectra of trivalent Nd doped liquid lasers based on phosphoryl chloride with tin and titanium chlorides
11 p1894 A69-24620

He-Ne laser radiation frequency spectrum as function of transverse magnetic field determined by photoheterodyne method
11 p1894 A69-24622

Nonuniform standing wave fields spatial distribution in active rod of ruby laser effects on laser radiation dynamic parameters, discussing radiation spectrum width
11 p1901 A69-25756

Remote control spectrophotochronograph to study radiation of high speed high temperature processes, giving construction data and diagrams
12 p2085 A69-26161

Frequency spectrum, time variations and polarization of source of synchrotron radio emission with ex-

panding components flying apart at relativistic velocities

12 p2155 A69-26207

To as unipolar inductor, analyzing interaction with Jupiter magnetosphere and decimetric synchrotron radiation

13 p2337 A69-27552

Stellar atmosphere models of pure hydrogen in hydrostatic, radiative and statistical equilibrium, including Lyman-alpha and continua, discussing nonLTE deviations

13 p2338 A69-27560

RR Lyrae gap stellar model atmospheres including radiation spectra, temperature radiation and convection, etc

13 p2338 A69-27561

Gamma quantum spectrum shape from high altitude X ray film and nuclear emulsion blackening, discussing high energy pion production

13 p2330 A69-28378

Secular instability of steadily rotating stars, analyzing meridional motions in radiation zones by linear perturbation theory

13 p2354 A69-28566

Intermediate band photometry of G, K and M stars in IR indicating continuous stellar radiation deviant from black bodies

14 p2520 A69-29375

Annihilation gamma ray spectra from equilibrium spectra of secondary galactic positrons

14 p2514 A69-29948

Earth atmosphere effect on cosmic ray variations, considering relation between extensive air showers and cosmic ray spectrum

16 p2851 A69-32381

Continuum radiation measurements for bremsstrahlung and recombination of neutral and ionized nitrogen

16 p2823 A69-32466

Radiation diffusion in plane-parallel isothermal gas layer of two and three level atoms, considering stimulated emission and frequency redistribution

16 p2864 A69-32587

Radiative recombination in GaAs, giving edge radiation spectra in p and n type crystals and photoluminescence method for measuring junction carrier concentration distribution

19 p3386 A69-36525

Minority carriers penetration depth in solid aluminum gallium arsenide solutions with variable forbidden bandwidth determined from recombination radiation spectra

19 p3391 A69-36606

Recombination radiation of tellurium and zinc doped GaAs alloy type diodes, discussing luminescence spectra, current-voltage characteristics and temperature effects

20 p3506 A69-37783

Critique of Shivanandan suggestion of background radiation spectrum distortions

21 p3815 A69-39612

Cosmic gamma rays spectrum from neutral pions production and decay in metagalactic cosmic ray p-p collisions, deriving models based on Einstein general relativity theory

22 p4006 A69-40641

Radiative properties of Ta, Mo, Nb, graphite and niobium carbide at high temperatures

23 p4175 A69-41331

RADIATION THERAPY

Negative pion beams for therapy, radiobiology and dosimetry

03 p0371 A69-13478

Mammalian radiobiological studies of effects of heavy particles, discussing therapeutically advantageous characteristics

03 p0374 A69-13499

Tissue pressurized oxygenation during radiation therapy emphasized for overcoming tumor radioreistance attributed to oxygen deficiency

23 p4091 A69-41967

RADIATION TOLERANCE

Radiation resistance of MOS transistors noting relationship with thermal stability, gate oxidation and metals used

02 p0221 A69-12468

NASA Plum Brook Reactor Facility (PBRF) for determining radiation tolerance to support nuclear power application in space for propulsion and power

03 p0465 A69-13128

Permissible radiation doses for extended space missions, discussing clinical tests on dogs

05 p0708 A69-16508

Radiosensitivity of potatoes to gamma ray and proton irradiation applied to whole tubers and to isolated eyes before planting

05 p0709 A69-16511

Thermal performance of pressure transducers, accelerometers, displacement transducers, resistance thermometers and control mechanisms for NERVA reactor

06 p0956 A69-16885

Satellite, spacecraft and rocket components coatings and lubricants, noting high radiation resistance of polyimides

06 p0945 A69-17046

Space radiation effect on spacecraft components and materials simulated by proton and fast electron bombardment of silicon, glass and skin materials

06 p0906 A69-17612

Radiation effects on integrated circuits, stressing components design for maximum tolerance

07 p1113 A69-19779

Synergistic effects of prolonged heat exposure and whole body irradiation with ionizing radiation on survival time in hamsters

08 p1263 A69-20174

Antenna tolerances theory, discussing illumination correlation function analytical evaluation for uniform and tapered illuminations

08 p1284 A69-20294

Radiation resistance of animals in hibernation and hypothermia, noting temperature dependence of protective effect

10 p1643 A69-23126

Limits of human tolerance to localized skin exposure to IR irradiation of various intensities from pain threshold observations, noting skin temperature role

10 p1647 A69-23589

Silicon n-p solar cell behavior during electron radiation, describing radiation resistant solar cell

11 p1825 A69-24871

Far field radiation pattern, radiation resistance, power gain, directivity and effective aperture for center fed dipole antenna with feed points displaced arbitrarily

12 p2039 A69-26352

MOS devices for radiation environments utilizing aluminum oxide as gate insulator for developing resistance to radiation damage

15 p2577 A69-30595

Admissible radiation doses for space crews and ionizing radiation protection, studying long term radiation effects on dogs

15 p2557 A69-31344

Diurnal variations in radiation sensitivity of mice and rats to irradiation with median lethal doses, noting sine curve survival function

15 p2557 A69-31458

Neutron bombardment and ionizing radiation resistance of aluminum oxide MOS devices using gate insulator fabricated by plasma anodization

17 p2935 A69-32888

Permissible radiation doses for extended space missions, discussing clinical tests on dogs

18 p3095 A69-34727

Radiosensitivity of potatoes to gamma ray and proton irradiation applied to whole tubers and to isolated eyes before planting

18 p3095 A69-34730

Unfilled Pyrrone prepared from powder into molded parts for flexural tests at elevated temperatures observed for stability to electron irradiation in air

19 p3356 A69-35529

Solar cells designed to survive exposure to fission/fusion neutrons and electromagnetic spectrum products of nuclear weapon detonation

19 p3251 A69-35689

Lithium-doped silicon solar cells development for radiation environments, discussing contractor functions, dopants, etc

19 p3251 A69-35692

Photoresponse and minority carrier diffusion length long term stability of Li doped solar cells after proton, neutron and electron irradiation

19 p3252 A69-35697

Multilayer lead oxide and cryolite dielectric coatings stability to ruby laser radiation, noting breakdown coherent radiation power densities

19 p3334 A69-35886

Supralethal doses of pulsed mixed gamma-neutron radiations from TRIGA reactor administered to unshielded, head shielded and trunk shielded beagles

19 p3259 A69-36459

Amorphous semiconductors based on noncrystalline materials compared to crystalline materials, noting radiation damage resistance

19 p3392 A69-36660

Radiation exposure during orbital flight assessed for adverse effect on space stations and laboratories personnel, discussing shielding and dose rate tables

20 p3481 A69-37339

Silicon dioxide film doped with Al to increase MOS structure radiation resistance

20 p3584 A69-38070

ESR comparative study of selenoamino acids and S analog radical formation and radiation resistance, noting selenium groups ability as acceptors for unpaired electrons

21 p3668 A69-38425

Nervous system reactions and resistance to ionizing radiation noting role of functional, morphological and physicochemical changes in nerve tissues

21 p3659 A69-39061

Survival rates of continuously cultivated Chlorella plants in air-carbon dioxide atmosphere after single exposure to gamma radiation, using microcolony counting technique

22 p3876 A69-40275

Radiation hardened microcircuits and transistors for protection against transient radiation released by nuclear weapons

23 p4135 A69-41528

Radiation damage in chlamydomonas, discussing dark repair activities

23 p4090 A69-41964

Radiation effects on population kinetics of granulocyte system forming bone marrow, discussing radiosensitivity and radiation-induced granulocytopenia

23 p4090 A69-41965

Tissue pressurized oxygenation during radiation therapy emphasized for overcoming tumor radioreistance attributed to oxygen deficiency

23 p4091 A69-41967

Cross sections of charge carrier capture by ions in gamma irradiated P-Al-Si glass with metal oxides additions measured for evaluating radiation stability improvement

23 p4180 A69-42470

Radiation hard device specifications, comparing data with environmental considerations

24 p4287 A69-43204

RADIATIVE HEAT TRANSFER

Radiant heat transfer in optically thick gray gas situated between parallel black diffusively emitting walls, using matched asymptotic expansion method

01 p0178 A69-11411

Radiative heat transfer through transmission layers sandwiched between black bodies with variable blackness spectra

02 p0350 A69-11578

Romanova method for solution of scalar equation of radiative transfer in plane parallel atmosphere

02 p0319 A69-12106

Radiant heat transfer prediction methods checked for validity and accuracy by irradiation measurements with materials of various surface properties [ASME PAPER 68-HT-42]

02 p0351 A69-12206

Heat transfer efficiency of triangular radiating fin in diathermal medium producing aerodynamic heating

02 p0354 A69-12490

Gray radiation and conductive heat transfer in Oseen-like free mixing flow, computing temperature distribution by inversion integral

02 p0354 A69-12504

Downstream radiation flux distribution calculated for blunt entry bodies, considering self absorption effects

02 p0354 A69-12547

Eddington approximation to solve radiative transfer equation

02 p0282 A69-12703

Probabilistic model for scattering function to solve radiative transfer problems in externally illuminated spherical shell atmosphere with perfectly absorbing core

02 p0328 A69-12751

Radiative heat loss effect on atmospheric cellular convection, analyzing critical Rayleigh number and width to height ratio of cells

02 p0276 A69-12776

Long wave radiative heat flux in boundary layers of cloud during solid overcast, discussing dependence on various cloud and atmospheric parameters

03 p0458 A69-13271

Radiative transfer equations solved for electron scattering stellar atmosphere, using transformation of integrodifferential transfer equations into singular integral equations

03 p0466 A69-13351

Reentry shock layer radiative heat transfer to surface of blunt superorbital vehicle [AIAA PAPER 68-1151]

03 p0532 A69-13560

RADIATION THERAPY

Atmospheric gas composition effects on shock layer radiative heat transfer and heat shield response in Venus entry simulated by earth reentry
[AIAA PAPER 68-1148] 03 p0412 A69-13672

Composite heat transfer by conduction and radiation in nongray medium, outlining electronic computer program for numerical solutions 03 p0533 A69-13884

Biot variational principle applied to combined conduction and radiation heat transfer 04 p0685 A69-14734

Correlations of stagnation point radiative heat transfer for earth reentry, noting use of nongray absorption coefficient models 04 p0685 A69-14736

Nongray radiation absorption coefficients reformulation employing alternative angular moment averaged absorption coefficients with emission/Planck/ 04 p0686 A69-14744

Flux equivalences of reflected and transmitted radiation among Rayleigh, isotropic and other scattering models 04 p0687 A69-15281

Reflection and transmission of radiation from very thick and semiinfinite homogeneous atmospheres with arbitrary phase function, using asymptotic fitting method 04 p0595 A69-15285

Thin foil heat flux sensor for radiative and convective heating rates over wide range and dynamic response, noting error mechanisms, calibration and accuracy 04 p0602 A69-15426

IR radiation heat transfer in polyatomic gases in limit of large path lengths 05 p0844 A69-15579

Energy transfer from radiating sphere to medium with molecular heat conduction 05 p0845 A69-15782

Regular thermal conditions in solid bodies with radiative heat transfer 05 p0845 A69-15896

Finned radiation emitter tube unsteady state temperature field as function of working body temperature and emitter geometry 05 p0846 A69-15898

Heat transfer in turbulent pipe flow of radiating optically thin gas in circular tube
[ASME PAPER 68-WA/HT-17] 05 p0847 A69-16121

Discrete radiative transfer in nonhomogeneous slabs, giving matrix solution 05 p0849 A69-16480

Radiative heat transfer between parallel plates separated by nongray gas with picket fence absorption coefficient using integral equations 06 p1033 A69-17554

IR radiative heat transfer in nongray gases for non-black bounding surfaces, considering diatomic gases with single vibration rotation band 06 p1033 A69-17559

Optimized radiative heat transfer systems performance, comparing tubular radiators with various fin geometries and systems with belt radiator 06 p1033 A69-17600

Optimizing radiating system consisting of radially diverging conical heat removing projections attached to cooled isothermal sphere 06 p1033 A69-17603

Inverse problems in radiative transfer applied to remote measurements of IR radiation from planetary atmospheres, noting temperature and water vapor inversions 06 p0919 A69-17617

Mathematical techniques for treating satellite based atmospheric data involving radiative transfer equation inversion, noting scattering and temperature measurement problems 06 p0957 A69-17618

Relaxation method for inversion of full radiative transfer equation, determining temperature profile in atmosphere from outgoing radiance
[JPL-TR-32-1351] 06 p0922 A69-17805

Combined radiation and conduction heat transfer equation applied to temperature profile around opaque hollow sphere and in solid condensed gas layer
[SAE PAPER 690197] 07 p1239 A69-18303

Thermal disturbance radiative decay time in carbon dioxide at low pressures and for nonzero vibrational relaxation times 07 p1215 A69-18843

Radiative-convective heat transfer in gray gas plane layer blown into turbulent flow past permeable plate 07 p1242 A69-18991

Radiative transfer equation for pure molecular scattering inverted for estimating vertical ozone distribution 07 p1126 A69-19042

Optical properties of hot air used to solve radiative transfer problems, including emissivities and absorption coefficients calculations 07 p1185 A69-19167

Radiative transfer iteration for gray medium between concentric spheres and for constant heat generating spherical region imbedded in gray medium 08 p1420 A69-20152

Thermal gradients in artificial satellites, considering heat exchange among various points of closed cavity surface by gray body diffuse radiation and reflection 08 p1421 A69-20157

Radiative-conductive heat transfer in plane layer of gray heat conducting medium, solving energy equation 09 p1621 A69-21433

Energy transfer in gases transmitting heat by interaction of thermal conduction and IR radiation 09 p1621 A69-21442

Temperature field in thin walled rods with spiral coil cross section in solar radiation, considering radiant heat exchange 11 p1999 A69-24779

Radiant heat transfer in hypersonic aerodynamic heating, discussing radiant flux and carbon dioxide concentration in reentry problems 11 p2002 A69-25233

Temperature variation and heat transfer in fins and relations between heat-flux-density and temperature difference 12 p2190 A69-25763

Long wave radiation fields calculations based on radiation transport equations, identifying differences between associated transmission functions 12 p2125 A69-25951

Thermosphere radiative cooling by atomic O 62 micron line, noting cooling and heating rates 12 p2064 A69-26009

Heat transfer in solid bodies, deriving thermal conductivity equation and surface boundary conditions in presence of radiative energy transfer 13 p2373 A69-27584

Radiative heat transfer of materials, discussing spectrum characteristics 13 p2373 A69-27768

Differential approximation for radiative transfer between concentric spheres enclosing gray gas
[ASME PAPER 68-HT-21] 13 p2373 A69-27774

Combined conduction and radiation transfer equations solutions for absorbing-emitting gas, obtaining slip coefficient for diffusion solution correct boundary condition 13 p2374 A69-27784

Radiative thermal losses of K in gases for MHD flow 13 p2308 A69-28022

Radiative heat transfer, discussing electromagnetic theory, transfer between surfaces and simultaneous conduction, convection and radiation 13 p2376 A69-28140

Radiative transfer between two concentric gray opaque spheres separated by radiating gray gas, employing Fredholm equations 13 p2377 A69-28149

Thermal behavior of space vehicle window systems predicted by mathematical analysis and computer methods for heat transfer through glass
[AIAA PAPER 68-65] 13 p2378 A69-28215

Energy transfer by simultaneous conduction and radiation between two media in intimate contact, detailing numerical solution method for resulting coupled nonlinear integrodifferential equations 13 p2378 A69-28340

Atmospheric ozone vertical distribution and total amount determined by radiative transfer and perturbation theory, presenting error analysis 13 p2255 A69-28493

Long wave radiative heat flux in boundary layers of cloud during solid overcast, discussing dependence on various cloud and atmospheric parameters 14 p2471 A69-28779

Radiative heat transfer calculations between parallel surfaces, applying approximations based on total emissivities to known spectral emissivities 14 p2539 A69-29223

Radiating gray gas laminar jet in thermodynamic equilibrium ejected from plane nozzle into wake analyzed using boundary layer, divergence and transfer equations 14 p2432 A69-29612

Radiation in atmospheric circulation, considering radiative equilibrium, cloudiness and surface interactions, surface temperature and heat input 14 p2477 A69-29826

Climate studies with allowance for radiative heat inputs, constructing nonadiabatic motions model for improving prognosis 14 p2477 A69-29827

Radiation method for temperature and heat flux measurement, discussing transducer with thermopile as sensor 15 p2607 A69-30154

Substitute kernel approximation for acoustic waves radiative transfer equations for nongray gas near equilibrium 15 p2717 A69-30799

Radiative luminescence of gas discharge plasmas in channel with substantial radial heat transfer determined from energy balance measurement 15 p2662 A69-30978

Radiative energy transfer through nongray absorbing and emitting medium generating heat with graphical presentation of temperature distribution and flux 15 p2718 A69-31153

Macroscopic quasi-linear theory of HF radiation in cold electron-proton plasma allowing direct use of plasma and Maxwell equations 16 p2819 A69-31684

Approximate expression for temperature dependent radiative heat flux in optically thin gas, considering reentry body hypersonic flight 16 p2877 A69-31892

Radiative heat transfer in nonisothermal scattering media of plane, spherical and cylindrical geometries separated by particle cloud 16 p2878 A69-31925

Heat pipes design for rocket engines cooling, discussing connections to space radiator and to heat rejection device and heat transfer capability
[AIAA PAPER 69-582] 16 p2839 A69-32668

Nongray equilibrium radiative heat transfer in viscous radiating shock layer around blunt body entering high temperature nonisothermal carbon dioxide-nitrogen atmosphere
[AIAA PAPER 69-636] 17 p3070 A69-33258

Radiant heat transfer predictions between isothermal plates based on diffuse plus specular directional property model
[AIAA PAPER 69-624] 17 p3070 A69-33259

Apparent thermal radiation properties for one dimensionally rough surface, discussing variance with property models employed in engineering analysis of radiant transfer
[AIAA PAPER 69-622] 17 p3071 A69-33271

Heat pipe devices applied to radiative body heat transfer in space suit temperature control
[AIAA PAPER 69-619] 17 p2914 A69-33293

Radiative heat transfer in nonisothermal media composed of spherical particles with complex refractive index emitting absorbing and scattering energy anisotropically, considering various geometries
[AIAA PAPER 69-626] 17 p3073 A69-33297

Heat transfer in evacuated multilayer insulation by radiation and conduction, considering optically thin media separating reflective layers
[AIAA PAPER 69-607] 17 p3073 A69-33300

Normal and directional emittance for two dimensional emitting, absorbing and scattering semiinfinite plane slab based on Monte Carlo method compared with Bobco approximation
[AIAA PAPER 69-625] 17 p3005 A69-33301

Radiative and conductive heat transfer in heated finite gaseous body with emphasis on collisional and radiative relaxation, noting cooling as two stage process
[AIAA PAPER 69-638] 17 p3073 A69-33311

Radiative and conductive heat transport mechanisms at cryogenic temperature applicable to thermal energy transport minimizing technique in containment system 17 p3074 A69-33680

Temperature fluctuations in solar photosphere, noting transition from convective to radiative energy transport 17 p3040 A69-33810

Radiation gas dynamics in shock tube, studying radiation coupled flows with flow field affected by radiant energy transport 18 p3116 A69-34447

Orthonormalization methods applied to heat conduction, convection and radiation problems, noting digital computer programs modifications 18 p3229 A69-34662

Materials integral hemispheric radiative capacity determination based on cooling rate of thin walled 18 p3229 A69-34662

specimen in vacuum, considering stainless steel, Ni and Cu

18 p3156 A69-34698

Local radiation characteristics calculation method, consisting of reducing integral equations to linear algebraic equations, applied to solve radiative heat exchange problems

18 p3229 A69-34713

Heat transfer coefficient approximation under thermal instability conditions complicated by radiant heat exchange at plate surface, noting aircraft design applications

18 p3230 A69-34984

Energy transfer from radiating sphere to medium with molecular heat conduction

18 p3230 A69-35034

Radiant heat transfer integral equations solutions accuracy determined from differences between geometric and resolving angular emission factors

18 p3230 A69-35119

Temperature distribution around radiating sphere in homogeneous gas medium with molecular heat transfer, solving energy transport equation

18 p3231 A69-35325

Partial differential equation representing influence of radiative and turbulent transfers of atmospheric heat, based on absorption coefficients for terrestrial radiation

19 p3363 A69-36498

Radiative heat transfer in polycrystalline corundum, studying photon thermal conductivity influence on lattice thermal resistivity

20 p3565 A69-36975

Stagnation point heating in hypersonic gas flow past blunt bodies, considering radiative transfer effects on shock wave temperature and density distribution, wave separation, etc

20 p3457 A69-36981

Combined heat transfer by radiation and conduction in disperse media /thermal insulation/ described by system of nonlinear integrodifferential equations

20 p3631 A69-37097

Temperature and fluid distribution in porous solid subjected to large suction, convective heating and radiative cooling on one surface

20 p3514 A69-37225

Boundary conditions for differential approximation to radiative transfer, noting optically thick slip conditions

20 p3633 A69-37524

Temperature and pressure relations in power plant with closed gas cycles with radiative heat transfer, noting radiation area reduction influence

20 p3464 A69-37603

Fourier heat equations functional corrections for determining temperatures of plate and cylinder heated simultaneously by radiation and convection

21 p3848 A69-38641

Radiative heat input to artificial satellite in orbit due to solar and earth radiations calculated and presented in graphs for satellite temperature calculation

22 p4006 A69-40589

Radiative transfer in interior of two concentric spheres in motion assuming low density of residual gas

22 p4031 A69-40907

Radiative energy transport in moving gaseous media in local thermodynamic equilibrium, assuming spectral line shifts by temperature and pressure variations

22 p3982 A69-41018

Combined heat transfer calculations, considering moving radiating media and simultaneous convection or conduction

23 p4237 A69-41328

Absorptivity of nonuniformly heated thin walled cylindrical radiator with central radiating hole, calculated by forward-reverse and integral methods

23 p4238 A69-41332

Mars atmosphere response to surface temperature changes by radiative and convective heating, noting strong solar control of mean wind distribution

23 p4212 A69-41614

Radiative heat transfer in nonisothermal absorbing and emitting media without scattering and with anisotropic and isotropic scattering

23 p4239 A69-41632

Radiative transfer effects in low Reynolds number or merged layer regime of hypersonic flow about axisymmetric blunt bodies, including thin shock layer theory

23 p4059 A69-41885

Arc heating of shock tube driver gas, describing radiative energy transfer mechanism

23 p4147 A69-41895

Space radiator system with hybrid, water heat pipes to transport waste heat from radioisotopic thermoelectric generator

23 p4190 A69-42304

Orographic inhomogeneities of underlying surfaces for radiating atmospheric waves formation, deriving formulas for plane stable atmosphere

23 p4185 A69-42492

Atmospheric gas composition effects on shock layer radiative heat transfer and heat shield response in Venus entry simulated by earth reentry

[AIAA PAPER 68-1148] 24 p4394 A69-43248

Radiant energy transfer in absorbing and emitting media, noting approximate equations reduced to correct optically thin and thick limits for multidimensional problems

[ASME PAPER 69-HT-E] 24 p4410 A69-43524

Radiative transport in nongray cylindrical medium using total band absorbance

[ASME PAPER 69-HT-38] 24 p4411 A69-43534

One dimensional numerical solution for steady state thermal behavior of trapezoidal profile annular fins transferring heat by conduction and radiation

[ASME PAPER 69-HT-6] 24 p4413 A69-43553

Reentry shock layer radiative heat transfer to surface of blunt superorbital vehicle

[AIAA PAPER 68-1151] 24 p4414 A69-43567

Lateral heat conduction and radiation along two parallel long plates separated by nonabsorbing dielectric with refractive index of unity

24 p4415 A69-43594

Quasi-isotropic semigray radiative transfer prediction using nongray model in bounded plane-parallel geometries for gas with spectrum from free-free processes

24 p4415 A69-43673

Heat conduction problems associated with radiant exchange in shells under discontinuous solar flux, considering spacecraft structures, illumination theory and astrophysics

24 p4416 A69-43689

RADIATIVE RECOMBINATION

Shock front structure in radiative relaxation region in atomic H, calculating Lyman continuum effects

01 p0122 A69-10125

Ionization, neutralization and charge exchange processes in ionosphere, detailing dependence of photodissociation and collision detachment of negative ions

01 p0066 A69-10598

Recombination radiation from excitons and free carriers in epitaxial GaAs with impurities at liquid He temperatures

01 p0140 A69-11253

Mechanical thermal stresses effects during laser flash illumination of GaAs, discussing temperature dependence of radiative recombination

02 p0256 A69-12245

Laser transition and photon energy of lightly doped GaAs, showing many body electron-hole- lattice interactions

02 p0257 A69-12615

Radiative recombination in p-n junctions in InP at various temperatures

03 p0492 A69-14166

Luminescence spectra due to radiative recombination of optically injected carriers in Co 60 gamma ray and neutron irradiated Si at low temperature

03 p0494 A69-14243

Recombination radiation of tellurium and zinc doped GaAs alloy type diodes, discussing luminescence spectra, current-voltage characteristics and temperature effects

05 p0729 A69-16210

Stimulated radiative recombination process for ramjet propulsion, investigating delay chamber required for vibration-to-translation conversion

06 p0984 A69-17630

Radiation transfer in resonance lines and in recombination continuum in plasma, discussing frequency redistribution during reradiation and optically dense systems

07 p1188 A69-18282

Oscillator forces and photoionization and photorecombination cross sections of electron transitions in hydrogen atom, considering approximation for total radiation probability

09 p1588 A69-21365

Radiative and collisional ionization of H and He in planetary nebulae, discussing dielectronic recombination at high electron temperatures

14 p2518 A69-29133

Hydrogen recombination in hot universe model, discussing emission of energetic quanta

15 p2690 A69-30734

Continuum radiation measurements for bremsstrahlung and recombination of neutral and ionized nitrogen

16 p2823 A69-32466

Oscillator forces and photoionization and photorecombination cross sections of electron transitions in hydrogen atom, considering approximation for total radiation probability

18 p3197 A69-34755

Radiative recombination of atomic oxygen ions in nighttime F region UV radiation detected by polar-orbiting OGO 4 satellite

18 p3129 A69-34957

Radiative recombination in GaAs, giving edge radiation spectra in p and n type crystals and photoluminescence method for measuring junction carrier concentration distribution

19 p3386 A69-36525

Injection lasers external quantum efficiency, stimulated and spontaneous emission and photoluminescence measurements

19 p3337 A69-36528

Coherent recombinational radiation of semiconductors excited by electron beam

19 p3387 A69-36539

Minority carriers penetration depth in solid aluminum gallium arsenide solutions with variable forbidden bandwidth determined from recombination radiation spectra

19 p3391 A69-36606

Fe-doped p-type gallium arsenide single crystal radiative recombination emission during current carriers transition from deep acceptor level into valence band

19 p3392 A69-36611

Recombination radiation of tellurium and zinc doped GaAs alloy type diodes, discussing luminescence spectra, current-voltage characteristics and temperature effects

20 p3506 A69-37783

Radiative recombination in GaAs p-n structures having region with concentrations of Ge atoms

21 p3780 A69-39044

Ionic excited states statistical equilibrium populations calculated for various electron densities and temperatures including effects of dielectronic, radiative and three body recombinations

22 p3985 A69-40666

RADIATORS

Radiation models using discrete radiator ensembles having applications to analysis of forward and backscatter from rough surfaces, clutter and chaff models, etc

01 p0030 A69-10556

Phased array antenna radiator element design, emphasizing configuration selection and reflection loss for beam steering

04 p0572 A69-14321

Monopulse parabolic antenna radiator design for decimeter and meter wavelengths, discussing characteristic properties at optimal dimensions

17 p2939 A69-33905

Antenna design, based on helical beam radiator data, providing checking facility giving automatic alarm

24 p4312 A69-42573

RADICALS

Ion pairing effects of cyclooctatetraene anion radical, studying electron spin resonance spectra temperature dependence

10 p1651 A69-22938

Ionic and biradical mechanisms in thermal and photois-trans isomerizations elucidated by planar and twisted configurations of polyenes

13 p2216 A69-27618

HO2 radical detection in rarefied H flame produced by HF discharges, recording high amplitude signals

15 p2716 A69-30054

RADII

Ionized meteor trails initial radii statistical characteristics determined for two models

10 p1783 A69-23917

Single and cladged glass fibers radii and refractive indices measurements on basis of laser light scattering

11 p1918 A69-25044

Neptune radius, density and atmosphere deduced from observations during occultation of BD minus 17 degrees 4388 by Neptune

17 p3041 A69-33816

Lunar gravitational potential and lunar surface radius vector binomial series coefficients determination from Luna 10 data used for lunar surface shape calculations

20 p3596 A69-37308

Ancient and present earth radii ratios determined by triangulation using paleomagnetic sites situated on different paleomeridians
22 p3937 A69-40183

RADIO ALTIMETERS

Avionics in forest resource inventories management, noting design of radar altimeter for low level aerial photography
01 p0080 A69-10352

Spacecraft radar altimetry with application to geodesy, discussing orbital and tracking errors
15 p2609 A69-30460

Spacecraft radar altimetry applied to study of sea surface slopes, tides, tsunamis, storm surges and submarine geology
15 p2609 A69-30461

FM radioaltimeter for Concorde aircraft, describing autocorrelation and automonitoring device, signal characteristics, reliability, etc
19 p3315 A69-36699

RADIO ANTENNAS

Mechanically despun VHF antenna for spin stabilized synchronous satellites, detailing electrical and mechanical design
01 p0161 A69-10350

Large paraboloid radio antennas structural setting for minimizing effects on performance due to deformation of surface by gravitational forces
06 p1023 A69-17372

Statistical theory of traveling wave antennas for random phase-amplitude distribution of current, discussing phase errors
06 p0898 A69-17797

TV transmission antenna radiation patterns measured with helicopter flown equipment and Decca navigation equipment
08 p1274 A69-20130

Failure causes for planetary reduction gear tooth for adjustment of radio telescopic antennas, studying fracture characteristics, working conditions and loading moments
08 p1321 A69-20853

Hertzian radiometric antennas and signal processing techniques for aerial mapping project for sun
08 p1290 A69-20976

Construction of large parabolic antennas for radio astronomy and satellite communication, noting dimensional accuracy, directional precision and dynamical behavior
09 p1476 A69-21650

Large aperture satellite communication antenna gain measurement technique, using extraterrestrial radio wave source or satellite
09 p1456 A69-22116

Multimode tracking/SYMMTRAC I and II/ feeds for low noise antennas, noting feed performance
11 p1852 A69-25317

Antenna switch for cascading and separating RF channels of high power wideband broadcasting systems
11 p1854 A69-25617

Noise sensitivity of space diversity reception system with narrow beam electrically switchable antennas for incomplete beam separation
12 p2030 A69-26485

Number 2 ground communications antenna system on Goonhilly Downs for British Post Office earth station
12 p2044 A69-26923

Microwave radiometric sensor operational principles and capabilities, discussing antennas and radiometric receivers
12 p2033 A69-26976

Soviet monograph on intrinsic noise emission in radio channels covering noise temperature at receiver input, thermal microwave radiation, etc
13 p2219 A69-27304

Two antenna radio direction finding system statistical synthesis, using quadratic linear process
15 p2562 A69-30110

Aoriste antenna to receive radioelectric signals from satellite emitter at distance of 10,000 km
15 p2580 A69-31095

Wideband frequency switch to connect narrow band auxiliary to wideband radio system antenna, describing components
16 p2759 A69-31861

Radio antenna consisting of truncated confocal paraboloids, discussing pencil beam pattern, antenna parameters and experimental results
17 p2939 A69-33904

Canadian radio observatory 150 ft telescope antenna, discussing dish structural feature for resisting gravity, wind and thermal stresses
23 p4149 A69-42134

RADIO ASTRONOMY

Planetary nebulae radio emission, observed with pencil beam of radio telescope, confirming thermal spectrum at radio frequencies
01 p0157 A69-11291

Space diversity reception as applied to radio astronomical investigation of large scale ionospheric inhomogeneities
02 p0237 A69-11665

French radio astronomy, presenting sky background radiation and solar emission results from Rubis 02 and 04 rockets
02 p0316 A69-11908

Radio telescope for Owens Valley Radio Observatory, noting interferometer array of steerable antennas and signal wavelength influence on telescope reflector accuracy
02 p0229 A69-11974

Radio signals from hydroxyl radicals by maser action in early stars, noting emission magnitude and intensity spectrum dissimilarity at different frequencies
02 p0324 A69-12493

Measurements of pulsars CP 0834, CP 0950, CP 1133 and CP 1919, discussing pulse intensities and shape, submillisecond structure, intensity variations, periods and positions
02 p0328 A69-12726

Radio galaxies and quasars, discussing radio structure, observation methods, polarization, time variation, etc
02 p0329 A69-12791

Energy sources and properties of quasars and radio galaxies by X ray astronomy
02 p0310 A69-12793

Radio star scintillation data, establishing periodic variations in rates within 1 to 1.5 years
03 p0505 A69-13081

Man-made and natural spatial communications
03 p0394 A69-13577

Ariel 3 receiver for measuring galactic noise spectrum, discussing loop antenna use with swept receiver, false terrestrial signals, etc
03 p0404 A69-13581

Submillimeter wave observation of sun to study anomalous absorption region
03 p0513 A69-13774

Solar wind turbulence properties deduced from radio astronomical measurements
03 p0502 A69-14001

Radio spectra differences of quasars and radio galaxies, noting influence of frequency levels
04 p0652 A69-14418

Radio spectrometer with paramagnetic quantum amplifier for astronomical spectral measurements in 8 mm range
04 p0597 A69-14851

Sporadic E irregularities in producing amplitude variations in radio star observations and satellite transmission
04 p0594 A69-15125

Protostars as sources of anomalous OH emission, discussing densities, masses and temperatures of OH condensations
04 p0661 A69-15143

Venus observation at 4.52 cm showing 654 K mean brightness temperature, negligible phase variation and polarization indicates thick atmosphere
05 p0818 A69-15601

Submillimeter wavelength astronomy noting instruments, prestellar matter, interstellar and intergalactic matter state and composition, IR stars, planetary atmospheres, etc
05 p0821 A69-15843

Space radio astronomy techniques for problems in galactic radio emission, solar studies and planetary observations
05 p0821 A69-15844

Radio astronomical methods for total atmospheric absorption of radio waves by atmospheric thermal radio emission measurements based on sky brightness temperature
05 p0723 A69-16779

Radio spectra of supernova remnants Cygnus Loop and IC443, noting possible radiation from shell source
06 p1003 A69-17322

Lunar occultations of galactic center region observed at 1667 MHz indicating OH absorption origin in uniform rotating cloud
06 p1009 A69-17961

Pulse intensity variations in pulsars observed at 113 MHz with parabolic antenna using photographic recording techniques, noting lack of periodicities
06 p1009 A69-17964

Radio sources detected in HF surveys not listed in 4C catalog
06 p1010 A69-17974

Joint radio-optical observations of flare star UV Ceti in Australasia during September-October 1967
07 p1214 A69-18666

Radio telescope survey of intense emission regions along galactic plane, considering antenna temperatures, spectrum and steps of observed emission
07 p1216 A69-19138

Radio sources flux densities from fan beam survey using Molongo radio telescope compared to flux densities of Parkes catalog, presenting revised spectra
07 p1218 A69-19278

HF radio radiation from planetary nebulae
08 p1384 A69-20056

Interplanetary scintillations of 3C 279 and CTA 21 combined to derive solar wind density fluctuation model, using random thin screen theory
08 p1385 A69-20069

Solar radio astronomy, discussing quiet sun radio emission, solar activity, slowly varying radio emission, radio bursts and possibility of observing lines
08 p1388 A69-20218

Galactic neutral hydrogen structure in region of Cygnus observed with parabolic antenna and frequency-switched radiometer
08 p1388 A69-20243

Photographic magnitudes of stars in various open clusters based on UVB system and photoelectric sequence
08 p1389 A69-20245

Quasars optical and electrical properties, distance, nature and role in cosmology
08 p1390 A69-20377

Galactic H 56 alpha recombination radio line observation in Omega Nebula in millimeter band with radio telescope, obtaining electron temperature
08 p1397 A69-20771

Microwaves from celestial objects noting radio emission from sun, moon and Jupiter, cosmic fireball and pulsars
08 p1407 A69-21125

Space systems and radio astronomy - Conference, Geneva, September-October 1968
09 p1448 A69-21268

Space systems and radioastronomy - Conference, Geneva, September-October 1968, Part 2
09 p1450 A69-21285

RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Casiopeia A source
09 p1586 A69-21295

Astronomical data on background radiation examined for existence of galactic radio halo
09 p1590 A69-21395

Vela pulsar polarization and periodicity observations supporting rotational model vs radial pulsations as radio emission source
09 p1592 A69-21461

Crab Nebula pulsar properties including pulse shape, dispersion and strong pulse emission
09 p1592 A69-21462

Pulsars rotating neutron star model analyzed on basis of magnetic dipole rotating in vacuo
09 p1592 A69-21463

Neutral hydrogen content and distribution of late type spiral galaxy NGC 6946 from 21 cm line measurements
09 p1598 A69-22187

Venus and Jupiter observations by earth paraboloid antenna, discussing average brightness temperatures and upper limit for Venus water vapor abundance
09 p1600 A69-22206

Radio telescopic survey for OH emission at 1667 MHz in interstellar dust clouds for catalog compilation, tabulating results
09 p1603 A69-22267

Solar outburst and storm accompanying 9 June 1968 flare, noting radio evidence for coronal instability before flare
09 p1582 A69-22747

Solar radio astronomy in Australia including solar atmosphere, bursts, instruments, etc
10 p1777 A69-23383

Radio astronomical investigations of small scale inhomogeneity motion and dimensions in interplanetary plasma, using observations of 3C 48 scintillations in 1967
10 p1782 A69-23711

Crab Nebula radio emission spectrum in decimeter wavelength range indicating emission spectral index decrease from Taurus A
10 p1784 A69-23941

- Radiophysics Laboratory /Sidney/, discussing radio astronomy, radioheliographs, radio telescopes, cloud physics and research
10 p1784 A69-23988
- Quasars time dependent flux density variations at 6.6 cm, noting spectrum peaks tendency toward lower frequencies with time
11 p1954 A69-24382
- Solar flares theories, discussing data acquisition by space research and solar radio astronomy
11 p1946 A69-24516
- Pulsar PSR 0833-45 period decrease and rate of change in period increased between 24 February-3 March 1969, discussing contraction explanation
12 p2154 A69-25878
- Pulsar distances estimated from neutral hydrogen absorption, using observations from 140 ft telescope
12 p2156 A69-26224
- Pulsar NP 0527 near Crab Nebula noting long period
12 p2156 A69-26227
- Rotating central disk in galactic plane observed by radio telescope, assessing relation between expanding gas of disk and high velocity stream from center
12 p2163 A69-27018
- Velocity distribution and density of neutral hydrogen in southern portions of M 31 and Sc-type galaxy M 33 by 75 m radio telescope
12 p2166 A69-27038
- Radio sources angular dimensions determined by microwave interferometry, discussing distinctions between quasars, galaxies and unidentified sources
12 p2166 A69-27039
- Frequency spectra of radio galaxies, supernova remnants and quasars observed by radio telescope operating in decimeter wave range
12 p2167 A69-27041
- Quasar spectra changes observed from 1962 to 1966 including flux density and antenna temperature for 3C 279 at cm wavelengths
12 p2167 A69-27043
- Quasars intensity variations at various cm wavelengths confirming wavelength dependence
12 p2167 A69-27045
- Extragalactic radio sources, discussing brightness distribution measurements and radio star scintillations
12 p2168 A69-27053
- Periodicity decrease on 24 February to 3 March 1969 in decay of Molonglo pulsar PSR 0833-45
12 p2172 A69-27167
- Galactic magnetic field along Orion arm from dispersion and rotation measures of linearly polarized radiation from pulsar psr 0833-45
13 p2335 A69-27311
- Lambda-doublet radiation from excited state of interstellar OH detected at 5 cm wavelength
13 p2335 A69-27312
- Astronomical maps of integrated hydrogen density, dispersion and velocity of high galactic latitude neutral hydrogen concentration, discussing kinetic temperature
13 p2347 A69-27718
- Neutral hydrogen cloud observed at high galactic latitude, discussing top intensity velocity, peak intensity dispersion, age, hydrogen mass and density
13 p2347 A69-27719
- Extragalactic radio sources parameters analyzed for distinguishing quasars from dominant luminous radio galaxies by radio spectra
13 p2348 A69-27801
- HF emission spectra of radio pulses from cosmic ray showers confirming Dublin group observations
13 p2333 A69-28471
- Troposphere effects on millimeter wave radio astronomy measurements, discussing solar noise fluctuations due to clouds and precipitation
13 p2223 A69-28607
- Space diversity reception as applied to radio astronomical investigation of large scale ionospheric inhomogeneities
13 p2257 A69-28696
- Radio star scintillation data, establishing periodic variations in rates within 1 to 1.5 years
14 p2515 A69-28763
- Radio astronomical observations of shape and drift velocity of focusing ionospheric discontinuities
14 p2436 A69-29054
- Contour maps of Milky Way continuum radiation at 1410 and 2650 MHz from low latitude survey, listing sources with estimates of flux density
14 p2526 A69-29772
- Radio spectrometer with paramagnetic quantum amplifier for astronomical spectral measurements in 8 mm range
15 p2607 A69-30243
- Decametric radio astronomy at frequencies from 10 to 40 MHz on wideband telescopes, discussing spectral types of discrete radiation sources
15 p2682 A69-30501
- Extratmospheric long and short wave radio astronomy since first artificial satellite, including device carriers effectiveness of earth satellites, lunar orbiters, rockets and balloons
15 p2682 A69-30504
- Optical and radio estimations of galactic masses, analyzing radius of rotation curve inflection point
15 p2687 A69-30547
- Radio astronomical research developments including structural requirements for 100 m telescope
15 p2589 A69-30864
- RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Cassiopeia A source
15 p2697 A69-31226
- Planet Venus data from Venera 4, Mariner 5, radio astronomical and radar measurements
15 p2698 A69-31360
- Doppler effect significance in radio astronomy including galaxies relative motion and information concerning isolated hydrogen clouds between galaxies
16 p2853 A69-31565
- Trieste astronomical observatory optical and radio solar photosphere observations in 1967, including solar cycle and north-south symmetry
16 p2858 A69-32206
- Pulsars Mp 0450, Mp 1642 and Mp 1818 discovery, discussing role of Molonglo radio telescope and pulse amplitude variations in detection
17 p3026 A69-32857
- Pulsed radio source CP 1919 detection at 13 cm wavelength with maser receiver and 210 ft antenna
17 p3036 A69-33637
- Cryogenic applications to low noise reception development in radio astronomy, planetary radar and communication with deep space probes
17 p2921 A69-33685
- Interstellar neutral hydrogen in mean galactic latitudes noting two different component types
17 p3039 A69-33766
- Frequency bands allocations for space research and radio astronomy development, noting Inter Union Commission of Frequency Allocations recommendations
18 p3100 A69-34376
- Pulsars observed for average energies at centimeter wavelengths, using azimuth elevation antenna
18 p3196 A69-34644
- Discrete radio sources spectra at decametric wavelengths, showing variation with frequency and radio wave generation mechanism leading to various spectral types
18 p3200 A69-35134
- Radio and radar astronomy with reference to extragalactic sources and solar system, noting astronomical instrumentation
19 p3425 A69-36430
- Crab Nebula radio brightness at 2.16 and 8.2 mm measured and compared to Jupiter flux density
19 p3428 A69-36875
- Detector radiometer design for radio astronomical measurements in 0.7-2 mm range, discussing sensitivity
19 p3285 A69-36877
- Radioastronomical investigations of inhomogeneous near solar plasma structure
20 p3606 A69-38017
- Radio observations of 30 May 1965 total solar eclipse at Manus Island, discussing radio brightness
20 p3616 A69-38304
- Radio sources observation by lunar occultation, interplanetary scintillations and interferometry techniques, outlining measurement theory
21 p3812 A69-39518
- Temperature fluctuations in microwave background radiation from primeval perturbations compared with perturbations from discrete radio sources
21 p3815 A69-39611
- Astronomical unit determination, discussing dynamical and radar methods and Doppler shift of neutral hydrogen line spectra in radio astronomy method
22 p4022 A69-40464
- Statistical model of cratered planetary surface slopes and elevation applied to radio wave scattering by moon and Venus
23 p4209 A69-41322
- Radio studies of galactic structure, discussing Milky Way origin and formation
23 p4217 A69-42320
- Observational cosmology developments with radio and X ray astronomy emphasizing existence, origin, effects and anisotropy of excess microwave background
23 p4219 A69-42327
- Antenna arrays for radio astronomy in meter-wavelength region including cross-polarized rhombics, steerable broadside collinear array and radio interferometer
23 p4143 A69-42353
- Carbon isotopes compared in interstellar formaldehyde transition for galactic nucleosynthesis, discussing spectrum analysis of radio astronomical telescope observations
23 p4220 A69-42376
- Spiral and irregular galaxies integral properties and relations, discussing optical and 21-cm observations, hydrogen masses, statistical corrections, hydrogen line optical depths, etc
23 p4220 A69-42383
- Equal velocity contour diagrams for interstellar matter emission and absorption study in Cassiopeia-Perseus region
24 p4384 A69-43050
- Quasars time dependent flux density variations at 6.6 cm, noting spectrum peaks tendency toward lower frequencies with time
24 p4389 A69-43772
- RADIO ASTRONOMY EXPLORER SATELLITE**
- RAE-A satellite design, simulation and flight performance, discussing gravity gradient stabilization
07 p1226 A69-18328
- RAE satellite boom deployment to achieve gravity gradient capture
07 p1228 A69-18346
- Magnetic attitude detection and control system for Radio Astronomy Explorer satellite
[AIAA PAPER 68-855] 12 p2174 A69-26779
- Radio Astronomy Explorer satellite boom deployment method resulting in gravity gradient capture, emphasizing role of predeployment attitude and antenna Vee angle
[AIAA PAPER 69-920] 21 p3821 A69-39350
- Radio astronomy Explorer A attitude determination via disk-oriented programming ground support system for reducing and calibrating telemetry data, attitude prediction and command, etc
[AIAA PAPER 69-983] 22 p3907 A69-40363
- Cosmic radio background noise spectrum near north galactic pole based on Radio Astronomy Explorer satellite experiments
23 p4219 A69-42375
- Tethered orbiting interferometer configurations for future Radio Astronomy Explorer satellites, discussing gravitational stabilization and delta launching into orbit as single payload
[AAS PAPER 69-255] 24 p4313 A69-42859
- Iterative weighted least squares method for reconstructing time history of coupled rotation and flexural oscillations of Radio Astronomy Explorer satellite
24 p4394 A69-43291
- RADIO ATTENUATION**
- NT MANDELSTAM REPRESENTATION**
- Total atmospheric moisture content by measuring radio wave absorption at water vapor molecule rotational spectrum absorption line
02 p0274 A69-11438
- Atmospheric water vapor content from summer-fall 1966 measurements of atmospheric radio wave absorption of thermal radio emission, describing experimental apparatus
02 p0274 A69-11439
- Ionosphere formed waveguide electromagnetic field determined by expression, accounting for radio wave absorption during communications via artificial satellites
02 p0206 A69-11661
- Sudden cosmic noise absorption in ionosphere confirms relationship with solar chromospheric flares
02 p0306 A69-11667
- Terrain roughness effect on ionospheric radio wave absorption measurement data compared with theoretical results
02 p0207 A69-11669
- Anomalous radio wave absorption in polar aurora region ionosphere, discussing disturbance characteristics
02 p0207 A69-11688
- Performance characteristics of 300 GHz Dicke type superheterodyne radiometer receiver for measuring atmospheric attenuation of electromagnetic waves
02 p0209 A69-12336
- Teichmann cost analysis extended to include frequency dependent and diversity dependent rain losses for satellite communication, using Bayes strategy
05 p0721 A69-16580

Electromagnetic waves attenuation and scattering by rainfalls calculated using droplet distribution function
08 p1275 A69-20430

Midlatitude ionospheric disturbances accompanied by auroral type radio absorption observed by radio astronomy and probes during May 26, 1967 storm
10 p1688 A69-23935

Millimeter and submillimeter radio waves attenuation in rain, showing effective loss cross section as function of raindrop diameter and wavelength
10 p1657 A69-23943

Vertical atmospheric absorption of radio waves by water vapor and oxygen molecules near rotational resonance based on radio emission measurements
10 p1658 A69-23944

Attenuation losses on curved dielectric waveguide in X band
11 p1856 A69-25633

Differential absorption by measurement of phase difference of ionospherically propagated incoherent radio wave signals under quasi-longitudinal conditions
12 p2032 A69-26857

F cosine θ theorem validity for VLF radio wave absorption in ionosphere tested using exponential electron density models, noting Brewster angle influence on reflection coefficient
13 p2222 A69-28473

Ionosphere formed waveguide electromagnetic field determined by expression, accounting for radio wave absorption during communications via artificial satellites
13 p2224 A69-28692

Sudden cosmic noise absorption in ionosphere confirming relationship with solar chromospheric flares
13 p2334 A69-28698

Terrain roughness effect on ionospheric radio wave absorption measurement data compared with theoretical results
13 p2224 A69-28700

Anomalous radio wave absorption in polar aurora region ionosphere, discussing disturbance characteristics
13 p2224 A69-28719

Riometric data processing method for radio wave absorption measurement, considering nighttime cosmic radio emission intensity
14 p2436 A69-29056

Radio wave absorption coefficient in lower ionosphere related to total radiation absorption and electron concentration profile
14 p2411 A69-29075

Ionospheric radio wave absorption at midlatitude, noting mesospheric zonal wind inversion
14 p2441 A69-29418

Interstellar radio absorption influence on spatial distribution of cosmic radio emission observations with fixed multiple dipole antenna arrays
15 p2687 A69-30545

Radio wave absorption by water vapor in Venusian and Martian atmospheres, constructing model from Venera 4 data
15 p2569 A69-30952

Regenerative amplifier to counteract cable damping due to narrow bandwidth in PCM systems
16 p2755 A69-31860

Radio wave emission bursts at 28 MHz at onset of nighttime absorption dip and close to auroral zone from riometer recordings, noting relation to geomagnetic storms
16 p2775 A69-32085

Radio emission and absorption of cumulus and stratus clouds at millimeter and centimeter wavelengths, giving maximum SNR defined by brightness temperature
16 p2807 A69-32270

Radio wave absorption in interstellar H I regions, considering mean absorption coefficient dependence on height above galactic plane, evaluating planar electron density
17 p3034 A69-33608

Cosmic radio emission absorption during IQSY at 24.6 MHz, relating diurnal variation of absorption and geomagnetic index F scatter occurrence
17 p2968 A69-33992

Ionospheric radio wave absorption measurements by A1 method at 2.2 MHz, showing height estimates of absorption region and winter anomaly
17 p2968 A69-33993

Ionosonde electric circuit modified to permit radio wave absorption measurements over wide frequency range, calculating electron collision frequencies in F region
17 p2968 A69-33994

D region electron densities from multifrequency absorption measurements by proton spectra analysis, noting cubic approximation
18 p3127 A69-34799

Preamplifier analysis for FM system optimization to maintain constant output signal to noise ratio throughout baseband
18 p3103 A69-35088

Residual nighttime radio wave absorption in ionosphere, noting absorption-magnetic activity relation existence
20 p3528 A69-37678

Frequency dependence of radio wave absorption in ionosphere at 2.2-4 MHz by impulse method, noting effect of sporadic layer
20 p3491 A69-37680

Ariel 3 satellite attempted background radiation measurement between 2-4 MHz to show absorption onset in Galaxy
21 p3806 A69-39258

Identification, position and temperature of solar X ray sources derived from D layer ionization radio absorption behavior during eclipses and lunar reflection
22 p4004 A69-40308

Free-free intergalactic absorption at LF as function of red shift for uniform zero pressure cosmological models
22 p4025 A69-40640

Ionospheric radio waves constant absorption term obtained from sunrise and sunset data
23 p4127 A69-42424

Ionospheric nondeviative radio wave absorption, noting roles of collisional and working frequencies and solar zenith angle
23 p4127 A69-42425

Space attenuation at VHF and UHF telemetry frequencies
24 p4281 A69-42622

RADIO AURORAS

Radio aurora radar measurement, determining echo and Doppler velocity distribution and dependence on aspect angle, magnetic latitude, height, azimuth and time
05 p0754 A69-16265

Radio aurora rate of occurrence from VHF bistatic radio system observations in eastern Canada
07 p1124 A69-18824

Southern radio auroral zone observation with rhombic antennas, noting diffuse and discrete zones associated with proton and electron precipitation
12 p2033 A69-26950

Radio waves propagation along polar auroras region, obtaining ionospheric parameters for magnetic disturbances based on penetration probability
14 p2436 A69-29058

Physical model for IGY radio aurora data correlated with Brice magnetospheric convection model
18 p3125 A69-34231

Waves in auroral ionosphere due to particle precipitation, indicating ionospheric plasma instabilities
18 p3130 A69-35187

Bistatic auroral backscatter communications conducted by recording CW transmissions from beacon transmitters to study radio aurora
21 p3709 A69-38498

RADIO BEACONS

Aircraft Searchmeter, discussing device fitted to locate emergency radio beacon signal
06 p0878 A69-16963

ORBIS-CAL designed to achieve three axis orientation to local vertical and velocity vector in eccentric orbit by gravity gradient stabilization
07 p1226 A69-18323

High latitude transition or scintillation boundary between high and low amplitude fluctuations of satellite radio beacon signals examined as function of time
07 p1125 A69-18846

Scintillation fading of VHF beacons on synchronous satellites, noting amplitude fluctuation depth and rate
09 p1457 A69-22461

Bearing errors from radio beacons with rotating or multilobe radiation patterns
15 p2567 A69-30343

Rescue locator beacons and airborne search equipment of VHF and UHF capabilities available to international civil aircraft operations
15 p2552 A69-30852

Direction defining radio beacons performance, discussing signal amplitude and phase comparison systems and Doppler techniques
17 p2918 A69-33028

RADIO BLACKOUT

U BLACKOUT [PROPAGATION]

RADIO BROADCASTING

U BROADCASTING

RADIO BURSTS

NT SOLAR RADIO BURSTS
NT TYPE 2 BURSTS
NT TYPE 3 BURSTS
NT TYPE 4 BURSTS
NT TYPE 5 BURSTS

VLF electric field measurements from 1 AU heliocentric orbit, noting field oscillations in solar wind and large amplitude HF noise bursts
01 p0035 A69-11224

Automatic recording device for cosmic ray burst: utilizing information time delay to allow detailed initial period study
03 p0430 A69-13545

VLF radiation bursts /July-October 1966/ in U.S.S.R., noting detection probability increase with increasing magnetic activity
06 p0920 A69-17731

Radiation bursts in subpolar stratosphere recorded by gas discharge counters on board sounding balloons
06 p0921 A69-17744

Solar X ray bursts decay curves and spectra in 10 to 150 kev range interpreted as hot coronal condensation during flare and electron bremsstrahlung
07 p1206 A69-19250

Radio wave emission bursts at 28 MHz at onset of nighttime absorption dip and close to auroral zone from riometer recordings, noting relation to geomagnetic storms
16 p2775 A69-32085

Red dwarf star /YZ Canis Minoris/ radio outbursts: observation noting stellar atmospheric spectrum, electron density and temperature and total flare energy
17 p3043 A69-34164

Solar proton flare June 1968 analysis, discussing geophysical effects and possible polar cap absorption
20 p3587 A69-37332

Polarization ellipse orientation at source from Faraday fringes on Jupiter decametric radio bursts swept frequency records
20 p3594 A69-38169

Auroral vLF emission bursts simultaneous with sharp ionospheric absorption dip and SC deflections in geomagnetic H, noting corpuscular ionization
24 p4308 A69-43001

Solar X ray bursts decay curves and spectra in 10 to 150 kev range interpreted as hot coronal condensation during flare and electron bremsstrahlung
24 p4372 A69-43613

RADIO COMMUNICATION

NT PULSE FREQUENCY MODULATION
TELEMETRY
NT TELEPHONY
NT TELEPHOTOMETRY

Critical parameters for optimum design of Cassegrain antenna used in space communications [UN PAPER 68-95280]
01 p0043 A69-10481

Probabilities of error, correct reception and signal cancellation in radio communication systems channels with signal absorption fading
01 p0030 A69-10592

Radio links between earth and deep space probes, summarizing bistatic radar astronomy results [AAS PAPER 68-182]
02 p0311 A69-11467

Maritime radio communications satellite service for ship safety, discussing stationary equatorial satellite systems [AIAA PAPER 68-232]
02 p0356 A69-12383

Soviet book on meteor trail scatter communications covering civil and military advantages over troposcatter systems, meteor trail scatter properties, etc
04 p0562 A69-15488

Meridional radio communication between radio station at South Geomagnetic Pole and amateur SSB radio stations in U.S.S.R.
06 p0889 A69-17753

Hearing errors in voice communication with radio telephone, noting effects of mean syllable number and consonants per syllable in pilots and controllers
06 p0891 A69-18034

Polarization of ionospherically propagated HF radio waves for various times, frequencies and path azimuths applied to distortion in radio communication
07 p1078 A69-18916

Duty cycle increase on meteor forward scatter radio communication paths by use of wide-beam transmitting antenna along great circle
08 p1394 A69-20609

Direct radio and TV broadcasting from satellite-borne radio transmitter to general public, giving visibility, gains, frequencies and bandwidths tables
09 p1586 A69-21286

Radiocommunications for Tiros and Nimbus meteorological satellites, noting weather data communications and hydrological experiments

09 p1451 A69-21289

Communication problems due to natural and artificial plasmas in spacecraft vicinity, discussing plasma effect theory

09 p1451 A69-21292

Radio waves behavior along paths between satellites and earth, studying preferred frequency bands for spacecraft transmitters used as beacons

09 p1451 A69-21293

Coherent FSK LF/VLF radio communication modem with large predetection bandwidth for improvement of reception in atmospheric noise

09 p1458 A69-22473

Probabilities of error, correct reception and signal cancellation in radio communication systems channels with signal absorption fading

10 p1653 A69-23106

Tandem interleaved cyclic codes for digital HF communication with improved error rate at reduced decay time

10 p1655 A69-23530

Carrier to interference ratio /CIR/ between desired path and every other path within predetermined range in microwave system calculated by computer

11 p1840 A69-25312

Computer techniques application to radio engineering functions related to system performance, layout engineering, frequency coordination and administration, discussing decision parameters interrelationship

11 p1840 A69-25313

Signal to noise ratio at output of three stage radio section with preselector, detector and ideal integrator, noting error

13 p2222 A69-28506

Ionospheric horizontal discontinuities of electron density distribution parameters effect on penetration frequency, skip distances and arrival angles

14 p2436 A69-29057

Potential noise stability of reception in binary communications system with active pause in channel for unknown signal arrival time

15 p2563 A69-30134

Radio waves behavior along paths between satellites and earth, studying preferred frequency bands for spacecraft transmitters used as beacons

15 p2570 A69-31227

Ionospheric data acquisition and utilization for improved radio communications, considering contact between engineers and physicists, ionosondes, data reliability for prediction, etc

17 p2961 A69-33402

Auroral absorption distribution from arctic riometric observations mapped for evaluating radio communications reliability

17 p2967 A69-33990

Book on statistical communication and applications to radio and radar systems technology to provide guidelines for design decisions

19 p3267 A69-35900

Soviet book on modern systems of wireless telecommunication covering radio communication and tropospheric, ionospheric and satellite wireless systems

20 p3487 A69-37235

German ground station radio communications via Intelsat satellites, discussing transmitting facilities, TV picture and sound signals, etc

22 p3902 A69-41249

RADIO CONTROL

Current carrying cylindrical plasma column oscillations surrounded by electric excitation with multiple feedback radio, discussing stabilization possibility

13 p2311 A69-28106

Ground station command transmission equipment for German AZUR satellite, describing components based on NASA Tone Digital Command System

16 p2759 A69-31856

Soviet book on radio control of rocket missiles and space vehicles covering control principles, systems analysis and synthesis, vehicle characteristics, etc

20 p3574 A69-37232

ELDO radio guidance station at Gove, discussing propulsion stage tracking and instruction transmitted to vehicle

22 p3919 A69-39920

Missile response-PDM guidance and control system parameters relationship, using phase plane representation

24 p4283 A69-43252

[AIAA PAPER 68-820]

RADIO DIRECTION FINDERS

TRANSIT satellite navigation system for all-weather diurnal position fixing, noting Doppler frequency measurement and ionospheric signal refraction

01 p0112 A69-10457

Low polarization error HF loop antenna array direction finder performance tests, comparing measured bearings with polarimeter and conventional crossed loops data

01 p0048 A69-11006

CRT direction finder with linear scanning to determine statistical data for azimuthal distribution of atmospherics

04 p0600 A69-15104

Polarization errors in phase type direction finder caused by antenna

04 p0561 A69-15404

Aircraft Searchmeter, discussing device fitted to locate emergency radio beacon signal

06 p0878 A69-16963

Shipboard direction finder calibration accuracy, emphasizing radio operator training

06 p0897 A69-17533

Power traveling wave tubes in ground stations for INTLSAT 3 direction finding system

07 p1094 A69-18426

Electronic beam-rotation systems operation using matrix network to feed circular arrays, noting applicability to direction finding or radar systems

08 p1288 A69-20964

Optimal direction finding systems based on bearing angle representation in multidimensional Markov process, considering white and interference noise

13 p2219 A69-27254

Bearing errors reduction in vertical loop HF direction finders for ionospherically propagated signals in dual channel system

14 p2413 A69-29493

Two antenna radio direction finding system statistical synthesis, using quadratic linear process

15 p2562 A69-30110

Direction finding accuracy of pulsed radar with binary-quantized detector signals, discussing azimuth minimum variance and quantization threshold optimization

15 p2566 A69-30333

Atmospheric sources automatic location by direction finding network based on triangulation network principle

18 p3102 A69-34961

HF direction finder for display of time varying multimode propagation phenomena, using analog computer and phase sensitive interferometer

21 p3677 A69-39456

Direction finding characteristics of nonlinear antenna, including current determination and optimal angle for sidelobe level

21 p3684 A69-39619

RADIO ECHOES

Ducted echoes on topside ionograms and whistler diffuseness at midlatitudes, noting common occurrence of phenomena

01 p0029 A69-10551

VHF transhorizon propagation by double reflection from elevated layer in troposphere

01 p0034 A69-11139

Envelope distribution of echo signal during reflection scattering by extended turbulent meteor trails

02 p0207 A69-11690

Centimeter radio wave reflections from explosion region produced by TNT and hexogen charge

02 p0282 A69-12415

Numerical radar information charts, plotting radio echo reflection boundaries from cloud and precipitation observations by weather radars

03 p0459 A69-13287

Charts of horizontal cross sections of radio echo foci for radio echo reflections from cumulonimbus clouds

03 p0459 A69-13288

Horizon focusing gain for radio waves reflected obliquely from ionosphere, noting effects of transmitter location and ionosphere geometry

03 p0395 A69-13627

Mass distributions of meteoroids obtained from underdense radio meteor echoes

03 p0518 A69-14254

Plasma frequency resonances observed by topside sounders interpreted as slowly propagating waves suffering oblique reflection, noting effects of nonhorizontal magnetic field

07 p1124 A69-18837

Conjugate echoes in Alouette 2 topside sounder ionograms explained by multiple reflections between

conjugate points of field line, noting magnetospheric waveguides role

08 p1274 A69-20045

D region electron density vertical profiles measured using partially reflected echoes from lower ionosphere

08 p1307 A69-20189

Combination backscattering on ionic sound waves assumed responsible for unexpected features of radio signals reflected from sun

10 p1776 A69-23219

Echo 1 aluminized plastic balloon satellite, discussing radio linkup by reflections, use in geodesy and atmospheric and radiation pressure effects on lifetime

10 p1792 A69-23804

Lunar surface pore water /or ice/ detection by active orbital or surface electromagnetic experiments, noting water effect on reflection coefficient

11 p1958 A69-24693

Wind structure in atmosphere meteor region from persistent meteor trail radio echoes amplitude fluctuations, noting horizontal wind velocity profiles

12 p2074 A69-26962

Envelope distribution of echo signal during reflection scattering by extended turbulent meteor trails

13 p2224 A69-28721

Object shapes automatically classified from reflected radio signals, considering correlation description of object effective dispersion surface diagram

14 p2411 A69-28917

Radio wave reflections from edge of large scale depressions of ionospheric electron density observed by topside sounding satellites, discussing ionogram recordings

14 p2415 A69-29521

Fresnel irregularities calculated from radio wave partial reflection from lower ionosphere measured by rocket probes

15 p2604 A69-31420

Meteorological effects on anomalous radio echo determined from simultaneous aerological and radar observations, noting maximum signal amplitude during high humidity and low wind speeds

16 p2808 A69-32277

Automatic radar station for meteor observations, discussing separate transmitting and receiving antennas directive gain and radio echo power

17 p2939 A69-33902

Radio echo from south showing origin from irregularities in F but not E region, discussing propagation modes for particular record

18 p3125 A69-34252

Leonid meteoroids mass distribution law exponent evaluation based on unstable meteoric radio echo durations integral distribution

18 p3203 A69-35334

Ionospheric electron density irregularities observed by topside sounders showing shape, dimensions across magnetic field and variation percent, discussing resulting radio echoes

20 p3530 A69-37870

Radio wave reflection from irregularly ionized meteor trains, discussing decay time scatter and electron line density

22 p3899 A69-39969

HF backscatter, long delay signals and round-the-world echoes as radio wave propagation modes

23 p4116 A69-41602

Radio echoes diffraction patterns determination from reflection coefficients of polarized radio waves reflected from ionized meteor trails

23 p4214 A69-41846

Ionosphere reflected radio waves field strength measurements, obtaining formula for ground wave discrimination

23 p4123 A69-41861

RADIO ELECTRONICS

Complex electronic systems optimum redundant element content determination for ensuring adequate supply

14 p2426 A69-29422

Lasers and maser devices in radio quantum electronics, discussing optical parametric and microwave devices including transistors, diodes, magnetrons, etc

19 p3284 A69-36433

Meteor radio electronics principles, methods and equipment, discussing ionized meteor trail formation, radar tracking and utilization of trails for communications

19 p3277 A69-36591

RADIO EMISSION

NT SOLAR RADIO BURSTS

NT SOLAR RADIO EMISSION

NT TYPE 2 BURSTS

NT TYPE 3 BURSTS

NT TYPE 4 BURSTS
NT TYPE 5 BURSTS

Pulsar radiation origin related to electromagnetic wave distortion during propagation through resonant media

01 p0149 A69-10272

Spectral fine structure in emission from pulsars, noting correlation between fading and spectral change

01 p0150 A69-10273

Quasi-periodic VLF emissions associated with geomagnetic micropulsation activity in terms of comparable periodicity

01 p0063 A69-10274

Planetary nebulae radio emission, observed with pencil beam of radio telescope, confirming thermal spectrum at radio frequencies

01 p0157 A69-11291

Cosmic radio emission at 1.68 MHz measured by Cosmos 142 satellite, discussing receiver, antenna and radiation temperature

01 p0158 A69-11322

Powerful flares close connection with filaments and loop prominences, discussing differences in physical characteristics

02 p0306 A69-11633

Mercury radio emission phase dependence, discussing brightness temperature value approximation and surface layer properties

02 p0314 A69-11640

Venus microwave phase effect analyzed assuming dry massive Venus atmospheric model, discussing heat transfer processes

02 p0319 A69-12108

Galactic Jupiter Probes investigating Jupiter atmosphere and emissions and deep space cosmic radiation

02 p0324 A69-12303

Normal galaxies radio emission and brightness of metagalactic radio background

02 p0325 A69-12564

Jupiter, Venus and Mars 8.6 mm radio emission, obtaining average disk brightness temperatures

02 p0327 A69-12716

Pulsar hypothesis based on oscillating white dwarf surrounded by hot rarefied corona to explain radio emission

03 p0505 A69-13077

Antennas with vertical radiation patterns to measure frequency spectrum of distributed cosmic radio emission between 6.3-40 MHz

03 p0500 A69-13080

Thermal conditions of upper blanket of lunar surface during eclipse, using data to calculate lunar radio emission

03 p0506 A69-13088

Radio emission center of gravity from 3C 273 quasar determined by radio telescope together with A and B component fluxes

03 p0506 A69-13092

Interstellar gas masers account for properties of 18 cm emission lines from OH molecules

03 p0511 A69-13465

Man-made and natural spatial communications

03 p0394 A69-13577

Mercury radio emission theory, calculating Mercurian brightness temperature as function of solar illumination and distance from sun

03 p0512 A69-13688

Polarized radio emission from Jupiter, giving hypothesis of radiation belts deformation by solar wind

03 p0512 A69-13703

Spontaneous emission of gadolinium ferrite polycrystals, discussing temperature dependence

03 p0487 A69-13731

Diurnal variations of low latitude VLF emissions observed at Hiraio, Japan

03 p0398 A69-13900

Ionospheric LF radio noise cut-off near proton gyrofrequency, discussing satellite ELF and VLF observations

03 p0399 A69-14021

Nonlinear effect of triggering pulse on electron distribution for triggering of VLF emissions

03 p0399 A69-14022

Ammonia gas molecules in interstellar medium, discussing detection in direction of galactic center by means of microwave emission

03 p0518 A69-14258

Venus brightness temperature between 0.75 and 1.65 cm from radio emission measurements, taking into account water vapor in Venus atmosphere

04 p0658 A69-14960

Protostars as sources of anomalous OH emission, discussing densities, masses and temperatures of OH condensations

04 p0661 A69-15143

Nonquadrupole nature of cosmological radio emission intensity distribution demonstrated for anisotropic homogeneous cosmological models without flat space

04 p0662 A69-15238

Photographs of intensity of radio emission in millimeter band, using luminophor based on ZnS and CdS

04 p0560 A69-15272

Extensive air shower radio pulse polarization, using log periodic EW- and NS-arm antennas

04 p0595 A69-15425

Gyro synchrotron emission spectrum and intensity from energetic solar electrons radiating in coronal magnetic fields applied to type IV solar radio bursts

04 p0650 A69-15529

Europa control of decametric emission from Jupiter

05 p0813 A69-15605

Quasar and radio galaxy evolution, discussing energy release rate and particle acceleration effects on radio and optical emissions

05 p0822 A69-15852

MHD quasar model consisting of galaxy with supermassive plasma nucleus moving in magnetic field

05 p0822 A69-15853

Elektron satellite recorded sporadic radio emission noting relationship to geomagnetic disturbances and dependence on satellite position

05 p0824 A69-16059

Increasing periodicities in radio pulses from pulsars

05 p0825 A69-16352

Radio sources quantity dependence on radio emission value, noting determination of spatial density variations of radio galaxies

05 p0826 A69-16426

Jupiter microwave radiation flux density at 81 MHz, noting spectrum of microwave emission

05 p0827 A69-16506

Radio astronomical methods for total atmospheric absorption of radio waves by atmospheric thermal radio emission measurements based on sky brightness temperature

05 p0723 A69-16779

Radio emission from supernova remnants, reviewing evolution, structure, spectra and polarization, plus identification, characteristics, surface brightness and radio emissive remnants distance

06 p1002 A69-17314

Magnetic activity dependence of VLF emission properties at magnetically conjugate points

06 p0920 A69-17735

Groups of drifting lanes of emission in fine structure of dynamic spectra of Jupiter decasecond decametric radiation bursts

06 p1008 A69-17958

Radio emission and microwave absorption spectrum dependence on physical properties of clouds in millimeter and centimeter wavelength range

06 p0954 A69-17998

Radio wave brightness temperatures and contrast characteristics in presence of clouds and precipitation

06 p0954 A69-17999

Antenna transmission and receiving system effects on radio brightness temperature measurements by airborne equipment

06 p0929 A69-18000

Ground based radio telescope sensitivity to radio emission from earth atmosphere and galactic sources

07 p1099 A69-18515

Dependence of microwave emission from n-InSb on crystalline orientations, noting anisotropy in case of rotation in perpendicular plane

07 p1198 A69-18647

Radio telescope survey of intense emission regions along galactic plane, considering antenna temperatures, spectrum and steps of observed emission

07 p1216 A69-19138

Radio noise generation in topside ionosphere, noting Cerenkov radiation from intense soft fluxes of auroral electrons

07 p1127 A69-19257

Whistlers and VLF emissions from ground based and satellite measurements, applying results to electron density mapping and ion detection

07 p1127 A69-19354

Bright galaxies observed at 408 MHz with fan beam of east-west arm of cross-type radio telescope for correlations between radio and optical properties

08 p1386 A69-20087

Lunar radio emission polarization characteristics, considering knife-edge type radiation pattern effect of antenna array

08 p1391 A69-20423

Polarization variations in radio pulses from pulsar CP 0328, noting possible origin in synchrotron radiation from collimated electron beam

08 p1397 A69-2069

Radio emission from magnetic neutron stars as possible model for pulsars, noting optical and IR emission bands

08 p1397 A69-2072

Wideband 1665 MHz OH emission source in Carina region of galaxy in weak continuous radiation region with low degree of polarization

08 p1397 A69-2077

Water molecules radio spectral lines from microwave emission sources in Galaxy studied for variability, size and polarization

09 p1587 A69-21307

OH emission source in W24 during July 19, 1967 lunar occultation, obtaining better position for brighter OH emission feature

09 p1591 A69-21449

Elektron 4 satellite radio emission data transmitted from July to December 1964, noting month-to-month variations in mean radiation level

09 p1578 A69-21776

Radio telescopic survey for OH emission at 1667 MHz in interstellar dust clouds for catalog compilation, tabulating results

09 p1603 A69-22267

Radio emission time variation from radio object associated with Sco X-1

09 p1603 A69-22268

Nonthermal cosmic radio emission spectral index angular variations during scanning of sky by receiver antenna, analyzing dependence on galactic latitude

10 p1784 A69-23940

Crab Nebula radio emission spectrum in decimeter wavelength range indicating emission spectral index decrease from Taurus A

10 p1784 A69-23941

Venus and Jupiter brightness temperature and radio emission at 2.25 and 8 mm wavelengths observed with radio telescope

11 p1956 A69-24396

Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants

11 p1956 A69-24398

Electromagnetic wave buildup by induced Compton effect as possible radio emission source, considering data for quasars and pulsars

11 p1957 A69-24402

Transmitter frequency increase effect on production of artificial stimulated VLF emissions in magnetosphere

11 p1878 A69-25156

Radio emission of fast cosmic ions by plasma wave conversion to electromagnetic waves, using nonlinear mechanism in turbulent plasma

12 p2149 A69-26209

Electron concentration fluctuation in ionospheric inhomogeneities estimated from Cassiopeia A radio emission

12 p2070 A69-26687

Pulsars discovery, emission, regularity, narrow frequency band and pulse changes, physical nature and aspects of Crab Nebula source

12 p2160 A69-26895

Satellite observation of intensity and distribution of VLF emission at medium latitude during magnetic storm interpreted by transverse resonance plasma instability

12 p2073 A69-26947

Radio emission from 18 galaxies noting accompaniment of optical spectrum emission and enhancement due to production of relativistic electrons in active nuclei

12 p2164 A69-27026

Radio galaxies luminosities distribution and spectral indices, galactic structures and diameters, considering relations between radio emission parameters

12 p2165 A69-27031

Radio emission correlation to nuclei shape in normal galaxies

12 p2166 A69-27040

Coherent radio emission mechanism in quasars and supernova remnants, discussing magnetic effects

12 p2168 A69-27050

Soviet monograph on intrinsic noise emission in radio channels covering noise temperature at receiver input, thermal microwave radiation, etc

13 p2219 A69-27304

Radio emission from high level transitions in hydrogen calculated by superposing emission lines on background continuum, using Gaunt factor for free-free emission

13 p2327 A69-27596

Jupiter decametric radio emission periodicity attributed to undiscovered satellite in unstable orbit, discussing application to satellite discovery

13 p2343 A69-27622

VLF morning and evening magnetosphere emission distinction by studying spectrum width as function of variations in K index

13 p2253 A69-27740

Radio emitting clouds properties as function of distance to parent galaxy nucleus

13 p2352 A69-27874

Radio emission of atmospheric cosmic ray showers observed with multiple wideband half wave dipole antenna system, obtaining radiation spatial distribution

13 p2332 A69-28407

Half wave dipole antenna operational factors analyzed for RF radiation spatial power distribution from atmospheric cosmic ray showers

13 p2332 A69-28408

Pulsar hypothesis based on oscillating white dwarf surrounded by hot rarefied corona to explain radio emission

14 p2515 A69-28759

Antennas with vertical radiation patterns to measure frequency spectrum of distributed cosmic radio emission between 6.3-40 MHz

14 p2509 A69-28762

Thermal conditions of upper blanket of lunar surface during eclipse, using data to calculate lunar radio emission

14 p2515 A69-28770

Radio emission center of gravity from 3C 273 quasar determined by radio telescope together with A and B component fluxes

14 p2516 A69-28774

Pulsar model used to explain stellar shape oscillations as cause of radio emission intensity periodic variations

14 p2522 A69-29675

Crab Nebula lunar occultation observed by Cassegrain array of deep space communication facility, finding radio brightness distribution similar to optical

15 p2687 A69-30539

Metagalactic electrons and relict radiation interaction calculations allowing for universe expansion, space curvature and X ray absorption

15 p2687 A69-30541

Sky cosmic radio emission absolute temperature measured at decimeter wavelengths and at two zenith angles to minimize atmospheric influence

15 p2687 A69-30544

Distribution model for ionized interstellar gas over galactic disk for explaining radio emission absorption and depolarization from discrete sources

15 p2695 A69-30935

Lunar radio emission linear polarization radial dependence at 0.8-cm wavelength using radio telescope, determining dielectric constant of emitting layer

15 p2697 A69-31251

Radio emission and absorption of cumulus and stratus clouds at millimeter and centimeter wavelengths, giving maximum SNR defined by brightness temperature

16 p2807 A69-32270

Criticism of Chiu theory on radio emission from pulsars supposing electron radiation

16 p2865 A69-32802

Radio emission from Cygnus X-2 reporting on observations at 4.5 cm wavelength

16 p2865 A69-32804

Heliosphere boundary location significance for Jovian magnetosphere configuration, considering inverse correlation between sunspot number and Jovian decametric radio emission

17 p3033 A69-33379

Impulsive radio emission from CP 0950 by Mark I telescope, plotting mean and interpulse profiles

17 p3036 A69-33638

Observed and computed radio pulse profiles of white dwarfs, noting resemblance of emissivity variation with latitude to magnetic field distribution on sun

17 p3037 A69-33644

Saturn emission peak and flux density at 408 MHz determined by cross telescope, discussing mechanism for enhanced radiation at long wavelengths

17 p3041 A69-33813

Radio wave trajectories for waves emitted at 15, 20 and 25 kHz within spherically stratified ionosphere below F 2 maximum

17 p2969 A69-34001

Sky brightness temperature spectra searched for neutral intergalactic atomic hydrogen radio emission, using horn-reflector antenna

18 p3190 A69-34285

Observations of W49 at 2800 MHz with East-West resolution, analyzing shape of thermal and nonthermal source

18 p3195 A69-34427

Jovian radio sources intermittency, recording difficulties, longitudinal drift and theories concerning origin

18 p3196 A69-34690

Venus brightness temperature between 0.75 and 1.65 cm from radio emission measurements, taking into account water vapor in Venus atmosphere

18 p3197 A69-34723

RF synchrotron emission from electrons trapped in earth magnetic field observed by satellite, using magnetospheric environment model

18 p3128 A69-34948

Radio emission attributed to galactic nebula NGC 6857, suggesting origin in high density H II regions excited by OB star clusters

18 p3202 A69-35209

Radio emission from Sco XR-1 shown as synchrotron radiation of relativistic electrons in low density region surrounding denser core producing X ray

20 p3597 A69-37334

Cosmic radio emission absorption in D, E region and in F 2 layer above and below electron concentration maximum from vertical ionospheric sounding 1959 over Moscow

20 p3590 A69-37676

Elektron satellite recorded sporadic radio emission noting relationship to geomagnetic disturbances and dependence on satellite position

20 p3606 A69-37969

Induced Compton scattering of plasma and electromagnetic waves under astrophysical conditions, discussing HF radio emission spectra from cosmic objects and quasar

20 p3607 A69-38035

Radio emission measurements of moon at 3.2 cm by artificial moon method, calculating radio temperature and phase amplitudes

20 p3608 A69-38052

Upper limits for OH microwave emissions from radio sources F transitions, discussing pumping mechanism role in emission detection

21 p3796 A69-38477

Jupiter magnetospheric radio emissions, discussing magnetic field and plasma-magnetic interactions

21 p3812 A69-39517

Radio pulse emission from ionized disk of cosmic ray extensive air showers, noting importance of charge separation in geomagnetic field and selective positron absorption

21 p3792 A69-39614

RF high resolution observations of edge on spiral galaxy NGC 4631, noting radio halo and spur absence, nonthermal radio emission region, etc

22 p4022 A69-40463

Radio observations of elliptical and spiral noncluster galaxies, noting correlation between magnitude and radio emission in elliptical galaxies

22 p4025 A69-40639

Radio recombination line data from H II regions interpreted in terms of single electron temperature, considering non-LTE/local thermodynamic equilibrium/and clumping

22 p4025 A69-40645

Pulsar magnetic models, coherent radio emission mechanisms, radiation polarization, data summary and astrophysical nature

22 p4030 A69-40905

Cosmic radio emission anomalous absorption measurements during PCA following July, August, September 1966 proton flares

23 p4156 A69-41845

Crab Nebula pulsar radio properties, possible neutron star origin, interstellar gas and magnetic fields, etc

24 p4375 A69-42556

Pulsars relation with supernovae remains and radiation patterns and fluxes analysis, ascribing radio emission to relativistic plasma

24 p4383 A69-42985

Radio emission from diffuse thermal radio sources in northern Milky Way, giving contour maps

24 p4388 A69-43641

Venus and Jupiter brightness temperature and radio emission at 2.25 and 8 mm wavelengths observed with radio telescope

24 p4390 A69-43786

Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants

24 p4390 A69-43788

Electromagnetic wave buildup by induced Compton effect as possible radio emission source, considering data for quasars and pulsars

24 p4391 A69-43792

NT TRANSPONDERS

NT VERY HIGH FREQUENCY RADIO EQUIPMENT

NT WHISTLER RECORDERS

Soviet book on electronics and radio instruments of flight vehicles, covering radars and antennas, automatic pilots and design

09 p1463 A69-21930

Space and carrier frequency diversity determination for mutually interfering microwave radio equipments

11 p1835 A69-24952

Radio equipment for studying ionospheric inhomogeneities using space diversity reception, presenting vertical component of drift velocities of small scale inhomogeneities

14 p2453 A69-29876

Digital simulation for radio systems nonlinear elements, outlining procedures to obtain algorithms

15 p2582 A69-30111

Short and ultrashort waves signals amplitude and phase displacement determination device, stressing sensitivity

15 p2570 A69-31088

Solid state broadband RF power amplifier for airborne HF radio, eliminating total servosystem and all higher voltage components

17 p2942 A69-34114

Functional signal conversion operations in microelectronic radio equipment, examining components in analog and pulsed devices synthesis

18 p3109 A69-35162

Interference prediction models of equipment emissions and susceptibility thresholds based on limited spectrum signature data

23 p4126 A69-42223

Colocated radio equipment time-sharing scheme for interference avoidance, describing switching method and sampling signal shape

23 p4142 A69-42228

Heat pipe coupled to air cooled heat exchanger to cool high power airborne radio component by dissipating thermal load into ambient air [ASME PAPER 69-HT-16]

24 p4413 A69-43552

RADIO FILTERS

Optimal reception methods noise stability for AM radio signals based on nonlinear filtration of information parameters of signals received on noise background

01 p0030 A69-10589

Dynamic tracking filter analysis and capabilities as low threshold demodulator in frequency modulated frequency division multiplexing satellite system

01 p0034 A69-11140

Lossy transmission line filters and wideband impedance matching

03 p0406 A69-13906

Radar signal matched filters synthesis using linear digital filters and digital correlators noting role in radar detection

05 p0722 A69-16733

All-pass transfer functions of new class type for design of quadrature filter networks, using Chebyshev approximation

08 p1277 A69-21167

Optimal reception methods noise stability for AM radio signals based on nonlinear filtration of information parameters of signals received on noise background

10 p1653 A69-23104

Receiver filter nonoptimality effects on accuracy of nonenergetic signal parameter measurements

11 p1835 A69-24960

Filter circuits for stabilization of solid state microwave devices, noting input matching characteristics

11 p1849 A69-24961

 NT HIGH FREQUENCIES
 NT LOW FREQUENCIES
 NT LOW FREQUENCY BANDS
 NT MICROWAVE FREQUENCIES
 NT SUPERHIGH FREQUENCIES
 NT ULTRAHIGH FREQUENCIES
 NT VERY HIGH FREQUENCIES
 NT VERY LOW FREQUENCIES

Frequency diversity for communication in fading environment, relating performance variance to between channel correlation variance

01 p0026 A69-10177
 Pulsar CP 1133 pulse duration increase with decreasing RF from analysis of pulse shape data
 02 p0318 A69-12093

RF feedback amplifier analytical design, deriving open and closed loop feedback noise figure expressions by use of equivalent noise model

02 p0217 A69-12150
 Scaling laws for RF discharge experiments in ionized environments, considering proper limit variables for simulation of electron density

02 p0283 A69-12241
 Thermostructural analysis of large flexible paraboloid antenna indicates RF losses due to thermal distortions significant for X band and higher transmissions [AIAA PAPER 68-333]

02 p0345 A69-12372
 Josephson voltage-frequency relation independence of superconductor nature, noting c/h value and importance to voltage standards and quantum electrodynamics

02 p0299 A69-12599
 Sampled data delay-lock loop for synchronizing pulsed envelope RF signals, using digital circuitry

03 p0390 A69-13216
 Frequency-fluctuation correlation functions of radio wave field behind n random screens with random phase shifts calculated, obtaining statistical characteristics

07 p1076 A69-18525
 Integrated frequency selective amplifier design for radio frequencies based on feedback configuration with positive real zero in loop transmission function

07 p1104 A69-18886
 Single channel binary PSK communication systems performance influenced by degree of RF coherence between transmitter and receiver

07 p1082 A69-19109
 Energy density and transport velocity of RF wave in plasma in damped oscillations region, discussing resonance

08 p1365 A69-20553
 RF selection for interspacecraft or earth-spacecraft communication

09 p1449 A69-21270
 Propagation and noise effects on frequency choice for communication satellite service to aircraft and ships, noting tropospheric and ionospheric attenuation considerations

09 p1451 A69-21288
 Radio waves behavior along paths between satellites and earth, studying preferred frequency bands for spacecraft transmitters used as beacons

09 p1451 A69-21293
 Extraterrestrial cosmic emissions responsible for background noise of communications engineering, discussing factors affecting frequency sharing with other services

09 p1586 A69-21294
 RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Casiopeia A source

09 p1586 A69-21295
 Electrostatic thrusters using RF ion sources to optimize payload ratios, terminal velocities, propellants, life span and efficiencies

09 p1568 A69-21489
 RF voltage breakdown in air for 50 ohm coaxial transmission line configuration [JPL-TR-32-1379]

09 p1470 A69-22790
 Electron confinement in magnetic mirror geometry supplemented with RF quasi-potential barriers, considering gas scattering

11 p1924 A69-24306
 Extragalactic gamma ray fluxes predicted, discussing collisions, matter-antimatter annihilation and cosmological implications

11 p1946 A69-24466
 System switch, separating RF bands according to frequency and polarization for simultaneous transmission from parabolic horn antenna

11 p1854 A69-25618

High sensitivity LF and HF frequency deviation meter with resonant RC amplifiers for frequency discrimination and filtering

12 p2038 A69-26337
 DC to RF energy conversion in ungridded klystron gaps, calculating efficiency and optimum load conductance as function of gap dimensions

12 p2041 A69-26629
 RF synchrotron radiation emitted by electrons trapped in geomagnetic fields above auroral zones, discussing electron flux and cosmic background

12 p2151 A69-26949
 Stationary magnetic field effect on sum and difference frequency generation due to nonuniform RF electric fields applied externally to plasma

13 p2305 A69-27376
 Quasar red shifts distance dependence indicated by visually bright quasar faintness in radio range

13 p2344 A69-27635
 Excited hydrogen RF spectral lines from nebula NGC 6618, calculating frequency for transitions by Balmer formula

13 p2353 A69-28433
 X ray pulsations in Crab Nebula at frequency closely matching radio and optical pulsations, noting energy distribution

13 p2354 A69-28465
 HF emission spectra of radio pulses from cosmic ray showers confirming Dublin group observations

13 p2333 A69-28471
 Resonance cones in angular distribution of short antenna RF electric field in anisotropic plasma noting variation with incident, cyclotron and plasma frequency

15 p2659 A69-30876
 RF spectral lines due to OH molecule detected in interstellar space in absorption of RF radiation from Casiopeia A source

15 p2697 A69-31226
 Radio waves behavior along paths between satellites and earth, studying preferred frequency bands for spacecraft transmitters used as beacons

15 p2570 A69-31227
 Steady state density profile dependence on electron density dependence of net volume ionization rate by analyzing ambipolar diffusion in RF excited magnetized plasmas

16 p2818 A69-31672
 RF band multimode parametric pulsed oscillations in distributed system using one dimensional resonators

16 p2758 A69-31796
 RF spectral line detection from ortho hydrogen ions in Omega Nebula and NML Cygnus

16 p2864 A69-32571
 Computerized prediction of RF instrumentation system signal margins for missile flight tests based on trajectory and range balance equation

18 p3103 A69-35097
 Ionospheric auroral anomalous radio wave absorption frequency dependence index determined from cosmic radio emission intensity data

20 p3587 A69-37033
 F layer penetration frequencies predictions compared with Alouette topside data

20 p3530 A69-37871
 Langmuir probe immersed in plasma RF response over range of signal amplitude and frequency and plasma electron density, showing sheath capacitance role

21 p3723 A69-38939
 FM tactical radios frequency assignments rule, considering transmitter-receiver and interfering transmitter-receiver distances, equipment power, information transfer probabilities, etc

23 p4126 A69-42229

RADIO FREQUENCY DISCHARGE

Positive ion beam probe for approximate static electric field distribution in low pressure RF discharges, analyzing deflection data for potential distributions

02 p0287 A69-11838
 Metal atom production by bombarding metal with positive ions from microwave discharge, obtaining isolation in inert gas matrix and UV spectra

06 p0957 A69-17113
 RF ion thrusters using self sustaining electrodeless discharge [AIAA PAPER 69-285]

09 p1565 A69-21247
 Charge transport in high pressure RF glow discharge in air at atmospheric pressure based on model plasma

10 p1740 A69-23662
 RF ion thrusters using electrodeless self sustaining mercury discharge, describing basic theory, component design, performance optimization and test results

17 p3018 A69-33326

RF high pressure plasma discharges contained within radial inflow vortex, measuring radiation efficiencies, power densities and radiation fluxes [AIAA PAPER 69-695]

17 p3010 A69-33442
 RF plasmoid properties, discussing bounded plasma resonance theory, basic experiments, resonance sustained discharges, role of negative ions, etc

18 p3181 A69-35487
 Inductively coupled RF excited toroidal Ar ion laser, confining current discharge by strong axial magnetic field to reduce wall losses

19 p3338 A69-36690
 Volatile oxygen organic compounds subjected to RF electrodeless discharge, explaining product distribution in terms of reaction sequences

21 p3670 A69-39737
 High temperature equilibria from hydrocarbon plasma sources subjected to 3000 W RF electrodeless discharge

21 p3670 A69-39738
 Mechanism for pink afterglow accompanying microwave discharge in pure nitrogen, emphasizing gas kinetic temperature role

24 p4353 A69-43749

RADIO FREQUENCY HEATING

RF electron heating by beam-plasma interaction in uniform magnetic field

05 p0804 A69-16458
 Nonadiabatic and stochastic mechanisms for cyclotron resonance trapping and heating in magnetic mirror geometries

08 p1364 A69-20518
 Electron cyclotron resonance absorption of injected radiation magnetic mirror, noting effect of RF heating on plasma electron distribution

08 p1364 A69-20519
 Cutaneous receptor response to microwave irradiation, measuring warmth sensory effects in human forehead with radiometer [AGARDOGRAPH-111]

RADIO FREQUENCY IMPEDANCE PROBES

RF characteristics of electrodes immersed in magnetoplasma, discussing potential distribution around point charge and RF probe measurement of plasma parameters

01 p0029 A69-10550
 Permittivity measurements by measuring impedance on thin cylinders in rectangular waveguide or in cavity formed by coaxial transmission line

02 p0222 A69-12756
 RF impedance method for electron density and collision frequency in plasma

14 p2492 A69-29352
 Plasma conductivity measurements using RF induction probe

16 p2820 A69-31707
 RF impedance probe digital system for ionospheric measurements based on antenna resonance phenomena

20 p3542 A69-37791
 RF impedance probe used for ionospheric composition measurements, describing antenna operation in ion-electron cyclotron frequency range

RADIO FREQUENCY INTERFERENCE

NT ATMOSPHERICS
 NT BLACKOUT [PROPAGATION]
 NT CHIRP SIGNALS
 NT COSMIC NOISE
 NT DAWN CHORUS
 NT ELECTROMAGNETIC NOISE

 NT IONOSPHERIC CROSS MODULATION
 NT IONOSPHERIC NOISE
 NT IONOSPHERICS
 NT POLAR RADIO BLACKOUT
 NT SHOT NOISE
 NT SUDDEN ENHANCEMENT OF ATMOSPHERICS
 NT THERMAL NOISE
 NT WHISTLERS

Optimal AM radio reception in presence of fluctuating noise and one AM interference signal with random initial phase of carrier oscillation

01 p0031 A69-10782
 Mutual RF interference between satellite and terrestrial telecommunications microwave relay system at shared frequencies

03 p0392 A69-13242
 Intermodulation and cross modulation distortions in double balanced modulator

04 p0573 A69-14341
 Optimum antenna radiation patterns during suboptimum scattered Gaussian signal detection in

homogeneous interference level investigated with single channel antenna
05 p0736 A69-16782

Ground based radio telescope sensitivity to radio emission from earth atmosphere and galactic sources
07 p1099 A69-18515

Bit error probability for noncoherent binary FSK link involving Rician interfering signal
07 p1080 A69-19095

Anti-interference TV circuit using delay lines applied to radar systems, discussing false alarm probability and detection probabilities
08 p1271 A69-19919

Coordination distances and interference probabilities to control interference in frequency sharing between communication satellite systems and terrestrial radio services
09 p1450 A69-21280

Safety requirements of test ranges, considering RF hazards to electroexplosive devices
10 p1751 A69-23019

Optimal AM radio reception in presence of fluctuating noise and one AM interference signal with random initial phase of carrier oscillation
10 p1653 A69-23111

Space and carrier frequency diversity determination for mutually interfering microwave radio equipments
11 p1835 A69-24952

Carrier to interference ratio /CIR/ between desired path and every other path within predetermined range in microwave system calculated by computer
11 p1840 A69-25312

Optimal direction finding systems based on bearing angle representation in multidimensional Markov process, considering white and interference noise
13 p2219 A69-27254

Jamming susceptibility, noting corrections for multiple noise sources and sidelobe level for antenna pattern
14 p2414 A69-29501

Three channel microwave FM phase meter for studying plasma electron concentrations directional distribution without interferences between channels
14 p2497 A69-29799

TR tubes spurious harmonic power generation investigated for intersystem interference reduction and testing criteria, discussing effects of incident power, gas pressure and tube geometry
15 p2573 A69-30032

Moving target selector radars subsystems amplitude and phase instability effects on interference signal suppression
15 p2576 A69-30339

Signal reflection elimination from underlying surface during aircraft flights by using two antenna array with identical radiation patterns
15 p2567 A69-30345

Mathematical model for aircraft antenna to antenna electromagnetic interference analysis, emphasizing techniques for propagation paths and shading factors
17 p2943 A69-34134

Terrestrial radio noise source aspects including atmospheric, propagation influence, lightning-generated noise and whistlers, radio interference, etc
19 p3276 A69-36434

Receiving circuit for AM signal envelope separation in presence of AM interference and fluctuation noise, using converter cascades to effect input signal frequency spectrum symmetry
19 p3277 A69-36568

Propagation effects on lane ambiguity resolution ability of Omega VLF navigational system, noting waveguide mode interference
21 p3673 A69-38756

RFI effects of earth based emitters on operation of geosynchronous satellites for data relay from near earth orbiting satellites, noting frequency assignments
23 p4120 A69-41757

Natural and man-made radio noise measurements, including formula for calculating signal strength of coherent interference
23 p4126 A69-42217

Q multiplier UHF device as preselection filter for closely spaced channel signals, discussing channel interference reduction
23 p4141 A69-42220

Radiated interference and susceptibility prediction for unshielded wires in near field of vertical rod antenna
23 p4141 A69-42225

Colocated radio equipment time-sharing scheme for interference avoidance, describing switching method and sampling signal shape
23 p4142 A69-42228

Adaptive signal processing interference rejection technique for suppression of cochannel AM interference in congested VHF tracking receiver
23 p4128 A69-42503

RADIO FREQUENCY NOISE
U ELECTROMAGNETIC NOISE

RADIO FREQUENCY SHIELDING
Ferromagnetic composite materials for microwave absorption and shielding over frequency band 0.3 to 10.0 GHz
09 p1510 A69-22352

Near field effects on accuracy of LF shielded enclosure measurements compared to open field environment
23 p4141 A69-42226

RADIO GALAXIES
Radio galaxies radio luminosity function expressed by means of power dependence, assuming three absolute visual magnitudes for each galaxy
02 p0325 A69-12563

Absorption and emission redshift distribution in quasars, N systems and similar compact and radio galaxies
02 p0325 A69-12591

Plasmas in galaxies, spiral structures and radio galaxies, discussing quasar line and continuum spectra
02 p0329 A69-12790

Radio galaxies and quasars, discussing radio structure, observation methods, polarization, time variation, etc
02 p0329 A69-12791

Energy sources and properties of quasars and radio galaxies by X ray astronomy
02 p0310 A69-12793

Plasma model of quasars and radio galaxies for observations of high energy radiation
02 p0329 A69-12794

Radio galaxies and quasars X ray emissions, calculating radiation fluxes produced by scattering of synchrotron radiation quanta at relativistic electrons
03 p0500 A69-13079

Radio spectra differences of quasars and radio galaxies, noting influence of frequency levels
04 p0652 A69-14418

Radio emission spectra of radio galaxies from 3CR catalog
04 p0661 A69-15234

Radio observations of radio galaxies and quasars, noting double structure of many sources, some complex structures and association with optical objects
05 p0820 A69-15836

Optical observations of radio galaxies and quasars, noting evidence for galactic explosions, surface distribution, physical properties, radio quiet quasars, etc
05 p0820 A69-15837

Theoretical models explaining observed properties of radio galaxies and quasars, discussing quasar distance
05 p0821 A69-15851

Quasar and radio galaxy evolution, discussing energy release rate and particle acceleration effects on radio and optical emissions
05 p0822 A69-15852

Radio spectra analyzed for NGC 1052 and NGC 4278 elliptical galaxies, discussing 178 MHz flux density, anomalies and radiation absorption mechanisms
06 p1009 A69-17959

Red shifts and intrinsic powers of radio galaxies and quasars, discussing local luminosity distribution, function of sources and cosmology
07 p1206 A69-19270

Radio galaxies, quasars and radio stars between declinations plus 20 and plus 27 degrees, obtaining accurate positions and optical identifications
07 p1218 A69-19273

Cosmological models with antipole, determining models consistent with spatial distribution of quasars and radio galaxies
07 p1219 A69-19284

M82 galaxy as Seyfert-like galaxy seen edge-on, using radio and optical data showing H alpha emission collisionally excited, discussing circular polarization
08 p1383 A69-20051

H alpha emission line in nucleus of Virgo A radio galaxy observed on spectrograph, estimating gas electron density and mass
09 p1588 A69-21360

Quasi-stellar radio sources /QSS/ and radio galaxies structure and evolution, discussing nucleus nonuniform model
09 p1592 A69-21500

Theoretical models describing quasi-stellar objects and radio galaxies, noting objects locality, semilocality and cosmological distances
09 p1594 A69-21693

Neutral atomic H content of small angular diameter galaxies, noting systematic radial velocities and total mass of galaxies
10 p1773 A69-22956

Quasar and radio galaxy spectra obtained on Cassegrainian focusing diffraction spectroscopy
11 p1951 A69-24236

Radio emission from 18 galaxies noting accompaniment of optical spectrum emission and enhancement due to production of relativistic electrons in active nuclei
12 p2164 A69-27026

Radio galaxies luminosities distribution and spectral indices, galactic structures and diameters, considering relations between radio emission parameters
12 p2165 A69-27031

Radio galaxy identification and luminosity measurement, noting limitations of red shift observation methods
12 p2165 A69-27032

Statistical data on space density of bright elliptical galaxies, radio galaxies, quasars, noting relation between space density and age
12 p2165 A69-27033

Polarization and structure of magnetic fields of quasars, E galaxies, normal galaxies and other extragalactic radio sources
12 p2165 A69-27034

Absolute radio luminosity relation to surface brightness of extragalactic radio sources, finding volume radiation coefficient of spiral and radio galaxies
12 p2166 A69-27035

Galactic and quasar radio sources distribution, discussing spectral indices
12 p2166 A69-27036

X ray emission from radio galaxies as possible bremsstrahlung radiation of hot gas, noting Crab Nebula
12 p2166 A69-27037

Radio sources angular dimensions determined by microwave interferometry, discussing distinctions between quasars, galaxies and unidentified sources
12 p2166 A69-27039

Frequency spectra of radio galaxies, supernova remnants and quasars observed by radio telescope operating in decimeter wave range
12 p2167 A69-27041

Spectrum analysis of radio galaxy M82 nucleus, noting H alpha emission lines from analysis of IR photograph
13 p2335 A69-27310

Galactic H II regions of high surface brightness in radio continuum surveyed at 1.95 cm wavelength with high resolution and positional accuracy
13 p2339 A69-27568

IR extragalactic radio sources including normal radio galaxies, quasars and Seyfert galaxies
13 p2342 A69-27597

Extragalactic radio sources parameters analyzed for distinguishing quasars from dominant luminous radio galaxies by radio spectra
13 p2348 A69-27801

Extragalactic radio sources, observing nonlinear LF spectra for quasars and linear LF spectra for radio galaxies
13 p2351 A69-27867

Radio emitting clouds properties as function of distance to parent galaxy nucleus
13 p2352 A69-27874

Radio galaxies and quasars X ray emissions, calculating radiation fluxes produced by scattering of synchrotron radiation quanta at relativistic electrons
14 p2509 A69-28761

Galactic OH emission sources time variations found in W49 and W75
14 p2517 A69-29085

Photoelectric observations of NGC 1275, noting increase in nucleus brightness
14 p2517 A69-29086

Polarization characteristics of quasars, radio galaxies and galactic objects suggesting separate evolutionary processes
14 p2526 A69-29771

Seyfert galaxy NGC 4151 electrophotometric investigation in UVB, confirming nucleus optical variability observed in visible and IR
15 p2686 A69-30536

Radial brightness and color variation curves for Seyfert galaxies plotted from measurements with concentric diaphragm in UVB
15 p2686 A69-30537

Radio galaxy Messier 87 mass determined using virial theorem for nucleus velocity dispersion
15 p2695 A69-30883

UBV photometry of southern quasars, radio galaxies and normal galaxies including two color diagrams, radio luminosity, brightness and color distribution
16 p2859 A69-32228

H alpha emission line in nucleus of Virgo A radio galaxy observed on spectrograph, estimating gas electron density and mass
18 p3197 A69-34750

Electron ejections from nuclei of radio galaxies and quasars explained on basis of plasma stability, discussing role of relativistic electrons and resulting unstable pinch
20 p3606 A69-38032

Photoionization model of Seyfert galaxy extended to calculate temperatures, luminosities and sizes of zones emitting forbidden Fe X /6374 Å/ and Fe XIV /5303 Å/
22 p4024 A69-40581

Emission lines in optical spectra of radio galaxy nuclei, considering time dependent energy release nature
22 p4034 A69-41174

Radio galaxies and quasars number-flux density relations role in cosmology, discussing object identification, population, angular sizes, etc
23 p4218 A69-42324

Radio galaxies differences from quasi-stellar objects indicating relativistic particles generation from violent explosions releasing energy comparable with powerful supernova
24 p4378 A69-42697

Explosions mechanism in radio galaxies and quasars mechanism based on observed phenomena, emphasizing galactic flares
24 p4378 A69-42698

RADIO HORIZONS

Transhorizon UHF energy transmission via tropospheric scatter, using propagation path model
02 p0209 A69-13250

Wavelength dependence of microwave propagation beyond radio horizon
03 p0395 A69-13626

Horizon focusing gain for radio waves reflected obliquely from ionosphere, noting effects of transmitter location and ionosphere geometry
03 p0395 A69-13627

VHF radio transmission beyond horizon, discussing instrumentation, annual and diurnal signal fluctuations and diffraction role in signal propagation
08 p1274 A69-20112

Received electromagnetic fields fluctuations due to transhorizon propagation, emphasizing fading, tropospheric turbulence correlation and rapid fluctuations due to small scale index variations
20 p3494 A69-37810

RADIO INTERFEROMETERS

Digital matched filtering technique for RF interferometer filtering carrier modulated by pseudonoise sequence, discussing applications to antenna arrays
01 p0048 A69-11003

Doppler effect in centimeter wave range demonstrated by radio interferometer, noting amplitude difference between reference wave and wave reflected from moving reflector
03 p0393 A69-13333

Interferometer at lambda 21 cm using fully steerable paraboloids for processing output signal with on-line digital computer
03 p0411 A69-13468

Signal matching in radio interferometer with autonomous receiver, magnetic tape recorders and memory electron beam tube with target
03 p0431 A69-13706

Space-frequency equivalence between monochromatic correlator interferometer using directional antennas and wideband correlator interferometer using isotropic antennas
07 p1132 A69-18917

Radio interferometer antenna array spatial characteristics obtained as function of geographical coordinates of site for reducing observation errors
08 p1314 A69-20434

Dimensions, temperature and electron density of quiet solar corona from radio interferometer measurements, noting activity and temperature at solar maximum and minimum
08 p1393 A69-20573

Synoptic radio interferometer observations of July 1966 solar proton flare at microwave frequencies, correlating observed radio source with proton event
10 p1783 A69-23734

Quasi-stellar radio sources interferometric observations at 2695 MHz, determining centroid of radio emission
10 p1790 A69-24138

Solar radio bursts observations with multielement compound interferometers, noting polarization distribution and magnetic field change
11 p1946 A69-24428

Refraction error in measurements with simple and radar interferometers, considering atmospheric effect
13 p2221 A69-27961

Global multielement radio interferometer with autonomous reception synthesized for studying spatial radio brightness distribution over radiation sources
15 p2578 A69-30936

Radio interferometer with independent heterodynes to obtain radio brightness distribution over source by varying antenna spacing and reception frequency
15 p2578 A69-30937

Discrete radio sources interferometer observations using transPacific baseline, noting spectra and radiation intensity variations
15 p2701 A69-31530

Accurate optical position of quasars determined by plate overlap for radio interferometer calibration
16 p2859 A69-32229

Multielement compound high resolution quick scan interferometer for rapidly changing solar burst observations at 3.75 GHz
18 p3118 A69-34968

Active interferometer controlled telemetry tracking system for missile range, discussing automatic target acquisition, dish feed, costs and optimized data-channel antenna patterns
19 p3271 A69-36253

Quasi-optimal synthesis for reception indicator used in radio interferometers for measuring signal amplitudes in presence of normal noise
20 p3504 A69-37009

Radio interferometry for suppressing background variance between microwave radiometer antenna and random terrestrial background
20 p3506 A69-37712

HF direction finder for display of time varying multimode propagation phenomena, using analog computer and phase sensitive interferometer
21 p3677 A69-39456

Tethered orbiting interferometer configurations for future Radio Astronomy Explorer satellites, discussing gravitational stabilization and delta launching into orbit as single payload
24 p4313 A69-42859

Ionized meteor trails reflection zone altitudes determination by interferometric measurements of phase differences
24 p4311 A69-43508

RADIO METEOROLOGY

Radio telescope measurements of total vertical atmospheric absorption to determine effective mean free path of oxygen and water vapor for absorption
02 p0206 A69-11450

Quantitative estimations of cloud and precipitation by radar meteorology, assuming homogeneous reflectivity distribution of clouds
04 p0626 A69-14507

Microwave radiometer for measuring mesosphere and stratosphere temperature as function of altitude using atmospheric oxygen line
06 p0924 A69-17247

Remote sensing of lower atmosphere refractive structure, using Rake tropospheric scatter channel-sounding technique
14 p2448 A69-29525

Qualitative analysis of CAT parameters from radio sounding data, noting mean bumpiness probability dependence on Richardson number and wind vector shift
14 p2474 A69-29735

RADIO METEORS

Mass distributions of meteoroids obtained from underdense radio meteor echoes
03 p0518 A69-14254

Radio meteor ionization profiles, discussing electron line density measurements by backscatter system
19 p3283 A69-35992

Meteor radio electronics principles, methods and equipment, discussing ionized meteor trail formation, radar tracking and utilization of trails for communications
19 p3277 A69-36591

Lower ionosphere atmospheric density, temperature and pressure profiles diurnal variations from data of radio meteor echoes
24 p4311 A69-43504

RADIO NAVIGATION

NT DECCA NAVIGATION
NT HYPERBOLIC NAVIGATION

NT LORAN

NT LORAN C

NT TACAN

NT VHF OMNIRANGE NAVIGATION

OMEGA radio navigation system optimization, emphasizing implementation of phase modulation to ensure lane identification
03 p0463 A69-13212

Air traffic development related to control systems advances, discussing telecommunications effect and radio navigation systems enabling pilot to determine position
08 p1347 A69-20598

Radio location system based on measuring distance between object and two stationary satellites, noting application to air traffic over North Atlantic
09 p1537 A69-21269

Satellite-borne terrestrial radiodetermination systems, noting VLF transmissions usage to overcome coverage problem
09 p1537 A69-21287

Soviet book on radio navigation of flight vehicles covering systems classification, operational characteristics, satellite navigation, etc
12 p2129 A69-27076

Deep space network system for radio navigation of Mariner mission in 1969, discussing objectives, spacecraft, tracking and data system, mission accuracy, etc
16 p2749 A69-31725

Radio navigation principles, radio waves propagation characteristics and factors affecting navigation systems choice
18 p3169 A69-34848

Pictorial display area navigation system for air traffic control in terms of cockpit utilization, interface with ground navigation aids, parallel multiple routes, etc [AIAA PAPER 69-798]
19 p3367 A69-35632

Surface and aerospace navigation by VLF radio network, discussing Omega transmitting station location, operational modes and daytime-nighttime accuracies [AAS PAPER 69-405]
24 p4347 A69-42834

RADIO OBSERVATION

Observation of satellites, orbit calculation and use in upper atmosphere research [UN PAPER 68-95789]
01 p0064 A69-10459

Sporadic E microstructure and vertical motion, describing radio sounding system to observe ionospheric 3d structure and motions from ground
01 p0071 A69-11164

Radio telescope for Owens Valley Radio Observatory, noting interferometer array of steerable antennas and signal wavelength influence on telescope reflector accuracy
02 p0229 A69-11974

Wind measurements by radio observation of meteor trails compared with fading drift results
02 p0275 A69-12042

Radio occultation measurements of Venus and Mars atmospheres using Mariner spacecraft
02 p0320 A69-12115

Radio amplitude and phase measurements during Mariner-Mars encounter, providing evidence for Martian atmospheric models
02 p0320 A69-12116

Venus atmospheric structure from surface to 20,000 km radial distance from Mariner 5 radio experiments, noting large mass-2 hydrogen component in upper atmosphere
02 p0330 A69-12802

Intense discrete radio sources observation by antenna array with fan beam, determining right ascension and east-west structure
04 p0663 A69-15379

Radio observations of radio galaxies and quasars, noting double structure of many sources, some complex structures and association with optical objects
05 p0820 A69-15836

Polar cap event detected at low latitudes by effect on VLF propagation, noting VLF technique sensitivity to low proton fluxes
05 p0816 A69-16276

Auroral absorption position and height deduced from VLF phase measurements, discussing diurnal fluctuations in reflection layer
05 p0758 A69-16415

Galactic H 2 regions radio observation using Cassegrain antenna and Dicke radiometer
06 p1008 A69-17696

Radio occultation measurements of planetary atmospheres and ionospheres from orbiting pair [AIAA PAPER 69-53]
06 p1011 A69-18104

Radio aurora rate of occurrence from VHF bistatic radio system observations in eastern Canada
07 p1124 A69-18824

Radio interferometer antenna array spatial characteristics obtained as function of geographical coordinates of site for reducing observation errors
08 p1314 A69-20434

Radio wavelength range observations of NO molecule lines in interstellar space
09 p1590 A69-21377

Bright emission nebula components and electron temperature determined by radio telescope observation
10 p1778 A69-23603

VLF observations of July 7 1966 solar flare and PCA event
10 p1657 A69-23772

Radio astronomical observations of Venus at atmosphere interpreted noting agreement with model based on Venera 4 data
10 p1791 A69-24202

Flux densities and spectral indices of radio sources in 3C and 3 CR catalogs, noting measurements at 86 MHz frequency
11 p1951 A69-24237

LF observations of complex galactic radio source W51, discussing structure and radio spectra of resolved components
12 p2153 A69-25807

Radio observations of planetary nebulae IC 418 and NGC 7027 at 9.5 mm indicating radio spectra thermal character, discussing electron temperature and density
13 p2343 A69-27625

21 cm line emission surveyed for spatial distribution of random velocities of neutral hydrogen in solar neighborhood
14 p2520 A69-29371

Radio pulse sounding of ionospheric structure and motions, discussing digital ionosonde, data analysis methods, etc
14 p2415 A69-29519

Radio equipment for studying ionospheric inhomogeneities using space diversity reception, presenting vertical component of drift velocities of small scale inhomogeneities
14 p2453 A69-29876

Reflecting or reradiating obstacle proximity as cause of siting errors in azimuth radio measurements, discussing omnidirectional obstacles effect
15 p2651 A69-31090

Mercury, Venus, Mars, earth and lunar mass determinations by radio tracking and planetary radar systems
15 p2697 A69-31305

Preprotostar radio observations suggesting nonthermal radio sources formation with magnetic energy dissipated in particles acceleration
15 p2701 A69-31531

Radio observation of 20 May 1966 solar eclipse at 9470 and 3300 MHz, discussing brightness distribution of S component sources
17 p3030 A69-33057

Soviet collection of papers on radio engineering covering ionospheric signal scattering, E layer structure, meteor trail observation, antenna arrays, etc
17 p2938 A69-33893

Kinesonde radio sounding system for three dimensional ground observations of E region microstructure and vertical motion of neutral air and ions
18 p3125 A69-34250

Space station observations of stars, galaxies and quasars, stressing electromagnetic spectrum role in astronomy
18 p3194 A69-34370

Radio wavelength range observations of NO molecule lines in interstellar space
18 p3198 A69-34765

Radiometric measurement of lunar areas during eclipse of 18 October 1967 at mm wavelengths, considering temperature changes and cooling rates
20 p3613 A69-38247

Earth atmospheric density measurement by microwave radio occultation techniques, transmitting coherent radio signal to repeater spacecraft from master station
21 p3705 A69-38375

Venus atmosphere structure determined from Mariner 5 flyby S band radio occultation measurements of ionosphere and atmosphere at illuminated and dark sides
21 p3794 A69-38380

Solar observations at 21 and 43 cm during solar minimum by grating cross and total power radiometer, giving radio map of solar emission
22 p4001 A69-39988

Radio observations of supernova remnant HB 21 at 2695 MHz, noting spectral brightness and curvature of northern shell segment
22 p4014 A69-40129

RADIO PHYSICS

S-band radio occultation for probing atmospheres of Mars and Venus
[AAS PAPER 68-185] 02 p0311 A69-11470

Jupiter radio physics, discussing prebiological phase, low IR and microwave radio temperature and magnetic field
02 p0330 A69-12805

Collection of Soviet papers on radio engineering
06 p0889 A69-17796

Statistical characteristics of transverse shifts of ray directions in turbulent atmosphere for arbitrary wave parameter values
10 p1657 A69-23942

Accuracy and variance of nonergodicity estimates for random processes associated with radiophysical applications
15 p2582 A69-30946

Radio science - Conference, Ottawa, August 1969
19 p3276 A69-36425

RADIO PROBING

High gain-temperature ratios aerials design by radio modeling techniques for horn and planar antennas, prime feed parabolooids and Cassegrain systems
08 p1279 A69-19961

Radiophase mapping utilizing VLF radio signals to detect conductive sheets and surface impedance of earth
12 p2075 A69-26982

Radio measurements of nonionized media and planetary atmospheres, discussing uses of millimeter waves, line of sight propagation, scattering, etc
19 p3276 A69-36427

Radio FM pulse compression for vertical ionosphere sounding
21 p3674 A69-39082

RADIO RANGE

Compatibility requirements and considerations of range telemetry tape crossplay operations, discussing major classes
07 p1133 A69-19117

Secor data reduction to correct tropospheric refractive effects of radio ranging on earth satellites using tropospheric model
18 p3104 A69-35200

RADIO RECEIVERS

NT SUPERHETERODYNE RECEIVERS
NT TRANSMITTER RECEIVERS
NT WHISTLER RECORDERS

Injection locked oscillator FM receiver consisting of linear mixer and negative resistance oscillator in phase locked configuration, solving receiver output differential equation
01 p0042 A69-10247

Wideband electronically scanned receiver, using varactor diode upper sideband parametric frequency upconverter for frequency mixing
01 p0048 A69-11036

Low noise front end wideband amplifier for 100-150 MHz broadband receivers, using distributed amplifier techniques
02 p0216 A69-12028

Low noise microwave amplifiers for radio astronomy and satellite communications receiving system preamplification
03 p0402 A69-13017

Optimum receiver structure for estimating PSK information signal phase derived together with matched filter detector performance
03 p0403 A69-13203

Sensitivity of radio receiver detecting weak sinusoidal and noise signals by counting zero crossings by envelope or phase of signal sum
03 p0405 A69-13717

Electrically small beamed receiving arrays in HF band and random noise
03 p0398 A69-13904

AN/TSC-54 military satellite communications terminal for contingency deployment, discussing design, system tradeoffs and performance
[AIAA PAPER 68-439] 04 p0579 A69-15367

Low noise room temperature satellite broadcast receiver for UHF, using room temperature parametric amplifiers
05 p0728 A69-15672

Transistorized receiver for satellite telecommunications having adjustable receiver center frequency within 20 MHz
05 p0734 A69-16594

Optimal radio signal receiver analyzing output signal properties
06 p0888 A69-17464

Finite IF filter bandwidth degradation of SNR of receiver for biphase modulated signals using integrate and dump filter
08 p1270 A69-19851

Phase error and amplitude and phase modulation in aircraft VOR omni receiver in vicinity of reflecting objects, noting asymmetrical filter effect
08 p1271 A69-19863

Error in receiver sensitivity calculation using approximate equation for noise power at input
08 p1275 A69-20226

Airborne ILS marker beacon receivers and secondary surveillance radar transponder using microelectronic equipment, noting thermal dissipation problems [AGARDOGRAPH-114] 08 p1292 A69-20991

Interference noise in communication satellite receivers and terrestrial radio relay receivers, noting interference reduction transfer factor
09 p1450 A69-21279

Low noise wideband amplifier system for commercial satellite communication ground terminal receiver, noting cryogenically cooled parametric amplifier
09 p1458 A69-22470

Microwave amplifiers and receivers noise performance factors measurement noting thermal noise, definitions of noise temperatures and noise figure, noise generators, etc
11 p1840 A69-25301

Multimode tracking/SYMMTRAC I and II feeds for low noise antennas, noting feed performance
11 p1852 A69-25317

Microwave radiometric sensor operational principles and capabilities, discussing antennas and radiometric receivers
12 p2033 A69-26976

Noise stability of FM receiver with automatic control of IF amplifier resonance frequency in presence of weak noise
15 p2564 A69-30144

German ground station commercial receiving system for satellite broadcast reception
16 p2766 A69-31855

Selective amplifier for recording time signals on Time Recorder 2 and measuring time lag caused by Philips 8RO 501 radio receiver
16 p2790 A69-32217

Rocket-borne AM radio receiver for Faraday rotation experiments to measure lower ionosphere electron density, giving circuit diagrams
17 p2936 A69-33062

Single radio pulse reception time relations by panoramic receiver, considering short wideband and long narrowband pulses
17 p2931 A69-33910

Airborne communication receiver solid state interference blanker circuitry comprising black box insertable between antenna and RF input
17 p2943 A69-34132

Optimal radio signal receiver analyzing output signal properties
20 p3496 A69-37947

Spark gap protection of input transistors in radio receivers against antenna-collected static charge damage
21 p3681 A69-38395

S band phased array receiver developed to track automatically moving telemetry transmitter by electronic beam steering
23 p4120 A69-41751

HF receiver interference blanker, discussing limiter-blanker system, integration, effectiveness and squelch circuit
23 p4141 A69-42221

Receivers EMC, discussing single parameter to evaluate susceptibility to desensitization, cross modulation and intermodulation
23 p4142 A69-42232

RADIO RECEPTION

Optimal AM radio reception in presence of fluctuating noise and one AM interference signal with random initial phase of carrier oscillation
01 p0031 A69-10782

Constant beamwidth antenna consisting of parabolic reflector and ridge loaded horn, noting conical scan tracking antenna application
02 p0218 A69-12325

Ultra cone system for ultralow noise reception of RF space communication from Mariner 5 during occultation by Venus
[JPL-TR-32-1340] 02 p0220 A69-12429

Earth effect on signal correlation in space diversity microwave reception antennas, analyzing vertical separation and out of phase signals
05 p0720 A69-16530

Signal strength variations for balloon-borne VHF FM transmitter due to wave interference, noting application to balloon range estimation
06 p0886 A69-16925

Coherent FSK LF/VLF radio communication modem with large predetection bandwidth for improvement of reception in atmospheric noise
09 p1458 A69-22473

Optimal AM radio reception in presence of fluctuating noise and one AM interference signal with random initial phase of carrier oscillation
10 p1653 A69-23111

Multiple beam HF receiving antenna system for directivity, azimuthal coverage and noise limitation
13 p2228 A69-27631

Earth effect on signal correlation in space diversity microwave reception antennas, analyzing vertical separation and out of phase signals
16 p2753 A69-32472

Received electromagnetic fields fluctuations due to transhorizon propagation, emphasizing fading- tropospheric turbulence correlation and rapid fluctuations due to small scale index variations
20 p3494 A69-37810

RADIO RELAY SYSTEMS

Microwave frequency multipliers for radio relay systems based on VHF transistors and varactor diodes
02 p0216 A69-12097

Mutual RF interference between satellite and terrestrial telecommunications microwave relay system at shared frequencies
03 p0392 A69-13242

Soviet book on multichannel and TV signals transmission over radio relay links using microwave tropospheric scatter propagation
04 p0558 A69-14919

Broadband LC filters having prescribed amplitude response and constant group delay, emphasizing IF filters for radio relays
05 p0732 A69-16343

Measurement methods at IF and baseband sections of microwave links, calculating noise superimposed on each swept measurement curve
05 p0722 A69-16728

Carrier energy dispersal in communication satellite telephony and TV systems, noting attendant RF bandwidth increase as function of distortion
09 p1450 A69-21277

Interference noise in communication satellite receivers and terrestrial radio relay receivers, noting interference reduction transfer factor
09 p1450 A69-21279

Multipath fading reduction on line of sight microwave radio relay links by dual space diversity, noting effects of vertical antenna separation, frequency, etc
[IEEE PAPER 68-TP-350-COM]
10 p1656 A69-23535

Echo 1 aluminized plastic balloon satellite, discussing radio linkup by reflections, use in geodesy and atmospheric and radiation pressure effects on lifetime
10 p1792 A69-23804

Carrier to interference ratio /CIR/ between desired path and every other path within predetermined range in microwave system calculated by computer
11 p1840 A69-25312

Mean-minute thermal noise intensity distribution in telephony channels of tropospheric radio relay systems
14 p2412 A69-29425

Long distance FM radar signal relaying to central station image processing, showing wideband sum signal especially suitable for transmission
16 p2750 A69-31862

Radio relay FM channel data transmission, evaluating cumulative thermal noise due to IF amplification at each station
21 p3672 A69-38653

RADIO SCATTERING

Raindrop size distribution law effect on radio wave attenuation coefficient and differential effective backscattering cross section of rain
02 p0208 A69-12259

Very thin short metallic filament scattering and absorption cross sections for various values of filament conductivity
03 p0395 A69-13623

Induced and combination scattering of high HF radio waves in ionosphere and magnetosphere
07 p1076 A69-18521

Lunar scattering of meter radio waves emitted by Luna 11 and 12 satellites, relating glide angle scattering coefficients to satellite altitude
07 p1087 A69-19615

Quantitative radar determinations of radio wave scattering cross section of lunar surface layer
07 p1087 A69-19621

Inverse Compton effect and universal black body radiation from less energetic radio photons of galactic and metagalactic origin
08 p1381 A69-19786

Radio signal spectrum scattered at oscillating interface calculated in Kirchhoff approximation, determining scattering factors
08 p1275 A69-20432

Duty cycle increase on meteor forward scatter radio communication paths by use of wide-beam transmitting antenna along great circle
08 p1394 A69-20609

Radio ray scattering resulting from traversing anisotropically turbulent solar corona, noting refraction effect on signal pulse arrival time
10 p1773 A69-22960

Ionospheric measurements of electron density, electron and ion temperature profiles from strength of incoherent radio wave scattering
10 p1686 A69-23910

Surface radio wave scattering propagating along rough surfaces, measuring emission during transformation into space waves
10 p1658 A69-23952

Antenna suspension height variation effects on HF signals in ionospheric scattering lines
12 p2032 A69-26705

Radio wave scattering characteristics of lunar surface in 3 cm wavelength by Luna 8 and Luna 9 automatic stations and Surveyor spacecraft
15 p2571 A69-31359

Spectrum and cross section of radio wave scattering in two temperature plasma, relating differential backscattering cross section to ionospheric electron density fluctuations
17 p2930 A69-33895

Radio wave diffraction by inhomogeneities arising from ionized gas clouds in interstellar medium
19 p3428 A69-36882

RADIO SIGNAL ABSORPTION

U ELECTROMAGNETIC ABSORPTION

RADIO SIGNALS

Faraday angle of rotation of radio signals polarization plane from satellites and celestial bodies
01 p0030 A69-10574

Optimal reception methods noise stability for AM radio signals based on nonlinear filtration of information parameters of signals received on noise background
01 p0030 A69-10589

Amplitude scintillations of satellite radio signals during sunrise due to ionospheric turbulence induced electron content variations
01 p0067 A69-10980

Radar FM signal design with zigzag frequency variation, discussing relation between waveform characteristics and associated ambiguity function features
01 p0033 A69-11001

Amplification process for VLF whistler mode radio signals observed in study of magnetosphere frequency shifting mechanism
01 p0077 A69-11241

Ionospheric electron density determined from Faraday effect, using ATS-3 radio signals
02 p0237 A69-11660

Radio signals from hydroxyl radicals by maser action in early stars, noting emission magnitude and intensity spectrum dissimilarity at different frequencies
02 p0324 A69-12493

Correlation coefficient between frequency diversified signals amplitudes estimated by approximation for two beam short wave radio channels
04 p0560 A69-15401

Resonant amplifier response having stages identical to radio pulse with exponential envelope
05 p0720 A69-16444

Low power RF signal triggering of self sustaining Gunn oscillations in GaAs samples
05 p0734 A69-16575

Signal strength variations for balloon-borne VHF FM transmitter due to wave interference, noting application to balloon range estimation
06 p0886 A69-16925

VLF radio wave phase time or motion variation emanating from ground based source at arbitrary point on earth
07 p1123 A69-18816

Errors estimation in determination of radio signal source flux density, position and recorded half power widths
07 p1088 A69-19722

VHF radio transmission beyond horizon, discussing instrumentation, annual and diurnal signal fluctuations and diffraction role in signal propagation
08 p1274 A69-20112

Wavefront Wilkins-Minnis, null selection and elevation scanning techniques for measuring radio signals elevation angles with vertical antenna arrays
08 p1275 A69-20293

Radio signal from magnetron transmitter, noting slow amplitude phase fluctuations distribution according to log-normal law
08 p1275 A69-20424

Radio signal reflection from objects of complex configurations by statistical model
09 p1460 A69-22662

Optimal reception methods noise stability for AM radio signals based on nonlinear filtration of information parameters of signals received on noise background
10 p1653 A69-23104

Stellar occultations by moon observed with ear and eye method, not taking into account corrections to radio time signals
10 p1776 A69-23205

Combination backscattering on ionic sound waves assumed responsible for unexpected features of radio signals reflected from sun
10 p1776 A69-23219

Radio signals and concentrated noise amplitudes probability distributions reflected from ionosphere and scattered in troposphere calculated for Rayleigh and log-normal fading
11 p1833 A69-24440

Radio signal carrier frequency and arrival time measurements, deriving expressions for phase amplitude distortions effects
11 p1835 A69-24959

Ionospheric electron density determined from Faraday effect, using ATS-3 radio signals
13 p2256 A69-28691

Radio signal amplitude changes from Explorer 22 beacon satellite attributed to wave diffraction by tropospheric structures
14 p2411 A69-29107

Radio signals F region scattering related to electron density fluctuations in ionosphere
14 p2444 A69-29870

Reference oscillator frequency instability effect on radio signals phase shift in ionosphere measurements, evaluating errors
14 p2444 A69-29873

Recording installation of ionospheric reflected radio signal fluctuations and amplitudes of resulting signals simultaneously at three points, discussing antenna commutator circuit
14 p2452 A69-29874

Autonomous radiometers signals statistical properties used in space technology, discussing radar signals phenomenological models, measurement errors and energy characteristics
15 p2566 A69-30337

Faraday angle of rotation of radio signals polarization plane from satellites and celestial bodies
15 p2568 A69-30744

Aoristic antenna to receive radioelectric signals from satellite emitter at distance of 10,000 km
15 p2580 A69-31095

Satellite radio signal scintillation variations association with sporadic E and spread F and dependence on magnetic activity in Southern Hemisphere during sunspot minimum
16 p2780 A69-32307

Resonant amplifier response having stages identical to radio pulse with exponential envelope
16 p2753 A69-32476

Meteor station photorecorder of reflected radio signals, discussing design and performance during meteor shower
17 p2976 A69-33898

Single radio pulse reception time relations by panoramic receiver, considering short wideband and long narrowband pulses
17 p2931 A69-33910

Irregularities distribution in antarctic ionosphere from polarization angle fluctuations of satellite S-66 radio signals, discussing diurnal magnetic and solar cycle effects
18 p3125 A69-34249

UHF radio pulses from zenith associated with extensive air showers, estimating threshold energy of scintillation trigger system

21 p3792 A69-39613

Satellite scintillating signals amplitude distribution, correlating observations and theoretical results

23 p4115 A69-41486

RF and microwave signal variable delay and processing using laser-acoustic interactions, photodetector and electrical-to-acoustical transducer

24 p4283 A69-43027

RADIO SOURCES [ASTRONOMY]

NT CASSIOPEIA A

NT PULSARS

NT QUASARS

Optical identifications for 17 Ohio survey sources with peaked or flat spectra

01 p0153 A69-10854

Metagalaxy temperature brightness explained from radio sources combined radiation with inversion spectra

02 p0313 A69-11632

Radio emission fluxes in solar active regions, determining slope of spectral characteristics of radio sources from effective emission center

02 p0314 A69-11676

Radio signals from hydroxyl radicals by maser action in early stars, noting emission magnitude and intensity spectrum dissimilarity at different frequencies

02 p0324 A69-12493

Normal galaxies radio emission and brightness of metagalactic radio background

02 p0325 A69-12564

Linear polarization measurements of variable radio sources

02 p0325 A69-12592

Radio source near UV object identified with X ray source GX3 plus 1

02 p0308 A69-12595

Radio source positions and structures from occultation observations, suggesting optical identifications

02 p0326 A69-12704

Plasma model of quasars and radio galaxies for observations of high energy radiation

02 p0329 A69-12794

Radio emission sources nature in terms of special relativity theory

03 p0499 A69-13078

Linear polarization of cosmic radio emission measured near galactic anticenter at centimetric wavelengths

03 p0501 A69-13704

Spectrum and diameter of source of slowly varying component of solar radio emission between 3.3 mm and 21 cm

03 p0516 A69-14045

Pulsating radio sources near Crab Nebula noting possible coincidence with nebula, pulse dispersion and interstellar electron density

04 p0659 A69-14977

Solar radio emission sources associated with sunspot groups and flocculi at 1.6 cm

04 p0649 A69-15241

Diminished RF intensity of neutral hydrogen line near radio source W 49 due to diminished kinetic temperature of gas

04 p0662 A69-15253

Intense discrete radio sources observation by antenna array with fan beam, determining right ascension and east-west structure

04 p0663 A69-15379

Supernova remnant theories used to interpret results of 1-mile Molonglo cross type radio telescope survey of nonthermal galactic sources

04 p0664 A69-15441

Non-Io controlled fifth source of Jupiter decametric radiation from/near visible planetary disk

05 p0813 A69-15604

Radio sources quantity dependence on radio emission value, noting determination of spatial density variations of radio galaxies

05 p0826 A69-16426

Radio emission from supernova remnants, reviewing evolution, structure, spectra and polarization, plus identification, characteristics, surface brightness and radio emissive remnants distance

06 p1002 A69-17314

Flux density spectral dependence disagreement with power law for synchronous radiation mechanism for radio sources in 12.6 to 25 MHz interval

06 p1004 A69-17538

Lunar occultations of radio source Sagittarius A observed at various frequencies between 230 and 2400

MHz, obtaining diameter, position and decimeter band flux densities

06 p1009 A69-17960

Radio sources detected in HF surveys not listed in 4C catalog

06 p1010 A69-17974

Solar wind, discussing corona, radio sources, radio bursts, comet tails, cosmic rays, etc

06 p1012 A69-18239

Spectra and flux densities of cm wavelength radio sources

07 p1218 A69-19256

Southern Hemisphere galactic H II regions continuum thermal radiation at 6 cm, noting maps for 28 of 36 sources, peak temperatures and emission and half intensity widths

07 p1206 A69-19271

Cosmic radio noise brightness distribution in Southern Hemisphere at 10.02 MHz, noting spectra of sources observed

07 p1206 A69-19272

Radio sources flux densities from fan beam survey using Molonglo radio telescope compared to flux densities of Parkes catalog, presenting revised spectra

07 p1218 A69-19278

Rosette Nebula structure from high resolution observations at 178 MHz of galactic plane, deriving 8600 K electron temperature for Nebula, discussing Monoceros Nebulosity

07 p1223 A69-19625

Errors estimation in determination of radio signal source flux density, position and recorded half power widths

07 p1088 A69-19722

Radio source counts log N-log S diagram slope uncertainty due to finite source number, discussing statistical analysis methods accuracy

08 p1383 A69-20048

Radio observations of gamma Cygni source in Cygnus X complex showing nonthermal nature of source, noting weak but significant polarization

08 p1387 A69-20090

Number count formula in zero pressure model universe for extragalactic radio sources with arbitrary luminosity and evolution functions, discussing red shifts

08 p1390 A69-20388

Interferometric measurement of polarization distributions in Crab Nebula and 3C 315 radio sources by Fourier synthesis, discussing complex brightness

08 p1390 A69-20389

Wideband 1665 MHz OH emission source in Carina region of galaxy in weak continuous radiation region with low degree of polarization

08 p1397 A69-20772

Optical depth determination in absorption lines of interstellar neutral hydrogen clouds by spectral observation of variable intensity radio sources

08 p1398 A69-20774

Flux density variability and component age of radio sources at frequency of 5769 MHz measured by radio telescope

09 p1588 A69-21361

Spectra of opaque radio sources with synchrotron self absorption, discussing brightness temperature and magnetic field

09 p1591 A69-21447

OH emission source in W24 during July 19, 1967 lunar occultation, obtaining better position for brighter OH emission feature

09 p1591 A69-21449

Condensed supernova remnants in Crab Nebula, considering various hypotheses for radio source

09 p1592 A69-21485

Polarization and intensity distribution of extended supernova remnant in Centaurus, discussing remnant effect on galactic magnetic field

09 p1598 A69-22184

Linearly polarized radiation from supernova remnants 3C 10, Taurus A, 3C 358 and Cassiopeia A, determining distributions by synthesizing fan beam

09 p1598 A69-22185

Contour maps of H II regions W12, Orion A, W43 and W51, listing flux densities and angular sizes of components

09 p1598 A69-22186

Red shifts of radio sources obtained with Carnegie image tube spectrograph, noting quasi-stellar objects and galaxies

09 p1602 A69-22224

Contour maps of supernova remnants HB 9, Simeis 147 and IC 443, noting spectra showing radiation nonthermal

09 p1604 A69-22408

Radio wave generation in astrophysical plasmas, discussing various emission mechanisms

09 p1608 A69-22743

Absolute flux density of five radio sources and relative flux densities of 37 sources defining absolute flux density scale for Southern Hemisphere

10 p1772 A69-22857

Radio spectra and structure of H II regions in emission nebula NGC 281 and unnamed nebula near NGC 2264

10 p1773 A69-22957

Flux density and spectra measurements at 5 GHz for extraterrestrial and other discrete radio sources, noting spectral indices

10 p1773 A69-22958

Position and polarization of 1720 MHz OH emission from W28, W44 and galactic center, considering unresolved concentrations of shell type nonthermal sources

10 p1776 A69-23220

Preliminary observations of Tau-A, Cas-A and Cyg-A with multiple-element interferometer

10 p1777 A69-23397

Pseudodynamic programming for optimizing design of correlator supersynthesis antenna arrays used for radio source tracking

10 p1663 A69-23420

Bright emission nebula components and electron temperature determined by radio telescope observation

10 p1778 A69-23603

Antenna for lunar occultation observations at 81.5 MHz, detailing experimental procedure and data reduction

10 p1779 A69-23606

Polarization observation of star BL Lac continuum by multichannel scanner, noting photoelectric UVB observations and identification with radio source

10 p1785 A69-24090

Hyperfine transition line of He 3 II for abundance in Messier 17 source by radio telescope

10 p1785 A69-24098

Interstellar formaldehyde detection in absorption against galactic and extragalactic radio sources, discussing chemical evolution

10 p1786 A69-24108

Position of OH sources near seven galactic radio sources determined with two element variable-baseline interferometer, noting strong circular polarization

10 p1787 A69-24114

Radio sources log N-log S diagram, red shifts and luminosity functions in zero cosmological constant and Lemaitre type Friedmann universes

10 p1789 A69-24134

Radio nebula NRAO 591/593, discussing thermal and nonthermal source and models based on electron density distribution

10 p1790 A69-24136

Flux densities and spectral indices of radio sources in 3C and 3CR catalogs, noting measurements at 86 MHz frequency

11 p1951 A69-24237

Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars

11 p1954 A69-24379

Radio sources optical positions for independent calibration sources

11 p1958 A69-24465

Northern sky scan for discrete sources of gamma rays in 240 to 1000 kev energy region by telescope on balloon flight

11 p1946 A69-24593

Galactic radio source W 49 /3C 398/ observed with Cambridge one-mile radio telescope

11 p1963 A69-25259

Hydroxyl microwave emission sources in Cygnus not connected with continuum emission

11 p1964 A69-25403

LF observations of complex galactic radio source W51, discussing structure and radio spectra of resolved components

12 p2153 A69-25807

Frequency spectrum, time variations and polarization of source of synchrotron radio emission with expanding components flying apart at relativistic velocities

12 p2155 A69-26207

Pulsars discovery, emission, regularity, narrow frequency band and pulse changes, physical nature and aspects of Crab Nebula source

12 p2160 A69-26895

Polarization and structure of magnetic fields of quasars, E galaxies, normal galaxies and other extragalactic radio sources

12 p2165 A69-27034

Absolute radio luminosity relation to surface brightness of extragalactic radio sources, finding volume radiation coefficient of spiral and radio galaxies

12 p2166 A69-27035

Extragalactic radio sources, discussing brightness distribution measurements and radio star scintillations

12 p2168 A69-27053

Interacting galaxies theories, characteristics and terminology, discussing galactic radio sources and properties of matter

12 p2169 A69-27055

Galactic formation by massive matter cloud passage through antimatter cloud, discussing radio sources genesis

12 p2170 A69-27064

Optical identification of radio source 3C 230, suggesting removal from quasar list

12 p2173 A69-27171

Variable radio sources observation at 9.55 mm wavelength, discussing flux density and electron cloud expansion

13 p2334 A69-27309

Exterior field equations for radiating spheres with zero limb darkening in relativity and Bondi coordinates, determining radiative flux and pressures

13 p2339 A69-27566

Radiative relaxation of relativistic particle distribution undergoing synchrotron radiation and reabsorption, discussing self absorbed radio source model

13 p2327 A69-27572

Synchrotron spectrum radiated by relativistic electrons below Razin cut-off, considering relation to radio spectra curvature of variable extragalactic sources

13 p2339 A69-27573

Balloon-borne instrumentation for detection of far IR extended emission regions and bright point sources, describing results of initial flights

13 p2342 A69-27599

Radio emission fluxes in solar active regions, determining slope of spectral characteristics of radio sources from effective emission center

13 p2355 A69-28707

Radio emission sources nature in terms of special relativity theory

14 p2509 A69-28760

Frequency selection, spectral index distributions and counts of extragalactic radio sources

14 p2518 A69-29134

Linear polarization of quasars, radio or normal spiral galaxies, galactic objects, etc, observed by Parkes telescope

14 p2526 A69-29770

Radio observations of emission nebulae for flux densities, deriving electron temperatures

[ASME PAPER 69-DE-46] 14 p2527 A69-29941

Negative curvature electron energy spectrum of discrete radio source model, assuming acceleration by Fermi mechanism and energy loss by synchrotron radiation

15 p2687 A69-30540

Radio source W 43 distance determined from analyzing neutral H line profile and radial velocity in excited H line 104 alpha

15 p2687 A69-30543

Interstellar radio absorption influence on spatial distribution of cosmic radio emission observations with fixed multiple dipole antenna arrays

15 p2687 A69-30545

Electron energy distribution determination from electron synchrotron radiation spectrum for various magnetic field configurations within radio source

15 p2655 A69-30546

Distribution model for ionized interstellar gas over galactic disk for explaining radio emission absorption and depolarization from discrete sources

15 p2695 A69-30935

Radio interferometer with independent heterodynes to obtain radio brightness distribution over source by varying antenna spacing and reception frequency

15 p2578 A69-30937

Observations of 123 southern radio sources made with two element variable spacing interferometer, tabulating and graphing results

15 p2696 A69-31166

Flux densities at 2695 MHz for radio sources, tabulating measured data, discussing spectral distribution indices

15 p2696 A69-31206

Discrete radio sources interferometer observations using transPacific baseline, noting spectra and radiation intensity variations

15 p2701 A69-31530

Preprotostar radio observations suggesting nonthermal radio sources formation with magnetic energy dissipated in particles acceleration

15 p2701 A69-31531

Spectrophotometry of elliptical galaxy NGC 1052 nucleus from 3400 to 6300 A for relating radio properties and optical characteristics

16 p2853 A69-31610

Radio sources spectral flux densities at 22 MHz, considering ionospheric conditions, calibration and reduction

16 p2860 A69-32231

X ray source Cyg XR-1 angular diameter upper limit determined from balloon experiment data obtained with collimated X ray telescopes

17 p3026 A69-32860

Interferometric observations of radio source VRO 42 22 01 listed with antenna separations in wavelengths and with resolution direction

17 p3026 A69-32861

Radio observation of 20 May 1966 solar eclipse at 9470 and 3300 MHz, discussing brightness distribution of S component sources

17 p3030 A69-33057

Radio map of Orion A region, resolving M 42 and M 43 nebulae at 1.94 cm wavelength, noting optical photographs comparison

17 p3035 A69-33609

Spectra for 16 radio sources, questioning classification as supernova remnants

17 p3035 A69-33610

Accurate positions at 2700 MHz and optical identification of radio sources with galaxies and quasi-stellar objects

17 p3035 A69-33611

Radio sources interplanetary scintillations and cross correlation coefficient real time determination

17 p3038 A69-33727

Solar radio sources heights at 1424 and 696 MHz during near minimum solar activity

17 p3040 A69-33808

Parkes catalog of 1780 radio sources, noting inclusion of data concerning polarization, source structure, optical identifications, etc

17 p3045 A69-34199

Extragalactic radiation depolarization through Milky Way transit determined from linear polarization and flux density measurements of discrete radio sources at 21.2 cm

18 p3190 A69-34287

Depolarization of extragalactic radio sources at low Galactic latitudes attributed to ionized hydrogen produced by B2 star tunneling through interstellar hydrogen cloud

18 p3194 A69-34425

Galactic plane at 9.26 cm between longitudes of 32 to 49 degrees, tabulating contour map of antenna temperature and sources

18 p3195 A69-34426

Observations of W49 at 2800 MHz with East-West resolution, analyzing shape of thermal and nonthermal source

18 p3195 A69-34427

Continuum survey at 1415-MHz between declinations of zero and 20 degrees N with radio telescope, noting flux densities and contour maps of sources

18 p3195 A69-34428

Jovian radio sources intermittency, recording difficulties, longitudinal drift and theories concerning origin

18 p3196 A69-34690

Flux density variability and component age of radio sources at frequency of 5769 MHz measured by radio telescope

18 p3197 A69-34751

Radio sources spectrum measurement results at cm wavelengths in tabular form, noting flux density relationship to frequency

18 p3200 A69-35132

Discrete radio sources spectra at decametric wavelengths, showing variation with frequency and radio wave generation mechanism leading to various spectral types

18 p3200 A69-35134

Radio sources identified as quasi-stellar objects through photographic detection of large brightness changes

18 p3201 A69-35206

Radio emission attributed to galactic nebula NGC 6857, suggesting origin in high density H II regions excited by OB star clusters

18 p3202 A69-35209

Jupiter decametric radio source analysis suggesting two component model of rotation at both constant and variable rotational periods

18 p3202 A69-35212

Interstellar hydroxyl molecular clouds as radio wave sources, using very long baseline interferometry, suggesting natural masers in space for OH emissions

19 p3427 A69-36659

Radio emission intensity of Cas-A and Cyg-A at 30-60 cm, giving spectral indices

19 p3428 A69-36876

Planetary nebulae observations, describing radio spectra characteristics, electron temperature measurement, hydrogen line emission, etc

20 p3598 A69-37425

M 31 nebula radio continuum survey, describing discrete sources catalog and Andromeda nebula radiation distribution

20 p3601 A69-37493

Circular polarization measurements of compact radio sources at 1420 MHz, finding no detectable polarization

20 p3606 A69-37831

Brightness distribution over source, discussing regularization algorithms for radio astronomical data reduction from crossed telescope

20 p3606 A69-38033

Right ascension and flux density of source in Crab Nebula measured at meter wavelengths, evaluating spectrum and relative position to binary star center

20 p3607 A69-38040

Radio source flux density values in revised 3C catalog determining spectrum, discussing effects of relativistic electron energy distribution, self absorption and spatial distribution

20 p3609 A69-38138

Linear and circular integrated polarization of extragalactic radio sources measured by two element interferometer at Owens Valley Radio Observatory

20 p3610 A69-38139

Satellite-anomalous OH radio emission sources, observing spatial distribution and Stokes parameters

20 p3610 A69-38146

Upper limits for OH microwave emissions from radio sources F transitions, discussing pumping mechanism role in emission detection

21 p3796 A69-38477

Radio spectra of 136 sources determined at various declination ranges noting flattening at frequencies below 408 MHz

21 p3797 A69-38480

Variable BL Lac SHF flux density measurements, discussing periodicity and maxima spacing

21 p3798 A69-38545

Galactic radio sources high resolution observations at 178 MHz, determining flux densities and angular structures, noting supernovae remnants

21 p3801 A69-38701

Radio source counts from cosmological standpoint, discussing terrestrial location relative to quasars

21 p3802 A69-38828

Radio sources observation by lunar occultation, interplanetary scintillations and interferometry techniques, outlining measurement theory

21 p3812 A69-39518

Flux measurements of radio sources at 4.3 mm by 36 ft parabolic antenna, noting flux densities relative to Jupiter

22 p4014 A69-40126

Flux densities of radio sources in 3CR catalog measured at 2.8 cm wavelength

22 p4014 A69-40127

Declination measurements of sources in 4C Catalogue by Arecibo 1000 ft radio telescope

22 p4014 A69-40128

Extragalactic radio sources linear polarized radiation distribution at 1418 MHz indicating ordered magnetic fields often oriented differently

22 p4015 A69-40155

Flux density variations of radio sources at 2.8 and 4.6 cm wavelengths, suggesting relativistic particles prolonged injection into optically thin sources

22 p4029 A69-40764

Microwave background radiation in steady state cosmological model, attempting interpretation as discrete extragalactic radio sources population

22 p4029 A69-40765

Absorption features of 21 cm neutral hydrogen line in part of Cygnus X and of W 49, showing equal velocity contour diagrams from right ascension scans

22 p4034 A69-41200

X ray spectra of four high energy sources near galactic center
23 p4206 A69-42114

Continuous electron acceleration in astrophysics, discussing Crab Nebula X ray flux and galactic and extragalactic radio source power law spectra
24 p4355 A69-42696

Extragalactic radio sources flux densities at 5009 MHz tabulated, ascribing accuracy variations to uncertainty in receiver gain and dish efficiency
24 p4382 A69-42922

Radio emission from diffuse thermal radio sources in northern Milky Way, giving contour maps
24 p4388 A69-43641

Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars
24 p4389 A69-43769

RADIO SPECTRA NT MICROWAVE SPECTRA

Spectral fine structure in emission from pulsars, noting correlation between fading and spectral change
01 p0150 A69-10273

Optical identifications for 17 Ohio survey sources with peaked or flat spectra
01 p0153 A69-10854

Spectrum and diameter of source of slowly varying component of solar radio emission between 3.3 mm and 21 cm
03 p0516 A69-14045

Radio spectra differences of quasars and radio galaxies, noting influence of frequency levels
04 p0652 A69-14418

Radio emission spectra of radio galaxies from 3CR catalog
04 p0661 A69-15234

Intense continuum bursts energy, flux density and energetic proton production, noting V-spectrum in proton flares
06 p0985 A69-16980

Radio spectrum and cosmic ray electron data evaluated concerning conditions in Galaxy, deducing mean magnetic fields
06 p0991 A69-17309

Solar radio spectroscopy for 40 to 240 MHz frequency range, noting dynamic spectra of solar radio bursts
06 p0925 A69-17318

Radio spectra of supernova remnants Cygnus Loop and IC443, noting possible radiation from shell source
06 p1003 A69-17322

Flux density spectral dependence disagreement with power law for synchronous radiation mechanism for radio sources in 12.6 to 25 MHz interval
06 p1004 A69-17538

Radio spectra analyzed for NGC 1052 and NGC 4278 elliptical galaxies, discussing 178 MHz flux density, anomalies and radiation absorption mechanisms
06 p1009 A69-17959

Electron temperatures and optical depths for planetary nebulae outer regions derived using radio spectra and Balmer line isophotes
06 p1009 A69-17962

Radio recombination lines in populations of highly excited states of hydrogen, discussing collisional transition effects
06 p1010 A69-17970

Digital FM techniques, signal spectral properties, discrimination detection, phenomenological model, etc
07 p1081 A69-19105

Spectra and flux densities of cm wavelength radio sources
07 p1218 A69-19256

Radio spectrum of quasi-stellar object identified as Parkes 2134 plus 004
07 p1224 A69-19708

Radio signal spectrum scattered at oscillating interface calculated in Kirchhoff approximation, determining scattering factors
08 p1275 A69-20432

Radio spectra of normal galaxies noting transition in spectrum
08 p1398 A69-20777

Radio wavelength range observations of NO molecule lines in interstellar space
09 p1590 A69-21377

Spectra of opaque radio sources with synchrotron self absorption, discussing brightness temperature and magnetic field
09 p1591 A69-21447

Taurus A flux density measurement at 4.3 mm with 36-ft antenna at National Radio Astronomy Observatory to determine spectrum unambiguously
09 p1591 A69-21450

Meter wave radio spectrum observations during 9 June 1968 solar flare, suggesting sudden intensity and frequency change due to shock wave
09 p1582 A69-22748

Pulsed RF spectra analyzer displays, noting responses to CW and pulsed signals and Fourier and pulsed repetition rate lines
09 p1460 A69-22791

Radio spectra and structure of H II regions in emission nebula NGC 281 and unnamed nebula near NGC 2264
10 p1773 A69-22957

Flux density and spectra measurements at 5 GHz for extraterrestrial and other discrete radio sources, noting spectral indices
10 p1773 A69-22958

Dynamic spectrum of July 7, 1966 proton flare, considering short wave fadeout at 0027 UT and intense burst of spectral Type 2
10 p1765 A69-23750

Decametric radio spectra from 0053 to 0200 UT during July 7, 1966 solar proton flare, discussing Type 4 phase
10 p1765 A69-23751

Dynamic spectrum of Type 4 solar radio burst during July 7, 1966 proton flare, noting limb effect
10 p1765 A69-23752

Crab Nebula radio emission spectrum in decimeter wavelength range indicating emission spectral index decrease from Taurus A
10 p1784 A69-23941

Quasi-stellar radio sources interferometric observations at 2695 MHz, determining centroid of radio emission
10 p1790 A69-24138

Quasars time dependent flux density variations at 6.6 cm, noting spectrum peaks tendency toward lower frequencies with time
11 p1954 A69-24382

Interplanetary scintillation and angular spectrum of radio waves scattered by solar plasma, noting magnetospheric tail and solar wind
12 p2161 A69-26942

Synchrotron spectrum radiated by relativistic electrons below Razin cut-off, considering relation to radio spectra curvature of variable extragalactic sources
13 p2339 A69-27573

Dielectronic recombination influence on radio recombination lines of carbon under typical nebular conditions
13 p2346 A69-27703

Extragalactic radio sources, observing nonlinear LF spectra for quasars and linear LF spectra for radio galaxies
13 p2351 A69-27867

H II alpha and beta radio recombination lines strengths predicted, noting role of calculations of hydrogen energy levels non-LTE populations
14 p2517 A69-29088

Frequency selection, spectral index distributions and counts of extragalactic radio sources
14 p2518 A69-29134

Spin temperature of interstellar neutral hydrogen calculated from 21 cm absorption spectra line profiles
15 p2681 A69-30411

Decametric radio astronomy at frequencies from 10 to 40 MHz on wideband telescopes, discussing spectral types of discrete radiation sources
15 p2682 A69-30501

Excited hydrogen radio lines observations, analyzing neutral and excited hydrogen distribution in galaxies
15 p2682 A69-30502

RF spectra for hyperfine structure of ortho-hydrogen molecular ion, calculating doubling constant for vibrational effects
15 p2693 A69-30784

Discrete radio sources interferometer observations using transPacific baseline, noting spectra and radiation intensity variations
15 p2701 A69-31530

Solar radio bursts spectra fine structure, discussing observations of fast drift storm, drift pair and split pair bursts
17 p3024 A69-33607

Spectra for 16 radio sources, questioning classification as supernova remnants
17 p3035 A69-33610

Spectrum and cross section of radio wave scattering in two temperature plasma, relating differential backscattering cross section to ionospheric electron density fluctuations
17 p2930 A69-33895

RF recombination lines measurement of helium for abundance in nebulas, comparing optical and radio values for H II regions
18 p3190 A69-34293

Pulsars observed for average energies at centimeter wavelengths, using azimuth elevation antenna
18 p3196 A69-34644

Radio wavelength range observations of NO molecule lines in interstellar space
18 p3198 A69-34765

Radio sources spectrum measurement results at cm wavelengths in tabular form, noting flux density relationship to frequency
18 p3200 A69-35132

Planetary nebulae observations, describing radio spectra characteristics, electron temperature measurement, hydrogen line emission, etc
20 p3598 A69-37425

Right ascension and flux density of source in Crab Nebula measured at meter wavelengths, evaluating spectrum and relative position to binary star center
20 p3607 A69-38040

Radio spectra of 136 sources determined at various declination ranges noting flattening at frequencies below 408 MHz
21 p3797 A69-38480

Radio observations of supernova remnant HB 21 at 2695 MHz, noting spectral brightness and curvature of northern shell segment
22 p4014 A69-40129

Cosmic radio background noise spectrum near north galactic pole based on Radio Astronomy Explorer satellite experiments
23 p4219 A69-42375

NASA program for radio spectrum utilization in aerospace communication systems
23 p4128 A69-42502

Pulsars radio intensity fluctuations noting possible periodic pulse amplitude modulation
24 p4389 A69-43744

Quasars time dependent flux density variations at 6.6 cm, noting spectrum peaks tendency toward lower frequencies with time
24 p4389 A69-43772

RADIO SPECTROSCOPY

Radio spectrometer with paramagnetic quantum amplifier for astronomical spectral measurements in 8 mm range
04 p0597 A69-14851

Solar radio spectroscopy for 40 to 240 MHz frequency range, noting dynamic spectra of solar radio bursts
06 p0925 A69-17318

Astronomical unit determined by measuring Doppler shift of spectral features of galactic hydrogen
07 p1222 A69-19590

RF spectroscopy of OH molecule, RF absorption by galactic OH and radio emission from OH in dust clouds
10 p1781 A69-23671

Time splitting of solar radio bursts observed at Oslo Solar Observatory with high resolution radio spectrographs
11 p1946 A69-24590

Color excess and 21 cm line intensity of RR Lyrae stars at high latitudes, confirming correlation between dust and atomic hydrogen
12 p2063 A69-25808

Radio spectrometer with paramagnetic quantum amplifier for astronomical spectral measurements in 8 mm range
15 p2607 A69-30243

Design and electrical features of microwave measurement system for solid state spectroscopy, discussing waveguides, signal source, detector, etc
15 p2610 A69-30709

Jodrell Bank RF digital autocorrelation spectrometer based on time delay related to signal power spectrum through Fourier transform
17 p2970 A69-32856

Red dwarf star /YZ Canis Minoris/ radio outbursts observation noting stellar atmospheric spectrum, electron density and temperature and total flare energy
17 p3043 A69-34164

Discrete radio sources spectra at decametric wavelengths, showing variation with frequency and radio wave generation mechanism leading to various spectral types
18 p3200 A69-35134

RADIO STARS NT PULSARS

Radio star scintillation data, establishing periodic variations in rates within 1 to 1.5 years
03 p0505 A69-13081

RADIO TELEGRAPHY

- Statistical comparison of scintillation depths of Transit 4A satellite to radio star Cassiopeia A
07 p1215 A69-18821
- Radio galaxies, quasars and radio stars between declinations plus 20 and plus 27 degrees, obtaining accurate positions and optical identifications
07 p1218 A69-19273
- Spherical harmonic analysis of Stokes parameters for polarization of stars, discussing magnetic field of Galaxy
08 p1390 A69-20390
- Radio star scintillation data, establishing periodic variations in rates within 1 to 1.5 years
14 p2515 A69-28763
- Ionospheric scintillation power spectrum measurements from radio star and satellites related to F region radio refractive index fluctuations
20 p3534 A69-38093

RADIO TELEGRAPHY

- Artificial triggering of VLF magnetospheric noise by NAA Morse code transmission during whistler duct drift across magnetic shells on 17 June 1965
11 p1878 A69-25154
- Global communication techniques and trends, discussing radio telephone and telegraph, submarine systems, satellite communications, line of sight links, tropospheric scatter, waveguide transmission, etc
16 p2750 A69-31755

RADIO TELEMETRY NT PULSE FREQUENCY MODULATION TELEMETRY

- RF voltage breakdown in solid state telemetry transmitters on sounding rocket, noting glow discharge initiated by energetic dissociated electrons
02 p0222 A69-12691
- VHF to UHF conversion, noting modular UHF telemetry transmitter, miniature UHF special purpose transmitter, RF power amplifiers and telemetry receiver
05 p0732 A69-16305
- Conversion from VHF to UHF at White Sands Missile Range, discussing telemetry acquisition, tracking and receiving systems
07 p1077 A69-18828
- Radio profilograph designed for integrating aircraft excess altitudes and measured distances between aircraft and earth, discussing block diagram
07 p1132 A69-19006
- Time division telemetry technique resolving data and control flow to and from remote locations /tactical aircraft/, noting application to environmental pollution control
07 p1081 A69-19100
- Telemetry and tracking antenna feed system in EC-135N instrumented aircraft for Apollo moon project
07 p1105 A69-19110
- UHF telemetry flight tests at White Sands Missile Range, discussing multipath and target scintillation problems
07 p1082 A69-19116
- Data transmission techniques for aerospace and industrial applications, discussing radio link
08 p1271 A69-19906
- Multichannel miniature telemetry for vibration, strain and temperature measurements in high speed machinery by solid state encapsulated devices
10 p1654 A69-23251
- Miniature telemetry systems for gun launched projectile instrumentation and ejection payloads, noting voltage controlled oscillators, commutators and VHF FM transmitters
10 p1654 A69-23280
- Shipborne self pointing antenna for reception of telemetry signals from maneuverable missile, discussing tracking and compensation for ship platform motion
10 p1664 A69-23803
- Echo 1 aluminized plastic balloon satellite, discussing radio linkup by reflections, use in geodesy and atmospheric and radiation pressure effects on lifetime
10 p1792 A69-23804
- Deep space telemetry bit errors increased by reference signal phase noises and partial RF signal suppression, calculating equivalent signal to noise ratio degradation
13 p2223 A69-28609
- S-band telemetry capability of Easter Test Range, discussing relationship to Telemetry Rehabilitation Project, major system decisions and performance characteristics
14 p2410 A69-28878
- Space Ground Link Subsystem as S-band communication link within Air Force Satellite Control Facility

- including unified telemetry, tracking and command systems
14 p2427 A69-28879
- VHF to UHF telemetry bands transition implemented by Naval Weapons Center
14 p2411 A69-28880
- Carrier disappearance method for FM telemetry transmitter characteristics measurements including frequency deviation sensitivity, linearity and frequency response
14 p2411 A69-28881
- ESRO 1/Aurorae satellite telemetry system constraints, discussing encoder, pulsed operation and integrated circuit assembly
15 p2702 A69-31085
- Pioneer 6 S band telemetry carrier Faraday rotation during corona occultation measured by deep space tracking antenna
15 p2700 A69-31419
- FM/FM telemetry system for high altitude rocket research, using independent subcarrier oscillator for each measurement transmitted with individual frequency modulation
16 p2750 A69-31853
- AZUR research satellite HF communications system, describing telemetry transmitter, command receiver and data transmission
16 p2759 A69-31854
- Seven helix antenna array components and operation mode at Berlin weather station, including biaxial rotator, preamplifier servoamplifier and VHF telemetry receiver
17 p2946 A69-33768
- Advanced Meteorological Sounding System /AMSS/ for measurements up to 150,000 ft, discussing configuration, characteristics, radiosonde, ranging, telemetry data ground equipment and test
18 p3108 A69-35102
- Laboratory and flight tests of airborne solid state UHF telemetry transmitter, discussing miniaturized coaxial hardware from RF power conservation viewpoint
19 p3267 A69-35996
- Solid state S band to VHF converter design to obtain optimum system noise for radio telemetry, discussing cost effectiveness and system performance
19 p3270 A69-36238
- Telemetry transmitter-receiver RF links quality determination, emphasizing nonlinear effects measurement by notch noise tests
19 p3270 A69-36239
- Optimal ratio predetection combiner used with diversity signals and various modulations, showing significant improvement in telemetry systems performance
19 p3270 A69-36241
- Telemetric control of urban transportation systems and law enforcement, considering automobiles as prime vehicle
19 p3272 A69-36256
- Wireless telemetry system design for physiological signals in human diagnosis, discouraging casual use of wireless transmission
19 p3261 A69-36269
- Computer program designing multiplex taper to minimize FM/FM telemetry system carrier threshold SNR, examining noise behavior of multiplex system stages for system performance
19 p3273 A69-36275
- Monte Cardiga telemetry station associated with sounding rocket range at Salto di Quirra, Sardinia, describing equipment, telemetry system capabilities and flexibility
20 p3512 A69-38280
- Radiotelemetric EEG recording variation possibility, examining dynamic behavior of human cerebral rhythms
22 p3889 A69-40158
- Capacitive coupling vs DC coupling between data input and transmitter exciter in FM telemetry system, based on pulse series Fourier analysis
23 p4119 A69-41744
- Flexible format adaptive telemetry encoder design, discussing system design and implementation technique with modular units
23 p4119 A69-41748
- S band phased array receiver developed to track automatically moving telemetry transmitter by electronic beam steering
23 p4120 A69-41751
- S band antenna systems for missiles, designed in various types to obtain RF telemetry links reliability by sharing effort between airborne and ground station equipment
23 p4137 A69-41753

- Radio telemetry system for evaluating protective masks dynamic performance by remote simultaneous monitoring of respiration, acceleration and temperature data generated by human subjects
23 p4121 A69-41765
 - Apollo Extravehicular Communication Telemetry System for monitoring astronaut portable life support system, space suit performance and body functions on lunar surface
23 p4121 A69-41767
 - IRIG /Inter-Range Instrumentation Group/ telemetry standards for U.S. Department of Defense missile and weapons systems, reviewing evolution, content, scope, philosophy, revisions, etc
23 p4121 A69-41770
 - Frequency diversity technique simplifying airborne antennas for UHF telemetry, useful on spin stabilized vehicles requiring omnidirectional antenna coverage
23 p4122 A69-41777
 - UHF down-converter design used in various Navy missiles UHF telemetry/miss-distance information system
23 p4137 A69-41778
 - Phase locked UHF telemetry transponder for missile scoring applications, discussing design and performance
23 p4137 A69-41779
 - Portable UHF telemetry receiving station for medium range surface-to-air missiles testing, analyzing antenna coverage over water and system prediction allowing variable parameters
23 p4122 A69-41780
 - Fixed-tuned telemetry receiver as miss distance indicator /MDI/ to provide information in missile performance program
23 p4138 A69-41781
 - Pioneer 9 deep space probe with telemetry link operated in coded mode with sequential decoding, discussing ground and flight test data
23 p4131 A69-42522
 - Space attenuation at VHF and UHF telemetry frequencies
24 p4281 A69-42622
- ## RADIO TELESCOPES
- Radio telescope for Owens Valley Radio Observatory, noting interferometer array of steerable antennas and signal wavelength influence on telescope reflector accuracy
02 p0229 A69-11974
 - Compact high-gain chromium doped rutile traveling wave masers for Onsala radio telescope for galactic and extragalactic microwave emission studies
02 p0257 A69-12463
 - Radio telescopic detection of seven new pulsars lying close to galactic plane, noting one pulsar close to supernova remnant
02 p0327 A69-12725
 - Radio emission center of gravity from 3C 273 quasar determined by radio telescope together with A and B component fluxes
03 p0506 A69-13092
 - Dynamic behavior of large steerable radio telescope, showing structural resonance influence on error detection system
03 p0412 A69-14093
 - 22-m parabolic reflector radio telescope with 9525 mm focal length at Crimean Astrophysical Observatory, noting high performance in mm wavelength range
04 p0584 A69-14376
 - Supernova remnant theories used to interpret results of 1-mile Molonglo cross type radio telescope survey of nonthermal galactic sources
04 p0664 A69-15441
 - Hydrostatic bearings, hydraulic drive system and hydraulic braking system for radio telescope with 2550 tons moving weight
05 p0743 A69-16147
 - Large paraboloid radio antennas structural setting for minimizing effects on performance due to deformation of surface by gravitational forces
06 p1023 A69-17372
 - Solar radio emissions analysis using radio telescope measurements, observing quasi-periodic LF fluctuations caused by chromospheric processes
06 p1004 A69-17535
 - Ground based radio telescope sensitivity to radio emission from earth atmosphere and galactic sources
07 p1099 A69-18515
 - Bright galaxies observed at 408 MHz with fan beam of east-west arm of cross-type radio telescope for correlations between radio and optical properties
08 p1386 A69-20087

Antenna tolerances theory, discussing illumination correlation function analytical evaluation for uniform and tapered illuminations

08 p1284 A69-20294

Focal antennas and receivers of Nancy radio telescope to measure flux density and incoming waves polarization, noting circular polarization in quasars

08 p1392 A69-20567

Molecular line intensity requirement in line of sight for detecting interstellar water vapor cloud, assuming transparent atmosphere and ideal radio telescope

09 p1591 A69-21446

Construction of large parabolic antennas for radio astronomy and satellite communication, noting dimensional accuracy, directional precision and dynamical behavior

09 p1476 A69-21650

Large steerable mm wave radio telescope of Simeiz observatory in U.S.S.R. noting computer aided pointing system

10 p1674 A69-23805

Filled and unfilled aperture radio telescopes, noting uses in radar astronomy and for aperture synthesis antennas

10 p1674 A69-23866

Radiophysics Laboratory /Sidney/, discussing radio astronomy, radioheliographs, radio telescopes, cloud physics and research

10 p1784 A69-23988

Galactic radio source W 49 /3C 398/ observed with Cambridge one-mile radio telescope

11 p1963 A69-25259

Atmospheric thermal radio emission fluctuations effects on radio telescope sensitivity, evaluating dispersion at low angles to horizon

12 p2031 A69-26643

Digital computer methods for weak pulsars search using radio noise picked by telescopes

12 p2172 A69-27169

Radio emission center of gravity from 3C 273 quasar determined by radio telescope together with A and B component fluxes

14 p2516 A69-28774

Reflector radio telescope of Pulkovo astronomical observatory noting high resolution

15 p2679 A69-30102

Large telescope dome movements automatic control, considering central and eccentric telescope mounting

15 p2588 A69-30441

Slowly varying component of solar radio emission, evaluating resolution of radio telescopes in sunspot studies and localized areas luminescence

15 p2674 A69-30503

Radio astronomical research developments including structural requirements for 100 m telescope

15 p2589 A69-30864

Pulsars Mp 0450, Mp 1642 and Mp 1818 discovery, discussing role of Molonglo radio telescope and pulse amplitude variations in detection

17 p3026 A69-32857

CP 0950 and CP 1133 pulsating stars position, using radio telescope at two frequencies

17 p3036 A69-33639

Radio telescope for radio astronomy in Bonn, discussing structural and operational problems

17 p2975 A69-33702

Continuum survey at 1415-MHz between declinations of zero and 20 degrees N with radio telescope, noting flux densities and contour maps of sources

18 p3195 A69-34428

LASSO /modified S-4B/UV/ vehicle mission to place in orbit two unmanned Lunar Modules for landing of radio and optical telescopes on lunar surface

18 p3136 A69-34813

Italian cross radio telescope noting added phase shifters to N-S arm, transistorized receiving system and modified data processing

19 p3295 A69-36643

T shaped radio astronomical array, discussing time sharing technique providing simultaneous observation capability and merits of T and cross configuration telescopes

20 p3507 A69-37837

Radio telescope structure material selection criteria, developing deformability criteria for structures under various stresses

20 p3546 A69-38306

Rotation of antenna pattern of radio telescope parabolic mirror subjected to thermoelastic deformations due to asymmetric solar heating

20 p3497 A69-38307

Synthetic aperture radio telescopes analysis, noting resolution and sensitivity at radio wavelengths for correlator array in supersynthesis mode operation

21 p3677 A69-39512

Solar radio emission /S component/ observations with 22-m radio telescope at Crimean Astrophysical Observatory

22 p4020 A69-40295

Structural technology for large radio and radar telescope systems - Conference, Cambridge, Mass., October 1967

23 p4147 A69-42120

Computerized evaluation of elastic deformations of 100 m parabolic reflector designs for Max Planck Institute radio telescope, outlining supports and dish structure

23 p4148 A69-42122

Feasibility studies to optimized design for 440 ft steerable filled-aperture radio and radar telescope, discussing parabolic configuration, radome selection, etc

23 p4148 A69-42123

Structure, operation and performance of two reflector Nancy radio telescope consisting of plane and spherical portion reflectors

23 p4149 A69-42124

Time averaged and fluctuating wind load effects on large radio telescope structures, discussing wind shear and turbulence influence on steady and unsteady loading

23 p4230 A69-42125

Parkes paraboloid radio telescope structural performance, using rapid survey instrument to measure surface deformations for optimum focusing determination

23 p4231 A69-42130

Canadian radio observatory 150 ft telescope antenna, discussing dish structural feature for resisting gravity, wind and thermal stresses

23 p4149 A69-42134

Surface accuracy of large diameter radio telescopes maintained by uncoupling reflector surface from backup structure, using active compensation

23 p4149 A69-42136

Tilttable conventional radio telescopes possibilities of passing gravitational limit for diameter and shortest wavelength, discussing dead load

23 p4231 A69-42138

NASA structural analysis /NASTRAN/ program applied to large radio telescopes, discussing static and dynamic analysis, problem formulation, finite element method, etc

23 p4232 A69-42145

Multichannel spectral line receiver for 210 ft Australian radio telescope with front ends covering wide frequency range

24 p4283 A69-43115

RADIO TRACKING

Constant beamwidth antenna consisting of parabolic reflector and ridge loaded horn, noting conical scan tracking antenna application

02 p0218 A69-12325

Venus radius determined by planetary radar and Mariner 5 radio tracking data

03 p0508 A69-13348

Telemetry with unrestrained animals, discussing radio tracking of game animals and instrumentation requirements for studying green sea turtle goal finding ability

07 p1071 A69-19136

Rawin systems for upper air measurements of wind and thermodynamic parameters, using balloon-borne radiosonde

07 p1057 A69-19581

Pseudodynamic programming for optimizing design of correlator supersynthesis antenna arrays used for radio source tracking

10 p1663 A69-23420

Space Ground Link Subsystem as S-band communication link within Air Force Satellite Control Facility including unified telemetry, tracking and command systems

14 p2427 A69-28879

Planetary navigation using spacecraft measurements and Doppler data from earth-based radio tracking, determining accuracy for earth-Mars trajectory

19 p3368 A69-35791

Navigational accuracy dependence on spacecraft geometry, determining information content and critical error sources of earth based Doppler radio tracking data

[AAS PAPER 69-112] 19 p3402 A69-35935

Tabulated coherent S-band Doppler data from Pioneer 6 and 7 radio tracking, improving astronomical constants and ephemerides for earth-moon system

[AAS PAPER 68-130] 20 p3595 A69-37179

Adaptive signal processing interference rejection technique for suppression of cochannel AM interference in congested VHF tracking receiver

23 p4128 A69-42503

RADIO TRANSMISSION

NT AUTOMATIC PICTURE TRANSMISSION
NT IONOSPHERIC F-SCATTER PROPAGATION
NT IONOSPHERIC PROPAGATION
NT MANDELSTAM REPRESENTATION
NT MICROWAVE ATTENUATION
NT MICROWAVE TRANSMISSION
NT MULTIPATH TRANSMISSION
NT SHORT WAVE RADIO TRANSMISSION
NT SINGLE SIDEBAND TRANSMISSION
NT TRANSEQUATORIAL PROPAGATION

Multiple transmission principles, examining linear systems, synchronous and asynchronous codes and channel interference

01 p0026 A69-10068

Tropospheric structure studied with high resolution antennas having small common volume

01 p0043 A69-10560

Radio systems for discrete information transmission, emphasizing phase difference modulation, wideband, universal and adaptive systems

01 p0031 A69-10778

Finsler geometric apparatus applied to electromagnetic wave propagation in media having refractive index varying with position and time, calculating errors

01 p0031 A69-10879

VHF transhorizon propagation by double reflection from elevated layer in troposphere

01 p0034 A69-11139

Charts summarizing daily solar phenomena, cosmic rays, geomagnetic variation, ionosphere, radiowave propagation and airglow observations in Japan

02 p0315 A69-11732

Ionospheric radio signal reflection measurements based on ground to rocket pulse propagation

02 p0245 A69-12736

Natural microwave radiation generation and propagation and wideband signal detection in problems connected with radio wave propagation, geophysics, radiometeorology and plasma physics

03 p0420 A69-12919

ELF radio wave propagation characteristics using two layered ionospheric model, noting deeper penetration than VLF

03 p0421 A69-13326

Subsurface radio propagation experiments determining feasibility of communication between vertical linear antennas located in drill holes and similar antennas on surface

03 p0395 A69-13622

Sunrise modal interference patterns for VLF propagation, analyzing variations with latitude

03 p0396 A69-13628

Atmospheric noise amplitude distribution relation to rms phase errors in frequency components of VLF timing pulse

03 p0396 A69-13629

Complex Doppler effect for oscillating source moving in dispersive medium, analyzing time behavior of radiation field

03 p0396 A69-13630

Statistical characteristics of multibeam signals reflected obliquely from ionosphere

03 p0396 A69-13708

Radio wave diffraction by knife edge obstacle on conducting earth surface noting effect on radio propagation

[AFCRL-68-0375] 04 p0560 A69-15216

Pulsar amplitude variations due to scintillation effects arising from irregular plasma refraction by general interstellar medium between source and solar system

05 p0825 A69-16354

Diurnal field strength and phase variations of VLF transmissions over transequatorial path from Australia to Japan

06 p0889 A69-17654

Phase and amplitude record changes in sunrise and sunset transitions in VLF transmissions over long path

06 p0889 A69-17655

Long wave radio stations field intensity spectral analysis data evaluated to determine vertical ionospheric displacements at sunset and sunrise

06 p0922 A69-17752

Nonlinear modulation distortions of high power radio waves propagating in ionosphere, noting electron temperature increase from radio wave
07 p1088 A69-19746

Reflection and transmission scattering coefficients for step type transition between two uniform waveguides with surface impedance boundaries, discussing coupled differential equations
08 p1272 A69-20020

Radio wave propagation over smooth cylindrical surface with specified boundary impedance, discussing diffraction loss and effect of surmounted obstacle
08 p1273 A69-20024

VHF radio transmission beyond horizon, discussing instrumentation, annual and diurnal signal fluctuations and diffraction role in signal propagation
08 p1274 A69-20112

VLF wave electromagnetic properties in magnetosphere, noting whistler mode propagation and refractive index and electron density of medium
08 p1306 A69-20180

Galactic H II regions and projected electron density or dispersion measures of pulsars, noting early stars
08 p1397 A69-20696

Coordination distances and interference probabilities to control interference in frequency sharing between communication satellite systems and terrestrial radio services
09 p1450 A69-21280

Satellite-borne terrestrial radiodetermination systems, noting VLF transmissions usage to overcome coverage problem
09 p1537 A69-21287

Daily observational results of solar phenomena, cosmic rays, geomagnetic variations, ionosphere, radio wave propagation and airglow arranged according to solar rotation number
10 p1771 A69-22808

Weakly attenuated components of VLF mode spectrum associated with propagation below anisotropic ionospheres as function of frequency and azimuth
10 p1655 A69-23417

Radio wave propagation in unstable inhomogeneous medium with space-time dispersion, showing adiabatic compression or expansion of wave packet spectrum
10 p1658 A69-23955

Long wave propagation at 164 kHz in India during 1966 and 1967, determining D region recombination coefficient and long wave absorption diurnal variation
10 p1659 A69-24065

Propagated ray paths plotted as functions of frequency and launch angle to predict signal dispersions
11 p1837 A69-25003

Air movement component of winter anomaly effect on radio wave absorption in mesosphere directly detected by rocket sounding
11 p1913 A69-25436

Finsler geometric apparatus applied to electromagnetic wave propagation in media having refractive index varying with position and time, calculating errors
12 p2031 A69-26642

Radio wave propagation in anisotropic inhomogeneous medium, obtaining reflection and conversion coefficients and electromagnetic field distribution
13 p2218 A69-27182

Errors in Appleton-Bayton equation for skip distance of radio waves in ionosphere
13 p2218 A69-27214

Delay time of pulse signals in radio channel transmission described by standard deviation of channel properties
13 p2218 A69-27215

Soviet satellite-borne radio waves studies of ionosphere, considering wave amplitudes, Doppler frequency shifts and outer ionosphere properties
13 p2252 A69-27349

Statistical distributions of refractive index parameters in tropospheric radio propagation from psychrometer soundings, discussing lapse rate
13 p2254 A69-28428

Automatic device for impedances and complex transmission factors measurement at meter and decimeter wavelengths, noting reflection factor
13 p2235 A69-28520

Long range ionospheric propagation of ultrashort radio waves, obtaining diurnal and seasonal characteristics of reflected signals amplitude and duration
13 p2255 A69-28543

Radio waves propagation along polar auroras region, obtaining ionospheric parameters for magnetic disturbances based on penetration probability
14 p2436 A69-29058

Noon ionospheric absorption data for Freiburg on different frequencies for lunar variation of ionospheric absorption of radio waves
14 p2438 A69-29104

Radio propagation in upper atmosphere and ionosphere noting rocket and satellite experiments including plasma physics research, tropospheric studies and space science services
14 p2526 A69-29854

Satellite radio observation for ionospheric parameters, utilizing Doppler and Faraday phenomena, signals fluctuations and sporadic phenomena
15 p2594 A69-30028

VLF radio wave propagation in waveguide channel formed by earth and inhomogeneous anisotropic ionosphere
16 p2751 A69-32032

Second order correction to first order Faraday rotation equation for quasi-transverse propagation of ionospheric radio waves obtained from Appleton-Hartree equation
16 p2777 A69-32101

Ground conductivity effects on MF sky wave transmission strength, discussing transmission over open sea
17 p2918 A69-33029

Scattered ionospheric reflection distribution at evening/morning periods showing deviation, using coherent method
17 p2927 A69-33860

Radio navigation principles, radio waves propagation characteristics and factors affecting navigation systems choice
18 p3169 A69-34848

Polar cap absorption effects on VLF transmission phase and amplitude in tabular form
18 p3103 A69-35185

Near and antipodal fields in earth-ionosphere waveguide using mode theory, ray theory, zonal harmonics series and method of images to derive field representations
19 p3283 A69-35931

Scientific findings from interplanetary spacecraft radio propagation experiments, particularly Mariner 5 data
19 p3267 A69-35940

Radio measurement methods and standards including measurements of attenuation, phase shift, time delay, impedance, field strength, antenna characteristics, RF properties of materials, etc
19 p3276 A69-36426

Magnetospheric disturbances effect on radio wave propagation, discussing wave-particle interactions, VLF emissions and electrostatic waves
19 p3303 A69-36429

Radio wave information transmission, discussing propagation in various media, antenna arrays, diffraction, scattering, plasmas, guided waves and periodic structures
19 p3276 A69-36431

Information theory, circuit optimization and computer aided design in radio wave information transmission
19 p3286 A69-36432

Diurnal and seasonal phase-difference fluctuation measurement of radio waves propagating along ground layer caused by atmospheric turbulence
20 p3485 A69-36971

Ionospheric electron content and concentration variations analysis based on data of radio waves propagating from satellite, considering Doppler shift and Faraday effect
20 p3486 A69-37027

Radio wave propagation in anisotropic plasma consisting of oxygen ions and protons, deriving expressions for radio wave refractive index
20 p3486 A69-37052

Space vehicle electronic attitude measurement method for reference coordinate and fixed coordinate systems based on rectangular coordinates of RF wave propagation directions
20 p3574 A69-37703

Received electromagnetic fields fluctuations due to transhorizon propagation, emphasizing fading-tropospheric turbulence correlation and rapid fluctuations due to small scale index variations
20 p3494 A69-37810

Meteorological parameters-radio propagation characteristics correlation, studying feasibility of data acquisition by occultation satellite system
21 p3705 A69-38374

Sharply bounded homogeneous ionospheric model to solve modal equation, discussing lower ionospheric conductivity from VLF transmission sudden enhancements of strength /SES/
21 p3714 A69-38554

Propagation effects on lane ambiguity resolution ability of Omega VLF navigational system, noting waveguide mode interference
21 p3673 A69-38756

Vertical factor equation numerical solution for radio wave propagation in vertically inhomogeneous troposphere
21 p3674 A69-39121

Ray theory of radio propagation by two variation techniques of phase paths
21 p3675 A69-39279

Split phase PCM code modulated carrier transmission characteristics determined for amplitude, phase and frequency shift keying, assuming random bit pattern and noncoherent modulation
21 p3676 A69-39451

HF backscatter, long delay signals and round-the-world echoes as radio wave propagation modes
23 p4116 A69-41602

Optimum signals for high resolution radar and communication systems, using transmitter waveform design of autocorrelation and cross correlation functions
23 p4132 A69-42545

RADIO TRANSMITTERS

NT IONOSPHERES
NT RADIOMETEOROLOGRAPHS
NT RADIOSONDES
NT RAWINSONDES
NT TRANSMITTER RECEIVERS

RF voltage breakdown in solid state telemetry transmitters on sounding rocket, noting glow discharge initiated by energetic dissociated electrons
02 p0222 A69-12691

Lake Kickapoo Space Surveillance Transmitting Station in Texas, discussing surroundings, equipment, operating range, VHF transmission, etc
03 p0411 A69-13209

AN/TSC-54 military satellite communications terminal for contingency deployment, discussing design, system tradeoffs and performance [AIAA PAPER 68-439]
04 p0579 A69-15367

Earth station system for ground based communications with Intelsats 2 and 3 noting antennas, receivers, transmitters and power supplies
05 p0741 A69-15667

Adaptive airborne VHF/UHF transmitter system, discussing design, ground isolation, current limiting, internal telemetry, wideband frequency response, real time video signals, etc
07 p1106 A69-19114

Miniaturized transmitter for single channel biotelemetric system to transmit electromyograms incorporating thin film components
08 p1265 A69-19836

Miniature telemetry systems for gun launched projectile instrumentation and ejection payloads, noting voltage controlled oscillators, commutators and VHF FM transmitters
10 p1654 A69-23280

Temperature measurement miniature telemetry transmitter
15 p2607 A69-30156

Knife-edge obstacle diffraction of nonisotropic transmitter analyzed via isotropic source model propagation path noting accuracy
17 p2917 A69-32847

Light aircraft emergency downed position indicators installation program, discussing transmitter minimum performance standards, listening watch insurance, etc
17 p2931 A69-34102

Laboratory and flight tests of airborne solid state UHF telemetry transmitter, discussing miniaturized coaxial hardware from RF power conservation viewpoint
19 p3267 A69-35996

Lower ionosphere radiation absorption at 4.01 MHz determined using A-3 method in measuring radio wave field between radio transmitters
20 p3528 A69-37675

Doppler technique for ionospheric electron density measurement by VLF ground based radio transmitter, noting HF method
20 p3542 A69-37792

Balloon-borne transmitter consisting of oscillator, driver and final output and connectable automatic frequency control circuit
21 p3682 A69-39251

Thermal design of missile mounted S band telemetry transmitter package based on temperature control system, using heat-of-fusion characteristics of wax material
22 p3909 A69-39945

S band phased array receiver developed to track automatically moving telemetry transmitter by electronic beam steering
23 p4120 A69-41751

RADIO WAVE REFRACTION

Space diversity reception as applied to radio astronomical investigation of large scale ionospheric inhomogeneities

02 p0237 A69-11665

Pulsar amplitude variations due to scintillation effects arising from irregular plasma refraction by general interstellar medium between source and solar system

05 p0825 A69-16354

Irregularities producing partial radio wave reflection from midlatitude D region attributed to insufficient distribution

07 p1078 A69-18914

Aircraft nose-mounted radome refraction errors influencing on directional tracking and navigation, considering fire control and terrain following radars

07 p1086 A69-19512

Axis deviation and refraction errors to correct design in radome of monopulse antenna, comparing various RF radome performances

07 p1110 A69-19520

Refraction errors in plasma density measurement by microwave interferometry

09 p1496 A69-22031

Radio ray scattering resulting from traversing anisotropically turbulent solar corona, noting refraction effect on signal pulse arrival time

10 p1773 A69-22960

Plasma microwave interferometry error due to refraction and beam displacement at receiving antenna aperture

13 p2312 A69-28113

Microwave propagation in Venusian atmosphere, analyzing refraction angles, attenuation and field strength fluctuations

13 p2223 A69-28567

Space diversity reception as applied to radio astronomical investigation of large scale ionospheric inhomogeneities

13 p2257 A69-28696

Electromagnetic wave diffraction in plasma cylinder of small nonuniform radius, analyzing interior field and radio wave reflection

16 p2751 A69-32031

Horizontally stratified ionosphere radio wave reflection and transmission properties, calculating full wave by differential equations

17 p2927 A69-33862

Radio wave propagation in anisotropic plasma consisting of oxygen ions and protons, deriving expressions for radio wave refractive index

20 p3486 A69-37052

RADIO WAVES

NT COSMIC NOISE
NT DECAMETRIC WAVES
NT EXTRATERRESTRIAL RADIO WAVES
NT GALACTIC RADIO WAVES
NT IONOSPHERIC NOISE
NT LONG WAVE RADIATION
NT MICROWAVES
NT MILLIMETER WAVES
NT SHORT WAVE RADIATION
NT SKY WAVES
NT SOLAR RADIO BURSTS
NT SOLAR RADIO EMISSION
NT SUBMILLIMETER WAVES
NT TYPE 2 BURSTS
NT TYPE 3 BURSTS
NT TYPE 4 BURSTS
NT TYPE 5 BURSTS
NT WHISTLERS

Radio wave abnormal absorption in auroral zone of ionosphere, investigating index of frequency dependence in absorption vs frequency relation

01 p0063 A69-10425

Radio waves incoherent scattering to measure electron concentration profiles at mean latitudes, allowing for collisions

01 p0065 A69-10575

Coherence ratio of ionospherically propagated radio waves measured for phase difference between pairs of antennas

01 p0032 A69-10967

Specular component of ionospherically reflected radio waves between antenna array elements measured for statistical variations

01 p0032 A69-10968

Spectral parameters of VLF radio noise given as functions of azimuth from atmospherics analyzer observations

01 p0033 A69-10971

Lower ionosphere vertical motions found responsible for nighttime variation of radio waves total field strength

02 p0207 A69-11689

Statistical characteristics of magnetoionic components of obliquely incident waves, obtaining envelope distribution of signal reflected from F 2 layer

02 p0314 A69-11691

Fading characteristics of radio waves reflected from two different heights in F region over Ahmedabad, India

03 p0385 A69-12915

Ionospheric midday radio wave absorption as function of geomagnetic latitude, season and solar activity from pulsed vertical radar sounding data

03 p0394 A69-13521

Radio waves diffusive and oblique reflections from F region, noting diffusive properties decrease during magnetic storms, especially during maximum solar activity

03 p0423 A69-13529

Radio wave absorption in ionosphere at five fixed frequencies for determining correlation with changes in sporadic E layer parameters

03 p0423 A69-13539

Radio waves Faraday rotation measured from pulsars by recording difference in received power

03 p0513 A69-13771

Radio waves diffraction around earth with atmospheric dielectric constant having linearly quadratic height dependence

03 p0399 A69-14130

Radio wave diffraction by knife edge obstacle on conducting earth surface noting effect on radio propagation [AFCRL-68-0375]

04 p0560 A69-15216

Random walk theory for effective secondary radiation center produced by reflection from composite reflectors, investigating fluctuations of reflected radio waves

05 p0718 A69-15653

Ionospheric models for studying nature of difference in relationships between HF radio waves Doppler shifts and changing ionosphere

05 p0755 A69-16269

Radio astronomical methods for total atmospheric absorption of radio waves by atmospheric thermal radio emission measurements based on sky brightness temperature

05 p0723 A69-16779

Ionospheric D layer electron concentration profile from radio wave absorption frequency dependence

06 p0920 A69-17729

Radio wave absorption measurements in atmosphere at superhigh frequencies, considering earth radiation, antenna sidelobes anisotropy, instrument effects, etc

07 p1076 A69-18518

Frequency-fluctuation correlation functions of radio wave field behind n random screens with random phase shifts calculated, obtaining statistical characteristics

07 p1076 A69-18525

VLF diurnal phase change observations, showing deviations from theoretical first mode and second mode dominance

07 p1078 A69-18912

Formulas for ray paths in ionized layers with application to oblique ionograms and duct modes

07 p1078 A69-18913

Reflected radio wave amplitude distributions related to distributions of curvature at reflector

07 p1086 A69-19225

Numerical determination of Doppler effect and reduced Doppler frequency difference for two coherent radio waves emitted from earth satellite

07 p1087 A69-19610

Galactic H II regions and projected electron density or dispersion measures of pulsars, noting early stars

08 p1397 A69-20696

Forward and backscattering of radio waves at electron concentration discontinuity near reflecting ionospheric layer with vertical nonuniformity

09 p1453 A69-21525

Ionospheric scattered radio wave field amplitude and phase variations assessed for diffraction at regular phase screen

09 p1453 A69-21526

Radio waves polarization scattered at ionospheric discontinuities analyzed for vertical incidence, determining modulus distributions and polarization factor argument

09 p1453 A69-21527

Amplitude modulated radio wave interaction with rarefied plasma in magnetic field, considering possible ionospheric heating by mechanism

09 p1453 A69-21543

HF ionospheric radar ground scatter map showing separated land-sea backscattered radio waves by Doppler technique

09 p1454 A69-21681

VHF satellite signal scintillation by ionospheric irregularities with sharp boundary /such as sporadic E/, noting diffraction pattern dependence on phase shift

09 p1489 A69-21713

Holographic technique application to radio and sound wave ranges, discussing incoherent holography development to overcome difficulties in image reconstruction of stationary objects

09 p1498 A69-22133

Solar occulting disk diameter at radio wavelengths derived from consideration of slightly deviated rays

09 p1607 A69-22432

Magnetoionic formulas similarity in ionospheric radio propagation and atmospheric acoustic gravity wave propagation above electron gyrofrequency

10 p1655 A69-23419

Vertical probe observations of short radio waves propagation through sporadic E at various frequencies and path lengths

10 p1657 A69-23933

Surface radio wave scattering propagating along rough surfaces, measuring emission during transformation into space waves

10 p1658 A69-23952

Radio wave field distortions by dielectric prisms in lens waveguides, discussing beam transformation, noting both geometrical optics effects and diffraction role

11 p1833 A69-24436

Ionospheric electron content gradients from Faraday rotation observations of radio beacon satellites for direction finding of HF radio waves

11 p1837 A69-25004

Pulsed radio waves for measuring phase height in E region, showing short period fluctuations

12 p2066 A69-26111

E region radio waves triple splitting observed in probe ionograms, analyzing diurnal and seasonal variations in Z component reflections occurrence

12 p2031 A69-26686

Reflection coefficient of polarized radio waves at ionized meteoric trails obtained by numerical integration of differential equations

12 p2031 A69-26691

Horizontally moving body wake scattering cross section calculated with allowance for sphericity of incident and scattered radio waves, using Bessel functions

12 p2031 A69-26699

Differential absorption by measurement of phase difference of ionospherically propagated incoherent radio wave signals under quasi-longitudinal conditions

12 p2032 A69-26857

Horizontal gradients below satellite orbit effect on reduced and minimum difference in Doppler frequency shifts of coherent radio waves from satellite in inhomogeneous ionosphere

13 p2219 A69-27701

Lower ionosphere vertical motions found responsible for nighttime variation of radio waves total field strength

13 p2224 A69-28720

Statistical characteristics of magnetoionic components of obliquely incidence waves, obtaining envelope distribution of signal reflected from F 2 layer

13 p2355 A69-28722

Correlation function of auroral reflection radio signals with allowance for polar ionospheric scattering and pulse signal transmission and reception

14 p2436 A69-29055

Inhomogeneities effect on polarization of radio waves reflected from ionosphere, based on permittivity tensor

14 p2417 A69-29862

Radio waves incoherent scattering to measure electron concentration profiles at mean latitudes, allowing for collisions

15 p2597 A69-30745

Book on ionospheric radio waves covering geomagnetism and sun, whistler propagation, oblique propagation, satellite sounding, etc

16 p2749 A69-31715

Radio wave single scattering at particles randomly grouped in space, showing correlation function of water content fluctuations in scattered field in clouds

16 p2807 A69-32267

Random walk theory for effective secondary radiation center produced by reflection from composite reflectors, investigating fluctuations of reflected radio waves

16 p2754 A69-32510

Forward and backscattering of radio waves at electron concentration discontinuity near reflecting ionospheric layer with vertical nonuniformity

16 p2754 A69-32520

Ionospheric scattered radio wave field amplitude and phase variations assessed for diffraction at regular phase screen
16 p2754 A69-32521

Radio waves polarization scattered at ionospheric discontinuities analyzed for vertical incidence, determining modulus distributions and polarization factor argument
16 p2754 A69-32522

Amplitude modulated radio wave interaction with rarefied plasma in magnetic field, considering possible ionospheric heating by mechanism
16 p2754 A69-32538

Radio waves ionospheric absorption dependence on equivalent frequency, showing marked difference for summer and winter conditions
17 p2918 A69-32927

Radio wave propagation in homogeneous turbulent gyrotropic medium, presenting solution for fluctuations in direction of wave scattering by geometrical optics approximation
17 p2927 A69-33861

Horizontally stratified ionosphere radio wave reflection and transmission properties, calculating full wave by differential equations
17 p2927 A69-33862

LF radio waves propagation in ionosphere by combining ray tracing in complex space with geometrical theory of diffraction, including diffraction by earth
17 p2928 A69-33866

Radio navigation principles, radio waves propagation characteristics and factors affecting navigation systems choice
18 p3169 A69-34848

Ion and temperature effects on lower ionosphere refractive index for VLF radio wave propagation
18 p3102 A69-34971

Nonmetallic materials thickness measurements at SHF, describing factors affecting geometrical-optics method
18 p3138 A69-35116

Radio distance meter design for accurate distance measurement, discussing transit time and advantages over optical meters
18 p3139 A69-35493

Optimum power allocation for RF carrier phase error and synchronization error in two channel system
19 p3274 A69-36283

Ionospheric data of local and integral electron concentration obtained by measuring phase shift of satellite emitted coherent radio waves
20 p3519 A69-37022

Scattering cross sections of radio waves at wake of vertically moving body near reflecting ionospheric layer, noting wave sphericity influence
20 p3486 A69-37023

Radio wave sphericity influence on scattering at moving body wake in ionosphere, determining scattering cross section principal maximum
20 p3486 A69-37024

Perturbed ionospheric regions acting as radio wave focusing lens, discussing frequency, power and pattern selection
20 p3486 A69-37048

Lower ionosphere radiation absorption at 4.01 MHz determined using A-3 method in measuring radio wave field between radio transmitters
20 p3528 A69-37675

Lunar surface scattering properties at 2.5 cm wavelength determined using computerized backscattering diagram and equations for obtaining scattering data
20 p3606 A69-37971

Sudden frequency deviations of HF radio waves propagated through ionosphere correlated with solar microwave bursts and optical flare events
20 p3592 A69-38101

Phase amplitude recording of radio waves reflected from D and F regions of ionosphere, reversing smoothing process by Fourier methods
21 p3672 A69-38558

Observation time influence on interferometers resolution limits due to radio wave phase fluctuations
21 p3682 A69-39122

Planetary atmosphere effect on Fresnel diffraction of ultrashort radio waves determined from short wave approximation of damping function
22 p3901 A69-40948

HF radio waves auroral absorption in ionosphere reviewed for first decade of riometry
22 p3902 A69-41218

Radio and microwaves biological effects, discussing differences between U.S. and Soviet assessments of radiation hazards
23 p4099 A69-42516

Thin film bolometer for monitoring RF radiation of arbitrary polarization and direction of propagation
24 p4311 A69-42572

RADIOACTIVE AGE DETERMINATION

Rubidium, Sr and Sr isotopic composition of normal gray hypersthene chondrite falls, noting Rb/Sr and Sr87/Sr86 ratio determination of Bath Furnace L chondrite isochron
02 p0317 A69-12020

Excess radiogenic argon in deep sea basalts from crest of East Pacific Rise, noting relation to glass content
02 p0244 A69-12568

Stony meteorite Krahenberg, determining isotopic composition, rubidium and strontium age of dark and light portions by neutron activation analysis
05 p0826 A69-16439

Radioactive decay products concentration from extinct radioisotopes in meteorites with estimation of formation interval, discussing fissiogenic xenon and solar system nucleosynthesis
08 p1405 A69-20924

Radiation ages of silicate inclusions in iron meteorites based on Sr evolution diagrams
08 p1405 A69-20927

Meteorites radiogenic and cosmic ray exposure ages, orbits and parent bodies, discussing H and L group chondrites
08 p1405 A69-20928

Kodaikanal iron meteorite measurements for cosmogenic rare gases and K-Ar isotopes ages for glass inclusions
09 p1596 A69-22047

Age of Galaxy from decay of uranium, assuming prompt synthesis
09 p1605 A69-22414

Rb-Sr and other radioactive isotopes cosmochronology in solar system, analyzing age of elements and r process
11 p1955 A69-24393

Freshly fallen meteorites from Portugal and Mexico, determining exposure age and classifying into iron meteorite and carbonaceous chondrite types
12 p2160 A69-26935

Rb 87-Sr 87 age of bronzite chondrites, analyzing olivine bronzite chondrite falls for K, Rb and Sr elemental concentrations
14 p2526 A69-29881

Correction of thermally lowered fission track ages of australites
15 p2696 A69-31140

Ar 39 and Cl 36 production rates and ratios in stone and stony-iron meteorites metal phases, discussing terrestrial age calculation
19 p3411 A69-36100

Radiation ages of bronzite chondrites, amphoterite and hypersthene from cosmic ray activities
19 p3412 A69-36102

Cosmic ray produced Be 10 in iron meteorites for terrestrial age determination, considering Cl 36 and rare gas analysis
19 p3412 A69-36104

K and Ar 40 determination in iron meteorites by neutron activation for K/Ar dating
19 p3412 A69-36106

Calcium-rich achondrites age distribution determined from inert gas measurements and existing data of eucrites, shergottites and howardites
19 p3413 A69-36107

Isotopic age determinations on iron and stone meteorites, discussing Rb-Sr and K-Ar results, internal isochrones, Kodaikanal data and planetary formation
19 p3413 A69-36108

K 40-Ar 40 age measurements in separated mineral phases of chondrites, including production rates of spallation isotopes
19 p3418 A69-36137

Meteoritic cosmic ray exposure time from method based on spallogenic Ar 36/Ar 38 ratio, noting impracticality for exposures longer than 5 million years
19 p3418 A69-36138

Calcium rich achondrites radiation ages determined from measuring He, Ne and Ar in howardites, nakhlites and angrites
20 p3602 A69-37535

Amphoterite /LL/ chondrites Rb-Sr age determination, noting high brecciation
21 p3814 A69-39583

Dirac cosmological principle of nuclear decay compared to Rutherford theory with respect to radioactive ages of terrestrial rocks and meteorites
22 p4017 A69-40176

Hoba meteorite surface radioactive isotope composition measured, finding terrestrial age from Ni-59 activity
22 p4021 A69-40411

K-Ar dates on cores and excess radiogenic Ar in flanges of australites for age determination
23 p4209 A69-41343

Darwin and Macedon impact glasses related to Far Eastern tektites through age determination by fission track technique
23 p4210 A69-41344

Fission track ages of tektites, australites and related glasses, considering errors due to annealing and etch pits
23 p4210 A69-41345

Stellar evolutionary ages and gravitational theory relations based on initial abundance ratio U 235/U 238 and present interstellar medium heavy element content
23 p4219 A69-42329

Rb-Sr isotopic determinations for Olivenza olivine-hypersthene chondrite, noting isotopic ratio vs age
24 p4385 A69-43214

Allende carbonaceous meteorite age determination by thermoluminescence method, assuming internal radioactivity source
24 p4385 A69-43219

Rb-Sr and other radioactive isotopes cosmochronology in solar system, analyzing age of elements and r process
24 p4390 A69-43783

RADIOACTIVE CONTAMINANTS

Computerized autocorrelation function analysis of radioactivity distributions in atmosphere at different altitudes, showing no correlation between values
11 p1945 A69-24320

RADIOACTIVE DECAY

NT NEUTRON EMISSION

Lanthanum isotopes beta decay, analyzing excitation of near spherical daughter nuclei of barium isotopes
01 p0122 A69-10100

Radioactive decay of neutral pions generated in metagalactic cosmic ray interactions as source of high energy isotropic gamma rays observed by OSO-3
02 p0308 A69-12092

Iodine 123 decay via gamma ray emission, noting energies of several transitions
03 p0470 A69-13099

Energy deposits from decay of tritium incorporated into bacteria, using computer simulation for radiation dose distribution
07 p1068 A69-19490

Inactivation of T4 bacteriophage by tritium decay incorporated into DNA and phage protein
07 p1068 A69-19491

Radioactive decay products concentration from extinct radioisotopes in meteorites with estimation of formation interval, discussing fissiogenic xenon and solar system nucleosynthesis
08 p1405 A69-20924

Radiogenic theory of origin of He in natural gas and absence of Ar from K 40 decay, discussing primordial earth atmosphere composition
08 p1311 A69-20947

Gamma ray luminosity of typical type I supernovae remnant computed by assuming Ni 56 radioactive decay energy origin of optical luminosity
09 p1581 A69-22409

Age of Galaxy from decay of uranium, assuming prompt synthesis
09 p1605 A69-22414

Solar system age based on decay rate of natural radioactive elements
11 p1961 A69-24972

Nonmesonic to mesonic decay ratio estimated for delta hydrogen hyperfragments
12 p2133 A69-26298

Low energy positrons in cosmic radiation due to beta decay of carbon, nitrogen and oxygen isotopes, estimating positron fluxes and energy spectra
15 p2676 A69-30887

Low level beta, X and gamma radiation detector incorporating Geiger, proportional and scintillation counting features in various modes suiting radionuclide decay scheme
17 p2975 A69-33747

Beam foil technique to measure energy transition levels radiative lifetime for nitrogen ions
17 p3009 A69-34154

Uranium abundances in several eucrites measured by fission track method, discussing Pu-Xe decay interval question
17 p3044 A69-34167

Mean lives of upper decay levels of lithium isotopes accelerated by electromagnetic isotope separator and directed through thin carbon foil

18 p3177 A69-35012

GaAs laser used as optical sweep generator for display of Cs 133 spectral line shape, studying fluorescence and radiation lifetime

19 p3339 A69-36696

Vertical turbulent diffusion and altitude distribution of radioactivity from short lived radon decay products in atmosphere

20 p3533 A69-38076

Dirac cosmological principle of nuclear decay compared to Rutherford theory with respect to radioactive ages of terrestrial rocks and meteorites

22 p4017 A69-40176

Radioactive decay and conductivity changes with time in high and low resistivity CdS single crystals after irradiation with 14 Mev and reactor fast neutrons

22 p3993 A69-40728

RADIOACTIVE FALLOUT PARTICLES

U FALLOUT
U PARTICLES

RADIOACTIVE ISOTOPES

NT BERYLLIUM 7
NT BERYLLIUM 10
NT CARBON 14
NT COBALT 60
NT KRYPTON 85
NT NITROGEN 16
NT PHOSPHORUS 32
NT PLUTONIUM ISOTOPES
NT PLUTONIUM 238
NT POTASSIUM 40
NT RUBIDIUM 86
NT SODIUM 22
NT STRONTIUM 90
NT TRITIUM
NT XENON 133
NT ZIRCONIUM 95

Tyrosine transaminase activity estimation by radioactive isotopic assay method, discussing application to rat liver and other organs

01 p0014 A69-10902

Preatmospheric meteorite size determination from distribution of radioactive isotopes resulting from nuclear reactions produced by cosmic rays, discussing error sources

01 p0159 A69-11375

Heterodiffusion of metallic impurities in body centered phases of doped zirconium and titanium, determining diffusion coefficients via radioactive isotopes

04 p0613 A69-14557

Critical end-on impact velocities calculated for reentering solid and granular radioisotopic fuel rods with solid and granular earth materials

04 p0630 A69-14800

Lead isotope composition and concentrations of U, Th, Ra, total Pb and Pb 210 in recent volcanic rocks, noting disequilibrium due to chemical fractionations

04 p0593 A69-15011

Radioisotopic propulsion stage design with liquid hydrogen working fluid, stressing tank insulation and hydrostatic flight behavior

05 p0811 A69-15595

Isotopic propulsion engine development problems, emphasizing single channel thermal power engine with hydrogen working fluid

05 p0811 A69-15596

Thorium 228 production and shaping for radiothermal propulsion, discussing transformation from radium 226, irradiated target processing, etc

05 p0791 A69-15597

Aircraft tire wear determination by measuring intensity of radiation originating from point source within thread, using thulium 170 isotope

07 p1143 A69-19703

Chondrite meteorite fall /1969/ in Mexico, noting opaque and microcrystalline matrices and gamma rays from short lived isotopes

08 p1396 A69-20686

Radioactive decay products concentration from extinct radioisotopes in meteorites with estimation of formation interval, discussing fissiogenic xenon and solar system nucleosynthesis

08 p1405 A69-20924

Particulate radioactivity for study of stratospheric motions, demonstrating negligible long time particle settling with comparative measurements of particulate Sr 90 and gaseous C 14

10 p1682 A69-23410

Rb-Sr and other radioactive isotopes cosmochronology in solar system, analyzing age of elements and r process

11 p1955 A69-24393

Vacuum tube with cathode heated directly by external radioisotope source, noting heat pipe providing isothermal heat transfer

11 p1848 A69-24748

Radiation dose and radioactive isotopes induced in astronaut body by cosmic rays of various energies

11 p1831 A69-25463

Space propulsion by radioisotope energy noting thermal heating, thruster configurations, propulsion system, mission capabilities and current thruster technology

11 p1914 A69-25591

Electron microautoradiograph preparation determining trace element amount and distribution by utilizing radioactive isotopes and high resolution of electron micrographs

13 p2263 A69-28168

Primary isotope thermionic electric power module design, considering various assemblies

14 p2398 A69-29190

SNAP 13 generator designs to develop technology for isotope heated thermionic converters, describing tests, efficiencies, power outputs and life times

14 p2481 A69-29191

Radioisotope fueled miniature thermionic converter for fractional watt level operation, defining optimum interaction of variables

14 p2399 A69-29193

Cosmic ray produced radionuclides and rare gas isotopes from Saint-Severin meteorite surface, showing relative Kr spallation mass yields dependence on cosmic ray energy spectra

19 p3410 A69-36093

Cosmic ray produced radionuclides P 32, Cl 36, Ar 37 and Ar 39 determined in separate mineral phases of meteorites, emphasizing ratios in metals

19 p3410 A69-36094

Heat generation in meteorites by radioactive isotopes generated by early solar proton irradiation prior to solar system solidification

19 p3411 A69-36098

Meteoritic trace elements and radionuclides measured by gamma coincidence techniques, emphasizing Mn 53 and Al 26

19 p3412 A69-36103

Spallogenic rare gas concentrations and isotopic ratios in taenite of iron meteorites measured mass spectrometrically and compared with kamacite values

19 p3419 A69-36139

Gamma ray emission of meteorite of 25 April 1969 measured by scintillation spectrometry, attributing peaks to annihilation radiation, Cs 137, Mn 54, etc

20 p3590 A69-37571

Cascaded thermoelectric module for spacecraft power conversion via module integration with radio isotope heat source, bonding SiGe and PbTe stages

20 p3465 A69-37706

NASA lunar receiving laboratory for lunar rock samples examination by gamma ray spectrometry for induced radioactive nuclides and naturally occurring isotopes

20 p3512 A69-38271

Radiocarbon natural production by cosmic ray neutrons, utilizing proportional counters filled with N atmospheres

22 p4003 A69-40095

Hoba meteorite surface radioactive isotope composition measured, finding terrestrial age from Ni-59 activity

22 p4021 A69-40411

Impact origin of Ivory Coast tektites and Bosumtwi Crater indicated by gamma ray spectrometric study of U, Th and K abundance patterns

23 p4210 A69-41347

SNAP 21 radioisotope powered thermionic generator with multiple couple Pb-Sn-telluride/Bi-Sb-telluride flat plate configuration for deep sea applications

23 p4069 A69-42248

Radioisotope thermal energy /RITE/ source for integrated life support systems for two man 180 day space station mission, determining optimum material selection and design details

23 p4189 A69-42268

ISOTEC thermoelectric generators for space power, describing design features, operation, power output and radioisotope heat source

23 p4189 A69-42270

Radioisotope energized Stirling engine for spacecraft auxiliary electric power, discussing system configurations, weight and fuel requirements

23 p4190 A69-42281

Compartmental models for radioactive tracer experiments with known tracer material amount, using

generalized Spearman simultaneous estimation procedure

24 p4339 A69-42765

Rb-Sr and other radioactive isotopes cosmochronology in solar system, analyzing age of elements and r process

24 p4390 A69-43783

RADIOACTIVE MATERIALS

Stationary vertical distribution of weightless radioactive substance in surface air layer, accepting two layer exponent law for vertical turbulent diffusion coefficient

04 p0593 A69-15091

Fuel cells utilizing direct electrochemical conversion of energy of radioactive elements

08 p1269 A69-21054

Radioactive light sources in photoelectric photometry, analyzing characteristics, brightness and stability of light flux and energy spectrum

11 p1951 A69-25421

Depth distribution of primary cosmic radiation fluxes and secondary nuclear-active particles in stone meteorites and surface layer of planets, moon and asteroids

19 p3410 A69-36092

RADIOACTIVE WASTES

Particulate radioactivity for study of stratospheric motions, demonstrating negligible long time particle settling with comparative measurements of particulate Sr 90 and gaseous C 14

10 p1682 A69-23410

RADIOACTIVITY

Radioactivity levels estimation at surface and in bulk of solar system planets caused by galactic and solar cosmic rays

10 p1756 A69-22813

Cosmic ray induced radioactivity in lunar surface and meteorites calculated together with cosmic ray intensity variations

10 p1756 A69-22817

Radiation dose and radioactive isotopes induced in astronaut body by cosmic rays of various energies

11 p1831 A69-25463

Radioactivity induced in solid materials for components microautoradiography and radiograph information quantitative evaluation

13 p2297 A69-28157

Errors due to neutron counter radioactivity in cosmic rays nucleon measurements analyzed in reducing readings to barometric pressure

23 p4206 A69-41855

RADIOBIOLOGY

Cosmic radiation interactions with living viruses, considering X ray effects and optimal radiation dosage for cancer cell destruction

01 p0013 A69-10157

Space radiation biology - NASA Conference, Berkeley, September 1965

03 p0370 A69-13476

Negative pion beams for therapy, radiobiology and dosimetry

03 p0371 A69-13478

Radiation structural and transcription damage to deoxyribonucleic acid /DNA/, noting postirradiation repair on molecular level

03 p0372 A69-13489

Heavy cosmic ray particles effect in manned space flight, noting results of deuteron microbeam experiment

03 p0373 A69-13494

Mammalian radiobiological studies of effects of heavy particles, discussing therapeutically advantageous characteristics

03 p0374 A69-13499

Public health aspects of galactic radiation exposure at supersonic transport altitudes

03 p0375 A69-14072

Proton beams uniformity available at NASA synchrocyclotron designed for radiation biology research by simulating space radiation environment

05 p0742 A69-15992

Radiation hazards during long duration space flights and suitable radiation shield design through radiobiological investigation

08 p1261 A69-19826

Soviet book on space radiobiology, discussing somatic effects, influence of flight factors, relative biological effectiveness of various radiations and radiation safety

11 p1827 A69-24263

Radiobiology of Tradescantia clone orbited in Biosatellite 2, analyzing space effects on spontaneous and radiation induced mutation and cytological changes

15 p2556 A69-31321

Book on radiation research covering molecular radiobiology, radiation chemistry, damage in chlamydomonas, granulopoiesis, oxygen radiobiology, etc
23 p4090 A69-41962

Molecular radiobiology, discussing physicochemical processes caused by energy absorption in targets, leading to inactivation under various circumambient conditions
23 p4090 A69-41963

Radiation effects on population kinetics of granulocyte system forming bone marrow, discussing radiosensitivity and radiation-induced granulocytopenia
23 p4090 A69-41965

Steady state and time dependent concentration gradients in and around cells due to oxygen diffusion and depletion in radiobiology
23 p4090 A69-41966

RADIOCHEMISTRY

Rare earth elements and yttrium in meteoritic chondrites determined by radiochemical neutron activation analysis
08 p1403 A69-20916

Bogou iron meteorite Ni-Cu-Zn contents determined by radiochemical methods
23 p4209 A69-41321

Book on radiation research covering molecular radiobiology, radiation chemistry, damage in chlamydomonas, granulopoiesis, oxygen radiobiology, etc
23 p4090 A69-41962

RADIOGENIC MATERIALS

Excess radiogenic argon in deep sea basalts from crest of East Pacific Rise, noting relation to glass content
02 p0244 A69-12568

RADIOGRAPHY

NT AUTORADIOGRAPHY

Exploding wire phenomenon during early expansion from time correlated X ray and optical streak photographs in vacuum chamber
01 p0119 A69-10670

Beryllium nondestructive tests, discussing eddy current inspection, ultrasonics, film radiography and scintillation [SAE PAPER 680652]
03 p0444 A69-13546

X ray study of biomechanics of respiratory act under long term acceleration stresses
05 p0710 A69-16522

Stereoradiography using holographic techniques to examine internal structure of opaque objects
08 p1313 A69-20178

Neutron radiography facility for production non-destructive testing inspection of aerospace components, noting collimation, neutron/gamma ray ratio optimization and neutron source [AGN-TP-229]
10 p1699 A69-23051

Cineradiography based on repetitive flashes drawn from single field emission X ray tube energized by high voltage pulse generator
12 p2086 A69-26163

Flash radiography technique using tungsten wire explosion in vacuum to obtain ultrafast reproducible X ray pulse
12 p2092 A69-26480

X ray study of biomechanics of respiratory act under long term acceleration stresses
18 p3096 A69-34741

Standard reference radiographs for weld defects on steel sheets and plates
18 p3150 A69-35425

Flash X ray unit with special film transport devices to obtain sequenced dynamic radiographs of ablating models during reentry simulation tests
19 p3291 A69-35720

Nondestructive testing techniques for flaw and defect detection, discussing radiography, ultrasonics, penetrants, thermal and magnetic methods, etc
23 p4169 A69-41529

RADIOISOTOPE BATTERIES

NT SNAP 13
NT SNAP 21
NT SNAP 27

Radioisotope fueled miniature thermionic converter for fractional watt level operation, defining optimum interaction of variables
14 p2399 A69-29193

Lithium doped solar cell irradiation by strontium 90 radioisotope, discussing electron flux rate, spectrum and recovery rates
19 p3251 A69-35693

Nuclear thermal and electrovoltaic batteries design and operation, discussing applications
20 p3464 A69-37288

Gisette 5 thermoelectric radioisotopic generator for submarine use, discussing strontium 90 as isotopic source
21 p3768 A69-38458

Planar radioisotope thermoelectric generator system for NASA deep space missions and integrated spacecraft power supply
23 p4070 A69-42254

Radioisotope thermoelectric generators (RTG)/ design and performance analysis method applied to generators using Si-Ge Air-Vac type thermocouples
23 p4188 A69-42260

Multifuel-capsule radioisotope thermoelectric generator design procedure, applying statistical environment definition
24 p4349 A69-43191

RADIOLOGY

Radiological properties of high energy proton beams from synchrocyclotron in tumor treatment and neurosurgery
03 p0373 A69-13495

Radiology and thermography in nondestructive reliability testing of electronic equipment
15 p2610 A69-30850

Dynamic roentgenology of cervical spine noting ease of use in neutral profile, hyperflexion and hyperextension for aeronautical medicine
23 p4087 A69-41797

Book on radiation research covering molecular radiobiology, radiation chemistry, damage in chlamydomonas, granulopoiesis, oxygen radiobiology, etc
23 p4090 A69-41962

Radiology diagnosis of military jet pilots injuries during ejection and touchdown, discussing fractures, spine injuries and ejection seat spine position
24 p4266 A69-43379

RADIOLYSIS

Electron pulse radiolysis of NO₂, determining absolute yields and rates of formation of nitrogen dioxide and nitrogen trioxide
14 p2410 A69-29928

Low temperature fuel cell with mixed oxidizer and fuel and fuel cell based on water radiolysis under alpha and gamma radiation
16 p2740 A69-32425

Gamma radiolysis of silver nitrate ice forming neutral Ag in magnetically distinct sites, discussing water dipoles rotation and electron paramagnetic resonance
22 p3992 A69-40574

RADIOMETEOROGRAPHS

Meteor station photorecorder of reflected radio signals, discussing design and performance during meteor shower
17 p2976 A69-33898

RADIOMETERS

NT DICKE RADIOMETERS
NT INFRARED DETECTORS
NT INFRARED SCANNERS
NT INFRARED SPECTROMETERS
NT INFRARED SPECTROPHOTOMETERS
NT MICROWAVE RADIOMETERS
NT SPECTRORADIOMETERS

Selective chopper radiometer for remote atmospheric temperature sounding, discussing satellite versions for Nimbus D and Nimbus E [UN PAPER 68-95797]
01 p0080 A69-10531

Thermoelectric radiometer for transient radiant flux short duration pulse measurement, using thermally induced depolarization of polymer film dielectric [AIAA PAPER 68-403]
02 p0250 A69-12392

Radiometric measurement of attenuation, emission and noise fluctuations due to earth atmosphere in 4 cm to 8 mm range
02 p0210 A69-12432

Microcalorimetric measurement of radiation flux of flames of condensed burning material, noting surface temperature distribution
02 p0355 A69-12671

Airborne radiometric /8 to 14 micron/ temperature measurements, determining emissivities of ocean, stratus clouds, desert and snow
04 p0592 A69-14653

Outgoing radiation field based on interpretation of broad sector radiometer measurements made from meteorological earth satellites
04 p0627 A69-15032

Solar and terrestrial thermal radiometer absolute calibration noting standards and methods
04 p0602 A69-15429

Solar radiation protection of radiometers and spectrometers on reentry vehicle by launching times and solar view field selection
04 p0666 A69-15511

Multichannel radiometers calibration and testing for spacecraft and solar simulation applications, noting exposure to sun onboard X-15 aircraft at high altitudes
06 p0926 A69-17620

Wideband superheterodyne tunable radiometers of millimeter wave range using input mixer and high intermediate frequency
07 p1131 A69-18517

Cosmic radio noise intensity measurements by ATS 2 satellite-borne radiometer
07 p1224 A69-19715

High altitude radiant emittance of cirrus clouds and cloudless sky for IR transmissivity based on aircraft measurements
09 p1536 A69-21641

Satellite mounted radiometers for determining albedo variations, using Fredholm equation with allowance for instrument errors
10 p1689 A69-23969

Feed shift beam switch for radiometric measurements of astronomical objects emission at millimeter wavelengths
11 p1836 A69-24996

Thunderstorm thermal noise emission determined by radiometer and steerable parabolic antenna in preparing water content contours along radio rays
12 p2127 A69-27002

Autonomous radiometers signals statistical properties used in space technology, discussing radar signals phenomenological models, measurement errors and energy characteristics
15 p2566 A69-30337

Space radiometers energy characteristics calculation taking into account reflecting surface roughness and antennas directional patterns
15 p2575 A69-30338

Cloud distribution effect on global coverage of remote radiometric sounding of atmosphere, considering Nimbus 1 and 2 data
15 p2650 A69-31335

Solar spectral irradiance measured by airborne instruments, discussing construction, calibration, etc, of photoelectric filter radiometer and Leiss monochromator
16 p2861 A69-32261

Rocket stability monitoring by temporal radiometry, using exhaust radiance measurement to detect frequencies in thrust chamber combustion pressure [AIAA PAPER 69-580]
16 p2839 A69-32670

Broadband thermal radiometer containing InSb electronic bolometer under magnetic field, discussing astronomical applications
17 p2969 A69-32823

Two channel IR radiometer for 1969 Mariner mission measuring equivalent black body surface temperature
17 p2972 A69-33085

Optical instruments optimal design for given requirements, discussing tradeoff studies of airborne reconnaissance scanner, spacecraft rendezvous sensor and track-while-scan radiometers
19 p3310 A69-36065

Radiometric measurement, discussing characteristics and calibration of instruments for measuring radiant intensity or radiance
19 p3311 A69-36071

Detector radiometer design for radio astronomical measurements in 0.7-2 mm range, discussing sensitivity
19 p3285 A69-36877

Satellite mounted radiometers for determining albedo variations, using Fredholm equation with allowance for instrument errors
21 p3717 A69-39655

Solar observations at 21 and 43 cm during solar minimum by grating cross and total power radiometer, giving radio map of solar emission
22 p4001 A69-39988

Radiometer for measurement of cosmic rays at 200-400 km altitudes range by satellites, presenting block diagram of radiation detector units
23 p4165 A69-41732

Radiometer for measuring solar flux variations, discussing design, performance tests and use for spacecraft measurements [AAS PAPER 69-254]
24 p4313 A69-42858

Regression generated radiometric and contour height fields of North American Continent using Nimbus 2 IR equivalent black body temperature and geopotential data
24 p4343 A69-42896

RADIONUCLIDES

U RADIOACTIVE ISOTOPES

RADIOPATHOLOGY

- Pathomorphological aspects of radiation sickness in animals irradiated by high energy protons, showing changes in lymph node, stellate ganglion and spleen
05 p0708 A69-16509
- Pathomorphological aspects of radiation sickness in animals irradiated by high energy protons, showing channels in lymph node, stellate ganglion and spleen
18 p3095 A69-34728

RADIOPROTECTIVE AGENTS

U ANTIRADIATION DRUGS

RADIOSENSITIVITY

U RADIATION TOLERANCE

RADIOSONDES

NT IONOSONDES

NT RAWINSONDES

- Optical ozone radiosonde for vertical distribution analysis, using weak absorption of Chappuis bands
02 p0251 A69-12761
- Vertical distribution of ascending long wave radiation, employing actinometric radio sondes
06 p0953 A69-17990
- Pilot balloon and radiosonde measurements for p as function of wind direction, velocity and stability, discussing variation with air layers
09 p1535 A69-21516
- Transpondersondes for atmospheric measurements, considering ground tracking, radiosondes, rocket-sondes and flight results
10 p1692 A69-23257
- Automatic recording and data processing for ionospheric radiosonde observations from ground stations, giving block diagrams and subsystems
13 p2225 A69-27610
- Irregular data obtained by radiosondes in winter for charts of high isobaric levels, noting stratospheric temperature effects on radiosonde ascent height
14 p2473 A69-29731
- Digital IC radiosonde system, discussing sampling, pulse width modulation, time multiplexing, follow-on subsystems, etc
17 p2937 A69-33675
- Advanced Meteorological Sounding System /AMSS/ for measurements up to 150,000 ft, discussing configuration, characteristics, radiosonde, ranging, telemetry data ground equipment and test
18 p3108 A69-35102

RADIOTHERAPY

U RADIATION THERAPY

RADIUM 226

- Thorium 228 production and shaping for radiothermal propulsion, discussing transformation from radium 226, irradiated target processing, etc
05 p0791 A69-15597

RADIUS

U RADII

RADOME MATERIALS

- Radome material insertion loss measurement by radiometric method noting error analysis
02 p0251 A69-12434
- Radomes developments for supersonic/hypersonic aircraft and missiles, considering conditions imposed by speed and by electronic requirements
07 p1171 A69-19508
- Ceramic radomes for hypervelocity aerospace vehicles, considering wide temperature environment effects on stability and properties
07 p1171 A69-19511
- Radome materials with superior dielectric and temperature characteristics for constructing high tolerance microwave multiband radome
07 p1109 A69-19514
- Glass/resin laminates behavior at high temperature
07 p1136 A69-19515
- Cordierite application to radomes for high velocity engines, discussing dielectric properties at microwave frequencies, mechanical properties, temperature control and fabrication
07 p1168 A69-19525
- Radome design and manufacture, considering airborne requirements, antenna systems and electromagnetic energy, with emphasis on ceramic material melting, forming, grinding and finishing
07 p1142 A69-19526
- Processing techniques for fabrication of ceramic radomes from alumina and silica
07 p1142 A69-19527
- Alumina radomes manufacture by flame spraying process, discussing raw materials quality control, spraying operation, sintering and final inspection
07 p1142 A69-19528

Alumina radomes fabrication and control techniques to assure reproducibility of electrical and mechanical properties, detailing finished product inspection methods
07 p1142 A69-19529

Ceramic radome materials resistance to rain erosion at high Mach numbers
07 p1171 A69-19532

Radome materials design and performance for guided weapons systems, describing research conducted in UK
07 p1112 A69-19540

Dielectric constant and loss angles measurement in Ku band used for onboard radars
07 p1112 A69-19544

High temperature polyimide laminates for radomes and other supersonic aircraft components, discussing index flexural strength, dielectric constant and dissipation factor
07 p1171 A69-19545

Long term weather and radar transmission effects on three ply fabric cloth fire-retardant polyester resin radome panel
08 p1414 A69-20485

Polymeric polyurethane protective coatings for radar radome covers with improvement in service life, discussing performance properties and production method
24 p4338 A69-43456

RADOMES

Multifrequency three layer sandwich radomes design for reflectionless sandwich at second frequency
01 p0034 A69-11037

Dielectric sheath effect on far zone radiation characteristics of aperture bounded by perfectly conducting ground plane
04 p0579 A69-15450

Radomes developments for supersonic/hypersonic aircraft and missiles, considering conditions imposed by speed and by electronic requirements
07 p1171 A69-19508

Radomes design and manufacture for high speed flight vehicles, discussing interactions between aerodynamic and electrical requirements with reference to mechanism of aberration
07 p1141 A69-19510

Aircraft nose-mounted radome refraction errors influence on directional tracking and navigation, considering fire control and terrain following radars
07 p1086 A69-19512

Integrated radome antenna system design /radant/, comparing electrical performance with conventional systems
07 p1109 A69-19513

Measurement bases in general, discussing theoretical data justifying ground level base and measurements results
07 p1136 A69-19516

Closed loop and electronically calibrated radome measurement systems for beam deflection, boresight shift and transmission loss measurements
07 p1109 A69-19517

Radome performance dependence on dielectric permittivity determined by digital program and simple design criterion
07 p1110 A69-19519

Axis deviation and refraction errors to correct design in radome of monopulse antenna, comparing various RF radome performances
07 p1110 A69-19520

Radome induced distortions of radioelectric axis analyzed by sectional phase analysis
07 p1110 A69-19521

Symmetrical three layer A and B type sandwich reflectionless radomes design for multifrequency operation and insertion phase delay
07 p1110 A69-19522

Dielectric radome designs for operation at harmonically unrelated frequencies in C and K bands, discussing sandwich structure of A and B types
07 p1110 A69-19523

Radioelectric axis deviation of radome in front of monopulse radar antenna
07 p1111 A69-19524

Alumina radomes manufacture by flame spraying process, discussing raw materials quality control, spraying operation, sintering and final inspection
07 p1142 A69-19528

Alumina radomes fabrication and control techniques to assure reproducibility of electrical and mechanical properties, detailing finished product inspection methods
07 p1142 A69-19529

Aberration of dielectric patches and rings attached to radome surface described by insertion phase
07 p1111 A69-19530

Statistical radomes design, analyzing dielectric constant and wall thickness tolerances effects on amplitude and phase of transmitted wave
07 p1111 A69-19531

Water effect on air supported radome of ground station for satellite communication
07 p1111 A69-19533

Aircraft radomes lightning protection, discussing evaluation by experimental methods and simulation
07 p1142 A69-19535

Boresight error in missile radome-antenna combination due to reflection and surface wave effects
07 p1111 A69-19536

Paper-honeycomb sandwich radome structure for protecting monopulse UHF radar antennas used in BMEWS
07 p1111 A69-19537

Spherical sandwich radomes designs, discussing aerodynamic loads, wind pressure effect, electrical properties and mountings
07 p1112 A69-19538

Radiation pattern deformation due to sharp angle radome studied by analyzing diffraction in antenna dihedral system
07 p1112 A69-19539

Wind tunnel investigation of damage to aircraft radomes by water droplet encounter during cloud passage and gaseous molecule friction in air
07 p1054 A69-19541

Radome axis error due to phase /dielectrics/ and metallic obstacles
07 p1112 A69-19542

Radiation pattern solved for antenna enclosed in radome, deriving exact formulas for scalar field
07 p1112 A69-19543

Airborne radomes reliability and high temperature environments, discussing missile nose cones, light weight ceramic techniques, circular polarization, etc
17 p2942 A69-34084

Antenna losses produced by metal space frame radome determined by considering end effects, member junctions circulating currents, mutual scattering and near field effects
23 p4149 A69-42127

High sensitivity communication system design consisting of radome enclosed steerable antenna, 500 kw transmitter and microwave configuration compatible with low noise receivers
23 p4149 A69-42131

Metal space frame radome design, considering electromagnetic performance, structural integrity, cost, membrane structures stability, etc
23 p4231 A69-42139

Space frame radome shell structural stability with emphasis on analogous continua for reticulated framework, examining connection imperfections effect on stiffness
23 p4232 A69-42140

Large deflection of three dimensional bar structures stability analyzed by potential energy minimization method, considering radome design
23 p4232 A69-42141

Space frame radome model elastic buckling tests for load deflection and maximum load predictions, considering individual beam failure and complex instability
23 p4232 A69-42143

RADON

Atmospheric diffusion measurement based on analysis of thoron emitted continuously from point source, permitting study of diffusion in atmospheric boundary layer
01 p0144 A69-10043

Turbulent parameter and turbulent diffusion vertical profile diurnal variations determination based on measurements of Rn 220 and thorium-B concentrations near ground
03 p0459 A69-13273

Turbulent parameter and turbulent diffusion vertical profile diurnal variations determination based on measurements of Rn 220 and thorium-B concentrations near ground
14 p2472 A69-28781

Vertical turbulent diffusion and altitude distribution of radioactivity from short lived radon decay products in atmosphere
20 p3533 A69-38076

RAFTS

U LIFE RAFTS

RAIL TRANSPORTATION

Mass transit rail service between Manhattan and Kennedy Airport using Long Island Railroad mainline route, discussing baggage handling and time schedules [AIAA PAPER 69-803] 19 p3453 A69-35596

Intercity air transportation compared with automobile and train travel, attributing air travel dead time to ground route and airspace congestion 24 p4416 A69-42561

RAIN

Graphical data on atmospheric and rainfall attenuation of spacecraft earth signal, emphasizing transmission via satellites 03 p0397 A69-13727

Teichmann cost analysis extended to include frequency dependent and diversity dependent rain losses for satellite communication, using Bayes strategy 05 p0721 A69-16580

Rain repellent system providing transparent film on aircraft windshield surface 06 p0877 A69-16954

Antenna noise temperature at earth station due to rain on radomes, solar and cosmic noise, noting SNR degradation 09 p1461 A69-21283

Millimeter and submillimeter radio waves attenuation in rain, showing effective loss cross section as function of raindrop diameter and wavelength 10 p1657 A69-23943

Attenuation statistics due to rain measured on earth-space path at 16 and 30 GHz, using sun as signal source 17 p2920 A69-33398

RAIN EROSION

U WATER EROSION

RAIN IMPACT DAMAGE

Ceramic radome materials resistance to rain erosion at high Mach numbers 07 p1171 A69-19532

Water effect on air supported radome of ground station for satellite communication 07 p1111 A69-19533

Wind tunnel investigation of damage to aircraft radomes by water droplet encounter during cloud passage and gaseous molecule friction in air 07 p1054 A69-19541

Cumulative damage concept for rain erosion of solid materials, noting incubation period and similarity to microscopic damage in fatigue failure 12 p2187 A69-26848

Solid materials erosion rate as function of cumulative damage generated by liquid droplets impingement 16 p2794 A69-31904

Rain erosion problems in aircraft design, reviewing protective measures for all-weather aircraft 21 p3646 A69-38393

RAINDROPS

Raindrop size distribution law effect on radio wave attenuation coefficient and differential effective backscattering cross section of rain 02 p0208 A69-12259

Electromagnetic waves attenuation and scattering by rainfalls calculated using droplet distribution function 08 p1275 A69-20430

Cloud and fog droplet spectra due to condensation of water vapor on nuclei solved by partial differential equation 12 p2126 A69-26017

Cumulative damage concept for rain erosion of solid materials, noting incubation period and similarity to microscopic damage in fatigue failure 12 p2187 A69-26848

Vertical air velocity in rain measured for size distribution of drops, using relation between drop fall rate and diameter 18 p3104 A69-35342

Sulfur dioxide, nitrogen dioxide and Aitken nuclei washout by artificial rain of known intensity and droplet size distribution 24 p4345 A69-43146

RAINSTORMS

U THUNDERSTORMS

RAMAN SPECTRA

Emission and frequency shift angles of antiStokes radiation from trapped filaments of laser light in liquids 01 p0114 A69-10012

Raman spectra and temperature dependent nuclear quadrupole resonance frequencies of p-dichlorobenzene and p-dichlorobenzene-D, calculating librational amplitudes 01 p0122 A69-10286

IR and Raman spectra of solid and matrix isolated methylamine and deuterium derivatives, locating amine twisting vibration in solid phase IR spectra 01 p0023 A69-10287

Electric field induced IR absorption and Raman scattering by optical phonons in centrosymmetric crystals, discussing tensor coefficients 02 p0295 A69-11779

Polarized low temperature laser excited Raman spectra of thulium gallium garnet 02 p0256 A69-11925

Far IR and Raman spectra of ethylene carbonate, gamma butyrolactone and cyclopentanone, noting consistency with hindered pseudorotation 02 p0206 A69-12723

Raman effect in liquid glycerol obtained with 4880 A ionized argon laser, determining valence vibrational frequencies 03 p0440 A69-13366

Sinusoidal phase modulation role in spectral broadening observed in trapped filaments of laser and Raman light 03 p0442 A69-14189

Tsao-Curnutte line broadening calculations extended to include Raman scattering and quadrupole absorption 04 p0633 A69-15231

Tunable Raman upconverter as coherent light generator, using Q switched Nd-YAG laser beam [IEEE PAPER B-2] 05 p0774 A69-16309

Nonstationary nonlinear wave phenomena in ultrashort high intensity light pulse formation, discussing nonstationary stimulated Raman scattering and picosecond pump reduction of Raman amplification [IEEE PAPER H-5] 05 p0774 A69-16316

Spontaneous Raman band shapes and depolarization ratios in liquid nitrogen and oxygen measured and compared to gas, discussing time dependence of rotational motion 06 p0962 A69-17817

Raman spectra of optical phonons in semiconductors, using reflection techniques and Ar laser excitation 06 p0936 A69-17882

Optical excitation process of energy states by light pulses of short duration compared to relaxation time, predicting Raman echoes [IEEE PAPER H-3] 07 p1152 A69-19062

Spontaneous and stimulated Raman emission in liquids, obtaining picosecond pulse duration and laser light linewidth [IEEE PAPER H-6] 07 p1152 A69-19063

Quantum mechanical, dipole approximation, non-resonance light scattering cross sections expressed in terms of oscillator strengths and refractive indices 07 p1183 A69-19645

Raman microwave scattering with low frequency oscillations caused by plasma drift instabilities 09 p1550 A69-22021

Rotational Raman scattering in planetary atmospheres, analyzing spectra of deep solar Fraunhofer lines 09 p1601 A69-22207

Coherent radiation brightness increased from liquid N Raman laser, using off-axial pumping 09 p1520 A69-22533

IR and Raman spectra of gas and liquid phase methylhydrazine and deuterated methylhydrazines, discussing vibrational motions, H bonding and thermodynamic functions 10 p1752 A69-23528

Raman effect in potassium dichromate single crystal, discussing symmetrical and antisymmetrical internal vibrations of free ions 12 p2105 A69-26285

Standing wave theory for steady state performance of Raman laser oscillator extended for time variation of exciting laser pulse 12 p2108 A69-26634

Libroelastic wave propagation and dispersion characteristics /solid carbon dioxide/ evaluated by using Raman scattering measurements 13 p2286 A69-28668

Single crystals garnets Raman spectra using laser radiation, separating phonon spectra of host lattices from electronic Raman effect 14 p2507 A69-29334

Propylene imine IR and Raman spectra, calculating thermodynamic functions based on rigid rotator harmonic oscillator model 14 p2410 A69-29922

Incident electromagnetic waves Raman scattering at turbulent plasma oscillations, obtaining plasma intrinsic radiation spectrum 15 p2659 A69-30728

Raman scattering by coupled plasmon-cyclotron-harmonic modes in semiconducting plasmas in homogeneous static magnetic field 16 p2824 A69-32604

Pumping model for analyzing stimulated and enhanced potassium multiphoton emission primed by ruby laser-stimulated Raman electronic radiation 23 p4171 A69-41391

Raman spectrum of solid alpha-nitrogen at low temperatures, calculating scattering intensities and Raman active librational lattice vibrations 23 p4194 A69-42204

Raman spectra analysis of solid carbon dioxide, nitrous oxide, nitrogen and CO, determining lattice mode intensities from oriented gas model 23 p4194 A69-42205

Raman scattering during external and internal motion of oxygen molecules condensed phases, observing gamma and liquid phase bandwidths during stretching vibrations 24 p4353 A69-43808

RAMJET ENGINES

NT PULSEJET ENGINES

NT SUPERSONIC COMBUSTION RAMJET ENGINES

Air jet high temperature and low pressure influence on combustion stability in ramjet engine 03 p0531 A69-12968

Stimulated radiative recombination process for ramjet propulsion, investigating delay chamber required for vibration-to-translation conversion 06 p0984 A69-17630

Advanced propulsion systems propulsive capabilities in connection with interstellar flights, considering rocket and ramjet propulsion, energy requirements and stellar plasma 06 p0984 A69-17631

Optimum fixed geometry ramjet in Mach range of 3 to 7 with successively subsonic and supersonic combustion [ONERA-TP-656E] 07 p1203 A69-18415

Air intakes for fixed exhaust throat hypersonic ramjet engines, discussing configuration dependence on Mach number at beginning of combustion [ONERA-TP-658] 07 p1203 A69-18418

External burning ramjets in supersonic stream noting applications to drag reduction, lift-drag ratio and attitude control 11 p1941 A69-24261

Ramjets and air augmented rockets as propulsion systems for supersonic atmospheric flight, noting inlet design, combustors and nozzles 11 p1943 A69-25586

Fluidic systems for automatic control of fuel supply to ramjet engine combustor, coolant rationing and distribution to engine structure and performance efficiency maintenance 14 p2508 A69-28875

Trailing shock wave position in air breathing jet engine channels, determining supersonic-subsonic boundary, noting Mach number effects on pressure ratio 16 p2768 A69-31743

Nitrogen reaction with excess fuel in ramjet engines, noting kinetic limitations in applications [WSCJ PAPER 69-12] 16 p2831 A69-32351

Collection of articles on ramjets including reaction propulsion, hypersonic inlets, combustion problems, Griffon aircraft, storable liquid fuels, etc 16 p2837 A69-32608

Integrated propulsion control system for ramjet Hypersonic Research Engine to operate at 3-8 Mach numbers [AIAA PAPER 69-546] 16 p2845 A69-32744

Flight velocity changes from sonic to supersonic through turbojet/ramjet combination possibility 17 p3020 A69-33348

RAMPS [STRUCTURES]

M 3.5 two dimensional mixed compression inlet system with self restart using flexible variable ramp system [AIAA PAPER 69-447] 16 p2845 A69-32732

RAMS (PUMPS)

Ram recovery of flush intake for air cushion vehicles noting influence of intake geometry, placement and incidence angle 01 p0005 A69-10026

RAMSAUER EFFECT

Collision induced instability of partially ionized gases having large Ramsauer effect in external magnetic field, analyzing nonlinear characteristics 05 p0804 A69-16441

Ratios of gas kinetic electron-atom collision integrals of Ramsauer for Ar 06 p0963 A69-17822

RANDOM ACCESS MEMORY

U CORE STORAGE

RANDOM DISTRIBUTIONS

U STATISTICAL DISTRIBUTIONS

RANDOM ERRORS

Atmospheric temperature profiles by regularizing algorithm, discussing influence of random errors in measured radiation and kernel of integral equation on interpretation accuracy

02 p0274 A69-11448

Probable errors in FK4 catalog of star positions and proper motions determined by Scott method

05 p0823 A69-16041

Statistical aspects of uncertainty function of linearly frequency modulated signals for nonstationary random process of phase errors

06 p0889 A69-17798

Antenna arrays subject to random excitation error analyzed by probability theory, noting relationship between antenna pattern and excitation distribution parameters

21 p3681 A69-38742

Statistical analysis of random production errors on phasing section polarization field of antenna with elliptical polarization

23 p4125 A69-42041

Algorithm for constructing random error correcting convolutional codes

24 p4284 A69-42723

RANDOM LOADS

NT GUST LOADS

Gyroscope with rotational symmetry subjected to random input torques analyzed by Euler equation of motion

01 p0079 A69-10236

Power spectral density method of random loads analysis applied to V-STOL aircraft structural analysis, discussing statistical distribution

01 p0168 A69-10407

Dynamic stability of structural system excited by random load, discussing effect of nonlinearities and dynamic snapping problems

02 p0339 A69-11988

Nonlinear oscillatory systems with constant delay under random forces action, noting use of stochastic difference-differential equations

03 p0468 A69-13866

Skin panel stresses for random acoustic loading, determining aircraft structure responses

03 p0530 A69-14092

Vibration response of thin elastic plates to random loads

05 p0844 A69-16741

Structural fatigue life evaluation as cumulative damage analysis for irregularly varying loads [DVL-780]

10 p1802 A69-24020

Structure dynamic response for motion through homogeneous frozen random load field with spacewise variations, applying analysis method to beam [ASME PAPER 69-VIBR-38]

10 p1807 A69-24176

Random periodic forces effect on single frequency oscillations of nonlinear nonautonomous system with distributed parameters, discussing perturbed boundary value problem

11 p1916 A69-24761

Liapunov type analysis of linear structural dynamic system excited by stochastic parametric load, discussing radially loaded thin circular plates

11 p1990 A69-25507

Structural fatigue-inducing random load spectrum analyzed and computed for laboratory simulation

15 p2705 A69-30363

Time dependence of maximum structural response of single degree of freedom mechanical system under random loading

15 p2705 A69-30365

Engineering models for wearout reliability prediction in dynamical systems subject to random loading, demonstrating practical and statistical methods

15 p2705 A69-30366

Fatigue life estimation for irregularly varying loads with emphasis on ground-air-ground stress cycles in aircraft

17 p3052 A69-32977

Linear aerospace structures vibrations in randomly distributed pressure field forecasted by applying Green function [ONERA-TP-703]

17 p3054 A69-33064

Damped vibrations of elastic open cylindrical shell under arbitrary loading, obtaining mean square of bending from correlation theory

17 p3054 A69-33094

Strength margins for combined random stresses, discussing average crossing frequency of curve by Gaussian stationary random vector with correlation coefficients included

17 p3066 A69-34038

Statistical characteristics stabilization of random loads in fatigue tests, noting transfer function of testing machine and spring stiffness

18 p3215 A69-34544

Fatigue life testing apparatus with computerized simulation of random load maxima and minima, describing rotating bend test application

19 p3434 A69-35777

Structural design for minimum weight under random loads representing steady vector random function

21 p3731 A69-38870

Weighting function of statistically optimal automatic dynamic system generating stochastic loads, using Fredholm equations

21 p3688 A69-39861

Small curvature effect on prevention of vibration in shallow shells under random loading numerically analyzed for component modes using linear theory

22 p4044 A69-40600

Optimal generalized controls for systems under random forces described by hyperbolic partial differential equation system

23 p4144 A69-41957

RANDOM NOISE

Reliability of binary message in Gaussian noise impaired by amplitude limiting in case of evaluation by integration

01 p0031 A69-10736

Reliability of eliminating multivaluedness in two scale phase measurement method resolved by algorithm formulated on white Gaussian noise interference

02 p0206 A69-11603

Optimal calculator of detection of Gaussian random signal against Gaussian noise background by reducing input signal to white noise

02 p0206 A69-11606

Voltage probability density of wideband microwave noise, discussing measurement technique of dividing spectrum down by noise bandwidth

02 p0211 A69-12460

Electrically small beamed receiving arrays in HF band and random noise

03 p0398 A69-13904

Stability of stochastic systems, discussing continuous parameter models, Gaussian white noise, stabilization of unstable deterministic system and ITO equations

04 p0623 A69-14695

Correlation function and spectrum analysis of passage of random noise and signal through multistage frequency multiplier

04 p0557 A69-14777

Gaussian channels capacity, studying supremum of information transmission rates with small error probability

04 p0558 A69-15006

Steady state response of inertialess discrete multivariable extremal system with noise, noting stepwise search systems

04 p0583 A69-15139

First and second passage times of stationary random process consisting of sinusoidal signal with stationary Gaussian noise

04 p0561 A69-15453

Detection characteristics of coherent pulse packet with random initial phase on Gaussian noise background of unknown intensity

06 p0887 A69-17463

Energy fluxes statistical distribution produced by random and regular energy sources

07 p1076 A69-18510

Optimum and suboptimum detection of K binary symbols corrupted by white Gaussian noise, discussing searching procedure and average error probability

07 p1081 A69-19097

Thermal noise and other disturbances from mismatched two port isolator in low power microwave transmission antenna noise between generators and loads

07 p1108 A69-19486

Recursive method for estimating number, amplitudes and time delays of signals overlapping in time and in presence of additive white Gaussian noise

08 p1270 A69-19854

Approximate noise analysis of phase locked loop with signal clipping

08 p1270 A69-19857

Signal to noise ratio with stochastic and additive noise and signal, showing block diagram of modified estimator

09 p1452 A69-21320

Constant amplitude in-band additive interference for analysis of PSK signals in Gaussian noise, discussing coherent and differential detection

09 p1455 A69-21848

Single degree of freedom mechanical system under random excitation studied for creep effect on vibrations by harmonic analysis

09 p1617 A69-22095

Optimal receiving circuit determined for elliptically polarized signals in randomly polarized noise by deriving integral equation

09 p1456 A69-22285

Optimal detection of determinate signal and signal with random amplitude and phase, estimating probability of false and correct detection

09 p1456 A69-22286

Sporadic noise, false fronts and other noise effects on phase of output oscillations of resonance apparatus

09 p1460 A69-22641

Reliability of eliminating multivaluedness in two scale phase measurement method resolved by algorithm formulated on white Gaussian noise interference

11 p1835 A69-24710

Optimal calculator of detection of Gaussian random signal against Gaussian noise background by reducing input signal to white noise

11 p1835 A69-24713

Energy gain during diversity reception in presence of random noise calculated, considering signal and noise amplitudes Rayleigh fluctuations

11 p1835 A69-24968

Analytical method for optimum switching function of relay servosystem subjected to stationary Gaussian random noise, considering perturbation and dynamic programming

11 p1859 A69-25025

First excursion failure survival probability of randomly excited structures, considering single degree of freedom linear oscillator under Gaussian white noise

11 p1990 A69-25505

Optimal scale factor selection to ensure minimum error variance in signal detection against random noise background for input limited range of measuring instrument

12 p2079 A69-25966

Optimum nonstationary Gaussian signals estimation in presence of noise, generalizing Wiener stationary processes filtering theory

12 p2029 A69-26202

Detection of known signals in general noise, describing sufficient conditions for singular detection and estimation

12 p2029 A69-26203

Nondeterministic differential games with imperfect state information, emphasizing linear system with quadratic cost functional and additive white Gaussian noise

12 p2053 A69-26505

Pull-in oscillator for random noise coincident with synchronizing and frequency shift signals, discussing circuit parameters effect on signal discrimination and noise suppression

12 p2044 A69-27101

Nonlinear systems disturbed by random white noise analyzed by Fokker-Planck equation for probability density in state space

12 p2124 A69-27141

Received signal phase angle error probability in coherent PSK system in Gaussian noise and interference

13 p2219 A69-27665

Rms error for reproduction of satellite signal transmitted through continuous Gaussian channel assessed by numerical calculation

13 p2219 A69-27697

Energy detection of random processes in colored Gaussian noise, discussing filtering, threshold detection, false alarm, probability distribution and density

13 p2220 A69-27937

Signal to noise ratio at output of three stage radio section with preselector, detector and ideal integrator, noting error

13 p2222 A69-28506

Algorithm for optimal digital processing of pulse signals during multilevel quantization in Markov noise, including error analysis

15 p2571 A69-30126

- False alarm stabilization circuits efficiencies compared in unsteady Gaussian noise, considering phase autocorrelator performance
15 p2567 A69-30342
- Unknown channels classes epsilon capacity applied to estimating capacity of channels with additive noise, discussing models and upper and lower bounds
15 p2570 A69-31142
- Book on statistical theory of signal detection and resolution in random noise covering hypothesis testing, digital communications, stochastic signals, filters, etc
16 p2748 A69-31566
- Fokker-Planck equation applied to probability density for finding rays larger than correlation distance during propagation in random medium
17 p2926 A69-33854
- Relationship between human response to noise and physical parameter, discussing controlled laboratory investigation to determine duration effect on annoyance
18 p3097 A69-34324
- Mechanical single degree of freedom system mean square response to AM random noise, considering frequency response, input excitation spectrum, etc [ASME PAPER 69-APM-25]
18 p3214 A69-34398
- Random excitations effects on vibrating nonlinear single degree of freedom system, statistically estimating resonance mode probability
18 p3171 A69-34554
- False signals formation during random pulse noise in single command channels with PTM coding, noting code value and redundancy
19 p3278 A69-36595
- Optical information rates for photocount detection systems based on coherent field model, considering binary channels with or without Gaussian noise
20 p3485 A69-36923
- Synthetic aperture terrain imaging radar system optimal design, considering noise-free and random noise conditions using least squares method and signal to noise ratios
20 p3489 A69-37639
- Detection characteristics of coherent pulse packet with random initial phase on Gaussian noise background of unknown intensity
20 p3496 A69-37946
- Satellite orbit determination errors attributed to Gaussian noise effect on tracking measurements, assuming known Gaussian probability error distribution [AIAA PAPER 69-911]
21 p3807 A69-39343
- Error probability of Gaussian signal detector in Gaussian noise background determined from quadratic form of probability distribution density
22 p3901 A69-40955
- Empirical determination of equivalent frequency characteristics of nonlinear system in random noise, assessing measurement errors
24 p4289 A69-42950
- Suboptimal closed loop controller for linear time varying process subject to additive random disturbances and measurement noises
24 p4292 A69-43285
- Linear-quadratic pursuit-evasion game with dynamics perturbed by additive white Gaussian noise, obtaining linear minimax solutions
24 p4341 A69-43296
- ### RANDOM NUMBERS
- Pseudorandom uniformly distributed numbers generation from noise-like signals produced by shift register with feedback, noting statistical tests
13 p2218 A69-27248
- Homogeneous Markovian sum of sequence of random quantities series, deriving limiting theorem for sum density
21 p3757 A69-39538
- ### RANDOM PROCESSES
- Continuous random process spectral density at PAM system output
01 p0050 A69-10211
- Linear random processes including law of large numbers, covariance estimation and linear to normal process relationship
01 p0029 A69-10555
- Variational law of control elements for automatic control systems with parameters subject to random changes
01 p0052 A69-10800
- Analytical expressions for transfer function matrices of four terminal signal shaping networks, assuming rational matrix spectral density of randomly polarized signal
01 p0031 A69-10880
- Euler-Lagrange relationship from equations of motion of tagged particle in turbulent velocity field consisting of random dispersive waves
01 p0121 A69-11202
- Narrow band normal steady state random processes applied to signal dispersion by extended oscillating body, obtaining statistical characteristics
02 p0206 A69-11602
- Model for fast randomization of electron gas by trapped electroacoustical waves
02 p0289 A69-12236
- Statistical characteristics of random phase quasi-harmonic process investigated for application of mathematical representation
02 p0208 A69-12263
- Mean square amplitude and phase fluctuations for propagation of light beam with Gaussian amplitude distribution through medium with randomly varying refractivity
02 p0208 A69-12308
- Book on applications of information theory to dynamical systems with random initial conditions and cybernetic systems consisting of communication systems with feedback
04 p0580 A69-14520
- Cross correlation function for two sequences of pulses arbitrarily distributed in time, noting noise stability of diversity reception systems
04 p0557 A69-14790
- Random cumulative damage theory for fatigue failure of steel under sinusoidal loading taking into account randomness of time to failure and possession of memory
04 p0680 A69-15154
- First and second passage times of stationary random process consisting of sinusoidal signal with stationary Gaussian noise
04 p0561 A69-15453
- Random motion of particle with nonlinear damping, obtaining velocity spectrum by solving associated nonstationary Fokker-Planck equation and using equivalent linearization technique
04 p0561 A69-15454
- Random walk theory for effective secondary radiation center produced by reflection from composite reflectors, investigating fluctuations of reflected radio waves
05 p0718 A69-15653
- Random processes study by special integral calculus containing deltas and theorems, with application to stationary processes
05 p0718 A69-15881
- Stability of differential systems with random parameters, developing Liapunov function approach and application to Ito equation
05 p0788 A69-16484
- Response of single and multidegree of freedom systems to nonstationary random excitation, analyzing spectral density function of pressure field close to jet engine
05 p0844 A69-16763
- Quasi-random properties of dynamic system generated by solutions of second order differential equations
06 p0948 A69-17657
- Turbulent boundary layer loading function for use with finite element structural analysis system applied to elastic aircraft structures random vibration [AIAA PAPER 69-20]
06 p0914 A69-18132
- Random filters and stabilization of periodic signals mixed with noise, establishing second order statistics at output
07 p1089 A69-18281
- Frequency-fluctuation correlation functions of radio wave field behind n random screens with random phase shifts calculated, obtaining statistical characteristics
07 p1076 A69-18525
- Particle motion, deriving Lagrangian formalism equivalent to Schrodinger equation for random motion theory
07 p1182 A69-19455
- Multiloop control plant described by Jacobian transfer matrix to control spectral characteristics of random processes
08 p1296 A69-20233
- Heating of collisionless plasma in magnetic mirror by random electric field transverse to magnetic field
08 p1368 A69-20805
- Fast electron diffusion in stochastic magnetic field, obtaining diffusion coefficient as function of ratio of correlation time to Larmor period
08 p1368 A69-20807
- One dimensional distribution law of random process with arbitrary correlation function, verifying normality hypotheses by integral criterion
08 p1299 A69-21069
- Upper bound obtained for probability of zero Gaussian random process remaining above specified signal throughout prescribed interval of time
09 p1452 A69-21319
- Smoothing data stability by least squares method, noting applicability to computer processing at random sequences
09 p1532 A69-21754
- Optimum number of terms in approximation of realizations of random process by polynomials
09 p1475 A69-22667
- Reliability function for electronic device during initial period of operation, based on use of lower bound
10 p1662 A69-23318
- Boundary value problem for elliptic-parabolic partial differential equations in theory of random processes, obtaining analytical solution in terms of hypergeometric functions
10 p1719 A69-23516
- Homogeneous turbulence in incompressible fluid, expanding field variable on ideal random basis
11 p1867 A69-24282
- Analog signal transmission through randomly fading channels, proposing pseudorandom phase reversals method for slowly varying multipath communication channels
11 p1834 A69-24552
- Narrow band normal steady state random processes applied to signal dispersion by extended oscillating body, obtaining statistical characteristics
11 p1835 A69-24709
- Confidence limits determined for damping parameter of complex stationary Gaussian Markov process
11 p1910 A69-25700
- Polarity coincidence correlation method due to random processes state characterization applied to man machine systems
12 p2022 A69-25931
- Optimal control of discrete time linear system with random parameters, noting case of additive noise in measurements
12 p2052 A69-26501
- Digital computer simulation of multidimensional stationary or nonstationary Gauss-Markov random processes with specified autocorrelation function, discussing time step choice
12 p2122 A69-26523
- Analytical expressions for transfer function matrices of four terminal signal shaping networks, assuming rational matrix spectral density of randomly polarized signal
12 p2031 A69-26644
- Differential equations of probability theory for studying control systems and processes involving random variables
12 p2124 A69-27142
- Reliability functions and cycles number before breakdown of finite automaton with account of randomness of malfunctions, structure and input signal distribution
13 p2224 A69-27250
- Bounding technique of first excursion probability for random vibration, considering relation to reliability of mechanical and structural systems under random disturbances
13 p2361 A69-27438
- Energy detection of random processes in colored Gaussian noise, discussing filtering, threshold detection, false alarm, probability distribution and density
13 p2220 A69-27937
- Power spectrum of random process from discrete sequence of instantaneous values, assessing error
13 p2239 A69-28514
- Continuous random process spectral density at PAM system output
14 p2424 A69-28748
- Computerized calculation of likelihood coefficients for identifying steady random processes against background noise, minimizing mean risk of erroneous solution
14 p2410 A69-28818
- Optimization criterion for synthesizing discrete nonlinear control system subjected to random controlling and perturbing effects
14 p2425 A69-28825
- Statistical description of geomagnetic field as random vector field, presenting correlation functions from empirical estimates from geomagnetic charts
14 p2437 A69-29062

Modeling nonstationary random processes using linear time-invariant difference equation, with applications to Kalman filtering and gyro drift

14 p2479 A69-29486

Electronic systems packaging substitution method for optimized malfunction isolation at succeeding levels to final discard-at-failure

14 p2420 A69-29494

Monograph on wave propagation and multiple scattering in random continuum, emphasizing scalar wave equation solutions

15 p2564 A69-30150

Spectral characteristics of pulsed signal with determinate repetition period and amplitude and duration modulation by correlated random processes

15 p2567 A69-30347

Accuracy and variance of nonergodicity estimates for random processes associated with radiophysical applications

15 p2582 A69-30946

Boundedness in mean square of solutions derived for linear differential equations forced oscillations with nonwhite Gaussian random functions parameters

16 p2873 A69-32058

One dimensional distribution law of random process with arbitrary correlation function, verifying normality hypotheses by integral criterion

16 p2765 A69-32484

Random walk theory for effective secondary radiation center produced by reflection from composite reflectors, investigating fluctuations of reflected radio waves

16 p2754 A69-32510

Random stress statistical properties and relationship to fatigue life, discussing Fuller prediction, comparison with test data, and vehicle design evaluation

17 p3053 A69-32988

Random oscillations of elastostatic systems, obtaining solution for spherical shell containing acoustic medium

17 p3057 A69-33199

Stochastic failure models based on stress peak distributions, including randomly deteriorating strength model and including hazard reliability functions

18 p3148 A69-35079

Multidimensional discrete control systems for spectral characteristics of random processes in vibrational and fatigue strength testing of machines and equipment

19 p3286 A69-35890

Triaxial static gyro stabilizer drifts, assuming perturbing moment steady centered random force applied along stabilizing gimbal axis

19 p3311 A69-36195

Algorithm for determining multidimensional random process from canonical representation of current state, noting minimum rms prediction error

19 p3287 A69-36663

Perceptron probability algorithm for random events prediction based on previous histories, applying Bayes formulas, static solutions formulas and transition probability tables and graphs

19 p3287 A69-36664

Random arrays representing random filament packing of actual composite materials, discussing effects on transverse stiffness

20 p3626 A69-37758

Optimal generalized random controls using stochastic integral equation in deterministic problem

21 p3756 A69-39266

Gyro drift rate mathematical modeling based on stationary and nonstationary time series analysis techniques with random process reduction to white noise residuals

[AIAA PAPER 69-838] 21 p3761 A69-39369

Stable linear system/shaping filter/synthesis transforming stationary white noise into random process having given covariance function

21 p3688 A69-39661

Optimal explicit method for parameters estimation not restricted to linear Gaussian problem derived in canonical form

[AIAA PAPER 69-947] 22 p3975 A69-40330

Random processes integration and differentiation and spectral density determination, examining Markov, Gaussian and point processes

22 p3975 A69-40777

Diffusion in biological systems by random walks with emphasis on gaseous diffusion in lung, noting probabilistic tree model

22 p3885 A69-40978

Satellite trajectory parameters estimation by maximum likelihood method applied to continuous satellite observations assuming random Gaussian process as measurement error

22 p3979 A69-41087

Random processes correlation functions determined by stochastic differential equations applied to lunar surface statistical characteristics determination

22 p4033 A69-41092

Uniform random field model development by taking moments in linear transformation form of certain initial field

23 p4183 A69-41523

Randomly oriented disks and rods scatter pattern used to determine causes of log-normal distribution of radar cross section fluctuations

23 p4116 A69-41592

N-dimensional theorem for evaluating time continuous channel capacity or rate distortion function of random process

24 p4284 A69-42721

Correcting deficiencies in parametric expressions for rate distortion function of Gaussian process under weighted square error criterion

24 p4281 A69-42722

Geodetic and geophysical random uncertainties as fundamental limitations on terrestrial inertial navigation accuracy

[AIAA PAPER 68-847] 24 p4348 A69-43240

RANDOM SAMPLING

Nonparametric ranking procedures /based on order statistics/ guaranteeing preassigned probability for selection from random samples populations as good as control

08 p1342 A69-20172

Extremal system of adaptive circuits adjusted by random search with varying random step distribution function

14 p2425 A69-28824

Statistical testing techniques using small sample size at low component levels to predict product performance

18 p3117 A69-34528

Weighting function of linear dynamic plant with steady random sampling determined with iterative method similar to stochastic approximation

24 p4289 A69-42951

RANDOM SIGNALS

Continuous random process spectral density at PAM system output

01 p0050 A69-10211

Error probability distribution density at output of optimal Gaussian random signal detection, using approximate solution of integral equations

02 p0206 A69-11605

Optimal calculator of detection of Gaussian random signal against Gaussian noise background by reducing input signal to white noise

02 p0206 A69-11606

Optimal detection of random signals on background of noise of unknown intensity and persistent false alarm probability

02 p0208 A69-12264

Pseudonoise generator producing controllable repetitive random signal patterns used to evaluate instrumentation system

03 p0403 A69-13188

Optimum conditions for signal analysis determined for symmetrical binary communications channel with unknown signal phase

04 p0556 A69-14492

Spectral density of response of linear discrete filter with multiple input and output periods to random signal

04 p0584 A69-15419

Beam deflection fluid amplifiers dynamic properties determined by random signal testing

05 p0705 A69-16010

Fluid amplifier linear transfer functions at signal levels on order of internal noise identified by random signal testing method

[ASME PAPER 68-WA/AUT-2] 05 p0706 A69-16184

Algorithm for discriminating random signals with unknown mean values, discussing decision functions possible existence to minimize error probability

05 p0719 A69-16218

Probability theory and Laplace functions used to determine pulse coincidence probability of two random independent pulse streams in given time

05 p0719 A69-16224

Counter/discounter assembly with slow resolution time for random fine pulses, using grouped tunnel diodes

05 p0735 A69-16702

Optimum antenna radiation patterns during suboptimum scattered Gaussian signal detection in homogeneous interference level investigated with single channel antenna

05 p0736 A69-16782

Book on introduction to random signals and communication theory covering signal analysis, analog and digital data transmission, information theory, etc

06 p0887 A69-17144

Optical heterodyne detection of randomly distorted signal beam, noting time invariant scheme yielding largest average SNR in atmospheric turbulence

07 p1087 A69-19642

Hilbert transform properties and application to random signals, analyzing analytic signal associated with general Gaussian random signal

08 p1271 A69-19915

Random data detection method applicable to low voltage SNR cases using real time correlation of probability functions

09 p1459 A69-22593

Error probability distribution density at output of optimal Gaussian random signal detection, using approximate solution of integral equations

11 p1835 A69-24712

Optimal calculator of detection of Gaussian random signal against Gaussian noise background by reducing input signal to white noise

11 p1835 A69-24713

Quantization error reduction for stochastic signals processing problems

12 p2051 A69-26201

Mismatch between signal and filter effect on output response of matched filter for pseudorandom phase-manipulated signals in receiver

12 p2031 A69-26487

Book on random signal analysis covering Fourier analysis, circuit analysis, Fourier transform theory, operators, probability, random variables, stochastic processes

12 p2031 A69-26632

Fourier analysis of pseudorandom binary sequences, noting relation of sequence sampling properties to interchange of phase angles of sequence harmonic components

13 p2287 A69-27245

Singularities of optimal filtration for random signals given by differential equations with variable coefficients and white noise

13 p2218 A69-27251

Input signal random amplitude fluctuations suppression by parametric power limiter, discussing limiting frequency determination and dependence on signal amplitude

13 p2236 A69-28573

Random signals and real time analysis systems for environment testing and transient signals

13 p2264 A69-28603

Continuous random process spectral density at PAM system output

14 p2424 A69-28748

Correlated noise effect on accuracy of suboptimal servosystem velocity measurements from recording Doppler frequencies

15 p2567 A69-30341

Subtractor performance for processing correlated random signals with different spectral widths in signal delay time indicator, discussing errors

15 p2572 A69-30346

Vibration/acoustics digitally controlled environmental testing, describing random test signal generation and random vibration tests

15 p2587 A69-30389

S-N fatigue life small bondable resistance sensor, discussing random response data interpretation with emphasis on use of strain multipliers

15 p2613 A69-31270

Likelihood ratio for random signals detection in white Gaussian noise based on innovation process

17 p2920 A69-33622

Optimum detection of stochastic signals in Gaussian noise, obtaining eigenfunctions series expansion associated with probability density function

17 p2921 A69-33623

Random signal behavior in hybrid correlator with analog and sampling channels, noting SNR expression and weak signal detection

24 p4283 A69-43139

RANDOM VARIABLES

Asymptotic behavior of probabilities of large deviations of sums of independent random variables with moments of any order

01 p0104 A69-10264

Minimal conditions for association of binary variables, studying nondecreasing functions and equivalence in coherent binary systems theory

04 p0624 A69-15007

Random processes study by special integral calculus containing deltas and theorems, with application to stationary processes

05 p0718 A69-15881

Analysis and synthesis of optimal linear time invariant systems with uncertain or unknown parameters, considering mean square error 06 p0902 A69-17405

Book on stochastic convergence covering infinite sequences of random variables, stochastic integrals and derivatives, characterization of normal distribution and Wiener process 08 p1343 A69-20443

Postselection estimation of component reliability in multicomponent systems, considering cases of binomial and exponential distributions of random variables 08 p1322 A69-21099

Variational approximation of probability measures and products of random matrices, discussing point distribution on Lobachevskii plane 10 p1719 A69-23399

Rate estimates of convergence of multidimensional central limit theorem for sequence of identically distributed independent random variables with third order finite moments 10 p1719 A69-23400

Mean losses in quasi-optical communication lines due to random irregularities in performance of waveguide phase correctors connected in series, noting random phase aberrations effect 10 p1658 A69-23954

Upper bounds for Bernstein-Kolmogoroff multidimensional inequalities, analyzing independent random vectors 11 p1910 A69-25698

Iterated logarithm law proved for class of stationary series extended to systems of dependent random variables with complete couplings 11 p1910 A69-25699

Cumulative probability distribution of positive random variable from moment generating function, exemplifying exponential and Poisson functions 12 p2120 A69-25927

Integral representation for continuous linear stochastic processes with independent pieces, assuming convergence in probability for sequence of random variables 12 p2121 A69-26365

Random variables generation from distribution having given failure rate function 12 p2102 A69-26571

Differential equations of probability theory for studying control systems and processes involving random variables 12 p2124 A69-27142

Wiener-Hermite expansion extended to include time dependent ideal random functions, discussing application to shear flow turbulence 15 p2644 A69-30201

Force resonance oscillations of one degree of freedom system with randomly time varying natural frequency 16 p2813 A69-32285

Natural oscillations frequency spectrum of turbomachine impeller blades subjected to random variations determined with frequency distribution function obtained by moments method 19 p3436 A69-35844

Asymptotic behavior of probabilities of large deviations of sums of independent random variables with moments of any order 19 p3360 A69-36199

Random variable used as model for unknown parameter in linear system, describing orthonormal expansion for evaluating mean-integral-squared error 21 p3685 A69-38727

Book on systems stability with random parameters, considering linear and nonlinear control systems, with application to stochastic approximation 23 p4181 A69-41510

Tolerance limits for uncertain requirements vector in linear programming with random variation, introducing nonparametric statistics with sensitivity analysis [AAS PAPER 69-079] 24 p4340 A69-42821

Automatic system failure sequence statistical analysis, considering randomly time variable external effects 24 p4289 A69-42953

Optimal rule for decision to stop or continue observation of random variables after observing sequence of variables with continuous distribution function 24 p4341 A69-43235

RANDOM VIBRATION

Stress peak distribution effects on random load fatigue investigated for one and two degree of freedom systems 01 p0172 A69-11355

Linear mechanical systems idealized by single degree of freedom system with viscous damping subjected to combined deterministic and random excitation 04 p0680 A69-14968

Vibration response of thin elastic plates to random loads 05 p0844 A69-16741

On-line analysis with digital computer, noting system designed for vibration and random vibration analysis 05 p0726 A69-16761

Bilinear hysteretic system undergoing random vibration, substantiating linearization analysis with analog computer simulation and comparing lifetime to linear system [ASME PAPER 69-VIBR-25] 10 p1806 A69-24173

Magnitude limited random excitation effect on linear system response, using single degrees of freedom model representing idealized mechanical structure [ASME PAPER 69-VIBR-41] 10 p1807 A69-24179

Displacement and acceleration criterion for synthesizing optimum linear vibration isolator systems subject to random input [ASME PAPER 69-VIBR-44] 10 p1807 A69-24182

Random periodic forces effect on single frequency oscillations of nonlinear nonautonomous system with distributed parameters, discussing perturbed boundary value problem 11 p1916 A69-24761

Random oscillations of nonlinear elastic system described by nonlinear partial differential equations 11 p1918 A69-24781

Transition density function of randomly excited diffusion process and confinement probability at fixed spatial point satisfying integrodifferential equation involving functional derivatives 11 p1860 A69-25451

Bounding technique of first excursion probability for random vibration, considering relation to reliability of mechanical and structural systems under random disturbances 13 p2361 A69-27438

Vibrostand effects on statistical characteristics of random vibrations of elastic system, discussing simulation techniques 14 p2536 A69-29743

Vibration/acoustics digitally controlled environmental testing, describing random test signal generation and random vibration tests 15 p2587 A69-30389

Random functions applications to random vibrations, discussing spectral power density, ergodic steady functions, etc 17 p3054 A69-33063

Numerical Fourier transform and inversion in random vibration performed on computer, noting use for stochastic structural dynamic analysis of complex structures 17 p2996 A69-33710

Energy dissipation influence on elastic elements random vibrations, obtaining relations between displacements rms value and random disturbance intensity 17 p3064 A69-33921

Mechanical single degree of freedom system mean square response to AM random noise, considering frequency response, input excitation spectrum, etc [ASME PAPER 69-APM-25] 18 p3214 A69-34398

Random vibrations in linear systems during spectral and correlation analysis, noting nonlinear systems 18 p3227 A69-35491

Random vibratory environment simulation for spectra, noting electrodynamic generator employed to excite electric field force 19 p3294 A69-35904

Ordinary coherence functions for computing frequency response in mechanical systems under random excitation 20 p3537 A69-37162

Scalar waves propagation in bounded randomly fluctuating media, emphasizing interface effects on coherent wave motion 21 p3675 A69-39283

Nonlinear random vibrations excitation in rectangular flat plate with initial imperfection by white noise, assuming clamped boundary conditions 22 p4048 A69-41183

Power flow relations between randomly vibrating systems with weak linear elastic or dissipative coupling 23 p4227 A69-41877

RANEY NICKEL

U CATALYSTS

U NICKEL

RANGE [EXTREMES]

NT FREQUENCY RANGES

NT RADIO RANGE

NT ROCHE LIMIT

Bounds from asymptotic behavior of solutions of nonlinear integrodifferential equation arising from nonlinear oscillators in acoustics 01 p0103 A69-10001

Approximate boundary controllability for heat equation by considering temperature variation with time 01 p0173 A69-10008

Upper and lower bounds for eigenvalues of differential problem connected with transverse vibrations of wedge shaped simply supported beam 02 p0272 A69-12193

Lehmann-Machly procedure for lower and upper bounds to eigenvalues of Hermitian operators in Hilbert space 06 p1020 A69-17131

Optimal approximation of functional matrix, giving upper bounds for deviations of general matrices from closest spectral matrices 06 p0948 A69-17495

Upper and lower bounds for feedback decoding and definite decoding minimum distances of binary convolutional codes 06 p0904 A69-17865

Radio source CP 1133 at 408 Mc, noting upper and lower limit to continuous emission between pulses 06 p1009 A69-17969

Unperturbed Hamiltonian transformation applied to existing perturbation theories for exchange forces between atoms to obtain correct long range behavior 07 p1184 A69-18288

Bounds on electric field outside radiating system determined for application to UHF and VHF systems design, considering microwave breakdown 08 p1273 A69-20026

Bounds for real and imaginary parts of dynamic moduli of composite viscoelastic systems 08 p1417 A69-20824

Riemann sum definition and development of bounds for error in approximating integral, showing quadrature formulas as Riemann sums 10 p1719 A69-23521

Probability analysis by methods simplifying calculations or providing bounds on reliability of complex system 12 p2103 A69-26751

X ray source Cyg XR-1 angular diameter upper limit determined from balloon experiment data obtained with collimated X ray telescopes 17 p3026 A69-32860

Displacement bounding principle for work hardening plasticity theory based on Drucker inequality and stress path existence [ASME PAPER 69-APM-7] 18 p3213 A69-34385

Analog method for determining structural creep displacement by setting up boundaries for linear elasticity and perfect plasticity 20 p3628 A69-37915

Upper limits for OH microwave emissions from radio sources F transitions, discussing pumping mechanism role in emission detection 21 p3796 A69-38477

Mariner attitude control system limit cycle operation during cruise, noting variation from ideal case to single side operation [AIAA PAPER 69-844] 21 p3822 A69-39374

Sonic boom lower bounds determination in midfield based on modification of Jones results by minimizing overpressure or shock strength of boom wave positive component 24 p4254 A69-43662

RANGE AND RANGE RATE TRACKING

Computer program solving for station coordinates and dynamical parameters at Smithsonian Astrophysical Observatory from optical data, laser range and range rate 12 p2068 A69-26428

Alford and Gold light modulation effect expanded to include one frequency spectrum with Doppler shift, discussing applications to optical radar for range and velocity measurements 21 p3672 A69-38409

RANGE CONTROL

U TRAJECTORY CONTROL

RANGE ERRORS

Longitudinal range dispersion of unmanned Mars landers using VM-8 and VM-9 atmospheric models, discussing Syrtis Major as possible landing site 02 p0324 A69-12390

Long distance VLF multirange navigation fix errors as function of angles of cut of position lines and range errors, presenting error isograms 14 p2478 A69-29484

Omega/VLF transmission range rate measurements for satellite Doppler navigation to provide velocity and location data, noting propagation error
14 p2479 A69-29857

Systematic error pattern in raw data obtained during tracking ROSE balloons by two radar systems, estimating range resolver error
15 p2649 A69-30897

Navigational accuracy dependence on spacecraft geometry, determining information content and critical error sources of earth based Doppler radio tracking data
[AAS PAPER 69-112] 19 p3402 A69-35935

Ionospheric range difference errors after correction for position fixing from satellite, considering elevation angle, latitude, day time, spatial and time electron content correlation
23 p4128 A69-42505

RANGE FINDERS

NT OPTICAL RANGE FINDERS

Optimal structural parameters of radar digital ranging servo systems derived from reproduction error, including computer simulation data
19 p3278 A69-36593

RANGE INDICATORS

U INDICATING INSTRUMENTS

RANGE MEASUREMENT

U RANGEFINDING

RANGEFINDING

NT SOUND RANGING

Radar range determination on any target based on parametric method and nomograms in decibels
04 p0560 A69-15227

Signal strength variations for balloon-borne VHF FM transmitter due to wave interference, noting application to balloon range estimation
06 p0886 A69-16925

Navigation satellites system designed for ATC without requirement for onboard transmitter, discussing spectrum occupancy, satellite power, lane ambiguities and computational procedures
07 p1177 A69-19212

Experimental circuit for simulating radar target tracking system based on split range gating, noting tracking role of error signal
08 p1300 A69-20109

Range measurement accuracy of radar automatic equipment, discussing nomograms for split-gate tracker, cyclic and pulse length errors and multipath reflections
08 p1275 A69-20228

Range difference air navigation equations solution, discussing error updating of satellite position and constellation geometry
09 p1538 A69-21996

Pulse Doppler radar operation, discussing Doppler shift, range resolution and systems components
10 p1659 A69-24084

Pseudorandom FM waveforms for simultaneous range and Doppler shift radar measurements
13 p2221 A69-27944

Automatic navigation and sighting system for French specified Jaguar combat aircraft development
16 p2809 A69-31760

Software remechanization of conventional hyperbolic LORAN for totally passive closed loop one way direct range measurements to individual LORAN transmitters
17 p3002 A69-34079

Scale determination in spatial direction networks, using polygonal transverse measured along continental surfaces and Secor method over water surfaces
18 p3131 A69-35196

Radar propagation in surface duct over water, describing range distribution estimation procedure
20 p3495 A69-37854

RANGER LUNAR PROBES

Analytic photogrammetric determination of lunar control coordinates from Ranger photography
01 p0147 A69-10022

Lunar geology information obtained by Ranger space missions
06 p1001 A69-17163

Ranger pictures improvement by computer, eliminating image distortion due to electronic imaging systems
06 p0924 A69-17164

RANGES (FACILITIES)

U BALLISTIC RANGES

U MISSILE RANGES

U TEST RANGES

RANGING

U RANGEFINDING

RANK TESTS

Group relative values for system criteria, showing application to illustrative maintenance criteria
10 p1668 A69-22973

RANKINE CYCLE

Thermodynamic comparison of MHD generators using Brayton and Rankine cycles, showing Rankine cycle conversion at higher channel Mach numbers for nonequilibrium ionization
03 p0369 A69-14154

Thermodynamic and aerodynamic characteristics of organic Rankine cycle working fluids for ideal application to manufacturing
[SAE PAPER 690063] 07 p1057 A69-18308

Power generation in combat environment by tested self contained organic Rankine silent engine, discussing working fluid properties
[SAE PAPER 690062] 07 p1058 A69-18309

Linear induction MHD generator using Rankine cycle with K-Na working fluid noting longitudinal edge effect compensation
07 p1058 A69-19026

Mercury cesium plasma in crossed electric and magnetic fields as working fluid of MHD generators based on Rankine cycle
10 p1636 A69-23458

Throttling effect on thermodynamic efficiency of MHD generator Rankine cycle with various working fluids
11 p1824 A69-24222

Nuclear energy conversion for long space missions, comparing dynamic Brayton, liquid metal MHD gas, dynamic Rankine and LMMHD Rankine cycles
16 p2810 A69-31748

Power subsystem weight effects on temperature ratio of Rankine type cycle, discussing method for rapid estimation
19 p3254 A69-35957

Rankine cycle power systems with reciprocating engines using organic working fluids, discussing engine development, system characteristics, etc
23 p4067 A69-42237

Jet condenser at very low pressure in organic Rankine cycle power conversion system noting role in power efficiency
23 p4068 A69-42238

Freon boiler designed for Rankine cycle heater fired on hydrocarbons with over 2000 F flame front temperature, considering radiant/convective heat transfer
23 p4068 A69-42239

Positive displacement Rankine cycle rotary wet steam engine design compared with piston type, noting simplified evaporator and tests
23 p4069 A69-42252

Pu-238 isotope organic Rankine cycle system analyzed for one year manned space station, using modified H-521 Space Power computer program
23 p4188 A69-42264

Performance, size, weight, operational characteristics and cost estimates of ZrH reactor-organic Rankine power systems
23 p4189 A69-42265

Systems analysis of Rankine cycle nuclear-electric potassium space power system using Li cooled fast reactor and high temperature turbine inlet
23 p4189 A69-42266

Organic Rankine cycle system using heat absorption from turbine exhaust to provide increased electrical output and to power air conditioning
23 p4070 A69-42267

Dynamic power and life support systems electrical/thermal integration for manned spacecraft using low temperature Rankine cycle generator
23 p4189 A69-42269

Rankine power cycle for fluid evaluation, discuss radiating area, thermodynamics, etc
23 p4239 A69-42276

RANKINE-HUGONIOT RELATION

Shock heated helium plasma temperature measurements by spectroscopy compared to Rankine-Hugoniot calculations including ionization effect
09 p1548 A69-21963

MHD Rankine-Hugoniot equations for ion density, thermal pressure and convective velocity magnitude and orientation during Pioneer 6 traversal of earth bow shock
23 p4222 A69-42417

RANKINE TEMPERATURE SCALE

U TEMPERATURE SCALES

RANKING

Nonparametric ranking procedures /based on order statistics/ guaranteeing preassigned probability for

selection from random samples populations as good as control
08 p1342 A69-20172

RAPCON [CONTROL]

U RADAR APPROACH CONTROL

RAPID EYE MOVEMENT STATE

Stiles-Crawford effect measurements before and following eye movements to determine retina shearing during eye movements
15 p2555 A69-31035

Functional changes of somatosensory pathway from periphery to cortex during rapid eye movement /REM/ and non-REM periods of deep sleep
22 p3872 A69-40161

Saccadic eye movements comparison during fixation and reading by contact lens optical lever technique
22 p3880 A69-40855

Hypnotic compounds properties influencing REM /rapid eye movements/ stage, discussing insomnia problems with jet flight crew and passengers
24 p4277 A69-43389

RARE EARTH COMPOUNDS

NT CERIUM COMPOUNDS

NT EUROPIUM COMPOUNDS

NT NEODYMIUM COMPOUNDS

NT SAMARIUM COMPOUNDS

Magnetic and semiconducting properties of samarium boride, noting effect of decreasing temperature
07 p1200 A69-19403

Relative heats of formation and reduced melting temperatures of lanthanide compounds correlated to lanthanide contraction
07 p1168 A69-19597

Gadolinium-cobalt system investigation by X ray diffraction thermoanalysis and metallography for intermetallic compounds, noting structure transformation and homogeneity
11 p1903 A69-24574

Low temperature specific heat of praseodymium magnesium nitrate
12 p2026 A69-25784

Far IR electronic and vibronic transitions in single crystals of Nd ions in tysonite lanthanide fluorides
13 p2316 A69-27628

CW lasers based on composite yttriofluorite type crystals, noting large number of intense emission bands
13 p2273 A69-28316

Rare earth niobates magnetic properties measured in pulsed magnetic fields
15 p2667 A69-30195

Crystal structures of Ni-rich rare earth/Ni phases, including high temperature forms
15 p2637 A69-30213

IR lattice spectra of rare earth Al, Ga and Fe garnets, discussing oxygen anion, translational rare earth cation and crystal lattice external motions
24 p4360 A69-42974

Multiphonon orbit-lattice relaxation of excited states of rare earth ions in crystals, measuring fluorescence lifetimes, quantum efficiencies and transition rates
01 p0134 A69-10011

Ground state population modulation in trivalent rare earth doped single crystals by means of optical double resonance, noting applications
01 p0134 A69-10013

Multiphonon orbit lattice relaxation of excited states of rare earth ions in crystals, using results to design quantum electronic devices
[IEEE PAPER I-9] 05 p0774 A69-16318

Rare earth elements and yttrium in meteoritic chondrites determined by radiochemical neutron activation analysis
08 p1403 A69-20916

Rare earths relative and absolute terrestrial abundances in shales, basalts, rhyolites and granites
08 p1310 A69-20942

Earth crust transition elements distribution and abundance compared to rare earths
08 p1310 A69-20943

Partition coefficients between natural melts and plagioclase phenocrysts determined for rare earth elements and barium by mass spectrometry
08 p1310 A69-20944

Continental diabases and oceanic tholeiites in light of rare earth and barium abundances and partition coefficients indicating fusion process
08 p1310 A69-20945

Coherent emission from rare earth ions in electro-optic crystals, noting oscillations and electric field modulation occurrence
09 p1514 A69-21339

Trivalent rare earth ions Stark structure based on spectroscopic observations of stimulated transitions in lasers
10 p1701 A69-23129

Liquid lasers properties and composition including organic complex compounds, organic dyes, rare earth elements in polyphosphoric acid, etc
11 p1893 A69-24353

Glass lasers with trivalent rare earth ions noting properties, characteristics and recent developments
11 p1898 A69-25043

Rare earths additives effects on arc instability and weld puddle fluidity of stainless steel bare wire electrodes
12 p2103 A69-26623

Polycrystalline Ca-V garnets and Mg-Cr ferrites magnetic properties after adding rare earth elements
13 p2320 A69-27999

Energy exchange of rare earth ions in uranyl phosphate liquids and glasses, studying sensitized luminescence origin
14 p2485 A69-29034

Crystal structures of intermediate phases in La-Co and Nd-Co systems by powder X ray diffraction technique
15 p2667 A69-30087

Ca-rich achondrites genesis implied from rare earth and Ba absolute and relative concentrations
19 p3409 A69-36091

Solar rare earth abundances determined from high resolution tracings of solar spectrum, comparing results with nucleosynthesis theories
20 p3602 A69-37539

Electrical conductivity of rare earth metals La, Ce, Pr and Nd in solid and liquid states by rotating magnetic field method
21 p3781 A69-39070

Refractory metals interactions with gases in vacuum and inert gas environment, noting temperature and pressure effects on reactions, extent and kinetics
01 p0099 A69-11042

Multiphoton ionization of molecular hydrogen and rare gases using Q switched Nd laser apparatus
02 p0283 A69-11701

Inert gas nonequilibrium MHD power generation in shock tube
02 p0196 A69-12425

Xenon, krypton, nitrogen and nitrous oxide effect on respiration rate of rat liver slices at various oxygen partial pressures
03 p0375 A69-14069

Transport diffusion cross sections of slow electrons during scattering at inert gas atoms by microwave method, calculating electron transfer coefficients
03 p0481 A69-14143

Prigogine-Nicolis-Misguich transport theory tested with inert gas liquids and compared with Rice-Allnatt theory, based on modified Lennard-Jones potential model
04 p0589 A69-14863

Second dielectric virial coefficient of rare gases derived by cluster method
04 p0632 A69-14865

Continuous radiation production in positive plasma column of inert gas considered as manifestation of plasma electrons bremsstrahlung from interaction with gas atoms
05 p0800 A69-15741

Low collision energy charge transfer and dissociative charge transfer between rare gas ions and molecular nitrogen, measuring nitrogen ion kinetic energy distributions
05 p0796 A69-15909

Frequency dependent shear modulus for hexachlorobiphenyl measured under rare gas infusion at 5-25 C and from ambient atmospheric to 4000 psi
05 p0796 A69-15912

Continuous UV noble gas ion lasers, noting small signal gain and power output limit at various current densities for strong lines
05 p0775 A69-16321

Rare gases in stony meteorites, noting premordial inheritance and complex Xe anomalies
05 p0826 A69-16440

Noble gas atom simultaneous ionization and excitation by removal of metastable electron in fast collision
06 p0961 A69-17137

Inert gas discontinuous injection into nonequilibrium laminar boundary layer
06 p0860 A69-17635

Ratios of gas kinetic electron-atom collision integrals of Ramsauer for Ar
06 p0963 A69-17822

Electrical characteristics of linear Faraday generator using binary mixture of noble gases with nonequilibrium ionization
08 p1359 A69-19880

Polarization of Lyman alpha radiation in hydrogen rare gas collisions calculated in Born and distortion approximations including rotational coupling
08 p1355 A69-20207

Electron transport parameters in noble gases at low electric field intensities, elastic and inelastic scattering and Boltzmann transport equation
08 p1362 A69-20285

Tables of effective electron cross sections and macroscopic coefficients, Volume 1, covering hydrogen and rare gas molecular and atomic interactions with electrons
09 p1541 A69-21579

Kodaikanal iron meteorite measurements for cosmogenic rare gases and K-Ar isotopes ages for glass inclusions
09 p1596 A69-22047

Primary specific ionization in noble gases by charged particles
10 p1726 A69-23128

Noble gas additives for triggering stability of pulsed argon ion lasers, discussing repetition rate and power loss
10 p1702 A69-23341

Nitrogen impurities effect on electron energy balance in DC arc burning in inert gas
10 p1732 A69-23442

Rare gas-alkali plasma electrical conductivity dependence on gas temperature and preionization to determine optimum operating conditions for MHD generator
10 p1733 A69-23451

Equilibrium loss in closed cycle MHD generator using rare gases binary mixtures as working fluid
10 p1737 A69-23470

Nonequilibrium electron heating effect on inert gas plasma conductivity during shock wave movement across magnetic field
10 p1737 A69-23470

MHD conversion experiments using rare gas, considering Typhoon loop, electron heating and correction effects
10 p1738 A69-23475

Heat treatments in inert gas atmosphere improve elastic foam polyurethane by reducing capability of toxic outgassing
10 p1716 A69-23503

Electrical conductivity of partially ionized noble gases Ar, He, Xe and Kr, considering electron temperature and electron-electron interactions
11 p1923 A69-24295

Hot inert gas bubble thermal stability in cool reactive liquid
11 p1998 A69-24475

Collisional radiative electron-ion recombination rates measured in decaying rare gas plasmas produced by transient discharge
12 p2134 A69-25981

Charged state variations during protons and inert gas atoms interactions analyzed by coincidence method
12 p2133 A69-26543

Negative charge production by H atoms collisions with rare gases and hydrogen, noting smooth rise of cross section with energy for rare gases
13 p2302 A69-27459

Extinction kinetics of monopropellant droplet burning in inert gas reservoir with atmospheric temperature lower than adiabatic combustion temperature
13 p2378 A69-28250

Ionization of rare gases /H and N/ by nitrogen ions, determining cross sections of formation of slow ions and electrons
13 p2304 A69-28440

Auxiliary discharge thermionic converter with Penning mixture /Ne-Ar/, discussing pressure and Penning ionization effects, collector current discontinuities, etc
14 p2398 A69-29180

Knudsen arcs kinetic theory with cesium/inert gas mixtures in narrow gap between parallel plate electrodes, discussing fast particle beams and electron scattering
14 p2491 A69-29245

Noble gas thermionic converters, discussing auxiliary discharge compensation of negative space charge, I-V characteristics, efficiency and comparison to ignited mode cesium vapor converter
14 p2403 A69-29249

Rare gases effect on thermionic converters volt-ampere characteristics, noting gas pressure, oxygen contamination and performance relations
14 p2403 A69-29251

Rare gases total excitation cross sections absolute values measured in collision chamber, noting energy distribution of exciting electron beam, fine structure, etc
14 p2493 A69-29693

Gas-gas interactions second virial coefficients measured at various temperatures, comparing experimental data with results calculated by Kihara potential
14 p2488 A69-29927

Electron ion recombination role in atomic collision process in rare gases ionization path, considering scintillation mechanism
15 p2655 A69-30961

Vapor-liquid transition in inert gases based on Monte Carlo method, including comparison with van der Waal equation and plasma ionization equilibrium
15 p2655 A69-30981

Low energy neutral bremsstrahlung cross sections for Ne, Ar and Xe, using rapid scanning spectrometer
15 p2657 A69-31159

Microwave induced ionization wave propagation in rare gases, noting rapid electron density increase at wave front and subsequent low plasma decay
16 p2818 A69-31671

Ultrasonic velocity dispersion in para hydrogen and mixtures with He, Ne and Ar at 300 K, obtaining rotational relaxation times
16 p2815 A69-32791

Kr and Ar flash lamps pumping efficiencies compared for Nd-doped YAG and glass lasers
17 p2980 A69-32958

Microwave reflection and noise emission from cylindrical rare gas afterglow plasmas in axial magnetic field measured near electron cyclotron resonance
18 p3127 A69-34436

Cosmic ray produced radionuclides and rare gas isotopes from Saint-Severin meteorite surface, showing relative Kr spallation mass yields dependence on cosmic ray energy spectra
19 p3410 A69-36093

Calcium-rich achondrites age distribution determined from inert gas measurements and existing data of eucrites, shergottites and howardites
19 p3413 A69-36107

K 40-Ar 40 age measurements in separated mineral phases of chondrites, including production rates of spallation isotopes
19 p3418 A69-36137

Spallogenic rare gas concentrations and isotopic ratios in taenite of iron meteorites measured mass spectrometrically and compared with kamacite values
19 p3419 A69-36139

Trapped rare gases in Fe phase and silicate inclusions of Campo del Cielo Meteorite, El Taco
19 p3419 A69-36140

Thermal rare gas release from mineral separates of Mocs meteorite, using method giving activation energies as function of temperature
19 p3419 A69-36141

Distribution and origin of primordial He, Ne and Ar in Fayetteville and Kapoeta meteorites extracted and analyzed by laser-microprobe mass spectrometer
19 p3419 A69-36142

Molecular N rotational temperature effect on rare gases scattering cross section
19 p3377 A69-36184

- Noble gases effect at low pressures on O consumption by mammalian tissue, noting Xe, Kr, N and nitrous oxides effect on rat liver
19 p3258 A69-36454
- Rare gas distribution in earth atmosphere explained as outgassing from primordial solid particles, discussing stony meteorites composition
20 p3600 A69-37489
- Calcium rich achondrites radiation ages determined from measuring He, Ne and Ar in howardites, nakhlites and angrite
20 p3602 A69-37535
- Decompression research on inert gas transport in body, discussing solubility factors in decompression damage
21 p3655 A69-38913
- Valving concepts and functional approaches for inert gas attitude control thruster systems providing redundancy safeguards at minimum weight, volume and power costs
[AIAA PAPER 69-843] 21 p3786 A69-39373
- Elastic electron scattering by metastable states of rare gases, using effective potential matching experimental binding energy of negative ions
24 p4354 A69-43818

RAREFACTION

- Rarefaction onset along streamline from rocket nozzle with small Knudsen number at exit plane
23 p4152 A69-41920

RAREFACTION WAVES

U ELASTIC WAVES

RAREFIED GAS DYNAMICS

- Impulse and kinetic energy transfer in rarefied gases analyzed on basis of kinetic theory, considering surface curvature effect
01 p0173 A69-10093
- Rarefied merged stagnation shock layer of hypersonic body, considering chemical reactions of nonequilibrium dissociative relaxation of air
02 p0189 A69-12521
- Monte Carlo direct simulation for treating rarefied supersonic flows about bodies in transitional regime between continuum and free molecular flow
02 p0189 A69-12523
- Viscous effects on impact pressure measurements in free jet low density gas flows at high Mach numbers
02 p0234 A69-12633
- High rank moment tensors in weakly rarefied gas for case of gas deviation from local equilibrium, analyzing density, velocity and temperature
04 p0587 A69-14542
- Time independent flow of highly rarefied neutral gas past finite cone at zero angle of attack with freestream, noting molecular distribution function
04 p0541 A69-14712
- Rarefied flow past sphere, analyzing collisionless flowfield structure and development as density increases
04 p0542 A69-14731
- Rarefied hypersonic flow model for sharp flat plate in strong interaction regimes, discussing inviscid and viscous shock and merged layers subregions
04 p0589 A69-14747
- Interaction of rarefied gas with solid surface, analyzing accommodation coefficients, energy and impulse exchange as function of atomic bulk size
04 p0632 A69-14991
- Class of uniform motions of continuous media and rarefied gases
05 p0751 A69-16677
- Monte Carlo solution of linearized Boltzmann equation in rarefied gas dynamics, noting Knudsen layer and Couette flow applications
06 p0910 A69-17345
- Time dependent technique for inviscid blunt body flows to analyze viscous rarefied shock layer regime, using Navier-Stokes equations
[AIAA PAPER 69-139] 06 p0865 A69-18173
- Collimated nozzle beam for probing low density gas flows, discussing transition from free molecular to isentropic flow and Knudsen numbers
07 p1136 A69-19467
- Multibeam Fabry-Perot interferometers for aerodynamics measurements of rarefied gas flows, determining density distribution, shape, structure and detachment of shock waves
08 p1314 A69-20385
- Steady motion through rarefied gas of circular cylinder due to surface temperature difference
08 p1305 A69-20888
- Hydrodynamic equations and Grad transport coefficients for nonequilibrium rarefied monatomic gases developed for molecular collisions
09 p1481 A69-21888

- Singular integral equation for velocity in linearized Rayleigh problem in rarefied gas flow field solved by applying Luke weight coefficients
10 p1679 A69-23596
- Monte Carlo method application to heat transfer analysis including radiation, rarefied gas energy transfer and conduction
11 p1997 A69-24457
- Kinetic theory for examining transition regime of rarefied gas dynamics, discussing Boltzmann equations and models with related boundary value problems
11 p1870 A69-25005
- Classical statistical mechanics of systems with identical or limited different particles, discussing particle collisions in dilute gases
11 p1870 A69-25009
- Gasdynamic and Boltzmann equations relations in rarefied gas kinetics, applying physical and mathematical boundedness concept to setting boundary conditions for moment equations
13 p2250 A69-28320
- Monograph on investigation of rarefied gas flows by means of miniature pressure probes in transition region between molecular and continuum flows
14 p2430 A69-29289
- Direct simulation Monte Carlo method for hypersonic rarefied gas flow past solids, modeling on digital computer
14 p2390 A69-29580
- Intrinsic quantum-mechanical behavior of fully ionized gas at high temperature and low density, defining classical limit
14 p2502 A69-29992
- Hydrogen gas role in galaxy formation, estimating quantity needed to dissipate gas cloud contraction energy, discussing formation mechanics of molecular hydrogen
15 p2680 A69-30204
- Unsteady nonadiabatic shock waves in stellar gas dynamics, analyzing energy losses due to ionization at shock fronts by extended Chiznell-Wisem method
15 p2682 A69-30508
- Heat transfer in rarefied gas plane Couette flow determined by BGK model and moments method of half range distribution functions
16 p2876 A69-31688
- Book on mathematical methods in kinetic theory covering boundary value problems associated with Boltzmann equation, model equations, rarefied gas dynamics, etc
16 p2811 A69-31721
- Boltzmann kinetic equation describing rarefied neutral or weakly ionized gas state evolution, showing solution existence, uniqueness and successive approximation convergence
16 p2814 A69-31958
- Nonlinear rarefied gas flow problems with thermal nonequilibrium solved by numerical methods, considering intermolecular collisions effect
17 p2952 A69-33325
- Exhaust plume rarefaction from sonic orifice, considering continuum to transitional behavior for perfect gas
[AIAA PAPER 69-657] 17 p2892 A69-33465
- Flow field study of merging between bow shock and viscous layer upstream of highly cooled axisymmetric blunt body in rarefied hypersonic stream
[AIAA PAPER 69-656] 17 p2893 A69-33498
- Strong shock wave structural model, considering near molecular beam, upstream hypersonic and downstream subsonic flows and beam-continuum conversion by collision
18 p3120 A69-34457
- Aerodynamic characteristics of sphere and blunt cone in highly rarefied gas flow, noting molecular collision effect
18 p3086 A69-34708
- Rarefied gases transfer coefficients stochastic process calculation models, comparing results with correlation functions derived from transport equation
18 p3121 A69-34710
- Rarefied gas dynamics for continuous medium and discrete molecules assemblage, discussing flow over blunt model and free jet flow from sonic orifice
18 p3122 A69-34812
- Rarefied gas dynamics of blunt and sharp-pointed slender bodies in supersonic stream and free jet sonic expansion into high vacuum
18 p3123 A69-34924
- Thermal accommodation coefficients determination, comparing techniques based on free molecule flow heat flux data
18 p3230 A69-35071

- Rarefied gas flow between parallel plates using linearized Boltzmann transport equation, deriving integral equation for mass flow velocity
19 p3296 A69-35621
- Hypersonic rarefied gas flow past flat plate with sharp leading edge and past circular cylinder, noting wake structure similarity to viscous theory prediction
19 p3294 A69-35755
- Monte Carlo simulation for studying rarefied hypersonic gas flow about slender cones and flat plates
20 p3459 A69-37902
- Molecular transport equations of dilute gases, considering relaxation time spectrum, obtaining kinetic equations and correlation function expressions for transport coefficients
23 p4193 A69-41512
- Aerodynamic characteristics of moving and rotating bodies of revolution in free molecular rarefied gas flow, assuming Maxwellian thermal velocity distribution and diffuse specular interaction
24 p4243 A69-42583
- Supersonic rarefied gas flow past circular cylinder, studying flow and shock parameters by multiple wave interferometry
24 p4244 A69-43070
- Rarefied gas one dimensional transverse motions consistent with Boltzmann kinetic equation, solving integrodifferential equations for shock wave structure
24 p4351 A69-43491
- Stagnation temperature determined in transition and free molecule region of rarefied gas flows from critical mass flow dependence on temperature and stagnation pressure
24 p4408 A69-43492
- Cylindrical models in hypersonic rarefied flow, determining drag data by free flight technique
24 p4249 A69-43677

RAREFIED GASES

NT COSMIC GASES

NT INTERPLANETARY GAS

NT INTERSTELLAR GAS

- Pressure measurements by gauges in rarefied gas flows past bodies of various shapes, discussing configurations effect on gauge readings
01 p0080 A69-10358
- Accommodation coefficient effect on linearized heat transfer in rarefied gas between parallel plates and concentric cylinders
01 p0177 A69-11405
- Hydrodynamic theory of light scattering by dilute monatomic gases generalized by using linearized Burnett equations instead of Navier-Stokes equations
03 p0466 A69-13135
- Kinetic theory of sound propagation in rarefied gas using generalized orthogonal polynomial expansion, evaluating adequacy of nonequilibrium distribution postulated by Mintzer
03 p0466 A69-13156
- Differential thermistor gauge using Wheatstone bridge for use in free molecule pressure probe measurement of macroscopic velocity in rarefied gases
04 p0601 A69-15117
- Free convective heat transfer of cylinder in rarefied gas yielding Nusselt number as function of Grashof, Prandtl and Knudsen numbers
05 p0846 A69-15904
- Model kinetic integral equation for describing flow in transition region at leading edge of tapered body in rarefied gas
05 p0697 A69-16040
- Law of corresponding states applied to temperature dependence of viscosity of rarefied gases
06 p0957 A69-16918
- Drag force measurement in low density flows using modulation techniques
06 p0861 A69-17638
- Weakly ionized wakes study in free quasi-molecular regime of supersonic flow, using Langmuir probe in wind tunnels, discussing ion density distribution
06 p0966 A69-17639
- Dynamic behavior of shock layer of supersonic rarefied gas flow past disk and sphere
06 p0861 A69-17812
- Heat transfer to wedge in nearly free-molecular hypersonic flow of strongly rarefied gas
07 p1050 A69-18707
- Time derivatives of Boltzmann H function with respect to dilute gas
07 p1121 A69-19407
- Rarefied gases back diffusion between parallel plates used for studying diffusion in capillaries, deriving volume flow equation valid for any density
10 p1677 A69-22903

Supersonic and hypersonic flow of rarefied gas around blunted cylinders at various angles of attack, noting pressure distribution on model surface
11 p1821 A69-25478

Hypervelocity shock wave propagation in rarefied gas, observing anomalous wave attenuation
14 p2433 A69-29846

HO₂ radical detection in rarefied H flame produced by HF discharges, recording high amplitude signals
15 p2716 A69-30054

Effective heat transfer coefficient lambda for micro-scopic Fe particles traversing rarefied air, oxygen and Ar target gases
16 p2769 A69-31870

Vibrational temperature of low density nitrogen measured by electron beam method, discussing relationship to ratio of integrated vibrational band intensities
20 p3579 A69-37222

Rarefied molecular gas flow past permeable surface, determining reflection law and flow parameters
20 p3459 A69-37438

Viscosity, thermal conductivity and diffusion predicted for dilute nonpolar, polar and mixed gases, discussing methods for rotational relaxation collision numbers and resonant correction
21 p3850 A69-38951

Aerodynamic forces under space-like conditions measured by swing balance, using large scale molecular beams for rarefied hypersonic gas flow simulation [AIAA PAPER 69-1032]
22 p3924 A69-40400

Numerical analysis of plane Couette flow of rarefied binary gas mixture using relaxation type kinetic model equations, discussing slip velocity, friction coefficient, etc
22 p3931 A69-40778

Monte Carlo method applied to heat transfer in rarefied gas flow between parallel plates involving temperature jump in Knudsen layer
24 p4246 A69-43490

RAREFIED PLASMAS

NT COSMIC PLASMA

Penning discharge in inhomogeneous magnetic mirror field, observing high burning voltage at low current in rarefied hydrogen plasma
01 p0133 A69-11218

Perturbed wake behind spherical models in rarefied plasma flow, noting effects of electron temperature and electric potential of models
05 p0803 A69-16048

Structure of plane shock wave of arbitrary force propagating across magnetic field in hot rarefied plasma
07 p1190 A69-18692

Rarefied plasma self similar motion qualitatively analyzed, particularly penetration and expansion, taking into account electric/magnetic field effects
08 p1359 A69-19951

Collisionless shock waves in rarefied plasma, discussing dispersion effect and oscillatory shock wave structure
08 p1303 A69-19996

Flute instabilities in rarefied plasma with intrinsic electric field, discussing plasma density profile and uncompensation degree effects on plasma magnetic field stability
08 p1370 A69-21013

Amplitude modulated radio wave interaction with rarefied plasma in magnetic field, considering possible ionospheric heating by mechanism
09 p1453 A69-21543

Equilibration potentials between dense thrust beam and dilute space plasma measured in wind tunnel [AIAA PAPER 69-263]
09 p1568 A69-21728

Conductivity probe design for tenuous plasmas and ionized gases, discussing experimental confirmation of theoretical behavior [AIAA PAPER 68-170]
09 p1496 A69-21936

O, Ne, Si and Fe ionization equilibria in low density plasma, including dielectronic recombination and autoionization processes in calculations
09 p1543 A69-22404

Thermodynamic potential of rarefied plasma from Coulomb interactions of atoms with electrons and ions
10 p1728 A69-23134

Optical diagnostics methods for fast processes in rarefied plasma, using Michelson interferometers with ruby and Nd lasers as light sources
12 p2089 A69-26186

Rarefied Ar plasma flow current-voltage characteristics in discharge tube, noting plasma boundary layer thickness influence on saturation current
12 p2137 A69-26532

Rarefied plasma potential fluctuations when bounded by surface having complex conductivity and dispersing properties
12 p2139 A69-26712

Electric field determination from charged particle concentration in wake of body moving in rarefied plasma, noting hydrodynamics similarity
14 p2517 A69-29068

Low density cold plasma effect on stability of cylindrical layer of charged particles against electrostatic perturbations in uniform magnetic field
16 p2816 A69-31635

Amplitude modulated radio wave interaction with rarefied plasma in magnetic field, considering possible ionospheric heating by mechanism
16 p2754 A69-32538

Collisionless shock wave front turbulence in diluted plasma, including thickness, electron and ion component measurements
17 p3012 A69-33818

Damping of plane sinusoidal wave in cold collisionless plasma, studying supercritical amplitude oscillatory process
18 p3180 A69-34703

Low density plasma electrical conductivity determined by temperature and electron density measurements, using Ohm law
18 p3181 A69-35072

Multiple electrode probe characteristics in rarefied plasma flow created by ion source, noting electrode potential role
19 p3314 A69-36622

Rarefied nonmagnetic plasma in wake of body moving at higher than electron and ion thermal velocities
20 p3525 A69-37660

Perturbed wake behind spherical models in rarefied plasma flow, noting effects of electron temperature and electric potential of models
20 p3581 A69-37957

Ion temperature measurement in rarefied multicomponent plasma by temperature relation to ion beam divergence rate, comparing results to pyrometric measurements
23 p4196 A69-41839

High temperature relatively dilute plasmas, discussing equations of motion, plasma oscillations, Landau damping, plasma confinement, etc
23 p4197 A69-42311

Ionization equilibrium and radiative cooling of high temperature low density plasma, noting cosmic gas cooling curve of line emission from oxygen ion transitions
24 p4376 A69-42661

Ratio of volume emission rate of 5577 A photons to volume emission rate of one band of positive nitrogen molecule first negative system in aurora
05 p0756 A69-16360

Time rates for growth and damping of resistive instability in gaseous plasma in crossed electric and magnetic fields
08 p1369 A69-20886

Solid state sampling circuit for low pulse repetition frequencies to improve signal to noise ratio, noting ratio of holding to learning time
11 p1849 A69-24900

Ion pair annihilation average rate by single aerosol particle action in lower ionosphere noctilucent clouds
14 p2434 A69-28941

Chemical reaction-rate theory for creep tests, analyzing extrapolation equations for time-to-rupture dependence on temperature and stress
14 p2464 A69-29442

Book on rate constants of chemical reactions from flames covering flame propagation, mass spectroscopy, electron spin resonance, particles diffusion, combustion physics, etc
22 p3895 A69-40318

Numerical computation of rate-distortion function R/D for certain memoryless message sources, discussing bounds, reduction to minimization problem and applications
24 p4284 A69-42719

RATINGS

Handling-qualities rating data evaluation for low computation cost information, noting reliability estimation
21 p3664 A69-38968

Personality factors and job performance ratings relationship in radar controllers, computing Pearson correlation matrix based on age, education, motivational distortion, etc
21 p3665 A69-39169

Second order system handling qualities analysis for pilot rating through human transfer function and closed loop control
21 p3668 A69-39792

Measurement methods for quantitative character of aircraft pilot rating scales for vehicle flying qualities, considering wording ambiguity, dual mission character, etc
24 p4276 A69-43326

RATIONAL FUNCTIONS

Book on computer evaluation of mathematical functions, discussing errors, square and cube root, Chebyshev polynomials, approximation, rational function, asymptotic expansions, etc
05 p0723 A69-15955

Filter network synthesis for realization of rational functions, discussing numerator polynomial inclusion by choice of divisor polynomial and branch introduction and parallel systems

10 p1667 A69-24038

NT THRUST-WEIGHT RATIO
NT VOID RATIO

Gamma heating rate measured by aqueous dosimeter converted to rate in thin tungsten detector in water shield through transport theory calculations, obtaining correction factors

07 p1178 A69-18825

Star counts in star cluster neighborhoods, obtaining ratios of corona radius to nucleus radius as function of cluster mass

11 p1951 A69-24246

Amplitude ratio measurement for two AC signals of given relative phase shift and same frequency

17 p2975 A69-33615

RATS

Short latency antidiuresis following initiation of food ingestion by food deprived rats, noting possible signaling factor

01 p0014 A69-10860

Tyrosine transaminase activity estimation by radioactive isotopic assay method, discussing application to rat liver and other organs

01 p0014 A69-10902

Blood volume in rats exposed to high altitude and deacclimated at ambient pressure, noting changes and control level restoration

01 p0015 A69-10922

Hypoxia exposure effect on RNA synthesis in rat anterior pituitary cultured in vitro

01 p0015 A69-10923

Rats on casein, soybean and Chlorella diets for protein source noting soybean diet produced no appreciable changes in intestinal flora

02 p0197 A69-11490

Chronic gamma radiation biological damage in rats exposed to maximum nonlethal to minimum lethal doses for various periods

02 p0197 A69-11494

Cerebellar cortex function disorders of rats subjected to long acceleration under weak anesthesia

02 p0198 A69-11504

Hypoxia effects on vestibular analyzer function of rats in pressure chambers at simulated altitudes from 11,000 to 12,000 m

02 p0198 A69-11506

P32 distribution in protein of blood serum, liver and brains of rats bombarded with high energy protons

02 p0198 A69-11507

Nutritive value of protein from discolored algae biomasses on groups of rats kept on algae biomass, casein and soybean diets

02 p0198 A69-11510

Lactodehydrogenase activity and LDG isoenzymes ratio in various tissues of rats during exposure to prolonged hypoxia at simulated heights

02 p0199 A69-11982

Steroid hormones effect on nervous system and behavior from data on gonadectomized rats and monkeys treated with testosterone propionate

03 p0375 A69-13551

Critical body temperature for intracranial self stimulation in white rats

03 p0375 A69-13897

Xenon, krypton, nitrogen and nitrous oxide effect on respiration rate of rat liver slices at various oxygen partial pressures

03 p0375 A69-14069

White rat physiological processes while maintained on hypothermic cardiopulmonary bypass with small membrane type heart-lung machines

05 p0708 A69-15971

Electron microscopic changes in lungs of rats after repeated exposure to pure oxygen

05 p0709 A69-16514

Protein free diets effects on rat intestinal microflora, noting decrease in lactic acid bacteria and increase in spore forming bacteria

05 p0709 A69-16516

Thyroid gland role in resistance and myoglobin content of skeletal muscles of flat land and high altitude acclimatized white rats

05 p0709 A69-16517

Bone marrow cell division disturbance in rats after proton irradiation

07 p1064 A69-18973

Algae diet more effective than soya-protein diet in recovering metabolic processes in protein deficient white rats

07 p1065 A69-18977

Acetate carbon 14 utilization in centrifuged rats, analyzing metabolism by measuring plasma glucose, FFA and lipids synthesis

07 p1067 A69-19429

Prolonged exposure of rats to oxygen concentrations studied for effects on organisms

08 p1262 A69-19831

Hypokinesia effects on rats noting body and organ weights, liver glycogen and N content and tissue proteolysis of skeletal muscles

08 p1262 A69-19928

Prolonged hypokinesia effects on white rats resistance to convulsions induced by high altitude simulation

08 p1262 A69-19929

Adrenal epinephrine and phenylethanolamine n-methyl transferase /PNMT/ activity in rat bearing transplantable pituitary tumor

08 p1263 A69-20374

Regional uptake of melanotin from blood or cerebrospinal fluid by rat brain

09 p1444 A69-21466

Acclimation to altitude hypoxia and duration of resistance to muscular effort in white Wistar rats on treadmill

09 p1445 A69-22725

Metabolic relationship between hypoxia and hypoglycemia in Wistar rats, noting oxygen consumption, energy expenditure under insulin and hydrogen partial pressure decrease effect

09 p1445 A69-22727

Glucose, lactate, free fatty acids, hepatic glycogen and endocrine activity in fasting hibernating dormouse and rat in deep hypothermia

10 p1642 A69-23118

Hypothermia induced alterations in biochemical processes studied with isolated rat liver perfused at low temperature

10 p1642 A69-23119

Response rates of rats to periodic shocking for food reinforcement with added clock cue stimuli

10 p1644 A69-23304

Rats sensitivity to accelerations found dependent on excitation-inhibition ratio in central nervous system and hypophyseal-adrenal system reactions during acoustic excitation

10 p1645 A69-23497

Rats tolerance to impact accelerations from blood enzyme activity providing safety limits for living organisms

10 p1645 A69-23500

Glycolysis rate and lactic acid content in rats myocardium during adaptation to hypoxia, using pressure chamber

10 p1645 A69-23501

Amino alcohol regenerable absorbers of carbon dioxides toxicological characteristics, discussing absorbing ability in rats

10 p1646 A69-23502

Pathological changes in respiratory and cardiovascular systems of white rats due to various levels of hyperoxia

10 p1646 A69-23577

Oxidative and dephosphorylating enzymes and esterases in rat and squirrel monkey cerebral cortexes, noting neuron activity

12 p2018 A69-25773

Transensor implantation, sham implantation, no implantation and lighting effects on rat body composition, noting fat and water content

12 p2020 A69-26557

Protective effect of hydrocortisone in rats observed during hypoxia

13 p2210 A69-27800

Gravity preference tests on rats subjected to simulated Aerobee 150 A rocket launching and flight in ground based spiral centrifuge

13 p2213 A69-28090

Altitude effects on body chilling rate in rats noting hypoxia role in inducing hypothermia

13 p2210 A69-28532

High altitude environmental effects on adrenal glands and hypothalamic neurosecretion in rats

13 p2211 A69-28615

Calcium isotopes tracer migration in caged rats in metabolism study

13 p2212 A69-28618

Fluorides or AMOX increased concentrations effect on thyroid growth rate, uptake and adrenal weight in rats

14 p2406 A69-29291

Social and visual isolation effect on rat blood pressure, pulse pressure, heart rate, behavior and response to epinephrine

14 p2407 A69-29296

Histological changes in rat skin after 13 Mev proton irradiation, evaluating biopsies in tissue culture

14 p2407 A69-29299

Decreased antidiuretic activity measured in blood of chronically centrifuged rats, noting role of antidiuretic hormone /ADH/

14 p2407 A69-29301

Food intake changes of female rats in response to changes in energy balance, discussing steroids as physiological tracer

15 p2555 A69-30693

Constant light/darkness effects on stress response rhythm of hypothalamic-pituitary-adrenocortical system in female rats

15 p2556 A69-31330

Diurnal variations in radiation sensitivity of mice and rats to irradiation with median lethal doses, noting sine curve survival function

15 p2557 A69-31458

White rats diet containing alcohol-soluble fraction of Chlorella and Scenedesmus biomass, noting changes in adrenal cortex and renal glomerus

17 p2906 A69-32930

Antihypoxic preparations protective effect on white mice and rats subjected to gravitational accelerations

17 p2906 A69-32931

Vestibular reactions in rats under hypothermal conditions by measuring postrotatory nystagmus beats number and duration, respiration rates and rectal temperature

17 p2906 A69-32934

Drug action on decompression sickness in rats compared with action on nitrogen narcosis and oxygen toxicity

17 p2913 A69-33172

Electrode stimulated hypothalamic drinking in rats compared with drinking induced by water deprivation, noting difference in consumption

17 p2910 A69-33750

Hepatic tyrosine transaminase rhythm in rats under various conditions of lighting, food consumption and dietary protein content

17 p2910 A69-33755

Ventromedial hypothalamic /VMH/ lesions, body weight and food consumption changes in male and female rats, observing differential effects

17 p2910 A69-33756

Electron microscopic changes in lungs of rats after repeated exposure to pure oxygen

18 p3096 A69-34733

Protein free diets effects on rat intestinal microflora, noting decrease in lactic acid bacteria and increase in spore forming bacteria

18 p3096 A69-34735

Thyroid gland role in resistance and myoglobin content of skeletal muscles of flat land and high altitude acclimatized white rats

18 p3096 A69-34736

Acetate-2-C 14 conversion to C 14 carbon dioxide and C 14 fatty acids in rats with 2/3 of liver removed
19 p3257 A69-35976

Environmental crowding effect on individual and group behavior in rat colony, using implanted passive resonant circuits for identification and passage information
19 p3257 A69-36243

Norepinephrine, dinitrophenol and dicumaryl effect on brown adipose tissue of cold exposed rats
19 p3258 A69-36294

Rats locomotion in centrifugally generated gravity fields determined for in-space behavioral studies of earth organisms gravity requirements
19 p3263 A69-36457

Bone marrow cell division disturbance in rats after proton irradiation
20 p3479 A69-38221

Algae soil-protein diet more effective in recovering metabolic processes in protein deficient white rats
20 p3479 A69-38225

Lateral and ventromedial hypothalamic areas functional interaction in rats, noting bilateral cuts producing hyperphagia
21 p3650 A69-38322

Exercise effects on hepatic cholesterol of rats on diets high in saturated or unsaturated fats
21 p3653 A69-38903

Platelet role in decompression sickness pathology from experiments upon rats subjected to decompression after injection of antiplatelet serum
21 p3655 A69-38918

Intraperitoneal high polymer DNA administration normalizing effect on DNA and RNA contents in liver, spleen and intestinal mucosa of white rats exposed to X rays
21 p3657 A69-39050

Enzyme activity changes in liver, heart and cerebrum of X ray exposed rats and rabbits, noting individual enzyme differences in same X rayed organ
21 p3658 A69-39054

Successive X ray doses effect on oxidative phosphorylation of vitamin B 1 in white rats liver tissue ultrastructure during and after irradiation, establishing thiamine biosynthesis suppression
21 p3658 A69-39056

White rats hyperglycemia during blood sugar changes following single X ray dose, indicating increased sugar benefit in radiation damage treatment
21 p3658 A69-39057

Pathological effects of single 120 Mev proton doses on rats blood in rotating cylinder, discussing leukopenia and benign and malignant tumors development
21 p3658 A69-39058

Histological changes in internal organs of rats after exposure to 400 r fast neutron dose, showing destructive processes followed by compensation reactions of cellular proliferation
21 p3659 A69-39062

Pathological changes in solar ganglia cells of white rats following X ray exposure, using electron microscope
21 p3659 A69-39064

Hyperoxia and pulmonary surfactant washout in pulmonary compliance measurements of rats subjected to 100 percent diatomic oxygen before asphyxial death
21 p3659 A69-39066

Rat dental pulp hemorrhages following acute hypoxia from exposure to decompression chambers, atmospheric pressure variations or high acceleration
21 p3661 A69-39276

Rats adrenal corticosterone concentrations changes in response to ACTH, determining response sensitivity dependence on time after hypophysectomy
22 p3870 A69-39871

Electrical stimulation effect on drive specificity in lateral hypothalamus area of sated rat, suggesting fallacy in previous conclusion concerning appetite
22 p3876 A69-40269

Nutritive value of mycelium of *Cantharellus cibarius* mushroom on rats compared with eggs and fresh and sour milk
22 p3892 A69-40273

Rat survival rate after prolonged gradually decreased body temperature without motion restraint or kept in fixed position
22 p3877 A69-40278

Cerebellar cortex reactions to sciatic nerve stimulation in rats under transverse accelerations in centrifuge
22 p3877 A69-40279

Positive effect of shielding and cystamin administration on tonic and evacuator functions of rats gastrointestinal tract after gamma irradiation
22 p3877 A69-40285

Protein rates and RNA synthesis in cerebra of rats analyzed as factor of high altitude hypoxia adaptation
22 p3886 A69-41122

Anoxia effects on leucine-super 3 H incorporation by submandibular gland cells of neonatal rats, discussing cytoplasmic proteins synthesis impairment
22 p3887 A69-41195

Mechanical vibrations and noise effects on acetylcholine concentration, esterase activity and synthesis ability in rat brain
23 p4079 A69-41381

Regression process in acetylcholine level in rats after mechanical vibrations and noise exposure
23 p4079 A69-41382

Physical training effects under normal atmospheric pressure on high altitude hypoxia and acceleration resistance in rats, including survival times
23 p4079 A69-41383

Compensatory hypertrophy effects on adrenal phenylethanolamine n-methyl transferase /PNMT/ activity in rats
23 p4080 A69-41404

Enzymatic processes of glucose metabolism in immature rats lymphatic tissues during exercise-induced elevated corticosteroid secretion
23 p4080 A69-41405

Cerebral and retinal capillary permeability to ions in rats analyzed by electron microscope using Prussian blue reaction
23 p4081 A69-41433

Air and saline P-V curves of rat lungs after hyperoxia, comparing hyperoxia effects to surfactant washout on pulmonary compliance
23 p4081 A69-41440

Cytoplasmic protein synthesis mechanism using rats heart-lung preparation with precise hemodynamic parameters control, noting variance with change in cardiac work level
23 p4083 A69-41456

Tension effects on amino acid incorporation rate into proteins of cross-striated muscles of rats
23 p4083 A69-41458

Laser pulse effects on bones of rats, observing metabolic deviations in Ca 45 uptake
23 p4101 A69-41464

Exhaustion time extension in rats by altitude acclimation, noting adaptation loss resulting from physical exercise discontinuation
23 p4086 A69-41787

Pituitary-adrenocortical axis of rats in oxygen atmosphere at low pressure, finding depressed norepinephrine excretion
23 p4087 A69-41790

Increased oxygen tension adaptation and effects on adrenocortical and sympatho-adreno-medullary activity in rats, indicating toxic conversion of epinephrine to indoles
23 p4087 A69-41791

Space cabin environment simulation effects on resistance to infection caused by pneumonia and influenza virus in rats
23 p4108 A69-41832

Electrical self stimulation adaptability of hypothalamus or instrumental self reinforcing reaction in rats using skinner box technique
23 p4091 A69-42052

Unisensory and multisensory signal processing in cortical and brain stem regions of albino rat by electronic averaging and time histogram techniques
23 p4092 A69-42055

Spontaneous rhythmical activity and mean vascular tone dependence in isolated helical rat aorta strips on extracellular concentration of noradrenalin
23 p4093 A69-42069

Portal blood pressure decrease effects on diuresis in unanesthetized rats, discussing osmotic diuresis
23 p4094 A69-42074

Rodent swimming and treadmill training effect on capacity of mitochondrial fraction from hind limb muscles to oxidize pyruvate triples
23 p4095 A69-42084

Training effect on fast muscle isometric contraction in rats, discussing mechanical characteristics
23 p4097 A69-42095

Neodymium laser radiation effect on electrical and histomorphological properties of liver in rats and hamsters
23 p4111 A69-42344

Urine osmolality of centrifuged rats compared with ad libitum or pair-fed control animals, indicating enhanced free water excretion and antidiuretic hormone involvement
24 p4262 A69-42904

Noise level effects on pharmacological effectiveness of centrally acting drugs in rats
24 p4262 A69-42947

Continuous noise level effects on stabilized escape conditioning in male albino rats
24 p4262 A69-42948

Stillbirth and neonatal death in stressed rats exposed to mild and acute gravitational loads in automobile ride and aircraft flight
24 p4266 A69-43381

Radioisotopic determination of haemodynamic and bioelectric disturbances of rat striated muscles subjected to acceleration and hypokinesia
24 p4268 A69-43409

Hyperoxia and hypoxia effects on mitotic activity in regenerating and normal rat liver exposed to environmental conditions
24 p4269 A69-43565

RAWINSONDES

Middle stratospheric diurnal temperature variation based on model eliminating radiation error of rawinsonde
03 p0461 A69-13344

Rawin systems for upper air measurements of wind and thermodynamic parameters, using balloon-borne radiosonde
07 p1057 A69-19581

Clear air turbulence computerized analysis and forecast over U.S. using upper air rawinsondes measurements
22 p3976 A69-39927

Simultaneous lower atmosphere clear air turbulence analysis by multiwavelength radar, jet aircraft and special rawinsondes
24 p4342 A69-42894

RAY TRACING

Radar cross sections for arbitrary bodies calculated with computerized ray optics method taking into account depolarization
02 p0209 A69-12332

Antarctic spread F irregularities, examining models and performing ray tracing
04 p0595 A69-15439

Ray tracing of Z-mode in tilted layer ionosphere to explain Z-mode echoes in ionograms
05 p0758 A69-16412

Nonvertical propagation effects on high altitude topside ionosphere sounder data reduction, using ray tracing
07 p1124 A69-18838

Formulas for ray paths in ionized layers with application to oblique ionograms and duct modes
07 p1078 A69-18913

Ray-optical description for point source excited surface waves in stratified anisotropic media
07 p1079 A69-18918

Earth dipole magnetic field effect on bearing deviation in HF transionospheric propagation analyzed by computer ray tracing
07 p1086 A69-19224

Ray path geometry derived by Poynting vector to calculate surface fields due to creeping waves in sphere planes
08 p1274 A69-20046

Statistical characteristics of transverse shifts of ray directions in turbulent atmosphere for arbitrary wave parameter values
10 p1657 A69-23942

Ray tracing application to evaluating aberrations produced by Fresnel holograms for optimizing design of aplanatic lens holography system
11 p1885 A69-24848

Propagated ray paths plotted as functions of frequency and launch angle to predict signal dispersions
11 p1837 A69-25003

Ray tracing techniques applied to internal gravity waves in fluid with spatially varying mean flows
12 p2067 A69-26345

Ionograms in vertical depletion duct in horizontally stratified isotropically refractive plasma, considering vertical propagation and ray paths traces dependence on electron concentration
14 p2434 A69-28945

Polar aurora rays mean length diurnal variations determined from photographic and visual observations in Tiksi bay
14 p2437 A69-29077

Stellar image vibration amplitude dependence on trace direction by comparison with traces of moving satellites
15 p2647 A69-30166

Differential equations as Hamiltonian function for signal path, travel time and frequency variation in anisotropic nonpermanent absorbing medium
17 p2924 A69-33836

Fokker-Planck equation applied to probability density for finding rays larger than correlation distance during propagation in random medium
17 p2926 A69-33854

LF radio waves propagation in ionosphere by combining ray tracing in complex space with geometrical theory of diffraction, including diffraction by earth
17 p2928 A69-33866

Computer quadratic method of evaluating ray propagation data for estimating inhomogeneous media properties
18 p3172 A69-34667

Propagation characteristic model study of kinked Z trace observed on topside ionograms and explained by magnetoionic theory
20 p3531 A69-37893

Ray theory of radial propagation by two variation techniques of phase paths
21 p3675 A69-39279

Diffuse coronal emission observation during total eclipse of February 1961 near solar prominences and polar ray form investigation in northern part of corona
22 p4002 A69-40002

Acoustical ray tracing in horizontally layered and vertically sectioned atmosphere on digital computer using shifting Cartesian coordinate system
23 p4154 A69-41532

Solar grazing ray absorption calculated by tracing through earth atmosphere, noting extinction for arbitrary ozone and aerosol profile
24 p4350 A69-43013

RAYLEIGH DISTRIBUTION

Energy gain during diversity reception in presence of random noise calculated, considering signal and noise amplitudes Rayleigh fluctuations
11 p1835 A69-24968

RAYLEIGH EQUATIONS

Difference method for parabolic differential equations solution for Rayleigh boundary layer in dissociating gas, using integral estimates to determine stability
18 p3124 A69-35295

RAYLEIGH NUMBER

Relation between Rayleigh and dynamic Richardson numbers in atmospheric boundary layer in presence of cellular convection
09 p1491 A69-22709

Model evolution of flow in fluid layer suddenly heated from below at Rayleigh number convection sufficient for turbulence
11 p1874 A69-25351

Wavelength of convective motions, discussing effects of lid heat conductivity on Rayleigh number
11 p2003 A69-25354

Dependence of convection in planetary interiors upon magnitude of Rayleigh number for rigid and free surfaces
12 p2155 A69-26208

Cellular convection suppression by parallel vertical thermally conducting walls inserted into bottom-heated fluid, analyzing effect on critical Rayleigh number
13 p2374 A69-27782

Benard convective flow as function of Rayleigh and Taylor numbers in thin variable rotating silicone oil layer determined by flow photographs
13 p2377 A69-28172

Two dimensional laminar convection cells asymptotic behavior for high Rayleigh number, discussing Robinson and Pillow models for fluid between horizontal plates heated from below
16 p2767 A69-31588

Relation between Rayleigh and dynamic Richardson numbers in atmospheric boundary layer in presence of cellular convection
16 p2808 A69-32488

Thermal convection in horizontal fluid layer heated from below, with zero shear boundaries above and below, noting critical Rayleigh number measured value
20 p3518 A69-38234

Electrohydrodynamic Rayleigh-Taylor bulk instability in initially static stratified fluid under electric stress
20 p3578 A69-38235

RAYLEIGH-RITZ METHOD

Convergence of Rayleigh-Ritz approximations to solution of elliptic boundary value problem applied to subsonic airfoil problem for 2D steady isentropic irrotational flow
03 p0361 A69-12846

Rayleigh-Ritz finite element method for approximate solution of nonlinear energy functional describing large

deflection bending behavior of uniform beam under point loads
05 p0833 A69-15711

Large deflection behavior of shallow circular arch subjected to vertical point load by nonlinear Rayleigh-Ritz finite element method, discussing deformation path
08 p1411 A69-20140

Higher order Rayleigh-Ritz approximations to eigenvalues and eigenfunctions of elliptic boundary value problem
09 p1534 A69-22798

Modified Rayleigh-Ritz method for prediction of stress concentration in elastostatic problems for elastic continua, noting plate bending
11 p1969 A69-24413

Free vibrations of laminated anisotropic rectangular plates with clamped edges analyzed by Rayleigh-Ritz energy method
13 p2371 A69-28673

Finite element analysis of nonlinear elastoplastic material-geometric behavior problems, describing computer program and incremental stiffness matrices
18 p3219 A69-34664

Finite element techniques of structural analysis for missile and space structures, including Apollo computerized analysis and structural optimization
19 p3438 A69-36324

Convergence of Rayleigh-Ritz approximations for variational problem, considering functionals of scalar valued function
24 p4339 A69-42793

RAYLEIGH SCATTERING

Monostatic radar cross section of simple shapes estimated using optics and Rayleigh region approximation with emphasis on multiple reflection
03 p0384 A69-12905

Bistatic radar cross sections of simple shapes calculated based on optics and resonance region, noting forward, nonforward and Rayleigh scattering
03 p0384 A69-12906

Scattering from coated absorbing conducting bodies, considering flat plane and curved surfaces in Rayleigh region
03 p0384 A69-12908

Stokes and Rayleigh layer formation during solid body rotation of semiinfinite fluid and infinite disk
03 p0417 A69-13797

Directional intensity of radiation emerging from top and bottom of Rayleigh scattering atmosphere
03 p0426 A69-14026

Rayleigh scattering from circularly birefringent media generalized for medium with no preferred internal axes
04 p0609 A69-14291

Flux equivalences of reflected and transmitted radiation among Rayleigh, isotropic and other scattering models
04 p0687 A69-15281

Rayleigh scattering cross sections for He, C, N and O compared with corresponding absorption coefficients, noting opacity of H deficient stars
06 p1002 A69-17319

Rocket-borne Rayleigh scattering instrumentation to measure atmospheric density, discussing instrumentation and flight results
06 p0927 A69-17698

Depolarized Rayleigh line widths measured for carbon dioxide, nitrogen and hydrogen, using measurements to calculate reorientation cross sections [IEEE PAPER B-11]
07 p1157 A69-19485

Radiation field at optical depths within plane parallel Rayleigh scattering atmosphere subjected to generalized free surface boundary conditions
09 p1606 A69-22423

Atmospheric extinction function in Chile by using photoelectric spectrum scans, observing neutral component, Rayleigh scattering and ozone absorption variations
10 p1777 A69-23386

Jupiter polarization wavelength dependence noted in observations of 5 seconds diameter regions near poles and equator related to Rayleigh- Chandrasekhar molecular scattering theory
13 p2348 A69-27805

Light scattering in single component systems near critical point analyzed by critical phenomena classical theory and Rayleigh theory
14 p2485 A69-28995

Rayleigh assumption validity for wave scattering by analytic periodic surface predicated on solutions analytic continuation across boundary, discussing Green function role
15 p2652 A69-30673

Wavelength dependence of polarization of sunlight scattered by Venus atmosphere, including Rayleigh and Mie scattering mechanisms
16 p2860 A69-32237

Plane electromagnetic wave scattering by motion of small ellipsoid in vacuum, noting total scattering and radar cross sections dependence on ellipsoid velocity
18 p3105 A69-35485

Radiation scattering by thick planetary atmosphere according to Rayleigh law, considering luminance variation and absorption ray polarization
23 p4213 A69-41698

Book on new concepts in radars covering ideal reception, moving targets, autocorrelation, SNR, amplitude distribution, clutter, etc
24 p4283 A69-43168

RAYLEIGH WAVES

Incipient stress corrosion damage detection in aluminum alloys, using Rayleigh wave attenuation
12 p2114 A69-26306

Book on solid bodies collision theory covering elastic bodies with ruled surfaces, dynamic effects associated with Rayleigh surface waves, thermodynamic effects, etc
18 p3210 A69-34259

Forced recombination scattering of light on Rayleigh polarization waves in isotropic solid body with small elastooptical constants
21 p3770 A69-38963

RRE

U RELATIVE BIOLOGICAL EFFECTIVENESS [RBE]

RC CIRCUITS

Equivalent circuits for transient characteristics approximation of distributed RC circuits
01 p0046 A69-10779

Inverse Laplace transform determination method for periodic functions applied to rectangular pulse train and rectified sine wave
02 p0271 A69-11983

Analysis and design of synchronous filter compatible with microelectronics requirements, switching N monolithic RC thin film devices to signal source of resistance
03 p0403 A69-13206

Active RC low pass filters sensitivity to component changes, discussing effect of below minimum limit value
04 p0578 A69-15070

Autocorrelation function distortion determined for Barker signal passing through linear system and RC filter, noting passband influence on function shape
05 p0720 A69-16443

3-terminal gyrator circuits using operational amplifiers, noting exact cancellation of negative by positive resistance and unattainability of LF unstable modes
06 p0893 A69-16936

RC converter filters and delay lines by expanding transfer function into series of components
07 p1113 A69-19677

Delta functions spectrum in reciprocal time domain for LC and RC structures due to impulse response in distributed parameters
09 p1471 A69-21327

Transient analysis for uniform RC structures using impulse excitations in open and short circuit configurations
09 p1471 A69-21328

Precision trimmed RC active networks for high selectivity microelectronic filter fabrication for frequency division multiplex applications
09 p1466 A69-22452

Glass covered microwire technology to realize RC element, analyzing equivalent element errors by simulating irrational transfer functions
09 p1476 A69-22677

Multiple loop feedback systems synthesis utilizing extended node introduction synthesis theory, considering filter response functions characteristics
10 p1667 A69-24037

RC circuit with variable time constant using variable resistor
10 p1667 A69-24046

Rectangular RC distributed circuits with shaped electrodes, analyzing short circuit admittance parameters
11 p1858 A69-24938

Load admittance effect on low pass voltage transfer characteristics of RC lines, analyzing shaped lines at open circuit under terminated conditions
11 p1859 A69-24939

Multivibrator circuit for generation of oscillations with frequency stability against transistor ambient temperature changes

12 p2036 A69-25919

High sensitivity LF and HF frequency deviation meter with resonant RC amplifiers for frequency discrimination and filtering

12 p2038 A69-26337

Transistorized LF-HF RC filters and current amplifiers design, exhibiting polynomial type characteristics

12 p2040 A69-26488

Autocorrelation function distortion determined for Barker signal passing through linear system and RC filter, noting passband influence on function shape

16 p2753 A69-32475

Multiloop feedback in active distributed RC networks for low parameter sensitivity with low amplifier gain compared to single loop circuits

18 p3111 A69-34679

Statistical analysis of operation of precision electric spark machine servosystems with RC generator based on working pulse peak voltage distribution

23 p4168 A69-41307

Distributed RC networks combined with lumped passive and active elements to produce distributed-lumped-active (DLA) networks for filter requirements

23 p4144 A69-41401

RDX

Slowly exploding wires for igniting self sustaining deflagrations in PETN, RDX, HMX and tetryl, comparing circuit parameters for detonation initiation

01 p0141 A69-10678

REACTANCE

Parasitic reactance disturbing attenuation and return loss of reactance filters, discussing correction of numerator polynomial of characteristic function

08 p1283 A69-20128

Equivalent circuit synthesis with six reactances-two terminal network bridges

08 p1295 A69-21166

Antenna reactance from sounding rocket in ionosphere, showing variations relationship to rocket spin period

22 p3934 A69-39964

REACTION CONTROL

Sublimation solid reaction control, discussing propellants, nozzle performance, sublimation area, power, pressure drop, response and valueless design [AIAA PAPER 68-516]

04 p0552 A69-15322

REACTION JET ATTITUDE CONTROL

U ATTITUDE CONTROL

U JET THRUST

REACTION JETS

U JET FLOW

U JET THRUST

REACTION KINETICS

Resonance theory of thermomolecular recombination kinetics applied to hydrogen atoms

01 p0122 A69-10034

Diffusional, thermal-diffusional and thermal fluxes in multicomponent flames, discussing flame structure and reaction kinetics

01 p0175 A69-10144

Glycolysis rate role in regulation of substrate inhibition of dehydrogenases

01 p0015 A69-10931

Refractory metals interactions with gases in vacuum and inert gas environment, noting temperature and pressure effects on reactions, extent and kinetics

01 p0099 A69-11042

Reaction rate and mechanism for low temperature reaction between lithium hydride and liquid ammonia, noting chemisorbed ammonia dissociation at interface

01 p0025 A69-11285

Diacytlenic burning and spontaneous combustion regularities, determining reaction kinetics at moderate temperature

02 p0351 A69-11981

Adiabatic stirred reactor, discussing steady state nonlinear equations of reactant gases combustion

02 p0352 A69-12316

Explosion limits in hydrogen-oxygen reaction measured in diffusion regime, giving rate constant of branching step

02 p0353 A69-12319

Reactions kinetics contribution to nonequilibrium recombination occurring in supersonic nozzle flow of combustion products of hydrogen in air

02 p0353 A69-12488

Chain and branched halogen-hydrogen reactions kinetic analysis for developing chemical laser with radiation energy weakly dependent on pumping energy

02 p0259 A69-12645

Dissociative velocity rates of oxygen and ozone in ionosphere obtained by exponential approximation for molecular concentration distribution

02 p0246 A69-12769

Chemical reaction scheme effect on hot zone structure of hydrogen-oxygen diffusion flame, considering influence of hydroxyl radical

03 p0531 A69-12895

Subcritical crack growth kinetics in high strength materials, suggesting growth rate control by reaction rate or diffusion

03 p0449 A69-13874

Combination rate constants for H-F-O reactions, discussing expressions and relative efficiencies with Argon as third body

04 p0646 A69-14743

Hydrazine decomposition in glow discharge, analyzing emission spectra and threshold level of decomposition by gas chromatography

04 p0646 A69-14860

Thermal reaction kinetics of pyrolytic products of proline, leucine, arginine and lysine in aqueous solution

05 p0716 A69-15627

Equations describing chemical kinetics and conservation law derived for ionization relaxation processes behind shock wave front in air

05 p0746 A69-15891

Austenitic Fe-Ti alloys sulfur solubility and internal sulfidation rate computed, noting stronger Ti-S interaction with temperature decrease and sulfur diffusion role

06 p0942 A69-17226

Chain reaction theory defining kinetic mechanism giving rise to explosion, noting conservation of free valences and formation and disappearance of radicals

06 p1031 A69-17415

Slow oxidation and self ignition in gaseous phase, discussing cold flames and interpretation of experimental data

06 p1031 A69-17416

Flame establishment and propagation in gas phase taking into account aerodynamic and chemical kinetics

06 p1031 A69-17418

Liquid phase radical oxidation with intermediate and end products in same phase, discussing products, hydroperoxidation and liquid systems explosiveness

06 p1032 A69-17425

Reaction rates coefficients of oxygen ions with molecular oxygen and nitrogen in nighttime F region over Moscow based on loss coefficient estimate

06 p0919 A69-17724

Activation energies in baffle stabilized flame deduced from reaction zone using gas chromatography

06 p1035 A69-17930

Supersonic molecular beam sampling system for coupling mass spectrometer to alkali metal-air reacting flow system in kinetics study, noting gas dynamic effects

[AIAA PAPER 69-94]

06 p0930 A69-18099

Chemical kinetic model for hydrocarbon fuels combustion and application to multidimensional finite difference mixing analyses in hypersonic engines and nozzles

[AIAA PAPER 69-86]

06 p1037 A69-18119

Solid propellant burning rates from condensed phase decomposition kinetics, discussing kinetic rates of thermal decomposition

[AIAA PAPER 69-145]

06 p1039 A69-18182

Finite kinetics calculations by computer programs to generate reactions among prescribed reactants

[WSCIPAPER 68-54]

07 p1072 A69-18314

Chemical kinetic numerical integration techniques applied to equations for chemical relaxation

[WSCIPAPER 68-45]

07 p1073 A69-18315

Adiabatic kinetic calculations of chemical additive effects on ignition delay of hydrogen-oxygen-argon gas mixtures

[WSCIPAPER 68-52]

07 p1239 A69-18316

Kinetics calculations in shock tube data interpretation, determining elementary rate constants and complex reaction mechanism

[WSCIPAPER 68-50]

07 p1073 A69-18319

Chemical kinetic data evaluation, discussing compilation, production and publication programs, material content and arrangement and reliability estimates

[WSCIPAPER 68-47]

07 p1073 A69-18320

Gas dynamics effects of hot spot in explosive gas mixture using kinetic rate equations, discussing composition, enthalpy and time dependence

[WSCIPAPER 68-53]

07 p1240 A69-18322

Reaction kinetics package for pyrolysis and combustion of aliphatic hydrocarbon molecule, considering reaction rates definition

[WSCIPAPER 68-37]

07 p1073 A69-18353

Composite solid propellants ignition response measured by imbedded hot wires indicating distributed reaction

[WSCIPAPER 68-36]

07 p1201 A69-18354

Ignition time of methane and acetylene, considering concentration and thermodynamic properties during reaction

[WSCIPAPER 68-41]

07 p1240 A69-18356

Nitrogen ion number density time dependence by mass spectrometric probing of decaying nitrogen plasmas, noting molecular ion production by colliding metastable nitrogen molecules

07 p1184 A69-1914

Variational solution of linearized molecular chemical-kinetic Boltzmann equation, discussing perturbation of Maxwell distribution, nonequilibrium correction to reaction rate and activation energy

07 p1185 A69-19301

Two body rate coefficients for charge transfer reactions of nitrogen, oxygen and NO positive ions to Na atoms measured using flowing afterglow system

07 p1185 A69-19303

Oxidation kinetics of niobium titanium alloy in air and oxygen at 1000 C, analyzing nitrogen and pressure effects

08 p1331 A69-20193

Oxidation kinetics of niobium titanium alloy in air and oxygen between 650 and 1000 C, analyzing activation energies and nitrogen effects

08 p1331 A69-20194

Phase identification and microstructural effects of gaseous nitrogen reaction with binary Nb-Ti alloys at 1000 C

08 p1331 A69-20195

Ammonium perchlorate decomposition kinetics at high temperatures by measuring loss of weight in samples and gas evolution

08 p1375 A69-20339

Platinum electrode study of electrochemical oxygen reduction in nonaqueous media, including kinetic effects of different water concentration levels

08 p1268 A69-20361

Cobalt chromium alloys high temperature oxidation kinetics, discussing thermographic study of oxidation rate and oxygen pressure role

[ECS PAPER 413]

08 p1332 A69-20364

Monograph on kinetic study of fast gas reactions with shock waves covering thermal decomposition of nitrous oxide, hydrazine tetrafluoride and nitrogen tetrafluoride

08 p1304 A69-20707

Adsorption kinetics of hydrocarbon oxidation on platinum electrode

08 p1268 A69-21052

General expressions derived for numerical stellar-interior calculations for nuclear reaction rates, emphasizing density-temperature combinations

09 p1606 A69-22418

Nozzle flow temperature patterns of relaxing combustion gases compared at different temperatures and pressures, using kinetic-chemical calculations

[DVL-896]

10 p1809 A69-23644

Critical conditions in spherical reacting mass, noting oscillatory nature of critical parameters in truncated Arrhenius rate on basis of nontruncated form

11 p1998 A69-24480

Liquid rocket propellants chemical reactions identification during kinetic expansion

[WSCIPAPER 68-7]

11 p1942 A69-24906

Chemical reaction rate data for propellant systems containing boron or aluminum and hydrogen, chlorine and fluorine, based on finite kinetics expansions

[AIAA PAPER 69-182]

11 p1940 A69-24907

Planning, instrumentation and analysis of shock tube experiments in chemical kinetics, noting gas phase reaction rates at high temperatures

11 p1863 A69-25015

Combustion chemical reactions kinetics of gaseous phase systems, discussing temperature, reaction rates extrapolation, hydrogen and hydrocarbons

11 p2000 A69-25185

Combustion mechanism of condensed inflammable systems such as gunpowder and other explosives, discussing combustion stability

11 p2000 A69-25187

Ion-molecule reaction kinetics in nitrogen-hydrogen mixtures using ion cyclotron resonance

12 p2131 A69-25985

Annealing effects on titanium oxidation kinetics, indicating no relation between oxide formation and diffusion anisotropy of oxygen

12 p2112 A69-26039

Desorption kinetics of atomic and oxide phases, analyzing composition of surface film formed from W and Mo single crystals interaction with oxygen
12 p2026 A69-26115

Ruby and neodymium glass traveling wave laser free generation spectra kinetics, noting mode transitions as function of pumping levels
13 p2271 A69-27655

Extinction kinetics of monopropellant droplet burning in inert gas reservoir with atmospheric temperature lower than adiabatic combustion temperature
13 p2378 A69-28250

HNO role in hydrogen-NO reaction rate data reexamined by numerical integration of governing differential equations
13 p2218 A69-28457

Neutral gas ionization in lower ionosphere, discussing physicochemical reactions, recombination coefficients, equilibrium processes, etc
13 p2255 A69-28540

Reaction kinetics between hydrazine and esters in benzene solution at 55 C, using amides as catalytic agents
14 p2409 A69-29033

Carbon dioxide dissociation by electron impact, determining reaction rate in positive column of DC glow discharge
14 p2488 A69-29095

Vacuum thermal decomposition of molybdenum sesquisulfide into metallic Mo, discussing reaction kinetics, mass transfer, diffusivity of sulfur gas, etc
14 p2467 A69-29287

Nb-Ta alloys oxidation kinetics at high temperature and structure and composition of oxide films and scale layers, discussing anomaly in oxidation rate temperature dependence
14 p2464 A69-29650

Electron pulse radiolysis of NO, determining absolute yields and rates of formation of nitrogen dioxide and nitrogen trioxide
14 p2410 A69-29928

Advanced liquid fuels and oxidizers development from rocket propulsion reaction principle
16 p2828 A69-31747

Induction period of reactions behind incident shock waves traveling through undiluted high temperature CO and molecular oxygen mixtures, using CO flame spectra
16 p2877 A69-31768

Removal rate of reaction water from fuel cells by diffusion-condensation procedure as function of temperature and electrolyte concentration
16 p2736 A69-32200

Reaction rate constants of ion-molecule interchange reaction as function of temperature, flow velocity, activation energy and constant part of steric factor P
16 p2747 A69-32312

Nitrogen reaction with excess fuel in ramjet engines, noting kinetic limitations in applications
[WSCl PAPER 69-12] 16 p2831 A69-32351

Thermal decomposition behavior of perchlorate oxidizers studied by flash mass thermal analysis for determining propellant combustion kinetics
[WSCl PAPER 69-19] 16 p2832 A69-32357

Medium temperature fuel cells advantages including improved electrochemical reaction kinetics, water and heat removal
16 p2739 A69-32417

Electrochemical oxidation of hydrocarbons on platinum electrode, discussing adsorption kinetics
16 p2740 A69-32423

Collection of articles on ramjets including reaction propulsion, hypersonic inlets, combustion problems, Griffon aircraft, storable liquid fuels, etc
16 p2837 A69-32608

Chemical reactions in compressible turbulent mixing flows, analyzing flow characteristics, rate equation and Reichardt theory
[AIAA PAPER 69-537] 16 p2747 A69-32701

Kinetics of combustion promotion of hydrogen-hydrocarbon mixtures by active particles, free atoms and free radicals using differential equations
17 p3069 A69-33139

Chemical reactions activation energy at high temperature, noting cross section shape role for deducing activation energy from rate data
18 p3099 A69-34443

Criteria to predict flow instabilities triggered by exothermic reaction presence in high temperature reaction kinetic shock tube studies
18 p3116 A69-34462

Kinetics of titanium oxidation in transitional range at high temperatures, showing agreement with oxidation model
18 p3157 A69-35252

Sulfur hexafluoride dissociation in argon at various temperatures and pressures, using shock tube techniques to determine unimolecular parameters
18 p3100 A69-35475

Computer program for numerical integration of chemical reaction rate equations behind steady state hydrogen-oxygen shock wave
19 p3451 A69-36366

Free radicals destruction rates by gamma irradiation at 77 K measured as first order function of dosage, using electron spin resonance spectroscopy
19 p3265 A69-36376

Finite chemical reaction rate detonation wave interaction with rarefaction wave, noting mixture activation energy and heating power influence
19 p3298 A69-36384

Rate coefficient for primary process in removing molecular nitrogen in high vibrational levels from active nitrogen by N atoms
19 p3379 A69-36424

Electron reactivity of one equivalent oxidizing agents at ZnO surface by electrochemical reduction
19 p3392 A69-36731

Ordered sets of Massieu thermodynamic characteristic speeds for reacting gas mixtures relevant to nonequilibrium flow fields compared to Laplacian and Newtonian speeds
19 p3452 A69-36802

Thermal energy rate constants of ion-molecule reactions in gaseous hydrogen, deuterium and HD, using ion cyclotron resonance method
20 p3578 A69-36934

Rate coefficients for chemiluminescent reactions of excited He with N, O, carbon monoxide and dioxide determined from spatial dependence of visible emission
20 p3483 A69-36936

Deactivation rate constants of carbon dioxide vibrationally excited by high temperature collision with carbon dioxide or nitrogen molecules, describing laser apparatus and reaction cells
20 p3578 A69-36937

Resonance theory of thermolecular atomic recombination kinetics based on transition complexes identification as quasi-bound states or orbiting resonances
20 p3579 A69-37345

Niobium carbide formation on graphite from gaseous niobium pentachloride and Ar mixtures, discussing parameters affecting layer growth rate
20 p3566 A69-37367

Ion-molecule reaction rate constants measurement by ion cyclotron resonance, assuming no ion and neutral gas molecules collisions
20 p3579 A69-37495

Molybdenum disilicide oxidation kinetics at various temperatures by thermal conductivity method, determining oxidation rates and activation energy
20 p3567 A69-37780

Carbon monoxide displacement rate of oxygen from combination with oxyhemoglobin solutions from human adult and fetal, horse, goat, dog, cat and rabbit
21 p3650 A69-38384

Ammonium chlorate thermal decomposition by measuring formed noncondensable gas pressure and weight loss in solid state kinetic investigation
21 p3669 A69-38800

Corrosion kinetics in metals using electrochemistry, stressing polarization techniques
21 p3749 A69-39494

Ammonium perchlorate decomposition, discussing high and low temperature reactions, combustion, catalysts and gaseous environment effects
21 p3784 A69-39593

Elemental fluorine reactions with Ni, Cu, Fe, Ti, Be, Al, Zr and Ag, giving reaction rate constants, activation energies, etc
21 p3670 A69-39706

Spectroscopic measurements of weakly ionized Ar plasma premixed with diatomic N in plenum chamber, demonstrating role of competitive reactions for metastable Ar atom
21 p3779 A69-39794

Vibration relaxation time and dissociation rate constant of carbon dioxide in high temperature shock waves, using IR emission
21 p3775 A69-39801

Adsorption kinetics in ternary mixture of nitrogen, methane and hydrogen, using concentration-time/breakthrough/curves measurement on activated coconut shell charcoal
[NAS-NRC PAPER H-4] 22 p3981 A69-40629

Thermodynamic properties of exchange reaction of Ti, Nb, Mo and W disilicides with graphite and pyrographite systems
22 p3970 A69-40638

Doped silver carbonate defect structure and doping effect on reaction kinetics by X rays and electron paramagnetic resonance, finding new crystal structure
22 p3993 A69-40720

Major ions in chemi-ionization of hydrocarbon flames determined for heats of formation by photoionization mass spectrometer
22 p3896 A69-40727

Kinetic processes in gases and plasmas covering molecular transport equations, transport coefficients, chemical reactions as collision processes, etc
23 p4193 A69-41511

Chemical reaction kinetics in high temperature gases in terms of collision theory, discussing gaseous statistics and Boltzmann equation
23 p4113 A69-41518

Macroscopic rate coefficient relation to microscopic chemical reaction cross section, discussing microscopic reversibility and balance
23 p4113 A69-41519

Carbon monoxide dissociation at high temperatures observed spectroscopically, finding complex reaction chain with diatomic C as intermediate
23 p4113 A69-41692

Hydrogen-air reaction kinetics analyzed using standing wave normal shock noting wall effects, ignition delay and recombination
[AIAA PAPER 67-479] 23 p4239 A69-41893

Boron tribromide-oxygen reaction kinetics effects on IC base diffusion uniformity, correlating uniformity with electrical properties
24 p4360 A69-42760

Reaction broadening in hydrogen-oxygen diffusion flame for slow hydrogen dissociation, using matched asymptotic expansions
24 p4408 A69-42920

Molecular vibrational relaxation effect on dissociating airflow behind shock wavefront, giving relations to chemical reaction rates in diffusion approximation
24 p4302 A69-43486

Charring ablator char zone nonequilibrium flow and chemical reaction kinetics as function of temperature, using thermal environment simulator
24 p4409 A69-43512

Prebiological chemical evolution, studying synthesis and degradation rates relationship at primitive environment energy levels
24 p4269 A69-43514

Supersonic flow stability with energy input applied to reaction kinetics of processes in aircraft and rocket combustion chambers
24 p4248 A69-43642

REACTION TIME

Chemical kinetic data evaluation, discussing compilation, production and publication programs, material content and arrangement and reliability estimates
[WSCl PAPER 68-47] 07 p1073 A69-18320

Reaction kinetics package for pyrolysis and combustion of aliphatic hydrocarbon molecule, considering reaction rates definition
[WSCl PAPER 68-37] 07 p1073 A69-18353

Arbitrary human motions coordination in reorganization phases determined during weightlessness for cyclographic analysis of adjustment time
07 p1065 A69-18979

Chromium oxide additions effects on reaction rates decrease during ammonium perchlorate and nitrate combustion
08 p1375 A69-20340

Response time of semiconductor diode from dependence of equivalent capacitance on direct displacement current
08 p1287 A69-20889

Response rates of rats to periodic shocking for food reinforcement with added clock cue stimuli
10 p1644 A69-23304

Psychomotor reaction time and monkeys, myogenic tonus at rest and precision of monkeys during rocket flights along ballistic curve, noting weightlessness effect
10 p1646 A69-23575

Chlorine pentafluoride formation from chlorine in anhydrous hydrogen fluoride in electrochemical cell, noting formation rate
13 p2217 A69-28135

Yttrium effect on rate of thermal decomposition of silver carbonate powder and pressed pellets by isothermogravimetric analysis, examining water vapor, Co 60 gamma radiation and temperature effects
15 p2561 A69-30442

Reaction rate theory for dilatational failure of heterogeneous materials subjected to stress
15 p2710 A69-30813

Accelerate-stop criteria examined from human engineering standpoint, discussing flight simulator study of pilot reaction times for transition to rejected takeoff configuration [AIAA PAPER 69-772] 19 p3244 A69-35650

Ion-molecule reaction rate constants measurement by ion cyclotron resonance, assuming no ion and neutral gas molecules collisions 20 p3579 A69-37495

Arbitrary human motions coordination in reorganization phases determined during weightlessness for cyclographic analysis of adjustment time 20 p3479 A69-38227

Mandrax and barbiturates effects on aircrew reaction time, response time and tracking ability 21 p3661 A69-39274

Sensory auditory and visual signals characteristics effects on human reaction time, noting different results for unilateral and bilateral signal pairs 23 p4083 A69-41454

Propellant ignition delay in contact of condensed fuel with hot reactive gas in shock tube, using graphical method and surface temperature fractional increase 23 p4199 A69-41897

Circadian periodicity of human reaction times tested during normal diurnal cycles and 24 hour wakefulness, noting acoustic and visual stimuli effects on learning 24 p4267 A69-43387

Isotopic exchange reaction rate between O 18 and CO in shock tube coupled to time of flight spectrometer, noting rate increase with time 24 p4353 A69-43807

REACTION WHEELS

Semiautomatic gravity gradient stabilization system design for low altitude earth oriented spacecraft attitude control, using active reaction wheel scanner 07 p1227 A69-18334

Vibrating momentum exchange device (VMED) in single axis configuration as competitor for inertia wheel or twin gyro 09 p1538 A69-22435

Advanced reaction wheel controller for spacecraft attitude control, discussing brushless DC motor role in weight and power reduction and control precision [AIAA PAPER 69-855] 21 p3822 A69-39383

Suboptimal attitude control system for Nimbus satellite using motor-driven inertia wheels as control torque source for three dimensional control 21 p3826 A69-39642

U RADIOCHEMISTRY

REACTOR CORES

In-core thermionic sodium cooled uranium oxide fueled reactor for space vehicle power plant 02 p0279 A69-12666

Beryllium reflector distortion in Plum Brook Reactor due to neutron embrittlement and gas formation, noting material surveillance, replacement, etc 03 p0465 A69-13131

Cavity reactor consisting of dilute fuel core surrounded by moderating reflector to attain very high temperatures in gaseous cores 07 p1179 A69-18954

Nuclear rocket propulsion, discussing solid core and fluid core systems for reactors, nozzles, feed systems, control, component design and performance 11 p1914 A69-25590

Uninsulated in-core thermionic reactor design permitting diode series connections to build output voltage 14 p2398 A69-29186

Out-of-core thermionic systems with heat pipes usable in space applications, meeting advanced auxiliary power and nuclear propulsion requirements 14 p2480 A69-29188

Thermal neutron flux perturbations in cylinders in test reactors, using regression analysis to obtain polynomials for flux perturbation, depression, self shielding factors, etc 20 p3575 A69-38274

Induction plasma device of continuous operation to simulate NASA designed gas core space propulsion reactor [AIAA PAPER 68-712] 22 p3979 A69-40548

West German research in thermionic diodes and reactors, describing terrestrial version of thermal in-core thermionic reactor project 23 p4188 A69-42258

REACTOR DESIGN

Thermionic reactor systems, discussing fissionable material content, power output, specific power, component mass, total mass and design 02 p0279 A69-12662

In-core thermionic sodium cooled uranium oxide fueled reactor for space vehicle power plant 02 p0279 A69-12666

Cavity reactor consisting of dilute fuel core surrounded by moderating reflector to attain very high temperatures in gaseous cores 07 p1179 A69-18954

Nuclear reactors for powering electrical engines and current supply for satellite devices, noting ROVER project and KIW1 reactors 07 p1179 A69-19739

Thermionic reactor systems, discussing hybrid nuclear rocket/nuclear electric Mars mission, design features, performance and electric power characteristics 14 p2480 A69-29183

Thermionic reactor design for electric propulsion with emphasis on reactor power and fuel energy and fast neutron flux 14 p2509 A69-29184

Uninsulated in-core thermionic reactor design permitting diode series connections to build output voltage 14 p2398 A69-29186

Water moderated beryllium reflected reactor design for testing NERVA or Rover type fuel elements in nuclear environment, noting core location [AIAA PAPER 69-513] 16 p2810 A69-32656

Reactor testing, fuel elements and support materials for nuclear rocket program, discussing Phoebe 2A, Pewee 1 and nuclear furnace [AIAA PAPER 69-556] 16 p2811 A69-32739

Heat exchanger type low power solid-core fast nuclear rocket design, discussing fuels, safety aspects and space propulsion applications 17 p3004 A69-33342

Gas core reactor curved porous walls geometry tested with clear and smoky air injection, noting mass flow ratio in reactor cavity 18 p3171 A69-35181

Performance, size, weight, operational characteristics and cost estimates of ZrH reactor-organic Rankine power systems 23 p4189 A69-42265

Brayton-B generator for 2-10 kwe production, describing design, heat source/rejection, efficiencies and preliminary test data analysis 23 p4071 A69-42278

U NUCLEAR FUELS

REACTOR MATERIALS

Beryllium cermet compositions, discussing beryllium oxide content, mechanical strength and elastic and shear moduli 10 p1711 A69-23334

Book on high purity beryllium metallurgy for nuclear reactor applications covering physical properties, crystallography, thermodynamics, production methods, etc 17 p2986 A69-32952

Mechanical and thermal properties of vanadium alloys and austenitic stainless steels compared to determine applicability in high temperature reactor fuel jackets 22 p3971 A69-40973

REACTOR PHYSICS

Packed bed catalytic reactors cooling capacity in promoting endothermic reactions of hydrocarbon fuels, using computerized temperature and composition profiles [AIAA PAPER 69-588] 17 p3071 A69-33265

REACTOR SAFETY

Safety problems associated with transient boiling of liquid metals in fast nuclear reactors, emphasizing behavioral differences between liquid metals and water 08 p1420 A69-20101

Thermal stability criteria for thermionic converter performance evaluation, noting electron cooling influence 09 p1441 A69-21838

Nuclear power plant licensing, discussing public safety considerations by AEC and applicant responsibility in assuring freedom from undue risk 10 p1723 A69-23398

Remote disassembly and inspection methods for evaluating NRX-AG reactor components performance [AIAA PAPER 69-511] 16 p2810 A69-32712

Heat exchanger type low power solid-core fast nuclear rocket design, discussing fuels, safety aspects and space propulsion applications 17 p3004 A69-33342

REACTOR TECHNOLOGY

Reactors technical characteristics for high temperature mineralization of closed life systems biological wastes, deriving equations to estimate energy balance 10 p1649 A69-23504

Induction plasma device of continuous operation to simulate NASA designed gas core space propulsion reactor [AIAA PAPER 68-712] 22 p3979 A69-40548

Power systems for unmanned spacecraft, noting improved performance for zirconium hydride reactors and thermoelectric converters 23 p4187 A69-42255

Performance, size, weight, operational characteristics and cost estimates of ZrH reactor-organic Rankine power systems 23 p4189 A69-42265

READERS

Charge image detector for reading information as extended spatial charge distribution on dielectric layer surface, using vibrating conducting probe scanner 02 p0248 A69-11822

Reading amplifier for thin magnetic film memory stores permitting tunnel diode register positioning 04 p0579 A69-15319

READING

Error correction of strain gage/cement combination reading relaxation under prolonged steady loading at elevated temperature 22 p4042 A69-40313

Illumination effect on air navigation chart reading during flight, using questionnaire data 24 p4271 A69-42605

READING MACHINES

U READERS

READOUT

Holographic laser type memory with bulk storage capacity and short readout time 03 p0428 A69-13116

Sensor suspension, damping and signal readout through use of fluids with applications to rate and acceleration sensors [AGARDOGRAPH-118] 08 p1257 A69-20949

Image intensifier and return beam sections of 4.5 inch high resolution vidicon and camera system for high definition signal readout 17 p2976 A69-34063

Real time pulse frequency modulation telemetry receiving system for direct readout of ionograms from topside sounders, using off-shelf components 20 p3508 A69-37862

REAL GASES

Soviet book on shock waves in real gases covering gas flow patterns in shock tube, perturbations, shock and detonation wave reflection, etc 04 p0589 A69-14937

Approximate hydrodynamic equations applied to analysis of heat transfer in real gas flow in tube, taking into account energy transfer by radiation 04 p0686 A69-14993

Semiperfect gases with enthalpy dependent only on temperature, discussing validity of concept and Joule experiment on equivalence of heat and work 05 p0848 A69-16336

Detonation characteristics of gaseous explosives using equations of state for real gases, noting compressibility effect in mixture of hydrocarbons, O and N 05 p0848 A69-16337

Supersonic free jet with real gas effects and chemical reactions calculated by approximation 10 p1631 A69-22898

Dense real gas thermodynamic relations in piston driven shock tube facilities operation 11 p1862 A69-25011

Gas-gas interactions second virial coefficients measured at various temperatures, comparing experimental data with results calculated by Kihara potential 14 p2488 A69-29927

Nonequilibrium, real gas and nose bluntness effects on hypersonic slender body flows, analyzing similitudes, free stream temperature, velocity and relaxation [AIAA PAPER 69-708] 17 p2894 A69-33501

Integral relation method analysis of supersonic gas flow past blunt body of revolution 18 p3086 A69-35051

Shock waves Mach reflection at various velocities in real gases, observing temperature and pressure distributions, double reflections, effects of internal degrees of freedom excitation, etc 19 p3450 A69-36363

Nomograph for rapid estimation of pressure drops across orifices in pneumatic systems using real gas data with illustration for nitrogen 20 p3467 A69-38186

REAL NUMBERS

U INTEGERS

REAL TIME OPERATION

Structure oriented parallel algorithms for matrix operations, noting applicability to real time calculations for discrete Kalman filter and control problems 02 p0224 A69-11743

Phase plane diagram utility in toppling stability analysis of spacecraft, emphasizing numerical integration time reduction 02 p0334 A69-12376

Two dimensional representation of Venus entry probe target data for determining probe capability to provide real time data transmission to earth 02 p0331 A69-12820

Automated real time monoradar surveillance system based on azimuthal monotonicity of radar plots and flexible tracking strategies 03 p0383 A69-12872

Simulation design of multiprocessing system to provide air traffic control capabilities through use of real time operations 04 p0629 A69-15365

Analog FM subcarrier modulation selected for real time TV picture transmission via electro-optic space communication system 04 p0562 A69-15474

Real time performance, ground control and data processing of Surveyor spacecraft during maneuvers [AIAA PAPER 67-644] 04 p0586 A69-15502

Holography, discussing one beam recording, real time interferometry, pulsed laser, etc 05 p0761 A69-15774

Air Force Eastern Test Range data processing systems perform real time operations during in-flight phases of ballistic missiles and orbiting vehicles 05 p0727 A69-16772

Laser displays for information transfer to provide improved computer driven read-out techniques, noting real image and holographic displays 06 p0928 A69-17924

Radiation protection plan for Apollo lunar mission based on real time monitoring of solar activity and radiation in spacecraft [AIAA PAPER 69-19] 06 p0996 A69-18113

Apollo lunar TV camera for real time pictures during all phases of Apollo lunar landing mission, describing camera tube, circuitry and optics 07 p1133 A69-19137

Computer graphics and manufacturing, discussing man computer system for transformation of blueprint to numerically controlled machine tape with no time delay 07 p1089 A69-19741

Stochastic model for real time on demand weather predictions using REEP /regression estimation of event probabilities/ equations in Markov chain 08 p1345 A69-20299

Apollo/Saturn V automatic checkout test verification and debug program using real time computer simulation with digital space vehicle system model [AIAA PAPER 69-321] 09 p1478 A69-22378

Asynchronous on-line digital data acquisition system with immediate access to on-site numerical real time printout for rocket engine performance tests [AIAA PAPER 69-323] 09 p1478 A69-22381

Random data detection method applicable to low voltage SNR cases using real time correlation of probability functions 09 p1459 A69-22593

Complex spatial filtering by holographic Fourier transform subtraction 10 p1690 A69-22953

Real time computer controlled telemetry system readiness testing and validation, describing automatic closed loop checkout methods and remote display controller 10 p1660 A69-23270

Electron beam addressed electrooptic light valve used as spatial filter, discussing electronic control and optical processing in real time 10 p1697 A69-23870

Real time electronically scanned radar control using digital computer with input and output conversion for information handling, noting interface equipment 11 p1834 A69-24544

Real time Fourier spectroscopic system for synthesis of spectrum of interferogram, noting polystyrene IR transmission spectra 11 p1884 A69-24837

Computer controlled flight line tester performing automatic real time testing of aircraft avionics systems on flight line or hanger 11 p1864 A69-25060

Flexible control module for real time automated checkout requiring programming by personnel with strong software background 11 p1843 A69-25072

Real time correlator in periodic signal extraction from noise background, discussing multichannel sampler as special case of cross correlation extraction 11 p1837 A69-25094

Real time/process computer interface with electric power systems, discussing compatibility, reliability, etc, problems in connection with management and engineering personnel 11 p2004 A69-25302

Real time 2000 line TV camera with 40 MHz bandwidth, 1600 line vertical resolution and 1000 line horizontal resolution [SMPTE PAPER 105-73] 12 p2077 A69-25769

Real time pressure simulation chambers for testing space vehicles, discussing slow and rapid evacuation and pumping systems 13 p2240 A69-28077

Random signals and real time analysis systems for environment testing and transient signals 13 p2264 A69-28603

Hybrid computer system for real time optimum feedback controller using iterative algorithms with rapid convergence, discussing simulation and performance 15 p2582 A69-30071

Real time shock response analysis advantages over sequential analysis, describing equipment 15 p2618 A69-30359

Electrophysiological /electroslanchnogram/ medical data transmission via satellite from France to U.S. for real time computer processing 16 p2746 A69-32070

Radio sources interplanetary scintillations and cross correlation coefficient real time determination 17 p3038 A69-33727

Associative processor applied to interceptor radar system, noting processing time independence from target number and compatibility with real time systems 17 p2931 A69-34071

Observer theory application to hybrid inertial navigation systems, discussing error estimation and correction, real time mechanization, eigenvalues, etc 17 p3003 A69-34099

Saturn 5 system simulation showing feasibility, efficiency and economy of real time simulation using large mathematical model and general purpose digital computer 18 p3113 A69-34268

Reliability engineering methods for software programs with emphasis on real time computation, describing SSD Exhibit 61-47 documentation 18 p3105 A69-34524

PDP8 digital computer and Trebel vertical balancing machine combined for real time presentation of trim weights and positions, noting noise in force components [SAWE PAPER 738] 18 p3220 A69-34888

Meteorological Doppler radar information display for real time identification of hazardous winds and turbulence in storms 18 p3139 A69-35427

Real time terrain following computer for C-5A transport, discussing automatic throttle system and speed bleedoff utilization [AIAA PAPER 69-797] 19 p3367 A69-35633

Holographic system to process signals received by pulse Doppler radar, noting real time operation with availability of instantaneous development image storage media 19 p3314 A69-36598

Aircraft simulation, discussing flight simulation, real time computer assembly operation, computer-auxiliary interfaces, etc 19 p3296 A69-36707

Roscau satellite onboard computer systems design, emphasizing simulator and assembly programs for real time operation verification 20 p3501 A69-37389

Onboard computer and environment simulation for real time programs development, discussing instructions analysis, variables extraction and values and peripheral components 20 p3502 A69-37395

Real time analyzers of acoustic signals for aircraft engine noise, noting automatic test 20 p3462 A69-37756

Real time pulse frequency modulation telemetry receiving system for direct readout of ionograms from topside sounders, using off-shelf components 20 p3508 A69-37862

Sensitivity improvement for inertialess microwave signal scanning and readout by applying pulse compression concepts, discussing application to real time microwave imaging and holography 20 p3545 A69-37901

Radar calibration techniques for accurate real time tracking data, describing GEOS-B C-band experiment [AIAA PAPER 69-872] 21 p3675 A69-39398

Gyro test package, dynamic test facility and real time attitude algorithm to investigate operational capabilities of strapdown inertial attitude package [AIAA PAPER 69-849] 21 p3765 A69-39424

Real time operating system /RTOS/ 360 for spaceflight control, describing hardware, applications, task management and capacity, etc 21 p3679 A69-39602

Real time targeting for Apollo lunar orbit insertion maneuver burn, discussing impulsive maneuvers for flight control [AIAA PAPER 68-848] 21 p3828 A69-39760

Real time FM-to-digital converter for measuring periods of demodulated FM/FM data, discussing systems design 22 p3903 A69-39923

Real time network support simulation allowing network configuration for nominal or perturbed trajectory for Saturn vehicles, applicable to any flight azimuth 22 p4020 A69-40319

Real time orbit determination system at NASA manned space center for Apollo missions [AIAA PAPER 69-938] 22 p4020 A69-40321

Real time digital computer hardware simulation of Apollo Telescope Mount /ATM/ mission [AIAA PAPER 69-940] 22 p3919 A69-40323

Machine independent telemetry oriented language /MITOL/ to develop computer programs for real time and postflight telemetry data processing 22 p3905 A69-40340

Data compression and transmission technique for real time system to monitor manned space missions, noting Apollo telemetry data [AIAA PAPER 69-970] 22 p3906 A69-40350

Real time multiprocessing telemetry ground support integrated system design with expanded definition of hardware/software decision tradeoffs [AIAA PAPER 69-971] 22 p3907 A69-40351

Operational reliability verification of Apollo real time mission program and testing structure, discussing environment, processing, controls, response criteria, etc [AIAA PAPER 69-981] 22 p3907 A69-40361

Mariner Mars 1969 spacecraft real time test support system and recorded data analysis including routing to printers, CRT displays and incremental plotters [AIAA PAPER 69-982] 22 p3907 A69-40362

Software/hardware interface testing of real time system, including possible improvements to computer program management flow 22 p3908 A69-40364

Meteorological data real time processing for automatic weather analysis and prognosis, program used and computer output charts 22 p3977 A69-40732

Real time telemetry, tracking and command links by synchronous satellite relay, describing ATS-Nimbus E S-band experiment 23 p4121 A69-41759

IBM 360-50 computer with I/O terminals to process PCM and analog data from Modular Auroral Probe series of sounding rockets on real time basis 23 p4133 A69-41764

Ionospheric irregularities effect on accurate satellite position determination in near real time 23 p4132 A69-42549

Tricomi theorem extension concerning intermediate value property of continuous real valued functions of real variable

09 p1533 A69-22797

Evolutionary hypoelliptic equations with real variable coefficients, analyzing positive solutions and application to parabolic equations

11 p1908 A69-24534

Higher root loci of polynomials for multivariable systems with coefficients polynomials of real parameter

12 p2048 A69-26073

Partial differential equation with stochastic characteristics reducible to parabolic equation by introducing additional variables

12 p2121 A69-26366

Numerical procedure for testing absolute stability and positive realness of free dynamic systems based on Routh algorithm

18 p3112 A69-34689

Autonomous second order recurrence with real variables, studying conditions for attractive limiting set stability region with several noninterconnected regions

19 p3287 A69-36651

Evolutionary hypoelliptic equations with real variable coefficients, analyzing positive solutions and application to parabolic equations

21 p3756 A69-39151

REATTACHED FLOW

Model for asymptotic separated flow in wake behind broadside of bluff body, discussing separation point, interaction, reattachment, base flow and near wake

02 p0188 A69-11986

Turbulent jet model of unsymmetrical velocity profile for design of wall attachment device

02 p0231 A69-12072

Switching action mechanism in wall attachment fluid amplifier, outlining theory based on turbulent jet entrainment

02 p0195 A69-12073

Fluid mechanics of supersonic flow separation and reattachment in fluidic devices

02 p0231 A69-12077

Meksyn method application to problems of jet mixing and jet reattachment

02 p0233 A69-12530

Plane supersonic base flows studied using integral analysis of turbulent reattachment, noting prediction of wall pressure distribution

03 p0361 A69-12990

Reattachment pressure correlated for any type of two dimensional turbulent supersonic separated flow

04 p0588 A69-14727

Wall attachment type fluidic logic devices with low power consumption requirements, noting monostable and bistable devices

05 p0704 A69-16002

Tangential stress distribution and heat transfer in circular cylinder with attached wall jet

05 p0746 A69-16022

Laminar boundary layer separation and reattachment near concave corner on cooled reentry body in supersonic flow

06 p0911 A69-17592

Two dimensional supersonic flow along adiabatic curved ramp noting separation, attached flow and laminar boundary layer interaction with external stream

[AIAA PAPER 68-109] 09 p1430 A69-21949

Two dimensional model for analyzing turbulent separation and reattachment at blade trailing edge at supersonic speed

[ONERA-TP-678] 16 p2733 A69-32258

Mean parameters calculation between widening of turbulent flow and point of reattachment, including similarity hypothesis concerning velocity profile

19 p3299 A69-36648

Flow separation and reattachment points and line of zero velocity jet mixing determined by injecting smoke

[ASME PAPER 69-FE-29] 20 p3517 A69-37994

Coanda effect of separated jets reattachment to wall at high Knudsen number in pneumatic fluidic devices, discussing Reynolds and Mach numbers effect

[ASME PAPER 69-FLCS-37] 21 p3692 A69-38602

Separation flows in flat channel with step recess, analyzing dynamic characteristics in mixing region, in wake of rarefaction waves and in attachment zone

24 p4247 A69-43498

REATTACHMENT U ATTACHMENT

REBREATHING

Cardiac output during space flight based on rebreathing method for estimation of gas tension in mixed venous blood and Fick equation

[UN PAPER 68-95746] 01 p0151 A69-10527

RECEIVERS

NT LOGARITHMIC RECEIVERS
 NT SUPERHETERODYNE RECEIVERS
 NT TELEVISION RECEIVERS

Broadband parametric amplifier used as front amplifier in satellite communication systems ground station receiver, noting cryogenic operation capability

01 p0041 A69-10243

Small earth stations in future communication satellite systems, discussing applications, characteristics and equipment

[UN PAPER 68-95751] 01 p0028 A69-10492

Sensitivity calculation for microwave receiver consisting of traveling wave tube preamplifier followed by square law detector and video amplifier

01 p0048 A69-11038

Frequency feedback receiver capabilities as low threshold demodulator in frequency modulated frequency division multiplexing satellite system

01 p0034 A69-11141

Adaptive processing limited memory receiver for synchronous detection of signals of unknown amplitude

03 p0400 A69-13228

Signal detection by four terminal receiver network optimal for background Gaussian noise

04 p0557 A69-14776

Sonar receiver reduced averaging processing in presence of extended and point targets compared with full averaging processor

04 p0562 A69-15477

Asymptotic performance of adaptive receivers and application to signals of unknown frequency, noting SNR role

05 p0722 A69-16727

SNR enhancement in optical receiver by amplification before detection of carrier of modulated optical signal, using quantum amplifier

[IEEE PAPER R-5] 07 p1154 A69-19079

Receiving systems for digital telemetry signals from spacecraft, analyzing receiver performance by statistical methods

08 p1276 A69-20591

Book on laser communication system design covering modulation and detection methods

08 p1277 A69-20884

Hard limiting effect on sum of three or four sinusoidal signals noting output amplitudes, signal suppression and negative suppression effect

09 p1451 A69-21311

Optimal receiving circuit determined for elliptically polarized signals in randomly polarized noise by deriving integral equation

09 p1456 A69-22285

Adaptive threshold detection, using stochastic approximation techniques to derive receiver structures capable of learning optimum threshold setting during actual operation

11 p1839 A69-25297

Digital simulation of phase locked receiver in diffuse multipath fading environment with band limited thermal noise

11 p1839 A69-25298

Noise sensitivity of space diversity reception system with narrow beam electrically switchable antennas for incomplete beam separation

12 p2030 A69-26485

Phase analysis in multiple-sensor receivers with high signal to noise ratio, considering phase difference between two stochastic input signals

13 p2220 A69-27938

Frequency diversity reception system for drift of small scale ionospheric inhomogeneities, noting circuit diagrams

14 p2452 A69-29875

Noise stability of receiver network during detection of finite duration noise signal on white noise background, considering various narrow band preselectors

15 p2563 A69-30142

Linear feedback additive noise communication systems formulated in terms of arbitrary operations at transmitting and receiving points

17 p2944 A69-33626

X ray stroboscope for moving objects in penetrating irradiation, considering synchronization of radiation receiver

18 p3138 A69-35114

Coherent phase locked loop receiver as carrier and modulation loops combination with parallel bandpass filter for ranging signal reception and FM demodulation

19 p3274 A69-36277

Optimum receiver design for binary coded data detection in two channel space communication system, discussing phase error distribution and optimum decision function

19 p3275 A69-36286

Italian cross radio telescope noting added phase shifters to N-S arm, transistorized receiving system and modified data processing

19 p3295 A69-36643

Receiving and display telemetry system for obtaining direct ionospheric topside ionograms from Alouette 1 satellite, discussing video data tape recording cost

20 p3507 A69-37861

Delay line MTI receivers performance calculation accuracy, discussing error for general and restricted number of pulses from single and double cancellation at IF

23 p4117 A69-41605

Multichannel spectral line receiver for 210 ft Australian radio telescope with front ends covering wide frequency range

24 p4283 A69-43115

RECEIVING SYSTEMS

U RECEIVERS

RECEPTACLES [CONTAINERS]

U CONTAINERS

RECEPTORS [PHYSIOLOGY]

Acoustical vestibular stimulation in guinea pig, showing activation of receptors

03 p0376 A69-14076

Cutaneous receptor response to microwave irradiation, measuring warmth sensory effects in human forehead with radiometer

[AGARDOGRAPH-111] 08 p1266 A69-20677

Retinal burn resulting from prolonged viewing of sun, laser or thermonuclear explosion, noting effects on choroid, receptors and pigment cells

08 p1267 A69-20680

Receptor and adrenergic blockade effects on blood loss, tolerated period and metabolic sequelae of hypotension in dogs

23 p4098 A69-42102

RECIPROCAL THEOREMS

Reciprocal variational formulation for optimal control, estimating difference between suboptimal system response and optimum

03 p0457 A69-13766

Corollary of reciprocity theorem in holography

04 p0602 A69-15377

- Reciprocal theorem for displacements of solid skeleton caused by fluid sources action in infinite consolidating space
05 p0835 A69-15869
- Reciprocity, variational and uniqueness theorems developed within linear theory of coupled thermoviscoelasticity
07 p1233 A69-19327
- Reciprocity theorems of coupled and uncoupled thermoelasticity for macroisotropic and microisotropic simple homogeneous solids with microstructure
09 p1618 A69-22259
- Reciprocity theorem applied to Somigliana relations for static loads and coupled thermoelasticity
09 p1618 A69-22260
- EEG lead sensitivity to location and orientation of sources in brain by applying reciprocity theorem
10 p1648 A69-23186
- Magnetothermoelasticity equations, uniqueness and reciprocity theorems and solutions emphasizing moving media
15 p2715 A69-31215
- Corollary of reciprocity theorem in holography
16 p2790 A69-32124
- Reciprocal theorem for obtaining relations between transmitting antenna effective area, radiation pattern and aperture distribution
19 p3281 A69-35765
- Dynamic reciprocity relationship for linear directed continuous viscoelastic media, using Stieltjes convolution
19 p3373 A69-36307
- RECIPROCATING ENGINES**
U PISTON ENGINES
- RECIRCULATIVE FLUID FLOW**
- Atmospheric exposure chamber design for small animals, discussing dynamic and recirculating operations and gas scrubbing system
04 p0584 A69-14678
- Exhaust gas recirculation for VTOL aircraft [AIAA PAPER 67-439]
12 p2013 A69-26760
- Supersonic wake recirculation flow over rearward facing two dimensional steps and blunt bases
14 p2389 A69-29031
- Book on heat and mass transfer in recirculating flows, presenting elliptic differential equations and numerical solutions by computer
21 p3691 A69-38333
- Recirculation concept for air cushion vehicle air curtain evaluated by two dimensional and circular models, discussing optimum cushion area/jet exit area ratio
22 p3866 A69-40816
- RECLAMATION**
NT MATERIALS RECOVERY
NT WATER RECLAMATION
- Oxygen reclamation from carbon dioxide using solid oxide electrolyte, noting water vapor catalytic effect
07 p1071 A69-19423
- RECOGNITION**
NT CHARACTER RECOGNITION
NT PATTERN RECOGNITION
NT SPEECH RECOGNITION
NT TARGET RECOGNITION
- Holography and similarity criterion for developing image recognition algorithm
08 p1314 A69-20417
- RECOMBINATION COEFFICIENT**
- Recombination rate dependence on nonequilibrium charge carriers concentration at semiconducting surface
01 p0136 A69-10253
- Semiconducting diode base Dember effect impedance studied for recombination rates approaching zero or infinity
01 p0137 A69-10260
- Alpha recombination coefficient of molecular helium ions measured in helium afterglow plasmas as function of electron density and gas temperature
02 p0283 A69-11834
- Dissociation and recombination of moderately complex molecules, using master equation with transition probabilities and decay rates obtained from reaction rates statistical theory
02 p0283 A69-12181
- Electron temperature and concentration and solar UV absorption data from sounding rockets, estimating ion exchange rate, recombination coefficient and heat flux
03 p0422 A69-13508
- Low density limit to three body ionic recombination coefficients in various gases
04 p0632 A69-14679
- Effective gradient method modification for analyzing three body ionic recombination compared with diffusion method
05 p0795 A69-15661
- Surface recombination rate effect on lux-ampere characteristic of photomagnetic effect in CdS single crystals of low and high photosensitivity
05 p0809 A69-16377
- High temperature effects on gallium arsenide crystals current carriers lifetime, discussing recombination characteristics and impurity photoconductivity
05 p0809 A69-16551
- Recombination constants of dissociated oxygen and nitrogen flow in supersonic nozzle at high temperatures using modified Bray method
06 p1030 A69-17349
- Reaction rates coefficients of oxygen ions with molecular oxygen and nitrogen in nighttime F region over Moscow based on loss coefficient estimate
06 p0919 A69-17724
- Ionization index, electron formation and effective recombination coefficient in E 2 layer, noting solar activity effect
06 p0920 A69-17725
- Semiconductor lasers, discussing electron transitions, radiative band-band transitions, emission and absorption spectra, recombination rates, carrier lifetime and lasing conditions
06 p0937 A69-18009
- Semiconductor current carriers surface recombination rates determined from photomagnetic effect
07 p1198 A69-18505
- Two fluid approximation of one dimensional steady state flow of inviscid plasma with thermal gradients, considering ionization and recombination processes
07 p1189 A69-18691
- Surface recombination rate and retardation field effects on diffusion current in mesa diodes with low level injection
07 p1105 A69-19008
- Recombination coefficients for dense weakly ionized cesium plasma, treating recombination process as diffusion generated by electron collisions
08 p1359 A69-19844
- Three body ionic recombination coefficient for moderate and high gas densities, taking into account variability in mean free path and trapping radii
09 p1542 A69-21624
- Recombination rate dependence on nonequilibrium charge carriers concentration at semiconducting surface
09 p1559 A69-22646
- Semiconducting diode base Dember effect impedance studied for recombination rates approaching zero or infinity
09 p1559 A69-22653
- Slow recombination centers parameters in CdSe single crystals during heat treatment in vacuum or hydrogen atmosphere
09 p1560 A69-22664
- Recombination parameters and depth of levels of p-n junctions in semiconductor photocells determined from position of maximum spectral sensitivity
09 p1560 A69-22718
- Ionization relaxation in atmospheric pressure Ar-Cs plasma, considering two and three body recombination and O impurity effects
10 p1733 A69-23445
- Plasma decay coefficient, charge recombination coefficient and electron scattering in cooling electron gas of quasi-steady cesium discharge plasma under high pressure
10 p1733 A69-23448
- Long wave propagation at 164 kHz in India during 1966 and 1967, determining D region recombination coefficient and long wave absorption diurnal variation
10 p1659 A69-24065
- Solar cell equation series resistance and junction recombination parameters determination, considering I-V characteristics
11 p1826 A69-25395
- Electron-ion recombination coefficient for triple collisions in dense low temperature plasma, deriving finite electron Fokker-Planck equation
11 p1933 A69-25541
- Recombination emission spectrum relation to plasma recombination coefficient, determining plasma electron temperature from continuous spectrum intensity
11 p1934 A69-25566
- Collisional radiative electron-ion recombination rates measured in decaying rare gas plasmas produced by transient discharge
12 p2134 A69-25981
- Vertical ionization drift in F region as function of electron density, ionization coefficient and recombination coefficient
12 p2070 A69-26584
- Nondrifting n-p-n semiconductor current gain dependence on surface recombination rate
13 p2236 A69-28547
- Effective recombination coefficient in lower ionosphere determined from charged particle spectra obtained by rocket sounding in Canada
14 p2511 A69-28960
- Rate constants for recombination of atomic hydrogen with hydrogen molecules, hydrogen atoms and argon atoms at high temperatures behind shock waves
14 p2488 A69-29637
- Frequency response of MIS capacitance beyond inversion voltage, discussing recombination rate and generation-recombination current in space charge region
15 p2565 A69-30179
- Solar flares with subcosmic radiation in proton active region of May 1967, discussing X ray emission effects, calculating D region recombination coefficient and electron concentration
17 p3025 A69-34226
- Recombination coefficients of oxygen and nitrogen ions with electrons related to electron temperature, using microwave afterglow/mass spectrometer
18 p3176 A69-34789
- Nighttime ionospheric F region velocity component and recombination coefficient computer calculation
20 p3521 A69-37049
- Upper atmosphere particles, luminosity and electron concentration measurements documented in input, storage and energy radiation classes, determining recombination coefficients
21 p3707 A69-38491
- Recombination and ionization coefficients for quasi-steady state homogenous H and hydrogenic ion plasmas based on collisional-radiative model
22 p3988 A69-41153
- Collisional radiative recombination and ionization coefficients for weakly ionized H plasmas using rate equations
22 p3988 A69-41154
- Tabulated numerical values of Burgess general formula for computing dielectronic recombination rates
23 p4207 A69-41281
- Atomic nitrogen collisional ionization and recombination rates under assumed quasi-steady nonequilibrium distribution of electron state populations
24 p4353 A69-43700
- RECOMBINATION REACTIONS**
NT ATOMIC RECOMBINATION
NT ELECTRON-ION RECOMBINATION
NT ELECTRON RECOMBINATION
NT HYDROGEN RECOMBINATIONS
NT ION RECOMBINATION
NT OXYGEN RECOMBINATION
NT RADIATIVE RECOMBINATION
- Recombination reactions during postdischarge in helium plasma produced by laser beam, deriving equation for density evolution
01 p0128 A69-10394
- Recombination effects in high resistivity Cu doped gallium arsenide single crystals determined by photoconductivity methods
02 p0294 A69-11627
- Dissociation and recombination of moderately complex molecules, using master equation with transition probabilities and decay rates obtained from reaction rates statistical theory
02 p0283 A69-12181
- Ionization and recombination in low temperature plasmas, noting fast electron distribution function deviation from Maxwellian form and calculation for Cs plasma
02 p0292 A69-12559
- Carrier generation-recombination in space charge region of asymmetrical p-n junction, noting experimental results for InSb diodes
03 p0487 A69-13641
- Photocurrent carriers recombination in organic semiconductor rhodamine B films analyzed as function of illumination
03 p0489 A69-13890
- Combination rate constants for H-F-O reactions, discussing expressions and relative efficiencies with Argon as third body
04 p0646 A69-14743
- Gallium arsenide injection lasers properties, analyzing band structure, optical transitions, recombination lifetimes, conduction band states, optical gain, etc
05 p0772 A69-16228

Recombination statistical model for neutron irradiated Si transistors, considering diffusion potential, junction voltage, temperature, activation energy and capture ratio for holes and electrons
06 p0975 A69-16871

Charge carrier lifetime measured in intrinsic conductivity range of Cd doped InAs to define recombination mechanism, relating temperature dependence to surface impurities recombination
06 p0979 A69-16997

Drift field photovoltaic cell performance with bulk and surface recombinations
06 p0870 A69-17473

Radio recombination lines in populations of highly excited states of hydrogen, discussing collisional transition effects
06 p1010 A69-17970

Gradual output degradation mechanism in GaAs injection lasers, attributing internal radiative quantum efficiency reduction to nonradiative recombination centers formation
07 p1148 A69-18857

Recombination rate of nitrogen atoms using NO titration method, tabulating reactions and emissions during various stages of titration
08 p1309 A69-20454

Temperature dependence of dissociative recombination and molecular ion formation in decaying He, Ne and Ar plasmas in discharge tube energized with capacitor bank
08 p1356 A69-20741

Nonequilibrium distribution functions for neutral atoms excited states in optically thin low temperature singly ionized plasma containing ions, electrons and neutrals
10 p1731 A69-23437

Ionization and recombination processes in He 3 plasmas produced by neutron irradiation of H 3
10 p1738 A69-23488

Surface recombination efficiencies on metals measured as function of exposure time in steady Oscen flows, providing step-function increase in oxygen atom concentration
10 p1726 A69-23526

Nonlinear charge exchange and dissociative recombination effects on night F region decay compared with linear theory
10 p1685 A69-23832

Nighttime ionospheric recombination studies by model reference heights varying diurnally, seasonally and with solar flux and geographic location
10 p1685 A69-23834

Ionization-recombination thermodynamic equilibrium upset causing spectral excitation in He arc plasma
10 p1742 A69-24077

Photocurrent carriers recombination in organic semiconductor rhodamine B films analyzed as function of illumination
11 p1939 A69-25691

Lattice defects in development of recombination centers on Ge semiconductor surfaces, discussing photoconductivity and field effect
12 p2142 A69-25978

Overlay technique for analysis of F region transition into F1 and F2, noting ionization and recombination
12 p2065 A69-26102

Dielectronic recombination influence on radio recombination lines of carbon under typical nebular conditions
13 p2346 A69-27703

Sodium atoms and NO molecules role in atomic O 6300 and 5577 Å emissions in comet Mrkos 1957d due to charge exchanges and dissociative recombination
14 p2523 A69-29707

Ionization and recombination in low temperature plasmas, noting fast electron distribution function deviation from Maxwellian form and calculation for Cs plasma
15 p2658 A69-30256

Unsuccessful attempt to observe high charge ion lines generated by dielectronic recombination in solar corona at 5-cm wavelength
15 p2689 A69-30568

Nitrous oxide-CO bimolecular reaction and O-CO recombination in single pulse shock tube
16 p2748 A69-32793

Ionization, recombination and charge transfer in upper atmosphere during aurora, considering quasi-equilibrium ion-electron concentrations
17 p2961 A69-33417

RF recombination lines measurement of helium for abundance in nebulas, comparing optical and radio values for H II regions
18 p3190 A69-34293

Steady Prandtl-Meyer expansion of shock heated gases for recombination studies, measuring static pressure, stagnation point heat transfer, IR emission and optical absorption
18 p3228 A69-34466

Transient recombination lifetimes in n-type float zone Si from 4.2 K to room temperature, obtaining electrical and photoconductivity values
19 p3383 A69-36447

Superradiance and recombination radiation from CdTe with high compensation, using model assuming narrowing from superradiance onset for analysis
19 p3389 A69-36550

Nitrogen and water vapor effects on hydrogen-oxygen system recombination, using shock tubes for design of exhaust nozzles for hypersonic flow vehicles
21 p3669 A69-38801

Forced recombination scattering of light on Rayleigh polarization waves in isotropic solid body with small elastooptical constants
21 p3770 A69-38963

Radio recombination line data from H II regions interpreted in terms of single electron temperature, considering non-LTE/local thermodynamic equilibrium/clumping
22 p4025 A69-40645

Electron density decrease in F 2 layer ascribed to 9 July 1962 thermonuclear explosion, noting dissociative recombination role
22 p3942 A69-41098

Electric fields reducing recombination radiation intensity from bulk ionized GaAs and InP and shifting spectrum to lower energies, discussing self absorption
23 p4198 A69-41499

Anisotropic carrier distribution effect on polarization of spontaneous recombination radiation during GaAs breakdown in electric field
24 p4362 A69-43736

RECOMPRESSION

U COMPRESSING

RECONNAISSANCE

U AERIAL RECONNAISSANCE

U PHOTO RECONNAISSANCE

RECONNAISSANCE AIRCRAFT

NT F-5 AIRCRAFT

NT G-91 AIRCRAFT

NT OV-10 AIRCRAFT

NT P-1127 AIRCRAFT

Helicopter self defense armament for fire support of British Army operations, discussing vulnerability, weapons selection and tactics, logistics, etc
01 p0010 A69-10869

Nimrod maritime reconnaissance aircraft, discussing high speed high altitude transit flights
05 p0702 A69-15885

Engine air intake for operational Harrier V/STOL strike/reconnaissance fighter, describing intake instrumentation ring, temperature and pressure probe development and pressure recording
05 p0767 A69-16773

First flight test phase of multipurpose Viggen aircraft designed as basic platform for attack, trainer, reconnaissance and fighter versions
06 p0867 A69-17662

Operational system effectiveness information for reconnaissance drone system including test flights, discussing application to reliability and maintainability in project management
18 p3232 A69-34505

RECONNAISSANCE DRONE AIRCRAFT

U DRONE AIRCRAFT

RECONSTRUCTION

NT WAVE FRONT RECONSTRUCTION

Saint-Severin amphotericite geometrically reconstructed from fragments in form prior to atmospheric breakup, noting agreement with track densities of iron ions
19 p3416 A69-36128

RECORDING

U DATA RECORDING

U DATA SMOOTHING

U MAGNETIC RECORDING

U PHOTOGRAPHIC RECORDING

RECORDING HEADS

Rotary head units used in telemetry magnetic recorders, explaining concepts and advantages of rotary scanning
07 p1077 A69-18826

RECORDING INSTRUMENTS

NT FLIGHT LOAD RECORDERS

NT FLIGHT RECORDERS

NT LUNAR SEISMOGRAPHS

NT OSCILLOGRAPHS

N1 PLOTTERS

NT RADIOMETEOROLOGRAPHS

NT SEISMOGRAPHS

NT WEATHER DATA RECORDERS

NT WHISTLER RECORDERS

NT X-Y PLOTTERS

Thermographic phosphor technique to provide transient temperature measurements in impulse wind tunnel
01 p0078 A69-10152

Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influenced by appearance of thermal noise
01 p0152 A69-10578

Shock and vibration data recording, discussing transducer selection, accelerometer mounting, conditioning electronics and recording devices
01 p0083 A69-11050

Electron concentration in ionospheric outer regions determined from coherent frequencies recorded on-board OGO-A
01 p0147 A69-11323

Optimal reception of quantum signals at recording device aperture
02 p0206 A69-11607

Rapid recording microspectrophotometer for IR to UV absorption spectra of living cells, cell organelles and half micron diameter particles
03 p0428 A69-13109

Time dependent photoelectron multiplier with low noise for recording long wave laser light pulses
03 p0440 A69-13264

Automatic recording device for cosmic ray bursts utilizing information time delay to allow detailed initial period study
03 p0430 A69-13545

Signal matching in radio interferometer with autonomous receiver, magnetic tape recorders and memory electron beam tube with target
03 p0431 A69-13706

Shipboard standard visibility measurements by means of AEG-FFM scattered light recorder aboard Meteor in Atlantic Ocean during 1965
04 p0628 A69-15158

Spatial distribution of background magnetic fields of quiet sun from photoelectric magnetograph observations, noting relation to supergranulation
04 p0663 A69-15396

Radar echoes signal amplitude and phase digital recording with Radicord/radar digitizing and recording device
05 p0721 A69-16618

Optical commutation to permit multifield monitoring and recording with one sensor by employing high resolution imaging fiber optics elements feeding common focusing lens
06 p0926 A69-17678

Electrostatic storage display tube characteristics, construction, applications and reliability
07 p1101 A69-18655

Control and recording device for parameters and information relating to takeoff and landing, using detection elements and cross wire on runway
08 p1347 A69-20780

Photographic measurement of parachute exit velocity during ejection from chute, describing electronic recording and unit operation with block diagram
08 p1317 A69-20875

UHF telemetry conversion program at Pacific Missile Range, describing antenna, receive-record and separation display systems
09 p1454 A69-21800

Maintenance recording systems for aircraft fleet, discussing operations objectives and research, data collection and implementation using systems engineering
10 p1671 A69-23261

Algorithm for determining readings dispersion during cosmic ray recording, considering cosmic rays variability, statistical nature and instrument errors
10 p1770 A69-23906

Holographic recording of three dimensional flow field velocities, applying theory of particle size assessment via Fraunhofer holography
11 p1884 A69-24691

Optimal reception of quantum signals at recording device aperture
11 p1835 A69-24714

Photoelectric polarimeter to record sky light intensity in form of polarized components, detailing construction and operation
12 p2078 A69-25892

Photoelectric recorder with timebase image converter tube for investigating ultrashort light pulse transient response of laser
12 p2083 A69-26139

Continuously operating mirror scanning system for high speed photographic cameras, emphasizing maximum scanning speeds and framing rates

12 p2085 A69-26154

Holography with pulsed lasers for high speed recording of amplitude and phase disturbances and rapid transient events, noting reconstruction evaluation problems

12 p2087 A69-26171

Optimum recording conditions for analog recorders with continuous recording in rectangular coordinate system

12 p2091 A69-26332

Cosmic radiation recorder designed for use onboard satellite to measure intensity space-time distribution under geomagnetic effect

12 p2094 A69-26697

Scientific equipment on Cosmos 237 satellite for recording extraterrestrial radiation data, discussing specifications, operation and mission purpose

14 p2446 A69-29047

Automatic recording of spectral distribution of high resistance semiconductors photoconductivity using spectrograph monochromator

14 p2447 A69-29409

Thermistor instrument for remote sensing, magnetic synchronous recording and linear display of temperature

14 p2449 A69-29562

Semiconductor materials and fabrication methods for surface barrier junction n-type and p-type silicon counters used in hydrogen ion flux recording

14 p2452 A69-29810

Vector magnetograph to measure magnetic field vector components, obtaining field direction azimuth by servo circuit

14 p2453 A69-29972

Measurement system for recording of small localized temperature changes in brain

15 p2606 A69-30152

Automatic recording inverted dilatometer employing fused quartz vertical pedestal and yoke type pushrod

15 p2607 A69-30153

Semiautomatic recording device to determine gas discharge ion and electron sources operation modes optimum parameters

15 p2658 A69-30237

Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influences by appearance of thermal noise

15 p2691 A69-30748

Crack growth monitoring and recording techniques during fracture testing, using foil gauge, potential flow and acoustic pickup methods

15 p2713 A69-31109

Test facility for qualification of satellite fairings jet-tisoning system, describing accelerating tower and recording and control instrumentation

16 p2765 A69-31739

Selective amplifier for recording time signals on Time Recorder 2 and measuring time lag caused by Philips BRO 501 radio receiver

16 p2790 A69-32217

NaI/Tl and CsI/Tl scintillation counters effectiveness in recording low energy protons against counter noise background

18 p3138 A69-35255

Recording instrument paper speed effect on pulse wave measurements precision, discussing multiple observer studies of left ventricular ejection time

19 p3258 A69-36449

Recording devices for storing bandwidth data in time sequence, studying design parameters using light beam recorder implemented with CRT for read-in process

20 p3540 A69-37640

Cranz-Schardin camera for high speed recording in dynamic photoelastic fringe pattern studies, discussing framing rates, fringe gradients and design

20 p3541 A69-37778

Radial velocities recording inaccuracies by solar magnetographs caused by dissimilarity between photomultiplier characteristics, describing photometer designs to eliminate errors

20 p3547 A69-38308

Rheography of blood circulation of forearm after tightening with pneumatic cuff, analyzing amplitude increase and information about vascular system

21 p3653 A69-38838

Cosmic ray electron recorder for measuring intensity, energy spectrum and angular distribution of electron fluxes within specific energy range

21 p3724 A69-39074

Wideband telemetry recording error compensator for reducing flutter and interchannel time-base error in magnetic tape instrumentation

23 p4137 A69-41775

High speed tape transport characteristics, discussing capstan design, negative progression, reel-capstan interface, etc

23 p4165 A69-41776

Isometric recording device for tensile stresses on muscle preparations in vitro, based on differential transformer

23 p4111 A69-42056

RECOVERABILITY

Recovery rate at room temperature in Li-doped p-n Si diodes and solar cells after 1 Mev electron irradiation, noting capacitance changes

06 p0974 A69-16867

Firebee 2 /BQM-34E/ turbojet-propelled recoverable supersonic aerial target construction, performance prediction and missions

09 p1434 A69-21901

Time optimal regulator problem with recoverability constraint as restriction on system state during control synthesis

12 p2052 A69-26504

RECOVERABLE LAUNCH VEHICLES

Reusable aircraft type satellite launchers, discussing first stage recovery by parachute, ballutes, flexible wings and gyroglider

24 p4250 A69-42562

RECOVERABLE SPACECRAFT

NT AEROSPACEPLANES
NT APOLLO SPACECRAFT
NT GEMINI SPACECRAFT
NT MERCURY SPACECRAFT
NT REUSABLE SPACECRAFT
NT VOSKHOD 1 SPACECRAFT
NT VOSKHOD 2 SPACECRAFT
NT VOSKHOD MANNED SPACECRAFT

Paraglider as recoverable sounding rocket dropped from helicopter, describing system design and flight tests

[UN PAPER 68-95445] 01 p0161 A69-10465

Modular configuration of recoverable scientific MAP /Modular Auroral Probe/ payloads aboard Nike-Apache rockets, discussing payload design concepts

23 p4223 A69-41763

Flexible parawing lifting decelerator research data from wind tunnel and flight tests, noting manned space vehicle recovery and aircraft escape systems

[AIAA PAPER 68-967] 24 p4254 A69-43715

RECOVERY PARACHUTES

Air to air recovery of reentry vehicles, discussing parachute/wing descent, aircraft/helicopter energy absorption, payload boarding and towing techniques

[AIAA PAPER 68-1163] 03 p0520 A69-13563

Parachute recovery system for spinning /250 rps/ 155 mm shell launched to 3000 ft/sec by 20,000 g acceleration

[AIAA PAPER 68-937] 12 p2014 A69-26805

Emergency escape and personnel recovery systems including F-111 explosive system, midair deployed buoyancy aerostat and fly-away flexible wing rotor

15 p2551 A69-30853

Recovery system for high altitude sounding rocket payloads, noting air inflated flotation device, payload separation and parachute deployment

[AIAA PAPER 68-959] 21 p3820 A69-39227

RECOVERY TEMPERATURE

U SKIN TEMPERATURE [NON-BIOLOGICAL]

RECOVERY ZONES

Spacecraft return probabilities with time constraints and redundant access, using Borel set concept for counting and summing coverage belts

21 p3819 A69-39017

RECREATION

Leisure time and recreation facilities during long duration space missions, discussing astronaut selection procedure, active recreation, passive enjoyment and exercise programs

06 p0880 A69-17209

RECRYSTALLIZATION

Titanium alloy VTZ-1 recrystallization and oxidation processes studied by heating within 700-1200°C temperature range

01 p0094 A69-10214

Chondrules in Sharps /H-3/ chondrite show evidence of recrystallization and homogeneous olivines and pyroxenes

01 p0156 A69-10977

Nickel-cobalt fcc alloys rolling and recrystallization textures established with filtered Aco K-alpha radiation, considering stacking fault energy effects

04 p0615 A69-14643

Diamond pyramid hardness dependence on grain size of recrystallized alpha titanium

06 p0943 A69-17235

Crystal growth and deformation induced recrystallization in pure aluminum [ONERA-TP-671]

07 p1167 A69-19340

Time and temperature dependence of Mo and W deformation structure variation and primary recrystallization from metallographic investigations using electron microscopy

08 p1334 A69-21058

Recrystallization diagrams of commercially pure Mo and Mo alloyed with Fe, Co or Fe plus Ni, noting additions effect on recrystallized grain size

10 p1715 A69-24012

Solid solution decomposition effect on binary Mg alloys recrystallization temperature containing Al and Nd, using X ray and microstructural analysis

11 p1902 A69-24272

Plasticity increase of molybdenum alloys during precipitation of second phase at high temperatures due to lattice defects redistribution and plastic deformation

11 p1906 A69-25685

Molybdenum additive role in deformed carbonylic nickel recrystallization process

12 p2114 A69-26454

Metallographic study of microstructure recrystallization of 50 Ni-50 Fe alloy during annealing using special etchants and methods

13 p2281 A69-28155

Titanium alloy VT3-1 recrystallization and oxidation processes studied by heating from 700-1200°C

15 p2637 A69-30270

Structure of meteorite Gibeon section containing taenite grains and annealing twins indicating plastic deformation of taenite followed by recrystallization and grain growth

17 p3034 A69-33586

Secondary recrystallization in cold rolled molybdenum foil as function of temperature using electron microscopy and diffraction

18 p3157 A69-35253

Metal purity effect of nickel and Ni-Mo alloy on nucleation and recrystallization nuclei growth following 80 percent plastic deformation

18 p3159 A69-35449

Recrystallization limit effects on coarse grain growth in aluminum alloys extruded sections, studying roles of additives, extruding temperature and heat treatment duration

18 p3160 A69-35472

Dynamic recrystallization in Ni and Ni-Fe alloys during torsional high temperature deformation

19 p3344 A69-36147

Boron thermal diffusion effects on plastic properties of pure Mo subjected to recrystallization

19 p3328 A69-36160

Recrystallization in thoria dispersed Ni sheet as function of strain-anneal cycles, using electron transmission technique quantitative determination

20 p3557 A69-36958

Extrusion variables influence on microstructure and hardness level of Ti-Al-Sn compared with recrystallization behavior after cold swaging [ASM PAPER W9-8.2]

21 p3729 A69-38660

Abnormal grain growth during secondary recrystallization of hydraulically extruded molybdenum as function of annealing

21 p3745 A69-38953

Recrystallization during sintering of free flowing Nb and Ti carbide powders, determining grain growth dependence on temperature and activation energy

22 p3970 A69-40636

InTe phase recrystallization in thin films composed of two InTe phase mixtures, showing random concentrations and distribution of centers growing as spherulites

24 p4361 A69-42993

InTe phase formation in thin film composed of two InTe phases, showing dependence on annealing in high vacuum and substrate temperature

24 p4361 A69-42994

RECTANGLES

Thermal contact rectangle with single side heat capacity, applying Fourier transform and Abel convergence tests

03 p0533 A69-13863

Unsteady three dimensional heating of finite solid rectangular parallelepiped, deducing expressions for rectangle and slab

15 p2717 A69-30790

RECTANGULAR BEAMS

Moment curvature models under reverse cyclic straining developed from stress-strain curves for rectangular beams

04 p0683 A69-15497

Rectangular thin beam Saint Venant deflection in case of moment stresses based on elasticity and shell theory

05 p0834 A69-15783

Large displacement bending of rods for constant deformation cross section, negligible shearing forces and exponential stress-strain relation

05 p0843 A69-16682

Torsional vibrations of unstiffened cylindrical tubes analysis by differential equations and applications to free-free rectangular cross section

09 p1620 A69-22769

Interfacial pressure distribution during slip damping in clamped rectangular beams subjected to vibration

10 p1800 A69-23350

Long rectangular rods stability and vibrations under elastic deformations using bending theory

10 p1802 A69-24024

Torsional shearing stress in thick walled hollow rectangular cross sections

13 p2358 A69-27212

Membrane analogy for flexure of prismatical beams with square cross section and longitudinal cavities, employing Saint-Venant solution

15 p2704 A69-30288

Calculation of natural twisting and bending vibrations of beam with characteristics varying along length

16 p2873 A69-32130

Vibration modes and damping of rectangular cantilevered prismatic steel rods, showing effects of transverse vibration, material and stress on logarithmic decrement

17 p3065 A69-33936

Rectangular thin beam Saint Venant deflection in case of moment stresses based on elasticity and shell theory

18 p3223 A69-35035

Acoustic and internal dampings in freely supported uniform beams of circular and rectangular section, showing frequency dependence and vacuum effect

20 p3620 A69-37062

Rectangular cross section pretwisted beams model curves for turbine and compressor blading vibrational studies

20 p3621 A69-37080

Transverse vibrations of isotropic solid rectangular beam with secondary effects of rotary inertia and shear deformation retained

21 p3832 A69-38447

Stability loss of beams analyzed under compression allowing for various creep conditions in loading and unloading regions, calculating time to failure

22 p4039 A69-39917

Compressed rectangular beam stability under different creep conditions, deriving relation between creep time and initial deflection

22 p4039 A69-39918

Torsion analysis of curvilinear rectangular prismatic beam reinforced by off-center circular rod, using conformal mapping

22 p4049 A69-41279

RECTANGULAR GUIDES

Phase constant of rectangular waveguide containing longitudinal dielectric slab of arbitrary cross section calculated using orthonormal waveguide functions with separated curl and potential fields

01 p0042 A69-10437

Symmetrically truncated right angle E-plane corner, placing electric and magnetic walls in symmetry plane, solving resulting boundary value problems

01 p0044 A69-10624

E field transmission and reflection coefficients in linearly tapered waveguide for fundamental and higher order modes, using point matching method

01 p0044 A69-10629

Calibration of coaxial line noise sources in terms of rectangular waveguide standard, discussing use of adapter for comparison

02 p0210 A69-12436

Higher order modes suppression in square waveguides by bifurcating metal septa of finite length, analyzing periodic array of many finite-length septa

04 p0576 A69-14758

Scattering matrix for internal diffraction in rectangular waveguide with transversely magnetized ferrite core

06 p0895 A69-17455

Characteristic impedance of rectangular waveguide computation curve explained on basis of computer program for cascade of transmission line sections

06 p0897 A69-17490

Propagation modes in corrugated cylindrical waveguides determined by imposing nonisotropic surface reactance boundary condition at corrugated walls

08 p1284 A69-20295

Nonohmic microwave conductivity in semiconductor posts in rectangular waveguide, measuring incident, transmitted and reflected microwave powers

08 p1373 A69-20859

Reflection coefficient of double discontinuity consisting of two closely spaced inductive irises in rectangular waveguide

09 p1453 A69-21444

Radiation field patterns from metal wall aperture in waveguide with rectangular cross section determined using elliptic cylinder

11 p1850 A69-24982

Limiting frequencies of inhomogeneously filled lossless rectangular waveguides and field states, using Maxwell equations

11 p1855 A69-25620

Perturbation analysis in dielectric loaded rectangular waveguides, considering scattered modes and phase progression

12 p2039 A69-26381

Transmission type E saki diode amplifier with stabilizing dielectric loaded rectangular waveguide

13 p2233 A69-28067

Variational method used to determine accuracy of approximation technique for dielectric slab on sidewall of rectangular waveguide

13 p2233 A69-28072

Wave propagation and bandwidth characteristics of rectangular waveguide loaded with H plane lossless dielectric slab

13 p2222 A69-28075

Tunable band stop filter realization from characteristic equation solution for propagation modes by magnetized ferrite slab placed in rectangular waveguide

14 p2422 A69-29751

Relative dielectric constant and permeability of inhomogeneously filled rectangular waveguide filling medium expanded into trigonometric series to calculate cut-off frequencies and field patterns

15 p2577 A69-30627

Equivalent circuits of dielectric loaded and unloaded rectangular waveguide Esaki diode reflection amplifier

15 p2578 A69-30801

Scattering by cylindrical post of complex permittivity /plasma/ in rectangular waveguide, calculating reflection, transmission and absorption coefficients by computer

16 p2756 A69-31578

Electromagnetic wave propagation in transversely magnetized warm plasma filled rectangular waveguide, analyzing TE and TM modes

16 p2756 A69-31581

Broadband low VSWR transitions between rectangular waveguides and coaxial transmission lines, discussing asymmetrical probe and ridge types

16 p2757 A69-31584

Microwave field-plasma slab nonlinear interaction in rectangular waveguide, analyzing current and electron density and second harmonic TE and TM power

16 p2749 A69-31703

Mode filters for oversized rectangular waveguides, considering resistive sheet with complex surface impedance

16 p2760 A69-31948

Wave propagation in rectangular guides, determining dispersion curves by continued fractions method allowing for infinite set of time-space harmonics

17 p2925 A69-33843

Electromagnetic wave scattering in two angled rectangular waveguides filled with isotropic homogeneous medium

17 p2930 A69-33887

Solid state SHF transmission amplifiers design using rectangular waveguides and biased bulk GaAs

21 p3683 A69-39452

Electromagnetic propagation in infinite rectangular waveguide surrounded by dielectric medium described by Green dyadic

23 p4115 A69-41570

Waveguide fed rectangular aperture antenna with dielectric plug load, describing admittance resonant perturbation due to excited TE mode

23 p4136 A69-41589

Rectangular waveguides coupled by oblique subsonant slots in common face, discussing slot orientation and geometry roles

23 p4123 A69-41941

Electromagnetic wave diffraction by multielement periodic metallic strips arrays positioned transversely in rectangular waveguide

23 p4124 A69-42035

Rectangular waveguide with periodic array of infinitely thin metallic strips, studying intrinsic oscillations critical frequencies and amplitude spectrum

23 p4124 A69-42036

Electromagnetic wave propagation in rectangular and plane parallel waveguides coupled by common wall with periodic transverse slots

23 p4124 A69-42037

Rectangular waveguide with inhomogeneity represented by half space dielectric filling with boundary causing polarization, obtaining reflection elimination or minimization reflection

23 p4125 A69-42047

Transmission properties and directional coupler determined for optical circuit dielectric rectangular waveguide with surrounding dielectrics of smaller refractivity

24 p4287 A69-43328

Rectangular dielectric waveguide propagation modes, describing computer analysis based on electromagnetic field expansion in circular harmonics series terms

24 p4288 A69-43330

RECTANGULAR PANELS

Optimization of plane smooth rectangular panels of constant cross section subjected to loading and heating conditions

08 p1417 A69-20821

Finite element analysis of flat rectangular panels, developing equilibrium equations based on specified displacement modes

15 p2708 A69-30667

Finite element analysis of flat rectangular orthotropic multilayer stiffened panels, proposing six degrees of freedom model

15 p2708 A69-30668

Supersonic flutter in square panels and cylindrical shells, measuring critical dynamic pressure

17 p3051 A69-32923

Lightweight structural design problem of stress concentration associated with load diffusion in rectangular panels with constant stress flanges

18 p3219 A69-34785

Stability of sandwich panel strip with lightweight core, formulating problem in terms of equilibrium conditions and potential energy of system

21 p3832 A69-38417

RECTANGULAR PLANFORMS

Rectangular planform shallow spherical shell stability with mixed boundary conditions, using Cauchy-Riemann equations and equation for plate on elastic base

10 p1792 A69-22848

Numerical analysis of natural oscillations of three layer sandwich plates of rectangular planform, considering end conditions

11 p1976 A69-24773

RECTANGULAR PLATES

Rib positioning effect on mechanical behavior of cantilevered rectangular plate in gas flow, considering critical flow velocities and rigidity relationships

01 p0165 A69-10085

Gyroscopically induced vibrational response of rectangular plates and membranes, determining spin and precession effects on natural frequencies

02 p0347 A69-12519

Integral equation solution for plate with internal support

03 p0528 A69-13799

Resonance analysis of forced vibration of rectangular plate in three dimensional supersonic flow

03 p0528 A69-13928

Bending of rectangular plate with partial clamping, obtaining solution by superposition method

04 p0681 A69-15289

NeoHookean /incompressible solid/ rectangular parallelepiped compressed between lubricated rigid plates, comparing stability bounds with predicted critical loads

04 p0682 A69-15303

Clamped rectangular plate under lateral load stress analyzed by extended Kantorovich method to include bending moments and shearing forces

05 p0835 A69-15872

Green function for computation of stress intensity factors for edge cracks in rectangular plates with arbitrary loadings
[ASME PAPER 68-WA/MET-18]

05 p0839 A69-16156

Green function for stress intensity factors of rectangular plate edge cracks, noting application to thermal stresses
[ASME PAPER 68-WA/MET-19]

05 p0839 A69-16157

Plate deflection in own plane under moments applied to ends using elasticity theory, deriving relation between stress tensor and stress function

06 p1021 A69-17177

Stability of rectangular transversely isotropic plate hinged at three sides under uniform pressure applied to two opposite hinged sides

06 p1021 A69-17178

Optimal computer calculation procedure for medium thickness anisotropic laminar plates with shear applied to rectangular and hinged plates

06 p1026 A69-18015

Free vibrations of plates and beams of pyrolytic graphite type materials, analyzing transverse shear deformation and rotary inertia
[AIAA PAPER 69-55]

06 p1027 A69-18070

Plane anisotropic rectangular plates with various boundary conditions, analyzing stability, natural frequencies, mode shapes and displacement under lateral loads

07 p1232 A69-18719

Analytical solution for plate velocity statistics of turbulent-flow-excited rectangular flat plate, discussing vibration excitation

07 p1236 A69-19461

Two dimensional photoelasticity for minimizing stress concentration in perforated rectangular plate subjected to restrained shrinkage, discussing application to solid propellant rocket grains

08 p1412 A69-20255

Vibration characteristics of rectangular plate with fatigue crack and subject to tensile load, applying results to crack propagation in fuselage panels

08 p1413 A69-20399

Differential equation reduction for vibrational motion of rectangular plates subjected to variable tangential forces, discussing dynamic stability

08 p1415 A69-20666

Castigliano variational principle applied to thermal stresses in rectangular plate by expanding stress function in double series of cosine binomials

08 p1419 A69-21178

Free transverse vibrations of rectangular flat plate simply supported along periphery and rigidly connected to interior columns
[ASCE PAPER 739]

09 p1616 A69-21928

Finite inelastic deformations under transverse impulsive loading of clamped thin rectangular planform shells idealized as membranes, using incremental plasticity theory

09 p1616 A69-21939

Central circular hole effect on fundamental frequency of rectangular fixed edges plate, discussing hole size, square plates, etc
[ASME PAPER 69-VIBR-62]

10 p1805 A69-24156

Linear differential equation solution for elastic systems stability problems, discussing applications to heated rectangular plates

11 p1982 A69-24950

Field approach for stress and deflection analysis in rectangular plates reinforced by straight ribs, noting kernel function

11 p1983 A69-25019

Supersonic flutter solutions using finite elements, analyzing rectangular plate bending elements, square simply supported and clamped panels, low aspect ratio configurations, etc

11 p1991 A69-25516

Simply supported laminated anisotropic rectangular plate with coupling occurring between bending and in-plane extension, discussing stiffness analysis by Fourier series method

12 p2184 A69-26808

Lateral bending and two dimensional thermal stress in rectangular orthotropic plates, considering alternating direction implicit method

12 p2188 A69-27100

Correlation between temperature and stress field in thermal buckling of square viscoelastic Maxwell plates under random temperature

12 p2188 A69-27113

Natural vibration modes of linearly tapered rectangular plates, approximating plate characteristic shapes with series of products of beam characteristic shapes

13 p2358 A69-27211

Vibration modes in four lowest natural frequencies of clamped rectangular plates with linear thickness variation, using Ritz method

13 p2361 A69-27442

Shear buckling of clamped rectangular linearly tapered plates, considering uniform shear stress and load

13 p2361 A69-27443

Sine series solution for flexural vibration of rectangular isotropic plates applied to free vibration of orthotropic plates

13 p2363 A69-28128

Rectangular plate buckling analyzed by finite element method with deflection function

13 p2364 A69-28225

Uniaxial compressive stability of rectangular boron-epoxy laminated plates clamped on loaded edges, determining buckling loads by Southwell plots

13 p2287 A69-28669

Free vibrations of laminated anisotropic rectangular plates with clamped edges analyzed by Rayleigh-Ritz energy method

13 p2371 A69-28673

Analogy between differential equations for skew isotropic plates and rectangular anisotropic plates

13 p2371 A69-28678

Buckling of unsymmetric cross-ply rectangular plates under uniform shear, considering hinge-support boundary conditions

13 p2371 A69-28679

Elastic-plastic bending of rectangular plates with asymmetrically inhomogeneous material in plastic range, using modified Ritz method

14 p2533 A69-28984

Postbuckling of rectangular plates with exponential variation in thickness, analyzing large deflection equations using dynamic relaxation method

15 p2704 A69-30291

Strains determination for laterally edge loaded rectangular plate and sagittas determination of perpendicularly loaded plate proved analogous

15 p2704 A69-30295

Finite element and iteration method for large deflection of rectangular plate, considering stiffness matrix for bending

15 p2706 A69-30435

Stress concentration near circular nonreinforced hole at bending of transversely isotropic rectangular plate analyzed in terms of transverse shear theory

15 p2707 A69-30580

Eigenvalue problems in partial differential equations solved by extended Kantorovich method, considering vibration of rectangular membrane and stability of elastic rectangular plate

16 p2876 A69-32783

Stability of nonuniformly heated rectangular plate reinforced by elastic longitudinal and rigid transverse ribs, accounting for influence of torsional and bending rigidities

17 p3057 A69-33198

Moire reflection technique applied to study of stress-strain state of partially clamped rectangular cantilever plates under various loads

17 p3058 A69-33203

Discrete element displacement method applied to buckling analysis of flat rectangular plates under arbitrary membrane loading, calculating critical load intensities

17 p3066 A69-34048

Uniform thickness rectangular plates bending with rigidly clamped or freely hinged edges solved by refined version on digital computer

18 p3215 A69-34535

Transverse vibrations of thin linear viscoelastic rectangular plate of constant thickness resting on elastic medium

18 p3223 A69-35171

Strength analysis of three layer rectangular plates under complex load and support distributions

19 p3434 A69-35827

Bending of normally loaded simply supported rectangular plates in large deflection range solved by nonlinear differential equations and minimum potential energy principle

19 p3445 A69-36828

Simply supported rectangular plates experiments showing prediction on buckling load

19 p3447 A69-36854

Rectangular plate bending element corresponding to finite difference method use, deriving stiffness matrix from strain energy approximation

20 p3619 A69-36949

Clamped uniformly loaded rectangular plate large deflection elastic behavior approximate analysis, using perturbation method

20 p3620 A69-36998

Flat rectangular plates large deflection due to uniform lateral pressure and compressive edge loading analyzed through partial differential equations, difference equations and computer program

20 p3620 A69-37000

Energy formulation extended for plane anisotropic rectangular plates, handling nonuniform properties and loadings

20 p3627 A69-37766

Transverse shear deformation effect on bending of laminated rectangular plates, obtaining solutions for bending deflections, flexural vibration frequencies and buckling loads

20 p3627 A69-37770

Nonlinear oscillations of rectangular plates of composite materials by Berger approach and Reissner variational principle, noting rotary inertial and transverse shear deformation

20 p3627 A69-37771

Rectangular plates bending boundary value problems, deriving formulas for plates with free edges

20 p3630 A69-38291

Bifurcation and hardening rate of rigid-plastic bodies presented on buckling of rectangular plate with lateral restraint

21 p3840 A69-39299

Rectangular plate under biaxial tension stress analyzed to determine onset of necking and stress-strain state

22 p4039 A69-39913

Supersonic panel flutter boundary of buckled and unbuckled clamped rectangular plates, discussing in-plane stress effects

22 p3930 A69-40584

Buckled rectangular plates with constrained edges, analyzing natural frequencies as basis for supersonic panel flutter analysis

22 p4046 A69-41049

Nonlinear random vibrations excitation in rectangular flat plate with initial imperfection by white noise, assuming clamped boundary conditions

22 p4048 A69-41183

Natural vibrational frequencies of uniform thin elastic isotropic flat plates, investigating rectangular and parallelogram plates with various edge conditions

23 p4233 A69-42348

Shearing force and shear buckling deformation influence on supersonic panel flutter boundary of simply supported rectangular plates, basing analysis on deflection approximation

24 p4400 A69-43055

Initial deflection and internal pressure effects on supersonic panel flutter boundary of simply supported rectangular plates under diverse middle-surface stress conditions

24 p4400 A69-43056

Single series solution for rectangular plate deflection under arbitrarily located concentrated load, considering monolithic slab beam connection case

24 p4404 A69-43593

Buckling of thick homogeneous rectangular plates subjected to constant normal stress, noting error for thin plate approximation

24 p4406 A69-43696

RECTIFICATION

Ranger pictures improvement by computer, eliminating image distortion due to electronic imaging systems

06 p0924 A69-17164

Optical rectification effect in lithium metaniobate crystals under neodymium laser radiation, comparing results with data for potassium dihydrophosphate crystals

14 p2458 A69-29168

RECTIFIERS

NT AVALANCHE DIODES
NT CRYSTAL RECTIFIERS
NT GERMANIUM DIODES
NT THYRATRONS
NT THYRISTORS

Self excitation conditions and output characteristics of tunnel diode DC to AC converters for spacecraft, discussing relaxation-oscillator and push-pull circuit converter types

01 p0046 A69-10755

Synthetic circuit equipment for semiconductor rectifier life testing with built-in fault analyzer for indicating shorted and broken diodes

08 p1293 A69-21113

Probability distributions of characteristics of mass produced semiconductor rectifier diodes

12 p2035 A69-25832

Semiconductor rectifiers economic life testing with synthetic circuits utilizing thyristor switch

15 p2579 A69-31041

Optical IR yttrium-iron garnet rectifier increasing light intensity and system Q factor at low external magnetic field

17 p2981 A69-33117

Symmetrically regulated AC/DC converters power characteristics improved by switching in phase rectifiers twice during control cycle

24 p4254 A69-42570

RECTUM

Calorimetry-thermometry discrepancy during prolonged exercise in hot dry environment, measuring rectal temperature with increasing exposure time

23 p4098 A69-42104

RECUPERATORS

U REGENERATORS

RECURSION FORMULAS

U RECURSIVE FUNCTIONS

RECURSIVE FUNCTIONS

Generalized digital low pass filter synthesis by recursion technique, noting coefficient sensitivity simplification

03 p0403 A69-13227

Linear differential equations with sinusoidal coefficients analyzed with aid of trinomial recursions

05 p0787 A69-16464

Existence of minimal solutions of doubly infinite trinomial linear recursions of Poincare-Perron type

05 p0787 A69-16465

Recursive formulas for numerical evaluation of real convolution integral for simulation of control systems and electrical networks on digital computer

06 p0947 A69-17250

Recursive algorithms for pattern classification using misclassified samples

06 p0891 A69-17357

Nonlinear programming computational algorithm for recursive optimal estimates of constrained states of linear system

06 p0902 A69-17403

Probable spectrum stability criterion and reducibility derived for linear differential equation having recursion or almost periodic coefficients

10 p1720 A69-23562

Dynamical systems technique for nonautonomous differential equations leading to recurrent motions

10 p1720 A69-23636

Kalman equations of optimal recursive filter for linear discrete system extended to continuous system through limiting procedure

11 p1859 A69-25408

Recursive estimation of noisy nonlinear multivariable systems in white noise by Kalman, second order nonlinear and iteration filters

12 p2046 A69-26062

Stationary inventory problems analysis, discussing inventory policy, recursive and or limiting procedures, stationary point processes, stock delivery time instants, etc

12 p2192 A69-26750

Book on estimation theory and applications covering stochastic processes, linear estimators and recursive formulations

16 p2764 A69-32386

Optimal linear recursive estimators for uncertain observation, considering false alarm probability

20 p3485 A69-36922

Recurrence formulas for calculating Fourier expansions in elliptic motion in terms of eccentric and mean anomaly

[AIAA PAPER 69-910]

21 p3807 A69-39342

Recursion formula for multilayer interferometer derived, with allowance for multiwave interference, to calculate resonant circuit maxima and minima

23 p4165 A69-41729

Recursive estimation of noisy nonlinear multivariable systems in white noise by Kalman, second order nonlinear and iteration filters

23 p4146 A69-42447

Unmodeled errors detection in recursive flight trajectory estimation, deriving equations for unmodeled parameters

24 p4387 A69-43585

RED ARCS

Low latitude m arcs in 6300 angstrom emission during intense geomagnetic storm related to auroral red oxygen emission peak

01 p0062 A69-10136

Auroral midlatitude red arcs ground and satellite data, noting field aligned electron density depression, plasma temperature increase and O plus-H plus transition altitude

20 p3532 A69-37897

RED BLOOD CELLS

U ERYTHROCYTES

RED SEA

Lineament trend analysis of Gemini Red Sea synoptic terrain photography, noting computerized rotation from apparent to true angles

02 p0247 A69-12808

RED SHIFT

General theory of relativity tests with aid of satellites, considering gravitational red shift measurements, light deflection in solar field, etc

01 p0152 A69-10751

Red shift pattern in quasar emission spectra consistent with fractional screening charges on emitting atom nuclei

01 p0153 A69-10855

Absorption and emission redshift distribution in quasars, N systems and similar compact and radio galaxies

02 p0325 A69-12591

Continuum radiation of quasars, adopting cosmological interpretation of red shift

04 p0648 A69-14565

Quasars, stressing local Doppler and gravitational hypotheses for observed red shifts

06 p0998 A69-16968

Optical mean energy distribution of quasars, discussing red shift effects, significance of physical origin of optical continuum radiation and K-term magnitude determination

06 p0999 A69-16975

Mass motions in flares and moustaches indicated by spectral features, discussing red asymmetry of line emission

06 p0994 A69-17432

Complex distribution of quasar red shift interpreted as due to two simple distributions of cosmological and gravitational red shift

06 p1009 A69-17968

Cosmological model describing relation between red shift and magnitude of quasars

07 p1211 A69-18406

Red shifts and intrinsic powers of radio galaxies and quasars, discussing local luminosity distribution, function of sources and cosmology

07 p1206 A69-19270

Redundant world models, discussing elimination through measurement of larger red shifts of galaxies and quasars

07 p1219 A69-19283

General relativistic gravitational red shift effect on frequency transmitted from satellite orbits, noting possibility of measurement

08 p1383 A69-19901

Relativistic astrophysics, discussing quasar phenomenology, red shift cosmology and relationship with galaxies

08 p1388 A69-20222

Time delay, red shift, equivalence principle, light deflection and perihelion motion tests of general relativity with Jupiter probe

09 p1597 A69-22089

Quasar red shifts due to cosmological and gravitational factors, assuming correlation of QSO intrinsic luminosity with gravitational red shift values

09 p1597 A69-22151

Red shifts of radio sources obtained with Carnegie image tube spectrograph, noting quasi-stellar objects and galaxies

09 p1602 A69-22224

Red shifts of quasi-stellar objects obtained with image tube spectrograph, noting photoelectric magnitudes and colors

09 p1602 A69-22225

Absorption red shifts in quasi-stellar source due to dead galaxies in cosmologically flat model of universe

09 p1602 A69-22228

Absorption red shifts in quasar spectra from spectroscopic observations of PHL 5200 and B194

09 p1604 A69-22271

Bolometric luminosity-red shift relations of Friedmann dust universes corrected for inhomogeneities, using locally inhomogeneous Swiss cheese models

09 p1605 A69-22411

Interstellar reddening material distribution within 2500 parsecs of sun, noting concentration in galactic plane, spiral arms and cloud complexes

10 p1773 A69-22961

Red shift hypothesis postulated on perfect cosmological principle and uniqueness of electromagnetic wavelength measurements, showing agreement with astronomical data

11 p1961 A69-25108

Quasars and radio-quiet objects numbers and properties, discussing red shifts interpretation by cosmological, gravitational and Doppler theories

12 p2161 A69-26937

Colorimetric studies of galaxies exhibiting red shift with increasing radial distance from center

12 p2164 A69-27025

Radio galaxy identification and luminosity measurement, noting limitations of red shift observation methods

12 p2165 A69-27032

Quasars optical properties, hypotheses on nature, energy distribution, red shift, stellar magnitude and distance estimation on basis of absorption

12 p2167 A69-27042

Red shift determinations and line identifications for quasars, using spectrograph with electro-optical converter

12 p2168 A69-27048

Law of optical radiation and photometric characteristics of quasars, noting photometric effect of strong emission lines and color dependence on red shift

12 p2168 A69-27052

Absorption line spectrum of quasar Ton 1530, discussing line widths and red shifts

13 p2334 A69-27306

Statistical tests for cosmological hypothesis for origin of absorption lines in spectra of quasars, considering red shifts

13 p2334 A69-27307

Quasar red shifts distance dependence indicated by visually bright quasar faintness in radio range

13 p2344 A69-27635

Relativistic version of generalized gravitation theory, establishing models to describe gravitars having large gravitational mass defect and red shift

13 p2351 A69-27864

Low density Friedmann universe models with non-zero cosmological constant and long ages, deducing galaxy evolution rates from magnitude-red shift relations

14 p2527 A69-29944

Quasar multiple absorption red shift lines caused by gas in extended galaxy halos, assuming broadened galactic cross section area

15 p2695 A69-30884

Quasi-stellar and related objects emission and absorption red shifts tabulation suggesting absorption lines origin

15 p2701 A69-31532

Quasi-stellar objects anomalous Hubble plot, suggesting explanation for steeper plot under assumption on red shift vs apparent magnitude relation

15 p2701 A69-31536

Red shift table for six galaxies near Coma Cluster from spectrograms of absorption lines

17 p3044 A69-34182

Red shift-distance relation for galaxies, discussing time dependence

20 p3597 A69-37411

Open cluster NGC 7128 distance and reddening determination by photometry

20 p3598 A69-37465

Quasars observations interpretation, discussing red shift origin, gravitational collapse, lifetime, distribution, cosmological aspects, etc

21 p3802 A69-38825

Discreteness of distances to extragalactic objects, tabulating red shift values from Wilson formula for galaxy clusters

21 p3802 A69-38843

Nonexistence of second order clustering of galaxies and relationship to gravitational cut-off, relativistic cosmologies and red shifted light by exponential decay of photon energy

22 p4024 A69-40579

Quasars red shifts distribution interpreted as due to cosmological and gravitational red shifts distribution, noting analysis error

22 p4024 A69-40580

Quasars observation failure for red shifts beyond z suggested due to absorption of intergalactic neutral H

22 p4024 A69-40582

Free-free intergalactic absorption at LF as function of red shift for uniform zero pressure cosmological models

22 p4025 A69-40640

Interstellar reddening in solar vicinity, analyzing roles of galactic latitude and longitude and heliocentric distance

22 p4026 A69-40648

Universe expansion model, integrating Einstein gravitation equations with cosmological constant lambda to interpret Hubble effect

22 p4029 A69-40756

Quasar association with galactic clusters, noting red shift and spectral correspondence

22 p4029 A69-40763

Observational cosmology in terms of relation between red shift and apparent luminosity of galaxies (Hubble relation/

23 p4219 A69-42328

Universe behavior in time, discussing expansion observed by red shift, closed universe with future contraction phase and unlimited expansion open model

23 p4221 A69-42391

Red shift determinations and line identifications for quasars, using spectrograph with electro-optical converter

24 p4375 A69-42551

Law of optical radiation and photometric characteristics of quasars, noting photometric effect of strong emission lines and color dependence on red shift

24 p4375 A69-42552

REDUCED GRAVITY

Lunar gravity simulation effect on human performance, discussing fidelity requirements, self locomotion, metabolic rate and psychomotor task decrement

02 p0203 A69-12217

Low g accelerometers including air-film, electrically suspended, vibrating string, semiconductor and ONERA

[ONERA-TP-449]

05 p0766 A69-16749

Sensory and motor activity of human subjects exposed to reduced gravitation during aircraft motions along parabolic trajectories

07 p1062 A69-18592

Space flight crew efficiency during prolonged weightlessness, stressing preflight adaptation and space vehicle technology improvement

07 p1063 A69-18596

Blind goldfish behavioral responses to short lowered gravitational force cycles during vertical flight classified as vestibular reflexes resulting from otolith displacement

11 p1828 A69-25464

Monograph on gravity covering gravimetric boundary value problem, iterative solutions, error analysis, gravity reduction, integral equations, etc

13 p2254 A69-27929

Excessive extrapolation limitations in applying transient data to low gravity fluid behavior for orbital refueling systems, presenting orbital fluid transfer experiment

[AIAA PAPER 69-566]

16 p2870 A69-32755

Nonlinear free surface effects in low gravity tank draining, finding domains of validity for linearized and nonlinear analyses

[AIAA PAPER 69-680]

17 p2953 A69-33450

Bjerhammer gravity reduction method applied to gravity in space, analyzing two test models with mass focused between topographical and reference surface

18 p3173 A69-35197

Circular baffle mounted above flat-bottomed cylindrical tank outlet, discussing effect on remaining tank fluid volume and flow behavior under low gravity conditions

21 p3696 A69-39232

Simulated low gravity propellant sloshing in spherical, ellipsoidal and cylindrical tanks, discussing Bond number simulation and tank geometry effects

[AIAA PAPER 69-1004]

22 p3921 A69-40378

Space manufacturing processes for orbital low and zero gravity environment, discussing buoyancy and thermal convection sensitive and molecular forces controlled methods

[AAS PAPER 69-486]

24 p4380 A69-42844

REDUCTION [CHEMISTRY]

NT DEOXIDIZING

NT HYDROGENATION

Electroless deposition of various metals with emphasis on nickel, discussing mechanism, plating solutions, substrates, deposit properties and applications

01 p0099 A69-11060

Thermodynamic and kinetic interactions of high melting point metal oxides reduction by carbon

03 p0445 A69-13568

Metal oxide and carbon interaction during spatial separation of reagents, noting influence of reducing agent activity on metal vapors

03 p0445 A69-13569

Titanium aluminum alloys two stage direct production by aluminothermal reduction of titanium tetrachloride

07 p1159 A69-18536

Titanium tetrachloride reduction to titanium by magnesium, showing autocatalytic process

07 p1163 A69-18784

Two stage sodium thermal reduction of Ti tetrachloride to metallic Ti, determining process parameters

07 p1164 A69-18785

Polymorphic characteristics of titanium pentoxide prepared by reducing titania, examining oxidation products with X ray diffraction

07 p1168 A69-19601

Platinum electrode study of electrochemical oxygen reduction in nonaqueous media, including kinetic effects of different water concentration levels

[ECS PAPER 7]

08 p1268 A69-20361

Physical properties control in nickel powders obtained by hydrogen reduction of nickel diamine sulphate solutions

08 p1334 A69-21057

Photochemical production of reduced organic compounds of C and N in primitive earth atmosphere

09 p1444 A69-21465

Equatorial mounted solar energy concentrator efficiency compared to unconcentrated sunlight and artificial UV-visible light source in reducing Pb tetraacetate solution in acetic acid

16 p2736 A69-31814

Pseudosplitting/peroxide mechanism for O reduction at fuel cell cathodes, analyzing O molecule adsorption, H bonding and electron transfer at surface

16 p2748 A69-32809

Nonmetallic inclusions formation mechanism after reducing iron by Al, Zr and Ti, noting oxygen/reducing agent ratio role

22 p3969 A69-40069

Gamma radiation effect on AgCl-Cu redox state in AgCl activated, heat treated Na-Al-B-Si glass, using EPR method

23 p4180 A69-42471

Chlorella enzymes activity in reducing nitrate to nitrite and nitrite to ammonia

24 p4263 A69-43136

REDUNDANCY

Multibeam recording technique producing speckle-free images in redundant holograms of transparencies

01 p0082 A69-10850

Book on laws of failures in technical equipment with emphasis on quantitative description and practicality of reliability theory, discussing redundancy problems

03 p0453 A69-13009

Curve fitting for optimum redundancy reduction on sampled data, describing polygonal and approximate polygonal techniques

09 p1533 A69-22458

Pure inertial navigation system support by supplying additional or redundant navigational information, considering space flight applications and earth related problems

12 p2128 A69-25873

Data compression, redundancy reduction and applications to space flight technology

12 p2027 A69-25876

Stability augmentation system for CX-84 tilt wing V/STOL aircraft, using redundancy techniques to achieve fail operational performance with two active channels

[AHS PAPER 310]

17 p2901 A69-33545

Slide methods for duplex parallel and switchover redundant mission availabilities based on cost, reliability and maintainability

18 p3147 A69-34531

Masking and standby redundancy approach to fault tolerance in space navigation computers with illustrations, discussing automatic maintenance

19 p3279 A69-35798

Maximum rms error comparison of redundancy reduction techniques, emphasizing limiting slope technique and worst case interpolation error

19 p3273 A69-36264

Spacecraft control systems with computer command redundant jets for linear and angular pulses, relating configuration design to level-of redundancy and task dimension

[AIAA PAPER 69-845]

21 p3822 A69-39375

Fail-soft operation in array processor with cellular redundancy, discussing cellular autonomy, long life and ultrareliability

[AIAA PAPER 69-965]

22 p3906 A69-40346

REDUNDANCY ENCODING

Binary block codes for correction of substitution and synchronization errors

09 p1452 A69-21316

Huffman minimum redundancy coding extension to run-length information based on Poisson distribution, including optimization and data compression applications

19 p3272 A69-36262

False signals formation during random pulse noise in single command channels with PTM coding, noting code value and redundancy

19 p3278 A69-36595

REDUNDANT COMPONENTS

Nonorthogonal multisensor strapdown inertial reference unit providing redundant capabilities and optimal performance

03 p0429 A69-13211

Digital computer simulation of nonlinear redundant structure variables including thermal influence, creep and arbitrary loads

[AIAA PAPER 69-120]

06 p1028 A69-18166

Triodes reliability for space application, emphasizing RH 7 Cc used during Mariner 4 expedition

08 p1295 A69-21122

Reliable operation duration distribution shown to be arbitrary for standby system consisting of basic device and n devices in nonloaded standby condition

09 p1513 A69-22676

Optimum automatic selection of redundancies, discussing weighting and pivot choice and rigid element incorporation

11 p1993 A69-25529

Digital computer redundancy, analyzing triple modular redundancy in Saturn vehicles and quad design in primary processor and data storage for OAO

12 p2034 A69-26567

Redundant systems reliability prediction for single mission in standby mode or without standby, using failure states concept and birth-death equations

12 p2102 A69-26569

Complex electronic systems optimum redundant element content determination for ensuring adequate supply

14 p2426 A69-29422

Satellite circuit assembly reliability achievement by high reliability components, redundancy and optimal utilization

15 p2624 A69-30819

Multistage systems high reliability design, describing branch and bound computer method for optimal resource allocation of redundant components

18 p3148 A69-35081

Sequential design for economic description of potentially redundant elastic structures, noting redesign sequence

21 p3842 A69-39302

Valving concepts and functional approaches for inert gas attitude control thruster systems providing redundancy safeguards at minimum weight, volume and power costs

[AIAA PAPER 69-843]

21 p3786 A69-39373

Triple redundant actuator for fly-by-wire control system, noting electrohydraulic servomechanisms in side-by-side arrangement

22 p3870 A69-41242

Two channel electronic system with one redundant channel for automatic replacement in case of failure evaluated for operational preparedness

23 p4136 A69-41559

Liapunov stochastic stability direct method analog used for estimating reliability of redundant systems with constant recovery time

23 p4144 A69-41953

F-111D computer complex to provide selective functional redundancy and flexibility to accommodate mechanization changes

[AIAA PAPER 68-837]

24 p4285 A69-43719

REENTRY

NT HYPERBOLIC REENTRY

NT HYPERSONIC REENTRY

NT MANNED REENTRY

NT SPACECRAFT REENTRY

Nonequilibrium electron temperature, concentration and reflection in reentry boundary layers, discussing heat transfer and ionization energy diffusion

[AIAA PAPER 69-82]

06 p0915 A69-18190

REENTRY ANGLE

U ANGLES [GEOMETRY]

REENTRY COMMUNICATION

C and S band waveguide impedance measurements taken in flight in reentry plasma, noting results for plasma

02 p0218 A69-12333

Radio frequency signal transmission between orbiting spacecraft and vehicle entering VM-10 model atmosphere, examining near wake approximations and plasma-electromagnetic interaction

09 p1455 A69-22002

Amplitude modulation of electromagnetic waves by modulated magnetic fields for communications through rocket exhausts and reentry plasma sheaths during blackout

14 p2417 A69-29591

Mathematical model of nonlinear microwave breakdown for overdense and underdense plasma outside

reentry vehicle, predicting nonlinear pulse transmission through high temperature plasma
20 p3495 A69-37853

REENTRY EFFECTS

Ground simulation of reentry observables with ablation, studying ablation products interaction with flow-field of wave superheater hypersonic tunnel
02 p0229 A69-12502

Quantitative determination of reentry shock precursor absorption level and effect on surface radiation heating, calculating radiative flux from shock layer enthalpy distribution
02 p0354 A69-12528

Infrasonic waves recordings from Saturn 5 vehicle, observing signal reversal occurrence
03 p0509 A69-13358

Reentry shock layer radiative heat transfer to surface of blunt superorbital vehicle
[AIAA PAPER 68-1151] 03 p0532 A69-13560

Critical end-on impact velocities calculated for reentering solid and granular radioisotopic fuel rods with solid and granular earth materials
04 p0630 A69-14800

Nose cone reentry simulation under low temperature subliming ablators, discussing dry ice, camphor and steel calibrations models fabrication, instrumentation and boundary layer measurements
[AIAA PAPER 69-152] 06 p0929 A69-18098

Shock layer microwave radiation measurements during reentry flight of spherical nose cone, determining effective plasma temperature
[AIAA PAPER 69-183] 06 p0865 A69-18201

Inverted spin testing techniques using jet trainer, emphasizing entry variations and effect on spin characteristics
14 p2392 A69-29696

Flash X ray unit with special film transport devices to obtain sequenced dynamic radiographs of ablating models during reentry simulation tests
19 p3291 A69-35720

Diamond shaped surface ablation patterns development mechanism for several ablation materials of ground test and recovered flight vehicles
[AIAA PAPER 68-671] 23 p4059 A69-41891

Swept frequency X band reflectometer for measuring antenna properties in simulated reentry environments
[AAS PAPER 69-282] 24 p4313 A69-42861

Reentry shock layer radiative heat transfer to surface of blunt superorbital vehicle
[AIAA PAPER 68-1151] 24 p4414 A69-43567

REENTRY GLIDERS

U LIFTING REENTRY VEHICLES

REENTRY GUIDANCE

Digital simulation of vehicle motion and control for six degree of freedom simulations of Gemini reentry and aircraft, missile control, etc
05 p0725 A69-16477

Reentry and planetary entry physics and technology, II, Advanced concepts, experiments, guidance-control and technology
11 p1967 A69-25718

Subsonic glide landing approach guidance for unpowered lifting vehicles, using perturbation feedback and approximation of heading and position coordinates
[AIAA PAPER 69-865] 21 p3763 A69-39391

REENTRY PHYSICS

Upgrading wave superheater for evaluation of reentry materials
01 p0054 A69-10917

Unsteady aerodynamics of ablating flared reentry body, noting complications due to blunted nose shear flow and entropy gradient effects
02 p0189 A69-12524

Reentry plasma sheath simulation in wind tunnel by injection of nitrogen plasma from model vehicle nose
03 p0412 A69-13679

Monograph on radiation gas dynamics, thermal radiation, applied spectroscopy and ablation and applications in high speed atmospheric entry
04 p0685 A69-14597

Correlations of stagnation point radiative heat transfer for earth reentry, noting use of nongray absorption coefficient models
04 p0685 A69-14736

Propulsion and reentry - Conference, Belgrade, September 1967
06 p0859 A69-17625

Lifting reentry dynamic stability of flare stabilizers and flap controls
[AIAA PAPER 69-182] 06 p1017 A69-18053

Autorotation characteristics of various shapes in subsonic and hypersonic flows for mechanics of free flight reentry to earth impact
[AIAA PAPER 69-132] 06 p0863 A69-18062

Coordination technique for pressure, density and temperature measurements by probes during parachute reentry into planetary atmospheres, taking into account reentry dynamics
09 p1609 A69-21775

Book on reentry and planetary entry physics and technology covering entry dynamics, thermodynamics, radiation, ablation and heat transfer
11 p1967 A69-25573

Reentry and planetary entry physics and technology, II, Advanced concepts, experiments, guidance-control and technology
11 p1967 A69-25718

Swept frequency microwave measurements in simulated reentry environments using dielectric layers, glow discharge plasma and aperture antenna-plasma layer model
[AIAA PAPER 69-701] 17 p2920 A69-33461

Systematic mathematical ordering of knowledge concerning three dimensional flow patterns around blunt bodies, emphasizing high speed computers role
18 p3089 A69-35269

Spectral emissivity measurement of ablating phenolic graphite heated by subsonic air stream to high temperature to simulate reentry condition
20 p3565 A69-37187

Parametric differentiation applied to radiation gas dynamics equations solution, considering energy transfer by thermal radiation in high speed reentry
[AIAA PAPER 68-668] 23 p4059 A69-41892

Apollo afterbody heat transfer, studying ablation effects for various reentry angles of attack
24 p4415 A69-43680

REENTRY RANGE

Spacecraft longitudinal control during reentry of lunar orbiter into atmosphere, analyzing final range prediction, trajectory tracking and accelerometers performance
13 p2355 A69-27681

Spacecraft range control algorithm during reentry at parabolic velocity into atmosphere with varying parameter distributions
13 p2355 A69-27682

REENTRY SHIELDING

Apollo thermal protection system, noting low density ablation, flight and ground tests
[AIAA PAPER 68-1142] 03 p0519 A69-13558

Microwave techniques for bondline defects and thickness of reentry elastomeric heat shield material bonded to titanium alloy
09 p1499 A69-22306

Sample data reduction methods combined in special purpose computer for measuring ablation in reentry vehicle heat shields
10 p1660 A69-23290

Thin multiple layer superinsulation protection against reentry heat, discussing composite design considerations and refractory materials selection
12 p2060 A69-26817

REENTRY TRAJECTORIES

Incidence for three dimensional reentry trajectories preprogrammed as function of velocity, finding bank angle as function of inclination
03 p0504 A69-12858

Synoptic density maps for postreentry altitudes derived from constant pressure charts and horizontal gradients
04 p0626 A69-14909

Orbital trajectories about Mars or Venus, considering reentry to earth, planet perturbation effect, total mission time and orbital distance from planet
05 p0823 A69-16042

Ballistic reentry trajectories, considering point mass motion in central force field under tangential thrust action and spherical atmospheric density distribution
06 p1006 A69-17564

Spacecraft trajectory during atmospheric reentry determined from projections of longitudinal acceleration onto coordinate axes connected with spacecraft
06 p1014 A69-17581

Ablative and insulative performance of reference heat shield materials under transient heating simulating ballistic vehicle reentry trajectory, using plasma jet facility
[AIAA PAPER 69-150] 06 p0907 A69-18110

Convergence extensions in quasi-linearization for optimal control, showing results for brachistochrone and reentry trajectory problems
09 p1590 A69-21414

Reentry trajectories from lunar surface and orbit obtained by computer with allowance for initial data spread
09 p1594 A69-21756

Integration time reduction for equations of motion of vehicle center of mass during parabolic reentry, using Runge principle
09 p1532 A69-21763

Lifting entry concepts for return from earth orbit, discussing deceleration, heating and heat protection
11 p1968 A69-25720

Aerodynamic measurements on Apollo CM model at hypersonic flow simulating earth orbital reentry trajectory
12 p2012 A69-26800

Optimal control for minimization of heating and acceleration forces to reduce kinetic energy of reentry vehicle in space missions
13 p2352 A69-27960

Optimum overestimate to obtain bound permitting use as convergence criterion for iterative process in orbital glider reentry trajectory optimization
[ONERA-TP-628] 16 p2805 A69-32332

Earth-moon and moon-earth trajectory parameters related to lunar orbit conditions for synthesizing lunar orbit trajectory
18 p3196 A69-34704

Steepest ascent convergence improved in orbital glider reentry trajectories optimization problems, discussing bang-bang and cosine control-variable changes
19 p3398 A69-35666

Orbital trajectories about Mars or Venus, considering reentry to earth, planet perturbation effect, total mission time and orbital distance from planet
20 p3606 A69-37951

Apollo type reentry trajectory optimization numerical methods
24 p4386 A69-43281

REENTRY VEHICLES

NT AEROSPACEPLANES
NT APOLLO SPACECRAFT
NT GEMINI SPACECRAFT
NT HL-10 REENTRY VEHICLE
NT LIFTING REENTRY VEHICLES
NT MERCURY SPACECRAFT
NT RECOVERABLE SPACECRAFT
NT REUSABLE SPACECRAFT
NT TRAILBLAZER 2 REENTRY VEHICLE
NT VOSKHOD 1 SPACECRAFT
NT VOSKHOD 2 SPACECRAFT
NT VOSKHOD MANNED SPACECRAFT
NT X-24 AIRCRAFT

Acoustic probe for measuring pressure fluctuations on hypersonic reentry vehicle, discussing flow characteristics and heat shield ablation effects on frequency response
01 p0008 A69-11278

Active control system augmentation of inherent aerodynamic damping assuring acceptable limits on oscillatory rotational motion during hypersonic Martian atmospheric entry
02 p0333 A69-11742

Nosetip cooling system based on discrete subsonic forward liquid injection through ablative nosetip opening of blunted reentry vehicle
[AIAA PAPER 68-1141] 03 p0532 A69-13559

Reentry shock layer radiative heat transfer to surface of blunt superorbital vehicle
[AIAA PAPER 68-1151] 03 p0532 A69-13560

Air to air recovery of reentry vehicles, discussing parachute/wing descent, aircraft/helicopter energy absorption, payload boarding and towing techniques
[AIAA PAPER 68-1163] 03 p0520 A69-13563

Boundary layer transition measurements on flight tests of experimental 22 degree conical reentry vehicle with Be heat shield and graphite nose
[AIAA PAPER 68-1152] 03 p0362 A69-13648

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments
[AIAA PAPER 68-1154] 03 p0533 A69-13669

Reentry plasma sheath simulation in wind tunnel by injection of nitrogen plasma from model vehicle nose
03 p0412 A69-13679

Make wire, light pipe and spring wire ablation sensors development for measuring parameters of heat shield materials for reentry vehicles
04 p0602 A69-15428

Solar radiation protection of radiometers and spectrometers on reentry vehicle by launching times and solar view field selection
04 p0666 A69-15511

Angle of attack effect on motion throughout entry of spinning descending vehicle, noting effects of transverse angular velocity and spin rate
04 p0666 A69-15522

Laminar boundary layer separation and reattachment near concave corner on cooled reentry body in supersonic flow

06 p0911 A69-17592

Dynamic stability loss on ablating vehicles ascribed to boundary layer transition effect from turbulent aft body heating

[AIAA PAPER 69-106] 06 p1037 A69-18087

Roll acceleration influence on angle of attack convergence and windward meridian rotation rate of rolling reentry vehicles

[AIAA PAPER 69-100] 06 p1018 A69-18089

Ballistic reentry vehicle roll-pitch coupling, showing influence of nose asymmetries

[AIAA PAPER 69-101] 06 p1018 A69-18156

Anomalous roll behavior of spinning ballistic reentry vehicles with compound aerodynamic asymmetry consisting of lateral offset combined with trim angle of attack

[AIAA PAPER 69-103] 06 p1019 A69-18168

Transonic dynamic stability of free flight half angle cones in wind tunnel for high drag planetary entry vehicles, discussing Mars entry trajectories

[AIAA PAPER 69-105] 06 p1019 A69-18209

Transpiration cooling of reentry vehicle nose tips, noting two dimensional aspects of porous wall coolant flow and matrix-coolant energy exchange

[AIAA PAPER 69-96] 06 p1039 A69-18212

Homogeneous fused silica and quartz reinforced resins as dielectric materials for reentry vehicle antenna windows

07 p1090 A69-18400

Aerothermoelasticity problems for Mars entry vehicles, discussing deceleration loads, separated hot gas flow, shield thermal gradients and oscillatory body motion

[AIAA PAPER 68-283] 09 p1610 A69-21991

Coated refractory tantalum alloy as ductile, weldable material for application on hypersonic aircraft or reusable reentry vehicles at high temperatures

09 p1526 A69-22326

Pyrotechnic activated calorimeter for reentry package design of vehicles entering earth atmosphere at lunar return velocities

10 p1669 A69-23026

Radiant heat transfer in hypersonic aerodynamic heating, discussing radiant flux and carbon dioxide concentration in reentry problems

11 p2002 A69-25233

Environmental problems of entry vehicle returning from lunar or planetary mission, discussing heat protection system efficiency

11 p1968 A69-25721

Entry propulsion and lower systems technology for planetary entry and atmospheric reentry vehicles

11 p1945 A69-25723

Wing section of high lift/drag test vehicle for 2500 F reentry, describing design, manufacture and testing

12 p2103 A69-26837

Optimal control for minimization of heating and acceleration forces to reduce kinetic energy of reentry vehicle in space missions

13 p2352 A69-27960

Thermionic electrical power generation from reentry plasmas with nose cone as emitter and vehicle afterbody as collector

14 p2399 A69-29194

Hypervelocity reentry simulation problems for slender and blunt bodies, defining significant parameters

15 p2681 A69-30376

Reentry flight test vehicle development for West German space program, using hypersonic model to determine controllability and aerodynamic stability

16 p2867 A69-31934

Shape and surface roughness effects on turbulent ablation of reentry body nose tip, noting recession rate

[AIAA PAPER 69-717] 17 p2952 A69-33435

Precursor plasma electron number densities calculations for blunt reentry vehicles, analyzing extreme UV radiation emanating from bow shock

[AIAA PAPER 69-718] 17 p2893 A69-33487

Collection of papers on thermal design principles of spacecraft and entry bodies

18 p3227 A69-34372

Aerodynamic and flight characteristics of variable geometry entry spacecraft during subsonic wing deployment and landing

[AIAA PAPER 69-742] 18 p3084 A69-34407

Aerodynamic characteristics of ballistic reentry vehicles from flight test dynamic measurements, illustrating results

18 p3085 A69-34670

Earth orbital entry vehicles weight prediction, noting vehicle geometry as function of vehicle shape, hypersonic lift drag ratio and crew size

[SAWE PAPER 770] 18 p3208 A69-34876

Computer aided design analysis program to provide weight and sizing data for entry spacecraft

[SAWE PAPER 797] 18 p3208 A69-34903

Autopilot for flight simulation of stability and control of pilot-airframe combined performance on reentry missions, using airborne analog computer for vehicle response

18 p3208 A69-35000

Computer programs determining gaseous properties and aerodynamic characteristics for missiles, reentry vehicles and spacecraft at angles of attack

18 p3107 A69-35068

Ablation heat shields, emphasizing dielectric low cost fabrication and application to entry vehicles

19 p3318 A69-35538

Radar design for target detection, tracking and identification, modeling plasma effects on radar cross section of reentry vehicles based on wave-plasma interactions

20 p3485 A69-36925

Rice-Ramsperger-Kassel kinetic theory applied to sulfur hexafluoride injection into boundary layer of high speed reentry vehicle

20 p3514 A69-37226

Composites for weight sensitive aerospace vehicles including reentry vehicles and V/STOL aircraft, considering costs, fracture toughness, corrosion resistance, etc

20 p3565 A69-37291

Moving model target for laboratory measurements of radar cross section to simulate satellite or reentry vehicle precession motion, noting signature data analysis

20 p3511 A69-37850

Mathematical model of nonlinear microwave breakdown for overdrive and underdense plasma outside reentry vehicle, predicting nonlinear pulse transmission through high temperature plasma

20 p3495 A69-37853

Three dimensional laminar boundary layer hypersonic flow about slender conical vehicles, analyzing transverse surface curvature effect, studying Reynolds number, cone angle, etc

[ASME PAPER 69-FE-23] 20 p3460 A69-37992

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments

[AIAA PAPER 68-39016] 21 p3851 A69-39016

Electrical conductivity in wake neck measured using RF bridge on boom extending from reentry vehicle

21 p3724 A69-39030

Spring restrained, momentum-wheel inertial orientation and stabilization system for exoatmospheric vehicles, noting mission constraints and hardware parameter variations allowances

21 p3819 A69-39214

Reentry Vehicle Altitude-Velocity Sensor for continuously measuring hypersonic vehicles free stream density and velocity in atmosphere at low angle of attack

[AIAA PAPER 69-866] 21 p3725 A69-39392

Reentry cones with mass and configuration asymmetries, studying nonlinear aerodynamic characteristics by wind tunnel and full scale flight tests

[AIAA PAPER 69-867] 21 p3823 A69-39393

Artificial damping of longitudinal winged reentry vehicle motions in earth atmosphere, discussing vibration damper dynamic characteristics

21 p3829 A69-39828

Speed conditions of environmental simulation of thermal scale models of reentry vehicles, considering ablatives with phase-change and involved chemical reaction

[AIAA PAPER 69-1011] 22 p3922 A69-40384

Mars entry capsule ionized wake producing circularly polarized antenna radiation null region, noting effect on communication blackout time

22 p3914 A69-40701

Bistatic radar scattering cross sections for reentry vehicle with ionized wake

23 p4116 A69-41593

Diamond shaped surface ablation patterns development mechanism for several ablation materials of ground test and recovered flight vehicles

[AIAA PAPER 68-671] 23 p4059 A69-41891

Hypersonic reentry spheres drag coefficients derived from radar measurements

23 p4059 A69-41898

Dynamic model of ablation pitching moment derivative and time lag effect on spinning reentry vehicle applied to Black Knight flight results

24 p4245 A69-43249

Reentry shock layer radiative heat transfer to surface of blunt superorbital vehicle

[AIAA PAPER 68-1151] 24 p4414 A69-43567

REFERENCE ATMOSPHERES

Gas dynamics, thermodynamics, chemical properties, energy and products of hydrocarbon-air detonations in tubes under standard atmospheric conditions

[WSCI PAPER 68-26] 07 p1241 A69-18369

Data tabulation and calculation for atmospheric refraction between 5-40 km based on GOST standard atmosphere

15 p2646 A69-30160

Soviet meteorological rocket sounding data for upper atmosphere compared to CIRA 1965 model

15 p2650 A69-31421

REFERENCE SYSTEMS

Rotational motion of system of particles related to existence of reference frame to eliminate coupling terms between internal and rotational motion

02 p0280 A69-11867

Coupling geodetic systems of coordinates linked to reference ellipsoids from determination of angle of inclination relative to earth rotation axis and equatorial plane

12 p2068 A69-26426

Impulsive trajectories optimal and nonoptimal solutions, classifying known results for reference purposes

16 p2857 A69-32146

Transit forecast of terrestrial satellite moving through fixed coordinate line in assigned reference

16 p2859 A69-32221

Multiple reference sources to improve field of view of lensless Fourier transform holography limitation due to modulation transfer function of film and turbulence

17 p2971 A69-32920

Neighboring optimum feedback guidance to motivate min-distance lookup parameter determined by minimizing metric function of perturbed state and reference trajectory

[AIAA PAPER 69-888] 21 p3765 A69-39414

Adaptive control system for aerospace vehicles, describing model reference network for control parameter determination

21 p3688 A69-39857

Schwarzschild metric properties in synchronous reference system, using succession of Schwarzschild interval holonomic transformations as function of gravitational radius

22 p3982 A69-41063

Performance characteristics of multivariable model reference adaptive systems synthesized by Liapunov method analyzed using computer simulation

22 p3919 A69-41201

Visual and tactual interaction in judgments of vertical in dark room experiments, discussing effects of various reference systems

24 p4271 A69-42752

U ELECTROSLAG REFINING

REFLECTANCE

NT SPECTRAL REFLECTANCE

E field transmission and reflection coefficients in linearly tapered waveguide for fundamental and higher order modes, using point matching method

01 p0044 A69-10629

Electroreflectance spectra of Ge-Si alloys, noting concentration dependence and band structure of Si and Ge

02 p0295 A69-11784

Reflection elimination for single dielectric film on solid laser material substrate, calculating reflectance as function of frequency

02 p0256 A69-11926

Energy characteristics of laser with passive Q switch, taking into account internal reflections

02 p0256 A69-11999

Vanadium dioxide reflection spectra dependence on incident quantum energies during semiconductor/metal phase transition

02 p0298 A69-12100

Reflection indicatrices of aluminum oxide, MgO, Au and Pt surfaces for normal irradiation noting temperature and surface treatment effects

03 p0534 A69-14161

Reflection coefficients of edge and center elements of large periodic two dimensional antenna array, noting TEM mode parallel plate horn arrays

04 p0572 A69-14322

Reflection coefficient determination of bent multiwave waveguide, considering reflected wave due to

REFLECTED WAVES

secondary conversion of parasitic waves interacting with primary wave

04 p0576 A69-14773

Flexural wave reflection from corner joint between plates, establishing reflection coefficient dependence on wave frequency

04 p0679 A69-14903

Diffusive scattering effects on planetary surface reflection coefficient determined by radar observations

04 p0662 A69-15245

Electron beam modulation of germanium reflectance

05 p0807 A69-15816

Formulas describing reflection and transmission coefficients of plasma for plane electromagnetic wave, using Maxwell equations in variable medium

05 p0805 A69-16608

Nonuniform distribution and concentration of doping materials in semiconductors determined by measuring optical reflection coefficient

05 p0764 A69-16664

Semiconductors reflectivity enhancement by irradiating with Q switched ruby laser output

06 p0935 A69-17768

Transmission and reflection coefficients of cylindrical tubes moving in free molecular gas flow determined by Monte Carlo method

06 p0911 A69-17877

Model for spectral bidirectional reflectance of rough surface producing good agreement with experimental data

[AIAA PAPER 69-64]

06 p0959 A69-18125

Thermal radiative reflectance characteristics of low density charring ablators subjected to planetary entry environment simulation

[AIAA PAPER 69-61]

06 p0947 A69-18148

InAs solid solutions reflection spectra with CdTe, CdS, CdSe and ZnTe compounds, determining conduction bands

07 p1198 A69-18511

ELF radio waves reflection coefficients calculated from two layer ionospheric model, noting ion collision frequency effect in Schumann resonance frequency band

07 p1124 A69-18820

Open resonator reflection coefficient resonance curve compared with transmission coefficient, noting low Q waves excitation role

07 p1106 A69-19152

Complex transmission and reflection coefficients of dielectric film with permittivity gradient computed by modified Runga-Kutta method, noting plasma diagnostics application

07 p1194 A69-19334

Symmetrical three layer A and B type sandwich reflectionless radomes design for multifrequency operation and insertion phase delay

07 p1110 A69-19522

Reflection and transmission scattering coefficients for step type transition between two uniform waveguides with surface impedance boundaries, discussing coupled differential equations

08 p1272 A69-20020

Reflection coefficient of double discontinuity consisting of two closely spaced inductive irises in rectangular waveguide

09 p1453 A69-21444

Oxidation influence on molybdenum disilicide coatings emissivity, determining degree of blackness over thermal stability range

09 p1522 A69-21588

Thermal conductivity, electrical resistivity and degree of blackness of refractory metals at high temperatures measured by Bode and Eger-Disselhorst methods

09 p1522 A69-21589

Tunnel diode amplifier operation in presence of noise

09 p1469 A69-22630

Diffusion pump oil reflectance and absorption coefficients measured in three thicknesses using light source, monochromator and detector

10 p1725 A69-23647

Reflection coefficient of electromagnetic wave reflected from thin ionization layer, using frequency dependence of amplitude to estimate ionospheric layer thickness

10 p1686 A69-23912

Silicon dioxide coated Al reflectance, solar absorptivity and total normal and hemispherical thermal emissivity, noting application to satellite temperature control

11 p1918 A69-24835

Transmission and reflection scattering coefficient measurements of microwave networks by Fourier analysis

of transient response to impulsive or steplike waveforms

12 p2038 A69-26056

Flexural wave reflection from corner joint between plates, establishing reflection coefficient dependence on wave frequency

12 p2182 A69-26656

Reflection coefficient of polarized radio waves at ionized meteoric trails obtained by numerical integration of differential equations

12 p2031 A69-26691

Characteristic impedance determination for transmission lines cascades terminated by resistor using recurrent relations, discussing reflection coefficient

13 p2221 A69-28074

F cosine i theorem validity for VLF radio wave absorption in ionosphere tested using exponential electron density models, noting Brewster angle influence on reflection coefficient

13 p2222 A69-28473

Microwave cavity bandwidth determined from reflection coefficient measurements, considering reflection magnitude and phase

13 p2223 A69-28606

Reflection and absorption coefficients analyzed for obliquely incident electromagnetic wave from magnetoactive plasma in constant parallel magnetic field

14 p2411 A69-28997

He-Ne laser traveling wave output power, obtaining end mirror reflection coefficient optimal value

14 p2458 A69-29165

Reflection of electromagnetic wave from magnetoactive plasma at inclined incidence, finding reflection and absorption coefficients

14 p2417 A69-29661

Secondary effects role in n-GaAs crystals electrical reflection spectra with low free carrier concentration at room temperature in external electric field

15 p2666 A69-30061

Bidirectional reflectance of solar radiation and IR temperature data from Nimbus 2 satellite to differentiate clouds above snow surfaces

15 p2596 A69-30455

Cotton leaves reflectivity and transmittance measurements, discussing substrate salinity effects on internal structure of hydroponically grown plants

15 p2558 A69-30456

Reflection of plane waves at boundary surface of two semiinfinite media in relative motion, calculating power reflection coefficients

15 p2568 A69-30796

Earth reflected radiation pressure and perturbing effect on satellites

15 p2599 A69-31324

Reradiation and multiple reflection effects on radiant flux density distribution in cylindrical receivers of solar power installations

16 p2741 A69-32799

Gas products evolved from selected thermal control coating materials during UV radiation in vacuum, noting permanent reflectance loss

[AIAA PAPER 69-640]

17 p2992 A69-33289

Electron energy effects on reflectance degradation and recovery of thermal control materials in vacuum, reporting test results for various protective coatings

[AIAA PAPER 69-643]

17 p3005 A69-33306

Reflection and transmission coefficient matrices for stratified magnetoionic medium determined by thin film optical technique and iteration procedure

17 p2927 A69-33863

Reflection coefficient of symmetric parallel plate waveguide operating in TEM mode illuminating lossless dielectric layer, using wedge diffraction and geometrical optics methods

18 p3108 A69-34802

Plane electromagnetic wave interaction with moving conductive dielectric medium to obtain reflection and transmission coefficients, noting energy transfer

18 p3105 A69-35486

Reflectivity and chemical composition of metallic phase minerals in stone meteorites, showing optical characteristics sensitivity to composition

19 p3415 A69-36124

Integrated reflection coefficient with unpolarized incident X radiation for mosaic and perfect LiF crystals, presenting coefficient as function of wavelength

20 p3582 A69-37137

Free electrons influence on reflection coefficient of semiconductor in IR spectra, showing selective modulation with change in carrier concentration

20 p3583 A69-37610

TEM mode reflection coefficient for symmetric parallel plate waveguide composed of adjacent conducting wedges composition and radiating into perfectly reflecting sheet

20 p3507 A69-37839

Angular dependence of ocean surface-cloudless atmosphere reflectance for solar radiation studied with digitized camera signals from ATS 1 satellite

21 p3704 A69-38372

Reflection indicatrices of rough surface subjected to heat radiation for stationary and variable incidence angle, noting spatial distribution

21 p3847 A69-38455

Absorption constant and reflectivity coefficient on semiconductor samples with nonideally prepared surfaces, calculating measurement errors

21 p3782 A69-39240

Surface reflectivity mapping of Venus by radar interferometry at 3.8 cm, noting low reflectivity circular regions

21 p3806 A69-39331

Lummer-Gehrcke plate type polarizer made of birefringent material for Nd glass laser, discussing reflection coefficients in quartz crystals

21 p3739 A69-39541

Wave trains of incident pulse diffraction in thin composite rod determined by transmission and reflection coefficients of plane waves at plane interfaces

21 p3845 A69-39677

Radio echoes diffraction patterns determination from reflection coefficients of polarized radio waves reflected from ionized meteor trails

23 p4214 A69-41846

Holographic interferometry for measuring small static displacements of diffusely reflecting surfaces

23 p4167 A69-42185

Solid cylindrical antenna current and admittance calculation, considering reflection coefficient and multiple reflection phenomena at antenna ends

23 p4142 A69-42336

Bidirectional reflectance of earth atmosphere and cloud formation above equatorial Pacific observed by synchronous satellite as function of angular dependence

24 p4346 A69-43154

GaAs laser diodes differential external quantum efficiency and gain per unit length dependence on laser reflectivity, taking into account optical losses

24 p4330 A69-43766

REFLECTED WAVES

Fading characteristics of radio waves reflected from two different heights in F region over Ahmedabad, India

03 p0385 A69-12915

Plane electromagnetic wave scattering from slightly rough surface tilted away from reference plane, noting polarization effects

03 p0395 A69-13625

Horizon focusing gain for radio waves reflected obliquely from ionosphere, noting effects of transmitter location and ionosphere geometry

03 p0395 A69-13627

Reflectivity of low Richardson number critical levels for internal gravity waves propagating in stably stratified fluids with shear, studying stability numerically

03 p0424 A69-13953

Reflection coefficient determination of bent multiwave waveguide, considering reflected wave due to secondary conversion of parasitic waves interacting with primary wave

04 p0576 A69-14773

Random walk theory for effective secondary radiation center produced by reflection from composite reflectors, investigating fluctuations of reflected radio waves

05 p0718 A69-15653

Zone behind reflected shock wave in shock tube using electron beam scattering, showing flow spectra and attenuation region of wave

05 p0752 A69-16688

Airborne polarimeter to measure Stokes parameters of linearly polarized visible atmospheric radiation in four narrow spectral regions

06 p0923 A69-16924

Plane electromagnetic wave reflection and transmission by semiinfinite moving compressible plasma fluid, noting interaction of transmitted H wave

08 p1360 A69-20097

Electromagnetic wave propagation direction in vacuum for reflection from semiinfinite plasma, noting effects of nonlinear transverse wave excitation

09 p1459 A69-22529

Photometric consequences of reflection effect in close binaries, tabulating light curves

10 p1776 A69-23218

Gaussian laser beam reflection and refraction at curved interface between media of different refractive indices, considering tilted ellipsoidal interfaces

10 p1725 A69-23309

Beam displacement at plasma under magnetic field connected with polarized electromagnetic wave reflections

10 p1740 A69-23724

Active scanning Fabry-Perot interferometer interaction with mode matched laser resonator, analyzing phase and intensity of reflected wave of active three mirror resonator

11 p1886 A69-25047

Electrical conductivity of air behind incident and reflected shock wave fronts as function of temperature and Mach numbers measured by electrode method

11 p1888 A69-25220

Spacecraft surfaces bidirectional reflectance flux distribution applications to space thermal control computations

[AIAA PAPER 68-26] 13 p2222 A69-28216

Spherical stress wave reflected from plane surface, discussing tensile stress in target

[AIAA PAPER 69-363] 13 p2366 A69-28295

Reservoir conditions of reflected shock wind tunnel by subjecting gas to direct shock and shock reflected at closed downstream end of shock tube

13 p2243 A69-28359

Elastic medium properties recovered from reflected or transmitted plane waves at normal incidence, obtaining computational procedures and analytical solution from Schroedinger equation

13 p2300 A69-28664

Ruby laser reflected and transmitted light intensity following radiation focusing on cuvette containing cyclohexane, noting dependence on incident pulse power

14 p2459 A69-29392

Cosmos 149 meteorological satellite telephotometers for measuring reflected solar radiation from earth

14 p2447 A69-29404

Solar UV radiation reflected from Echo satellites measured and compared with UV fluxes from Lyrae

14 p2447 A69-29408

Reflected and absorbed solar radiation by planetary atmosphere and surface determined as function of atmosphere and surface optical properties

15 p2689 A69-30564

Earth reflected solar radiation spatial, angular and spectral distributions measured by telephotometers on-board Cosmos 149

15 p2596 A69-30650

Ozonosphere inhomogeneities from UV spectra of reflected solar radiation, studying latitude dependence of seasonal behavior at different heights

15 p2597 A69-30654

Pressure, temperature, density and enthalpy of carbon dioxide behind primary and reflected shock waves determined by method suitable for computer

15 p2592 A69-31054

Temperature and electron number density behind reflected shock in helium gas in T tube, noting Z pinch discharges

15 p2593 A69-31161

Conditions behind incident and reflected shock waves in shock tube calculated from initial pressure, density, temperature and shock speed

15 p2593 A69-31487

Electron concentration and mass density behind reflected shock in ionizing argon, using time resolved two wavelength interferometry

16 p2771 A69-31918

Light polarization diffusely reflected by earth atmosphere measured from balloon, using gain compensated photoelectric polarimeter

16 p2781 A69-32320

Polarization characteristics of electromagnetic waves obliquely reflected from inhomogeneous isotropic plane stratified plasma

16 p2752 A69-32391

Random walk theory for effective secondary radiation center produced by reflection from composite reflectors, investigating fluctuations of reflected radio waves

16 p2754 A69-32510

Plane shock wave interaction with plane rigid net-like wall, obtaining Mach numbers for reflected and penetrating shock waves

17 p2957 A69-33719

Reflected shock and boundary layer interaction in shock tube, discussing bifurcation effect on flow and turbulence transition

18 p3116 A69-34448

Reflected shock front interaction with heated thin gaseous filament studied in shock tube by spark interferometric and schlieren technique

18 p3228 A69-34468

Shock tunnel steady flow starting process in two dimensional reflection nozzle, using multiple shadowgraphs and interferograms, noting nozzle geometry influences

18 p3085 A69-34471

Rereflected shock waves behind tapered shock tube section indicated by shock wave detectors, microwave absorption and optical emission measurements

18 p3085 A69-34474

Shock waves attenuation through multiple reflections at ends and interactions with expansion wave in shock tube by pressure transducer, noting exponential decay

18 p3121 A69-34475

Reflected signals detection with limited frequency spectrum and minimum velocity resolution considered, analyzing signal properties

18 p3104 A69-35265

Axial stagnation point flow in shock wave reflected from sphere or circular cylinder, determining velocity time variation, enthalpy pressure and reflection

19 p3298 A69-36385

Spectral density of outgoing radiation in 0.6-0.8 micron frequency range, noting reflected radiation and cloud fields correlation functions

19 p3366 A69-36672

Phase amplitude recording of radio waves reflected from D and F regions of ionosphere, reversing smoothing process by Fourier methods

21 p3672 A69-38558

Radar reflection techniques for planetary surface studies, considering surface properties effects on reflectivity and reflected wave characteristics, instrumentation and data for moon and planets

21 p3811 A69-39509

Test model thermal balance in space simulator, measuring effects of solar simulator irradiance reflected from carbon dioxide cryopanel deposits

[AIAA PAPER 69-1012] 22 p3922 A69-40385

Human eye modulation transfer function in reflected light by analyzing depolarized and polarized components emerging from eye

22 p3884 A69-40888

Electron collisions effect on polarization of waves reflected from ionosphere

22 p3941 A69-40922

Radio echoes diffraction patterns determination from reflection coefficients of polarized radio waves reflected from ionized meteor trails

23 p4214 A69-41846

Pressure measurement modifications of quasi-steady flow model for interaction between reflected shock wave and laminar boundary layer in shock tube

23 p4152 A69-41903

Dielectric materials permittivity determined by measuring amplitude ratios of reflected and transmitted plane electromagnetic waves

23 p4123 A69-41950

Lunar photometric function near zero phase from Apollo 8 closeup photography, noting higher reflected brightness than at 1.5 degree phase angle

23 p4220 A69-42380

Fully dispersed wave reflection from plane wall in stable relaxing gas, obtaining canonical equation of state

24 p4299 A69-42717

Flaw determinations accuracy from measuring ultrasonic shear wave reflection peak intensities

24 p4397 A69-42756

REFLECTING TELESCOPES

Reflecting telescope objective for far UV and X ray regions, discussing microfinishing and optical and mechanical tolerances

01 p0121 A69-10896

Single and double mirror systems geometrical optical image aberrations noting focal number, angle of field, secondary magnification and mutual position tolerances

11 p1918 A69-24836

Schmidt all-reflecting telescope for UV imaging in Apollo Earth Orbital Scientific Experiment

11 p1887 A69-25101

Segmented active mirror optics design concept for lightweight optically stable primary reflector used in large orbiting astronomical telescopes

13 p2261 A69-27950

Nova Delphini 1967 observational data and equipment including Cassegrain spectrograph, reflector telescope and photoelectric photometer

15 p2682 A69-30439

Vienna 60 inch telescope concept and design, discussing optical systems possible combinations under local conditions

24 p4314 A69-43000

REFLECTION

NT INFRARED REFLECTION

NT RETROREFLECTION

NT SIGNAL REFLECTION

NT SPECTRAL REFLECTION

NT ULTRAVIOLET REFLECTION

NT WAVE REFLECTION

Three dimensional photoelastic analysis based on optical theory of multilayer reflection technique

04 p0683 A69-15496

Raman spectra of optical phonons in semiconductors, using reflection techniques and Ar laser excitation

06 p0936 A69-17882

Boundary conditions for reflection and transmission properties of absorbing shell of arbitrary shape

08 p1273 A69-20025

Electro-optical Q switched lasers with prismatic reflectors and phase shifter studied using Johns matrices for polarizer, Kerr cell and Porro prism elements

14 p2459 A69-29390

Time dependent radiation diffusion in inhomogeneous stationary medium applied to diffuse reflection of light

16 p2813 A69-32591

Optical constants changes in germanium determined by modulation method of measuring light reflected at different angles

18 p3173 A69-35014

Electroreflection study of inversion asymmetry and warping induced interband magneto-optical transitions in InSb, employing low temperature electric field modulation technique

19 p3386 A69-36521

Maxwell coefficient change of Cd atoms /in molecular beam/ diffusely reflected from metal surfaces related to reflector temperature, material and fabrication method

20 p3580 A69-37814

REFLECTION COEFFICIENT

U REFLECTANCE

REFLECTIVITY

U REFLECTANCE

REFLECTOMETERS

NT MICROWAVE REFLECTOMETERS

High temperature directional reflectance measurements of ablative materials as function of sample temperature using paraboloid reflectometer

[AIAA PAPER 68-25] 04 p0604 A69-15512

High resolution swept frequency reflectometer suitable for impedance matching in waveguides or coaxial lines

16 p2759 A69-31940

Portable integrating sphere reflectometer, describing optical system, construction, etc

[AIAA PAPER 69-599] 17 p2973 A69-33264

ATS 3 satellite reflectometer experiment carrying test samples to measure specular reflectance, noting silica shield effects

[AIAA PAPER 69-644] 17 p3071 A69-33270

REFLECTOR SATELLITES

U PASSIVE SATELLITES

REFLECTORS

NT PARABOLIC REFLECTORS

NT PARABOLOID MIRRORS

NT RADAR CORNER REFLECTORS

NT RADAR REFLECTORS

NT SOLAR REFLECTORS

Radiation pattern shaping from circular aperture antenna with constant illumination amplitude

[UN PAPER 68-95756] 01 p0029 A69-10524

Beryllium reflector distortion in Plum Brook Reactor due to neutron embrittlement and gas formation, noting material surveillance, replacement, etc

03 p0465 A69-13131

Directional properties of electric vibrator positioned at reflecting circular cylinder, discussing radiation patterns and cylindrical wave diffraction

04 p0574 A69-14459

Input admittance of confocal Fabry-Perot resonator, with waveguide coupled infinitely long conic-section cylindrical reflectors, taking into account diffraction and resistive losses

05 p0731 A69-16295

Directional mirror antenna parameters measurement by finite focusing of radiating element

06 p0895 A69-17453

Sectoral hoghorn as line feed for correcting spherical aberration in offset spherical reflector antennas

06 p0898 A69-17823

Geometric optics and polarization properties of spherical reflector for integral representation of focal region fields, discussing stationary phase and field points
08 p1272 A69-20017

Coupling between array antennas shown to reduce reflecting properties of Van Atta reflector consisting of linear half wave dipoles
08 p1282 A69-20037

Directional properties of electric vibrator positioned at reflecting circular cylinder, discussing radiation patterns and cylindrical wave diffraction
14 p2418 A69-28830

Reflector radio telescope of Pulkovo astronomical observatory noting high resolution
15 p2679 A69-30102

Double aperture problem with partially coherent incident field, noting application to microwave antenna-reflector combination
17 p2929 A69-33877

Apollo 11 moon reflector-laser beam experiment, discussing range changes produced by axial rotation and orbital motion and use for earth-moon dynamics
19 p3339 A69-36766

Directional mirror antenna parameters measurement by finite focusing of radiating element
20 p3508 A69-37938

Surface accuracy of large diameter radio telescopes maintained by uncoupling reflector surface from backup structure, using active compensation
23 p4149 A69-42136

REFLEXES

NT CAROTID SINUS REFLEX
NT RESPIRATORY REFLEXES

Increasing hypoxia effects on rabbit EEG and light flash conditioned alimentary reflex for simulated altitude ascent, noting subcortical stimulation
02 p0197 A69-11492

Prolonged bed rest effect on human myogenic tone and proprioceptive reflexes, comparing test subjects with and without physical exercises
10 p1646 A69-23583

Phase and tonic activity of oculomotor apparatus of rabbits during vestibular reflexes and postrotational nystagmus
20 p3469 A69-37243

Orientation reflexes of animals in weightlessness, analyzing turnover, vestibular and cervix reactions using motion pictures
20 p3470 A69-37248

Reflex activity of single preganglionic sympathetic fibers during coronary occlusion in cats, discussing left third thoracic/T3/ ramus communicans
23 p4084 A69-41460

Human arterial pressure reflex regulation during sleep, assessing baroreflex sensitivity
24 p4257 A69-42626

REFRACTED WAVES

Electromagnetic wave refraction angles in earth atmosphere, noting effect of stratified discontinuities on angle magnitude
06 p0887 A69-17450

Conical refraction of magnetosonic waves occurring when Alfvén waves propagate at speed of sound in conducting fluid in presence of constant uniform magnetic field
10 p1727 A69-23091

Gaussian laser beam reflection and refraction at curved interface between media of different refractive indices, considering tilted ellipsoidal interfaces
10 p1725 A69-23309

Nonlinear analog of conical refraction in biaxial crystals, considering birefringence in piezoelectric uniaxial crystals and laser beam propagation
19 p3330 A69-35604

Electromagnetic wave refraction angles in earth atmosphere, noting effect of stratified discontinuities on angle magnitude
20 p3496 A69-37935

REFRACTING TELESCOPES

Solar telescope in Berlin observatory for prominences and other solar phenomena observations by public
15 p2611 A69-30881

Objective lens of AVR-2 reflector at Poltava Observatory measured for spherical aberration, astigmatism, field curvature, coma and distortion
17 p2970 A69-32883

REFRACTION

NT ATMOSPHERIC REFRACTION
NT BIREFRINGENCE
NT RADIO WAVE REFRACTION

High temperature high density theta-pinch plasma refraction measurements by interference refractometer with beam perpendicular to plasma axis
09 p1544 A69-21302

Refraction angles for objects between 5-300 km and zenith distances between 1-88 degrees, describing calculation method for corrections
09 p1490 A69-21918

Quasi-transverse /Q-T/ point time lag on Faraday rotation records at widely spaced frequencies during satellite pass explained by refraction theory
18 p3100 A69-34251

Figure of earth and refraction - Conference, Vienna, March 1967
18 p3131 A69-35194

Skiagrams results of retinoscopic measurements of eye peripheral refraction of pilots, attempting correlation between skiagram type and central refraction
24 p4267 A69-43399

REFRACTIVE INDEX

U REFRACTIVITY

REFRACTIVITY

Isopentane and mesitylene index of refraction variations with pressure, determining average molecular radii and polarizabilities
01 p0123 A69-10685

IR reflection and transmission properties of various semiconductor compounds, rubidium halides, strontium titanate, BN and Te
01 p0139 A69-10840

Finsler geometric apparatus applied to electromagnetic wave propagation in media having refractive index varying with position and time, calculating errors
01 p0031 A69-10879

Radar reflectivity and refractive index spectra in clear atmosphere simultaneously measured and compared with theoretical calculations
01 p0032 A69-10969

Solar limb image vibrations caused by turbulent pulsations in refractive index of lowest atmospheric layers
01 p0156 A69-11183

Gaseous and liquid H refractive index variations with pressure and density below room temperature, noting Lorentz-Lorenz function variations
02 p0281 A69-12180

Refractivity distribution at ground level and at one km over India, correlating surface refractivity with difference, noting seasonal and diurnal variations
03 p0393 A69-13304

Refractive index and expansion thermal coefficients along axis of oriented Nd-YAG laser rod
04 p0160 A69-14293

Atmospheric refractive index for IR radiation in one to six micron region
04 p0591 A69-14300

Optical waveguide with optimum refractive index distribution for equalizing group velocities of different modes and minimizing waveform distortion
04 p0575 A69-14749

Refractive index temperature dependence of cadmium sulfide single crystals grown from gas phase
04 p0644 A69-15268

Plasma refractive index determination by holographic interferometry with double pulse ruby laser
05 p0761 A69-15620

Thermal self focusing of argon laser beam passing through lead glass
05 p0771 A69-15819

Fresnel drag produced by relativistic addition of electron velocities in semiconductors measured by changes in refractive index
05 p0807 A69-16026

Thermal self defocusing effect of laser beam in self focusing liquids, measuring refractivity changes by high speed double exposure holography [IEEE PAPER J-7]
05 p0775 A69-16320

Radiation of laser active element with random inhomogeneities of refractive index, discussing beam divergence, operation modes and Q switched operation
05 p0777 A69-16550

Spectrum and amplitude fluctuations of laser light propagating through liquid helium, obtaining spatial correlation function of refractive index fluctuations
06 p0957 A69-17267

Laser beam absorption induced index changes associated with thermal blooming observed in iodine doped carbon tetrachloride, using Mach-Zehnder interferometer
07 p1149 A69-18899

Real and imaginary parts of homogeneous isotropic electron plasma complex refractive index, noting application to plane electromagnetic wave propagation
07 p1193 A69-19183

Quantum mechanical, dipole approximation, non-resonance light scattering cross sections expressed in terms of oscillator strengths and refractive indices
07 p1183 A69-196451

Optical parameters for system of isotropic nonabsorbing film on isotropic absorbing substrate determined by ellipsometric method, noting Si optical constants
07 p1201 A69-19647

Laser beams self focusing interpreted as photon contraction due to equivalent gravitational attraction with gravitational constant proportional to nonlinear refractive index
08 p1324 A69-2008

Electromagnetic wave reflection from subrefractive layers in inhomogeneous region
09 p1454 A69-21679

Light waves refractive index distribution from balloon sounding data found to decrease with height in winter regardless of time of day
09 p1536 A69-21917

Gaussian laser beam reflection and refraction at curved interface between media of different refractive indices, considering tilted ellipsoidal interfaces
10 p1725 A69-23309

Nonlinear susceptibility tensor components and refractive index variations of liquids and glasses in high intensity ruby laser field, using interference methods
10 p1703 A69-23622

Scalar wave diffraction at body in scattering medium analyzed on basis of determinate medium with complex inhomogeneous effective refractive index
10 p1658 A69-23957

Single and clad glass fibers radii and refractive indices measurements on basis of laser light scattering
11 p1918 A69-25044

Focusing factor in stratified medium with refractive index depending exponentially on height
12 p2029 A69-26100

Atmospheric turbulence degradation of holographs resolution improved by geometrical optics and series-expansion methods, noting role of Gaussian and exponential refractive index structure
12 p2090 A69-26250

Finsler geometric apparatus applied to electromagnetic wave propagation in media having refractive index varying with position and time, calculating errors
12 p2031 A69-26642

Refractive index and attenuation factor of ionosphere
12 p2070 A69-26689

Statistical distributions of refractive index parameters in tropospheric radio propagation from psychrometer soundings, discussing lapse rate
13 p2254 A69-28428

Optical refraction effects from refractive index gradients in stressed models as limitation on moiré interferometry usefulness in Boussinesq problem and expanding pulse studies
14 p2531 A69-28883

Focused beam wave applied to atmospheric turbulence probing for spectral density of index of refraction, structure constant and wind velocity
14 p2414 A69-29512

Light intensity during coherent scattering based on complex refraction index of medium, noting scattering by clouds and diffraction by semitransparent hole
15 p2635 A69-31108

Spontaneous and stimulated aspects of light scattering by absorbing media, relating refraction index to temperature variations and external stresses
16 p2798 A69-32449

Electron density measurement method in plasma or vacuum based on refraction index in optical frequency range using laser interferometer mismatch as criterion
16 p2798 A69-32583

Air refractivity variations across horizontal and vertical boundary planes between two air masses of slightly different temperatures
17 p3028 A69-32880

Complex index of refraction of naturally occurring rock and mineral as function of wavelength of incident radiation
17 p2973 A69-33093

Atmospheric stability influence on vertical spectra of refractive index and air velocity deduced from beam swinging experiments and compared with radiosonde data
17 p2960 A69-33157

Thin surface films effect on radiative properties of metal surfaces determined by thin film optics, noting dependence on refractive index [AIAA PAPER 69-623]
17 p3072 A69-33283

Schlieren method for visualization of refractive index changes in transparent materials, discussing application to study of elastic wave fields

17 p2973 A69-33322

Continuity conditions for drifting magnetoplasmas without ionic effects, discussing eigenvalue equation of refractive index and electromagnetic modes propagation

17 p2926 A69-33851

Complex refractive index profiles and wave polarizations calculated for electromagnetic waves transmission through ionosphere at micropulsation frequencies

17 p2927 A69-33864

Plane anisotropic dielectric p-n junction layer waveguide properties, deriving characteristic equations for refraction indices

17 p2983 A69-33971

Refractive indices for various glasses obtained as function of wavelengths and temperature, using spectrometer as collimator

17 p3007 A69-34158

Thermal coefficient of optical glasses refractive index determined by interferometry, noting relation to glass chemical composition

18 p3172 A69-35013

Optical distance measurement using laser and atmospheric dispersion method through average refractive index determination over path

18 p3152 A69-35198

Monochromatic undulating light vertical refraction path curvature radii calculation based on refractive index

18 p3174 A69-35201

Focused Gaussian laser beam expansion due to thermal changes in refractive index of air, noting focused spot area increase with pulse energy

19 p3330 A69-35601

Refractive index profiles yielding wave functions expressed in terms of standard transcendental functions for electric fields in spherically stratified isotropic media

19 p3372 A69-35618

Ionospheric scintillation power spectrum measurements from radio star and satellites related to F region radio refractive index fluctuations

20 p3534 A69-38093

Satellite onboard transmission measurements determining atmospheric water vapor influence on integrated refractivity at specific absorption line resonant frequency

20 p3545 A69-38097

Model compounds and polymers solubility parameters correlated with refractive index data

21 p3751 A69-38552

Interferometric study of cool flame propagation in equimolar propane-oxygen mixtures, observing refractive index and temperature distribution changes

21 p3852 A69-39595

Normalized phase function and scattering coefficient of aerosols prediction from measurements of particle size distribution, density and refractivity based on Mie solution

21 p3719 A69-39774

Electromagnetic wave propagation in semiconductor plate under constant electric field, studying nonstandard carrier energy dispersion law effects on refractive index

22 p3994 A69-40751

Corneal stroma collagen fibrils and ground substance refractive indices, discussing corneal transparency and clouding

22 p3884 A69-40886

Longitudinal modes locking and ultrashort light pulse generation in laser cavity resonator with nonlinear refractive index

23 p4171 A69-41389

Multiple index high contrast holographic contouring technique compared with analogous multiple frequency system

23 p4164 A69-41628

Transmission properties and directional coupler determined for optical circuit dielectric rectangular waveguide with surrounding dielectrics of smaller refractivity

24 p4287 A69-43328

Index of refraction turbulent fluctuations effect on beam traversing optically active medium, discussing far field diffraction pattern and incoherent scattering [AIAA PAPER 68-683]

24 p4304 A69-43578

Thermal turbulence effects on phase fluctuations of laser beams, studying temporal decay of mean square refractive index fluctuation with fringe pattern displacements

24 p4329 A69-43754

REFRACTOMETERS

Optimum emission wavelengths in atmospheric refractive index determination in optical range finder/refractometer system, noting laser applicability

13 p2260 A69-27826

Preparation of refractory alloys in powders, fibers and sintered billets by thermochemical method [ONERA-TP-636]

02 p0251 A69-11625

Liquid oxides wetting and spreading capabilities on refractory metal surfaces, noting chemical reaction oxide reducing effect

02 p0265 A69-11884

Soviet book on high temperature materials covering metal and liquid oxides, electrical conductivity, chemical properties, etc

03 p0445 A69-13567

Thermodynamic and kinetic interactions of high melting point metal oxides reduction by carbon

03 p0445 A69-13568

Electrical resistivity of sintered high melting point metal oxides, noting width of semiconductor forbidden band

03 p0445 A69-13570

Thermodynamic evaluation of interaction between solid metals and dispersed high melting point oxides, stressing isobaric potentials

03 p0446 A69-13571

Thermodynamic analysis of refractory compounds vapor transport conditions, illustrating integral free energy diagrams

03 p0453 A69-13619

Shear strengths of polyimide and polybenzimidazole resin/fiberglass reinforced honeycomb materials compared to previous high temperature materials, noting lightweight sandwich aircraft structures

04 p0620 A69-14844

Braze bonds of refractory electrical contacts using induction heating

04 p0607 A69-15218

High temperature capacitor consisting of thin wafers of pyrolytic boron nitride noting fabrication, dissipation factor and capacitance

04 p0551 A69-15299

Material requirements for uncooled nozzles of solid propellant rocket motors burning aluminized propellants, discussing successful testing of pyrolytic graphite

06 p0946 A69-17530

High temperature polyimide laminates for radomes and other supersonic aircraft components, discussing inflexural strength, dielectric constant and dissipation factor

07 p1171 A69-19545

Elevated temperature mechanical properties data for commercially produced super-strength alloys supplemented by product description tables

08 p1328 A69-19913

Apparatus for depositing protective coatings on graphite by vacuum method in refractory metal carbonyl and halides mixtures and in molten metals

09 p1528 A69-21850

Dynamic modulus of elasticity measured for nonporous refractory compounds obtained by diffusion saturation

09 p1529 A69-21871

Refractory compounds static strength temperature dependence at high temperatures measured in reference to melting temperature

09 p1523 A69-21873

Soviet collection of articles on physicochemical studies of heat resistant alloys

09 p1524 A69-22135

Electron microscopy for continuous observation and recording of dynamic reactions in high temperature materials

09 p1499 A69-22304

Coated refractory tantalum alloy as ductile, weldable material for application on hypersonic aircraft or reusable reentry vehicles at high temperatures

09 p1526 A69-22326

Laser evaporation vapors from refractory materials to produce surface temperature for carrying out reactions in gaseous phase and thin film preparation

09 p1519 A69-22476

Refractory ceramic materials use for advanced combustion chamber design, stressing brittleness effect and current fabrication techniques

09 p1531 A69-22624

Integral normal emissivity of electrically conducting materials heated to high temperatures by HF field of inductor, discussing measurement procedure and equipment

11 p1888 A69-25230

Thermochemically synthesized high melting micropowders grinding by vibrational method and classification for polishing and finishing applications

12 p2113 A69-26256

Thermal stability of refractory and cermet materials, analyzing small samples subjected to cyclic high energy radiative heating and air-water cooling

12 p2118 A69-26262

Molten high melting compounds obtained by arc furnace with consumable electrode and adjustable protecting atmosphere

12 p2055 A69-26264

Refractory cone models made of copper and Co coated Be for force tests in high enthalpy hypersonic arc tunnels at high simulated altitudes

12 p2059 A69-26796

Graphite improvement for high temperature applications by computerized properties analysis, failure criterion and improved testing for defective billets

12 p2115 A69-26845

Chemical corrosion of zirconia-based refractories in MHD generators, considering thermal cycling and shock, seed migration and prevention

13 p2284 A69-27469

Electrical, thermal and thermoelectronic properties of refractory oxide materials including lanthanum chromite and strontium zirconate, discussing Hall effect, IR absorption, mixtures, etc

13 p2316 A69-27470

Oxide and carbide high-melting-point materials for MHD generator electrode walls

13 p2284 A69-27471

Refractory ceramic materials thermal stability in high temperature subsonic ionized gas flow products, emphasizing zirconia and magnesia

13 p2285 A69-27472

Ceramic and cermet materials insulating, physical and mechanical properties for use in thermionic converters

14 p2467 A69-29214

High temperature compatibility of Mo, W, Nb and Ta as canning materials with high melting point and formation energy filling materials

14 p2463 A69-29219

Heterocyclic-aromatic organic polymer adhesives used for high temperature structural purposes, discussing processing, testing, formulating and impact on basic research

14 p2469 A69-29346

Pyrolyzed refractory laminates for high temperature applications, analyzing mechanical and thermal properties

15 p2618 A69-30313

Vaporization rates of Ti, Zr, Hf, Nb and Ta carbides at high temperatures measured by Langmuir method

15 p2640 A69-30983

Refractory materials based on BN and silicon nitride, studying effect of sintering conditions and chemical composition on mechanical properties

15 p2643 A69-31244

Mechanical testing of high temperature materials subjected to thermal cycling by high power pulsed laser beam

15 p2636 A69-31512

Biaxial stress strain properties of graphite base refractory composites noting fracture strength predictions [AIAA PAPER 68-337]

16 p2803 A69-32150

Particles maximum diameter numerical values for melting during injection into plasma jet calculated for various metals and refractory dielectrics

17 p3009 A69-32825

Thermal EMF, electrical conductivity and Peltier effect in sintered refractory oxides at high temperature in air and in Ar

17 p3068 A69-32990

Cellular carbon castings fabrication by carbonization of polyurethane polyfurfuryl alcohol foam for high temperature applications, noting properties

17 p2992 A69-33373

Reliable structural joints and attachments design for components fabricated from nonmetallic refractory brittle materials, discussing departures from conventional practices

17 p3061 A69-33569

Liquid oxides wetting and spreading capabilities on refractory metal surfaces, noting chemical reaction oxide reducing effect

18 p3156 A69-35044

Emissivity of high melting point compounds measured, considering electronic structure and atomic weight

18 p3158 A69-35260

Polycrystalline diborides fabrication technology, discussing additives, thermal, physical and mechanical properties, specific applications, etc

19 p3355 A69-35526

Polyimides and polybenzimidazoles mechanical strength, heat resistance, electrical properties, radiation resistance and industrial applications

19 p3358 A69-35901

High temperature materials for aerospace and spacecraft applications, considering carbon/carbon composites, oxides, carbides, fibers and ablative systems

19 p3346 A69-36320

Facility for evaluating thermal stability of heat resistant materials and cermets in constant temperature gas flow

20 p3565 A69-36979

Book on high temperature materials covering creep phenomena, design considerations, load and temperature effects, various steels, superalloys, refractory metals, etc

20 p3559 A69-37148

Coating deposition theory on high temperature materials, discussing interfacial energy and wetting properties of molten metal drop on solid base material surface

20 p3560 A69-37358

Protective coatings of oxygen-free high melting point Si compounds and silicate binder, noting chemical stability in corrosive media

20 p3566 A69-37371

Dynamic electron beam devices for refractory materials evaporation, discussing electron guns and vaporization film data

[ASM PAPER D8-2.2]

20 p3551 A69-38131

Refractory materials thermal conductivity high temperature measurement technique, discussing sample geometry, furnace design, temperature modulation and computerized simulation

21 p3742 A69-38422

Aerodynamic skin heating at high Mach numbers affecting structural design, noting use of high temperature materials, insulation systems and shell construction method

21 p3646 A69-38460

Enthalpy and heat capacity of high melting point homogeneous Ti, Zr and Nb carbides, analyzing influence of Me-Me bonds and carbon sublattice defects

21 p3742 A69-38614

Destructive interaction of refractory carbides and graphite compositions with chemically active high temperature gas streams

21 p3751 A69-38640

External friction of refractory materials at high temperature in vacuum, discussing testing machine and methods including metallographic, X ray, spectral and electron diffraction analyses

21 p3690 A69-39154

Thermal conductivity precision tests for refractory materials using ASTM method C 201-47, emphasizing sample preparation and calorimeter calibration

22 p3956 A69-40671

Cathode materials role in high temperature zirconia electrolyte fuel cell performance, discussing metals, collector-embedded and electronically conducting oxides properties

22 p3869 A69-40734

Mechanical properties of aircraft fasteners high temperature materials

22 p3956 A69-40823

V contents influence on high temperature strength and fine structure interrelation in low alloy CrMoWV steels

22 p3972 A69-41083

Heat resistant materials integral and spectral radiative properties in IR and visible regions determined by calorimetry and IR spectrometer

23 p4237 A69-41329

Spectral emissivity and radiation intensity spectral distribution measurements for heat-resistant materials at high temperature, using photographic method

23 p4238 A69-41330

Radiative properties of Ta, Mo, Nb, graphite and niobium carbide at high temperatures

23 p4175 A69-41331

REFRACTORY METAL ALLOYS

NT MOLYBDENUM ALLOYS

NT NIOBIUM ALLOYS

NT RHENIUM ALLOYS

NT TANTALUM ALLOYS

NT TUNGSTEN ALLOYS

Cobalt base alloy for construction in high temperature corrosive environment, discussing mechanical properties, oxidation and corrosion resistance and phase stability

01 p0095 A69-10546

Chemical vapor deposition of refractory metals, alloys and compounds - Conference, Gatlinburg, Tennessee, September 1967

01 p0096 A69-10640

Structural stability of manganese austenitic steels at high temperatures, discussing phase transformations and carbide precipitation changes

01 p0100 A69-11294

Isothermal sections of Zr corner of Zr-Mo-Ta system phase diagram at high temperatures, noting composition vs hardness and omega phase

02 p0264 A69-11858

Isothermal sections of Zr corner of Zr-Mo-Ti phase diagram at high temperatures, noting corrosion resistance in air and water

02 p0264 A69-11859

Isothermal sections of Zr-Ni-Nb system phase diagram at high temperatures, determining principal type of projection on concentration triangle

02 p0264 A69-11860

Isothermal sections of Zr corner of Zr-Nb-Cr system phase diagram at high temperatures, noting variation of stability with concentration

02 p0264 A69-11861

Electrochemical grinding application to metal cutting of refractory alloys in aircraft jet engine overhaul

[SAE PAPER 680662]

03 p0433 A69-13453

Alloying elements effect on mechanical and refractory properties and structure of forging of age hardenable Ni base alloys

03 p0452 A69-14122

Bainite beta to alpha transformation in titanium-oxygen system, using high temperature metallography techniques

04 p0613 A69-14559

Preparation and properties of NbC-WC and TaC-WC carbides, analyzing hardness, resistivity, thermal expansion and dihedral angle

05 p0782 A69-16796

Lanthanum and hafnium effect on transition and recrystallization temperatures of tungsten and tungsten base alloys

05 p0782 A69-16797

Tantalum diffusion layer on refractory cobalt and nickel base alloys analyzed by electron microprobe

[ONERA-TP-665]

06 p0941 A69-17097

Refractory metal alloys metallurgy and technology - Conference, Washington, D.C., April 1968

07 p1164 A69-18790

Rhenium effect on lattice solid solubility of oxygen in tungsten, calculating rhenium-oxygen cluster minimum binding free energy

08 p1329 A69-20007

Refractory alloys electrodes used for surface coating Ti alloys by electric spark method, studying microhardness and wear resistance

10 p1711 A69-23339

High temperature metallic material strengthening methods, noting metallurgical factors and temperature effects on mechanical properties

10 p1712 A69-23630

Dispersion-strengthened alloys from extraction replicas, determining volume fraction and spacing of dispersed phase particles

13 p2282 A69-28167

Co base high temperature binary alloys microstructure, investigating diffusion coefficients, stacking faults, vacancies, etc

14 p2465 A69-29890

Thermionic emission parameters for faces of W- Re, Mo-Re and Ta-Mo single crystals determined by Richardson method of straight lines

17 p3015 A69-33630

Facility for studying energy dissipation in refractory materials during fatigue tests in vacuum at various temperatures, describing principal components

17 p2947 A69-33926

Deformation studies of high melting point metals and alloys at high temperatures in vacuum, noting crack formation resistance and annealing time variations

18 p3155 A69-34651

Stress rupture parameters for refractory metals and alloys from Larson-Miller, Dorn and Manson-Haferd constants, noting optimization procedure

[ASM PAPER D8-3.4]

20 p3564 A69-38135

Creep resistance increase of Ni refractory alloy by thermovibrational treatment under stress relaxation conditions

21 p3744 A69-38869

Stress concentration and surface strain hardening effects on fatigue strength of refractory alloy specimens with and without cut

21 p3745 A69-38875

Torsional moments and forces during Ti alloy and refractory alloy milling with cylindrical cutter

21 p3731 A69-38877

Weldability of alloy Ni-Cr-Fe base-filler alloy combinations, noting threaded mold test and surface fissures

22 p3968 A69-39886

Refractory metals in rocket propulsion devices, applying tungsten in uncooled rocket nozzles and tungsten and rhenium to electrothermal propulsion

23 p4177 A69-42161

NASA programs for development of high temperature alloys for advanced air breathing engines emphasizing cast Ni-base alloy

[ICAS PAPER 68-26]

24 p4335 A69-43718

Chemical vapor deposition of refractory metals, alloys and compounds - Conference, Gatlinburg, Tennessee, September 1967

01 p0096 A69-10640

Refractory metals interactions with gases in vacuum and inert gas environment, noting temperature and pressure effects on reactions, extent and kinetics

01 p0099 A69-11042

Ti for high temperature use in supersonic aircraft, noting compressibility limit on maneuvering load factor and cooling by H

02 p0192 A69-11891

Cold drawing workability of Nb, Mo and Ta using dies with lubrication for metal sheets

03 p0452 A69-14124

Lithium metal spray structural cooling system for refractory materials

[AIAA PAPER 68-358]

04 p0688 A69-15509

Parameters and relative errors tabulated from IR spectral emittance of Mo, Nb, Zr and Ta near 1400 K

05 p0846 A69-15903

Refractory metal silicon device technology noting high temperature diffusion masking properties for possible use in MOSFET technology

06 p0930 A69-17152

Dislocation redistribution during annealing and shock deformation in liquid nitrogen of chromium, molybdenum and tungsten single crystals

07 p1159 A69-18534

Less common refractory metals /rhenium, technetium, hafnium, noble metals/ properties, phase equilibria, etc

07 p1165 A69-18793

Development of materials in aerospace structures and propulsion systems, discussing superelastic alloys, graphite fibers, composites, refractory metals and processing techniques

08 p1332 A69-20306

Thermal conductivity, electrical resistivity and degree of blackness of refractory metals at high temperatures measured by Bode and Eger- Disselhorst methods

09 p1522 A69-21589

Carbides and silicides temperature coefficient of electrical resistivity and Hall constant plotted as function of metal carbides solid solutions concentration

09 p1523 A69-21740

Heat resistant materials based on high melting point metals, summarizing achievements of chemical technology and vacuum metallurgy

09 p1524 A69-22137

Temperature dependence of high melting point metals mechanical properties

09 p1525 A69-22138

Structure and properties of high heat resistant alloys based on high melting point metals with bcc lattice explained by electron theory

09 p1525 A69-22139

Refractory metal oxidation protection by inorganic compounds at high temperatures, discussing protective mechanisms

09 p1526 A69-22322

Refractory metal, precious metal and ceramic material compatibility tested by metallography and by microprobing for protective coatings possibilities

09 p1477 A69-22325

Chemical composition of chromium steels for optimum heat resistance properties, noting effects of nickel, nitrogen and ferrite and austenite-forming elements

10 p1708 A69-23000

Nitrogen solubility in molten niobium and molybdenum at high temperatures in argon flow

10 p1710 A69-23213

High temperature metallic material strengthening methods, noting metallurgical factors and temperature effects on mechanical properties

10 p1712 A69-23630

Liquid sodium corrosive action on vanadium, niobium, titanium and zirconium involving oxygen exchange from liquid to solid metal phase and energy of formation

10 p1713 A69-23821

Refractory metals testing at high temperatures in vacuum, discussing equipment modifications, temperature measurement and residual gas problems

10 p1714 A69-23848

Dissolved gases and carbon effect on transition temperature from plastic to brittle state of high melting metals including niobium and vanadium

10 p1715 A69-24011

Fractures in refractory metals surface layers due to Q switched laser pulses

11 p1899 A69-25402

Crack initiation prediction in high temperature components subjected to arbitrary thermal-mechanical cycling

13 p2365 A69-28252

High temperature compatibility of Mo, W, Nb and Ta as canning materials with high melting point and formation energy filling materials

14 p2463 A69-29219

Micrographic reagent coloring grains of Mo in relation to crystalline orientation applied to refractory metal welding and diffusion studies

14 p2505 A69-29221

Work function measurements of polycrystalline W, Re and Ni disks in high pressure cesium plasma for low probe temperature range

14 p2506 A69-29266

Sessile drops contact angles of alkali liquid metals on Re, W, Mo, Ta and Nb substrates related to substrate surface bare work function

14 p2506 A69-29270

Carbidothemic process for high melting metals and alloys production stressing Ti alloys

16 p2800 A69-31777

Forge to determine refractory metals formability and ductility at high temperature in protective pressure

17 p2945 A69-33419

Refractory metals fracture, discussing interstitial impurity addition effects in Group 5a and 6a metals

17 p2989 A69-33556

Deformation studies of high melting point metals and alloys at high temperatures in vacuum, noting crack formation resistance and annealing time variations

18 p3155 A69-34651

Manufacturing in space based on nongravity and hard vacuum environment, considering crystal growth and refinement, perfectly shaped bodies, refractory metals ultrapurification, etc

18 p3234 A69-35066

Thermogravimetric study of oxidation protection of refractory metals by fused LiF coating, noting oxidation retardation of Ta, Nb and W

19 p3341 A69-35573

Surface alloying of high melting point metals in Al melts, noting prior oxidation enhancement and simplifying of calorizing techniques

19 p3328 A69-36158

Be diffusion during vapor phase saturation of W, Mo, Nb and Ta, noting time and temperature dependence of layer thickness

20 p3549 A69-37364

Protective coatings for high melting point metals, discussing prevention of low temperature coating breakdown due to oxidation

20 p3561 A69-37375

Stress rupture parameters for refractory metals and alloys from Larson-Miller, Dorn and Manson-Haferd constants, noting optimization procedure

20 p3564 A69-38135

Carbides and silicides temperature coefficient of electrical resistivity and Hall constant plotted as function of metal carbides solid solutions concentration

20 p3585 A69-38216

Superalloy technology applications to gas turbine engines

21 p3785 A69-38928

REFRACTORY PERIOD

Refractory period adaptation to sudden heart rate changes in dogs

24 p4257 A69-42628

REFRASIL [TRADEMARK]

U FIBERS
U SILICON DIOXIDE

REFRIGERATING

Refrigeration system for space flight use of cryogenic gas storage, suggesting mission time increase

15 p2587 A69-30395

REFRIGERATING MACHINERY

NT REFRIGERATORS

Maser for satellite communication consisting of traveling wave ruby maser and closed cycle liquid helium refrigerator, discussing design, operation and performance characteristics

02 p0256 A69-11992

Air conditioning system for transport airplane using combined simple/bootstrap cycle refrigeration unit, discussing thermodynamic performance and hardware implementation

19 p3243 A69-35641

REFRIGERATORS

He refrigerators, noting 4 K design for large scale fixed installations and 20 K small scale design for airborne applications

05 p0704 A69-15671

Thermal losses in thermal regenerators used in cryogenic refrigerators

05 p0706 A69-16163

Thermal losses in thermal regenerators used in cryogenic refrigerators

13 p2203 A69-27421

REFUELING

Fueling procedures for Boeing 747 aircraft, discussing design and operation of large capacity fuel trucks

10 p1674 A69-23631

Fueling procedures for Boeing 747 aircraft, discussing design of high rate mobile fuel dispensers

10 p1674 A69-23633

Optimal motion control of spacecraft refueling during flight by liquefying atmospheric gas along prescribed trajectory under constant thrust

13 p2356 A69-27686

Monograph on spreading of explosive vapor/air mixtures during aircraft fueling, covering underlying flow technology principles

15 p2551 A69-30930

Fluid flow problems during orbital refueling vehicle maneuvers and system operations in propellant transfer, including disturbances, liquid-vapor interface instability, vapor ingestion, etc

16 p2868 A69-32721

Orbital refueling techniques, discussing vapor-liquid interface stability, pressurant requirements, transfer line chilldown, propellant transfer dynamics, dielectrophoresis, suction speed estimating and system tradeoffs

16 p2869 A69-32733

Excessive extrapolation limitations in applying transient data to low gravity fluid behavior for orbital refueling systems, presenting orbital fluid transfer experiment

16 p2870 A69-32755

REGENERATION [ENGINEERING]

Regenerative digital transmission system error, representing memory of binary regenerative channel with Markov model

01 p0027 A69-10249

T63 regenerative helicopter engine program, noting operational performance and engine-aircraft compatibility

01 p0143 A69-10410

Regenerative amplification stability in nonretarded wave helitron and traveling wave mitron type devices

02 p0214 A69-11610

Efficient life support systems for prolonged space missions, discussing scientific and experimental research

06 p0879 A69-17040

Life support system energy efficiency, treating transfer equations of closed space regeneration systems

06 p0882 A69-17644

Lunar shelter regenerative life support system performance and manned test

07 p1071 A69-19427

Experimental program to evaluate regenerable sorbents for carbon dioxide removal in space cabin environments

09 p1447 A69-22552

Mathematical model of closed biological cycle regenerating part of life support products, incorporating astronaut, storage and regenerating waste disposal units

10 p1649 A69-23580

Regenerative amplification stability in nonretarded wave helitron and traveling wave mitron type devices

11 p1847 A69-24717

Reactive parameter scatter effect on amplitude frequency characteristics of regenerative reflection amplifiers based on equivalent circuit

13 p2235 A69-28515

Regenerative life support systems, discussing water reclamation, carbon dioxide removal, onboard oxygen generation and radio isotope thermal energy sources

19 p3262 A69-36318

REGENERATION [PHYSIOLOGY]

Regenerative life support system development, considering synthesized organic compounds and microorganisms as foods for long duration space missions

20 p3477 A69-37623

REGENERATIVE COOLING

Diathermal regenerative cooling of combustion chambers and engine nozzles with supercritical heat transfer mode

03 p0495 A69-12970

Space storable regenerative cooling with FLOX/methane under conditions for small pump fed engine, describing injector and chamber design

16 p2844 A69-32718

Scramjet engine active cooling with regenerative system using superalloy heat exchangers and hydrogen fuel as coolant

24 p4365 A69-43725

REGENERATIVE CYCLES

U REGENERATION [ENGINEERING]

REGENERATIVE FEEDBACK

U POSITIVE FEEDBACK

REGENERATIVE FUEL CELLS

Justi-Winsel extraction process by electro dialysis for removing product water from electrochemical reaction in H-O fuel cells

08 p1260 A69-21043

High pressure hydrogen-oxygen reversible fuel cells using calcia stabilized porous zirconia as membrane and aqueous KOH as electrolyte

23 p4076 A69-42308

REGENERATORS

NT THERMOSIPHONS

Idealized cycle of gas expansion machine with regenerator for cooling radio components

04 p0687 A69-15164

Small aircraft gas turbine regenerators employing heat pipes, noting excessive cost and weight

05 p0812 A69-16142

Thermal losses in thermal regenerators used in cryogenic refrigerators

05 p0706 A69-16163

Thermal losses in thermal regenerators used in cryogenic refrigerators

13 p2203 A69-27421

Cryogenic heat exchanger design and application including vaporizers, recuperators, regenerators, reversing exchangers, nonsteady state flow and thermoelectric techniques

17 p3074 A69-33681

REGIONS

U ANTARCTIC REGIONS

U ARCTIC REGIONS

U AUROREAL ZONES

U FRFNSL REGION

U NULL ZONES

U POLAR REGIONS

U TEMPERATE REGIONS

U TROPICAL REGIONS

REGISTERS [COMPUTERS]

U ACCUMULATORS [COMPUTERS]

U SHIFT REGISTERS

REGRESSION ANALYSIS

Simultaneous estimation of parameters in multiple equation regression model arising from radioactive tracer experiments using compartmental models

01 p0106 A69-10926

Factor analysis applied to identifying extremal planes, presenting regression analysis based on least squares techniques to calculate mathematical model coefficients

05 p0737 A69-15888

Stochastic model for real time on demand weather predictions using REEP /regression estimation of event probabilities/ equations in Markov chain

08 p1345 A69-20299

Zonal westerlies variations associated with tidal cycles, discussing principal component analysis, zonal index, bandpass filtering, aliasing, prediction and stepwise regression

09 p1537 A69-22242

Sublimation in ammonium perchlorate propellants combustion, discussing low temperature isothermal processes, linear regression rates measurements and low ambient pressure

11 p1940 A69-24481

Wind velocities statistical properties at various altitudes, noting linear regression of orthogonal components and prediction of wind velocities at all altitudes

11 p1911 A69-24694

Regression rate of solid fuel in hybrid combustion determined as eigenvalue by Rayleigh flow model with evaporating boundary

16 p2879 A69-32013

Nonlinear regression techniques for statistical simultaneous measurement of thermal properties including convergence criterion [AIAA PAPER 69-602]

17 p3070 A69-33260

Statistical weight estimation equations developed by constrained regression analysis, noting application to vertical tail of cargo/transport aircraft [SAWE PAPER 762]

18 p3220 A69-34879

Regression process in acetylcholine level in rats after mechanical vibrations and noise exposure

23 p4079 A69-41382

Noncyclic daily solar quiet variation in mean hourly geomagnetic field by including noncyclic variation term in regression model

23 p4158 A69-42170

Solid cloud cover moisture content relation to outgoing thermal radiation, obtaining correlation coefficient and regression equations

23 p4184 A69-42488

Formulas for discriminant and regressive weather analysis for computer calculations under operational weather forecasting conditions

23 p4184 A69-42490

Regression generated radiometric and contour height fields of North American Continent using Nimbus 2 IR equivalent black body temperature and geopotential data

24 p4343 A69-42896

REGRESSION COEFFICIENTS

Linear regression and related procedures in identifying dynamic processes

06 p0901 A69-17360

Regression coefficients obtained from satellite cloud observations applicability in constructing geopotential fields, tabulating coefficients obtained from ground stations

13 p2292 A69-27731

Nozzle throat ablative materials for controlled high regression rates in tactical rocket motors, primarily nylon reinforced thermosetting resins [AIAA PAPER 69-423]

16 p2804 A69-32710

Regression relations for energy expenditure in work predicted from heart rate and pulmonary ventilation in volunteers carrying loads upstairs

22 p3891 A69-40220

REGULARITY

Solution regularity for class of quasi-linear second order elliptic systems, applying results to regularity of extremals of particular integral

05 p0786 A69-15927

REGULATION

U CONTROL

REGULATIONS

Medical fitness regulations for pilots, including federal and internal airline regulations

06 p1041 A69-16844

U.S. policy for commercial surface effects ships regulation, discussing operational, construction and design requirements

08 p1254 A69-20199

FAA regulations for improvements on crashworthiness and emergency evacuation from viewpoint of plastic applications and fire safety in aircraft

08 p1254 A69-20497

Government flight recorder regulations, detailing approved systems

10 p1691 A69-23246

Flight data recorders history and regulations, discussing parameters and design of systems

10 p1691 A69-23247

Thrust reversers for business jet aircraft, discussing federal aircraft regulation requirements for ground and in-flight qualification [SAE PAPER 690311]

11 p1941 A69-24512

FAA jurisdictional procedures for law infringement, discussing civil codes, delegation of enforcement authority and routine violations including low flying, weather, etc

16 p2882 A69-32335

Technical and operational planning activities of airline resulting from airport restrictions in terms of congestion, performance and noise and runway strength

17 p2948 A69-34206

REGULATORS

NT AUTOMATIC FREQUENCY CONTROL

NT CURRENT REGULATORS

NT FLOW REGULATORS

NT FREQUENCY CONTROL

NT FUEL FLOW REGULATORS

NT PRESSURE REGULATORS

NT RELIEF VALVES

NT SPEED REGULATORS

NT THERMOSTATS

NT VOLTAGE REGULATORS

Optimal control problem for linear regulators with constant external disturbance

02 p0225 A69-11970

Sampled data regulator for maintenance of constant alveolar carbon dioxide during steady state and transient ventilatory responses to hypoxic stimulation

07 p1072 A69-19480

Optimal control trajectories computation for bilinear regulator problems including neutron kinetics of nuclear reactor

12 p2049 A69-26083

Near optimum regulator design technique for high order linear systems, using singular perturbation method to reduce system order

12 p2052 A69-26503

Time optimal regulator problem with recoverability constraint as restriction on system state during control synthesis

12 p2052 A69-26504

Suboptimal linear regulators design method yielding feedback controller for multivariable linear systems subject to parameter variations

22 p3918 A69-41012

Optimal gain theory for input vector and application to regulator problem describing aircraft dynamics

24 p4293 A69-43305

REHEATING

U HEATING

REIGNITION

U IGNITION

REINFORCED MATERIALS

U COMPOSITE MATERIALS

REINFORCED PLASTICS

Creep and stress rupture strength of unidirectional glass fiber reinforced plastics, using tensile tests

01 p1011 A69-10080

Fatigue properties and failure mechanisms of glass reinforced plastics based on chopped strand mat-polyester resin laminates

02 p0269 A69-11795

Thermal protection by ablation calculated, emphasizing blocking phenomenon and effectiveness of laminated and reinforced resins

02 p0351 A69-11890

Fiberglass reinforced plastic laminates failure under biaxial compression due to layer separation with strain energy as endurance criterion

02 p0270 A69-12142

Rapidly heated ablative reinforced plastics strength and stress-strain properties, considering heat shield designs

02 p0347 A69-12512

Internal elastoplastic stress distribution within reinforced plastics subjected to force normal to internal filaments direction

02 p0347 A69-12513

Glass fiber reinforced plastics - Conferences, Freudenstadt, West Germany, October 1968

03 p0453 A69-13819

Knee in stress-strain diagram and crack formation in glass fiber reinforced plastics, discussing effect on construction load capacity

03 p0453 A69-13820

Glass fiber reinforced plastic in aircraft construction, considering cellular weight and economy

03 p0454 A69-13821

Light passenger aircraft of glass fiber reinforced plastic, using hose construction technique

03 p0454 A69-13822

Glass fiber reinforced plastics aging behavior under heat and weathering influence

03 p0454 A69-13823

Damping properties of glass fiber reinforced plastics measured by flexural vibrations

03 p0454 A69-13824

Helicopter rigid rotor system with blades of glass fiber reinforced plastic

04 p0548 A69-14817

Shear strengths of polyimide and polybenzimidazole resin/fiberglass reinforced honeycomb materials compared to previous high temperature materials, noting lightweight sandwich aircraft structures

04 p0620 A69-14844

Piezooptical method applied to anisotropic bodies and reinforced plastics, deriving relation between dielectric tensors and stresses and strains

05 p0837 A69-16038

Composites reinforcement with single crystal flakes of aluminum diboride

05 p0785 A69-16581

Stress direction and mean stress effects on fatigue properties of fiberglass reinforced plastics

06 p0945 A69-17124

Stress-strain relations for laminar anisotropic medium from known mechanical properties of layers for application to fiber reinforced plastics

06 p1021 A69-17176

Water cooling jackets of plastic textile reinforced film for high inside temperature reduction in protective clothing

06 p0883 A69-18027

Anisotropic glass fiber reinforced epoxy resin composite under biaxial and uniaxial loads, noting isochromatics and isoclinics in photoelastic analysis

07 p1170 A69-18715

High temperature polyimide laminates for radomes and other supersonic aircraft components, discussing index flexural strength, dielectric constant and dissipation factor

07 p1171 A69-19545

Fiberglass reinforced plastics modulus of elasticity and Poisson ratio determined by strain gauges and frequency and resistivity measurements

08 p1335 A69-20330

Structural parameters influence on fiberglass reinforced plastics strength studied for optimal structure selection

08 p1335 A69-20332

Structural residual stresses determination in oriented fiberglass reinforced plastics by models taking into account mutual influence of fibers

08 p1335 A69-20333

Fiberglass reinforced plastic plates strength coupled to elastic base with allowance for tangential shearing stresses

08 p1412 A69-20334

Electromagnetic fields and magnetic and dielectric constants in fiberglass reinforced polymers determined by treating polymers as ideal dielectrics

08 p1336 A69-20336

Thermoplastics reinforcement with fiber and whisker fillers, evaluating graded asbestos, carbon, silicon nitride, silicon carbide and potassium titanate

08 p1337 A69-20479

Tensile stress and energy-to-break values compared for glass-fortified thermoplastic resins, discussing notched and unnotched Izod impact

08 p1337 A69-20480

Flexural fatigue of glass-reinforced thermoplastics as function of various parameters, discussing test for autogenous dissipative heating

08 p1337 A69-20481

Polymer structure effect on chemical resistance of reinforced plastics, sulfuric acid and sodium hydroxide corrosion of polyester resins and model copolymers

08 p1338 A69-20490

Tensile strength of glass-fiber reinforced epoxy resin laminates subjected to fluctuating tension, discussing crack density dependence on fatigue stress cycles

08 p1338 A69-20494

Matrix properties related to torsional fatigue life of fiberglass reinforced NOL rings, using polyester and epoxy resins as model systems

08 p1339 A69-20495

Laminates and filament wound structures using carbon fibers with silicon carbide whiskerized surfaces, noting compositing and laminating techniques

08 p1339 A69-20501

- Plastic composite reinforcements with boron, silicon carbide, graphite, single crystal alumina and laminating resins, discussing properties and fabrication
08 p1340 A69-20503
- Bromine containing unsaturated polyesters for fire retardancy and physical strengths, noting use in reinforced plastics for laminates, molding and corrosion
08 p1340 A69-20504
- Flame resistant chlorine containing polyester resins, discussing preparation, curing characteristics, physical properties and reinforced plastics application
08 p1340 A69-20505
- Three dimensional reinforcement composites for gear and bearing applications with improved interlaminar shear strength, thermal and wear properties
08 p1340 A69-20509
- Direct chemical bonding effect on flexural strength and flexural modulus of glass fiber reinforced plastics, noting degradation reactions
08 p1341 A69-20514
- Silicon carbide fiber surfaces nature and interaction with coupling agents, epoxy and resin components, noting chemical and electron microprobe analysis
08 p1341 A69-20515
- LFU 205 light aircraft design and construction with fiberglass reinforced plastic
08 p1321 A69-20867
- Shell theories for polymer and reinforced plastic shells, giving revised temperature and creep problem solutions due to mechanical behavior
09 p1611 A69-21481
- Failure modes in fiberglass reinforced epoxy laminates subjected to compression loadings, discussing cracks formation and delamination at glass-resin interface
09 p1529 A69-22305
- Fiber glass reinforced plastic backing phase of composite armor, noting test method for evaluation of performance
09 p1507 A69-22319
- Silica fabric reinforced phenolic composites mechanical properties at temperatures above cure level
09 p1530 A69-22321
- Fatigue behavior of composite disk modified from previously evaluated boron epoxy reinforced titanium compressor disk
09 p1619 A69-22323
- Prepreg based on S glass with HTS finish and B staged epoxy resin, discussing tensile strength and moisture exposure
09 p1530 A69-22327
- Compressive behavior of uniaxial filament reinforced epoxy tubes for aerospace structures, using hand layup method with Teflon mandrel and sleeve
09 p1508 A69-22339
- Boron filaments reinforced epoxy aircraft landing gear structure prototype, discussing development, fabrication, and testing
09 p1508 A69-22340
- Whiskerized graphite fiber in resin matrix composites, analyzing interstitial growth characteristics, resin infiltration, layup and compaction
09 p1511 A69-22360
- Glass reinforced polyimide laminate fabrication, discussing metal foil laminates
09 p1530 A69-22363
- Thermoplastic resins as matrices for glass reinforced plastics and aerospace structural and nonstructural adhesives
09 p1530 A69-22365
- Strength of laminated glass filament reinforced plastic material in biaxial loading, discussing strength theories
10 p1794 A69-22943
- Fiber content by weight of reinforced plastics measured by pyrolysis
10 p1716 A69-23695
- Glass reinforced plastic molding compounds for OV-10A airplane structural components, noting cost savings
[SAE PAPER 690342] 11 p1890 A69-24497
- Glass fiber reinforced plastics tensile strength at low and high temperatures
11 p1907 A69-25181
- Birefringent coatings application to plane stress in orthotropic glass-fiber reinforced plastic materials noting stress-strain relations
11 p1995 A69-25647
- Residual stresses and strains in wound reinforced plastic fiber cylinders subjected to polymerization by heat treating
11 p1907 A69-25679
- Glass fiber reinforced plastics shells stability under external hydrostatic pressure, discussing compression and axial tests for normal elastic modulus, shear modulus and Poisson coefficient
11 p1995 A69-25681
- Time and temperature dependence of plastic properties of fiber reinforced phenolic heat shield materials
12 p2119 A69-26825
- Fracture mechanics of polymers and fiberglass reinforced plastics, indicating microcracking under static and cyclic loading due to resin phase brittleness and low strength
12 p2120 A69-26849
- Glass reinforced plastics for Hovermarine HM.2 sidewall hovercraft designed for ferry routes
13 p2201 A69-27542
- Reinforced plastics corrosion resistance, showing dependences on coupling agent and chemical compatibility between resin and fibers
[ASME PAPER 69-DE-60] 14 p2467 A69-28853
- Syntactic foam low density thermoplastic microspheres as hollow spherical filler in polyester matrix, noting applications
14 p2467 A69-29285
- Composite airframe structural joint design and weight considerations for boron and glass fiber reinforced plastic materials
[ASM PAPER W9-23.1] 14 p2535 A69-29448
- Stress concentration on circular holes and notches in anisotropic oriented glass fiber reinforced plastics determined by using photoelastic birefringent coatings
15 p2713 A69-31053
- Fiberglass reinforced plastic tensile strength dependence on vibration time and temperature and vibrational effect on modulus of elasticity
15 p2643 A69-31203
- Reinforced textolite plastic dimensional and mass changes in water and oil immersion as function of surface, temperature and time
15 p2643 A69-31550
- Carbon fiber reinforced plastics properties improvement by applying organosilanes, discussing silanol bond formation
16 p2803 A69-31806
- Molded composites application to engine components, discussing turboprop reduction gear case design using polymer matrix boron composite
[AIAA PAPER 69-466] 16 p2795 A69-32763
- Shear modulus of fiberglass reinforced plastics determined from torsional tests on squared beam of orthotropic material, evaluating influence of end conditions
17 p3058 A69-33204
- Fiberglass reinforced plastics internal heat shielding for isopropyl nitrate rocket combustion chamber, considering lining resistance and safety during repeated firing /Ludion motor/
17 p3019 A69-33343
- Critical buckling stress for cylinders wound with fiber reinforced plastics /FRP/, establishing stability criteria for fiber reinforced shells
17 p3058 A69-33430
- Fatigue properties and test procedures for glass reinforced plastic rotor blades used in twin engine helicopter
[AHS PAPER 370] 17 p3060 A69-33518
- Carbon fiber reinforced plastics development for aerospace use, presenting criteria for resins selection
17 p2992 A69-33647
- Surface chemistry of plastics reinforced with strong fibers, stressing need for investigating coupling films, catalysts and metallic ions role in coupling compounds chemisorption
17 p2992 A69-33655
- Energy dissipation in fiberglass reinforced plastics subjected to axially induced sinusoidal stresses, noting absorption coefficient and hysteresis heating
17 p2993 A69-33937
- Axisymmetric deformation of cylindrical wound fiberglass reinforced plastic shell analyzed by methods of rigid normals and nonlinearly elastic fiber system
18 p3222 A69-34974
- Fiberglass reinforced plastics short and long term strength anisotropy, correlating stress and logarithm of time to rupture under tension along different directions
18 p3162 A69-35352
- Reinforced plastics static fatigue strength under various loads including thin walled tubes long term tests under constant internal pressure
18 p3162 A69-35353
- Fiber distribution in oriented fiberglass reinforced plastics, noting statistically isotropical distribution and use for regular structure model
18 p3162 A69-35355
- Optimal structure model of fiberglass reinforced materials with polymer matrix, obtaining strength utilization coefficient dependence on length/ diameter ratio
18 p3162 A69-35356
- Oriented glassfiber reinforced plastics elastic moduli and tensile strength along anisotropic axes determined nondestructively, considering component content and material porosity
18 p3162 A69-35359
- Statistical description of microstructural elements /fibers and fillers/ in unidirectional fiberglass reinforced plastics determined in lattice nodes
18 p3163 A69-35363
- Linearity range of viscoelastic properties of fiberglass reinforced plastics, calculating stress-strain state
18 p3163 A69-35364
- Longitudinal modulus of interlaminar slip during creep of fiberglass reinforced plastic determined by bending tests of beams under concentrated force
18 p3163 A69-35365
- Fiberglass-reinforced plastics longitudinal and transverse strain relations at various temperatures
18 p3163 A69-35366
- Phenomenological creep theory for woven fiberglass reinforced plastic under moderate loads
18 p3226 A69-35373
- Lightly loaded truss structures fabricated from Be, Be-Al alloy and uniaxial B filament reinforced epoxy tubing for unmanned spacecraft applications
19 p3340 A69-35504
- B-epoxy and B-Al composites compared for strength/weight and modulus/weight ratios, moisture absorption, corrosion resistance, projected costs, etc
19 p3340 A69-35506
- Military storage and environment effects on strength of filament wound glass reinforced epoxy structures, tested on plastic motor case and pressure vessels
19 p3321 A69-35567
- Glass fiber filled polytetrafluoroethylene materials for piston seals in high pressure oil-free reciprocating air compressors, discussing manufacturing and non-destructive tests
19 p3323 A69-35579
- Resin impregnated fiber reinforced expandable structures used for automatic cure or rigidizing in space and initially small compact packages on earth
19 p3433 A69-35585
- Creep strength of fiberglass reinforced polyester resins measured on structural components in long term tests under torsion
19 p3358 A69-35830
- Titanium monocoque fuselage reinforced by composite boron filaments in polyimide resin matrix tested for SST applications, noting weight savings over all titanium structure
[AIAA PAPER 69-763] 19 p3329 A69-36298
- Metal fiber reinforced thermoplastic composites, analyzing unidirectional, crossed and random orientation cases taking into account adhesion efficiency between fiber and matrix
20 p3559 A69-37083
- High performance graphite fiber reinforced plastic composites development and characterization, discussing fiber property data
[ASM PAPER W9-16.1] 21 p3728 A69-38655
- Stress-strain state of fiberglass reinforced plastics under load analyzed by anisotropic linear creep theory and Galerkin method
21 p3835 A69-38831
- Silico-organic liquid water repellent coatings for increasing binder adhesion to glass fiber in glass fiber reinforced plastic materials of aircraft components
21 p3752 A69-38876
- Fiber reinforced plastics mechanical behavior including thermosetting and thermoplastic polymers reinforcement mechanism
21 p3752 A69-38933
- Photoelastic and micromechanics studies of epoxy resins of varying Young moduli by simultaneous stress analysis of FRP and matrix materials
21 p3846 A69-39796
- Tensile strength of glass and graphite fibers for fiber reinforced plastics /FRP/ tested with modified balance type and strain gage type tensile testers
21 p3753 A69-39799
- Residual stress effect on strength of oriented glass fiber reinforced plastics under transverse and longitudinal tension
22 p3973 A69-40745
- Stress analysis during solidification of binders in glass fiber reinforced plastic materials, using resin coated glass film simulation
22 p3973 A69-40746

Porosity and composition effects on thermal conductivity of glass fiber reinforced plastics, noting tests of multilayer textolite sheets 22 p3973 A69-40747

Summation methods for multiple damages caused by static fatigue in glass fiber reinforced plastics under stepwise loads 22 p3974 A69-40748

Initial stress dependence on tensile load in glass fiber reinforced plastic rings during winding 22 p4045 A69-40749

Temperature influence on mechanical properties and creep curves of fiberglass reinforced textolites compared with data from elasticity theory 23 p4179 A69-41993

Mechanical properties of fiberglass reinforced textolite at normal temperature, noting applicability of elasticity formulas 23 p4179 A69-41994

Soft fiber reinforced plastics creep and recovery properties, discussing test equipment, rheological properties, polishing effects, etc 23 p4179 A69-42006

Carbon fiber reinforced plastic components aerospace applications, discussing honeycomb sandwich satellite structure for investigating lamination methods, shapes, bonding and machining 24 p4336 A69-43209

Composite-to-metal joints design and fabrication, using carbon yarn in epoxy matrix for missile interstage application 24 p4323 A69-43426

REINFORCED PLATES

Soviet handbook on stress analysis of anisotropic three layer reinforced plates and shells and of thick walled cylinders, Volume 2 04 p0683 A69-15500

Critical axial load for elastic instability of unidirectional equally spaced fibers in plane of composite plate and buckling modes 07 p1232 A69-18714

Fiberglass reinforced plastic plates strength coupled to elastic base with allowance for tangential shearing stresses 08 p1412 A69-20334

Stress-strain state of infinite plate with elliptical eccentric reinforced hole, using quadrature method 09 p1613 A69-21630

Two dimensional problems solutions by contour smoothing methods, considering stress concentrations in reinforced or perforated thin elastic plates 11 p1973 A69-24661

Two dimensional elasticity and plate bending theories for calculating elastic isotropic panels and thin reinforced plates 11 p1974 A69-24664

Field approach for stress and deflection analysis in rectangular plates reinforced by straight ribs, noting kernel function 11 p1983 A69-25019

Shear buckling of simply supported infinitely long plates orthogonally reinforced by stiffeners with flexural and torsional rigidity 11 p1984 A69-25142

Fatigue crack propagation and fail-safe design for stiffened large Al alloy panels with crack stoppers, using residual strength analysis method 12 p2186 A69-26835

Buckling loads for anisotropic fiber reinforced composite plates with strong bending membrane coupling terms 12 p2186 A69-26840

Rigid supporting ribs effect on annular plate critical loading, stability loss and buckling 14 p2533 A69-28983

Finite element analysis of flat rectangular orthotropic multilayer stiffened panels, proposing six degrees of freedom model 15 p2708 A69-30668

Stability of nonuniformly heated rectangular plate reinforced by elastic longitudinal and rigid transverse ribs, accounting for influence of torsional and bending rigidities 17 p3057 A69-33198

Crack analysis in stiffened vibrating plate based on dynamic stress distribution, showing high bending stresses at intersection 18 p3223 A69-35168

Stiffened integrally formed panel stability evaluation based on compression structural efficiency and manufacturing costs [AIAA PAPER 69-760] 19 p3434 A69-35660

Elastoplastic state of composite structures with applicability of elasticity law and yield conditions illustrated by reinforced plate under plane stress 19 p3444 A69-36808

Buckling of eccentrically stiffened thin circular elastic plate under circumferential uniform compression, obtaining equations and critical loads 20 p3622 A69-37221

Nonlinearly elastic plates with reinforced edges, deriving differential equations for boundary conditions 21 p3833 A69-38574

Stress concentration in elastic plate reinforced at edge by straight rib analyzed in finite form by Cauchy integrals and Fourier transforms 22 p4041 A69-40114

Limiting load of square plate subjected to shear and reinforced by vertical stiffener, computing membrane and bending stresses as function of flexural rigidity 24 p4399 A69-42967

Tensile tests on fiber reinforced plates with circular holes, studying fiber orientation effects 24 p4404 A69-43602

Crack propagation in plate with stiffening ribs /riveted stringers/ under concentrated and tensile loads, determining rivet points displacements 24 p4406 A69-43709

REINFORCED SHELLS

Strength analysis of cylindrical shells with rib and ring reinforcement under compression loads using network method 01 p0164 A69-10083

Imperfection sensitivity of axially compressed stringer stiffened cylinder analysis via shell equations formulation using finite differences 02 p0348 A69-12542

Stress diffusion from axially loaded stiffeners into cylindrical elastic shells 03 p0530 A69-14065

Impulse buckling threshold for elastic-plastic cylinder with elastic core after development of unstable motion 04 p0671 A69-14144

Reinforced thin walled cylindrical pressure body nonlinear circumferential stress problem approximate solution, noting fatigue strength of aircraft pressurized cabins 04 p0548 A69-14838

Soviet handbook on stress analysis of anisotropic three layer reinforced plates and shells and of thick walled cylinders, Volume 2 04 p0683 A69-15500

Elastic stability of thin circular cylindrical shell with elastic core, longitudinal and transverse reinforcement ribs, initial defects and under large strains 05 p0832 A69-15691

Elastic stability of thin circular cylindrical shell with elastic core, longitudinal and transverse ribs and initial defects under combined pressure and thermal stress 05 p0832 A69-15692

Approximate expressions for displacement state of orthotropically reinforced conical thin walled shell, finding stiffness matrix by numerical integration 05 p0835 A69-15829

Resonant frequencies for beam type bending oscillations of thin walled rib-reinforced circular cylindrical shell freely supported at outermost ribs 05 p0841 A69-16204

Annular stress in rib reinforced cylindrical shells under axial compression load and internal pressure, using successive approximation 05 p0841 A69-16208

Bending general instability of stiffened shallow orthotropic cylindrical shells, noting buckling stress and application to shell design for various loadings 06 p1022 A69-17369

Buckling of elastic cylinders with rectangular cut-outs and reinforcements under axial or lateral loading, using modified Newton method [AIAA PAPER 69-92] 06 p1027 A69-18060

Elastic stability of three dimensionally reinforced composite cylindrical shells [AIAA PAPER 69-122] 06 p1029 A69-18216

Stability of cylindrical shell reinforced by circular ribs under combined action of external pressure and axial forces, using characteristic equation 07 p1238 A69-19687

Optimal design of circular cylindrical sandwich shells under pressure and shear loads, showing acceptability of small shear coefficient values 08 p1416 A69-20722

Thermal stresses in longitudinally reinforced cylindrical shell, combining moment and semimomentless shell theories to obtain numerical results 11 p1981 A69-24942

Stress analysis of reinforced cylindrical shells under external loading, using Vlasov semimomentless theory 11 p1982 A69-24949

Optimal parameters selection for rib-reinforced cylindrical shells determined with respect to axial critical loading magnitude 11 p1985 A69-25173

Critical axial compressive load for cylindrical shells reinforced with longitudinal ribs, noting internal pressure and rib spacing effects 11 p1985 A69-25177

Maximum stress under bending for thin walled circular cylindrical shell stiffened with uniform stringers 11 p1987 A69-25380

Inplane and rotary inertia effects on free vibration frequencies of circular cylindrical shells eccentrically stiffened by orthogonal set of stringers and/or rings 11 p1992 A69-25520

Free vibration of discretely stiffened cylindrical shells with arbitrary end conditions programmed for digital computer, considering flexure, extension, torsion and nonsymmetric stiffener cross section 11 p1992 A69-25521

Dynamic analysis of axisymmetric ring stiffened shells with attached asymmetric elastic structures, noting vibration modes 11 p1993 A69-25525

Glass fiber reinforced plastics shells stability under external hydrostatic pressure, discussing compression and axial tests for normal elastic modulus, shear modulus and Poisson coefficient 11 p1995 A69-25681

Zero Gaussian curvature rib reinforced shells free oscillations reduced to nonreinforced shell forced oscillations under cyclic loads 12 p2177 A69-25996

Natural frequencies of ring-stiffened thin walled cylindrical shell determined by partial differential equations of motion, allowing for eccentricity 12 p2184 A69-26810

Axisymmetric elastic stresses in ring stiffened segmented shells of revolution, noting finite difference method for nonlinear analysis and computer program 12 p2185 A69-26818

Buckling of ring stiffened cylinders subject to axial compression, considering prebuckling lateral wall displacements 14 p2534 A69-29030

Stress distribution in variable rigidity reinforcing frame of circular cylindrical shell using strain energy method 17 p3055 A69-33131

Stress-strain rate of glass fiber reinforced plastic pressure vessels under internal pressure, determining optimal fiber pattern 17 p3057 A69-33195

Critical buckling stress for cylinders wound with fiber reinforced plastics /FRP/, establishing stability criteria for fiber reinforced shells 17 p3058 A69-33430

Stress level reduction in pressurized circular cylinder with circumferential ring stiffener and longitudinal crack, using shallow shell equations 18 p3212 A69-34347

Stability of thin walled eccentrically reinforced cylindrical shell, determining eccentricity influence and critical pressure formula from considerations of Poisson ratio, reinforcement parameters, etc 18 p3216 A69-34576

Stress-strain state calculations of ribs reinforcing cantilever shell under external pressure, using differential-difference equations 18 p3223 A69-34980

Microstresses in hollow-fiber reinforced cylindrical shell under longitudinal shear stress, determining modulus of elasticity and optimum component ratios 18 p3225 A69-35369

Cylindrical reinforced steel shells stability under external pressure 18 p3225 A69-35371

Natural frequencies and mode shapes of vibration of cylindrical shells orthogonally stiffened with rings and stringers [AIAA PAPER 68-349] 19 p3437 A69-35948

Boundary conditions for shells with reinforced nonasymptotic boundaries, assuming coincident beam axis deformation with shell boundary deformation 19 p3443 A69-36781

Elastic shell theory to regularize singular integrodifferential equation, investigating load transfer from reinforcing ribs to circular cylindrical shell and numerical solution correlation 19 p3443 A69-36792

Elastic interactions between cylindrical shell and added band reinforcement turns, analyzing stress relaxation magnitude and effect on pressure vessel design
20 p3621 A69-37064

Soviet book on shell and thin walled structure calculation methods covering stability and stress analysis, reinforced and sandwich shells, etc
20 p3630 A69-38199

Stability loss for hinged circular cylindrical elastic shells reinforced by thin walled closed profile ribs, proposing minimum weight design method
21 p3835 A69-38723

Dynamic behavior of infinitely long cylindrical shells of ideally rigid plastic materials strengthened with ring ribs, determining distribution of moments and displacements
21 p3837 A69-39156

Stiffness matrix for curved membrane shell, outlining discrete element representation of cylinders with widely spaced circumferential stiffeners
21 p3842 A69-39305

Deformation of thin walled spherical shell reinforced with equatorial hoop by concentric elastic forces
21 p3846 A69-39714

Buckling strength prediction for circular cylindrical shells reinforced by circumferential and longitudinal stiffeners, solving torsional buckling of orthotropic shells under internal pressure
22 p4042 A69-40171

Axisymmetric vibrations of semiinfinite cylindrical shell constructed of fiber reinforced composite layers, obtaining frequency equation from equations of motions
22 p4044 A69-40559

Discrete rib effect on buckling resistance of cylindrical shell under combined external and axial compression loads, using Laplace transforms
23 p4229 A69-41990

Stability of orthotropic cylindrical shells reinforced at edges by elastic ribs, analyzing axisymmetric buckling, natural oscillations and rigidity characteristics
23 p4229 A69-41992

Hinged circular cylindrical shells reinforcing ribs effect on deflection and bending moments, assuming external pressure application
23 p4229 A69-42001

Orthotropic stiffness layer models for buckling of eccentrically stiffened shells of revolution with two unbonded orthotropic layers uncracked and circumferentially cracked
24 p4405 A69-43657

Computer program determination of barreling effect on strength of ring and stringer stiffened shells designed to support axial compression loads
24 p4405 A69-43671

REINFORCEMENT [PSYCHOLOGY]
NT REWARD [PSYCHOLOGY]

Squirrel monkeys exposed to centrifugally generated artificial gravity trained to respond for food reinforcement at selected gravity levels
23 p4081 A69-41434

Fixed interval human performance control under various histories of conditioning and response cost conditions, considering effects of postreinforcement pauses
23 p4100 A69-41437

Human performance on button pressing task with fixed ratio fixed interval reinforcement schedules
23 p4081 A69-41439

Electrical self stimulation adaptability of hypothalamus or instrumental self reinforcing reaction in rats using skinner box technique
23 p4091 A69-42052

Constant illumination intensity effects fixed ratio lever pressing behavior for appetitive reinforcement with chimpanzee in temperature and humidity controlled environment
24 p4260 A69-42702

REINFORCEMENT [STRUCTURES]

Prestressing of aircraft wing stringers in order to reduce weight, noting initial bending moment, initial axial stress and prestressing methods
05 p0832 A69-15690

Fatigue behavior of composite disk modified from previously evaluated boron epoxy reinforced titanium compressor disk
09 p1619 A69-22323

Transverse reinforcing straps effects on torsional stiffness and bending behavior of open cross section profile thin walled prismatic beams
10 p1802 A69-23890

Damping of response of integrally stiffened skin structures to random acoustic pressures, reducing rms stress in case of broad band excitation
[ASME PAPER 69-VIBR-26]

10 p1806 A69-24172

Two dimensional elastic reinforcements effects on stress, strain and elasticity of quasi-homogeneous anisotropic elastic medium

11 p1981 A69-24941

Prototype system for continuous dielectrophoretic deposition and alignment of micron sized ultrahigh strength whisker reinforced composites

13 p2269 A69-28676

Wide panel Ti structural extrusions with integral stiffeners, discussing material, sizes, properties and tolerances

19 p3319 A69-35552

Reinforcement unbonding onset in composite materials determined by continuous dynamic moduli and damping measurements of tensile specimens

20 p3511 A69-37761

Reinforcement effect on stress relaxation and creep in hereditary elastic materials, assuming integral shear modulus operator with exponential kernel

22 p4045 A69-40744

Torsion analysis of curvilinear rectangular prismatic beam reinforced by off-center circular rod, using conformal mapping

22 p4049 A69-41279

Potting material reinforcing honeycomb structures for fastener installation prior to bonding face sheets to core, noting mechanical properties

24 p4326 A69-43466

REINFORCEMENT RINGS

Buckling of ring stiffened cylinders subject to axial compression, considering prebuckling lateral wall displacements

14 p2534 A69-29030

Anisotropic elastic plate deflection weakened by circular hole with thin elastic ring reinforcement, assuming no load on ring and uniform stress-strain state of plate

17 p3055 A69-33128

Aircraft landing gear cylinder reinforcement rings design for minimum weight, using optimization iteration method for planar frames with elastic supports
[AIAA PAPER 68-328]

17 p3066 A69-34030

Stress level reduction in pressurized circular cylinder with circumferential ring stiffener and longitudinal crack, using shallow shell equations

18 p3212 A69-34347

Steady state temperature fields and thermal stresses determined in finite cylindrical shell by optimal parameters of reinforcing circular rib

21 p3834 A69-38714

Dynamic behavior of infinitely long cylindrical shells of ideally rigid plastic materials strengthened with ring ribs, determining distribution of moments and displacements

21 p3837 A69-39156

Deformation of uniformly thick elastic circular plates containing circular holes reinforced by thin rigid elastic rings

21 p3846 A69-39713

REINFORCING FIBERS

Mass or energy transfer in reinforced media, discussing components characteristics and role of diffusion processes

01 p0173 A69-10079

Ribbon reinforcements in composite materials noting stiffness properties

01 p0172 A69-11265

Diffusion zones in filament reinforced metal matrix composites, using metallographic technique

01 p0103 A69-11269

Stress transfer from loaded matrix to single fiber in composite materials determined by series and step formulations

01 p0172 A69-11271

Reinforcing glass fiber fillers in thermoplastic commercial products, noting applicability to high speed fabrication by injection molding processes

07 p0269 A69-11794

Metal composite materials, discussing strengthening mechanism for inclusion of high elastic coefficient and creep limit fibers in weak ductile matrices

02 p0268 A69-12750

Fabrication of Cu-W composites with discontinuous fibers based on sintering and rolling

03 p0444 A69-13349

Glass fiber reinforced plastics - Conferences, Freudenstadt, West Germany, October 1968

03 p0453 A69-13819

Damping properties of glass fiber reinforced plastics measured by flexural vibrations

03 p0454 A69-13824

Thermal stress in fiber reinforced metals, assuming Young modulus variable when thermal stress is applied during heating and cooling

04 p0682 A69-15393

Piezoptical method applied to anisotropic bodies and reinforced plastics, deriving relation between dielectric tensors and stresses and strains

05 p0837 A69-16038

Flow stress of iron wire reinforced aluminum alloy composites
[ASME PAPER 68-WA/MET-10]

05 p0780 A69-16150

Statistical model for tensile fracture of parallel fiber composites based on stress criterion for crack propagation

[ASME PAPER 68-WA/RP-7]

05 p0783 A69-16159

Boron carbide continuous filaments preparation and properties, discussing use in resin and metal composites
[ECS PAPER 210]

05 p0783 A69-16236

Glass, boron and graphite filament wound resin composites and liners for cryogenic pressure vessels

05 p0785 A69-16488

Nickel reinforced with mullite whiskers produced by hot pressing

05 p0782 A69-16794

Metal matrix composites - ASTM Conference, Boston, June 1967

06 p0938 A69-16940

Sapphire whisker reinforced aluminum composites fabrication and evaluation

06 p0939 A69-16942

Fiber orientation and morphology effect on tensile behavior of aluminum-nickel whisker reinforced aluminum

06 p0939 A69-16943

Lattice strains in matrix phase of aluminum-boron and copper-tungsten composites measured by X ray diffraction

06 p0939 A69-16944

Metal matrix composites compression microstrain behavior, analyzing continuous fiber composites of magnesium-boron and copper-tungsten

06 p0939 A69-16945

Diffusion bonded aluminum-boron composite material, discussing mechanical, metallographic and radiographic properties

06 p0939 A69-16946

Micromechanics of boron filament reinforced aluminum composites

06 p0940 A69-16948

Aluminum-silica fiber reinforced metal composite, discussing mechanical behavior and effect upon engineering applications

06 p0940 A69-16949

Aluminum-stainless steel wire reinforced metal matrix composites, analyzing strain hardening and plastic deformation

06 p0940 A69-16950

Fatigue performance of composites consisting of W or Mo helical coils embedded in Cu matrix, discussing evaluation from microstructural behavior

06 p0940 A69-16951

Delamination effects on strength degradation of filament wound composites

06 p0946 A69-17126

Diffusion bonding of whisker reinforced aluminum in closed steel die in argon atmosphere

06 p0943 A69-17238

Metal fiber reinforced ceramic matrix composites, discussing model system, bond strength, loading and elastic properties

06 p0946 A69-17528

Fiberglass reinforced plastic bottoms design for integration with cylindrical shells, discussing design, shapes and boundary value problems

06 p1025 A69-17685

Statistical theory of material strength with application to composite materials reinforced with whiskers and continuous fibers

06 p1028 A69-18142

High strength carbon fibers development and applications in reinforced composite materials and aerospace industry

06 p0947 A69-18236

Compressive strength of boron fiber-epoxy matrix composite, noting matrix support of fibers against buckling

07 p1170 A69-18713

Critical axial load for elastic instability of unidirectional equally spaced fibers in plane of composite plate and buckling modes

07 p1232 A69-18714

Anisotropic glass fiber reinforced epoxy resin composite under biaxial and uniaxial loads, noting isochromatics and isoclinics in photoelastic analysis
07 p1170 A69-18715

Fiber geometry and partial debonding effects on bond stress distributions around single rigid fiber in infinite elastic plate subject to tensile stress
07 p1170 A69-18717

Fiber reinforced plastic and metallic composites for longevity and endurance of materials at high temperatures and extreme loads, discussing alumina whiskers
07 p1167 A69-19290

Fiber-metal matrix composites fabrication, applications, mechanical properties and powder metallurgy
08 p1332 A69-20204

Development of materials in aerospace structures and propulsion systems, discussing superelastic alloys, graphite fibers, composites, refractory metals and processing techniques
08 p1332 A69-20306

Structural parameters influence on fiberglass reinforced plastics strength studied for optimal structure selection
08 p1335 A69-20332

Thermoplastics reinforcement with fiber and whisker fillers, evaluating graded asbestos, carbon, silicon nitride, silicon carbide and potassium titanate
08 p1337 A69-20479

High modulus and high strength carbon fibers and composites, discussing mechanical properties and interlaminar shear strength
08 p1338 A69-20488

Filament winding process variables effect on carbon or fiberglass reinforced composites, determining mechanical properties
08 p1338 A69-20489

Fracture energy of unidirectional laminated composites related to diameter, debonding energy and strength of reinforcing filaments
08 p1414 A69-20493

Tensile characteristics of discontinuous unidirectional fiber reinforced glass-epoxy composites and filament wound material, discussing alignment and interfacial bonding
08 p1339 A69-20496

Nondestructive testing methods application to fiber-bonded composites, noting X ray diffraction, radiography and ultrasonics
08 p1339 A69-20498

Laser beam diffraction method for measurement of apparent filament diameters, emphasizing high modulus carbon filaments
08 p1316 A69-20499

Thermoelastic properties of particulate, filamentary and layered composites, summarizing Soviet theoretical and experimental work
08 p1339 A69-20500

Matched metal molding of short graphite fiber composites
08 p1339 A69-20502

Shop-ready high modulus carbon and fiberglass composite reinforcement system, stressing effect of modulus fibers amount in laminate
08 p1340 A69-20508

Whiskerizing technique for growing small beta SiC single crystals on graphite filament surfaces, noting changes in interface geometry and chemistry
08 p1341 A69-20511

Fiber composite design, discussing contribution of filament diameter, number, content and properties, ply parameters and void content to structural response
08 p1341 A69-20512

Direct chemical bonding effect on flexural strength and flexural modulus of glass fiber reinforced plastics, noting degradation reactions
08 p1341 A69-20514

Silicon carbide fiber surfaces nature and interaction with coupling agents, epoxy and resin components, noting chemical and electron microprobe analysis
08 p1341 A69-20515

Mechanical properties of ceramic material consisting of pure silica matrix reinforced by carbon fibers
08 p1341 A69-20700

Cylindrically deformed fiber reinforced material, obtaining kinematics and constitutive equations
08 p1418 A69-21002

Failure criteria for predicting filamentary composite strength under uniaxial and combined stresses from properties and fabrication process considerations
09 p1611 A69-21479

Boron and graphite fibers role in composites cost feasibility in 1970s
09 p1524 A69-22067

Boron-epoxy composites applications and properties, comparing strength to weight and stiffness to weight ratios with aluminum, titanium and beryllium
09 p1529 A69-22068

Development and fabrication of fiber-resin and fiber-metal composites, discussing application to aerospace technology
09 p1524 A69-22069

Boron carbide filaments as reinforcements for metal structures, noting vapor deposition use of silica
09 p1529 A69-22070

Tensile strengths and elasticity moduli of graphite fibers produced from textile organic thread, discussing application to composites, ablative and fiber reinforced materials
09 p1529 A69-22071

Metallic and nonmetallic matrices reinforcement by ceramic whiskers, describing mechanical properties
09 p1525 A69-22142

Automatic fabrication process for boron reinforced composite structures, concerning orienting and laminating jet flap skins
09 p1507 A69-22329

Magnesium boron composite fabrication by diffusion bonding and liquid metal infiltration, obtaining minimized property variations and high strength to density ratios
09 p1507 A69-22332

Subscale aircraft fuselage section fabricated with lightweight graphite fiber/epoxy resin composite material
09 p1509 A69-22341

Bonded Al-B metal matrix composite materials hot press fabrication and design, discussing temperature pressure time cycles and honeycomb sandwich structures
09 p1510 A69-22351

Ceramic whiskers and metallic matrix chemical reactions during composite formation, analyzing coated and uncoated SiC whiskers in titanium matrix
09 p1527 A69-22359

Whiskerized graphite fiber in resin matrix composites, analyzing interstitial growth characteristics, resin infiltration, layup and compaction
09 p1511 A69-22360

Graphite fiber electroplating with nickel on continuous basis for ribbon like continuous flexible twist free yarn
09 p1512 A69-22362

Static and dynamic strength tests and modulus data for graphite fiber/epoxy composite yarn, noting ply winding and dimensions
[ASME PAPER 69-GT-114]
09 p1531 A69-22520

Metal composites of Ni or Mo fibers in Be matrix, discussing chemical compatibility in terms of reactions, solid solubility and diffusion at various temperatures
10 p1707 A69-22991

Fiber reinforced metals, discussing crystalline whiskers, metallic and ceramic fibers and mechanical characteristics
10 p1711 A69-23335

Fiber content by weight of reinforced plastics measured by pyrolysis
10 p1716 A69-23695

Electroplating solutions test for filament winding and electroforming process used in fabricating fiber reinforced metal composites
11 p1890 A69-24337

Reinforced metals properties and applications including fibers and lamination, notch sensitivity, brittle fracture, failure and heat resistance characteristics
11 p1904 A69-24898

Nozzle ablations based on chemical mechanism, discussing pure or reinforced phenolic resin
11 p1999 A69-24908

Unidirectional fibrous materials stability, finding characteristic equation in form of infinite determinant by solving three dimensional stability of reinforcing fibers in binder
11 p1985 A69-25172

Graphite and B filament-epoxy resin composites application to aeroelastic scaled dynamic models, analyzing weight savings, fabrication and component stiffness
11 p1990 A69-25508

Birefringent coatings application to plane stress in orthotropic glass-fiber reinforced plastic materials noting stress-strain relations
11 p1995 A69-25647

Residual stresses and strains in wound reinforced plastic fiber cylinders subjected to polymerization by heat treating
11 p1907 A69-25679

Fiber reinforced materials shear and tensile strength effect on stress-strain state of composite materials machine parts, considering design requirements
11 p1907 A69-25680

Composite materials for aerospace applications, discussing high modulus filaments, structural and non-structural design considerations, nondestructive testing techniques, etc
12 p2111 A69-25852

Metallic and ceramic whiskers and fibers for material reinforcement, discussing properties and fabrication techniques
12 p2111 A69-25856

Fiber reinforced space vehicle combustion chambers and cryogenic fuel tanks, discussing design and elastomechanical problems
12 p2176 A69-25860

Stress distribution in elements of unidirectionally fiber reinforced composite materials analyzed as function of fiber content and fiber-matrix elastic properties
12 p2180 A69-26263

Book on ceramic fibers and fibrous composite materials as structural reinforcements covering dynamic testing of fine filaments and whiskers, material characterization, etc
12 p2118 A69-26340

Orthotropic properties and stress fields for configurations of fiber or whisker reinforced composite materials subjected to nonaxial loading, considering infinite elastic matrix
12 p2186 A69-26824

Stress distribution in matrix of unidirectionally fiber reinforced composite subject to shrinkage and normal transverse load, using three dimensional photoelastic analysis
12 p2189 A69-27162

Fiber polymer composite flexible insulating materials properties and applications stressing synthetic organic fibers
13 p2286 A69-27989

Finite control volume approach to shock Hugoniot in unidirectional fiber reinforced composite, computing shear force along matrix-fiber interface
[AIAA PAPER 69-359]
13 p2366 A69-28292

Boron nitride coated boron reinforced metal matrix composites, discussing continuous liquid infiltration, fiber-matrix reactions and heat treatment
13 p2283 A69-28671

Tungsten alloy fiber reinforced nickel base alloy composites stress-rupture strength, oxidation and impact resistance for high temperature turbojet engine buckets
14 p2462 A69-29010

Fiber reinforced adhesives, discussing adhesion definition and variables separation, applications and testing
14 p2455 A69-29343

Boron filament wound composite structures fabrication noting physical properties
14 p2455 A69-29413

Thermal stresses in fiber reinforced metals as function of volumetric content of fiber phase
15 p2638 A69-30285

Interlaminar shear strength development for utilization of unidirectional strength and stiffness of graphite fibers, discussing epoxy resin-fiber interface improvement
15 p2642 A69-30312

Organic and inorganic fabric reinforcements effects on thermal properties of composites noting thermal conductivity, diffusivity, specific heat constants and temperature ranges
15 p2642 A69-30466

Fiberglass reinforced plastic tensile strength dependence on vibration time and temperature and vibrational effect on modulus of elasticity
15 p2643 A69-31203

Heat resistant fiber composites produced by oriented eutectic crystallization in Co and Ni quaternary alloys
[ONERA-TP-710]
16 p2799 A69-31765

Optical measuring methods of cross sections and mechanical properties of heat resistant fiber reinforced materials
16 p2803 A69-31804

Carbon fiber reinforced plastics properties improvement by applying organosilanes, discussing silanol bond formation
16 p2803 A69-31806

Molded composites application to engine components, discussing turboprop reduction gear case design using polymer matrix boron composite
[AIAA PAPER 69-466]
16 p2795 A69-32763

Tensile and creep deformation of fiber reinforced composites consisting of Mg-Li alloy matrix with high strength precipitation hardening stainless steel wire 17 p2986 A69-33073

Critical buckling stress for cylinders wound with fiber reinforced plastics (FRP), establishing stability criteria for fiber reinforced shells 17 p3058 A69-33430

Carbon fiber reinforced plastics development for aerospace use, presenting criteria for resins selection 17 p2992 A69-33647

Surface chemistry of plastics reinforced with strong fibers, stressing need for investigating coupling films, catalysts and metallic ions role in coupling compounds chemisorption 17 p2992 A69-33655

Filamentary composites elastic constants calculation extended to hexagonal symmetry by long waves method 17 p3061 A69-33666

Thin walled cantilevered fiberglass reinforced shafts damping characteristics dependence on natural vibration modes and fibers orientation 17 p3065 A69-33938

Macrostructural differences between filaments of B and SiC vapor deposited onto small diameter W wire, discussing radial cracks due to dilatation 18 p3160 A69-34266

Axisymmetric deformation of cylindrical wound fiberglass reinforced plastic shell analyzed by methods of rigid normals and nonlinearly elastic fiber system 18 p3222 A69-34974

Thermal stress in fiber reinforced metals, assuming Young modulus variable when thermal stress is applied during heating and cooling 18 p3223 A69-35021

Composite material applications in space vehicle structures, noting strength and stiffness of boron fibers in plastic or metal matrices 19 p3340 A69-35502

B-epoxy and B-Al composites compared for strength/weight and modulus/weight ratios, moisture absorption, corrosion resistance, projected costs, etc 19 p3340 A69-35506

Beryllium wire reinforced Al composites, discussing layup techniques and coated filament advantages 19 p3340 A69-35508

Silicon carbide coated boron fibers in aluminum alloy matrix, discussing tensile and structural properties of braze bonded specimens 19 p3340 A69-35509

Electroforming of Al matrix composites by codeposition of short graphite fibers, obtaining increased strength and elastic modulus 19 p3318 A69-35510

Filament reinforced metal matrix composites made by continuous casting process, discussing tensile tests results and production costs 19 p3318 A69-35511

Mechanical properties and thermal aging of laminated specimens of collimated B monofilament reinforced composites preimpregnated with polyimide resin 19 p3354 A69-35514

Glass overlaid B filament laminates interleaved with C and silica fabrics, evaluating ablative properties in solid rocket motor tests 19 p3354 A69-35515

Silicon nitride staple fibers synthesis, development and characterization, noting tensile strength and sonic modulus 19 p3354 A69-35517

Fiber reinforced carbon and graphite with application to reentry and propulsion systems and high temperature gas turbines, noting three dimensional woven quartz 19 p3354 A69-35519

Tape placement machines to fabricate composite high modulus filamentary tape reinforced aerospace structures, anticipating future generations evolution into automatic control 19 p3323 A69-35584

Resin impregnated fiber reinforced expandable structures used for automatic cure or rigidizing in space and initially small compact packages on earth 19 p3433 A69-35585

Silicon carbide coated boron fiber reinforced /Bor-sic/ Al composites tensile strength and elastic properties 19 p3344 A69-35926

Titanium monocoque fuselage reinforced by composite boron filaments in polyimide resin matrix tested for SST applications, noting weight savings over all titanium structure [AIAA PAPER 69-763] 19 p3329 A69-36298

Metal fiber reinforced thermoplastic composites, analyzing unidirectional, crossed and random orientation cases taking into account adhesion efficiency between fiber and matrix 20 p3559 A69-37083

Boron fiber reinforced Al matrix composite material for high performance aircraft gas turbine engine compressor blading [AIAA PAPER 68-1037] 20 p3586 A69-37153

Transverse stiffness and strength of unidirectional fiber-reinforced composites determined as function of fiber volume content, using finite element method and stress functions 20 p3623 A69-37354

Strength characteristics of high performance fibers and application to reinforced composite materials noting whiskers, polycrystalline and vitreous fibers 20 p3567 A69-37748

Elastic constants of composite containing parallel cylindrical fibers, discussing disturbance in stress field 20 p3626 A69-37759

Composite materials application in aerospace industry, discussing boron and carbon filament properties, epoxy resins, etc 20 p3563 A69-37930

Diffusion bonding of Al and boron filament layers into continuous structural material, studying process variables including heat treatment and cross rolling effects [AIME PAPER S69-6] 20 p3564 A69-38197

Carbon fiber reinforced plastics application to aircraft metal components for weight reduction, low cost and high mechanical properties 21 p3750 A69-38428

B fiber reinforced Ni failure characteristics at high temperature, discussing plastic deformation and matrix role in crack inhibition 21 p3743 A69-38616

High performance graphite fiber reinforced plastic composites development and characterization, discussing fiber property data [ASM PAPER W9-16.1] 21 p3728 A69-38655

Metal matrix compatibility of metal coated graphitized, silicon carbide and boron fibers, discussing fiber weakening processes [ASM PAPER W9-20.1] 21 p3751 A69-38670

Graphite fiber reinforced graphite composites fabrication, discussing spray forming and physical and mechanical properties [ASM PAPER W9-20.4] 21 p3730 A69-38671

Fiber reinforced plastics mechanical behavior including thermosetting and thermoplastic polymers reinforcement mechanism 21 p3752 A69-38933

Carbon fiber reinforced materials applications in aerospace industry, discussing long term potential and applications in F-5 aircraft 21 p3732 A69-38989

Al-B composite aircraft structure fabrication, discussing wingspan segment, resistance spot welding, hot forming of joggles, etc [AIME PAPER S69-1] 21 p3732 A69-39471

Stress-strain curves of W wires and of aligned composites of same wires in Cu matrix 21 p3845 A69-39709

Fracture strength of glass fiber-reinforced cylinders made by unidirectional filament winding predicted by analyzing three dimensional stress distributions 21 p3846 A69-39795

Photoelastic and micromechanic studies of epoxy resins of varying Young moduli by simultaneous stress analysis of FRP and matrix materials 21 p3846 A69-39796

Tensile strength of glass and graphite fibers for fiber reinforced plastics (FRP) tested with modified balance type and strain gage type tensile testers 21 p3753 A69-39799

High E modulus, structure, strength and temperature characteristics of reinforcement fibers, considering B, silicon carbide, C and Be 22 p3951 A69-39907

Boron and carbon reinforced composite materials aerospace structural application, discussing weight savings, components structural design and connection and load input problems 22 p4038 A69-39908

Metal matrix fiber-reinforced composite materials joining by welding and brazing techniques 22 p3956 A69-40480

Loading rate effects on fracture characteristics of unidirectional fiber reinforced materials, discussing fiber-resin interface strength 22 p3974 A69-41212

Soft fiber reinforced plastics creep and recovery properties, discussing test equipment, rheological properties, polishing effects, etc 23 p4179 A69-42006

B, silicon carbide, C and Be reinforcing fibers technology, thermal and physicochemical properties, noting coating, surface defects and improvement over glass fibers 23 p4179 A69-42154

Boron fiber reinforced composite materials in aircraft structures, comparing rigidity with glass fiber plastics and weight gains 23 p4179 A69-42155

Carbon fiber composites in construction of rocket motor cases, pressure vessels and support structures, including carbonization for ablation and insulation applications 23 p4180 A69-42158

Law of mixture governing creep strength of composite materials reinforced unidirectionally by continuous filaments, taking into account fibers and matrix viscoelastic properties 24 p4400 A69-43054

Stress analysis of hollow viscoelastic cylinder reinforced with elastic helically wound wires [ASME PAPER 69-APMW-23] 24 p4401 A69-43096

Carbon fiber reinforced plastic components aerospace applications, discussing honeycomb sandwich satellite structure for investigating lamination methods, shapes, bonding and machining 24 p4336 A69-43209

Aircraft structure fabrication combining unidirectional strength and stiffness of B composite with metal, including test and weight/ cost data 24 p4323 A69-43419

High modulus carbon filament composite structural elements for missile interstage application, showing weight savings 24 p4325 A69-43444

High performance void free carbon fiber laminates preparation using polyimide resins, describing flexural strengths, moduli and interlaminar shear strengths 24 p4325 A69-43445

Postcured low void content graphite fiber reinforced polyimide resin composites fabrication including shear, flexural and tensile strength data 24 p4337 A69-43446

High modulus graphite/asbestos reinforced laminates, noting improved transverse strength and thermal properties 24 p4337 A69-43447

Molded fiber composites in aerospace components applications, considering weight, stiffness, production and cost 24 p4326 A69-43448

Tensile strength improvement in Al-B composites by heat treatment to T6 condition and subsequent cold rolling 24 p4334 A69-43449

Boron epoxy composites evaluation for use in aircraft dynamic components, considering fatigue failure mechanism identification 24 p4337 A69-43450

Al-B composites fracture toughness obtained by comparing notched tensile data with unnotched specimens 24 p4335 A69-43451

Tensile data and photomicrographs of explosively bonded metal matrix composites interfaces 24 p4326 A69-43452

Tensile tests on fiber reinforced plates with circular holes, studying fiber orientation effects 24 p4404 A69-43602

REISSNER THEORY

Galerkin method for solving dimensionless Reissner equation for symmetrically loaded thin nonshallow shells of revolution 01 p0168 A69-10380

Reissner nonlinear equations for nonshallow symmetrically loaded shells of revolution 04 p0684 A69-15538

Reissner algorithms for displacements of bent plate represented in finite series form as solutions of Euler equations 10 p1793 A69-22883

Galerkin method for solving dimensionless Reissner equation for symmetrically loaded thin nonshallow shells of revolution 12 p2182 A69-26679

Mixed plate element application to vibration and buckling eigenvalue problems based on Reissner variational principle, considering quadrilateral elements 16 p2874 A69-32176

Reissner variational principle applied to incompressible and nearly incompressible anisotropic thermoelasticity

22 p4040 A69-39980

RELATIVE BIOLOGICAL EFFECTIVENESS [RBE]

Accelerated helium and carbon ions effects on mutation-induction and nuclear inactivation in *Neurospora crassa* compared with X rays, discussing relative biological effectiveness [RBE/

03 p0373 A69-13490

RBE of fast neutrons on mice, rats and guinea pigs, discussing suppression of mitosis in isolated cells

20 p3478 A69-37629

RELATIVISTIC EFFECTS

Compressible relativistic flow in subsonic, transonic and supersonic regimes, noting pressure coefficient variations

01 p0007 A69-11203

Pulsar frequency Doppler shift due to general relativistic corrections to optical path of photons in field of sun

02 p0315 A69-11836

Mass effect on frequency tested during approach of pulsar to sun

02 p0323 A69-12298

Radio emission sources nature in terms of special relativity theory

03 p0499 A69-13078

Fresnel drag produced by relativistic addition of electron velocities in semiconductors measured by changes in refractive index

05 p0807 A69-16026

White dwarf general relativistic instability toward dynamic collapse and Type I supernovae

06 p1010 A69-17975

Small signal coupled mode analysis including relativistic effects for studying spiraling electron beam interaction with fast wave circuits

07 p1114 A69-18436

Wave propagation on cylindrical electron beam in vacuum and in plasma background, including relativistic effects

07 p1189 A69-18657

General relativistic gravitational red shift effect on frequency transmitted from satellite orbits, noting possibility of measurement

08 p1383 A69-19901

Corrections to relativistic plasma thermodynamic functions associated with electromagnetic field effect, demonstrating inapplicability of Darwin Hamiltonian to problem

08 p1359 A69-19953

Characteristic equation obtained by considering world line vector, basic thermodynamic variables and metric tensor as functions of Licherowicz class

09 p1480 A69-21614

Relativity theory examined critically, discussing spherical space, Lorentz transformation and Einstein conclusions

10 p1725 A69-23317

Dynamical model for spherical inhomogeneity in mean mass density of universe to predict velocity dispersion observed for Coma Cluster

10 p1789 A69-24133

Photon emission from highly relativistic stars, using computed differential light delays to calculate blurring of spherically symmetrical emission pulses

13 p2350 A69-27825

Radio emission sources nature in terms of special relativity theory

14 p2509 A69-28760

Angular momentum-gravitational field coupling in collapsing star, applying rotational perturbation to spherically symmetric time dependent interior solution of Einstein field equation

14 p2520 A69-29374

Collisionless stability of relativistic, spherically symmetric star clusters against radial perturbations, considering one dimensional sufficient criteria

15 p2691 A69-30765

Pulsar clock mechanisms on basis of relativistic gravitational effects, considering white dwarfs and neutron stars

15 p2694 A69-30855

Doppler geodetical measurements, emphasizing relative orientation between station and orbit influence on coordinates determination accuracy, presenting electromagnetic wave propagation theory

15 p2601 A69-31375

Pulsation periods for pure He white dwarfs calculated by Chandrasekhar equation including relativity and rotation effects

17 p3037 A69-33641

Relativistic effect detection on pulsar frequencies by general relativity theory, assuming pulsars are orbiting objects

17 p3037 A69-33645

Relativistic effect in pericenter motion of comets and natural satellites from major semiaxes and eccentricities of natural bodies

17 p3044 A69-34174

Slow rotation of relativistic polytropes with linear corrections, showing inertia moment distribution and metric component

19 p3426 A69-36576

Relativistic star clusters, discussing existence and quasi-static evolution before collapse through gravitational radius

21 p3814 A69-39570

Manned relativistic space flight limitations dependence on biomagnetic levitation of human body in inhomogeneous magnetic field to compensate inertial forces during acceleration

22 p3889 A69-39906

Antenna design considerations for spacecraft at relativistic velocities, discussing gain function, receiver power density and source apparent frequency and direction

22 p3914 A69-40700

One dimensional flow of perfect compressible relativistic fluids, obtaining expression showing wave velocity dependence on relativistic speed of sound

22 p3931 A69-40711

Pulsar CP 0328 radiation mechanism, considering relativistic effects of rapid rotation

22 p4035 A69-41206

Relativistic Doppler shift effect observed from radio signal periodic variation of GEOS-1 satellite

23 p4126 A69-42389

RELATIVISTIC PARTICLES

Thermodynamical and hydrodynamical relations for relativistic classical scalar fluid, obtaining energy momentum tensor

01 p0175 A69-10345

Radio galaxies and quasars X ray emissions, calculating radiation fluxes produced by scattering of synchrotron radiation quanta at relativistic electrons

03 p0500 A69-13079

Synchrotron radiation excitation in system of relativistic monoenergetic electrons rotating in cold magnetoactive plasma

03 p0476 A69-13383

Kinetic theory to determine wave increments propagating across magnetic field in system of relativistic electrons in cold plasma

04 p0635 A69-14555

Pulsations of relativistic and nonrelativistic narrow /paraxial/ electron beams with spatial axis curved according to various laws, deriving approximate descriptive equations

04 p0632 A69-14981

HF interaction of relativistic electron beam and plasma extended to include arbitrary variation of plasma density

04 p0637 A69-15046

Interplanetary relativistic electrons from solar flare events

04 p0650 A69-15528

Focusing of relativistic cylindrical electron beam in static axial electric and magnetic fields, using least action principle to derive trajectory differential equation

05 p0796 A69-15715

Cellulose nitrate sheets applicability in detecting cosmic ray relativistic heavy nuclei, considering etchable tracks

06 p0924 A69-17286

Monoenergetic relativistic electrons stream gyrating along cold magnetoactive plasma with pitch angle radiatively unstable with respect to synchrotron radiation

07 p1191 A69-18958

Maximum number of binary collisions for three particles with zero range forces in relativistic rescattering singularities studies

08 p1353 A69-19788

Synchrotron radiation from relativistic electrons in magnetosphere, calculating variation with frequency and height of lines of force

08 p1306 A69-20182

Rotational energy conversion of neutron star into relativistic electrons energy suggested by increasing period of pulsating radio source in Crab Nebula

09 p1591 A69-21454

Relativistic solar electron detection in interplanetary space during July 7, 1966 proton flare event, noting energy spectrum and time history

10 p1767 A69-23766

Energetic particles observed during proton flare noting relativistic electrons, protons to alpha particles ratio, low energy particles and bidirectional proton stream

10 p1768 A69-23785

Incoherent synchrotron radiation by relativistic electrons gyrating in cold magnetoactive plasma rederived, correcting errors

10 p1741 A69-23858

Frequency spectrum, time variations and polarization of source of synchrotron radio emission with expanding components flying apart at relativistic velocities

12 p2155 A69-26207

Radio emission from 18 galaxies noting accompaniment of optical spectrum emission and enhancement due to production of relativistic electrons in active nuclei

12 p2164 A69-27026

Radiative relaxation of relativistic particle distribution undergoing synchrotron radiation and reabsorption, discussing self absorbed radio source model

13 p2327 A69-27572

Synchrotron spectrum radiated by relativistic electrons below Razin cut-off, considering relation to radio spectra curvature of variable extragalactic sources

13 p2339 A69-27573

Galactic and relativistic and subrelativistic solar cosmic rays effect on electron production rate in ionosphere, detailing low energy SCR-atmosphere interactions

13 p2333 A69-28544

Radio galaxies and quasars X ray emissions, calculating radiation fluxes produced by scattering of synchrotron radiation quanta at relativistic electrons

14 p2509 A69-28761

Relativistic electron confinement within geomagnetic tail neutral sheet measured by Pioneer 7 deep space probe, confirming kinetic energy observations of IMP 1 satellite

14 p2433 A69-28934

Relativistic solar proton propagation fluctuation effects in interplanetary magnetic field during cosmic ray intensity increase

14 p2512 A69-29045

Relativistic behavior of electromagnetic multipolar nongravitating particle, discussing integrability of field equations

14 p2486 A69-29594

Quark detection in cosmic rays at sea level using scintillation counter and streamer chamber system

15 p2674 A69-30308

Shock wave structure dissipation in gaseous medium with microscopic particle velocities asymptotically approaching light velocity

17 p2958 A69-34145

Hydromagnetic wave-charged particle resonant interaction described by diffusion equation in momentum space, deriving diffusion coefficients and time evolution ultrarelativistic particle energy spectrum

19 p3424 A69-36335

Ultrarelativistic electron acceleration in Crab Nebula maintaining synchrotron spectrum, obtaining power from compressional motion damping, gyrorotation effect and pitch angle anisotropy removal

19 p3424 A69-36336

Anisotropy of relativistic cosmic ray electrons, considering electron exposure time to synchrotron effects, energy loss from inverse Compton effect, etc

20 p3593 A69-38145

Synchrotron radiation and reabsorption for rapidly moving cloud of relativistic particles, considering errors

21 p3772 A69-39513

Far IR radiation generation, considering incoherent sources, harmonic generators, electron tubes, relativistic electrons and quantum oscillators

22 p3982 A69-40669

Flux density variations of radio sources at 2.8 and 4.6 cm wavelengths, suggesting relativistic particles prolonged injection into optically thin sources

22 p4029 A69-40764

Radio galaxies differences from quasi-stellar objects indicating relativistic particles generation from violent explosions releasing energy comparable with powerful supernova

24 p4378 A69-42697

RELATIVISTIC PLASMAS

Alfven wave propagation in nonhomogeneous systems for relativistic MHD, discussing magnetic and velocity perturbations

02 p0290 A69-12254

Radiation intensity from system of monoenergetic relativistic electrons in plasma, discussing mass effect in coherent synchrotron radiation

03 p0500 A69-13407

Nonlinear interaction between waves in relativistic plasma, determining probability between transverse and longitudinal waves with different phase velocities

03 p0397 A69-13710

MHD waves, Landau damping and magnetosonic waves in homogeneous relativistic Vlasov plasma

04 p0636 A69-15043

Interactions in classical relativistic plasmas, discussing Lorentz invariant statistical mechanical formalism and phenomenological electrodynamics

05 p0801 A69-15770

Electromagnetic wave transmission and reflection at boundary of relativistic collisionless plasma, using Laplace transformation

06 p0968 A69-17783

Transverse waves instability in relativistic plasma, noting condition of isotropy and existence of electromagnetic waves

07 p1193 A69-19032

Corrections to relativistic plasma thermodynamic functions associated with electromagnetic field effect, demonstrating inapplicability of Darwin Hamiltonian to problem

08 p1359 A69-19953

Isoperimetric plasma thermodynamics problems, including plasma free energy and relativistic plasma density fluctuations energy

12 p2138 A69-26603

Relativistic electrons synchrotron radiation by calculating magnetoactive plasma permittivity tensor, determining normal waves polarization characteristics

13 p2315 A69-28451

Electrical conductivity tensor of many component collisional relativistic plasma in magnetic field and near equilibrium, expressing collisional part as momentum integral

14 p2503 A69-30000

Covariant dispersion relations for relativistic plasma oscillations for many component plasma in external magnetic field

16 p2816 A69-31633

Elastic collision operator for relativistic Lorentz gas converted to differential form using Fokker-Planck limit for anisotropy segments

16 p2817 A69-31668

Fire hose instability growth rate in relativistic plasma with anisotropic pressure, discussing importance to cosmic ray liberation and isotropization at galactic halo

24 p4376 A69-42660

Pulsars relation with supernovae remains and radiation patterns and fluxes analysis, ascribing radio emission to relativistic plasma

24 p4383 A69-42985

RELATIVISTIC THEORY

NT MANDELSTAM REPRESENTATION

Gravitation theory similar to special relativity and Newtonian theories, noting gravitational potential, metric and Newtonian charts

01 p0115 A69-10340

General theory of relativity tests with aid of satellites, considering gravitational red shift measurements, light deflection in solar field, etc

01 p0152 A69-10751

Gravitational fields in Hamiltonian formulation of relativistic theory of gravitation, noting geometrical aspects and equivalence to Einstein theory

02 p0280 A69-11715

Relativistic heat transfer formula and pressure definition in relativistic thermodynamics

02 p0352 A69-12253

Solar gravitational field influence on annual trigonometric parallaxes within relativistic theory framework

03 p0506 A69-13091

Covariant statistical mechanics for equilibrium thermodynamics

03 p0533 A69-13758

Electrodynamics of turbulent conducting media based on nonrelativistic MHD

03 p0479 A69-13972

Total conserved momentum-energy of electromagnetic interaction of system of point charges in Wheeler-Feynman theory, noting mass defect of connected system

04 p0631 A69-15058

Interaction between point charges in Wheeler-Feynman electrodynamics, noting impossibility of deducing momentum and energy conservation from variational principle

04 p0631 A69-15059

Variational formulation of Einstein general relativity related to geometric foundations, deriving Bianchi identities from general invariance property

05 p0791 A69-15632

Soviet book on relativistic astrophysics covering evolution and structure of universe with reference to galaxies, stars, quasars, relativity theory, gravitation theory, etc

07 p1216 A69-18960

Relativistic cosmological models with radiation and matter, analyzing conversion from radiation-like models to dust-like models

07 p1222 A69-19587

Solar atmosphere model calculations of solar oblateness, discussing flux difference and Dicke experiment on general relativity

08 p1383 A69-19899

Relativistic astrophysics, discussing quasar phenomenology, red shift cosmology and relationship with galaxies

08 p1388 A69-20222

Gravitational wave solution of Einstein field equations, deriving Ricci and Riemann tensors for Einstein space

08 p1352 A69-20755

Inertia of electrically charged spherical body calculated on basis of relativistic stress energy

08 p1352 A69-20756

General relativistic models of massive hot nonrotating stars with adiabatic temperature gradients consisting of ideal gas and radiation mixture

09 p1605 A69-22416

Hydrodynamic equations and conservation laws for nonviscous fluid in postNewtonian approximation of Brans-Dicke theory applied to gaseous mass dynamic instability

10 p1789 A69-24130

Total energy-momentum interaction of system with mass defect in Wheeler-Feynman theory of electromagnetic interaction, demonstrating existence of gauge invariance

11 p1915 A69-24326

Einstein interpretation of time in special relativity theory disputed by Fok dilatation theory

11 p1915 A69-24345

Space-time hypersurfaces representations of shock waves of relativistic MHD, discussing compressibility role in proving consistency with relativistic theory

11 p1928 A69-25246

Relativistic coherence theory of black body radiation in transparent medium, deriving expressions for second order correlation tensors by phenomenological quantum electrodynamics

11 p1920 A69-25563

Ferromagnetic transition in superdense nuclear matter and neutron stars, developing relativistic equation of state

11 p1965 A69-25564

Relativistic hydrodynamic equations for charged particles interacting in external scalar and gravitational fields, considering particle motion and scalar plasma dispersion

12 p2130 A69-26462

Relativistic kinematics of continuum motion by invariant derivatives of deformation measures, discussing rigid body motion in Born sense

12 p2189 A69-27116

Relativistic version of generalized gravitation theory, establishing models to describe gravitars having large gravitational mass defect and red shift

13 p2351 A69-27864

Solar gravitational field influence on annual trigonometric parallaxes within relativistic theory framework

14 p2516 A69-28773

Unlimited extrapolation into infinity to determine ranges of applicability of theories in relativistic cosmology noting paradoxes

14 p2516 A69-28867

Density perturbation mode in Lifshitz relativistic theory for expanding universe gravitational instability, adopting Lagrangian coordinate condition to eliminate physically meaningless solution

15 p2652 A69-30203

Extragalactic research to solve problems in cosmological and cosmogonic theory, including relativistic cosmology and observations

15 p2681 A69-30436

Classical and relativistic gravitation theories using harmonic coordinate system, interpreting Einstein equations for insular distribution of masses and applications in geodesy

15 p2596 A69-30573

Relativistic generalization for polar Sommerfeld rosette of Fourier series expansions by Lagrange and Bessel for particle motion in Keplerian field

16 p2811 A69-31607

Relativistic tensor theories of gravitation in flat space with Neumann and Newton forms of gravitational potential, deriving expressions to estimate differences perceived by observer

19 p3373 A69-36204

Newtonian and general relativistic orbits of point mass in inverse square law force field, noting radar determination of spacecraft orbits [AAS PAPER 68-098]

20 p3595 A69-37176

Galactic mass relativistic distribution calculated, considering spherically symmetric model differential rotation near sun

20 p3600 A69-37484

Relativistic solution by Landau procedure of initial value problem for one dimensional electron plasma wave coexisting with charged immobile background

21 p3778 A69-39579

Normal radial vibrations in Newtonian and general relativistic stellar objects and dynamic instability, determining modes and natural frequencies

22 p4014 A69-40142

Gravitational constant secular change from considering relativistic cosmology and galactic structure, deriving equations of Newtonian cosmology

22 p4017 A69-40173

Cosmological constant closed relativistic universe, showing constant-observational data inconsistency

22 p4029 A69-40757

Off-diagonal matrix elements of Breit interaction between singlet-triplet transitions for helium isoelectronic sequences

22 p3986 A69-40783

RELATIVISTIC VELOCITY

Cloud chamber for measuring specific ionization in relativistic region by muons in gases, using drop counting method

06 p0925 A69-17303

High energy particles obtained by accelerating plasma with frozen-in magnetic field to relativistic velocities during scattering of fast electron beam

08 p1358 A69-19805

Constant acceleration relativistic rocket flight from inertial rocket and terrestrial point of view compared, examining light flash transmission and arrival time

09 p1609 A69-21959

Relativistically corrected Vlasov equation solved as approximate solution of exact relativistic equations of motion for low density media

10 p1724 A69-22924

Magnetic mirrors, Doppler and relativistic effects, wave attenuation and radiation pressure during gyroresonant particle acceleration in nonuniform magnetostatic and HF fields

14 p2499 A69-29845

Relativistic corrections to particle distribution functions for high temperature plasma in thermodynamic equilibrium by integrating Gibbs distribution

14 p2499 A69-29847

Motion of medium at ultrarelativistic velocities in general theory of relativity, noting velocity minimum at radius limit

15 p2653 A69-31067

Relativistic exceptional wave propagating heat, computing speeds in direction orthogonal to heat vector

16 p2827 A69-32042

Structure of solitary waves propagating in collisionless plasma perpendicular to magnetic field, considering soliton wavefronts charge separation and relativistic velocity

17 p2922 A69-33696

Shock wave structure dissipation in gaseous medium with microscopic particle velocities asymptotically approaching light velocity

17 p2958 A69-34145

Interstellar minimum fuel and time optimal trajectories for acceleration limited rockets determined by applying Pontryagin maximum principle to relativistic rocket equations of motion

20 p3602 A69-37530

Nonlinear relativistic wave velocity distribution within spherical nucleus bounded by shock wave in superdense gas determined by Cauchy problem

22 p3827 A69-41114

Reduced flight time interstellar round trip propulsion system with relativistic velocity capabilities, discussing vehicle with solar sail and magnetic course reversal [AAS PAPER 69-388]

24 p4363 A69-42829

RELATIVITY

Approximate integrals of Einstein equations for dipole and quadrupole electromagnetic radiation

01 p0115 A69-10263

RELATIVITY

Asymptotic behavior of curvature and conformal curvature tensors on asymptotically flat space-time
01 p0116 A69-10393

Radiation problem in general theory of relativity investigated by momentum energy tensor, formulating criterion for gravitational radiation
01 p0116 A69-10435

Mach principle in scalar-tensor gravitation theory, discussing self energy calculations in canonical formalism for solitary neutral and charged point particles
01 p0120 A69-10858

Conservation laws of energy and linear momentum in general relativity formulated, noting application to radiating gravitational systems
01 p0121 A69-11286

Equatorial geodesic motion of rotating source in gravitational field, using exact empty space solutions of Einstein equations
01 p0157 A69-11289

Lorentz invariant theories of gravitation compared with Einstein general relativity tests with respect to one body motion observations
02 p0318 A69-12094

Invariant theory of gravitational radiation, using impulse energy tensor
02 p0332 A69-12835

Plane front gravitational waves analyzed on basis of gravitational radiation theory, discussing Einstein equations
02 p0332 A69-12836

Radio emission sources nature in terms of special relativity theory
03 p0499 A69-13078

Coordinates interpretation in Schwarzschild problem, projecting space of events by light beams onto Galilean system at infinity
03 p0506 A69-13090

Plasma equation of motion in external electromagnetic field analyzed as generalization of Bernoulli equation in relativistic MHD
03 p0476 A69-13385

General theory of relativity equations for homogeneous anisotropic three dimensional space with matter, deriving ultrarelativistic equation of state
03 p0466 A69-13423

Theory of relativity and role of time intervals in prediction experiments for rate of clocks
03 p0467 A69-13599

Electromagnetic and gravitational tensor fields in Riemannian space, generalizing Maxwell and Bel-Robinson tensors
03 p0467 A69-13755

Kepler third law application to radar determinations of astronomical unit of length in general relativity
04 p0657 A69-14698

General relativity confirmation, discussing mass equivalence and classical and new experiments such as gravitational shift, rotation effect on perihelion and precession test
04 p0661 A69-15165

Perturbation method determination of gravitation induction for quasi-static axisymmetric systems
04 p0661 A69-15190

Relativistic analysis of far zone electromagnetic scattering by conducting sphere moving through incident plane wave, calculating scattering cross section
04 p0559 A69-15212

Variational formulation of Einstein general relativity related to geometric foundations, deriving Bianchi identities from general invariance property
05 p0791 A69-15632

Equations of motion derived for incompressible and irrotational viscous fluids in special relativity
05 p0792 A69-15682

Energy definition in relativity for steady state universes, particularly Schwarzschild universes
05 p0792 A69-15683

Static formations in general theory of relativity and plankions
05 p0793 A69-15776

Relativity and stellar model stability, discussing energetics of quasars and gravitational collapse of supermassive stars
06 p1002 A69-17315

Monograph on classical electromagnetism via relativity, developing Maxwell equations from Coulomb law
07 p1180 A69-18404

Special and general relativity theories following Newtonian mechanics and gravitation theories, discussing metric tensor, sun oblateness and experiments with gyroscope spin axis precession
07 p1181 A69-18928

Relativistic systems and relativistic Hamiltonian systems defined by second order equation, discussing canonical transformations conserving vector field Hamiltonian character
07 p1182 A69-19331

Gravitational and inertial field equations of Maxwellian form leading to gravitation theory consistent with special relativity
07 p1182 A69-19408

Petrov classification of cylindrically symmetric space-time, giving Weyl conformal curvature tensor and surviving Ricci tensor components
07 p1182 A69-19409

Riemann metric leading to empty flat space from Rainich equations of already unified field theory
07 p1182 A69-19418

Axially symmetric static solutions of Einstein equations with singularities on z axis allowing for higher multipole moments in general relativity
08 p1350 A69-19783

Space-time evolution of one Petrov type into another, obtaining algorithm, flow diagram and discontinuous hypersurfaces results
08 p1350 A69-19789

Space time structure conditions derived for compatibility with simultaneous fulfillment of causality and equivalence principles
08 p1351 A69-19948

Dynamical friction on star in postNewtonian approximation of general relativity
08 p1386 A69-20072

Metagalaxy stationary model in terms of relativity theory, investigating radiation pressure balancing of gravitation as imaginary situation
08 p1389 A69-20263

Two gravitational fields theory of gravitation in general relativity for flat universe, discussing gravitational wave propagation
08 p1390 A69-20276

Relativistic kinematics analog model for deformable continua, introducing deformation gradient and tensors
08 p1416 A69-20693

Einstein space time concepts for unified formalism of matter interactions from elementary particles to astronomical bodies, discussing relativity theory
08 p1352 A69-20730

General theory of relativity and tensor field equations relating space time characteristics to local properties of matter and vacuum, using Palatini Lagrangian method
09 p1593 A69-21572

Kerr type metric empty space times starting from fixed reference system and associated Killing vectors
09 p1540 A69-22050

Mass displacement in light path due to interaction with gravitational wave accompanying light pulse, discussing general relativity tests for time delay and starlight bending
09 p1540 A69-22081

Time delay, red shift, equivalence principle, light deflection and perihelion motion tests of general relativity with Jupiter probe
09 p1597 A69-22089

Clock paradox of Einstein special theory of relativity, reviewing work of Prokhovnik, Schlegel and Arley
10 p1772 A69-22865

Relativity theory examined critically, discussing spherical space, Lorentz transformation and Einstein conclusions
10 p1725 A69-23317

Radial motion of uniform spheres in general relativity, finding conditions for initially inward motion to reverse/bounce/
10 p1779 A69-23607

Book on relativity and cosmos, space and time in physics, astronomy and cosmology covering theoretical and empirical research
10 p1784 A69-24019

Maxwell theory basis of special theory of relativity, discussing universal length constant
11 p1920 A69-25562

Covariant equations of motion of body of variable mass in general relativity, considering Schwarzschild field, rotating mass field and Einstein static universe
11 p1965 A69-25744

Singularity of Schwarzschild spherically symmetrical solution to Einstein equations of general relativity theory, exemplifying Lemaitre coordinate system
12 p2129 A69-25974

Elastic stress created by perpetual motion of isotropic elastic solid in static space-time
12 p2130 A69-26283

Equations of state for continuous media, using variational principles within framework of relativity theory
12 p2131 A69-26972

Exterior field equations for radiating spheres with zero limb darkening in relativity and Bondi coordinates, determining radiative flux and pressures
13 p2339 A69-27566

Einstein theory of space and time analyzed with emphasis on inertial systems
13 p2297 A69-27633

Icarus radar and optical observations analyzed to verify general relativity predictions using Schwarzschild metrics and to estimate solar oblateness, Mercury mass, etc
13 p2350 A69-27823

Critical parameters of isothermal quasi-degenerate white dwarfs calculated by energy method, allowing for relativity theory error and neutron irradiation effect
13 p2351 A69-27871

Einstein second postulate concerning invariability of light vector in vacuum experimented for validity, using earth and moon as light rays launching and reflecting media
13 p2354 A69-28650

Radio emission sources nature in terms of special relativity theory
14 p2509 A69-28760

Coordinates interpretation in Schwarzschild problem, projecting space of events by light beams onto Galilean system at infinity
14 p2516 A69-28772

Philosophical problems of Einstein theory of gravitation and relativistic cosmology - Conference, Kiev, June 1966
14 p2482 A69-28856

Einstein general theory of relativity, discussing evolution and disunity among physicists and philosophers on universal relativity of mechanical motion
14 p2483 A69-28857

Observed values concept applied to general relativity theory, considering gravitational energy problem
14 p2483 A69-28858

General relativity theory philosophical substance and meaning, discussing Einstein formulations and bases of classical, relativistic and quantum physics
14 p2483 A69-28859

Invariants method and applications in classical and relativistic physics emphasizing theory of relativity, physical and mathematical theories relations and group theory applications
14 p2484 A69-28860

Categorical structures in theoretical thinking for philosophical fundamental physical laws analysis, including space-time concept changes in classical physics and in theories of relativity
14 p2484 A69-28861

Macroscopic space-time meaning in theoretical physics in terms of mathematical definition and philosophical concept
14 p2484 A69-28864

Space-time interpretation of static Einstein universe model and Friedmann space with variable positive curvature
14 p2484 A69-28865

Asymmetry causes on cosmogenic scale in view of symmetry in small space-time regions/microworlds/determinable within framework of Einstein theory
14 p2516 A69-28866

Fundamental principles of thermodynamics incorporation into general relativity and geometrodynamics, interpreting entropy growth in terms of space dynamics
14 p2538 A69-29019

Newman-Penrose formalism for conserved quantities in general relativity, giving group theoretic interpretation
14 p2486 A69-29450

Asymptotic expansions for Einstein-Maxwell field representing gravitational and electromagnetic radiation from finite source of matter and charge
14 p2486 A69-29635

Relativity theorems applied to collapsing stars and expanding universe noting limitations of general relativity from prediction of singularities
15 p2694 A69-30854

Motion of medium at ultrarelativistic velocities in general theory of relativity, noting velocity minimum at radius limit
15 p2653 A69-31067

Newtonian invariant mechanics, giving inertial interpretation of gravitation and Hubble expansion of universe
15 p2654 A69-31214

Exact static exterior and interior solution of Einstein equations for thick plane plate, discussing surface energy-momentum tensor
15 p2654 A69-31477

Far field energy radiated by two body system using approximation method in general relativity and Minowski gravitation theory
16 p2812 A69-31836

Electromagnetic cavity resonances in rotationally induced gravitational field by relativistic approach
16 p2812 A69-32048

Einstein field equations solutions generated via static spherically symmetric mass and charge distributions
16 p2812 A69-32053

Monograph on creation and evolution of physico-theoretical concepts of space, time and matter
16 p2812 A69-32110

Conservation laws in general relativity, discussing Noether theorem, Bianchi identities, superpotential, Einstein-Klein theorem, momentum method and outgoing radiation
16 p2813 A69-32362

General relativity theory test using earth orbital motion and solar gravitational field effects on pulsars frequency stability
17 p3037 A69-33646

Particle and light motions in Schwarzschild field, discussing acceleration beyond speed of light in reference /S/ frame of time independent coordinate systems
17 p3006 A69-33741

General relativity theory applicability to cosmology, Einstein principle of equivalence and contradicting arguments of relativistic cosmology
18 p3200 A69-34997

Static formations in general theory of relativity and plankions
18 p3173 A69-35029

Einstein gravitational field equations series expansion in powers of gravity constant by Bondi method for gravitational waves
18 p3173 A69-35146

Cosmological model based on inertia and relativity principles, considering scalar gravitational and electrostatic potential, light velocity, gravitational interaction and observed galactic red shift
18 p3206 A69-35470

Group properties of adiabatic motion equations of medium in relativistic hydrodynamics, including solutions of subgroups applicable to multiple particle production
19 p3301 A69-36843

Translating Tolman problem of cosmic dust motion into centrally symmetrical reading system, showing relativistic and Newtonian motion laws coincidence
20 p3594 A69-37079

Negative time interval implications for meta particle at superluminal velocity with respect to two reference frames, noting causality paradoxes
20 p3598 A69-37412

Singular electromagnetic field rectilinear and elliptical polarization in general relativity, calculating light plane rotation in Schwarzschild space
20 p3576 A69-37431

Cosmic matter density and velocity in expanding universe with negative curvature within Einstein-Friedman theory
20 p3599 A69-37472

General relativity effects on isotropic stars evolution, discussing dynamic stability and white dwarfs
21 p3798 A69-38540

Q switched laser pulse propagation in nonlinear laser amplifier using bitemporal relativity theory, deriving five dimensional wave equation revealing superlight signal existence
21 p3770 A69-38839

Spherically symmetrical T models of dust matter yielding method for obtaining maximum total mass effect in general relativity theory different from Friedman closed model
21 p3803 A69-38994

Relativistic thermodynamics using entropy principle to find restrictions on constitutive functions
22 p4050 A69-40451

Matter surface distribution in general relativity, deriving matching conditions
22 p3982 A69-40753

MHD of ideal charged gravitating fluid by variational principle, considering Einstein general relativity theory
22 p3992 A69-41056

Autometric gyro for satellite general relativity experiments, particularly earth orbit measurement of Lense-Thirring precession
23 p4162 A69-41543

Conjugate points along lightlike geodesics in general theory of relativity, deriving existence from vector field matrix properties and Ricci curvature
23 p4213 A69-41724

Field theories of gravitation and experimental survey of general relativity theory, discussing red shift, Mercury orbit rotation, light deflection, solar oblateness, etc
23 p4192 A69-42330

Einstein general theory of relativity and apparatus for gravitational radiation detection, discussing Dicke experiments and Riemann tensor measurement
23 p4192 A69-42331

Planck-Einstein equation derivation in special theory of relativity, discussing relativistic measurement of thermodynamic values in terms of Lorentz transformations
24 p4349 A69-42748

Particle creation and quantized fields in expanding universe using covariant generalization of special relativistic free field equations, studying zero- and arbitrary-spin particles
24 p4352 A69-43193

General relativity uniqueness established by postulating derivability of equations of motion from gravitational field equations
24 p4365 A69-43668

RELAXATION [MECHANICS]

NT SPIN-LATTICE RELAXATION

NT STRESS RELAXATION

Shock front structure in radiative relaxation region in atomic H, calculating Lyman continuum effects
01 p0122 A69-10125

Anisotropic two component plasma relaxation taking into account dynamic shielding collective effects
01 p0134 A69-11419

Long term creep characteristics of metal structures from short duration relaxation tests, summarizing data on rheologically stable materials
02 p0337 A69-11626

Computer models of one dimensional stellar problems, discussing fast relaxation of unsteady state to Fermi-Dirac distribution and slow relaxation to thermal equilibrium
02 p0323 A69-12274

Automatic determination of relaxation and retardation spectra for linearly viscoelastic materials from experimental data using simple numerical techniques
02 p0348 A69-12605

Electrons relaxation caused by ionization and recombination in nonequilibrium plasma, using Kerrebrock model
03 p0477 A69-13609

Relaxation mechanism of low temperature internal friction peaks in niobium quenched to room temperature
03 p0447 A69-13617

Relaxation effect in epitaxial silicon MOS structures, formulating differential equation for doping distribution in epitaxial layer
03 p0490 A69-13947

Relaxation induced self oscillations during combustion of gunpowder in semiclosed volume, noting combustion instability
04 p0686 A69-14987

Multiphonon orbit lattice relaxation of excited states of rare earth ions in crystals, using results to design quantum electronic devices
05 p0774 A69-16318

Mechanical relaxation of poly 4 methyl pentene 1 at cryogenic temperatures, discussing temperature dispersion curve and secondary absorption associated with thermal motion of side chains
05 p0785 A69-16492

Vacancy relaxations in bcc crystals using energy dependence on radial displacements from defect of nearest neighbor sets, discussing crystal size and shape
05 p0809 A69-16529

Nonisotropic relaxation of Boltzmann gas in homogeneous space, expressing collision integral moments in terms of distribution function moments for any molecule
06 p0910 A69-17347

Subpicosecond structure in output spikes of Nd-glass laser observed by employing two photon fluorescence displays inside laser cavity
06 p0938 A69-18231

Relaxation theory of highly ionized hydrogen plasma noting applications to stimulated emission, radiation source development and electromagnetic radiation amplification
07 p1191 A69-18996

Vibrational relaxation effects on laminar boundary layer velocity profiles and temperature and on layer thicknesses and wall heat flow downstream of shock wave
08 p1303 A69-20269

Interfacial charge relaxation oversteability in tangential electrical field, discussing electromechanical

polarization surface waves propagation and dielectrophoretic orientation of liquids in zero gravity space
08 p1353 A69-20792

MGD stagnation point flow, discussing relaxation region influenced by magnetic field
09 p1543 A69-21300

Dielectric relaxation for analysis of defect structure, microstructure, surface behavior, structural changes kinetics and environmental effects in insulators and semiconductors
09 p1559 A69-22307

Quasi-linear relaxation of electron beam in magnetoactive plasma, noting instability of plateau in velocity distribution function
09 p1553 A69-22659

Relaxation method for configurations and energies of atoms and stress induced crack opening displacements in crystalline solids
10 p1796 A69-23067

Transient response of MOS capacitance caused by mechanisms dependent on electric field distribution between silicon and oxide
10 p1744 A69-23176

Argas test loop as model for MHD power plant study, discussing component testing including channel preionization and relaxation experiments
10 p1673 A69-23478

Relaxation phenomena in ionization process in argon shock front structure, using EM and pressure driven shock tube to drive high speed shock waves
10 p1726 A69-23685

Damping of solid state laser relaxation oscillations in power output due to diffusion of excitation
10 p1706 A69-24079

Electron-ion temperature relaxation near interface of two semiinfinite nonmagnetized different temperature plasmas brought into thermal contact
11 p1923 A69-24296

Relaxation oscillations in field ionized epitaxial n-GaAs Gunn oscillators on seminsulating substrates, discussing recombination of excess electrons and holes
13 p2227 A69-27236

Relaxing gas nonequilibrium flow in plane expansion, comparing partial differential equations with method of characteristics
13 p2244 A69-27322

Wave damping in plasma, developing Boltzmann analysis of electron mode dispersion relations involving momentum transfer and relaxations of electron-ion temperature and anisotropy
13 p2305 A69-27377

Love wave amplitude data satisfying earth model with intrinsic internal friction at depths assumed due to single thermally activated relaxation
15 p2596 A69-30624

Electron temperature relaxation in shock heated Ar plasma, measuring plasma microwave radiation
15 p2663 A69-30995

Lynden-Bell statistical mechanics of relaxation in collisionless one dimensional stellar system, discussing low energy particles distribution
16 p2862 A69-32376

Far and near field solutions for one dimensional unsteady flows in general inviscid relaxing gas, obtaining flow field structure by matching techniques
17 p2957 A69-33599

Transformed kinetic equation used to study relaxation of quantum oscillator to thermodynamic equilibrium state
18 p3152 A69-35126

Rotating mirror Q switched carbon dioxide laser for high peak powers, analyzing pulse structure and duration dependence on collision induced relaxations
19 p3338 A69-36694

Weak shock wave structure in temperature relaxation media determined using theory of sound absorption in fluids
19 p3301 A69-36842

Modified model for vibration-dissociation relaxation coupling phenomena in nonequilibrium high temperature gas flow, discussing parameter U variation with kinetic temperature
20 p3514 A69-37208

Thermal perturbation propagation in nonlinear medium, considering thermal relaxation effects
22 p4051 A69-40712

Numerical analysis of plane Couette flow of rarefied binary gas mixture using relaxation type kinetic model equations, discussing slip velocity, friction coefficient, etc
22 p3931 A69-40778

MHD waves attenuation in ionosphere due to gyrorelaxation, reducing analysis to determination of anomalous absorption of acoustic waves
23 p4155 A69-41841

RELAXATION [PHYSIOLOGY]

RELAXATION [PHYSIOLOGY]

Temperature dependence of action potential, isometric tension development and relaxation rate of mammalian myocardium at low temperature, considering Ca ions role

23 p0492 A69-42060

RELAXATION METHOD [MATHEMATICS]

Optimum overrelaxation factor in diagnostic and forecast calculations

03 p0458 A69-13033

Digital computer solution of Laplace equation using dynamic relaxation method to introduce dynamic terms into basic equation

05 p0697 A69-15713

Relaxation method for inversion of full radiative transfer equation, determining temperature profile in atmosphere from outgoing radiance

[JPL-TR-32-1351]

06 p0922 A69-17805

Dynamic relaxation method for elastic deformation in mirrors, using tensor equations of elasticity in nonorthogonal curvilinear coordinates

12 p2187 A69-26890

Monte Carlo relaxation method for physically self consistent model stellar atmospheres, discussing stability, accuracy and convergence of solution

19 p3425 A69-36337

Finite element relaxation method for computing stress distribution in thin walled structure, considering computer program, storage and solving time

21 p3843 A69-39313

RELAXATION OSCILLATORS

Negative differential resistance effect producing relaxation type oscillations in n-type gallium arsenide

01 p0138 A69-10557

Relaxation oscillations in Si p-n junction diode reverse-biased into avalanche calculated by computer program

07 p1101 A69-18651

Lasing characteristics of Nd-glass laser when cavity radiation varies with time, discussing rapid damping of relaxation oscillations of laser intensity

08 p1327 A69-21024

RELAXATION TIME

Limited space-charge accumulation mode efficiency for gallium-arsenide diodes, taking into account electron-lattice relaxation processes

01 p0137 A69-10321

Electron thermal relaxation length in positive column determined by plasma parameters variations in small amplitude moving striations

01 p0127 A69-10341

Vibrational relaxation of diatomic gases behind shock waves, with variable heat bath temperature extended to constant enthalpy and constant total enthalpy conditions

01 p0061 A69-11204

Relaxation rates of water vapor laser lines obtained with split discharge laser

05 p0771 A69-15810

Relaxation time of carbon dioxide laser levels as function of water vapor, CO and Xe gas pressure measured by afterglow pulse gain technique

[IEEE PAPER G-1]

05 p0774 A69-16314

Upper limit of nonradiative relaxation time between specific states of absorption bands and fluorescence state emitting R lines in ruby laser

05 p0777 A69-16335

Proton spin-lattice relaxation time in dilute liquid and gas solutions of orthohydrogen in parahydrogen, noting dependence on temperature, density and composition

06 p0961 A69-17141

Settling time estimation method for class of time varying feedback control systems of linear, nonlinear and multivariable natures

06 p0902 A69-17399

Absorption and amplification of sound in many valley semiconductors in strong electric field, noting dependence on electron heating and relaxation times

07 p1199 A69-18681

Trivalent iron doped andalusite crystals dielectric and mass properties, investigating spin-lattice relaxation, cross relaxation times and inversion ratio

[IEEE PAPER C-2]

07 p1150 A69-19049

Optical excitation process of energy states by light pulses of short duration compared to relaxation time, predicting Raman echoes

[IEEE PAPER H-3]

07 p1152 A69-19062

Saturable dye filters used with ruby lasers, discussing relaxation time, residual absorption source and transient spectral hole burning

07 p1155 A69-19089

Relaxation times of carbon dioxide laser levels induced by radiation

09 p1515 A69-21488

Vibrational relaxation times in pure O and in O with methane impurity determined with acoustic absorption measurements

09 p1542 A69-21721

Carbon dioxide laser upper level rotational relaxation rate constant measurement, observing CW gain

10 p1701 A69-22948

Ultrashort light pulses nonlinear amplification in medium with finite transverse relaxation time and linear radiation losses

10 p1702 A69-23139

Excitation and ionization relaxation of cesium seeded argon gas computed for stepwise increase of electron temperature

10 p1732 A69-23444

Magnetic field induced nonequilibrium argon plasma ionization relaxation processes obtained with allowance for flow parameters change in relaxation zone

11 p1922 A69-24225

Chapman-Enskog procedure extension for binary gas mixtures, obtaining diffusion equation from revised relaxation time of component velocities

11 p1921 A69-24308

Electrical conductivity of space charge surface layer in semiconductors with many-valley energy spectra of current carriers, discussing scalar relaxation time

11 p1937 A69-24915

Carbon dioxide-N-He laser amplifier, noting gain time dependence and thermal relaxation rate after gas heating

11 p1899 A69-25054

Mass point system moving in gravitational field, discussing statistical mechanics, relaxation time and evolution of stellar systems

14 p2530 A69-29987

Weak shock waves relaxation time and amplitude and acoustic velocity as functions of thermorelaxing media

15 p2590 A69-30103

Small amplitude motions of plane interface between fluids stressed by initially perpendicular electric field, modeling fluids as ohmic conductors

16 p2811 A69-31667

Carbon dioxide dissociation relaxation times measured in shock tube at 1900-2400 K and 1.5-2.5 km/sec

16 p2766 A69-31910

Ultrasonic velocity dispersion in para hydrogen and mixtures with He, Ne and Ar at 300 K, obtaining rotational relaxation times

16 p2815 A69-32791

Gas ionization relaxation times from ion density profiles in shock tubes at low Mach numbers, discussing influence of impurities on ionization process

18 p3116 A69-34451

Shock wave interaction and bow shock wave establishment near sphere in presence of ionization relaxation, using time resolved schlieren photography

19 p3450 A69-36361

Relaxation time influence on discharge coefficient of sonic nozzle of revolution, considering expanding polyatomic gas problem

19 p3241 A69-36721

Relaxation time for rotational transitions of linear polyatomic carbon dioxide calculated by using Brout theory for diatomic H rotational relaxation calculations

20 p3581 A69-38121

Coherent light emission by molecules excited by laser pulses having duration comparable to active medium polarization relaxation time

21 p3737 A69-38999

Absorption and fluorescent spectra, relaxation times and quantum efficiencies measured for glasses doped with trivalent erbium, reviewing spectroscopic parameters involved with laser effect

22 p3962 A69-40476

Molecular transport equations of dilute gases, considering relaxation time spectrum, obtaining kinetic equations and correlation function expressions for transport coefficients

23 p4193 A69-41512

RELAY

Self and forced oscillations in multivariable relay control system, considering relays with hysteresis and dead band and stability of periodic states

12 p2049 A69-26084

RELAY SATELLITES

Communications system considerations for lunar libration point relay satellite to support Apollo lunar far side mission

03 p0388 A69-13180

Aeronautical satellite system to relay communications at VHF or L band frequencies from aircraft flying over oceanic routes

03 p0464 A69-13235

Low altitude satellite relay system, discussing modulation, antennas, frequency plans, telemetry, tracking, command and earth terminals

03 p0391 A69-13241

Orbiting Data Relay Network communications system provides continuous wideband communication between ground and earth orbiting spacecraft via synchronous satellite repeaters

[AIAA PAPER 68-432]

09 p1455 A69-21989

Data relay satellite concept, discussing orbits, communications between widely separated earth stations, and satellite tracking, telemetry and commanding

11 p1839 A69-25295

Data relay satellite systems for support of NASA R and D missions, discussing communications between satellites and to mission control

11 p1839 A69-25296

Technological feasibility of satellite based global data relay service for small users

12 p2028 A69-25949

Libration point relay satellites for continuous communication link between earth and lunar far side, discussing trajectories and halo orbit stationkeeping

15 p2680 A69-30188

Tracking and Data Relay Satellite System with synchronous orbit satellites to relay data between low altitude earth orbital spacecraft and mission control centers

23 p4120 A69-41755

Tracking and data relay satellite system (TDRSS) compared to ground based mission support, considering altitude coverage capability, economy and communication requirements

23 p4120 A69-41756

RFI effects of earth based emitters on operation of geosynchronous satellites for data relay from near earth orbiting satellites, noting frequency assignments

23 p4120 A69-41757

Real time telemetry, tracking and command links by synchronous satellite relay, describing ATS-Nimbus E S-band experiment

23 p4121 A69-41759

Telecommunications performance of two lunar relay satellite system /LRSS/, determining operation capabilities with Apollo communications system

23 p4129 A69-42508

Distributed communications for earth orbiting global satellite network defined parametrically, describing relay/switching and terminal station satellites

23 p4130 A69-42515

RELIABILITY

NT AIRCRAFT RELIABILITY

NT CIRCUIT RELIABILITY

NT COMPONENT RELIABILITY

NT SPACECRAFT RELIABILITY

NT STRUCTURAL RELIABILITY

Stratospheric air sampling reliability instrumentation as part of radioactivity fallout detection program

05 p0766 A69-16751

Bayesian reliability growth model with random variable parameters, discussing multimode failures

09 p1504 A69-21912

Iterative method for numerical solution of linear algebraic equations for stationary probability distributions in queueing and reliability theory

10 p1721 A69-23691

Reliability functions and cycles number before breakdown of finite automaton with account of randomness of malfunctions, structure and input signal distribution

13 p2224 A69-27250

Human performance reliability, testing mathematical model application and implications of time to first error concept by vigilance task

18 p3097 A69-34478

Operational system effectiveness information for reconnaissance drone system including test flights, discussing application to reliability and maintainability in project management

18 p3232 A69-34505

System effectiveness for reliability and maintainability achievement, analyzing people, organizations, value systems and accomplishment criteria in development program

19 p3455 A69-36044

Generalized limit theorem for reliability replacing Drenick exponential theorem

20 p3547 A69-37068

Integer programming method for optimizing constrained reliability problems with several system failure modes

20 p3504 A69-37069

Surrounding noise effects on quick check audiometry test reliability, discussing pathological effects

21 p3725 A69-39286

- Reliability demonstration testing equipment, describing temperature chamber design and instrumentation, overall facility planning, etc
22 p3954 A69-40034
- RELIABILITY CONTROL**
QUALITY CONTROL
- RELIABILITY ENGINEERING**
- Electronic packaging techniques for long life spacecraft, discussing effects of mechanical and electrical stress, temperature cycling, vacuum, radiation and contamination
01 p0038 A69-10145
- Reliability analysis of technological systems, determining characteristics as distribution function of time to specified number of failures
01 p0085 A69-10210
- Power spectral density method of random loads analysis applied to V/STOL aircraft structural analysis, discussing statistical distribution
01 p0168 A69-10407
- Monte Carlo simulation procedure synthesizing probability distributions of reliability parameters with individually exponential components
01 p0036 A69-10707
- Analytical reliability ratio to operational reliability for airborne equipment taking into account electrical and thermal aspects
01 p0011 A69-11069
- Reliability of operational satellite systems consisting of two single purpose satellites in interchangeable orbits, discussing outage and replacement
02 p0333 A69-11805
- Book on laws of failures in technical equipment with emphasis on quantitative description and practicality of reliability theory, discussing redundancy problems
03 p0433 A69-13009
- Solid state power supplies for turbine control and instrumentation, discussing control system manufacturer requirements and reliability specifications
03 p0368 A69-13432
- Fluid stability, viscosity, compressibility, gas solubility and lubricating properties determination for high temperature hydraulic systems
04 p0550 A69-14662
- Reliability in air and space travel, quality/ quantity aspects, problems and cooperation
04 p0606 A69-14803
- Reliable computation in computing systems designed from unreliable components, considering two models for component malfunctions
04 p0569 A69-15456
- Soviet book of statistical and mathematical tables for calculation, analysis and control of reliability
04 p0608 A69-15540
- Defect localization in complex plants applied to damage cause determination and economic criteria
05 p0767 A69-15765
- Reliability in aeronautics and astronautics, discussing safety, economic cost of technical delays and effect on public, air transport, design, development, testing, utilization, etc
07 p1053 A69-19287
- System reliability influence on air accidents resulting from pilot errors, unforeseen obstacles, breakdowns and atmospheric effects
07 p1054 A69-19288
- Fail-safe goals, design criteria, analytical methods and test procedures to achieve reliable damage tolerant dynamic rotating parts for V/STOL and helicopter transports
[AIAA PAPER 69-215] 07 p1237 A69-19569
- Computer program reliability enhancement, discussing significance of underestimation
08 p1278 A69-19845
- Operating and storage conditions effects on reliability of Pd-Ag thick film resistors
08 p1283 A69-20131
- Reliability effect on operating costs of satellite communications system ground stations, calculating annual cost of channel with continuous time carry-over
08 p1276 A69-20586
- Microcircuits, integrated circuits and other monolithic solid state circuits failure mechanisms examined and applied to reliability methodology
[AGARDOGRAPH-114] 08 p1292 A69-20987
- Reliability in electronics - Conference, Budapest, October 1968, Volume A
08 p1321 A69-21098
- Computer programs for systems statistical reliability characteristics using reliability tests and time to failure data, giving optimal breakdown probability functions
08 p1322 A69-21101
- Assessing cost effectiveness of reliability and quality of semiconductor products, using mathematical models
08 p1292 A69-21102
- Reliability of individual components of multicomponent systems under variable loads, using asymptotic distribution of minimal values
08 p1322 A69-21103
- Reliability in electronics - Conference, Budapest, October 1968, Volume D
08 p1292 A69-21105
- Aircraft reliability under cyclic loads in flight taking into account stress fluctuations
08 p1322 A69-21106
- Reliability terms for electrical apparatus, equipment and systems, indicating need for international standardization
08 p1292 A69-21108
- Process control data in acceptance procedures for high reliability electronic components, discussing supplier and user cooperation
08 p1293 A69-21110
- Reliability in electronics - Conference, Budapest, October 1968, Volume B
08 p1293 A69-21111
- Second breakdown mechanisms in transistors, describing electrical and physical characteristics and effects of design and structural defects on resistance to initiation
08 p1294 A69-21120
- Thermionic converter metallography relationship between materials and fabrication methods and reliable performance life
09 p1439 A69-21824
- Electric propulsion design, considering effects of weight, impedance matching, beam voltage regulation and operating point variations in formulating system mass and reliability
[AIAA PAPER 69-254] 09 p1569 A69-21879
- Reliable fluid transmission systems by brazed joints, noting base and filler metals, fitting designs and various processes
09 p1507 A69-22333
- Metallic systems microbonding and joining reliability, noting electron and laser beam welding and deposited film connections
09 p1510 A69-22348
- Tests and quality control equipment used in German aeronautical and astronautical industries
09 p1513 A69-22565
- Reliable operation duration distribution shown to be arbitrary for standby system consisting of basic device and n devices in nonloaded standby condition
09 p1513 A69-22676
- Structural reliability tests using photoelasticity and associated techniques, discussing computer methods, materials research, etc
09 p1479 A69-22734
- Gunn diode reliability improvement by using device structures preventing high field domains from reaching anode
09 p1470 A69-22788
- Algorithm in fault detection and isolation, discussing test optimization for complex systems or structures subject to failure
10 p1698 A69-22978
- General and classical statistical techniques for cutting effectiveness and operational reliability of cutting fuses
10 p1749 A69-23004
- Saturn 5 holddown and service arm electrical system design program optimized by integrating reliability and maintainability at initial design phase
[AIAA PAPER 69-309] 10 p1670 A69-23043
- Optimum calibration interval program for determining test equipment calibration frequencies on basis of mean time between failures and acceptable reliability levels
10 p1699 A69-23288
- Reliability characteristics of service life determination, noting exponential distribution of failure time value
10 p1662 A69-23319
- Hybrid fluidic pressure regulator combining vortex amplifier and confined-jet amplifier with performance upgrading moving metering element, noting greater efficiency and reliability
10 p1639 A69-23560
- Statistical, economic and psychological aspects of aeronautical and astronautical profitable reliability in relation to operation, using mathematical model
10 p1700 A69-23839
- Reliability behavior of information transmission between transmitter-receiver pair in network of crasure channels without decoding and recoding at nodes
10 p1657 A69-23865
- Spacecraft electronic components design, environmental and reliability criteria including weight and power
11 p1843 A69-24340
- Solid logic technology /SLT/ computer circuits, discussing IBM 360 computer reliability, failure analysis information retrieval, SLT module and failure rate
11 p1843 A69-24341
- Large scale integration applications to avionics including self testing, self repair, cost factors, etc
11 p1845 A69-24530
- Electronic systems and component reliability in space, considering electric parameter variation effects
11 p1848 A69-24867
- Low energy charged particle detectors reliability, analyzing windowless electron multipliers and effects of secondary emission layers on sensitivity
11 p1848 A69-24868
- First excursion failure survival probability of randomly excited structures, considering single degree of freedom linear oscillator under Gaussian white noise
11 p1990 A69-25505
- High pressure vessels welding reliability improvement, discussing edge profile, air expulsion from vessel and shielding atmosphere
11 p1892 A69-25670
- Reliability-quality control - Conference, Buffalo, May 1968
12 p2100 A69-25845
- Statistical reliability tools and methods, graphs and charts, estimations, prediction techniques and demonstrations
12 p2101 A69-25847
- Reliability improvement influence on life cycle costs of high volume piece of military/commercial equipment
12 p2101 A69-25848
- Configuration management, establishing uniform and mutually supporting methods of configuration identification, control and accounting for systems and equipment
12 p2192 A69-25849
- Computer reliability by development and methodical employment of self repair techniques
12 p2034 A69-25941
- Reliability-quality control - Conference, Ontario, April 1969
12 p2101 A69-25969
- Reliability planning role in directing business functions to quality efforts integration in engineering, production and testing of electronic equipment
12 p2102 A69-25971
- Integrated computerized reliability monitoring program for detecting aircraft systems and components performance trends and optimizing cost, utility and response
12 p2055 A69-25972
- Digital computer-aided reliability engineering methods for electronic equipment design and analysis
12 p2037 A69-25973
- Dynamic properties and reliability of linear time invariant multivariable control systems
12 p2051 A69-26093
- Digital computer redundancy, analyzing triple modular redundancy in Saturn vehicles and quad design in primary processor and data storage for OAO
12 p2034 A69-26567
- Redundant systems reliability prediction for single mission in standby mode or without standby, using failure states concept and birth-death equations
12 p2102 A69-26569
- Lens shutters durability, analyzing break-in effect, cock-and-release cycles and cause of failures
12 p2094 A69-26600
- Shock pulse criterion limitations and HF transients technique for design and tests of structures and components
12 p2182 A69-26731
- Probability analysis by methods simplifying calculations or providing bounds on reliability of complex system
12 p2103 A69-26751
- Transistorized amplifiers reliability estimated from step by step failures during operation in intense external environment
12 p2043 A69-26886
- Vibration machine as vibration environment simulation for product reliability testing, analyzing spectrum of acceleration waveforms
12 p2060 A69-26940
- Mathematical relations presented for parameters of technological, transport and information systems reliability and life expectancy
13 p2268 A69-27436
- Failure engineering analysis of electromechanical switching devices, discussing preanalysis planning, open-ended data sheets, etc
13 p2231 A69-28043

Relay reliability cost vs failure cost in spacecraft applications
13 p2231 A69-28044

Electric relays reliability requirements, discussing specifications, minimum current, load and frequency effects, etc
13 p2231 A69-28045

Reliability analysis of technological systems, determining characteristics as distribution function of time to specified number of failures
14 p2453 A69-28747

Reliability and efficiency improvements for thermionic converters at JPL, giving failures analyses
14 p2397 A69-29175

Aircraft hydraulic equipment ultrafine filters effect on component life and system reliability
15 p2552 A69-30069

Unoccupied space utilization in aircraft compartments due to microminiaturization, considering reliability enhancement of electronic equipment
15 p2576 A69-30353

Engineering models for wearout reliability prediction in dynamical systems subject to random loading, demonstrating practical and statistical methods
15 p2705 A69-30366

Weapon systems integrated testing, determining test statistics as function of subsystems utilizing Neyman-Pearson confidence levels
15 p2619 A69-30400

Cost effectiveness of test selection when statistical distribution of load and strength are known, presenting curves for equally dispersed normal parameters distribution
15 p2720 A69-30401

Rate gyro life and reliability, discussing gas bearings separating rotor from stator by thin gas film with conventional oil film characteristics
15 p2608 A69-30410

Space equipment reliability, discussing manufacturing defects, design faults, component failures, maintenance, overloads, accidents and operating errors
15 p2624 A69-30817

Spacecraft electronic component reliability policy based on preferential lists, selection programs and component management
15 p2624 A69-30818

Satellite circuit assembly reliability achievement by high reliability components, redundancy and optimal utilization
15 p2624 A69-30819

Management and scientific computer reliability difference, considering circuits, component assembly, software, maintenance, etc
15 p2624 A69-30821

Space electronic component reliability, considering suppliers and laboratory-workshop partnership
15 p2624 A69-30822

Unitary sorting influence on reliability of planar transistors subjected to irradiation recovery cycles and scaled stresses
15 p2626 A69-30834

Reliability control of π -W resistors of tin oxide on glass substrate manufactured in quantity
15 p2627 A69-30837

Mesa-structure varactors p - n junction generating harmonics by nonlinear capacity variation/ reliability, determining selection criterion and optimal test duration period
15 p2627 A69-30839

Metal film resistor reliability for conventional and space use, outlining guidelines for fabrication and quality control
15 p2628 A69-30847

Reliability testing of development models during production, considering short term and large batch tests
15 p2579 A69-31036

Complex systems reliability, describing uses of computer programs in analysis of circuit design, component failure modes and faults due to drifts
15 p2572 A69-31042

Diode burn-in dissipation measurement for reliability testing
15 p2579 A69-31043

Military specifications validity with reference to reliability and metal finishing industry
15 p2722 A69-31120

Military systems trouble documentation and evaluation, emphasizing computerized monitoring of reliability and maintainability
15 p2722 A69-31121

Propulsion system influence on aircraft reliability from viewpoint of engine manufacturer
15 p2629 A69-31122

Failure analysis techniques in electronic component reliability laboratory, discussing electrical and physical tests to detect weaknesses in manufacturing and design
15 p2722 A69-31133

Markov chain applications to avionics weapons system reliability specifications starting with mission profile, failure rates, success probabilities, etc
15 p2581 A69-31136

Space vehicle subcontracted components reliability attainment, discussing reliability process specifications, motivation, product reliability and feedback programs
15 p2723 A69-31139

High reliability space system electronic parts control program to assure success of unmanned space missions
16 p2793 A69-31714

Concorde propulsion and ejection systems reliability, testing reheating duct, primary nozzle, secondary assembly, etc
16 p2837 A69-32072

Engine and components reliability, discussing design stage and programming [AIAA PAPER 69-476]
16 p2795 A69-32771

Reliability physics - IEEE Conference, Washington, D.C., December 1968
17 p2935 A69-32886

Automatically controlled dynamic systems reliability estimation in terms of failure probability illustrated with autopilot-aircraft case
17 p3001 A69-33144

Reliable structural joints and attachments design for components fabricated from nonmetallic refractory brittle materials, discussing departures from conventional practices
17 p3061 A69-33569

Airborne data processing systems reliability, discussing software and hardware reconfiguration techniques and man-machine interface problems
17 p2977 A69-34072

Airborne radomes reliability and high temperature environments, discussing missile nose cones, light weight ceramic techniques, circular polarization, etc
17 p2942 A69-34084

Airborne electric power systems maintenance aids, describing design and operation of annunciator for establishment and display of system failure causes
17 p2905 A69-34112

Aircraft secondary power sources reliability dependence on electric loads, charge control and maintenance, discussing hermetically sealed batteries features
17 p2905 A69-34113

Reliability - Conference, Chicago, January 1969
18 p3140 A69-34476

Fault tree for hardware multiple failure safety analysis and reliability analysis for single failure analysis, illustrating comparative advantages
18 p3142 A69-34479

System state phase modeling as method for evaluating safety and reliability by analysis of system states in mission phases through logic diagram
18 p3142 A69-34480

AGREE /Advisory Group on Reliability of Electronic Equipment/ testing philosophy, emphasizing environmental tests
18 p3143 A69-34481

Environmental testing role in qualification, acceptance, burn-in and reliability demonstration tests
18 p3143 A69-34482

Reliability tasks vs product reliability, discussing differences in effectiveness and management programming
18 p3143 A69-34484

Development, manufacturing and logistic costs of reliability improvement in electronic equipment design
18 p3231 A69-34485

Quantitative and qualitative reliability programs for commercial and aerospace products, considering Failure Effect Management System
18 p3143 A69-34486

Reliability management simulation exercise training technique for government personnel, discussing decision making in development, production, testing and field usage of systems
18 p3117 A69-34487

Physics of Control program for electronic devices reliability, discussing qualified parts, chemical, physical and electrical properties, parameter ranges, specifications and corrective action
18 p3143 A69-34488

Failure mechanisms time and stress dependence relations
18 p3144 A69-34490

Mean-time-to-repair of complex systems with consideration for repair policies and number of repairmen, noting application to systems reliability engineering
18 p3144 A69-34494

Semiconductor reliability evaluation program for economical experimental design, noting stress tests
18 p3232 A69-34496

Ballistic missile and aircraft operational effectiveness, discussing data collection, reliability, availability and capability surveillance by computer
18 p3145 A69-34500

Operations research methods applied to systems effectiveness study, using key decision models with optimized alternatives
18 p3145 A69-34503

Reliability demonstration by MIL-STD-781 for equipment failure and success, proposing useful alternatives
18 p3145 A69-34507

Accelerated temperature tests, calculating temperature behavior of hazard rates and activation energy from failure data using computer simulation
18 p3117 A69-34509

Agna rocket vehicle production reliability evaluation program, testing specific representative equipment randomly selected from production stores
18 p3146 A69-34510

Spacecraft structures reliability, discussing detection, identification, assessment and control of defects
18 p3146 A69-34513

Reliability prediction in electronics, discussing basics, advances, limitations, etc
18 p3146 A69-34514

Hazard plot analysis of incomplete data involving times to failure for failed units and running times on unfailed units
18 p3147 A69-34515

Failure rate data role in reliability analysis and design optimization
18 p3147 A69-34516

Reliability prediction limited to approximations related to past experience on similar equipment
18 p3147 A69-34517

C-141 aircraft reliability growth history, discussing fleet performance, aging trends and delivery vs production sequence
18 p3090 A69-34521

Mechanical drives effectiveness for large antenna tracking/communications systems evaluated in terms of reliability and availability
18 p3100 A69-34522

Reliability block diagrams for laser systems, discussing failure modes of solid state, semiconductor and gas lasers
18 p3151 A69-34523

Reliability engineering methods for software programs with emphasis on real time computation, describing SSD Exhibit 61-47 documentation
18 p3105 A69-34524

Failure mode and effect analysis integrating design and reliability engineering, discussing management controls and interdisciplinary coordination
18 p3147 A69-34526

Computerized Markov effectiveness models of repairable and nonrepairable complex aerospace systems
18 p3195 A69-34527

Statistical testing techniques using small sample size at low component levels to predict product performance
18 p3117 A69-34528

Computer simulation model for Saturn 5 prelaunch system reliability analysis, using Bayesian techniques
18 p3207 A69-34529

TD1/TD2 satellites power supply subsystem, stressing high power requirements and significant design features regarding battery and solar array controls
18 p3093 A69-34791

Stochastic failure models based on stress peak distributions, including randomly deteriorating strength model and increasing hazard reliability functions
18 p3148 A69-35079

Multistage systems high reliability design, describing branch and bound computer method for optimal resource allocation of redundant components
18 p3148 A69-35081

System reliability evaluation based on failure analysis illustrated with examples covering initial requirement through parts production monitoring and control
19 p3454 A69-35782

Communication equipment reliability improvement through testing and failure analysis
19 p3282 A69-35783

Closed-loop system for test, failure analysis and corrective action in avionics reliability growth, showing cost effectiveness relationship to test program
19 p3282 A69-35784

Microwave equipment reliability considered in terms of various subsystems and components, showing carefully formulated and executed test program as essential
19 p3282 A69-35785

Scanning electron microscopy for reliability studies in semiconductor devices
19 p3382 A69-35788

Reliability and maintainability - Conference, Denver, July 1969
19 p3324 A69-35999

FAA ARTS-III terminal air traffic control system reliability and maintainability, discussing module addition
19 p3370 A69-36000

System reliability with allowable downtime, calculating probability of on-line units staying operational during mission time using conditional availability
19 p3326 A69-36002

System approach to reliability demonstration, discussing design and impact on levels, risks, requirements, testing, cost and incentives
19 p3327 A69-36003

R and D program risk evaluation methodology in density functions form for program goals probabilities, noting random variables as parameters
19 p3455 A69-36008

Product reliability program for C-5A to provide high delay/abort reliability during operational usage
19 p3247 A69-36011

Reliability measurements based on maintenance records, considering human factor and life limiting and random chance design
19 p3327 A69-36013

Integrated test program based on mission requirements, failure mode and effects analysis with feedback from testing to design and development functions
19 p3327 A69-36014

Intermediate level mathematical reliability model relating failure mechanism, part strength and interaction of application stresses to parts failure rates, with emphasis on microcircuits
19 p3283 A69-36019

Failure data role in management of launch operations reliability program
19 p3294 A69-36022

Subsystem designs evaluated on basis of human reliability metric to select desirable design configurations
19 p3261 A69-36026

DC 10 aircraft reliability program, discussing passenger attractiveness, dispatch reliability, maintenance cost, flight safety and computer simulation for reliability engineering
19 p3248 A69-36027

Partial prior information utilization via confidence intervals for mean time to failure of exponential reliability model
19 p3360 A69-36038

Bayesian reliability demonstration tests for predetermining sample size producer and consumer risks for equipment with exponential and binomial failure distributions
19 p3327 A69-36039

Bayesian confidence limits for systems reliability, considering exponential and unspecified life distribution subsystems
19 p3328 A69-36041

Visual inspection, thermal and mechanical shock, burn-in and hermeticity tests of microelectronic equipment, reviewing test methods and procedures of MIL-STD-883 program
19 p3284 A69-36043

Hazard and renewal rate and bathtub curves for electronic equipment reliability, noting single and multiple probability densities
20 p3504 A69-37070

Component hazard rate distribution functions from unit time and failure analysis, noting confidence statements and simulation studies
20 p3548 A69-37158

Onboard computer reliability, discussing missile computers and maintenance procedures
20 p3503 A69-37400

Technological systems engineering effectiveness assurance elements, discussing roles of engineering, operations research, data utilization, production and installation, etc
20 p3550 A69-37709

Space vehicle launcher system reliability from trials and adopted corrections, basing formal computation on adoption of normalized form for reliability likelihood
20 p3618 A69-38278

MIL-STD-781B reliability tests with standard based on exponential distribution for equipment exhibiting constant failure rate, noting sampling
20 p3551 A69-38289

Mathematical model of probability of errorless human performance for time continuous tasks for use in systems reliability analysis
21 p3664 A69-38971

Error propagation and tolerance analysis in design and reliability engineering and stress analysis
21 p3842 A69-39303

Dual role core /Ducor/ memory system with unique core stack assembly feature to achieve cost reduction and structural integrity for severe environmental conditions
22 p3903 A69-39950

Wire, flip-chip and beam-lead bonding processes effects on hybrid microcircuits reliability
22 p3911 A69-39956

Reliability testing - Conference, Anaheim, April 1969
22 p3952 A69-40021

Reliability testing as complex element of reliability engineering noting nondestructive, destructive and selective demonstration testing, stress-time correlations, risk levels optimization, etc
22 p3952 A69-40022

Reliability prediction accuracy through reliability testing with reference to interplay between design, manufacture, test programs, environmental conditions, etc
22 p3952 A69-40023

Reliability incentive programs, considering linear and nonlinear curves for mean time before failure /MTBF/ vs incentive dollars and negative MTBF vs penalty dollars
22 p3952 A69-40024

Implementation of MIL-STD-781 reliability test specification from contractor viewpoint, detailing test procedures /procedural, decision, reporting and corrective action rules/
22 p3952 A69-40025

Techniques to control, measure and assure reliability of electronics systems and equipment, emphasizing Thorndike chart and Molina tables
22 p3953 A69-40026

Reliability test program based on MIL-STD-781 B specification, noting test environments with AGREE chamber
22 p3953 A69-40027

Reliability assessment of ballistic missile inertial guidance system, discussing objectives and requisites
22 p3953 A69-40028

Reliability testing and parts screening of electronic systems for best parts selection
22 p3953 A69-40029

Metallurgical, chemical and mechanical analyses and high stress tests application to verification of electronic device reliability, noting failure modes and rate
22 p3953 A69-40030

Part selection, source control and application program for reliability of equipment design, noting derating
22 p3953 A69-40031

Planning, design and implementation of reliability testing facility, investigating phases of project life cycle
22 p3954 A69-40033

MIL-STD-781A vibration requirements, using mechanical shakers for AGREE vibration testing
22 p3954 A69-40036

Design and economic concepts of Lockheed L-1011 wide body trijets, discussing airport and airways congestion alleviation, passenger appeal, etc
22 p3863 A69-40494

Cs contact ion engine with tubular W ionizer tested for performance and reliability in vacuum chamber
22 p4000 A69-40592

Reliability engineering application to aircraft safety, considering mathematical models involving safety, human errors and accident causes
22 p3867 A69-41129

Safety engineering programs for aircraft design, discussing organizational relations, failure and operational safety analyses
22 p3867 A69-41132

Two channel electronic system with one redundant channel for automatic replacement in case of failure evaluated for operational preparedness
23 p4136 A69-41559

Commercial jet aircraft thrust reversers and noise suppressors developed by Rolls-Royce, discussing compatibility, reliability and applications
23 p4200 A69-41638

S band antenna systems for missiles, designed in various types to obtain RF telemetry links reliability by sharing effort between airborne and ground station equipment
23 p4137 A69-41753

Battery subsystems optimization for earth satellite lifetimes greater than 5 years, analyzing flexibility, weight and reliability
23 p4068 A69-42243

Space vehicle flight performance of Ni-Cd batteries noting reliability, consistency and predictability
23 p4072 A69-42285

All-electric nonlinear actuator steering advanced tactical missiles, noting 99.29 percent delivered unit reliability during mass production
23 p4225 A69-42458

Quality and reliability of electronic spacecraft devices and structural components produced in limited quantity, discussing documentation of production and testing
23 p4171 A69-42474

Management role in ensuring products and components quality and reliability, analyzing failure reasons
24 p4416 A69-42778

All-equipments reliability test improved by removing usual truncation and extending accept-reject lines of test plan MIL-STD-781
24 p4321 A69-43203

Damage tolerance design concepts required to obtain reliability, maintainability and operational safety of complex aircraft
24 p4254 A69-43717

RELIEF MAPS
Representation for computer storage of contour map data for searching problem involving determination of aircraft ground track
01 p0036 A69-10704

Contour maps of H II regions W12, Orion A, W43 and W51, listing flux densities and angular sizes of components
09 p1598 A69-22186

Generalized techniques for contour maps problem solution applied to problem of locating ground track of aircraft from elevation readings obtained during flight
09 p1461 A69-22599

Surface structure asymmetry of near and far sides of moon, considering earth radiation and gravity pull
18 p3206 A69-35439

RELIEF VALVES
Three valve manifold for five self righting inflation bags in escape capsule on F-111, providing one directional flow and pressure relief and shutoff
20 p3467 A69-38185

RELIEVING
U STRESS RELIEVING

RELUCTANCE
Pressure transducers with variable reluctance and magnetic signal transmission techniques
10 p1690 A69-23226

RELUCTIVITY
U RELUCTANCE

REMAGNETIZATION
U MAGNETIZATION

REMANENCE
Magnetic properties of stone, stony-iron and iron meteorites, discussing natural remanent magnetization origin in parent bodies and magnetic susceptibility
19 p3415 A69-36122

REMELTING
U MELTING

REMOTE CONSOLES
Time sharing remote computer station allowing on-spot data processing and output answers, formulating best-fit equation representing statistical data
18 p3107 A69-34860

REMOTE CONTROL
NT RADIO CONTROL
Remotely controlled explosives processing facility for handling unfamiliar sensitive materials, noting safety aspects and inspection, testing, transporting and destroying techniques
02 p0226 A69-11523

Rocket guidance, discussing foreign systems with emphasis on German range miss/gradient orientation scheme used on World War II V-2 rockets
02 p0279 A69-12362

Remotely operated open-cup impact tester for studying impact initiation of reaction of various liquid fluorinating agents with metals and plastics
06 p0907 A69-17876

Predictive display technique for remote manual control of roving lunar and planetary surface vehicles
06 p0928 A69-17925

Automatic remotely operated sodium D line reversal temperature measuring apparatus, analyzing systematic errors
06 p1035 A69-17932

Dynamic IR inspection to detect fatigue cracks in aircraft and missile structure from distance
11 p1861 A69-24262

Dynamics of gyroscopic synchronous servo system intended for remote measurement of spatial orientation coordinates of sensor moving element
11 p1881 A69-24558

Flow control valve for hydraulic motor speed regulation operated by remote pressure signal
11 p1827 A69-25646

Communication systems in interplanetary space covering telemetry, remote control, Doppler and distance measurements, coherent PCM/PSK/PM, demodulation, deep space network, etc
12 p2027 A69-25875

Remote control spectrophotochronograph to study radiation of high speed high temperature processes, giving construction data and diagrams
12 p2085 A69-26161

Book on control theory covering automatic and remote position control, diagrams, transfer functions, operators, Laplace transform use with differential equations
13 p2238 A69-28345

Pursuit problem involving controllable pursuing plant, deriving condition for engagement with prescribed period of time
14 p2482 A69-28800

Remote manipulators applications in space, discussing joint configurations, master-slave systems design, control systems, etc
15 p2558 A69-30187

ESRO Aurorae satellite telecommunication system, detailing information nature, PCM telemetry and remote control system standard
15 p2702 A69-31084

ESRO 1 and 2 satellites onboard remote control system, discussing tone digital standard code and equipment design features
15 p2702 A69-31086

Self contained remote sense remote control pressure regulator using pure fluid amplifiers, controlling large or small flow over wide pressure range
15 p2554 A69-31303

Variable optical system with remote and continuous adjustment of beam for solar simulation, permitting maximum test facility utilization
[AIAA PAPER 69-997] 22 p3920 A69-40375

Remote manipulator spacecraft system for refurbishing synchronous communication satellite, emphasizing compatibility with standard shroud Titan 3C launch vehicle
24 p4297 A69-43041

REMOTE HANDLING

Remote manipulators applications in space, discussing joint configurations, master-slave systems design, control systems, etc
15 p2558 A69-30187

Remote disassembly and inspection methods for evaluating NRX-AG reactor components performance
[AIAA PAPER 69-511] 16 p2810 A69-32712

REMOTE SENSORS

Remote sensors utilization in earth orbital space for discovery, inventory, evaluation, development and conservation of earth natural resources, noting satellite design
[UN PAPER 68-10464] 01 p0065 A69-10532

Agricultural remote sensing information system composed of data acquisition, processing and information extraction and interpretation phases, providing knowledge of earth resources
03 p0400 A69-13195

Randomly rough surface physical and geometrical remote determination by polychromatic bistatic radar
05 p0721 A69-16572

Remote sensing platform requirements for oceanographic and meteorologic observations, discussing orbital and aircraft platforms
[AIAA PAPER 69-154] 06 p1044 A69-18122

Compressor inlet temperature /CIT/ sensors, describing bimetal strip and liquid expansion aspirated types
[ASME PAPER 69-GT-18] 09 p1571 A69-22499

Remote geosensing using properties of radar return noting scatterometry, imagery, altimetry and penetration measurements
11 p1835 A69-24692

Remote sensing of environment - Conference, University of Michigan, Ann Arbor, April 1968
12 p2094 A69-26974

Photography for remote sensing, discussing aerial photography, side-looking radar and photography for recording, storing and retrieving data
12 p2096 A69-26975

Microwave radiometric sensor operational principles and capabilities, discussing antennas and radiometric receivers
12 p2033 A69-26976

Electronically scanned and fixed multiple beam phased arrays for spaceborne microwave radiometric sensors
12 p2044 A69-26977

Earth resources remote sensing from spacecraft noting meteorology, oceanography, forestry, agriculture and IR detection of plant diseases and pollution
12 p2192 A69-26978

Optical/mechanical IR line scanner imagery role in remote sensing
12 p2096 A69-26979

Correlation spectrometer for air pollution surveillance from airborne and spaceborne platforms, noting scanning satellite system for continuous global coverage
12 p2096 A69-26981

Electronic nonimaging polarimeter/photometer for aircraft observations of pure red pine stand, suggesting application to terrestrial, airborne and satellite remote sensing
12 p2096 A69-26983

Geographic and cartographic mapping applications of remote sensor data from orbital heights, discussing hardware, instrumentation, NASA role in data selection, etc
12 p2192 A69-26984

Light interaction with stacked leaves and plant canopy, determining reflectance and transmittance
12 p2097 A69-26985

Information collection by remote sensing and related economic principles, presenting mathematical formulation of linear programming model
12 p2193 A69-26988

Plant and soil thermal behavior for various conditions of crop species, plant spacing, tillage, irrigation and aerial thermal scanner imagery
12 p2075 A69-26989

Remote sensing and forest survey sampling designs, discussing nonstereo stratification, conventional photography and IR or radar imagery
12 p2097 A69-26991

Remote sensing technology application to improving range resource inventories, discussing aerial photography, optical, IR and radar scanning, etc
12 p2098 A69-26992

Prevalent detection of vigor loss and mortality signs in ponderosa pine trees subject to bark beetle attack
12 p2098 A69-26993

Airborne IR line scanning systems for latent forest fire detection, discussing discrimination module for automatic identification of hot targets
12 p2193 A69-26994

Airborne IR remote sensing techniques for fire detection, considering marginal and submarginal targets
12 p2098 A69-26995

Remote oceanographic sensing from ships, aircraft and spaceborne platforms, using active /radar and laser/ and passive sensors in visible, IR and microwave regions
12 p2075 A69-26997

Airborne magnetometer application for remote measurement of ocean wave spectra, obtaining wave noise power spectra and wave height profile
12 p2075 A69-26998

Airborne scanning spectrometer for IR detection of clear air turbulence, presenting flight records
12 p2098 A69-26999

Airborne IR spectrometer for remote clear air turbulence detection, noting necessity for mirror stabilization in pitch axis
12 p2098 A69-27000

Optical radar studies of lower atmosphere, giving Mie theory calculations of clear atmosphere volume backscattering cross sections for four laser wavelengths
12 p2033 A69-27001

Radar remote sensing for terrain data acquisition
12 p2098 A69-27005

Airborne IR surveys in engineering studies of terrain, discussing instrumentation technology, data interpretability, economic feasibility, etc
12 p2098 A69-27007

Side-looking airborne radars /SLAR/ application to geological exploration of remote unmapped areas
12 p2099 A69-27009

Data analysis techniques for discrimination and identification of terrain surfaces from radar scatterometry information
12 p2099 A69-27010

Airborne and satellite IR survey over active effusive eruption at Surtsey, Iceland, comparing thermal energy yield and radiant emission to ground measurements
12 p2076 A69-27011

Remote sensing of urban environments for metropolitan information systems noting photographic, thermal IR, radar and microwave applications
12 p2193 A69-27012

Methodology for technical feasibility and economic analysis of remote sensing applications
12 p2193 A69-27013

Phase screen technique for deriving statistical characterizations of perturbations imposed on wave propagating through random medium applied to remote probing
14 p2414 A69-29511

Focused beam wave applied to atmospheric turbulence probing for spectral density of index of refraction, structure constant and wind velocity
14 p2414 A69-29512

Passive remote sensing at microwave frequencies for meteorology, oceanography and geology, reviewing physics of wave interactions, mathematics of data interpretation, etc
14 p2414 A69-29514

Line of sight atmospheric path measurements for atmospheric inhomogeneities, using phase quadrature, microwave and near IR techniques
14 p2415 A69-29516

High resolution azimuth and elevation arrays sensing remote ionosphere and sea surface characteristics, discussing backscatter data for ionosphere and sea scatter
14 p2448 A69-29520

Remote optical heterodyne measurement of Doppler shift as method for determining vector wind velocity, noting influence of air pollution
14 p2448 A69-29523

Remote sensing of lower atmosphere refractive structure, using Rake tropospheric scatter channel-sounding technique
14 p2448 A69-29525

Multiple ground based geophysical sensors for detecting ionospheric phenomena, discussing continuous magnetic tape data recording, common time base and station operation
14 p2448 A69-29526

Coherence-polarization in remote sensing by microwave and laser means, analyzing scattering functions of rough surfaces
14 p2448 A69-29532

Remote sensor imaging techniques for simultaneous radar, IR and visible electromagnetic spectra of extensive land areas, presenting two clustering algorithms for multiple images
14 p2448 A69-29533

Computer based data handling and display for relating remote sensor signals to ground truth information derived from aerial photographs
14 p2416 A69-29534

Thermistor instrument for remote sensing, magnetic synchronous recording and linear display of temperature
14 p2449 A69-29562

Satellite observation of ocean surface and subsurface features, discussing onboard equipment and proposed orbits
15 p2607 A69-30190

Electromagnetic waves as data carriers for earth resources and technology satellite sensors
15 p2607 A69-30231

Integrated landscape analysis with radar imagery for earth resources
15 p2608 A69-30454

Color IR film improvement for high altitude remote sensor, using auxiliary minus-visual filters
15 p2609 A69-30457

Aerial multiband remote sensors for wildland resources, considering multilens photographic systems, optical mechanical scanners and radar devices
15 p2609 A69-30458

Fluidic digital position sensor consisting of fluidic monostable amplifier, analyzing operation by characteristics method
15 p2554 A69-31301

Self contained remote sense remote control pressure regulator using pure fluid amplifiers, controlling large or small flow over wide pressure range
15 p2554 A69-31303

IR measuring techniques for water surface temperature remote sensing
15 p2617 A69-31543

Ocean and water surface temperature measurement by IR remote sensing from aircraft and satellites, discussing accuracy and data correction [AIAA PAPER 69-590] 17 p2973 A69-33286

VLF and ULF whistler propagation in magnetosphere for remote sensing magnetospheric plasma parameters, exhibiting characteristic patterns and interaction with plasma 17 p2962 A69-33712

Temperature profiles and associated wind profiles obtained with Jimsphere/FPS-16 radar system at Cape Kennedy, discussing remote CAT detector assessment 17 p2999 A69-33739

Multispectral imaging remote sensors, analyzing energy sources affecting systems synthesis 17 p2977 A69-34064

Sea surface temperature remote sensing by Nimbus 2 satellite using TV camera and medium and high resolution IR radiometer 18 p3130 A69-35057

Manned spacecraft earth resource sensing, discussing advantages and applications in agriculture, forestry, geography, hydrology, oceanography and geology 18 p3208 A69-35058

Oceanographic sensing satellite systems, discussing applications, data requirements, sensors, booster and earth coverage capabilities 18 p3210 A69-35091

Electromagnetic field signatures in optical IR spectrum of satellite-borne sensors, analyzing spectral, spatial and temporal distributions, polarization and phase 19 p3309 A69-36060

Optical instruments optimal design for given requirements, discussing tradeoff studies of airborne reconnaissance scanner, spaceborne rendezvous sensor and track-while-scan radiometers 19 p3310 A69-36065

Multispectral scanner with multichannel spectrometer for earth observations, describing video image generation from detector elements output signals 19 p3310 A69-36066

NASA Earth Resources Survey Aircraft Program, describing aircraft and remote sensors characteristics 19 p3312 A69-36259

Fundamentals of remote sensing - Conference, University of Michigan, July 1969 20 p3493 A69-37734

Airborne imaging radar drawbacks and advantages, describing techniques to overcome defects 20 p3493 A69-37735

Electromagnetic radiation detectors in nonphotographic sensing systems, describing performance as function of time constant, spectral response, cooling requirements and signal handling 20 p3540 A69-37736

Remote sensing by electromagnetic waves in microwave region, describing differences between microwave and optical sensing 20 p3493 A69-37741

Remote sensing systems costs, benefits and economic evaluation 20 p3493 A69-37742

Remote sensors discrimination and performance, discussing linear filter system, contrast ratio, tricolor systems and multispectral scanning system 20 p3493 A69-37743

Remote sensors geometrical optics, considering power flow direction, specular reflection, imaging and dihedral in case of specular reflectors, reflection and diffraction 20 p3577 A69-37744

Human optical system as remote sensor consisting of transducing, data transmission and processing subsystems, defining perception function and describing visual aids 20 p3483 A69-37745

Force fields to establish nature and position of remotely located conditions, discussing radiated power, electromagnetic waves, black body radiation, etc 20 p3494 A69-37747

Earth resources technology satellite global survey system carrying multispectral sensors in long life space platform 21 p3720 A69-38623

Earth resources observation technology from satellites, reviewing sensors and methods, electromagnetic spectrum, atmospheric attenuation and windows, passive-active devices 21 p3720 A69-38624

Airborne electromagnetic systems measuring complex dielectric constant in earth crust for mineral and water resources exploration [RAES PAPER 8] 22 p3946 A69-40481

Airborne correlation spectrometer for air pollution remote sensing, describing applications [RAES PAPER 7] 22 p3896 A69-40488

Balloon flights for testing remote sensor systems prior to space flight, considering return beam vidicon and tracking telescope suitability for experimentation 22 p3865 A69-40806

Aerial remote sensing data for earth resources program including agricultural, geothermal/ geological tests, hydrological, water pollution and soil and flood water control observations 22 p3949 A69-40994

Systems analysis method for determining spacecraft remote sensors earth resources survey effectiveness by integrating specifications, mapping requirements and orbital characteristics 23 p4163 A69-41567

Radio telemetry system for evaluating protective masks dynamic performance by remote simultaneous monitoring of respiration, acceleration and temperature data generated by human subjects 23 p4121 A69-41765

Synoptic remote sensing oceanography from ships, aircraft and spaceborne platform, discussing fisheries [AAS PAPER 69-062] 24 p4307 A69-42822

Earth orbital remote sensing applications to forest and range resources management, discussing conventional aerial photography [AAS PAPER 69-059] 24 p4307 A69-42823

Orbiting vehicles remote sensing of earth resources, discussing instrumentation and accuracy requirements, data management and analysis and effectiveness criteria 24 p4315 A69-43199

REMS

U RAPID EYE MOVEMENT STATE

RENAL CALCULI

U CALCULI

RENAL FUNCTION

Renal excretion response to blood fluid volume shift resulting from altered orientation within gravity or from absence of gravity 06 p0873 A69-17015

Renal pathology of acute methylhydrazine intoxication in dogs, noting hemolytic anemia and hemoglobinuric nephropathy 06 p0883 A69-17847

Intrarenal capillary hydrostatic pressure effect on hemodynamically induced changes in sodium excretion 07 p1063 A69-18629

Oxygen saturation in outflowing and inflowing renal blood in dogs under normal and hypoxic conditions, assessing cannula technique 14 p2406 A69-28916

Renal vascular circulation in carotid occlusion pressor reflex by vasoconstriction in absence of renal autoregulation 22 p3887 A69-41190

Renal calculus incidence among aircrews of long and short haul airlines, considering effects of dry cabin environment and dehydration 23 p4108 A69-41826

RENDEZVOUS

U ORBITAL RENDEZVOUS

U SPACE RENDEZVOUS

RENDEZVOUS GUIDANCE

Parallel rendezvous of space vehicles in central gravitational field, discussing relative motion of space vehicle and supplementary force required 05 p0789 A69-16047

Manual and automatic spacecraft rendezvous and docking, discussing docking of Cosmos 186 and 188 in 1967 [UN PAPER 68-95764] 06 p1013 A69-17057

Suboptimal guidance corrections for continuous thrust vehicle disturbances during minimum fuel rendezvous in Martian orbit, discussing physical and modified cost functional [AIAA PAPER 69-76] 06 p0956 A69-18081

Optimal rendezvous for two propelled spacecraft obtained by Pontryagin principle assuming small distance between vehicles compared to distances from center of gravity 10 p1791 A69-22923

Apollo 10 lunar landing module, detailing weight, shape, electronic system and rendezvous radar 18 p3207 A69-34629

Parallel rendezvous of space vehicles in central gravitational field, discussing relative motion of space vehicle and supplementary force required 20 p3574 A69-37956

Guidance control systems for moving plants pursuing targets, basing design on target characteristics and plant phase coordinates 21 p3687 A69-39643

Rendezvous control law for spacecraft moving in central gravitational field along trajectory representing target vehicle Keplerian orbit 22 p4036 A69-40115

Manual method for navigating and guiding spacecraft to rendezvous with orbiting target, using hand-held unpowered optical instruments and manual computations [AIAA PAPER 68-859] 24 p4348 A69-43243

RENDEZVOUS SPACECRAFT

Rendezvous maneuvers for vehicle and elliptically orbiting targets, formulating relative motion of two bodies 04 p0658 A69-14828

Optimal rendezvous between satellite and spacecraft, determining power and time optimal coplanar rendezvous in circular orbit 09 p1538 A69-21759

Optimal rendezvous for two propelled spacecraft obtained by Pontryagin principle assuming small distance between vehicles compared to distances from center of gravity 10 p1791 A69-22923

Optimal rendezvous maneuver of pursuing vehicle with minimum fuel expenditure in approach stage on elliptic and hyperbolic orbits 15 p2701 A69-31548

Rigid and flexible coupling devices for spacecraft rendezvous, describing general operating conditions 22 p4036 A69-40008

Rendezvous control law for spacecraft moving in central gravitational field along trajectory representing target vehicle Keplerian orbit 22 p4036 A69-40115

RENDEZVOUS TRAJECTORIES

Space rendezvous problem as applicable to interplanetary missions, discussing steps in rendezvous maneuvers to permit final docking 03 p0511 A69-13401

Capture and control in conservative dynamical systems, analyzing orbital mechanics of derelict and pursuit spaceships 05 p0826 A69-16462

Low thrust trajectories for minimum time rendezvous between continuous thrust interceptor and passive target vehicle, comparing calculus of variations and steepest ascent analyses 16 p2857 A69-32177

Halley Comet rendezvous mission, comparing low thrust mode with ballistic Jupiter or Saturn swingby mode [AIAA PAPER 69-933] 21 p3809 A69-39360

Optimal pursuit control at constant moving velocity and limited angular velocities, using Pontryagin principle 21 p3825 A69-39629

Space mission opportunities selection from analysis of short period comet perihelia, discussing flyby and rendezvous mission payloads [AAS PAPER 69-320] 24 p4381 A69-42866

REPAIRING

U MAINTENANCE

REPEATERS

Hybrid digital transmission systems, discussing joint optimization of analog and digital repeaters and information rate of coaxial cable systems 01 p0027 A69-10248

Performance characteristics of hard limited and linear repeaters for satellite communications systems 01 p0032 A69-10966

Local oscillator for space telecommunications F9 repeater, operating principles, design calculations and test results 08 p1286 A69-20596

Interference noise in communication satellite receivers and terrestrial radio relay receivers, noting interference reduction transfer factor 09 p1450 A69-21279

Joint filter optimization in combination analog-digital hybrid multilevel transmission system 09 p1457 A69-22465

High gain self steering microwave repeater for earth-satellite communications noting design, performance and results of color TV transmissions 11 p1839 A69-25294

Communication subsystem design of Defense Communication Satellite Program/DCSP for background information, noting repeater with toroidal pattern antenna 23 p4131 A69-42537

REPLACING

Probability theory applied to age and block replacement models in preventive maintenance of parts, noting inspection cost distribution 20 p3551 A69-38267

REPLICAS

Electron fractography techniques and fracture modes in metallic materials interpretation, giving special attenuation to classical fracture replication and shadowing techniques 04 p0619 A69-15395

Plastic backing films removal from carbon electron microscope replicas by maintaining specimens in horizontal position 09 p1495 A69-21651

REPORTS

Scientific report of Rockwell polar flight, November 14-17, 1965 09 p1484 A69-21401

Scientific research report on cosmic ray and X ray astronomy by constant altitude stratospheric plastic balloons, etc 15 p2723 A69-31431

REPRESENTATIONS

Extension of results of one dimensional representation theory treating nonGaussian processes as perturbations of log normal process to higher dimensions 03 p0392 A69-13248

REPRODUCTION [COPYING]

Self reproducing automata, noting description of cellular system and applications to systems science 05 p0723 A69-15826

REPRODUCTIVE SYSTEMS

Self reproducing automata, noting description of cellular system and applications to systems science 05 p0723 A69-15826

Drosophila melanogaster flies reproductive behavior and Tradescantia paludosa chromosome patterns after weightlessness onboard Vostok 3 and 4 07 p1063 A69-18597

Visceral lesions observed in mice and rats exposed to ultrashort waves indicating no pathological modification of physiology of reproduction [AGARDOGRAPH-111] 08 p1266 A69-20679

Axiomatic explanation of complete self reproduction, noting logical mathematical biological reasoning and evolution theories 10 p1645 A69-23385

Penile erection electrically evoked from Macaca mulatta forebrain, measuring density and distribution of responding points 12 p2018 A69-25775

Population feedback control in planarians by fission suppression by brain near other planarians 14 p2406 A69-28871

Mammalian pineal gland as neuroendocrine transducer, studying melatonin role in ovulation, gonadal growth, etc 20 p3480 A69-38284

REPTILES

U LIZARDS

REPUBLIC MILITARY AIRCRAFT

U MILITARY AIRCRAFT

REPULSION

U FORCE

RESCUE OPERATIONS

Navigation techniques for emergency helicopter services in medical evacuation and air/sea rescue missions, discussing displays and search patterns 02 p0279 A69-12363

Radar detector for survivors, using inexpensive microwave mixer detector crystal 06 p0878 A69-16964

Legal and technical aspects of international cooperation in spacecraft crew rescue operations signed by UN General Assembly 06 p1042 A69-17033

Passenger and crew members escape from aircraft following water accidents, discussing ditching, evacuation, survival and rescue facilities 08 p1254 A69-20453

FAA regulations for improvements on crashworthiness and emergency evacuation from viewpoint of plastic applications and fire safety in aircraft 08 p1254 A69-20497

Rescue locator beacons and airborne search equipment of VHF and UHF capabilities available to international civil aircraft operations 15 p2552 A69-30852

Problems connected with rescue of crew members ejected over water 15 p2551 A69-30866

Light aircraft emergency downed position indicators installation program, discussing transmitter minimum performance standards, listening watch insurance, etc 17 p2931 A69-34102

Space docking, personnel placement on space stations, rescue stations, etc 18 p3196 A69-34630

Agreement on Rescue and Return of Astronauts and Return of Objects Launched into Outer Space, discussing unintended landing 20 p3636 A69-37113

Agreement on Rescue and Return of Astronauts and Return of Objects Launched into Outer Space, noting humanitarian considerations and indemnity for services rendered 20 p3636 A69-37114

Amendments considered for international law regarding earth and space rescue services as result of contemporary U.S. manned space flight programs 20 p3637 A69-37115

UN agreement provisions on international cooperation for rescuing astronauts and objects in case of accident, distress, emergency or unintended landing 20 p3637 A69-37116

International lawyers proposal for compulsory registration of space activities in connection with astronauts rescue and damages liability 20 p3637 A69-37118

Passenger safety during aircraft accidents in Arctic, discussing survival equipment and methods 23 p4107 A69-41811

NT SADDLE POINTS [GAME THEORY]

Materials research - Conference, Tokyo, September 1967 06 p0941 A69-17120

Cost estimates of R and D, considering planned profit and loss following products introduction to market 14 p2541 A69-29280

Capital budgeting for R and D, discussing control of rising costs 14 p2541 A69-29281

RESEARCH AIRCRAFT

NT B-70 AIRCRAFT

NT FIREBEE 2 TARGET DRONE AIRCRAFT

NT VZ-2 AIRCRAFT

NT X-15 AIRCRAFT

NT X-22A AIRCRAFT

NT XH-51 HELICOPTER

NT XV-4 AIRCRAFT

Variable properties aircraft for flying simulator, discussing flight control system and stability behavior 07 p1052 A69-18254

Test techniques for X-22A VTOL research aircraft during ground simulator work and actual flight test, describing stability and control characteristics [AIAA PAPER 69-319] 10 p1633 A69-23044

HRV-1 navy research pusher amphibian aircraft, discussing hydrofoils and operational problems 10 p1633 A69-23223

RESEARCH AND DEVELOPMENT

National tasks in civil aeronautical research and development noting technological and social factors 08 p1422 A69-20171

Flight research testing facilities at Arnold Engineering Development Center for rockets, turbojets, ramjet engines, aircraft, missiles, satellites and spacecraft 08 p1302 A69-20883

Integrated circuit production, development and research in Germany [AGARDOGRAPH-114] 08 p1292 A69-20994

Organization and manpower utilization in R and D, determining criteria for organizational form selection 08 p1423 A69-21155

National plan for air navigation covering R and D and operational aspects 08 p1348 A69-21192

British electric propulsion research, discussing electron bombardment ion engines, conical theta pinch and rail devices and test facilities [AIAA PAPER 69-299] 09 p1564 A69-21241

30 cm diameter mercury bombardment low impulse thruster development for potential space applications, discussing performance and control [AIAA PAPER 69-238] 09 p1566 A69-21256

Research and development program in annular slit colloid thruster technology, proving thruster feasibility by performance tests 09 p1566 A69-21257

[AIAA PAPER 69-287] Lasers, reviewing output properties, control and modulation characteristics, and applications to communications, plasma generation, measurement, high temperature metallurgy, etc 09 p1517 A69-22118

Turbine blade cooling research programs, discussing effects of increased trailing edge thickness and cooling air on turbine efficiency 09 p1432 A69-22501

[ASME PAPER 69-GT-15] Solid electrolyte batteries development and current research, detailing Sprague cell and iodine complexes 10 p1640 A69-23999

MHD power plant research and development, discussing shock wave electric power generators and modulated systems 11 p1925 A69-24469

Isolation of scientific and technical personnel and effect on lateral communication and intellectual cross fertilization in research and development program 11 p2004 A69-25303

Program definition and government-industry relationships in entry research and development program management 11 p2005 A69-25726

Research and development organizations under pressure of corporate assessment and systems management approach, suggesting core-technology structure and training 12 p2192 A69-26732

Intracompany research and development, noting separate philosophies approach 12 p2192 A69-26733

Charged particles generation by liquid subjected to high electric field for efficient bipolar microthruster [AIAA PAPER 67-728] 13 p2325 A69-28220

European space program developmental and fabrication problems in satellite structure development covering booster constraints, mission constraints, tolerances, etc 13 p2357 A69-28479

European heat pipe research emphasizing transportable heat quantities, heating rate and life duration 14 p2538 A69-29201

National plan for air navigation covering R and D and operational aspects 14 p2480 A69-29858

Diffusion bonding for leaktight joints in connectors using intermediate metal system of Au-Cu-Au 15 p2617 A69-30100

Air cushion vehicle research and development laboratory testing, plans, support equipment, monitoring by TV, etc 15 p2589 A69-30865

MACRO /methodology for allocating corporate resources to objectives/ for R and D, discussing program for optimal budget management 15 p2720 A69-30958

Mathematical model for money expenditure on product oriented research programs, based on accumulated profits 15 p2721 A69-31068

Measurable and strategic characteristics of Army laboratories management, considering papers published, inventions and laboratory performance 15 p2721 A69-31070

Research and development planning and control models based on subjective probability estimates for failing projects identification 15 p2721 A69-31072

Australian space research including space flight programs in cooperation with NASA 15 p2724 A69-31450

Motivation and performance increase in R and D by incentive plans, discussing prestige, power, responsibility, recognition, work, salary, comfort, etc 17 p3075 A69-32963

Research productivity in large organizations stressing interface problem minimization, recommending deferred bonus system 17 p3075 A69-32964

Research management differences between European and American corporate structures, discussing cultural differences, cost comparisons, social mobility, etc 17 p3075 A69-32965

Concorde design, discussing planform, wing twist and camber, hypersustentation, kinetic heating, aeroelasticity, R and D, tests, etc 17 p2899 A69-33380

Plasma physics and controlled nuclear fusion research - Conference, Novosibirsk, U.S.S.R., August 1968, Volume 1

17 p3012 A69-33817

Expenditures for R and D effect upon U.S. economy

17 p3076 A69-34041

Space program design, discussing NASA centers and NASA R and D life sciences, technological developments and federal action

17 p3076 A69-34042

R and D for economic growth, discussing interaction between management, planning, engineering, marketing, production, customers and competitors

17 p3077 A69-34126

Aerospace R and D marketing decisions, considering capability identification, business opportunities, strategies and independent program funding

17 p3077 A69-34127

Proposed projects selection for independent R and D development program in business entity, measuring merits in terms of future financial returns

17 p3077 A69-34129

Technology or Research Quantitative Utility Evaluation (TORQUE) system genesis and operation, with implications affecting R and D

17 p3077 A69-34130

Laser technology applications stressing engineering, control, communications, medicine, space sciences, holography, computers, etc

17 p2984 A69-34163

Apollo project by-products, emphasizing NASA project management methods application to large R and D projects

18 p3233 A69-34649

Aerospace biomedical technology transfer analysis, discussing spinoff, popular interest, transfer barriers, etc

18 p3236 A69-35104

U.S. military aircraft technology, flight environments, trends toward larger aircraft and R and D

18 p3092 A69-35138

Civil aviation center for R and D in aviation personnel education and training [AIAA PAPER 69-785]

19 p3453 A69-35597

R and D program risk evaluation methodology in density functions form for program goals probabilities, noting random variables as parameters

19 p3455 A69-36008

Air and space research at Goettingen Aerodynamic Testing Institute

19 p3295 A69-36684

French helicopter industry projected development for existing types, production models or final development and long range design programs

19 p3248 A69-36848

Delphy technique of technological forecasting used for R and D planning

20 p3639 A69-37353

Technical communication patterns in R and D laboratories, discussing effects of work structure, social relations, etc

20 p3640 A69-38019

Technical problem solving model based on tape recorded protocols of engineers engaged in R and D project

20 p3640 A69-38020

In-house research on R and D management in government agencies, discussing manning, training, center programs, case studies, etc

20 p3640 A69-38022

Laser research from theoretical stage to present, discussing applications

21 p3736 A69-38781

Dornier R and D, discussing single and twin engined aircraft, utility aircraft, helicopter, VTOL transport, safety, etc

22 p3862 A69-39931

Research and development programs leading to heat sterilizable spacecraft battery separator material, describing bench tests

23 p4072 A69-42284

Turbofan jet engine research, discussing future compression and bypass ratios, weight and noise reduction, maintenance and reliability, temperature effects, etc

24 p4363 A69-42569

Technological forecasting as aid to aerospace planner in optimizing R and D resources allocation [AAS PAPER 69-105]

24 p4417 A69-42819

Cape Kennedy space research and national priorities, indicating performance and progress of future space operations [AAS PAPER 69-110]

24 p4419 A69-42879

Materials research structural design cycle, discussing simultaneous optimization, constituent materials, fabrication process, load environment and mission constraints

24 p4399 A69-42991

Beryllium R and D emphasizing brittleness and fracture toughness for safe working stress levels of structurally loaded components

24 p4332 A69-43208

RESEARCH FACILITIES

Scientific advances from space research in communications astronomy, electronics, transportation, etc

01 p0151 A69-10498

Electromagnetic forming principles and applications describing large capacitor bank facility design for multipurpose research [ASTME PAPER MR68-418]

02 p0252 A69-11798

High energy cosmic ray research facility at mountain altitudes, noting nucleon-proton interactions, particle identification and momentum analysis

03 p0499 A69-12942

Research center for investigating man/computer interaction, discussing display systems, computers, languages and data entities

04 p0566 A69-15342

Hot plasma research at Polish Institute of Nuclear Research at Swierk

06 p0964 A69-17174

French supersonic recycling wind tunnel for short duration experiments

07 p1116 A69-19289

Communications of Lunar and Planetary Laboratory, Volume 7

07 p1225 A69-19769

Flight research testing facilities at Arnold Engineering Development Center for rockets, turbojets, ramjet engines, aircraft, missiles, satellites and spacecraft

08 p1302 A69-20883

Organizational behavior of scientists noting working environments, effectiveness of work sections, research management and organizational development

08 p1423 A69-21124

U.S. Army Materiel Command R and D planning structure and technical planning processes influence on decisions improvement

08 p1423 A69-21153

MHD blowdown loop facility for alkali seeded noble gas MHD energy conversion, noting performance and plasma insulation from ground

10 p1674 A69-23482

Solar research objectives and instrumentation of Einstein turret in Potsdam

15 p2682 A69-30437

Variable stars research and facilities in Tautenburg, East Germany

15 p2682 A69-30438

French space research center in Toulouse, discussing organization and activities involving satellites, rocket probes, balloons and environmental tests

16 p2765 A69-31758

Experiments integrated into single automated laboratory to detect extraterrestrial life through measuring metabolism and growth in planetary surface material

17 p2912 A69-32969

Outer space rocket plumes simulation facility combining low density wind tunnel and molecular sink properties, discussing role of liquid nitrogen cooled diffuser-precooler

22 p3928 A69-40731

Flight simulator with large lateral motion for large and supersonic transport aircraft, emphasizing reproduction of cockpit accelerations due to supersonic engine thrust loss

24 p4297 A69-43044

RESEARCH PROJECTS

Atmospheric turbulence power spectra for design criteria of future low altitude aircraft from LO-LOCAT program, analyzing turbulence scale lengths [AIAA PAPER 68-216]

01 p0011 A69-11023

Terradynamic research program for studying instrumented projectile penetration of terrestrial materials

02 p0228 A69-11767

Project management in complex research, discussing incentive contracting decision model and resources allocation

02 p0356 A69-12476

Aerospace research and development projects selection and planning for success in manufacturing competition

03 p0393 A69-13252

NASA Space Application Program strategy, discussing research and development trend toward complexity, versatility and multidisciplinary use of larger spacecraft

03 p0511 A69-13427

Research and development project selection and planning, outlining system to identify capabilities contributing to increasing success probability

03 p0535 A69-13552

Book on economic management of research and engineering covering project plan impact, projects control and evaluation of research and engineering structure

04 p0688 A69-14530

Cost dependent utility characteristics in mathematical model for optimum research and development resource allocation, computing optimum fund distribution with Lagrange multipliers

04 p0689 A69-14807

Graphical evaluation and review technique (GERT) in R and D project planning processes

04 p0689 A69-15100

Estimate accuracy and project selection models in industrial research, examining company data for miscellaneous, technical and commercial failure

05 p0849 A69-15981

UK hovercraft research covering internal/external dynamics, propulsion systems and full scale tests

05 p0702 A69-16393

FAA research and development responsibility to National Airspace System, examining programs for ATC automation, solid state technology application, communications, etc

05 p0850 A69-16717

NASA civil aviation electronics research program, discussing feasibility of V/STOL aircraft all-weather operations

05 p0850 A69-16718

UK space research in 1970s emphasizing solar observations in UN, cosmic X ray astronomy, solar space astronomy and ionospheric investigation

06 p0997 A69-16853

Telescope dispersion role in research projects, discussing techniques for spectral classification and radial velocities

07 p1074 A69-19202

Heuristic methods to determine scientific activities planning emphasizing problem definition, purposes, possibilities of solution and difficulties

15 p2720 A69-30969

Scientific research report on cosmic ray and X ray astronomy by constant altitude stratospheric plastic balloons, etc

15 p2723 A69-31431

Japan space research covering sounding rockets, balloons, satellites and facilities

15 p2725 A69-31466

Welding research program at Polish Institute of Aviation concerning electron beam, AR shielded arc, resistance welding and soldering of heat resistant alloys

17 p2979 A69-33688

Gust probes in model of low altitude atmospheric turbulence during USAF research program LO-LOCAT, plotting relationship between peak count distribution curves

17 p2999 A69-33737

RESEARCH VEHICLES

Stratospheric balloons for space research, emphasizing stabilization equipment suitability

03 p0366 A69-13589

Attitude control system for 625 A-1 research earth satellite, detailing operation and test program

17 p3050 A69-33426

German research satellite Azur design and production management

17 p3050 A69-33700

RESIDUAL GAS

Mass spectrometer residual gas analyzer (RGA) for identifying and measuring subliminated substances from spacecraft construction materials, noting applications during vacuum testing

02 p0227 A69-11758

Residual gas effect on fatigue behavior of pure iron subjected to alternating bending load in ultrahigh vacuum

04 p0616 A69-14846

Residual interstellar gas from protostar formation detected as high luminosity IR object

13 p2327 A69-27593

Residual gas analyzer and leak detector by time of flight measurements on neutral metastable atoms and molecules between pulsed electron gun and auger surface detector

13 p2262 A69-28006

Vacuum restoration by laser evaporation of active media /getters/ and vapor condensation on cold substrate applicable to nonmetallic active media /titanium-magnesium oxide/

21 p3735 A69-38590

RESIDUAL STRESS

Yield surface after prestraining under radial loading, analyzing formation of yield corner

01 p0166 A69-10303

Ruby laser crystals optical inhomogeneity and residual mechanical stresses effects on laser beam angle of divergence

01 p0139 A69-10831

Nondestructive technique to measure residual and working stresses in machine parts, using specially designed circuit

06 p0926 A69-17497

TIG welding introduced residual stresses amplitude and distribution in Ti sheets, studying effects on mechanical properties [ASM PAPER GG-8-2]

07 p1169 A69-19674

Roll planishing and thermal treatments effects on gas tungsten arc welded Ti-6Al-4V alloy on residual stresses, tensile, formability and fracture toughness properties

08 p1319 A69-19966

Elastic springback and residual stress distribution in sheet metal formed by bending determined as function of radius sheet thickness and stress-strain characteristics

08 p1319 A69-20005

Structural residual stresses determination in oriented fiberglass reinforced plastics by models taking into account mutual influence of fibers

08 p1335 A69-20333

Ultrasonic technique for metal surface and near surface residual stress measurement, emphasizing aluminum alloys

10 p1794 A69-23052

Continuum theory of dislocations and internal stresses in generalized Cosserat continuum as theoretical model for crystals

10 p1799 A69-23153

Ruby laser crystals optical inhomogeneity and residual mechanical stresses effects on laser beam angle of divergence

11 p1936 A69-24698

Residual thermal stresses and plastic strains at hole edges in perforated plates, considering heating and rapid cooling

11 p1982 A69-24947

Residual stresses and strains in wound reinforced plastic fiber cylinders subjected to polymerization by heat treating

11 p1907 A69-25679

Vacuum evaporation effects on internal macrostresses in deposited metal films based on X ray analysis, showing substrate temperature contribution

12 p2143 A69-26457

Induced stressing method for complex castings by controlled cooling during heat treatment applied to front frame of J-79 turbojet engine

13 p2269 A69-28184

Stainless steel biaxial residual surface stresses from grinding and finish machining determined by dissection technique [ASME PAPER 68-WA/MET-9]

14 p2455 A69-29437

Maraging steel weldability, discussing residual stresses, hydrogen cold cracking, age hardening and hot cracking

15 p2617 A69-30098

X ray and ultrasonic methods for surface residual stresses induced in machined or ground specimen

15 p2631 A69-31511

X ray analyzer for residual stress measurement applied to quality control

18 p3150 A69-35423

Stress relaxation of heat-resistant steels as function of equal stress during different elevated temperatures, applying results to time residual stress prediction

19 p3342 A69-35778

Soviet monograph on metal fatigue in aircraft structures, discussing effects of temperature, loading, residual stresses, surface finish and contact corrosion

20 p3622 A69-37231

Residual tensile stress distribution during plasma spraying determined as function of temperature field in blank

20 p3548 A69-37328

Axially symmetric distribution of residual strain in multilayered filament wound ring analyzed and compared with experimental results

20 p3628 A69-37774

X ray diffraction as nondestructive technique for measuring residual surface stress

21 p3845 A69-39476

Residual stress effect on strength of oriented glass fiber reinforced plastics under transverse and longitudinal tension

22 p3973 A69-40745

Residual stress measurement in steels and composite materials by X ray diffraction, discussing specimen preparation, diffractometer alignment, elastic modulus determination, etc

24 p4331 A69-42736

RESIDUES

Residue contributions to integrals associated with admittance of plasma or dielectric covered circular aperture antenna used to calculate surface wave contribution to waveguides

06 p0896 A69-17477

RESILIENCE

Viscoelastic materials gradual resilience loss under tensile stress, discussing mathematical relations between stress, loading time, elastic deformation and experimental verification

20 p3625 A69-37600

Automated rebound resilience apparatus for polymer dynamic mechanical properties studies over wide temperature range, using photoelectric device

21 p3689 A69-38593

RESIN BONDING

Resin bonded glass cloth for large airframe structures rectification

06 p0931 A69-17713

Film thickness effect on wear life of resin bonded solid lubricant film compared for various load test conditions [ASLE PREPRINT 68AM 7C-4]

07 p1139 A69-18624

Load, speed and coating thickness effect on wear life of resin bonded solid lubricant, using oscillating motion and low pressure blocks [ASLE PREPRINT 69AM 5C-3]

15 p2619 A69-30474

Energy dissipation in bonded structures, analyzing vibration damping, hysteresis loop and absorption coefficient dependence on deformation energy

17 p3066 A69-33943

Beryllium bonding, evaluating various surface preparations and adhesives

19 p3320 A69-35561

Outdoor aging effects on unstressed Al-Al lap shear joints bonded by various polymeric adhesives

19 p3320 A69-35562

Low temperature bond failures of room temperature vulcanizing methyl-phenyl adhesive bonds attributed to thermal stress cracking of primer, presenting in-process tests

19 p3321 A69-35563

Reinforcement unbonding onset in composite materials determined by continuous dynamic moduli and damping measurements of tensile specimens

20 p3511 A69-37761

Adhesives and adhesive resin bonding, describing internal stresses in joints, joints design for bonding, strength, bonding processes and testing

21 p3752 A69-38932

Strain distribution on surface of adhesive bonded box beam in simple bending, using water based brittle coating and self adhesive strain gages

21 p3844 A69-39325

Lap-shear strengths of Mg-Al alloy bonded with nylon-epoxy adhesive, including anodized coating rolling schedule and honeycomb core fabrication

24 p4323 A69-43417

Adhesive bonding of optical components, discussing material types, test methods, problem of operation at cryogenic temperature, etc

24 p4326 A69-43465

RESINS

NT ACRYLIC RESINS

NT ALKYD RESINS

NT EPOXY RESINS

NT ION EXCHANGE RESINS

NT PHENOLIC RESINS

NT POLYAMIDE RESINS

NT POLYESTER RESINS

NT POLYIMIDE RESINS

NT POLYMETHYL METHACRYLATE

NT POLYURETHANE RESINS

NT SILICONE RESINS

NT SYNTHETIC RESINS

NT THERMOPLASTIC RESINS

NT THERMOSETTING RESINS

Carbon fiber reinforced plastics development for aerospace use, presenting criteria for resins selection

17 p2992 A69-33647

RESISTANCE COEFFICIENTS U COEFFICIENTS

RESISTANCE HEATING

Resistance welding monitoring systems including thermal expansion slow scan ultrasonic and electric energy monitor/limiter systems

02 p0253 A69-11864

Energy release by Joule magnetic field dissipation in solar atmosphere

03 p0516 A69-14041

Conductivity and electron temperature in coaxial MHD generator plasma with magnetic field, studying Joule heating effect on performance

10 p1735 A69-23463

Joule heating role in generating internal gravity wave energy in auroral electrojet region, using linear model

12 p2064 A69-26010

Vacuum effects on resistance spot welds in aluminum, stainless steel and titanium alloys, noting X ray and tensile shear test results

12 p2103 A69-26622

Fluidic curved-wall electropneumatic converter optimization, presenting steady state, step and pulse mode responses for various positions and lengths of resistive heaters

15 p2553 A69-31298

Fringing effects on electric efficiency variation with slip for cylindrical induction MHD device operable as accelerator, generator or Joule heater [AIAA PAPER 67-714]

16 p2736 A69-32152

RESISTANCE THERMOMETERS

Thin film heated Pt resistance thermometer for skin friction or velocity measurements in air, water or blood

04 p0601 A69-15118

Resistance temperature transducers and thermocouples covering characteristics, readout and design for aerospace requirements

10 p1690 A69-23225

Oxygen boiling point studied via calibration of capsule type platinum resistance thermometers

14 p2540 A69-29888

Thermistor thermometer with low energy dissipation for flow measurements, discussing design considerations

15 p2608 A69-30296

Resistance thermometers operation characteristics and applications, noting sensor metals, true temperature and instrumentation errors

18 p3139 A69-35480

Resistance thermometer for measuring rapidly varying gas temperatures, optimizing length to eliminate heat transfer to mounting

23 p4163 A69-41557

RESISTIVITY

U ELECTRICAL RESISTIVITY

RESISTOJET ENGINES

Biowaste propelled resistojet control systems selection criteria based on NASA Manned Orbital Research Laboratory with six man crew [AIAA PAPER 68-121]

04 p0554 A69-15506

Ammonia resistojet stationkeeping subsystem on-board ATS 4 satellite, noting flight test data agreement with ground tests

09 p1560 A69-21212

Resistojet control system combined with control moment gyro payload capability for long duration manned orbital spacecraft missions [AIAA PAPER 69-255]

09 p1561 A69-21220

Life test of high temperature /2400 K/ 10 millipound resistojet thrusters, comparing results to theoretical predictions [AIAA PAPER 69-294]

09 p1563 A69-21232

Space station attitude control through resistojets and control moment gyros /CMG/, discussing propulsion, safety features, weight factors, etc

11 p1965 A69-24531

Fast heat-up electrothermal ammonia thruster role in development of hybrid resistojet in millipound thrust range [AIAA PAPER 69-496]

16 p2838 A69-32649

ATS 3 spacecraft ammonia-fueled resistojet engine test performance [AIAA PAPER 68-553]

21 p3786 A69-39754

Ammonia resistojet thruster, describing ammonia physicochemical properties and systems characteristics of pulsed mode operation and continuous thrust resistojets

23 p4203 A69-41931

RESISTOJETS

U RESISTOJET ENGINES

RESISTORS

NT THERMISTORS

Universal NOR element design with resistors, determining permissible combinations for static mode of operation by computer method

01 p0037 A69-10746

Theory of capillary flow for fluidic resistor design

05 p0705 A69-16011

Voltage divider network board composed of composite carbon resistors for measurement of terminal voltage of 3 Mev Dynamitron electron accelerator recalibration

06 p0907 A69-17705

Operating and storage conditions effects on reliability of Pd-Ag thick film resistors

08 p1283 A69-20131

Optimum microcircuit analog to digital converter for aerospace environment by combining monolithic circuits and thin film resistors

10 p1636 A69-23282

Electromagnetic scattering from thin wire loops under various impedance loadings, considering positive and negative resistors effect combined with reactive networks

11 p1837 A69-25000

Thin film cermet resistors for integrated circuits produced by thermal vapor deposition in vacuum, cathodic sputtering and explosive vapor deposition

13 p2268 A69-27466

Reliability control of 1/4-W resistors of tin oxide on glass substrate manufactured in quantity

15 p2627 A69-30837

Thin film tantalum nitride resistors technology and production, evaluating projected reliability of resistance circuits as function of operating and environmental conditions

15 p2628 A69-30846

Metal film resistor reliability for conventional and space use, outlining guidelines for fabrication and quality control

15 p2628 A69-30847

Thin film carbon resistors cutting with carbon dioxide gas laser, considering cylindrical bodies and aging properties

15 p2635 A69-31038

Single balanced modulators using square law resistors /space charge limited diodes/, discussing noise properties, conversion losses and terminating conductance

16 p2758 A69-31756

RESOLUTION

NT ANGULAR RESOLUTION

NT HIGH RESOLUTION

NT RADAR RESOLUTION

NT SPECTRAL RESOLUTION

Signal resolution during space diversity reception with nondirective or weakly directive antennas and noncorrelated receiver background noise, discussing signal processing

06 p0890 A69-17800

Object restoration, discussing data processing method for single variable functions with small signal to noise ratios

07 p1137 A69-19721

Motion measurement using Doppler shift of scattered laser light, noting high resolution

09 p1492 A69-21398

Statistical estimation theory giving angular resolution of imaging systems in terms of noise characteristics and modulation transfer function

10 p1725 A69-24048

Real time 2000 line TV camera with 40 MHz bandwidth, 1600 line vertical resolution and 1000 line horizontal resolution [SMPTE PAPER 105-73]

12 p2077 A69-25769

Practical time resolution of streak camera, discussing streak camera transfer function and measurement of resolution with pulsed laser diode emission

12 p2084 A69-26152

Energy resolution improvement in cylindrical electrostatic energy selector by focusing and limiting electron beam before entrance into monochromator

14 p2450 A69-29572

Close visual binaries separations for checking large aperture telescope resolution, listing binaries, orbits and ephemeris

16 p2855 A69-31662

Tv transmission of two dimensional transparency hologram with reduced resolution requirements on camera tube, eliminating zero order terms

17 p2974 A69-33401

Compressed signal spectral analyzer resolving power, discussing dynamic amplitude range influence and weighting functions role

17 p2939 A69-33906

Resolving power and field of view relations of holographic device for images recording through inhomogeneous atmosphere

20 p3540 A69-37728

Propagation effects on lane ambiguity resolution ability of Omega VLF navigational system, noting waveguide mode interference

21 p3673 A69-38756

Observation time influence on interferometers resolution limits due to radio wave phase fluctuations

21 p3682 A69-39122

Resolution limitations in holographic images using single record, discussing lensless holography using plane reference waves

21 p3727 A69-39778

RESOLUTION CELL

Range-Doppler processing in pulsed radar applied to imaging of rigid rotating body with motion compensating resolution cells

08 p1270 A69-19861

Resonance theory of thermomolecular recombination kinetics applied to hydrogen atoms

01 p0122 A69-10034

Partial avoidance of jump resonance in nonlinear feedback system, applying procedure to feedback amplifier circuit

01 p0051 A69-10442

Resonance energy transfer mechanism in Forster-Dexter theory of electron energy transfer by resonance interaction in condensed media, using many particle treatment

01 p0121 A69-12527

Input impedance of slot antenna in primary resonance region

04 p0577 A69-14784

Lithium abundance determination difficulties for undisturbed solar photosphere, noting Li I resonance line identification and model choice

05 p0821 A69-15849

Paraelectric resonance spectroscopy on KCl, using bistable dipole model

06 p0982 A69-18235

Resonance conditions in dielectric sheathed or plug loaded phase arrays of waveguides

08 p1281 A69-20034

Nonlinear integrodifferential kinetic equation for weak turbulence of resonant four wave processes, considering spectral energy density

11 p1921 A69-24294

Resonances in cross sections for electron impact excitation of forbidden lines in oxygen molecular ion at near threshold energies for astrophysical applications

11 p1921 A69-24417

Periodic Trojan orbits for resonance 1/12 in restricted three body problem, noting bridge of stable and unstable orbit lanes

13 p2350 A69-27824

Resonances in elastic cross section for electron/hydrogen atom scattering noting wide structure

15 p2657 A69-31265

Ca 2 resonance line profiles in large disk flares and in surrounding plage, discussing H and K line behavior

17 p3023 A69-33054

Resonances and doublets observation by neutron radiative capture and transmission of W and Zr isotopes in kev region, noting partial wave strength functions

18 p3175 A69-34314

Bogoliubov averaging method of perturbation in wave mechanics for radiation and matter interaction, considering monochromatic and broad spectral incident wave for resonance study

18 p3175 A69-35483

Nonlinear roll-yaw attitude motion of spinning symmetric satellite in elliptical orbit near internal or external resonance [AAS PAPER 68-124]

20 p3616 A69-37178

Resonance theory of thermomolecular atomic recombination kinetics based on transition complexes identification as quasi-bound states or orbiting resonances

20 p3579 A69-37345

Alouette 2 ionograms secondary resonances data indicating day-night effect in relative frequency of occurrence

20 p3496 A69-37889

Periodic orbits obtained for special restricted three body problem in resonance using numerical integration

22 p4031 A69-40909

RESONANCE PROBES

Inhomogeneous and anisotropic cold plasma filled plane capacitor resonance in steady magnetic field applied to plasma diagnostics, using calculus of variations

13 p2304 A69-27240

Pure quadrupole resonance spectrum of iodine-127 in solid stannic iodide measured in specific temperature range at atmospheric pressure

22 p3986 A69-40726

RESONANCE SCATTERING

Barium plasma density measurements by Langmuir, microwave probes and resonance fluorescence scattering compared in Q device

02 p0288 A69-12172

Dense plasma temperature determination by gamma ray resonance scattering

02 p0291 A69-12481

Bounce resonant scattering of particles trapped in geomagnetic field

03 p0503 A69-14014

Lyman-alpha observations of Venus by Mariner 5 analyzed, assuming resonance scattering of flux by hydrogen or deuterium atoms in Venus atmosphere

05 p0815 A69-16255

Bounce resonant scattering of auroral zone electrons, noting contribution to microbursts and mirror point diffusion

05 p0754 A69-16260

Differential cross section frequency dependence for resonant scattering of monochromatic light by dilute gas atoms [IEEE PAPER T-8]

05 p0776 A69-16328

Twilight resonance emissions due to atmospheric sodium, lithium and potassium, noting similarity of annual sodium and lithium twilight abundance variations [AFRL-69-0097]

06 p0918 A69-17494

Cyclotron- and bounce-resonance scattering of electrons trapped in geomagnetic field for pitch-angle scattering, noting whistler mode disturbances

07 p1208 A69-19367

Electrons resonance scattering by diatomic molecules from elastic and inelastic channel measurements in transmission

11 p1921 A69-24418

Excitation sources distribution in chromosphere from observed H alpha line contour, considering resonant scattering and internal excitation

15 p2683 A69-30509

Number and mass of sodium atoms in comet Ikeya-Seki 1965f head calculated from spectral observations, ascribing D lines to resonance scattering of photospheric radiation

15 p2685 A69-30526

Asymptotic formulas for X and Y functions for resonance radiation scattering in layer, analyzing Doppler absorption and line profiles

16 p2813 A69-32588

Plane wave scattering by multimode corrugated structure with H mode incidence, revealing theoretically scattering resonance as P type Wood anomalies

17 p2925 A69-33844

Polarized radiation resonance scattering in weak uniform magnetic field, using Monte Carlo method to trace and count photons

20 p3577 A69-38157

Monochromatic electromagnetic field in resonant medium, examining linear, incoherent and coherent nonlinear propagations and resonant scattering

21 p3769 A69-38382

Flashlamp-pumped dye laser for resonance scattering studies of upper atmospheric composition, describing laser construction and tuning

22 p3962 A69-40440

Quantum-mechanical theory of unimolecular kinetics and predissociation developed from generalized Fano theory of resonant scattering

22 p3986 A69-40724

RESONANCE TESTING

Ground and air resonance measured with gimbaled whirl tower stand for soft inplane matched stiffness rotor, discussing body inertia and speed limits [AIAA PAPER 69-205]

07 p1055 A69-19559

RESONANT CAVITIES
U CAVITY RESONATORS
RESONANT FREQUENCIES

Structural vibration problems of SA 330 helicopter from test flight data, discussing natural frequency displacement of blades and dynamic response improvement of structure

01 p0009 A69-10158

Natural vibration properties of elastic free-free body obeying Hooke law analysis from equilibrium and motion equations, determining Green tensor

01 p0167 A69-10323

Semiautomatic computer for determining torsional oscillation natural frequency in multimass in-line systems

01 p0035 A69-10596

Runway roughness effects on aircraft, formulating relationship between weight and resonant frequency through simple harmonic motion analogy

01 p0057 A69-11274

Discrete model for investigating beam vibration under various end conditions, determining natural frequency dependence on degrees of freedom

02 p0336 A69-11462

Theoretical prediction for modified and hybrid plasma resonances discrimination, noting sensor axis angle to geomagnetic field

02 p0241 A69-11731

Superposition of discrete number of collinear amplitude modulated harmonic oscillations

02 p0281 A69-12252

Liquid propellant space launch vehicles longitudinal modes natural frequency, discussing coupled engine-propellant supply system stability [AIAA PAPER 68-289]

02 p0335 A69-12393

Whirl instability of externally pressurized gas journal bearing with peripheral feeding holes, discussing analytical natural frequency of shaft bearing systems

02 p0254 A69-12426

Earth ionosphere resonator natural frequencies, considering diurnal variation and geomagnetic field eccentricity

03 p0422 A69-13512

Natural frequencies and mode shapes of coupled bending vibrations of pretwisted rectangular cross section beams determined by Rayleigh-Ritz energy method

03 p0529 A69-13989

Current oscillations or instabilities in semiconductor wafer with one electromagnetic mode and one carrier mode, investigating resonant frequencies

03 p0408 A69-14049

Temperature distributions, thermal stresses and natural frequencies of radial vibrations in thin circular cylindrical shells

04 p0675 A69-14704

Normal modes and natural frequencies of combined linear elastic structures resting on immovable base

04 p0678 A69-14870

Testing techniques and graphical presentation of test results to determine resonant frequencies and oscillation modes in sporting gliders

04 p0549 A69-15420

Natural frequencies controllability by induced thermal membrane stresses examined for thin disk

04 p0682 A69-15494

Frequency vs power absorption characteristics of deactivated klystrons, noting resonance frequencies and perturbation effect of electron beam loading

05 p0729 A69-15978

Blade natural frequency distribution around rotor and mechanical coupling between blades effects on flexing amplitudes under forced vibration [ASME PAPER 68-WA/GT-3]

05 p0837 A69-16139

Bending-torsion mode of rotating tapered twisted turbomachine blade, analyzing coupled flexural and torsional vibrations effect on natural frequency [ASME PAPER 68-WA/GT-6]

05 p0838 A69-16141

Resonant frequencies for beam type bending oscillations of thin walled rib-reinforced circular cylindrical shell freely supported at outermost ribs

05 p0841 A69-16204

Continuous and triggered audio frequency noise bands associated with ionospheric lower hybrid resonance frequency observed on OGO 2

05 p0754 A69-16257

Natural frequencies and modes of skew membranes obtained by Rayleigh-Ritz method

06 p0121 A69-17146

Electrostatic ionospheric waves excited around lower hybrid resonance frequency by high energy electrons

06 p0918 A69-17381

Resonant frequencies and fields in circular cylindrical microwave cavity containing cold uniform magnetoplasma dielectric

06 p0968 A69-17763

Radiation transfer in resonance lines and in recombination continuum in plasma, discussing frequency redistribution during reradiation and optically dense systems

07 p1188 A69-18282

Nonlinear interaction effects on frequency and polarization characteristics of dual polarization gas laser, discussing weak cavity anisotropies

07 p1145 A69-18473

Traveling wave microwave and optical resonators synthesis, determining design conditions for resonant frequencies

07 p1145 A69-18477

Natural frequency of fluid oscillations in complex pipelines

07 p1119 A69-18745

Natural modes and eigenfunctions of low amplitude oscillation determined by Ritz averaging method for ideal fluid with equilibrium surface in weak force field

07 p1119 A69-18746

Plasma frequency resonances observed by topside sounders interpreted as slowly propagating waves suffering oblique reflection, noting effects of nonhorizontal magnetic field

07 p1124 A69-18837

Open resonator reflection coefficient resonance curve compared with transmission coefficient, noting low Q waves excitation role

07 p1106 A69-19152

Resonance effects during piezoelectric interaction between charged drift wave and flexural wave in semiconductors with one sign current carriers

08 p1371 A69-19806

Shunted resonators on transmission line with asymmetrical response offering selectivity from resonance frequency standpoint

08 p1271 A69-19917

Gas laser emission natural frequency fluctuations spectral density measured by auxiliary heterodyne laser

08 p1326 A69-20540

Forbidden resonance line of Ca II in Arcturus from spectrograms at widely different times of year

08 p1392 A69-20558

Resonant frequencies, vibration modes and stress distributions for naturally vibrating plane wide blades of turbomachines

08 p1376 A69-20764

Rigid top mass effect on longitudinal response of model vehicle propellant tank, determining natural frequencies and forced asymmetric response

09 p1616 A69-21979

Helium-like ion resonance satellite lines in laboratory and solar plasmas, noting coincidence between solar satellite energy and energy level interval

09 p1598 A69-22158

Natural vibration frequency of circular orthotropic plate with variable rigidity

09 p1618 A69-22238

Vibration natural frequencies and mode shapes in cylindrical shells clamped at both ends, using fundamental differential equation under dynamic surface loading

09 p1618 A69-22274

Turbomachinery multiple pure tone noise associated with acoustic resonance of inlet cavities examined by narrow band filter tracking integer multiples of rotative speed

[ASME PAPER 69-GT-2]

09 p1572 A69-22509

Two mirror resonators, discussing curvatures formation and stability conditions to derive natural frequencies

09 p1520 A69-22680

Gyromotor flanges axial rigidity measuring methods based on axial deflection of flange or natural frequency of oscillating system

09 p1513 A69-22704

Resonance relations of rotational and orbital frequencies of solar system planets and satellites estimated for statistical significance

10 p1771 A69-22852

Rotatory inertia and shear deformation effects on natural frequency and bending mode shape in equations of motion of rotating turbomachine blade [ASME PAPER 69-VIBR-50]

10 p1804 A69-24148

Diakoptics applied in combination with perturbation method to determine natural frequencies of turbine buckets coupled by tie wires and/or cover [ASME PAPER 69-VIBR-57]

10 p1804 A69-24151

Central circular hole effect on fundamental frequency of rectangular fixed edges plate, discussing hole size, square plates, etc [ASME PAPER 69-VIBR-62]

10 p1805 A69-24156

Weight minimizing of circular disk subjected to behavioral and side constraints, considering resonance frequency of vibration and tolerances [ASME PAPER 69-VIBR-1]

10 p1700 A69-24159

Natural frequencies and mode shapes for longitudinal oscillations of liquid filled elastic circular cylindrical tank with flexible inverted conical bulkhead [ASME PAPER 69-VIBR-11]

10 p1806 A69-24165

Transverse beam natural vibration frequency evaluation method from Timoshenko theory

11 p1970 A69-24581

Characteristic frequencies approximation formula for gas bubbles in liquids compared with exact solutions

11 p1915 A69-24582

Nonlinear resonance formation during spatial nonlinear vibrations of solid bodies, establishing relations between vibration and excitation frequencies

11 p1919 A69-25167

Frequency characteristics of flexible compensated manifolds for aircraft engines, considering axial force

11 p1826 A69-25332

Natural frequencies and forms of small vibrations of ideal liquid in spherical container with weak force field, considering surface tension forces

11 p1875 A69-25484

Optimal design of structures with constraints on strength and natural frequency, developing steepest descent boundary value method

11 p1989 A69-25496

Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle pogo oscillations by lowering feed system natural frequencies

11 p1967 A69-25498

Inplane and rotary inertia effects on free vibration frequencies of circular cylindrical shells eccentrically stiffened by orthogonal set of stringers and/or rings

11 p1992 A69-25520

Free vibration of discretely stiffened cylindrical shells with arbitrary end conditions programmed for digital computer, considering flexure, extension, torsion and nonsymmetric stiffener cross section

11 p1992 A69-25521

Resonant load impedance effects on Gunn diode oscillators output fluctuations, noting maximum power conditions

11 p1853 A69-25609

Lumped element construction technique involving crossed coils to reduce ferrite produced heat in resonance isolators, using substituted YIG

11 p1856 A69-25632

Ideal resonance problem with single critical term for case of libration solved by modified Poincare method, considering 24-hr satellite

12 p2152 A69-25800

Surface wave patterns of truncated conical shells with free edges attributed to mechanical properties

12 p2178 A69-26002

Linear vibrational systems natural frequencies and damping characteristics determined from system reaction to pulse effect

12 p2178 A69-26004

Free vibration fundamental natural frequency of shallow shell or dished plate with simply supported square boundary

12 p2179 A69-26211

Resonance circuit application to harmonic analysis of periodic functions on analog computer, considering transient period and sequential order

12 p2123 A69-26718

Natural frequencies of ring-stiffened thin walled cylindrical shell determined by partial differential equations of motion, allowing for eccentricity

12 p2184 A69-26810

Negative resistance parametric amplifier used as tracking filter, noting resonant frequency dependence on pumping frequency and input and idler circuits

13 p2225 A69-27183

Natural vibration modes of linearly tapered rectangular plates, approximating plate characteristic shapes with series of products of beam characteristic shapes

13 p2358 A69-27211

Self controlled vibration of elastically supported cylinder in fluid stream due to von Karman shedding, considering fluidelastic interaction, structural deformation and natural frequency

13 p2360 A69-27437

Vibration modes in four lowest natural frequencies of clamped rectangular plates with linear thickness variation, using Ritz method

13 p2361 A69-27442

Variational method for weak second order resonant interactions among waves with position and time varying amplitudes and phase angles

13 p2297 A69-27634

Frequency memory in cavity controlled Gunn oscillators, discussing loop gain and bandwidth dependence on oscillation mode and bias voltage

13 p2229 A69-27677

Subelement geometrical stiffness determined, considering complete element natural modes

13 p2362 A69-27838

Frequency equation for thickness effects on axisymmetric radial and rotatory vibrations of empty or fluid filled isotropic spherical shell

13 p2363 A69-28185

Dynamic characteristics of Clough-Tocher triangle for natural frequency of simply supported plate, noting bending elements

13 p2365 A69-28246

Oscillation in resonance tubes excited by subsonic jet, analyzing pressure and frequency for small Mach numbers by using wave diagram

13 p2370 A69-28630

Axisymmetric thermoelastic vibrations of infinite and finite cylindrical shells, determining natural frequencies and stress wave propagation

14 p2532 A69-28979

Semifree elastic membranes standing waves fundamental frequency, developing variational principle for first eigenvalue

14 p2535 A69-29365

Temperature behavior of resonant and antiresonant frequencies as function of electromechanical coupling and overtone order in piezoelectric resonators

14 p2421 A69-29542

Coupled magnetoacoustic waves in conducting paramagnetic fluid in resonance region due to mechanical and magnetic motions, considering dissipation

14 p2492 A69-29609

Bladed disk assemblies vibrational properties, discussing dynamic characteristics of system with pairs of close natural frequency modes under forced vibration

15 p2704 A69-30304

Natural frequencies and modes of complex structures composed of beam elements, considering hysteretic damping for response and transmissibility

15 p2706 A69-30431

Resonance measurement of power percentage in single spurious mode of overmoded waveguide, using back to back transducers and reflection at input

15 p2577 A69-30611

Natural oscillation frequency of gyrocompass mounted in torsional suspension, taking into account moments of inertia of sensitive element

16 p2791 A69-32282

Force resonance oscillations of one degree of freedom system with randomly time varying natural frequency

16 p2813 A69-32285

Saturn 5 longitudinal instability /POGO/ precluded by lowering S-1C stage propulsion system resonance below structural frequency

[AIAA PAPER 69-548]

16 p2868 A69-32658

Test stand for free oscillations frequencies and mode shapes of truncated conical shells of revolution with clamped edges and one free edge

17 p3058 A69-33202

Aerodynamic aspects of tail rotor design and structural dynamics of stiff inplane configurations, discussing blade natural frequencies

[AHS PAPER 342]

17 p3059 A69-33504

Natural gyrofrequencies of rigid rotor during slowing/stopping at high forward speed, using simple approximation

17 p2899 A69-33507

Rb 87 vapor laser output power dependence on magnetic field strength and resonator detuning, discussing laser and atomic transition frequency tuning

17 p2983 A69-33694

Automatic tuning of superconducting cavity resonant frequency using optical feedback, discussing phase error processing and frequency deviation

17 p2937 A69-33781

Thin walled cantilevered fiberglass reinforced shafts damping characteristics dependence on natural vibration modes and fibers orientation

17 p3065 A69-33938

Rotating shafts impact damping efficiency increaseable by providing proper clearance to reduce shaft stress in critical resonance frequency region

17 p3066 A69-33946

Polarization, frequency and energy characteristics of lasers with resonators containing polarization transforming elements

17 p2983 A69-33967

Natural frequencies and vibration modal shapes of asymmetrical airfoil blades analyzed by differential equations of motion, noting flexure coordinates center variations effect

17 p3067 A69-34053

Elastic beam-plate vibration natural frequency and dynamic instability in transverse static or oscillating magnetic field

[ASME PAPER 69-APM-B]

18 p3215 A69-34400

Forced vibration testing of complex continuous systems, demonstrating suppression of certain resonant frequencies due to laboratory techniques

18 p3114 A69-34422

Critical speeds of high speed turbine rotors running in friction bearings determined by varying natural frequencies of rotor and supports

18 p3147 A69-34545

Supported shafts natural vibration frequencies determination by averaging shaft parameters, noting suitability in HF ranges

18 p3147 A69-34546

Resonance effects between H levels by induced electric dipole transitions, using spatially periodic potential barriers

18 p3179 A69-35488

Transverse oscillations of shallow multilayer shells, using tangential-stress distribution law in determining natural oscillation frequencies in single and sandwich layer panels

19 p3435 A69-35842

Natural oscillations frequency spectrum of turbomachine impeller blades subjected to random variations determined with frequency distribution function obtained by moments method

19 p3436 A69-35844

Natural frequencies and mode shapes of vibration of cylindrical shells orthogonally stiffened with rings and stringers

[AIAA PAPER 68-349]

19 p3437 A69-35948

Natural frequencies of thin oblique angled isotropic plates, discussing closed form solution to differential equations

19 p3438 A69-36312

Combined resonance transition in n-type InSb by IR radiation, plotting intensity against magnetic field for different carrier concentrations to infer band structure

19 p3385 A69-36520

Gallium arsenide junction lasers operating above threshold, showing resonant modes dependence of steady state gain function and frequency dependence of spatial gain distribution

19 p3338 A69-36691

Transient oscillations in ammonia maser oscillator observation based on switching achieved by signal injection into cavity at molecular resonance frequency

19 p3339 A69-36825

Clamped skew plates natural frequencies analysis using Galerkin method, expressing deflections as double series of beam characteristic functions, stating eigenvalues and eigenvectors

20 p3621 A69-37201

Mechanical loss factors calculated by approximation formula from resonance curves of Voigt-Kelvin and Maxwell models

20 p3623 A69-37435

Rocket observations of VLF ionospheric resonances, noting artificial stimulation of detectable amplitude noise with cut-off at low hybrid resonance frequency

21 p3671 A69-38356

Ionospheric lower hybrid resonance /LHR/ noise discovered by Alouette 1, describing possible mechanisms for origin

21 p3702 A69-38358

Natural oscillations of end-hinged solid beam with variable parameters and concentrated masses, determining natural frequencies

21 p3833 A69-38575

Asymmetrical oscillations of cylindrical shell with elastic bottom containing liquid, discussing liquid level influence on natural oscillation frequencies

21 p3834 A69-38718

Free vibration of thin cylindrical shells with thickness discontinuity, considering natural frequencies and mode shapes dependence on thick/thin ratio

21 p3836 A69-38984

Acoustoelastic interaction effects of sonic bangs on natural frequencies response of large windows backed by closed cavity

21 p3836 A69-38988

Response of three level particles system with equidistant spectrum under resonant action of acoustic and electromagnetic pulses sequence with different frequencies

21 p3737 A69-39068

Natural frequency equations for torsional vibration of fixed/fixed and fixed/ simply supported uniform thin walled beams of open section based on energy method

22 p4040 A69-39935

Lasing properties of Ni-doped GaAs diodes evaluated by plotting resonance, mode amplitudes and frequencies for various bias currents and external capacitance

22 p3912 A69-40606

Natural frequency of thin plate subject to cylindrical bending, analyzing panel flutter by three mode approximation for large buckling deflection

22 p4045 A69-40821

Resonance frequency behavior of waveguide cavity with evanescent air gap symmetrically loaded with dielectric

22 p3900 A69-40925

Natural frequencies of N open dielectric waveguides system, obtaining fields expressions and dispersion equation for propagation constants

22 p3901 A69-40954

Buckled rectangular plates with constrained edges, analyzing natural frequencies as basis for supersonic panel flutter analysis

22 p4046 A69-41049

Polycrystalline ferroelectrics dielectric dispersion region in decimeter-centimeter wavelength range using waveguide resonance method employing wideband strip line

22 p3997 A69-41167

Magnetospheric natural toroidal oscillation periods solved by expression from perturbation method given by Landau and Lifshits where WKB method inapplicable

23 p4157 A69-41863

Waveguide Y-circulator parameters thermal stability equation, considering temperature, magnetization level and magnetic field resonance effects on tuning frequency

23 p4123 A69-41951

Combination resonance and instability regions of second type for parametrically excited oscillations with nonlinear /cubic/ damping

23 p4230 A69-42107

Rosman I reflector antenna for collecting data from earth orbiting satellites, discussing dynamic analysis of structural response to natural frequencies

23 p4231 A69-42133

Book on interaction between oscillatory systems and energy source of limited capacity, examining stability and resonance phenomena

23 p4170 A69-42166

Natural vibrational frequencies of uniform thin elastic isotropic flat plates, investigating rectangular and parallelogram plates with various edge conditions

23 p4233 A69-42348

Electromagnetic scattering by small plasma ellipsoid moving in vacuum through external steady magnetic field, analyzing resonance phenomena

24 p4282 A69-42979

RESONANT VIBRATION

Acoustic resonance excitation in axial flow compressor annulus by wake shedding from blades

01 p0142 A69-10058

Damping capacity and resistance to resonance fatigue of titanium and aluminum based steels and alloys

03 p0443 A69-13025

Single and double resonance in system of coupled nonlinear differential equations describing vibration phenomena in mechanical and similar systems

03 p0527 A69-13748

Perturbed nonlinear systems with many degrees of freedom, analyzing resonant oscillatory and rotary motions

04 p0631 A69-15536

Natural longitudinal single frequency oscillations of system of n material points connected in series by nonlinear elastic threads and with energy dissipation

05 p0832 A69-15687

Resonant beam tuned vibration damping device, noting weight saving potential

[ASME PAPER 68-WA/GT-2]

05 p0837 A69-16138

Orthogonality of natural oscillation modes of shells of arbitrary geometry, using equations of motion from Vlasov engineering moment theory
05 p0840 A69-16200

Resonance particle effects on flute oscillation kinetic stability when resonance particles drift under influence of magnetic field inhomogeneity
06 p0965 A69-17516

Resonant frequencies, vibration modes and stress distributions for naturally vibrating plane wide blades of turbomachines
08 p1376 A69-20764

Dynamic tests of mechanical properties of polyamide Tarlon X-A using free and resonant vibrations methods
09 p1528 A69-21496

Vibratory acceleration limiting equipment attachment for resonance conditions, utilizing attachment stiffness reduction above predetermined value
[ASME PAPER 69-VIBR-23]
10 p1806 A69-24170

Multiparameter optimum damping for harmonically excited linear stable strictly dissipative n degrees of freedom system, locating multivariable saddle points
[ASME PAPER 69-VIBR-42]
10 p1807 A69-24180

Nonlinear large amplitude vibrations of flexible beam with pinned ends supported simply on rigid base noting frequencies, modes, waveforms and stress distribution
[ASME PAPER 69-VIBR-43]
10 p1807 A69-24181

Nonlinear resonance formation during spatial nonlinear vibrations of solid bodies, establishing relations between vibration and excitation frequencies
11 p1919 A69-25167

Cylindrical propellant tanks dynamic stability and parametric resonance, analyzing axial preload, liquid depth, top impedance and ullage pressure by Donnell theory
11 p1989 A69-25499

Natural oscillations excitation in magnetoactive plasma by modulated electron beam ascribed to Doppler or Cerenkov effects
11 p1932 A69-25535

Natural oscillations excitation instabilities by modulated ion beams in magnetoactive plasma ascribed to anomalous Doppler effect
11 p1932 A69-25536

Resonant vibrational energy transfer between specific mode of carbon dioxide and N molecules at high temperatures, monitoring IR emission
12 p2131 A69-25984

Helmholtz resonance in rocket injectors as function of frequency response of interaction between chamber pressure and dissolved gas-fuel injection flow rate
12 p2148 A69-26806

Resonance tube excitation from energy depletion in central part of subsonic jet supplying tube
13 p2247 A69-27738

Nonstatic gyroscope nonlinear oscillations caused by swaying of synchronous gyromotor rotor
13 p2264 A69-28438

Oscillation in resonance tubes excited by subsonic jet, analyzing pressure and frequency for small Mach numbers by using wave diagram
13 p2370 A69-28630

Parametric resonance motion in viscous fluid column in communicating vessels during vertical oscillations, calculating critical accelerations over viscosity range
14 p2432 A69-29628

Oscillations analysis in quasi-linear autonomous system with two degrees of freedom, using point mapping for case of resonance
15 p2653 A69-31193

Self excited vibrations of rotors supported in gas bearings from analyzing solutions to equations of rotor motion
16 p2875 A69-32250

Nonlinear vibrations of mechanical two degrees of freedom system during resonance described using Krylov-Bogoliubov method to obtain differential equations solutions
16 p2875 A69-32255

Plane oscillations of liquid in rectangular elastic vessel determined to obtain frequencies and mode shapes of natural oscillations from velocity potential boundary conditions
17 p2950 A69-33200

Near resonant oscillations of warped turbine or compressor blades, discussing stress-strain relations
17 p3064 A69-33918

Axisymmetric bending oscillations of thin circular plates of constant thickness with allowance for energy

dissipation in material, analyzing resonance and phase amplitude characteristics
17 p3064 A69-33919

Random excitations effects on vibrating nonlinear single degree of freedom system, statistically estimating resonance mode probability
18 p3171 A69-34554

Resonance effects in finite hollow cylinder immersed in ideal compressible fluid and exposed to compression wave
18 p3215 A69-34567

Machine parts vibration attenuation, discussing input vibration reduction, resonance avoidance, damping, vibrating parts strengthening and shakers
18 p3148 A69-34619

Dynamic instability regions of parametric resonance of cylindrical shells with curved generating lines under axial and radial pressure
18 p3223 A69-34979

Resonant oscillations amplitude of nonlinearly elastic hinged cylindrical shell determined with cubic equation taking into account Hooke law, linear stresses, shell theory displacements, etc
19 p3435 A69-35843

Steady resonance operation modes of nonlinear oscillatory and rotational systems described by differential equations with deviating argument, using averaging procedure
19 p3374 A69-36469

Rotational motion bounds of satellites exhibiting parametric resonance under small librations in orbital plane
20 p3617 A69-37191

Passive helicopter rotor isolation for alleviating rotor induced vibration, using dynamic antiresonant vibration isolator
20 p3463 A69-37807

Spacecraft natural vibrations analyzed using point transforms with allowance for control systems imperfections
21 p3826 A69-39637

Nonlinear system oscillations analysis based on small parameter method and difference equations, including resonant case and stability criterion for periodic solutions
22 p3980 A69-40108

Natural torsional-flexural vibrations of bars with single symmetry, using matrix equations of equilibrium, displacements and natural coupled vibrations
22 p4043 A69-40456

Turbomachinery periodic structures design to improve tolerance to inflow distortion and resonant oscillatory flows, considering large amplitude pressure waves propagation
[SAE PAPER 690388]
23 p4201 A69-41666

Magnetospheric natural toroidal oscillation periods solved by expression from perturbation method given by Landau and Lifshits where WKB method inapplicable
23 p4157 A69-41863

RESONATORS

NT CAVITY RESONATORS

NT MULTIMODE RESONATORS

Pulsar radiation origin related to electromagnetic wave distortion during propagation through resonant media
01 p0149 A69-10272

YIG single crystal resonator tuning of Gunn diode in coaxial line circuit
01 p0042 A69-10320

Perfect piezosemiconductor resonator /phaser/ with CdSe/CdS/ crystal, discussing vibration excitation in wurtzite type crystal in electric field of electron drift
03 p0431 A69-13930

Magnetic retuning of resonator with helical electron flux /gyromonoton/ in starting and prestarting modes
03 p0407 A69-13979

Errors of wavemeter employing open resonator with spherical mirrors
03 p0407 A69-13983

Circuit properties of microwave dielectric resonators, discussing mode identification, resonant frequencies, coupling control, loaded Q, frequency tuning and periodic arrays
04 p0575 A69-14750

Microwave Fabry-Perot resonator for anisotropic plasma diagnostics in presence of static magnetic field
04 p0635 A69-14757

Varian cesium resonator as prime frequency testing standard with accuracy dependent on electronic system for quartz slaving
04 p0600 A69-15068

H resonator for charged particle beams combination at output of double beam linear accelerator
05 p0727 A69-15639

Resonance rotation of polarization plane in circular waveguide with ferrite resonator
05 p0718 A69-15640

Mode suppression by mixed polarization in Michelson interferometer type of optical resonator
05 p0776 A69-16330

Selective resonators for laser emission spectral structure control, proposing dispersion power increase by inserting telescopic system
05 p0777 A69-16371

Mechanically and electronically tunable resonator for driving IMPATT and Gunn diodes
07 p1097 A69-18455

Open resonator reflection coefficient resonance curve compared with transmission coefficient, noting low Q waves excitation role
07 p1106 A69-19152

Annular traveling wave resonator for feedback in resonance particle accelerator of smooth waveguide
07 p1107 A69-19160

Shunted resonators on transmission line with asymmetrical response offering selectivity from resonance frequency standpoint
08 p1271 A69-19917

Atomic clocks frequency standards, discussing masers, atomic beam resonators and gas cells and various applications
09 p1501 A69-22598

Waveguides and resonators design by solving scalar problem for eigenvalues of elliptic operator
09 p1469 A69-22626

Input admittance response characteristics and input susceptance and input conductance of resonant reactive modulator with varactors and nonlinear losses
10 p1665 A69-24066

Resonators made of YIG single crystals exhibiting lowest linewidth in ferromagnetic resonance at microwave frequencies
11 p1855 A69-25627

Microwave directional filter using ring resonator and couplers to obtain low transmission loss and center frequency tuning
13 p2226 A69-27187

Book on open resonators and open waveguides
14 p2419 A69-29316

Temperature behavior of resonant and antiresonant frequencies as function of electromechanical coupling and overtone order in piezoelectric resonators
14 p2421 A69-29542

Disk and transmission line microstrip resonators radiation, measuring fractional amount of radiated power
16 p2760 A69-31946

H resonator for charged particle beams combination at output of double beam linear accelerator
16 p2762 A69-32497

Resonance rotation of polarization plane in circular waveguide with ferrite resonator
16 p2762 A69-32498

Radiation dynamics of GaAs injection semiconductor laser, plotting spike period dependence on resonator length
19 p3337 A69-36535

Electromagnetic waves emission intensity in one dimensional resonator, allowing for wave interference effects
22 p3966 A69-41172

Recursion formula for multiwave interferometer derived, with allowance for multiwave interference, to calculate resonant circuit maxima and minima
23 p4165 A69-41729

Double cellular surface geometry effect on dispersion and coupling impedance of two dimensional periodic resonator slow wave structure
23 p4140 A69-42048

RESOURCES

NT EARTH RESOURCES

NT EXTRATERRESTRIAL RESOURCES

Avionics in forest resource inventories management, noting design of radar altimeter for low level aerial photography
01 p0080 A69-10352

Earth resource satellites, discussing world ground station network for data reception and information dissemination and training and research center
[UN PAPER 68-95529]
06 p0917 A69-17067

RESPIRATION

NT HIGH ALTITUDE BREATHING

NT PRESSURE BREATHING

Changes in blood circulation, external respiration and gas exchange rates in humans during prolonged hypodynamia
03 p0377 A69-14204

High oxygen concentration influence on animal organisms noting respiration, pulmonary gas exchange, hypoxia, brain phosphorylation, immunological indices and morphological structure of rats and mice
05 p0709 A69-16512

Weightlessness effects on human external respiration, gas exchange and energy expenditure indices during flight of Voskhod 2
12 p2020 A69-26563

Glycolysis control by respiration in human leukocytes with and without Pasteur effect conditions
15 p2555 A69-30413

High oxygen concentration influence on animal organisms noting respiration, pulmonary gas exchange, hypoxia, brain phosphorylation, immunological indices and morphological structure of rats and mice
18 p3095 A69-34731

Chronic hypoxic hypoxia on oxygen-hemoglobin dissociation curve and respiratory gas transport in man, considering altitude residents and heart and lung diseased patients
21 p3650 A69-38383

Amlyl nitrite inhalation effects on cardiovascular system, discussing tachycardia and carotidograms
21 p3661 A69-39278

Respiratory gas exchange during workloads, comparing values for ventilation, oxygen uptake and carbon dioxide output measured in air and in helium-oxygen mixture
22 p3891 A69-40221

Respiration effects on heart rhythm emphasizing direct mechanical influences
23 p4097 A69-42093

Oxygen exchange in Scenedesmus and Chlorella as function of carbon dioxide, compensation point, Hill activity and photorespiration, using mass spectrometry
23 p4099 A69-42528

RESPIRATORS

Bird respirator function at simulated high altitude, noting adequate support in case of rapid decompression
14 p2406 A69-29290

Protective filter for inspiration valve of oxygen masks in high performance aircraft, reducing respiratory volume exchange with given pressure amplitude
17 p2916 A69-33773

RESPIRATORY DISEASES

NT ASTHMA
NT EMPHYSEMA
NT INFLUENZA
NT PNEUMONIA

Respiratory difficulties from breathing through mask compared with changes in respiration resulting from obstruction caused by physical respiratory disorder
17 p2916 A69-33774

Airway distensibility effect on elastic behavior of human lungs, noting compliance and resistance at different breathing frequencies for diseased lungs
22 p3873 A69-40205

RESPIRATORY IMPEDANCE

X ray study of biomechanics of respiratory act under long term acceleration stresses
05 p0710 A69-16522

Respiratory difficulties from breathing through mask compared with changes in respiration resulting from obstruction caused by physical respiratory disorder
17 p2916 A69-33774

X ray study of biomechanics of respiratory act under long term acceleration stresses
18 p3096 A69-34741

RESPIRATORY PHYSIOLOGY

Respiratory pressure recording with tracheal cannulae applied on cats to obtain pneumograms and oscillograms of respiratory neurons
07 p1131 A69-18538

Euglena gracilis grown heterotrophically, investigating respiratory physiology as function of glucose, acetate or ethanol growth supporting carbon source
10 p1647 A69-24186

Lung ventilation mechanics affecting respiration in hyperbaric environment during deep diving, stressing biological necessity of equal pressure respiration
13 p2215 A69-28598

Compensative adaptational reactions to weightlessness, discussing blood supply to thorax area, external respiration, gas exchange and energy loss during parabolic and orbital flights
17 p2909 A69-33384

Ventilatory response to hypoxia and hypercapnia in hypothermic anesthetized dogs, noting decreased sensitivity of central chemoreceptors to carbon dioxide
22 p3885 A69-40977

Pulmonary capillary blood flow, stroke volume and heart rate measured in tilted and supine subjects during respiration, discussing tourniquets and intravenous atropine effects
23 p4082 A69-41445

Human physiological responses to angular acceleration during breath holding, Mi, Valsalva and Mueller respiratory maneuvers in hollow spherical simulator
23 p4102 A69-41679

Analog computer used to correct body plethysmographic chamber signal distortion due to inspired/expired air temperature and humidity differences
23 p4111 A69-42081

Human heart rate changes resulting from diving and breath holding exercises
23 p4095 A69-42083

Respiratory effects of body temperature changes separation from blood osmolality changes in dehydrated man
23 p4097 A69-42094

Aircraft passenger cabins pressure safety limits estimating factors, discussing human respiratory gas exchange mechanism, pressure drop and smoking effects, etc
24 p4269 A69-43411

RESPIRATORY RATE

NT HYPOVENTILATION

Xenon, krypton, nitrogen and nitrous oxide effect on respiration rate of rat liver slices at various oxygen partial pressures
03 p0375 A69-14069

Cosmonauts cardiac activity and respiration changes during physical exertion in orbital flight on Voskhod spacecraft
03 p0377 A69-14196

Transient changes in oxygen consumption, carbon dioxide elimination and respiratory quotients during and after induced hypoxia to rabbits
06 p0876 A69-18026

Astronauts increased heart beat, respiration rates and higher blood pressure subsides during repeated weightlessness tests
07 p1061 A69-18582

Pneumograms and EKG used to determine heart beat, respiration rates and systolic index of cosmonauts during Voskhod 2 flight
07 p1062 A69-18585

Hamsters responses to helium-oxygen and nitrogen-oxygen at ambient temperatures, comparing respiration rates, weights and body temperatures
10 p1646 A69-23564

Heart rate and respiratory response correlations in men during surface and underwater work, showing reasonable approximations of workload in surface-equivalent terms
14 p2406 A69-29293

Photosynthesis and respiration rate in vegetables in controlled temperature, humidity, illumination levels, carbon dioxide and oxygen contents
17 p2912 A69-32933

Vestibular reactions in rats under hypothermal conditions by measuring postrotatory nystagmus beats number and duration, respiration rates and rectal temperature
17 p2906 A69-32934

Pulmonary mechanics during zero gravity maneuvers, noting decrease in flow rate and increase in expiration time without decrease in vital capacity
17 p2909 A69-33181

Respiratory gas exchange in exercise during He-O breathing, analyzing effects on O consumption, carbon dioxide production and minute ventilation of human subjects
17 p2910 A69-33751

Coriolis acceleration effect on vestibulo-vegetative and vestibulo-somatic reflexes of humans subjected to forward tilting, noting pulse and respiration rates
20 p3472 A69-37259

Motion sickness prophylaxis for rabbits subjected to rotation, investigating effects of adrenalin, ephedrine, sympatholytin, piperoxane and pyridoxyphene on nystagmus and respiration
20 p3472 A69-37265

Airway distensibility effect on elastic behavior of human lungs, noting compliance and resistance at different breathing frequencies for diseased lungs
22 p3873 A69-40205

Regression relations for energy expenditure in work predicted from heart rate and pulmonary ventilation in volunteers carrying loads upstairs
22 p3891 A69-40220

Venturi low resistance flowmeter for ventilatory measurements during rest and exercise on humans, not-

ing suitability for analog integrator computation of tidal volumes
22 p3894 A69-40979

Lobeline effect on oxygen pressure in giantocellular nucleus of medulla oblongata and respiration rates of dogs recorded automatically
22 p3888 A69-41273

Severe heat stress effects on respiratory frequency, rectal temperature, blood gases and pH of conscious dog
23 p4081 A69-41432

Pulmonary mechanics during zero gravity maneuvers, noting decrease in flow rate and increase in expiration time without decrease in vital capacity
23 p4089 A69-41825

Albino guinea pigs respiration rates and ear skin histology after exposures to coherent ruby laser light
24 p4270 A69-42578

RESPIRATORY REFLEXES

Respiratory disturbances relationship to experience and attitudes toward gas anesthesia and response to different types of face mask
03 p0378 A69-12884

Irreversible blunted respiratory response to ventilation in high altitude natives, considering hypoxic and hypercapnic stimuli
12 p2018 A69-26130

Transient ventilatory response to breaths of nitrogen at rest and during exercise in high altitude and sea level natives
12 p2019 A69-26131

Peripheral chemoreceptor carbon dioxide sensitivity, measuring human respiratory response to large carbon dioxide breath in oxygen at sea level and high altitude
22 p3890 A69-40207

Heart rate respiratory control model with inclusion of pressoreceptor feedback, considering posture effect in transient envelope alteration
22 p3894 A69-41202

Thematic apperception test /TAT/ cards for assessing attitudes in naval recruiting, respiratory responses during ejections and aviation psychology
23 p4112 A69-42365

RESPIRATORY SYSTEM

NT LUNGS NT TRACHEA

Respiratory system control processes hypotheses experimental verification
01 p0019 A69-10209

Reactions of respiratory and cardiovascular system of dogs in biocompartment of ballistic missiles, discussing biopotential of myocardium, arterial pressure, etc
07 p1060 A69-18576

Statistical correlation between cardiovascular activity and respiration dynamics of cosmonauts during orbital flight, discussing heart beat and respiration rates
07 p1061 A69-18584

Pulmonary capillary gas exchange and venous admixture model and inclusion into respiratory system model, discussing pressure and concentration gradients, pathological effects, etc
07 p1068 A69-19482

Pathological changes in respiratory and cardiovascular systems of white rats due to various levels of hyperoxia
10 p1646 A69-23577

Respiratory system control processes hypotheses experimental verification
14 p2408 A69-28745

Hypoxia reaction elimination in human beings by repeated exposure to hypoxia, discussing nitrogen inhalation experiments and adaptive behavior of respiratory system
23 p4214 A69-41789

Neural integration of cardiorespiratory responses and suprabulbar control during arterial hypoxemia in rhinencephalic thalamic pontine rabbits
24 p4258 A69-42635

Steady state model for human respiratory system analysis, discussing controlled and controlling parts
24 p4276 A69-43272

RESPIROMETERS

Respiratory pressure recording with tracheal cannulae applied on cats to obtain pneumograms and oscillograms of respiratory neurons
07 p1131 A69-18538

Pyroelectric conductor sensors permitting continuous measuring and recording of air inhaled during chosen time intervals
15 p2559 A69-31230

Lightweight sensor for telemetering oxygen partial pressure in respiration air
15 p2559 A69-31231

RESPONDERS

U TRANSPONDERS

RESPONSE BIAS

Diffusion current detection method applied to reverse biased volt-ampere characteristics of Ge diodes, noting surface leakage role
07 p1105 A69-19007

RESPONSE TIME [COMPUTERS]

Response time estimation for control system with constrained phase coordinates, determining conditions for optimal control problem solution
21 p3769 A69-38568

RESPONSES

NT DYNAMIC RESPONSE
NT GALVANIC SKIN RESPONSE
NT HEMODYNAMIC RESPONSES
NT MODAL RESPONSE
NT PHYSIOLOGICAL RESPONSES
NT TRANSIENT RESPONSE

Photomultiplier geometry without use of light pipes for uniform response from large area single and double sheet plastic scintillation detectors
03 p0428 A69-13107

REST

U BED REST

RESTARTABLE ROCKET ENGINES

Liquids in zero g environment for controlling position of propellant within tank for restart of rocket engine, noting minimum energy principle applications
11 p1944 A69-25599

Spontaneous reignition predictions for solid restartable rocket motors with solid propellant combustion terminated by liquid quenching
[AIAA PAPER 69-444] 16 p2842 A69-32695

RESTORATION

Restoration processes in *Chlorella pyrenoidosa* to distinguish intense and less intense gamma ray irradiations
22 p3878 A69-40792

RESTRAINTS

U CONSTRAINTS

RESTRICTIONS

U CONSTRUCTIONS

RESULTANTS

Algorithms for polynomial resultants computation, considering extraneous factors, truncation errors, memory and computing speed
06 p0892 A69-17884

RETARDERS [DEVICES]

Cost effective aerodynamic deceleration and retardation systems for military and space programs, noting technical research and development areas in need of advancement
03 p0364 A69-13854

Hydrostatic bearings, hydraulic drive system and hydraulic braking system for radio telescope with 2550 tons moving weight
[ASME PAPER 68-WA/PEM-2] 05 p0743 A69-16147

RETENTION [PSYCHOLOGY]

Holographic theory of visual memory behavior, discussing human tests in situation of prompted visual recall
01 p0083 A69-10985

Mathematical model for information processing of biological memory as cybernetic system
23 p4110 A69-41982

RETICLES

Encoding and decoding in IR tracking system, analyzing chopping rotating FM reticle pattern
19 p3268 A69-36058

RETICULOCYTES

Reticulocyte count comparison on trained and sedentary college male subjects before and after strenuous exercise, noting role in oxygen uptake
21 p3654 A69-38907

RETINA

NT FOVEA

Retinal burns from intense light sources using rabbit eyes as function of irradiation rate, exposure time and image size
02 p0204 A69-12496

Retinal lacerations and detachment in jet pilots, discussing pathogenesis, diagnosis and surgical reattachment methods
05 p0710 A69-16630

Biological effects of laser radiation on mammalian retina, noting thermal injury
[AGARDOGRAPH-111] 08 p1266 A69-20676

Retinal burn resulting from prolonged viewing of sun, laser or thermonuclear explosion, noting effects on choroid, receptors and pigment cells
08 p1267 A69-20680

Multilayer retina model with lateral couplings for visual pattern recognition, noting applications to data processing
19 p3260 A69-35898

Transient electrical responses from retinas, discussing visual pigment role in visual excitation, photochemistry, etc
19 p3258 A69-36377

Live retinal photoreceptors studied by low angle X ray reflection, proposing electron density model
22 p3871 A69-40057

Electroretinogram a-wave relationship to early inhibition and excitation of retinal ganglion cells produced by flash superimposition in rabbits
22 p3878 A69-40836

Squirrel monkey retinas spectral stimulation, determining differential color responses reaching striate and prestriate cortex
22 p3879 A69-40844

Psychopharmacological drug effects on retinal neuron activity in cats measured by microelectrodes, noting spontaneous activity decrease
22 p3879 A69-40846

Statistical critique of Polyak values for tangential dendritic spread of primate retinal neurons
22 p3880 A69-40848

Human peripheral retina contrast sensitivity determined by measuring psychophysically for sinusoidal grating target describing luminance effects
22 p3882 A69-40870

Retinal topography relation to blue arcs phenomenon, assessing disparity in photoreceptor location and associated neurones for analysis of critically sited plots
22 p3882 A69-40872

Retinal mechanisms determining visual band movement thresholds obtained by manipulation of retinal locus, luminance, arc length and spectral distribution of moving stimulus
22 p3883 A69-40879

Cat intraretinal DC component and b-wave separation based on sensitivity to visual stimuli, discussing electroretinogram recorded with microelectrodes
22 p3883 A69-40881

Arterial occlusion effects on retinal structure in cats, describing degrees of cell degeneration
22 p3884 A69-40883

Cerebral and retinal capillary permeability to ions in rats analyzed by electron microscope using Prussian blue reaction
23 p4081 A69-41433

Pigeon visual adaptation to flickering light, attributing ERG b-wave postadaptation rebound to retina bipolar cells inhibition
23 p4084 A69-41463

Optic nerve spikes elicited by acetylcholine application on isolated perfused retina of frog, varying response by prostigmine and atropine
23 p4084 A69-41465

Rhythmic wavelets electroretinogram recorded from rabbit retina in vitros preparation indicating dominant relatively low voltage waves compared to in vivos waves
23 p4101 A69-41471

Retinal eccentricity effects on horizontal-vertical illusion magnitude, considering eye flattening and astigmatic properties
24 p4263 A69-43117

Selective g-force application as centrifugation treatment for retinal detachment, applying minimal load on circulation and optimal load on retina
24 p4268 A69-43405

RETINAL ADAPTATION

NT DARK ADAPTATION
NT LIGHT ADAPTATION

Visual sonar target detectability probability function of retinal position and brightness contrast
02 p0203 A69-12218

Human visual systems ability to encode retinal images produced by different size objects
03 p0369 A69-13359

Stiles-Crawford effect measurements before and following eye movements to determine retina shearing during eye movements
15 p2555 A69-31035

Nocturnal and diurnal monkeys spectral sensitivity functions determined from simultaneous recordings of light-evoked cortical and retinal responses
22 p3882 A69-40867

Tritanope and trichromat experiments for parafoveal visual response of tritanope, measuring spectral sensitivity and absolute threshold values
22 p3882 A69-40869

Blue cone mechanism contribution to mesopic function in producing Purkinje shift with luminance decrease, measuring sensitivity by flicker technique
22 p3883 A69-40880

High intensity flash effects on local electroretinogram, late receptor and slow potentials and ganglion cell activity in area centralis of cat retina
22 p3883 A69-40882

Human electroretinogram [ERG] physiological variations as function of stimulation energy and wavelength
22 p3884 A69-40884

Response characteristics of human visual mechanisms sensitive to motion while varying adaptation stimulus contrast to control visual effectiveness
22 p3884 A69-40887

RETINAL IMAGES

Analytical model for frog retinal bug detector cell to make possible signal measurement in frog optic fibers
07 p1070 A69-18383

Small eye movements measurement and retinal image stabilization based on tracking edge of blood vessel in optic disk
09 p1446 A69-21908

Digital simulation of biological model for visual images classification derived from human visual system aspects
17 p2911 A69-34094

Model for lateral inhibitory interaction in human retina, providing systematic account of simultaneous brightness contrast
21 p3653 A69-38898

Target distance and direction monocular estimates with stabilized and nonstabilized retinal images, finding eye movements not improving spatial judgment accuracy
22 p3878 A69-40838

Eye optical system spherical aberration measured by knife-edge method derived from Foucault test, investigating retinal image quality
22 p3882 A69-40873

Visual ellipse phenomena excitation by sinusoidal stimulating currents, noting frequency effects on ellipse shape
23 p4095 A69-42077

RETRACTABLE EQUIPMENT

Electromechanical retracting pedestal for solid target injection into vacuum system and ionization by focused Q switched laser beam
03 p0439 A69-13105

Small and full scale model tests for feasibility of retracted rotor aircraft for high speed flight
[AIAA PAPER 69-219] 07 p1055 A69-19550

Solar cell retractable array for spacecraft multikilowatt power generation
19 p3254 A69-35711

Hydraulic power pack for automatically raising or lowering landing gear in small aircraft
20 p3467 A69-38183

RETRACTABLE LANDING GEAR

U LANDING GEAR

RETRIEVAL

U DATA RETRIEVAL
U INFORMATION RETRIEVAL

RETROACTION

U RETROTHRUST

RETROFIRING

Flow field for single or multiple jets firing forward into oncoming supersonic free stream, noting effect of forward extending cylindrical body
[AIAA PAPER 69-69] 06 p0864 A69-18164

RETROREFLECTION

Van Atta array reflector retrograde effect, studying influence of transmission line length, interelement spacing and line-dipole matching on incident reflected radiation phase correlation
17 p2929 A69-33878

Rereflected shock waves behind tapered shock tube section indicated by shock wave detectors, microwave absorption and optical emission measurements
18 p3085 A69-34474

Distance measuring method limitations for modulated CW laser determined by laser transmitter receiver in conjunction with retroreflector target fixed position
21 p3739 A69-39457

Laser range measurement from earth to lunar retroreflector to study earth tipping and gravitational constant secular decrease
22 p3960 A69-40190

Redirection of time varying signal between specified points by arbitrarily spaced antenna array elements with condition involving time delays for validity of retrodirection
23 p4136 A69-41580

Retroreflector and Scotchlite object images obtained in long range holography with Q switched ruby laser, noting atmospheric seeing conditions
23 p4167 A69-42184

Microcircuit phased array electronic countermeasures system design and hardware techniques for aerospace applications, analyzing adaptive, retrodirective and combination array systems
24 p4287 A69-43110

Lunar laser beam retroreflection observations, showing agreement with predicted ephemeris and signal strength
24 p4384 A69-43197

RETROSEQUENCING

U RETROFIRING
U SEQUENTIAL CONTROL

RETROTHRUST

Retrograde motion of electric arcs in transverse magnetic fields, using multifluid equation to predict inclination and properties
[AIAA PAPER 69-45] 06 p0971 A69-18091

Fuel-time optimal retrothrust control for vertical and gravity turn ballistic trajectories of soft landing nonlifting bodies based on Pontryagin principle
[AIAA PAPER 69-868] 21 p3809 A69-39394

RETURN TO EARTH SPACE FLIGHT

Pyrotechnic activated calorimeter for reentry package design of vehicles entering earth atmosphere at lunar return velocities
10 p1669 A69-23026

Spacecraft return probabilities with time constraints and redundant access, using Borel set concept for counting and summing coverage belts
21 p3819 A69-39017

REUSABLE SPACECRAFT

NT AEROSPACEPLANES

Manned reusable space transportation systems development, discussing requirements for future space mission planning
03 p0519 A69-13395

Space flight cost analysis, relative costs of various types of transportation and need for reusable single stage to orbit vehicles
15 p2719 A69-30186

Rocket launch system cost role in space operations, discussing low cost expendable drop tank and Triamese reusable launch vehicle/ spacecraft concepts
18 p3210 A69-35087

Large booster nozzle reuse, discussing design, refurbishment, performance, costs and test evaluation
[AIAA PAPER 68-657] 19 p3394 A69-35944

Low cost rate transportation as mandatory goal for future space program, discussing recovery and reuse, launch system costs, hardware development, etc
20 p3618 A69-38117

Cost reduction steps in reusable launch vehicle design, discussing aircraft design and development experience application
21 p3826 A69-39689

Reusable Crew Module, Reusable Orbital System and Reusable All Systems options for low cost space transportation system
21 p3827 A69-39693

Apollo 11 mission and future space exploration prospects including moon base, manned space station, reusable shuttle vehicles, etc
23 p4211 A69-41477

Reusable aircraft type satellite launchers, discussing first stage recovery by parachute, ballutes, flexible wings and gyroglider
24 p4250 A69-42562

REVERBERATION

SST fuselage response to reverberant and turbulent boundary layer noise calculated for computing equivalent reverberant acoustic fields
15 p2549 A69-30302

Frequency and space averaging effect on variability and standard deviation of multimode media transmission responses, with application to reverberant media
23 p4115 A69-41576

REVERSE TIME

U REACTION TIME

REVERSED FLOW

Turbulent to laminar boundary layer reversal by applying negative pressure gradient
01 p0058 A69-10066

Internal electric field effect of diode with inhomogeneously doped base on lifetime of strong reverse current generated during instantaneous switching
08 p1287 A69-20890

Ejector-diffuser performance improvement by reduction of backflow with orifice plate installed at inlet of straight diffuser duct
11 p1819 A69-25382

Motion of slender axisymmetric bodies in rotating fluid, relating Long hypotheses to flow reversal and dipole distribution effects on lee waves
13 p2248 A69-28170

Electron and proton components contribution to reverse current production after particle shower through upper Cu wall of ionization chamber with lower Pb wall
13 p2304 A69-28417

Similarity solutions for laminar compressible boundary layer with reverse flow, considering various wall/stagnation temperature ratios
15 p2591 A69-30907

Galerkin-Kantorovich-Dorodnitsyn /GKD/ multimoment integral method improved reversed flow formulation for lower branch similar flows
17 p2958 A69-34054

Aerodynamic behavior of airfoil oscillating in reverse flow defined for various angles of attack and oscillatory amplitudes at low Mach numbers
18 p3087 A69-35219

Flow field throughout wind tunnel containing rotor with sharply deflected blades, noting reversed flow effect in front of wake
18 p3119 A69-35228

Laminar flow swirling motion in circular duct, studying separation and reversal
24 p4301 A69-43355

Inverse transition from turbulent to laminar flow in radial diffusers, noting nonagreement of transition point prediction methods
[ASME PAPER 69-HT-33] 24 p4247 A69-43530

Reverse flow profiles in turbulent free jet mixing with streamwise pressure gradient
24 p4306 A69-43684

REVERSING

Fast reversible switching between highly resistive and conductive states in various disordered semiconductors, using electric field
01 p0140 A69-11248

Reversibility principle in transilluminated three dimensional photoelastic medium
14 p2535 A69-29359

Reversion resistant polyether and polyester type urethanes, discussing applications, testing methods and material processing
19 p3357 A69-35566

REWARD [PSYCHOLOGY]

Instrumental reward experiment using concept learning paradigm with word-color compounds as stimuli
07 p1064 A69-18636

REYNOLDS EQUATION

Digital computer program for gas bearing analysis, discussing Reynolds equation and numerical approximations
04 p0604 A69-14518

Flat disk squeeze film air bearing, determining motion of supported mass by computer program
[ASME PAPER 68-LUBS-38] 13 p2266 A69-27272

Flat disk squeeze film air bearing, determining motion of supported mass by computer program
[ASME PAPER 68-LUBS-35] 13 p2266 A69-27280

Pressure distribution in self acting hydrodynamic journal bearings without end leakage, presenting closed form solution for nonhomogeneous Reynolds equation with turbulence considerations
18 p3139 A69-34270

REYNOLDS NUMBER

Semiempirical theory of turbulent MHD tube flow at small Reynolds numbers taking into account magnetic field presence
01 p0130 A69-10769

Hydromagnetic stability of free boundary layer between two uniform streams in presence of aligned uniform magnetic field at large Reynolds number
02 p0287 A69-11832

Expression derived for flow characteristics in smooth pipe for entire Reynolds number range
02 p0230 A69-11870

Vortex valve characteristics, noting Reynolds number and geometry effects on flow and turndown ratio
02 p0195 A69-12079

Laminar flow of anisotropic Erickson fluid near wall at large Reynolds numbers, discussing Newtonian behavior, viscosity coefficient and particle orientation
02 p0231 A69-12141

Reynolds and Mach numbers influence on loss coefficient magnitude at straight airfoil lattice
03 p0364 A69-13788

Laminar two dimensional viscous wake behind finite flat plate, investigating upstream and downstream flow field of trailing edge region for high Reynolds numbers
[ASME PAPER 68-WA/APM-20] 04 p0541 A69-14387

Series solutions for compressible and incompressible flows at low Reynolds number, including axisymmetric and MHD Stokes flow
04 p0587 A69-14609

Reynolds number similarity argument, establishing relation between mean velocity at pipe or channel center and shear stress at wall
04 p0589 A69-14895

Quasi-neutral, steady, inviscid and nonheat conducting flow of conducting gas with high magnetic Reynolds number in plane channel with transverse magnetic field
04 p0636 A69-14984

Velocity profiles for laminar flow of homogeneous liquid in pipe inlet at small and moderate Reynolds numbers
05 p0743 A69-15578

Circular cylinder near wake in cross flow measured with hot-wire anemometry for various Reynolds numbers, noting data processing on digital computer
[ASME PAPER 68-FE-5] 05 p0747 A69-16068

Thermal entry problem solution for low Reynolds number turbulent gas flow based on Reynolds number dependent velocity profile
[ASME PAPER 68-WA/FE-11] 05 p0748 A69-16090

Conical diffuser/exit duct performance and model for estimating energy losses, discussing inlet flow and Reynolds number
[ASME PAPER 68-WA/FE-45] 05 p0698 A69-16112

Surface vibrations effect on forced convection heat transfer normal to cylinder, discussing convective coefficients dependence on Reynolds number
[ASME PAPER 68-WA/HT-5] 05 p0846 A69-16116

High enthalpy, Mach and Reynolds number flight studies on ballistic ranges, describing launchers, flight simulation, measuring and recording techniques
06 p0860 A69-17632

Lifting reentry spacecraft performance examined in context of realistic aerodynamic characteristics at low flight Reynolds numbers
06 p0860 A69-17634

Analytical model developed from turbulent shear flow study, discussing Reynolds number effect
[AIAA PAPER 69-163] 06 p0914 A69-18139

Strouhal and Reynolds numbers relation from data on vortex streets of circular cylinder in two dimensional flow
07 p1119 A69-18749

Matched asymptotic expansions method applied to magnetic field induction in thin toroidal wire and flow past circular cylinder at small Reynolds number
07 p1180 A69-18811

Turbulent incompressible MHD flow between two parallel smooth plates in transverse magnetic field, determining magnetic Reynolds number
07 p1195 A69-19736

Navier-Stokes equations solution applicable to source type low Reynolds number flow through conical nozzles
09 p1482 A69-21976

Unsteady relative flow in centrifugal impeller passage running at part capacity and zero flow observed by hydrogen bubble flow visualization method
[ASME PAPER 69-GT-35] 09 p1432 A69-22489

Requirements for numerical solution of Navier-Stokes equations by finite difference method found limited to Re values with no turbulence
10 p1678 A69-22917

Moving conducting media velocity measurement using Reynolds number and electrical conductivity values, based on magnetic field distortion
10 p1731 A69-23435

Boundary layers influence on external electrical characteristics of MHD generator
11 p1824 A69-24221

Linear MHD generator power characteristics at large magnetic Reynolds numbers, analyzing magnetic field distribution for sectioned and solid electrodes
11 p1824 A69-24224

Angle of attack and Reynolds number effect on hypersonic flow past circular cone, obtaining shock wave shape
[ONERA-TP-692] 11 p1818 A69-24751

Finite difference solutions for time dependent equations of motion for steady flow around cylinder at large Reynolds numbers
11 p1872 A69-25133

Criteria for reversion of turbulent to laminar flow /r-verse transition/ as special cases of Reynolds number criterion, noting boundary layer properties role
11 p1873 A69-25134

Low Reynolds number stability of incompressible fluid half jet flow, investigating free laminar boundary layer instability
11 p1874 A69-25280

Dynamic stall data for helicopter rotor blade analyses obtained by oscillatory tests in pitch and in vertical translation at full scale Reynolds number
11 p1819 A69-25374

Flow stability of axisymmetric jet with parabolic velocity profile in fluid at rest, calculating critical Reynolds numbers
13 p2244 A69-27300

Electrohydrodynamic flows at large electric Reynolds numbers, obtaining Bernoulli and Cauchy-Lagrange integrals
13 p2305 A69-27379

Surface vibrations effect on forced convection heat transfer normal to cylinder, discussing convective coefficients dependence on Reynolds number
[ASME PAPER 68-WA/HT-5]
13 p2374 A69-27781

Radiated aerodynamic noise effects on boundary layer transition on sharp leading edge hollow cylinders in wind tunnels, noting Reynolds numbers correlation
[AIAA PAPER 68-375]
13 p2241 A69-28211

Two dimensional Couette flow analysis showing stability at Reynolds number tending to infinity
14 p2428 A69-28802

Self diffusing substance /salt/ distribution in turbulent water flow at different Reynolds numbers by NMR, obtaining diffusion function consistent with experiments
14 p2430 A69-29424

Thermal entry problem solution for low Reynolds number turbulent gas flow based on Reynolds number dependent velocity profile
[ASME PAPER 68-WA/FE-11]
14 p2430 A69-29446

MHD generator design with electric conductivity waveform at small magnetic Reynolds numbers
14 p2405 A69-29911

Inlet shape and Reynolds number effects on entrance flow development, using laser flowmeter based on Doppler effect to obtain laminar velocity profiles
15 p2589 A69-30001

Reynolds number, incident flow turbulence and interblade channels roughness effects on friction losses in axial flow turbines
15 p2547 A69-30074

Vortex shedding and wake formation behind inclined flat plate at low Reynolds number, using dye injector method for streak line observation
16 p2768 A69-31767

Subliming ablation effects on boundary layer transition for cones in hypersonic flow, discussing Reynolds numbers measured in wind tunnel tests
[AIAA PAPER 68-40]
16 p2732 A69-31881

Analytical expressions validity for skin friction in compressible turbulent boundary layer over wide range of Reynolds numbers and heat transfer conditions
16 p2771 A69-31926

Hydrodynamic parameters of annular Couette flow in longitudinal magnetic field for variable Reynolds and Mach numbers
16 p2821 A69-31953

Swirl decay of turbulent flow in tubes, showing decrease with increasing axial Reynolds number and independence of initial swirl angle
16 p2772 A69-32170

Free stream disturbances influence on hypersonic boundary layer transition Reynolds number in heated and unheated flows
[AIAA PAPER 69-704]
17 p2953 A69-33453

Hypersonic boundary layer transition on blunt slender cones at M equal 10 obtained independent Reynolds number
[AIAA PAPER 69-705]
17 p2954 A69-33455

Cone boundary layer transition location and Reynolds number as function of nose bluntness combined effect with Ar, air and He mass injection
[AIAA PAPER 67-706]
17 p2955 A69-33476

Viscous convergent-divergent nozzle flow slender channel approximations, discussing roles of nozzle geometry, Reynolds number and wall temperature, calculating velocity, enthalpy, etc
[AIAA PAPER 69-654]
17 p2894 A69-33502

Minimum Reynolds number and Malkus theory of turbulent channel flow, discussing stability, equilibrium flow, and stationary turbulence via variational theorem
17 p2957 A69-33764

Skin friction drag formula for tapered and delta wings with allowance for coefficient variation and Reynolds number dependence on chord length
17 p2896 A69-34037

Transient uniform flow over sphere at intermediate Reynolds numbers with recirculatory wakes, utilizing difference approximation to time dependent Navier-Stokes equations
18 p3120 A69-34434

Low Reynolds number solutions for incompressible viscous flows resulting from finite disk steady rotation
18 p3121 A69-34784

Vortex wakes behind circular cylinder subject to transverse sinusoidal oscillations in uniform water flow at specific Reynolds numbers, photographing varied frequency flow patterns
18 p3086 A69-35169

Viscous electrically conducting fluid flow around thin profiles for equal Reynolds and magnetic Reynolds numbers, using Oseen method to linearize equations
18 p3124 A69-35285

Heat flux densities and Reynolds potentials in turbulent boundary layer on heated flat plate with wall suction
19 p3452 A69-36722

Reynolds number dependence of turbulent velocity profile in circular tube and parallel plate channel analyzed by von Karman similarity hypothesis
20 p3513 A69-37081

Rotta analysis for linear flow transformation into turbulent flow, discussing Reynolds numbers
20 p3513 A69-37086

Statistical description of turbulence of viscous incompressible fluid at large Reynolds numbers, using velocity distribution probability
20 p3517 A69-38007

Narrow band vortex shedding from circular cylinder in critical Reynolds number range, noting increase in Strouhal number
21 p3644 A69-38690

One dimensional spectra of turbulent wakes behind circular cylinders, discussing isotropy, anisotropy and Reynolds number
21 p3693 A69-38705

Heat loss from cylinders at low Reynolds numbers in N-He and N-Ne binary mixtures
21 p3848 A69-38706

Incompressible viscous fluid flow past sphere at low Reynolds number, evaluating stream function and drag on sphere
21 p3694 A69-38771

Spectral equation for decaying isotropic turbulence of incompressible inviscid flow at large Reynolds number, using spectral cascading
21 p3694 A69-38835

Heat transfer from spheres in free finite width flow, determining heat transfer coefficient distribution as function of flow width and Reynolds number
21 p3855 A69-39849

Hypersonic flow for low Reynolds number, including magnetic field and wall temperature effects on heat transfer and skin friction for blunt shapes
22 p3860 A69-40540

Aligned uniform magnetic field effect on hydromagnetic stability of two dimensional incompressible electrically conducting jet flow with large Reynolds number
22 p3931 A69-40687

Free viscous layers structure at large Reynolds numbers, using matched asymptotic expansions for two dimensional compressible flow
22 p3932 A69-40927

Radiative transfer effects in low Reynolds number or merged layer regime of hypersonic flow about axisymmetric blunt bodies, including thin shock layer theory
23 p4059 A69-41885

Turbulence theory in laminar-turbulent flow transition, nonlinear stability for flows with Reynolds number higher than critical and fully developed turbulence
23 p4152 A69-42313

Turbine blade edge cooling efficiency, investigating Reynolds number and gas temperature to cooling air ratio influence
24 p4364 A69-43082

Fluid flow around sphere at high Reynolds number by measuring pressure distribution, considering boundary layer separation, tunnel blockage, etc
[ASME PAPER 69-APMW-26]
24 p4245 A69-43093

Heat transfer to highly accelerated turbulent boundary layer with and without mass addition, presenting data in terms of Stanton number vs Reynolds number
[ASME PAPER 69-HT-53]
24 p4409 A69-43518

Local Nusselt number beyond abrupt circular channel expansion tested for Reynolds numbers with air as working fluid
[ASME PAPER 69-HT-35]
24 p4411 A69-43532

Mass injection effects on viscous hypersonic low Reynolds number shock layer downstream and at stagnation point in blunt forebody region analyzed for non-reacting gas
24 p2429 A69-43663

Low Reynolds number unsteady wake flows, using hydrogen bubble flow visualization in high concentration glycerine mixtures
24 p4298 A69-43691

RH- 2 HELICOPTER U UH- 1 HELICOPTER

RHENIUM

Rhenium-niobium cylindrical thermionic converters with mechanically polished or electroetched emitters, comparing performance
03 p0368 A69-13126

Roentgenographic and metallographic examinations for interaction between ZrC and Re in wide range of temperatures and concentrations, discussing phase diagram
04 p0617 A69-14900

Vacuum arc melted W and W-Re alloys mechanical properties, noting Re additions effects
08 p1331 A69-20190

Effective work function of Re and Mo electrode samples determined from Schottky plots and emission measurements from grains
09 p1557 A69-21807

Comparative performance of niobium cylindrical thermionic converters with vapor deposited rhenium, stressing emitters surface preparation
09 p1438 A69-21816

Cylindrical thermionic converter with vapor deposited rhenium emitter and niobium collector, measuring efficiency and power density
09 p1438 A69-21817

Cylindrical thermionic diode with rhenium emitter for diode kinetic experiments, presenting test data from prototype diode with thimble water cooled
09 p1438 A69-21818

Polycrystalline Re high temperature plastic deformation during tensile creep, including activation energy and substructure dislocation study
13 p2280 A69-27767

Plasma anode technique for work functions measurements of polycrystalline W and Re wires in cesium vapor with cesium oxide additive
14 p2507 A69-29274

TiC-Re phase diagram over wide range of temperatures and chemical compositions
15 p2641 A69-31247

Creep rate-stress-temperature relations for powder metallurgy rhenium, discussing activation energy
17 p2991 A69-34186

Quartz fiber adhesion to Re measured in LEED /low energy electron diffraction/ apparatus for clean and O layer surfaces, noting brittle fracture
18 p3156 A69-35182

Low pressure ethylene decomposition on high temperature Re ribbon surface
19 p3266 A69-36730

Re and Re alloy powder metallurgy, noting fabrication of Re coated W particles
20 p3562 A69-37749

RHENIUM ALLOYS

Chemical vapor deposited W and W-Re alloys for structural applications, discussing fabrication methods and effects on mechanical properties
01 p0096 A69-10641

Chemical vapor deposited W and W-Re alloys investigated for deposition variables and heat treatment effects on mechanical properties
01 p0097 A69-10648

A15 type phase in vapor deposited W-Re alloys identified by X ray diffraction, metallography and hardness measurements
01 p0098 A69-10649

Superplasticity in W-Re alloys, noting tensile properties, grain size and strain rate sensitivity for various Re contents at high temperatures
10 p1707 A69-22990

Heat treatment effects on molybdenum-rhenium alloy field emission and surface structure in alpha and sigma phase regions
12 p2113 A69-26041

Re and Re alloy powder metallurgy, noting fabrication of Re coated W particles
20 p3562 A69-37749

Refractory metals in rocket propulsion devices, applying tungsten in uncooled rocket nozzles and tungsten and rhenium to electrothermal propulsion
23 p4177 A69-42161

RHEOELECTRICAL SIMULATION

Resistor network electric analog consisting of arithmetic units block, proposing procedure for elliptic equation solution
21 p3680 A69-39854

Rheoelectrical analog technique for low speed aerodynamic characteristics of finite wings in incompressible flow, using deep electrolytic tank for lifting surface calculations
23 p4061 A69-42351

Two dimensional incompressible inviscid fluid flow problems solution by conducting-paper analog with electrical equipotentials tracing, based on Laplace equation applicability
24 p4299 A69-43024

RHEOGRAPHY

U RECORDING INSTRUMENTS
U RHEOMETERS

RHEOLOGY

Steady state circular motion of fluid with variable rheological characteristics between coaxial cylindrical surfaces, obtaining velocity distribution
01 p0061 A69-10733

Nonlinear viscoelastic bodies arising in 3d rheological models with hidden parameters behaving according to law compatible with objectivity and 2nd thermodynamics principles
01 p0171 A69-11131

High aspect ratio submicroscopic whiskers of beta-SiC, investigating rheological properties of suspensions in various fluids
01 p0102 A69-11260

Long term creep characteristics of metal structures from short duration relaxation tests, summarizing data on rheologically stable materials
[ONERA-TP-639] 02 p0337 A69-11626

Laminar flow of nonNewtonian fluids described via rheological three parameter model
05 p0744 A69-15678

NonNewtonian hydrodynamics equations for non-linearly viscous and viscoelastic media, analyzing dependence on rheological model
05 p0745 A69-15786

Convection in conducting fluid filled cavities with variable wall temperature due to magnetic field, with results applicable to rheological systems
07 p1241 A69-18921

Flow fracture and rheological properties of viscoelastic material under biaxial loading
07 p1202 A69-19386

Flow equations of rheological media derived using thermodynamics, assuming nonlinear stress-strain relation in incompressible medium
08 p1419 A69-21074

Deformation processes of geometrically nonlinear rotational membrane shells under internal pressure
11 p1980 A69-24821

Phenomenological macrorheology, discussing mechanical models designed for studying relation between stresses and strains in materials
13 p2369 A69-28562

Nonnewtonian solid propellant viscosity and pseudoplasticity utilizing rheological characterization for optimal casting and pot life determination
[AIAA PAPER 69-518] 16 p2833 A69-32665

Quasi-static crack growth in viscous bodies analyzed by continuum mechanics, rheological models and energy equation, discussing fine structure
18 p3215 A69-34570

Collection of papers on mechanics including quantum theory, mechanics of micropolar continua, elasticity and plasticity, rheology, etc
20 p3623 A69-37580

Rheology application to description, explanation and measurement of materials properties during deformation
20 p3561 A69-37599

Viscoelastic nonlinear and linear solids models and rheological equations, studying stress-strain states of various complex Hookean, Kelvin, Maxwellian and Zener elements
20 p3625 A69-37601

Biological material flow phenomena, discussing rheological approach, microcirculation, macrocirculation, instrumentation and mathematical model for quantitative observation
20 p3473 A69-37602

Brittle failure models, discussing rheological properties, Griffith energy criterion properties, crack behavior in elastic and linear viscoelastic media, etc
21 p3839 A69-39194

Polystyrene melt tensile viscosity prediction from shearing viscosities, using rheological network rupture theory
21 p3753 A69-39730

Yield stress of normal human blood related to endogenous fibrinogen concentration as function of total protein concentration, proposing fibrinogen adsorption and coupling model
22 p3874 A69-40223

Human blood viscosity measurement over wide range of shear rates, obtaining rheological data, suggesting osmotic red cell crenation role
23 p4095 A69-42078

Microrheological property of blood measured with microglass fiber viscosimeter, noting sensitivity to intercellular friction of erythrocytes
23 p4098 A69-42100

RHEOMETERS

Short fiber composites flow orientation in system of high volume glass fibers in epoxy resin measured by glass rheometer
13 p2287 A69-28670

Rheography of blood circulation of forearm after tightening with pneumatic cuff, analyzing amplitude increase and information about vascular system
21 p3653 A69-38838

RHODIUM

La-Rh system study by powder X ray diffraction, metallographic and differential thermal analysis, constructing equilibrium diagram and determining crystal structure data
21 p3744 A69-38739

RHODIUM ALLOYS

Ti sub 3, Rh sub 5 and Hf sub 3, Rh sub 5 existence and isomorphism confirmed by crystallographic and X ray methods
19 p3343 A69-35920

RHOMBIC ANTENNAS

Nested rhombic antenna spacing determined by measuring mutual coupling and interacting effect on radiation patterns
11 p1850 A69-24979

RHYTHM [BIOLOGY]

NT CIRCADIAN RHYTHMS

Resting EEG and parieto-occipital response changes evoked by slowly repeated flashes in case of severe hypothyroidism secondary to panhypopituitarism
07 p1064 A69-18634

Immobilization effects on alpha rhythm, locomotor coordination and visual alimentary motor reflexes of cats
13 p2212 A69-28617

Hepatic tyrosine transaminase rhythm in rats under various conditions of lighting, food consumption and dietary protein content
17 p2910 A69-33755

Spontaneous rhythmical activity and mean vascular tone dependence in isolated helical rat aorta strips on extracellular concentration of noradrenalin
23 p4093 A69-42069

Social entrainment of feeding rhythms in Rhesus monkeys with light, temperature and sound held constant
24 p4260 A69-42704

Abnormal biologic rhythm in rhesus monkeys associated with behavioral stress, noting brain temperature periodicities sensed with implanted extradural thermistor
24 p4261 A69-42708

RIBBON PARACHUTES

Flight tests of deployment of 20 ft diam ribbon parachute at high dynamic pressures and supersonic speeds
11 p1823 A69-25383

RIBBONS

Ribbon reinforcements in composite materials noting stiffness properties
01 p0172 A69-11265

Stressed state periodic problem in infinite strip under combined pressure and temperature field effect
04 p0673 A69-14497

Planar ribbon winding for buildup control of material near polar openings of filament wound vessels, discussing ribbon width and density
09 p1507 A69-22328

RIBONUCLEIC ACIDS

NT ADENINES

Hypoxia exposure effect on RNA synthesis in rat anterior pituitary cultured in vitro
01 p0015 A69-10923

Unique sequence of oligonucleotides located in tobacco mosaic virus ribonucleic acid
03 p0370 A69-13461

Protein contained purine free basal and yeast ribonucleic acid diets effect on plasma and urinary uric acid production in male subjects
05 p0708 A69-15968

Amber suppressors conversion to ochre suppressors in RNA of bacterium or bacteriophage using uracil mutagen
07 p1068 A69-19493

Poly A-poly U synthesized by Azotobacter Vinelandi RNA polymerase in unprimed reaction containing ATP and UTP, following short lag period
10 p1647 A69-24185

Intraperitoneal high polymer DNA administration normalizing effect on DNA and RNA contents in liver, spleen and intestinal mucosa of white rats exposed to X rays
21 p3657 A69-39050

Enzyme transitions in RNA polymerase state during unprimed synthesis of r11-C/ copolymer, noting dimer-monomer pattern during lag phase
22 p3895 A69-40050

Protein rates and RNA synthesis in cerebra of rats analyzed as factor of high altitude hypoxia adaptation
22 p3886 A69-41122

Polypeptide synthesis as function of 5S ribosomal RNA dissociated from 50S ribosomal subunits by EDTA treatment
23 p4113 A69-41491

Pyrimidine polyribonucleotides or purine polyribonucleotides binding to lysine- or arginine-rich proteinoids considered for abiogenesis
23 p4113 A69-41509

RIBS [SUPPORTS]

Rib positioning effect on mechanical behavior of cantilevered rectangular plate in gas flow, considering critical flow velocities and rigidity relationships
01 p0165 A69-10085

Elastic strain and stress in ribbed circular plate bent skew-symmetrically, using orthotropic plates theory
04 p0681 A69-15172

Field approach for stress and deflection analysis in rectangular plates reinforced by straight ribs, noting kernel function
11 p1983 A69-25019

Optimal parameters selection for rib-reinforced cylindrical shells determined with respect to axial critical loading magnitude
11 p1985 A69-25173

Zero Gaussian curvature rib reinforced shells free oscillations reduced to nonreinforced shell forced oscillations under cyclic loads
12 p2177 A69-25996

Rigid supporting ribs effect on annular plate critical loading, stability loss and buckling
14 p2533 A69-28983

Stress-strain state calculations of ribs reinforcing cantilever shell under external pressure, using differential-difference equations
18 p3223 A69-34980

Steady state temperature fields and thermal stresses determined in finite cylindrical shell by optimal parameters of reinforcing circular rib
21 p3834 A69-38714

Stability loss for hinged circular cylindrical elastic shells reinforced by thin walled closed profile ribs, proposing minimum weight design method
21 p3835 A69-38723

Stress concentration in elastic plate reinforced at edge by straight rib analyzed in finite form by Cauchy integrals and Fourier transforms
22 p4041 A69-40114

Rib cross sections distribution for cylindrical shell under concentrated longitudinal forces obtainable by designing for minimum strain energy
23 p4228 A69-41988

Discrete rib effect on buckling resistance of cylindrical shell under combined external and axial compression loads, using Laplace transforms
23 p4229 A69-41990

Stability of orthotropic cylindrical shells reinforced at edges by elastic ribs, analyzing axisymmetric buckling, natural oscillations and rigidity characteristics
23 p4229 A69-41992

Hinged circular cylindrical shells reinforcing ribs effect on deflection and bending moments, assuming external pressure application
23 p4229 A69-42001

RICCATI EQUATION

Linear optimal control problems with quadratic performance indices, developing system equivalence for matrix Riccati equation
[ASME PAPER 68-WA/AUT-17]

05 p0738 A69-16175

Matrix Riccati and matrix quadratic equations in problems of stochastic control and filtering
05 p0740 A69-16601

Command inputs handling by linear optimal control theory, investigating Riccati matrix differential equation convergence
08 p1298 A69-20856

Matrix Riccati equation duality and bounds, discussing duality in context of optimal control
11 p1909 A69-24885

Negative exponential solution of matrix Riccati equation associated with linear optimal regulator and filter problems for time invariant plants
12 p2122 A69-26513

Riccati equation solution for inhomogeneous and homogeneous lines obtained by Lagrangian method for differential equations
15 p2582 A69-30124

Nonlinear differential equations of injection phase locking solved by Riccati equation, discussing initial frequency offset to loop gain ratios
23 p4119 A69-41742

Optimal deterministic estimation and feedback control for linear nonstationary process and measurement systems defined by Riccati equations, including Kalman-Bucy filter
24 p4291 A69-43276

RICHARDSON-DUSHMAN EQUATION

U TEMPERATURE EFFECTS

U THERMIONIC EMISSION

RICHARDSON NUMBER

Correlations at regional scale between clear air turbulence aircraft observation, Richardson number and wind intensity and direction at flight level
03 p0462 A69-13966

Richardson constant for thermionic emission in Schottky barrier diodes, noting effect of surface shadows
08 p1286 A69-20865

Relation between Rayleigh and dynamic Richardson numbers in atmospheric boundary layer in presence of cellular convection
09 p1491 A69-22709

Buoyancy in turbulent shear flow, rotation or streamline curvature effects and meteorological parameters, drawing formal exact algebraic analogy
11 p1870 A69-24894

Richardson number in vertical tropospheric region of maximum wind computed from data on jet streams observed in winter over radiosonde stations in Italy
13 p2295 A69-28656

Qualitative analysis of CAT parameters from radio sounding data, noting mean bumpiness probability dependence on Richardson number and wind vector shift
14 p2474 A69-29735

Relation between Rayleigh and dynamic Richardson numbers in atmospheric boundary layer in presence of cellular convection
16 p2808 A69-32488

RIDGES

Sand ridge origin and dynamical setting, discussing morphology-tidal current system equilibrium indicated by theory and field measurements
15 p2596 A69-30443

RIEMANN INTEGRAL

U MEASURE AND INTEGRATION

RIEMANN MANIFOLD

Killing fields applied to nonsymmetric spaces specify coordinate lines with slowest possible metric tensor variation and gravitational radiation
01 p0115 A69-10018

Geometrical existence proof of elastically coupled nonlinear systems normal mode vibrations demonstrated by existence of extremal arcs in Riemann space
01 p0166 A69-10232

Electromagnetic and gravitational tensor fields in Riemannian space, generalizing Maxwell and Bel-Robinson tensors
03 p0467 A69-13755

Brans-Dicke scalar-tensor theory, showing radiative Riemann tensor existence in absence of usual spin-2 gravitational waves
07 p1216 A69-18894

Riemann metric leading to empty flat space from Rainich equations of already unified field theory
07 p1182 A69-19418

Geometrized theory of combined gravitational and electromagnetic fields, using metric tensor of four dimensional Riemannian continuum to describe both fields
09 p1540 A69-22134

Maxwellian field and second order invariant system in vacuum in three dimensional Riemannian space with

positive-definite metric, discussing Lorentz invariant equations
09 p1541 A69-22392

Generalized Riemann function obtained as solution of transformed Boltzmann-Vlasov equation, discussing one dimensional and multidimensional cases
10 p1724 A69-22908

Theory for approximation of analytic functions given on closed spaces with piecewise smooth boundaries
12 p2120 A69-26198

Physical space-time defined as four dimensional Riemann space based on available information for physical measurements
14 p2484 A69-28862

Time-similar and isotropic geodesic curves simulating paths of test bodies in Riemann space corresponding to gravitational field
21 p3772 A69-39621

RIEMANN PROBLEM

U CAUCHY PROBLEM

RIEMANN WAVES

Mach disk and Riemann wave location, size and strength in underexpanded jet flows, proposing model for conservation equation satisfaction
[AIAA PAPER 69-665] 17 p2954 A69-33460

RIESZ THEOREM

Operator methods in engineering sciences, discussing integral transformations, Riesz method application to Cauchy problem, etc
03 p0457 A69-13744

RIGID MOUNTING

Biaxial gyro stabilizers mounting on rocking base, deriving expressions for constant components of stabilizer precession rate
09 p1498 A69-22112

Elastohydrodynamic lubrication of square section high pressure face seals mounted on rigid housings, considering design charts for load and leakage
[ASLE FICFS PREPRINT 16] 15 p2621 A69-30493

RIGID ROTOR HELICOPTERS

U XH-51 HELICOPTER

RIGID ROTORS

Helicopter rigid rotor system with blades of glass fiber reinforced plastic
04 p0548 A69-14817

BO-105 helicopter design, testing and characteristics noting four bladed rigid rotor
[AHS PAPER 200] 07 p1052 A69-18869

Hingeless fiberglass rotary wings dynamics, discussing effects of in-plane bending to flapping frequency ratio
[AIAA PAPER 69-204] 07 p1054 A69-19548

Ground and air resonance measured with gimbaled whirl tower stand for soft inplane matched stiffness rotor, discussing body inertia and speed limits
[AIAA PAPER 69-205] 07 p1055 A69-19559

Matrix elements for asymmetric rotors using rigid rotor reduced energies, describing computations method
09 p1614 A69-21913

Undamped rigid rotor critical speed analysis for firm and flexible foundations, discussing effect of center of gravity and rotor shapes
[ASME PAPER 69-VIBR-49] 10 p1808 A69-24184

Helicopter rotors with rigid blades performance from viewpoint of controllability and load distribution
13 p2201 A69-27295

NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed
14 p2393 A69-29702

Natural gyrofrequencies of rigid rotor during slowing/stopping at high forward speed, using simple approximation
17 p2899 A69-33507

Gyro controlled rigid rotor dynamic stability studied for stoppable rotor operation, developing analytical expressions for determining stability boundary of constant and rotor speed gyros
[AHS PAPER 343] 17 p2899 A69-33508

Slot height, position and trailing edge geometry effects on elliptically shaped rotors selected for hover efficiency, size, transitional gust insensitivity and rigidity
18 p3088 A69-35231

Rigidity of rotors with pin joints, calculating moments of inertia at connected sections of turbine shaft disks utilizing similarity concept
19 p3324 A69-35832

Herzenberg geomagnetic dynamo model extensions including rigid rotors calculus, laminated rotors, induction problem and fluid rotors in rigid conductor
22 p3989 A69-40193

RIGID STRUCTURES

Eccentric compression in elastic domain for rigid homogeneous structural elements, considering traction and stress
02 p0341 A69-12258

Structural designs for minimum flexibility or weight using energy intensity per unit mass parameter
02 p0345 A69-12380

Orthotropic stiffened multilayer circular cylindrical shells buckling under axial compression, lateral pressure, etc
02 p0346 A69-12510

Equilibrium stability of elastic circular arch constrained in rigid cavity and subjected to uniformly distributed parallel loading
03 p0524 A69-13066

Submerged rigid circular cylinder displacement under influence of plane acoustic pressure wave solved by operational method
04 p0667 A69-14261

Rotation deviation of rigid body around axis, discussing three point body measurement and applicability
04 p0599 A69-15017

Book on thermal time independent plastic and time dependent creep strains in structures through analogy permitting inelastic structures analysis
04 p0681 A69-15200

Stiffness matrices for buckling or vibration analysis of long thin flat plate structures connected at longitudinal edges
05 p0836 A69-16029

Programming technique using quaternion parameters for error reduction in simulation of spinning rigid body
05 p0724 A69-16469

Quasi-phonon model for acoustic scattering and diffraction from rigid real obstacle in fluid medium
05 p0797 A69-16649

Differential equations of rotational motion of systems of rigid bodies in gravitational field derived with Lagrange equation
06 p0957 A69-17130

Finite plane deformation of solid body, arbitrary deformation law and arbitrary hydrostatic stresses dependence on volume change solved by nonlinear equation
06 p1021 A69-17175

Longitudinal stability derivatives prediction for rigid and elastic airplanes, using influence coefficient method
[AIAA PAPER 69-131] 06 p0868 A69-18134

Mathematical formulas for rigidity distribution of inhomogeneous multilayer shells, discussing invariance property
07 p1232 A69-19011

Specialization of field equations and boundary conditions of elastic dielectric for special case of rigid dielectric, using Lagrange multipliers
07 p1200 A69-19174

Compatibility theorem extension to three dimensional rigid plastic bodies with stress and velocity discontinuities, noting isotropic bodies with convex yield surface
08 p1418 A69-20845

Two layer cylindrical shells stability under external pressure, assuming nonuniform shell rigidity
08 p1419 A69-21180

Reaction vs time relations in accidental impact of large commercial aircraft against rigid surface, detailing stress analysis of nuclear power plants structures
09 p1613 A69-21677

Buckling of eccentrically stiffened thin circular cylindrical shell under uniform combined axial compression and torsion loads with lateral pressure
09 p1616 A69-21955

Rigid top mass effect on longitudinal response of model vehicle propellant tank, determining natural frequencies and forced asymmetric response
09 p1616 A69-21979

Single rotation for reorienting rigid body from initial to arbitrary final attitude together with corresponding control torques
09 p1610 A69-21998

Rigid body rotational simultaneous equations of motion transformed into explicit form for digital simulation
10 p1661 A69-23855

Damping of response of integrally stiffened skin structures to random acoustic pressures, reducing rms stress in case of broad band excitation
[ASME PAPER 69-VIBR-26] 10 p1806 A69-24172

Natural mode structural analysis matrix methods for small displacements, discussing curved local subbeam in space and circular arch

11 p1969 A69-24374

Linear differential equation solution for elastic systems stability problems, discussing applications to heated rectangular plates

11 p1982 A69-24950

Indentation of inhomogeneous rigid plastic solid by flat punch under plane strain conditions analyzed by perturbation method

11 p1986 A69-25244

Elastic free-free body deformation during motion based on equations of motion valid for rigid body, noting dynamic Green tensor

11 p1994 A69-25604

Stress discontinuity surface of three dimensional rigid plastic body arbitrary yield condition, considering equilibrium of regular four sided pyramid

11 p1996 A69-25738

Elastoplastic cylindrical shell instability determination under axial compression applied to inelastic solids

13 p2363 A69-28124

Inelastic structural system stresses, strains and displacements analyzed by differential stress-strain relationships, using finite element method [AIAA PAPER 68-291]

13 p2364 A69-28208

Rigid structures high damping without loss of rigidity achieved by epoxy resin dampers, noting moderate cost

13 p2370 A69-28601

End constraints and length/width ratio influence on composites off axis tensile tests, considering rigid clamping with/without end rotation

13 p2286 A69-28667

Rigid obstacle unsteady motion in compressible fluid with load applied to surface layer, deriving numerical solution of pressure expansion

14 p2430 A69-29480

Necked tension specimens profiles for rigid-plastic nonhardening materials determined from compatibility equation for displacements and unloading rate

15 p2704 A69-30292

Free vibrations of thin truncated circular conical shell and reinforcing rings and stringers, determining resonant frequencies for stiffened and unstiffened configurations

17 p3051 A69-32955

Dynamic equations solution for interacting rigid or elastic body system models using Cosserat bodies elastic theory, considering engineering applications

17 p3067 A69-34143

Bending of rigid freely supported plastic plates under local axisymmetric dynamic load, discussing rectangular pulse effects and velocity fields

18 p3217 A69-34593

Resin impregnated fiber reinforced expandable structures used for automatic cure or rigidizing in space and initially small compact packages on earth

19 p3433 A69-35585

Conservation laws and Liapunov stability of free rotation of rigid body about principal axes derived from kinetic energy and angular momentum

19 p3397 A69-35612

Light rigid civil aircraft response to continuous atmospheric turbulence estimated using two rigid body degrees of freedom method for vertical and lateral gusts [AIAA PAPER 69-766]

19 p3433 A69-35657

Gravity torque influence on axisymmetric dual spin satellites in fixed attitudes, using attitude stability studies of spinning single rigid bodies

19 p3429 A69-35917

Closed form solutions for rigid viscoplastic cylindrical shell under dynamic loading based on constitutive equations for rate sensitive plastic material

19 p3439 A69-36478

Liquid filled rigid bodies motion stability defined and solved for system with infinite number of degrees of freedom

19 p3301 A69-36810

Bifurcation and hardening rate of rigid-plastic bodies presented on buckling of rectangular plate with lateral restraint

21 p3840 A69-39299

Dynamic stress concentrations and rigid body response of cylinder imbedded in elastic medium subjected to compressional wave

21 p3840 A69-39300

Nonlinear formulation for rigid jointed space frame comprised of prismatic linear elastic members, using Newton-Raphson and successive substitution methods

23 p4232 A69-42142

Rigid/plastic solids subjected partly to uniform fluid pressure and partly to general boundary conditions, analyzing uniqueness and stability criteria

23 p4235 A69-42460

Force maintaining rigid inclusion embedded in elastic plate with rigid boundaries

23 p4235 A69-42465

Large space erectable structures rigidity, stiffness, thermal stability, structural efficiency and integrity [AAS PAPER 69-152]

24 p4398 A69-42877

RIGID WINGS

Time optimal control for torsional vibrations of flight vehicle for limited energy case, illustrating uniform wing of constant rigidity

21 p3686 A69-38891

RIGIDITY

Gyromotor flanges axial rigidity measuring methods based on axial deflection of flange or natural frequency of oscillating system

09 p1513 A69-22704

Shear modulus of fiberglass reinforced plastics determined from torsional tests on squared beam of orthotropic material, evaluating influence of end conditions

17 p3058 A69-33204

Torkington progressive rigidity model with successive minimum requirements relation to diagonal matrix elements of molecular force constants

17 p3068 A69-34230

Flexible-rigid hybrid polyimide-epoxy glass multilayer board to fill gap between all flexible and all rigid circuit boards

19 p3319 A69-35545

RILLS

U VALLEYS

RING CURRENTS

Magnetic field behavior at synchronous orbit during magnetospheric substorms, interpreting satellite observed data in terms of partial ring currents

01 p0075 A69-11225

Ring current particle energy density distribution for symmetric portion of magnetic storm derived from current magnetic field profile measurements

01 p0147 A69-11227

Magnetospheric ring current effect on main phase of geomagnetic storms, calculating diurnal storm-time portion of perturbation field

07 p1122 A69-18296

Magnetospheric magnetic field ring current asymmetry during different phases of geomagnetic storm observed by Explorer 26 and Vela 2 satellites

07 p1129 A69-19611

Auroral oval boundary and median line variations with increasing magnetic storm time intensity, noting ring current effect on polar aurora location

09 p1485 A69-21532

Average geomagnetic storm ranges as function of latitude, noting disturbances caused by ring and ionospheric currents

09 p1489 A69-21715

Magnetic lines of force penetration into magnetosphere accompanied by plasma insertion generating ring current responsible for main phase of magnetic storm

10 p1687 A69-23923

Auroral oval and ring current in magnetosphere, analyzing boundaries of lines of force on night side of earth

10 p1689 A69-24203

Plasma distribution and Alfvén wave velocity field in magnetosphere, discussing distortion of dipole magnetic field, ring current and wave propagation

10 p1742 A69-24205

Dynamics of magnetosphere, discussing auroral oval position, ring currents, plasma density and magnetic field variations in near polar region

12 p2072 A69-26741

Model for self consistent time independent ring current of charged particle distribution under combined field of earth dipole and particle motion current

12 p2151 A69-26948

Magnetospheric ring current model from ground stations data to interpret observed magnetic field disturbances

13 p2253 A69-27699

Auroral electrojet index in relation to magnetic storm sudden commencements, ring current main phase and energetic solar protons

14 p2511 A69-28954

Nonuniform ring current belt growth, discussing associated magnetospheric substorms

14 p2513 A69-29123

Geomagnetic ring current study, giving exact kinetic description based on Vlasov equation of plasma ring current in dipolar field

15 p2598 A69-31218

Self consistent ring current of radiation belt under combined influence of earth dipole field and field due to currents of particle motions

16 p2776 A69-32096

Auroral oval boundary and median line variations with increasing magnetic storm time intensity, noting ring current effect on polar aurora location

16 p2783 A69-32527

Polar upper atmospheric phenomena interpreted as magnetospheric substorm manifestations, discussing role of asymmetric ring current formation

21 p3710 A69-38504

Geomagnetic ring current effect on position of auroral absorption zone in northern polar region, noting storm time part of disturbance

23 p4157 A69-41859

RING DISCHARGE

Electron temperature and electron density variations with radial distance in 10 MHz electrodeless ring discharge in H₂, noting electric field

08 p1361 A69-20230

Toroidal plasma nonequilibrium in multiple confinement devices with conventional magnetically shielded supports

08 p1369 A69-20819

RING LASERS

Frequency difference of traveling waves in accelerated rotating ring laser

02 p0257 A69-12417

Ring lasers emission modes, studying nonlinearity effects on radiation field spatial-temporal distribution

03 p0437 A69-13040

Ring laser field space-time pattern from light waves scattered at discontinuities, discussing equations of motion of solid state laser

03 p0441 A69-14140

Laminar and turbulent flow measurement in variety of tube diameters, using ring laser without insertion of mechanical probe

04 p0596 A69-14281

Mode power spectra observations for ring and normal He-Ne lasers at 6328 Å

07 p1155 A69-19087

Quantum oscillators interaction with two level molecules system in circular laser

11 p1899 A69-25325

Laser gain medium dispersion expressions applied to multimode ring laser operation with mode spacing less than pressure broadened atomic linewidth

12 p2106 A69-26324

Laser output power amplitude fluctuations effect on beat frequency stability for traveling waves in annular laser with broadened Doppler emission line

12 p2107 A69-26541

Gas ring lasers, discussing optimal parameters, colliding waves interference, nonmutual effect and radiation polarization

13 p2272 A69-28175

Wave interaction in gas ring laser, delineating single mode emission zones as function of pumping, emission frequency position and Q factor differences

17 p2982 A69-33632

Mode coupling effects in CW gas ring lasers, considering excitation density pulsations, traveling waves dispersion, polarization, etc

19 p3334 A69-36046

Mathematical model of CW ring laser mode coupling in limits of low excitation

19 p3334 A69-36047

Inductively coupled RF excited toroidal Ar ion laser, confining current discharge by strong axial magnetic field to reduce wall losses

19 p3338 A69-36690

Mathematical relations for ring laser beams polarization conditions, using slanted isotropic plate and phase circulator to separate polarization plane

20 p3553 A69-37606

Ring lasers basic operating principles and primary applications, discussing Fresnel drag, magneto-optical effect, etc

22 p3961 A69-40240

Emission spectrum of nonself locked He-Ne ring laser, deriving phase relations for LF intermode oscillations

24 p4328 A69-43159

Polarization characteristics of He-Ne ring laser emission with circularly anisotropic resonator, analyzing ellipticity as function of half wave cavity plate

24 p4328 A69-43160

RING STRUCTURES

NT REINFORCEMENT RINGS

Self gravitating pulsating cylindrical and ring shaped cosmic masses from group theory standpoint compared with oscillating stars

01 p0148 A69-10124

Point load subjected deflections of cantilevers and circular rings found using electronic analog computers

03 p0522 A69-12865

Solid viscosities effects on dynamic load factors of ring and hollow sphere subject to uniformly distributed impulsive loads along inner and outer edges

03 p0530 A69-14089

Elastic ring subject to uniform hydraulic pressure on inner boundary and with two opposite slipless quarter-arcs on outer boundary, noting stress and deformation [ASME PAPER 68-WA/APM-17]

04 p0669 A69-14395

Lunar and Martian annular formations and structures, discussing classification, morphological characteristics, incidence frequencies and area sizes

04 p0658 A69-14959

Saturn ring formation by satellite spiral into Roche limit and disintegration

04 p0660 A69-15128

Elastic plastic stress distribution in compressed ring determined with postyield strain gages and stress-strain relationship from uniaxial tensile test

05 p0837 A69-16063

Stress distribution and spring rates in cantilever cone ring combination [ASME PAPER 68-WA/DE-3]

05 p0839 A69-16168

Three dimensional deformation and buckling of circular ring, discussing in-plane and out of plane deformations and loads [ASME PAPER 68-WA/DE-4]

05 p0839 A69-16169

Korn constant for boundary value problem of linear elastostatics applied to circular ring domain

05 p0844 A69-16740

Aberration of dielectric patches and rings attached to radome surface described by insertion phase

07 p1111 A69-19530

Separation of principal stresses along sections of symmetry free from external loads with application to circular ring and grooved bar

08 p1412 A69-20256

Matrix properties related to torsional fatigue life of fiberglass reinforced NOL rings, using polyester and epoxy resins as model systems

08 p1339 A69-20495

Rotational spectrum of ethylene episulfoxide to determine molecular structure, particularly orientation of C sub 2 S ring

08 p1268 A69-20535

Large deflections and associated moments in circular ring of linearly viscoelastic material subjected to small strains

09 p1615 A69-21925

Gravitational potential of circular rings used to investigate motion stability of Saturn rings

10 p1771 A69-22855

Radiation fields induced by constant current in elliptic ring, discussing analysis results applicability to elliptic capacitive antennas and annular slot

11 p1850 A69-24981

Thin ring-strut structure resting on elastic foundation, analyzing deformation taking warping effects into account, noting applicability to engine design

12 p2184 A69-26812

Three dimensional deformation and buckling of circular ring, discussing in-plane and out of plane deformations and loads [ASME PAPER 68-WA/DE-4]

13 p2360 A69-27420

Stress and strain fields for circular rubber ring under diametrical compression between flat plates, using moire, large strain analysis and photoelastic verification

14 p2531 A69-28884

Macromolecular ring shaped components corresponding to hemagglutinin studied in Limulus polyphemus hemolymph by electron microscopy

16 p2742 A69-31864

Thin circular ring stability under uniform external transverse loading at various angles, discussing transverse shear deformation effects and buckling

17 p3061 A69-33707

Large deflections of thin nonlinearly elastic ring under external pressure, using two layer model

17 p3062 A69-33715

Buckling time of oval ring under unsteady creep based on strain hardening theory

17 p3062 A69-33716

Mean rotational velocity of finite width gaseous ring in close binary system from rotational velocity measured on spectrograms

17 p3044 A69-34180

Lunar and Martian annular formations and structures, discussing classification, morphological characteristics, incidence frequencies and area sizes

18 p3197 A69-34722

Graphite fiber NOL rings and biaxial wound pressurized cylinders tested at ambient and cryogenic temperatures for tensile and cyclic fatigue properties

19 p3355 A69-35521

Elastic oscillations of inhomogeneous orthotropic ring under time-variable axisymmetrical load analyzed by Fourier method

19 p3434 A69-35828

Saturn ring dynamical structure theory supported by observations of knots or condensations

20 p3600 A69-37482

Optimal plastic design of circular sandwich ring assuming symmetric loading, minimum plastic resistance and cost justification of stronger cross section

20 p3625 A69-37590

Axially symmetric distribution of residual strain in multilayered filament wound ring analyzed and compared with experimental results

20 p3628 A69-37774

Optical properties and thickness of Saturn rings from observations during ring plane crossing of earth or sun, determining Tethys diameter and albedo

20 p3605 A69-37821

Saturn surface spectrum near ring shadow examined for water vapor content in ring and greenhouse effect on surface

20 p3616 A69-38305

Equivalent circuit technique for dispersion equation and coupling impedance of slow wave structures of ring-rod systems, noting retardation

23 p4139 A69-41944

Dynamic uniaxial tensile stress-strain data obtained at high rates by measuring kinematics of symmetrically expanding thin ring specimens

24 p4330 A69-42735

Flexural vibrations of rectangular cross sectioned rings, solving characteristic value problem for finite circular cylindrical shell

24 p4404 A69-43629

Computer program determination of barreling effect on strength of ring and stringer stiffened shells designed to support axial compression loads

24 p4405 A69-43671

RING WINGS

Monograph on ring airfoil theory with nonuniform incidence covering steady flow and shear flow transition into boundary value problem of potential theory

17 p2889 A69-32995

RIOMETERS

Riometric data processing method for radio wave absorption measurement, considering nighttime cosmic radio emission intensity

14 p2436 A69-29056

Ground based solar proton monitoring, considering particle intensities and radiation dose rates from riometer absorption as function of time

16 p2850 A69-32321

Polar ionosphere investigation based on vertical sounding and riometric observations, earth electromagnetic field and polar auroras spectrum intensity variations

17 p2963 A69-33950

High latitude geomagnetic disturbances, incoming electron fluxes and riometric absorption relationship in lower ionosphere studied by X ray bremsstrahlung with sounding balloons

17 p2964 A69-33961

Spatial gradient and amount of auroral radio absorption measured by riometers at magnetically conjugate and closely spaced stations

22 p3934 A69-39966

HF radio waves auroral absorption in ionosphere reviewed for first decade of riometry

22 p3902 A69-41218

RIOMETRY

U MEASUREMENT

U RIOMETERS

RISK

Predictive model for risk in technological research and development

04 p0689 A69-14980

R and D program risk evaluation methodology in density functions form for program goals probabilities, noting random variables as parameters

19 p3455 A69-36008

Risk taking under uncertainty in individual and group decisions, analyzing gambling and group discussion situations

23 p4091 A69-42016

Risk factors in coronary diseases modified to provide base for estimating achievable mortality magnitude reduction

24 p4262 A69-43059

RITZ AVERAGING METHOD

Nonlinear boundary value problems direct generalized solutions based on linearization of Bubnov-Galerkin and Ritz method

02 p0272 A69-12136

Computerized solution of three dimensional problems of elasticity theory using Ritz method

03 p0527 A69-13743

Finite element method convergence introduced as general numerical technique related to Ritz method in structural analysis with digital computers

03 p0527 A69-13745

Incorrect problem solving method applied to Cauchy problem solution for nonlinear partial differential equations, considering Ritz method applicability

07 p1174 A69-19005

Nonradial oscillation modes of massive stars determined by Ritz method application to variational principle, allowing for gravitational perturbation

10 p1785 A69-24036

Modified Bubnov-Galerkin-Ritz method for determining approximation coefficients in stress and displacement analysis, using mixed variational principle of elasticity theory

18 p3215 A69-34566

RIVERS

Lunar rivers as coalesced chain craters resulting from gas emission along fracture beneath lunar regolith

18 p3205 A69-35436

Rivers on moon, discussing possibilities of water existence on lunar surface in view of temperature, gravity and atmospheric conditions

19 p3419 A69-36145

RIVETED JOINTS

Single row riveted joints, representing rivet forces by Chebyshev functions in homogeneous arrangements and obtaining equations for continuous joints from limit procedure

04 p0682 A69-15292

Sonic riveting of aircraft Al alloys, noting no evidence of forging bursts, cracking, splitting, tearing and springback

24 p4320 A69-43060

RIVETING

Sonic riveting of aircraft Al alloys, noting no evidence of forging bursts, cracking, splitting, tearing and springback

24 p4320 A69-43060

RIVETS

Couple stresses effect on thin plate stress distribution due to pressure of rivet on one side of circular hole

08 p1319 A69-20201

Crack propagation in plate with stiffening ribs /riveted stringers/ under concentrated and tensile loads, determining rivet points displacements

24 p4406 A69-43709

RL-10-A-1 ENGINE

Flox/methane pump fed engine, discussing RL-10-A engine tests and optimized 5000 lb thrust engine design [AIAA PAPER 69-510]

16 p2741 A69-32720

RL-10 ENGINES

U RL-10-A-1 ENGINE

RLC CIRCUITS

NT LC CIRCUITS

Unified theory of normal mode analysis of RLC networks based on Tellegen theorem of Kirchhoff law, discussing coupled networks

07 p1115 A69-18858

RLC filters transfer functions applied to development of high pass filter

08 p1300 A69-21176

Equations adaptable to computer for RLC circuits containing linear and nonlinear n-terminal networks derived by nodal method

09 p1472 A69-21779

RLC two terminal bridge network synthesis, considering two reactances, three resistances and constraints

09 p1464 A69-22291

Frequency selective mechanical filter and LCR circuits and applications, noting inductances in solid state and thin film technology

09 p1467 A69-22558

Multiple loop feedback systems synthesis utilizing extended node introduction synthesis theory, considering filter response functions characteristics
10 p1667 A69-24037

Log periodic dipole array antennas simulated with simple RLC circuit loading uniform transmission line
11 p1850 A69-24977

RLC integrated low inductance circuit for magneto-optical high speed camera shutters, Q switched ruby laser and short light pulses in spark gap
12 p2084 A69-26149

Differential equations application to electrical circuit problems, solving voltage for series LCR networks and transforming Mathieu into Hill equation
12 p2052 A69-26351

Time varying resistance wire to arrest oscillations in pulsed capacitor discharge circuit, deriving over, under and critical damping conditions
22 p3917 A69-41228

RNA
U RIBONUCLEIC ACIDS

ROADS
U HIGHWAYS

ROASTING
Pressure calcinering process in production of fine grained ceramics at low temperatures
12 p2119 A69-26832

ROBOTS
Robot command and control by computer assembly, describing engineering analog of vertebrate nervous system
21 p3679 A69-39603

ROCHE LIMIT
Low mass close binary systems evolution, describing components inside critical Roche lobe in initial detached phases
10 p1777 A69-23310

ROCK SALT
U HALITES

ROCKET BOOSTERS
U BOOSTER ROCKET ENGINES

ROCKET-BORNE INSTRUMENTS
Rocket released probe orientation determination from polarization measurements on telemetry signal
02 p0207 A69-11813

Canadian program of scientific rocket sounding of auroral phenomena, outlining systems approach, engineering and scientific cooperation requirements, etc
02 p0335 A69-12689

Alignment of rocket-borne instrument with sun, discussing mechanical system design, servocontrol and silicon photodiode sensors
03 p0427 A69-12980

Nocturnal electron concentrations and temperature at Manitoba measured by rocket-borne Langmuir probe, compared with F1 region
03 p0502 A69-14008

Solar hydrogen Lyman alpha line profile measurement by rocket-borne spectrophotograph, obtaining flux available for scattering by atomic hydrogen in geocorona
05 p0815 A69-16254

Upper atmosphere physics, atmospheric composition and separation of gases, nature of air flow, water vapor content and lower ionosphere structure determinations by rocket
[UN PAPER 68-95693] 06 p0949 A69-17058

Rocket-borne Rayleigh scattering instrumentation to measure atmospheric density, discussing instrumentation and flight results
06 p0927 A69-17698

Rocket transportation for upper atmospheric measurements, discussing sensors and cost effectiveness
[AIAA PAPER 69-159] 06 p1018 A69-18066

Multilens spectroheliograph for nonstabilized rockets, obtaining consecutive points recording along solar image chord
08 p1313 A69-20252

Solar proton monitoring by particle detectors on-board rockets and IMP satellite
08 p1318 A69-21142

Temperature profiles variability for data obtained by rocketsonde thermistors launched with small time and spatial separation
09 p1494 A69-21644

Solar research from rockets and satellites, considering solar instruments including EUV spectrographs
10 p1772 A69-22867

Rocket IR astronomy in support of big bang hypothesis, considering photoelectric detectors and instrument system
10 p1772 A69-22868

Miniature telemetry systems for gun launched projectile instrumentation and ejection payloads, noting voltage controlled oscillators, commutators and VHF FM transmitters
10 p1654 A69-23280

Rocket-borne spectroheliograph for monochromatic solar photography in Mg II 2802.7 A line noting filter bandwidth, film polarizers and temperature control
11 p1884 A69-24838

Aerobee rocket-borne liquid helium cooled telescope for IR night sky observations
11 p1885 A69-24852

Spinning rockets UV spectrophotometry of early type stars, discussing instrumentation, calibration, data recording and stellar spectra
12 p2153 A69-25812

Rocket-borne scintillation spectrometer for cosmic photon radiation
14 p2449 A69-29566

Rocket observations of protons and alpha particles energy spectra after solar flares, noting riometer and magnetometer recordings
15 p2677 A69-31329

Weak emissions in near IR daytime airglow using rocket-borne spectrometers
16 p2776 A69-32094

Rocket instrumentation for electron and proton spectra measurement in aurora borealis
17 p2972 A69-33038

Rocket-borne AM radio receiver for Faraday rotation experiments to measure lower ionosphere electron density, giving circuit diagrams
17 p2936 A69-33062

Attitude stabilized rocket-released magnetometer for detection of earth field magnitude and direction changes
19 p3309 A69-35994

Rocket-released magnetometer probe for upper atmospheric measurements, discussing construction, flight, sensitivity and ionosphere current detection
19 p3309 A69-35995

Sounding rocket S band telemetry antenna operation, proposing quasi-isotropic pattern criterion to reduce effects of shadowing and interference
19 p3271 A69-36252

Solar photography at extreme UV wavelengths using pinhole camera instrumentation on stabilized Skylark rocket
20 p3539 A69-37545

Small rocket instrumentation techniques - COSPAR Conference, May 1968
20 p3541 A69-37790

Retarding potential analyzers to measure rocket vehicle potentials and ambient electric fields in active auroras
20 p3542 A69-37793

Auroral sounding rocket research and instrumentation in Scandinavia, discussing auroral particles, optical measurements, probe experiments and scientific objectives
20 p3542 A69-37794

Rocket-borne IR astronomical telescope high altitude observations compared with balloon observations
20 p3605 A69-37800

X ray heliography by Fresnel-Soret type zoneplate camera to obtain solar photographs from rockets
20 p3544 A69-37803

Piezoelectric microphone sensor flown on rocket for recording micrometeoritic impacts during noctilucent cloud display, determining cosmic dust particles flux
21 p3793 A69-38348

Neutral components of arctic thermosphere measured with rocket-borne RF mass spectrometers, discussing origin of atomic hydrogen and water lines
21 p3704 A69-38367

Neutral particle density ratios in thermosphere by rocket-borne monopole mass spectrometers
21 p3704 A69-38368

Digital processing of rocket-borne mass spectrometers for measurements in upper atmosphere, discussing calibration
22 p3904 A69-40232

Rocket UV spectra indicating Venus atmosphere weak absorption and low ozone abundance and possible Jupiter surface depressions
22 p4028 A69-40661

Thin film temperature sensor material, response time, substrate material and flight instrumentation for rocket-borne application
22 p3950 A69-41229

ROCKET-BORNE PHOTOGRAPHY

Rocket-borne spectroheliograph for monochromatic solar photography in Mg II 2802.7 A line noting filter bandwidth, film polarizers and temperature control
11 p1884 A69-24838

Solar corona observations on eclipse day by Aerobee rocket launched in New Mexico correlated to Siberian total eclipse photograph
15 p2696 A69-31099

Magnetically focused electronographic image converters for far UV photography and spectroscopy from sounding rockets, discussing stellar observations
20 p3543 A69-37801

ROCKET CHAMBERS

U COMBUSTION CHAMBERS
U THRUST CHAMBERS

ROCKET COMBUSTORS

U COMBUSTION CHAMBERS
U THRUST CHAMBERS

ROCKET ENGINE CASES

Rocket motor integration into Scout vehicle to improve performance
02 p0335 A69-12384

Cost and weight optimization for solid rocket motors using various steel casings
[SAWE PAPER 777] 18 p3208 A69-34871

Microplasma, W inert gas and submerged arc welding processes for fabrication of rocket motor cases and pressure vessels, discussing material requirements and weldability
[SBAC PAPER 7] 20 p3550 A69-37449

Carbon fiber composites in construction of rocket motor cases, pressure vessels and support structures, including carbonization for ablation and insulation applications
23 p4180 A69-42158

Carbon fibers and resin composites used as rocket motor systems ablative liners and structures, noting role in motor weight reduction
24 p4336 A69-43210

ROCKET ENGINE CONTROL

Soviet book on rocket engines covering combustion, fuels, engine design, controls and employment of nuclear energy
01 p0143 A69-11196

Electrohydraulic guidance of second stage of Diamant rocket used for orbiting satellites employing thrust vector orientation
04 p0551 A69-15183

Fluidic proportional thruster system for sounding rocket control
[ASME PAPER 68-WA/FE-32] 05 p0763 A69-16105

Scout launch vehicle for launching small research satellites in near earth orbits, describing solid propellant stages, guidance, telemetry and beacon systems
06 p1016 A69-17597

Fluidic vortex valve warm gas flow control for rocket application
[AIAA PAPER 69-118] 06 p0872 A69-18147

Ammonium perchlorate exothermic decomposition control noting effects of preheating and ammonium fluoroborate additives
[WSCJ PAPER 68-25] 07 p1202 A69-18363

Rocket propulsion with gaseous bipropellant systems and attitude control
08 p1376 A69-20870

Rocket engine test facilities automation noting cost reduction and improved capabilities
10 p1671 A69-23258

Time optimal steering for rocket vehicle with trajectory defined between initial and final state, using minimum principle and boundary value problem solution
11 p1861 A69-25454

Control system design for Black Arrow satellite launch vehicle based on Black Knight test vehicle system
14 p2530 A69-29630

Contaminants formation during pulse mode operation of liquid bipropellant attitude control rocket engine, discussing exhaust plume effects
[AIAA PAPER 69-574] 16 p2870 A69-32774

Rocket nozzle control by side forces produced by secondary gas stream injection observed for relationship with inclination angle to nozzle axis
20 p3457 A69-37065

Automation application to rocketry, discussing process control in installations including control circuits and electronic direct digital control system
20 p3617 A69-37340

ROCKET ENGINE DESIGN

Book on material and design problems encountered in construction of high performance missiles, rockets and spacecraft, considering influence of space environment

01 p0084 A69-10021

Gamma type 2 rocket engine for second stage of Black Arrow satellite launcher

01 p0143 A69-10834

Black Arrow space vehicle uprating, considering engines burning kerosene with HTP and turbopumping systems

01 p0143 A69-10835

Soviet rocketry origin, technology, launch vehicles, boosters and orbital assembly concept

01 p0162 A69-11066

Soviet book on rocket engines covering combustion, fuels, engine design, controls and employment of nuclear energy

01 p0143 A69-11196

Glass fiber reinforced plastic /GFRP/ roving end grains in rocket combustion chambers, discussing design and structural parameters

02 p0305 A69-12748

High pressure rocket engine design, considering complete combustion, propellant feed system overall efficiency and thermodynamic gain

03 p0495 A69-12888

Solid propellant rocket engine designs for ELDO-PAS apogee motors, discussing use of advanced materials to improve mass ratio and strap-on boosters

03 p0495 A69-12890

Apogee stage and strap-on booster applications of solid propellant rocket motors, discussing configuration, functioning and performance

03 p0494 A69-12891

Sublimation solid reaction control, discussing propellants, nozzle performance, sublimation area, power, pressure drop, response and valueless design [AIAA PAPER 68-516]

04 p0552 A69-15322

Isotopic propulsion engine development problems, emphasizing single channel thermal power engine with hydrogen working fluid

05 p0811 A69-15596

Suborbital probes, discussing UK sounding rockets Skylark, Petrel and Skua configurations, capabilities and performances

06 p1012 A69-16859

Unsteady supersonic flow around thin circular cylinder representing rocket stage, calculating flutter and response to random environment [ONERA-TP-666]

06 p0857 A69-17098

Scout launch vehicle for launching small research satellites in near earth orbits, describing solid propellant stages, guidance, telemetry and beacon systems

06 p1016 A69-17597

Aerobell extendible nozzle rocket engine design and performance, cold flow and simulated hot flow test results [AIAA PAPER 69-4]

06 p0985 A69-18195

Liquid fuel rocket engine design for cooling by propellant counter flows

08 p1376 A69-20588

Optimal length conditions of liquid rocket combustion chambers, considering propellants, injection conditions, etc, noting graphs and differential equations solutions

08 p1376 A69-20606

NERVA rocket engine with 200,000-250,000 lb thrust to replace Saturn 5 upper stage for manned interplanetary flights, discussing Mars flight

08 p1410 A69-21029

Ion accelerators design for Kaufman thrusters in terms of beam optics and grid lifetime, using digital computer and electrolytic tank analog [AIAA PAPER 69-261]

09 p1567 A69-21261

Film cooling design criteria for small rocket engines [AIAA PAPER 68-617]

09 p1570 A69-21978

Rocket engine high energy hybrid propellant performance optimization, discussing engine enlargement, oxidizer injection geometry, fuel additives, combustion gas vorticity, etc

11 p1943 A69-25428

Book on theory and design of jet, rocket, nuclear, ion and electric propulsion systems noting combustion, detonation, fluid injection and space mission applications

11 p1943 A69-25582

Ion spacecraft propulsion systems, discussing components and characteristics of reaction type rocket engines and electrical thrust devices

11 p1944 A69-25593

Solid propellant rocket engine design for combustion stability, discussing length, pulse induced and acoustic instability types [AIAA PAPER 68-532]

12 p2191 A69-26788

Soviet book on liquid fuel rocket engines design covering gas expansion in nozzles, mixture formation, heat transfer, injectors and supply systems

12 p2148 A69-27078

Electric rocket propulsion, discussing roles of plasma and gas discharge physics in development of electromagnetic, electrostatic and thermoelectric nuclear systems

13 p2325 A69-28253

Nuclear rocket propulsion operation, design, properties and performance of electrostatic, electrothermal and electromagnetic systems

13 p2297 A69-28254

Rocket motors with combustion chambers of variable geometry for hybrid propellants, stressing toroidal chamber

15 p2671 A69-30600

Hybrid motor in sounding rocket using amino plastic as fuel and nitric acid as oxidizer, discussing advantages in cost, handling, thrust, performance, etc

16 p2835 A69-31744

Oxidizer injector face configuration for high power variable thrust rocket engine using hydrogen/oxygen propellant

16 p2835 A69-31749

Solid fuel rocket engine thrust and chamber pressure development curves from charge and engine geometry, heat of explosion and kinetic characteristics

16 p2836 A69-31994

Vaporization interaction liquid rocket performance model, discussing performance loss evaluation and test data [AIAA PAPER 69-470]

16 p2838 A69-32663

Heat pipes design for rocket engines cooling, discussing connections to space radiator and to heat rejection device and heat transfer capability [AIAA PAPER 69-582]

16 p2839 A69-32668

Oxygen difluoride-diborane propellant injector and chamber design criteria applied to unmanned spacecraft rocket engine development [AIAA PAPER 69-508]

16 p2839 A69-32671

Fluid controlled solid rocket motors design for Mars mission with acceleration level as parameter, discussing mission specifications, system design and component considerations [AIAA PAPER 69-446]

16 p2841 A69-32687

Nozzle throat ablative materials for controlled high regression rates in tactical rocket motors, primarily nylon reinforced thermosetting resins [AIAA PAPER 69-423]

16 p2804 A69-32710

Flox/methane pump fed engine, discussing RL-10-1-A engine tests and optimized 5000 lb thrust engine design [AIAA PAPER 69-510]

16 p2741 A69-32720

Engine and components reliability, discussing design stage and programming [AIAA PAPER 69-476]

16 p2795 A69-32771

Charged colloids generation by electrostatic spraying for thruster concept, subjecting metal capillary needles to AC voltage [AIAA PAPER 69-495]

16 p2846 A69-32773

Small penetration aid rocket motors fabrication, discussing axial- and tangential-thrust integral assembly, impulse levels, delay line connection for igniters, production evolution, etc [AIAA PAPER 69-520]

16 p2795 A69-32779

Europa 3 rocket design, comparing 2 ton geostationary satellites and 700 kg satellite conceptions

17 p3045 A69-33095

RF ion thrusters using electrodeless self sustaining mercury discharge, describing basic theory, component design, performance optimization and test results

17 p3018 A69-33326

Solid propellant thrusters fabrication procedures, design considerations and quality control, stressing stress analysis and propellant choice with respect to geometry

17 p3018 A69-33331

Hall ion thruster prime propulsion system, considering low and high voltage mode in plasma source I-V characteristics

17 p3019 A69-33338

Rocket motors using hydrazine as monopropellant, considering doping as means of using anhydrous hydrazine mixed with other products

17 p3019 A69-33340

German rocket engine industry reliability and performance, discussing solid fuel, two component fuel, single fuel hydrazine, mixed fuel and ramjet engines

17 p3021 A69-33361

Kaufman ion thruster ESKA 18 operation principles and design compared to RIT 10 and SERT 2, discussing discharge and focusing characteristics and propulsion parameters

17 p3022 A69-33605

Agna rocket vehicle production reliability evaluation program, testing specific representative equipment randomly selected from production stores

18 p3146 A69-34510

Solid propellant rocket motor predictive design by correlating performance and weight statistics via computer program [SAWE PAPER 775]

18 p3184 A69-34873

NERVA technology development, discussing reactor technology program, downward firing and flight-like configuration engine [AIAA PAPER 68-612]

19 p3371 A69-35942

Titan 3 transtage attitude control system hydrazine rocket engine design and performance, emphasizing problems associated with monopropellant [AIAA PAPER 69-422]

19 p3394 A69-36300

Soviet monograph on electrical rocket engines covering basics of nuclear, electrothermal, plasma and ion engines

20 p3586 A69-37236

Cryogenic core concept for flexible and economical delivery system [AIAA PAPER 68-812]

21 p3827 A69-39753

Laboratory prototype of RF ion engines for space test, discussing components optimization

22 p3998 A69-39904

Solid rocket motor static firing tests in low pressure environment, presenting data concerning vacuum chamber pressure, diffusers pressure distribution, chamber wall temperature distribution, etc

22 p4000 A69-40593

Thrust optimization for sounding rocket to reach maximum altitude with given initial and propellant weight, using polygonal time function and multiple-parameter numerical technique

22 p4037 A69-41050

Kaufman ionic thruster /ESKA 18/ principles, design, electrical circuit, working and experimental characteristics, compared with RIT 10 and SERT II

23 p4203 A69-41934

Soviet book on rocket engines covering combustion, fuels, engine design, controls and employment of nuclear energy

01 p0143 A69-11196

High thrust fluorine engines and propellants

03 p0494 A69-12889

Pressure and flow transients in liquid rocket engine feed systems predicted by method of characteristics

03 p0495 A69-12991

Chemical rockets theory for case of chemical equilibrium and frozen nozzle expansions

03 p0495 A69-13004

Performance, operational, economic and management selection criteria for choosing rocket engine for particular vehicle and mission, noting rocket engine propellants

04 p0647 A69-15296

Microorganism viability in rocket engine combustion environments used to determine probability of biological contamination of Mars by Voyager missions

05 p0714 A69-15949

Fluidic proportional thruster system for sounding rocket control [ASME PAPER 68-WA/FE-32]

05 p0763 A69-16105

- Initiation of HF combustion oscillation in premixed gas rocket
[ISAS-430] 06 p1029 A69-17025
- Advanced propulsion systems propulsive capabilities in connection with interstellar flights, considering rocket and ramjet propulsion, energy requirements and stellar plasma
06 p0984 A69-17631
- Flight research testing facilities at Arnold Engineering Development Center for rockets, turbojets, ramjet engines, aircraft, missiles, satellites and spacecraft
08 p1302 A69-20883
- Research and development program in annular slit colloid thruster technology, proving thruster feasibility by performance tests
[AIAA PAPER 69-287] 09 p1566 A69-21257
- MPD engine plasma flow investigated by Langmuir probe measurement of ion saturation current
[AIAA PAPER 69-233] 09 p1567 A69-21266
- Rocket motors for ejection of instruments from sounding rocket payloads, considering powder cartridges and solid propellant motor characteristics
10 p1635 A69-23032
- Ramjets and air augmented rockets as propulsion systems for supersonic atmospheric flight, noting inlet design, combustors and nozzles
11 p1943 A69-25586
- Rocket propulsion devices classifications, discussing energy sources, propellants, performance, space vehicle applications, liquid propellant rockets, engines, selection criteria and cooling methods
11 p1943 A69-25587
- Unsteady gas dynamics of explosions and detonation theory, noting applications to rocket propulsion systems performance
11 p1876 A69-25595
- Nozzle erosion profile, char penetration and temperature response predicted for nozzle material for 260 SL-3 motor
[AIAA PAPER 68-504] 12 p2118 A69-26784
- Charged particles generation by liquid subjected to high electric field for efficient bipolar microthruster
[AIAA PAPER 67-728] 13 p2325 A69-28220
- Tactical rocket propulsion - Conference, La Jolla, California, April 1965
16 p2836 A69-31991
- Compressible turbulent accelerating boundary layer flow model for convective heat transfer from rocket combustion gases, noting heat flux
16 p2878 A69-32000
- Small disturbances and effect on processes of fast combustion of inflammable compressible mixture
16 p2837 A69-32137
- Fast heat-up electrothermal ammonia thruster role in development of hybrid resistojet in millipound thrust range
[AIAA PAPER 69-496] 16 p2838 A69-32649
- Pilot chamber initiated thermal decomposition reactor concept for monopropellant thruster, discussing thrust levels and throttling ratios
[AIAA PAPER 69-420] 16 p2841 A69-32685
- Flight performance prediction for throttling bipropellant rocket engine utilizing ablative combustion chamber throat, discussing lunar module descent engine
[AIAA PAPER 69-452] 16 p2841 A69-32690
- Analytical evaluation of secondary flow injection effects on rocket engine performance including cold flow and simulated hot flow data
[AIAA PAPER 69-473] 16 p2844 A69-32726
- Cost reduction criteria for rocket propulsion systems and components, discussing literature searches, engineering criteria, total program cost vs mission accomplished, etc
[AIAA PAPER 69-440] 16 p2883 A69-32748
- Ammonia jet device to stabilize telecommunication satellites consisting of electric heating element, ejection nozzle and thermal screens
17 p3018 A69-33236
- Thrust vector control by secondary gas injection for predicting lateral thrust performance, applying method to rocket engines, secondary gas generator and injector configuration
17 p3019 A69-33333
- Continuous mode operation in hypergolic bipropellant low thrust rocket motors, discussing high temperatures reached by combustion chamber walls and cooling solutions
17 p3019 A69-33335
- Wire wound glass fibers for rocket motors, discussing rupture strength
17 p3021 A69-33357
- Aerodynamic characteristics of plane inviscid fluid jets expanding over curvilinear surface, deriving force equations for surfaces in jet and rocket engines
19 p3296 A69-35815
- LM descent engine behavior upon contact with lunar surface simulated, basing test condition on statistical trajectory analysis indicating fire until touchdown possibility
[AIAA PAPER 69-1020] 22 p3923 A69-40391
- Rocket motor combustion efficiency evaluated by chemical energy conversion to equilibrium, applicable to fuels, oxidizers and combustors at subsonic or supersonic velocity
23 p4239 A69-41919
- Performance test of German MPD plasma rocket engine with augmented magnetic field and 5-10 kw output, describing integral measurement procedure and observed phenomena
[DGLR-69-024D] 23 p4202 A69-41927
- ### ROCKET EXHAUST
- Optical measurements through retrorocket plumes of landing spacecraft, investigating reduced landing site visibility and modulation transfer function
02 p0248 A69-11765
- Diffraction by rocket exhausts, discussing electromagnetic signal attenuation based on two dimensional straight edge diffraction model
02 p0209 A69-12352
- Electrostatic potential generated by rockets on space vehicles, noting source of electric current in exhaust plumes and effect on instrumentation
03 p0522 A69-13903
- Altitude effects on radar attenuation in nonequilibrium solid propellant afterburning rocket exhaust plumes
04 p0685 A69-14730
- Nuclear rocket engine exhaust gas cooling by injecting water jet eliminates need for secondary cooling
[AIAA PAPER 68-604] 04 p0591 A69-15516
- Radar backscattering from turbulent rocket exhaust plumes
[AIAA PAPER 69-71] 06 p0891 A69-18071
- Optical absorption index for molten beryllium oxide based on measurements of small beryllium/solid propellant rocket motor exhaust plumes
08 p1351 A69-20149
- Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies
[AIAA PAPER 69-270] 09 p1565 A69-21252
- Electrostatic rocket exhaust condensation on spacecraft solar electric panels cover glasses, noting deleterious effects
[AIAA PAPER 69-271] 09 p1569 A69-21874
- Pressure and heating rate correlations for rocket exhausts impinging on flat plates and curved panels, generating axisymmetric real gas exhaust plumes
12 p2190 A69-26781
- Laser Doppler particle sensor to measure velocities in rocket exhausts, using He-Ne laser light source and Fabry-Perot interferometer frequency filter
[AIAA PAPER 68-723] 12 p2094 A69-26783
- Baker-Nunn photometry from Apollo tracking utilizing photographs for brightness, dynamics and duration of rocket exhausts and venting clouds
15 p2571 A69-31338
- Rocket stability monitoring by temporal radiometry, using exhaust radiance measurement to detect frequencies in thrust chamber combustion pressure
[AIAA PAPER 69-580] 16 p2839 A69-32670
- Stagnation point electrostatic probe for measuring local electrical properties of solid propellant rocket exhausts
[AIAA PAPER 69-573] 16 p2840 A69-32677
- Rocket exhaust plume flow fields studied for vehicle effects taking into account nozzle boundary layer, coalescence shock and nonisentropic flow
[AIAA PAPER 69-569] 16 p2842 A69-32696
- Test programs utilizing pitot probes to map exhaust plumes from liquid bipropellant engines in low ambient pressures conducted to verify calculations
[AIAA PAPER 69-575] 16 p2869 A69-32746
- Exhaust plume rarefaction from sonic orifice, considering continuum to transitional behavior for perfect gas
[AIAA PAPER 69-657] 17 p2892 A69-33465
- Attitude control rocket exhaust plume impingement effect on electrical performance and mechanical damage of commercial silica covered silicon solar cells
19 p3252 A69-35700
- Accelerometer force balance method for measuring aerodynamic rocket plume forces acting on flat plate model in short duration shock tunnel test environments
19 p3292 A69-35737
- Water injection cooling of exhaust gases during stage testing of NERVA engine, discussing exhaust duct configuration and flow characteristics, spray nozzle geometry, etc
[AIAA PAPER 69-514] 19 p3372 A69-36301
- Chemical and thermal behavior of materials corrosion in propellant exhaust gases with analysis of reactions involving hydrogen, nitrogen, water, carbon dioxide, etc
21 p3784 A69-39489
- Outer space rocket plumes simulation facility combining low density wind tunnel and molecular sink properties, discussing role of liquid nitrogen cooled diffuser-precooler
22 p3928 A69-40731
- Liquid alumina particles agglomeration in convergent and throat region of nozzle leading to performance decrease by increasing velocity and temperature difference between phases
22 p4001 A69-40929
- Apollo 11 observations of lunar surface glazing, considering radiation heating due to solar outbursts, rocket exhaust effects, shock heating or volcanism, erosion, etc
23 p4216 A69-42202
- Rocket exhaust plume models for signal attenuation predictions, considering inhomogeneous plasma medium with varying electron density and collision frequency
24 p4408 A69-43253
- ### ROCKET FIRING
- #### NT RETROFIRING
- Nozzle erosion profile, char penetration and temperature response predicted for nozzle material for 260 SL-3 motor
[AIAA PAPER 68-504] 12 p2118 A69-26784
- ### ROCKET FLIGHT
- Soviet look on inertial control of ballistic rockets covering rocket flight deviations measured by onboard sensors and computer
01 p0113 A69-10994
- Rocket guidance, discussing foreign systems with emphasis on German range miss/gradient orientation scheme used on World War II V-2 rockets
02 p0279 A69-12362
- Cosmos 253 rocket reentry and fragmentation over England
05 p0830 A69-16656
- Psychomotor reactions to zero gravity during ballistic rocket flights, analyzing electrical activity of cortex in animals
06 p0874 A69-17649
- Oculomotor muscular tonus of rabbit during rocket flight acceleration and weightlessness
07 p1062 A69-18590
- Variation in spinning velocity around axis of last stage of solid propellant rocket in flight
08 p1409 A69-20160
- Black arrow rocket vehicle flight path computer programming, discussing geographical restrictions on design
09 p1593 A69-21616
- Constant acceleration relativistic rocket flight from inertial rocket and terrestrial point of view compared, examining light flash transmission and arrival time
09 p1609 A69-21959
- Coasting arc determination in rocket trajectory problems by Lagrange multipliers
09 p1595 A69-21969
- Psychomotor reaction time and motions, myogenic tonus at rest and precision of monkeys during rocket flights along ballistic curve, noting weightlessness effect
10 p1646 A69-23575
- Rocket trajectory determination by tracking on-board light source against star background with image orthicon TV system
12 p2033 A69-26965
- Aerodynamic failure investigation of Black Brant 2 single stage sounding rockets
15 p2703 A69-31545
- Hazards model for probabilistic prediction of casualties by exploding solid propellant rockets, deriving casualty expectation equation
[AIAA PAPER 69-461] 16 p2869 A69-32749
- Regularization method for maximum height ascent of rocket uniformly approximating control function by gradient projection method
18 p3164 A69-34706
- Mechanics of missile dispersion due to dynamic imbalance and rocket spin stabilization problems
[SAWE PAPER 741] 18 p3208 A69-34886
- Operational missile flight program validation plan noting mission analysis, computer programming, program preparation and performance prediction
19 p3279 A69-35955
- Single stage rocket control and trajectories for maximum target strike probability within given range
21 p3818 A69-38857

ROCKET FUEL TANKS

Integrals of motion for minimum fuel rocket trajectories in inverse square field calculated for constant power and constant exhaust rockets
[AIAA PAPER 69-904] 21 p3806 A69-39336

Equations of motion of unguided rocket under wind effect, calculating launch angles for wind compensation 22 p4037 A69-40815

ROCKET FUEL TANKS

U PROPELLANT TANKS

ROCKET LAUNCHERS

Optical sighting method for determining orientation of rocket on launch pad by laser collimator, noting lining-up of Cassiopeia system 06 p0930 A69-17104

HORA, flexible upper rocket stage, noting variable fuel tank capacity and high energy propulsion 08 p1409 A69-20094

Belier rocket launching facilities in Guiana, describing pads, tracking system, telecommunications network, etc 09 p1477 A69-22161

Space vehicle launcher system reliability from trials and adopted corrections, basing formal computation on adoption of normalized form for reliability likelihood 20 p3618 A69-38278

ROCKET LAUNCHING

NT LUNAR LAUNCH

NT ORBITAL LAUNCHING

Europe 1 carrier rocket prelaunch wind load calculations as base for launch or delay decision 01 p0160 A69-10032

French space center in Guiana, discussing geographic location advantages for payload, rocket launching, space rendezvous, etc 02 p0228 A69-11920

Temporary launching sites for rocket probes, discussing CNES activity, Dragon and Titus programs and mobile launching units 02 p0228 A69-11921

Space vehicle checkout, launch control and data monitoring by general purpose ground system providing flexible stimuli generation, measurement acquisition, computation and information display 18 p3118 A69-35064

Rocket launch system cost role in space operations, discussing low cost expendable drop tank and Triamese reusable launch vehicle/spacecraft concepts 18 p3210 A69-35087

Successful launch probability analyzed as function of launch strategy from past countdown hold data 19 p3430 A69-36034

Trajectory optimization of second state of rocket launched into earth circular orbit in gravitational field by stepwise fuel control, using Pontryagin maximum principle 21 p3829 A69-39818

Equations of motion of unguided rocket under wind effect, calculating launch angles for wind compensation 22 p4037 A69-40815

Nonlinear model including rocket rotary and forward motion inside smoothbore launcher utilizing dynamic friction coefficient 22 p4037 A69-41038

ROCKET LININGS

Fiberglass reinforced plastics internal heat shielding for isopropyl nitrate rocket combustion chamber, considering lining resistance and safety during repeated firing/Ludion motor/ 17 p3019 A69-33343

ROCKET NOSE CONES

Nose cone ejecting system with pyrotechnic devices for two stage Centaur rockets/Sud-Aviation/ with RF mass spectrometer 10 p1635 A69-23034

Sounding rocket aerodynamic stability as function of nose length and mass, discussing wind tunnel test data 19 p3432 A69-36761

Dornier ASTRID attitude stabilization system design for spinning rocket nose cone with instrument payload, using first stage biaxial inertial platform and second stage star tracker 21 p3826 A69-39639

ROCKET NOZZLES

Precracked ceramic rocket nozzle throat inserts, discussing improved thermal displacement accommodation, load transmission, fracture tolerance, articulation capability, etc 02 p0334 A69-12369

Material requirements for uncooled nozzles of solid propellant rocket motors burning aluminumized propellants, discussing successful testing of pyrolytic graphite 06 p0946 A69-17530

Aerobell extendible nozzle rocket engine design and performance, cold flow and simulated hot flow test results [AIAA PAPER 69-4] 06 p0985 A69-18195

Hydraulic control valves for guidance of rockets by secondary liquid injection into nozzle skirt, discussing structure, single nozzle missile and mass gain 07 p1230 A69-19293

Passive temperature indicators for maximum temperatures attained within rocket nozzle ablative materials 15 p2613 A69-31273

Optimum nonequilibrium nozzle performance for hydrogen-fluorine propellant system, considering contour, engine/nozzle weights and recombination kinetics [AIAA PAPER 69-472] 16 p2733 A69-32652

Flow disturbances in supersonic rocket nozzles due to secondary injection analyzed by effective body approximation, including side forces [AIAA PAPER 69-443] 16 p2839 A69-32666

Free flow field from underexpanded rocket motor nozzle and impingement effects of pressure and heat transfer to flat plate [AIAA PAPER 69-568] 16 p2842 A69-32693

Metal oxide particle growth processes in rocket chambers and nozzles, using generalized kinetic-coagulation equation [AIAA PAPER 69-541] 16 p2844 A69-32724

Constant chamber pressure thrust throttling of expansion-deflection rocket nozzle, calculating wall static pressure and thrust by characteristics method, discussing performance [AIAA PAPER 69-435] 16 p2846 A69-32776

Ablative materials for solid rocket nozzles, discussing static firing tests, rating system, equipment design and cost reduction 19 p3357 A69-35537

Large booster nozzle reuse, discussing design, refurbishment, performance, costs and test evaluation [AIAA PAPER 68-657] 19 p3394 A69-35944

Rocket nozzle control by side forces produced by secondary gas stream injection observed for relationship with inclination angle to nozzle axis 20 p3457 A69-37065

Hydrogen and methane combustion to simulate expansion of storable propellants [AIAA PAPER 68-635] 20 p3631 A69-37188

Cement materials to attach thermocouple to stainless steel tubing in nuclear rocket engine nozzle, considering thermal conductivity, bond and tensile and compressive strengths 21 p3753 A69-39699

Computerized solid rocket motor nozzle design with computer program providing weight, envelope and performance values for vehicle optimization studies [AIAA PAPER 69-975] 22 p3999 A69-40355

Rarefaction onset along streamline from rocket nozzle with small Knudsen number at exit plane 23 p4152 A69-41920

Graphite rocket engine nozzles chemical erosion at various temperatures, comparing reaction and diffusion rates 23 p4180 A69-42156

Refractory metals in rocket propulsion devices, applying tungsten in uncooled rocket nozzles and tungsten and rhenium to electrothermal propulsion 23 p4177 A69-42161

ROCKET OXIDIZERS

NT FLOX

Treatment procedure and preventive programs outlined for acute exposure to toxic rocket fuels or oxidizers 02 p0204 A69-12498

Photochemical ignition of low pressure fuel-oxidizer mixtures applied to unsensitized stoichiometric mixtures of methane-oxygen and hydrogen-oxygen [WSCIPAPER 68-42] 06 p1034 A69-17791

Laser flowmeter for pulse flow of highly corrosive rocket fuels and oxidizers with measured rise times less than 10 msec 15 p2616 A69-31292

Advanced liquid fuels and oxidizers development from rocket propulsion reaction principle 16 p2828 A69-31747

Oxidizer injector face configuration for high power variable thrust rocket engine using hydrogen/oxygen propellant 16 p2835 A69-31749

Composite propellants high pressure burning stability with various binders and oxidizers, showing ammonium perchlorate oxidized formulations susceptibility to instability [AIAA PAPER 69-438] 16 p2834 A69-32704

Compositional and oxidizer particle size effects on combustion instability of plastic propellant based on ammonium perchlorate and polyisobutene [AIAA PAPER 69-478] 16 p2834 A69-32734

Powdered oxidizer and infusible polymer binder combustion at various pressures, studying gaseous phase temperature field by optical color analysis 17 p3069 A69-33135

Composite modified cast-double-base rocket propellants with large proportions of metallic fuel and oxidizer, discussing application rocket propulsion 17 p3017 A69-33349

Impurities effect on corrosion of fluorine containing propellant oxidizer systems, noting aqueous and anhydrous hydrogen fluoride corrosion 21 p3784 A69-39487

ROCKET PLANES

U X-15 AIRCRAFT

ROCKET PROPELLANT TANKS

U PROPELLANT TANKS

ROCKET PROPELLANTS

NT AEROZINE

NT CRYOGENIC ROCKET PROPELLANTS

NT DOUBLE BASE ROCKET PROPELLANTS

NT GASEOUS ROCKET PROPELLANTS

NT GELLED ROCKET PROPELLANTS

NT HYPERGOLIC ROCKET PROPELLANTS

NT LIQUID ROCKET PROPELLANTS

NT METAL PROPELLANTS

NT MONOPROPELLANTS

NT SOLID ROCKET PROPELLANTS

Treatment procedure and preventive programs outlined for acute exposure to toxic rocket fuels or oxidizers 02 p0204 A69-12498

Increased payload in orbit capability for future versions of Black Arrow vehicle, discussing propellant 02 p0335 A69-12681

Relative weight of fuel required for flight along prescribed flight trajectory 03 p0519 A69-12964

Integrated Waste Management/Rocket Propulsion System, using human feces as propellant component [SAE PAPER 680717] 03 p0495 A69-13442

Rocket propulsion with gaseous bipropellant systems and attitude control 08 p1376 A69-20870

Medical examinations of missile fuel handlers, noting some abnormal results in liver function tests and possible hydrazine toxicity 09 p1447 A69-22556

Book on rocket propellants covering propulsion fundamentals, liquid, solid and hybrid propellants properties, performance calculations, rocket technology, etc 10 p1752 A69-23806

Injected propellant behavior during one dimensional passage through rocket combustion gas chamber, considering Reynolds number and propellant characteristics 11 p1941 A69-24329

Combustion rates of condensed systems under positive and negative accelerations at atmospheric pressure 11 p2001 A69-25195

Mercury electron bombardment thrusters, discussing mission, design, ground tests, components and thrust vectoring 12 p2148 A69-26787

Photochemical attitude control rocket adaptable to self contained command signal or remote signal transmission, discussing light irradiation of propellant for thrust control 12 p2148 A69-26801

Lunar soil as building material and extraction of water, oxygen and rocket propellants from lunar materials for lunar colony needs 13 p2352 A69-27907

Rocket propellants, propellant chemistry and rocket propulsion system performance 13 p2324 A69-27916

Laser flowmeter for pulse flow of highly corrosive rocket fuels and oxidizers with measured rise times less than 10 msec 15 p2616 A69-31292

Propellant orientation and expulsion methods in space vehicle tankage, discussing ullage rockets system, bladders and diaphragms, dielectricphoretic expulsion, etc 16 p2736 A69-31734

Flight performance prediction for throttling bipropellant rocket engine utilizing ablative combustion chamber throat, discussing lunar module descent engine [AIAA PAPER 69-452] 16 p2841 A69-32690

- Aluminum capsule used in test reactor to irradiate explosive and propellant samples, determining radiation effects
17 p3004 A69-32945
- Vernier motor for Europa 1 rocket third stage, discussing component design, system performance and fuel composition
17 p3018 A69-33328
- Numerical integration of plane orbital transfers with multiple powered arcs, minimizing propellant expenditure of small thrust chemical rocket
19 p3400 A69-35673
- Rocket engines propellant feed systems dynamics analyzed by model using linear methods with distributed-parameter pipe representation
[ASME PAPER 69-FE-6] 20 p3586 A69-37987
- ### ROCKET PROPELLED SLEDS
- Hypersonic slipper bearing problem in rocket boosted sleds, discussing flow model consisting of laminar stagnation region and boundary layers
[AIAA PAPER 68-736] 09 p1477 A69-22003
- Multicomponent force transducer for measuring track generated forces acting on rocket sled, discussing combined load and vibration tests
[ASME PAPER 69-VIBR-21] 10 p1698 A69-24168
- Parachute deployment load control by use of line ties from rocket sled tests
11 p1823 A69-25386
- Rocket sled incorporating magnetic suspension system
15 p2585 A69-30361
- Lift and drag determination for moving rectangular coils over infinite plane sheet for magnetic suspension and guidance for rocket sleds
17 p2946 A69-33789
- ### ROCKET SONDES
- #### U SOUNDING ROCKETS
- ### ROCKET SOUNDING
- Sporadic E layer structure observed by rocket borne probes relation to ground based radio techniques, showing agreement between plasma and blanketing frequencies
01 p0070 A69-11161
- Nighttime sporadic E rocket measurements, discussing descending layer thickness and electron density and lower boundary
01 p0071 A69-11165
- Sporadic E structure and composition measured above White Sands by rocket-borne planar ion trap and two RF ion mass spectrometers
01 p0071 A69-11166
- LF continuous wave rocket propagation in D region presented in terms of electron density profiles
01 p0076 A69-11232
- Far IR rocket observations of night sky background radiation
01 p0121 A69-11249
- French radio astronomy, presenting sky background radiation and solar emission results from Rubis 02 and 04 rockets
02 p0316 A69-11908
- Middle ionosphere temperature diurnal variations analyzed on basis of rocket experiments and electron density asymmetry
02 p0246 A69-12768
- Ionospheric electron temperature probe analysis based on Japanese Kappa rocket data
05 p0761 A69-15701
- High resolution electron and proton energy measurements by sounding rockets indicating plasma sheet as source of energetic auroral electrons
05 p0756 A69-16273
- Simultaneous rocket measurements of D region temperatures and electron densities on anomalous winter day
05 p0758 A69-16411
- Lunar umbra interception by Titus rockets during solar eclipse, measuring UV and IR flux
06 p0986 A69-17101
- Rocket-borne Rayleigh scattering instrumentation to measure atmospheric density, discussing instrumentation and flight results
06 p0927 A69-17698
- Sporadic E layers compared with model of electron concentration profile, using rocket measured profile data for computing ionogram
06 p0922 A69-17750
- PCM telemetry system for sounding rocket payloads flown in polar light zone within German-American project AZUR
07 p1081 A69-19099
- Low latitude easterly wind measurements by optical tracking of chemicals from sounding rockets and gun probes during darkness
09 p1487 A69-21621
- Auroral electron flux from particle fluxes measured with shielded Geiger-Muller telescopes mounted in rocket launched into diffuse aurora
09 p1576 A69-21663
- Quadrupole mass filter for rocket-borne measurements of thermospheric helium content, discussing turbopause level and winter helium bulge
09 p1489 A69-21712
- Auroral French rocket probe in Norway, studying low energy particles, relations between electron showers and high altitude electric fields, etc
09 p1498 A69-22160
- Upper hybrid and modified plasma resonance on basis of rocket-borne gyroplasma probe data
10 p1726 A69-22807
- Venus and Jupiter low resolution UV spectra obtained with servocontrolled star tracking telescope in Aerobee rocket, noting Lyman alpha radiation characteristics
[JHU-TR-15] 10 p1788 A69-24121
- Radar backscatter and rocket profiles of ionospheric electron temperature, noting agreement in daytime flight measurements
11 p1951 A69-25162
- Air movement component of winter anomaly effect on radio wave absorption in mesosphere directly detected by rocket sounding
11 p1913 A69-25436
- Lower ionosphere electron densities measured during solar eclipse by Nike-Apache rockets
12 p2073 A69-26861
- Rocket observations of visible and UV dayglow, using electron density and temperature measurements for emission rates of various excitation mechanisms
12 p2076 A69-27108
- Collection of Soviet papers on U.S.S.R. outer space studies /1957-1967/ covering rocket and satellite sounding, meteorology, radiation belts, etc
13 p2335 A69-27346
- Soviet rocket and satellite studies of upper atmosphere and ionosphere
13 p2251 A69-27347
- Soviet meteorological and geophysical rockets, satellites and techniques in cloud studies and weather forecasting, noting Cosmos results
13 p2290 A69-27348
- Rocket spectrographic observations of Alpha Virginis noting hydrogen Lyman absorption lines
13 p2338 A69-27555
- Night sky background observation by near IR radiation flux, using rocket-borne telescope and ground based equipment
13 p2342 A69-27600
- Rocket grenade measurements of earth atmosphere, finding lowest temperature in Alaska
13 p2255 A69-28637
- Ionospheric electron and ion temperatures correlated with electron concentration profile as measured by rockets and satellites
14 p2510 A69-28942
- Rocket and satellites topside sounding of earth ionosphere, determining magnetoplasma structure and resonance
14 p2438 A69-29101
- Earth radar studies, relating echo behavior to rocket altitude and surface electrical characteristics
14 p2416 A69-29531
- Radio propagation in upper atmosphere and ionosphere noting rocket and satellite experiments including plasma physics research, tropospheric studies and space science services
14 p2526 A69-29854
- Solar corona observations on eclipse day by Aerobee rocket launched in New Mexico correlated to Siberian total eclipse photograph
15 p2696 A69-31099
- Photometric rocket measurements in hydrogen auroras, finding vertical H beta emission profile estimate of proton energy spectrum for H beta production cross section
15 p2598 A69-31307
- Diurnal variations of wind velocity, temperature and density at high altitude measured by Skylark rockets
15 p2598 A69-31319
- Diurnal change in equatorial electrojet parameters observed by magnetometers on Nike Apache rockets
15 p2598 A69-31320
- Wintertime short term density variability in upper atmosphere obtained from rocket measurements
15 p2601 A69-31374
- Rocket and satellite measurements of density, temperature and composition in lower thermosphere, considering altitude dependence
15 p2602 A69-31383
- Inflight shadowing device incorporated into dust particle collection devices borne in Aerobee rocket sampling noctilucent cloud display over Fort Churchill
15 p2602 A69-31386
- Rocket ejected vapor trails structure in lower thermosphere showing no evidence of atmospheric turbulence
15 p2602 A69-31393
- Rocket observations of ozone concentration above 50 km by absorption spectroscopy, noting altitude dependence
15 p2603 A69-31397
- Sporadic E layer nighttime electron density profiles obtained by Langmuir probe equipped sounding rockets
15 p2603 A69-31398
- Diurnal variations of atmospheric ion composition at 100-200 km from rocket experiments
15 p2603 A69-31401
- Ionospheric ion composition at 130-155 km during meteor shower Orionides activity from geophysical rocket-borne RF mass spectrometer data
15 p2603 A69-31406
- Ion-molecular reactions measurements in ionosphere by VV type device and RF mass spectrometer
15 p2603 A69-31407
- Nighttime, twilight and daytime rocket experiments for ion composition of polar ionosphere at 100-180 km
15 p2604 A69-31414
- Soviet meteorological rocket sounding data for upper atmosphere compared to CIRA 1965 model
15 p2650 A69-31421
- Simultaneous particle flux and VLF noise spectrum measurements by rocket sounding, discussing equipment, telemetry and calibration systems and experimental data
15 p2605 A69-31423
- VLF and particle rocket experiment for group delay time between rocket and ground, discussing wave polarization and energy flows meaning
15 p2571 A69-31424
- British rocket and satellite experiments in space research, considering neutral atmosphere, ionosphere and solar radiation, orbital analysis, etc
15 p2724 A69-31463
- Virgo XR-1 rocket observations, presenting count rate histograms, differential photon spectrum and X ray and M87 core radio spectra
15 p2701 A69-31535
- FM/FM telemetry system for high altitude rocket research, using independent subcarrier oscillator for each measurement transmitted with individual frequency modulation
16 p2750 A69-31853
- Data processing for scientific rocket research, considering pulse counters, multiplexers, converters and programmers
16 p2755 A69-31858
- Spectrometric rocket measurements of ion concentrations between 200 and 630 km
16 p2774 A69-31974
- LF ground based absorption results compared with rocket measured D region electron density profiles
16 p2778 A69-32188
- Night sky far IR observation by rocket-borne telescope, discussing minimum signal detection and origin
16 p2781 A69-32445
- Auroral electrons measurement by rocket, discussing difficulties due to secondary electrons and method permitting primary electrons detection threshold determination as function of rocket position
16 p2785 A69-32617
- Vertical atmospheric pressure distribution measured directly with Pirani-Israel gauge in Skylark rocket, transforming dynamic pressure data into static pressures on ground
17 p2971 A69-33037
- Rocket instrumentation for electron and proton spectra measurement in aurora borealis
17 p2972 A69-33038
- Tacite rocket probe to study space IR radiation, using passive stellar sensor for recording reference stars positions to recalibrate gyroscope kinetic motion for attitude restoration
[ONERA-TP-731] 17 p3001 A69-33220
- Vertical structure concepts for air density, wind and sound velocity profiles in rocket climatology, discussing vertical relationship of wind shear statistics
17 p3000 A69-33794

Noctilucent cloud layer spectral brightness and transparency in E region determined from transhorizon rocket observations

18 p3130 A69-35148

Quiet aurora atomic O red and green lines intensity ratio measured from rocket

18 p3201 A69-35192

Search for diffuse galactic light component between 2100-2800 Å by rocket measurements of night sky brightness, showing low albedo of interstellar dust

18 p3202 A69-35210

Franco-Soviet rocket probe launchings for measuring daytime/nighttime ions and neutrons

18 p3210 A69-35282

Rocket observations of ionospheric E layer winds using Na release method

20 p3529 A69-37796

Rocket probe devices based on thermometrical body principle for measuring upper atmosphere water vapor and atomic oxygen

20 p3543 A69-37798

Ambient atmospheric temperature and molecular nitrogen density measured simultaneously by rocket-borne electron beam luminescence method

20 p3543 A69-37799

Meteor winds analysis method used on tidal period wind measurement data obtained by chemical release from rocket in 95-135 km region

20 p3574 A69-38092

Rocket and satellite particle collection experiment to confirm reduced micrometeoroid flux near earth, noting inconclusive size frequency distributions of exposed flight samples

21 p3793 A69-38343

Noctilucent clouds formation relation to ice sublimation, discussing rocket soundings

21 p3701 A69-38345

Corpuscular radiation indicated as ionization source in lower ionosphere from rocket sounding data, noting role in D region formation

21 p3787 A69-38352

Rocket observation of ionospheric electron and positive ion densities and dayglow emission intensities in twilight conditions

21 p3702 A69-38355

Rocket observations of VLF ionospheric resonances, noting artificial stimulation of detectable amplitude noise with cut-off at low hybrid resonance frequency

21 p3671 A69-38356

Rocket photometer observations of midnight atomic oxygen glow at 6300 Å during ascending and descending flights

21 p3703 A69-38360

Auroral parameters coordinated measurements at varying rocket pitch angles during penetration of diffuse aurora breakup phase

21 p3703 A69-38361

Wind motion and turbulence in upper atmosphere from Rehbar 15 and 16 rocket observations

21 p3703 A69-38362

Rocket measurement • data of auroral particle precipitation classified in substorm phases of quiet and breakup period, breakup and postbreakup events and morning events

21 p3707 A69-38489

Rocket measurements indicating auroral electrons modulation near equatorial plane, noting intensity changes as function of rocket flight time and altitude

21 p3709 A69-38499

Ionospheric currents geophysical DC electric fields measurement from sounding rockets, indicating anticorrelation with auroral luminosity

21 p3710 A69-38508

Spectra and intensities of rocket releases for upper atmosphere composition, temperature and reaction kinetics, noting chemiluminescence and atomic and molecular emissions

21 p3712 A69-38522

Rocket optical experiment for determining water, methane, nitric oxide and ozone vertical profiles in stratosphere and mesosphere

22 p4035 A69-39910

Far IR nightglow emission from atomic oxygen observed by rocket-borne liquid He-cooled telescope

22 p3940 A69-40521

Low energy X ray flux existence in Cen X-2 observed by rocket flight

22 p4007 A69-40773

Sco X-1 X-ray source energy spectrum and time variation from rocket flights in India

22 p4030 A69-40774

Lower ionosphere vertical wind velocity profiles determined from rocket-released grenade glow cloud

photographs, developing cloud buoyancy effect empirical model

23 p4154 A69-41305

Midlatitude ionospheric electron density rocket data survey, including nighttime and daytime N/h profiles for specific solar activities

23 p4155 A69-41563

Rocket measurements of plasma densities and temperatures in visual aurora using electrostatic onboard and ejected Langmuir probes, observing hyperthermal electron

23 p4167 A69-42334

Polarimeter using 45 degree Bragg angle reflection applied to rocket payload design for determining polarization of celestial sources X rays

23 p4207 A69-42382

Equatorial stratosphere and mesosphere wind, temperature and density data from rocket and balloon sounding, noting seasonal variations and possible stratosphere-ionosphere coupling

23 p4159 A69-42423

H beta production in hydrogen aurora measured during rocket flight, obtaining proton energy spectrum

24 p4309 A69-43170

Soft cosmic X ray background flux from rocket observations on 21 September 1968 from White Sands, discussing flux origins

24 p4368 A69-43220

ROCKET TEST FACILITIES

White Sands Missile Range space and missile test facilities and support facilities for space exploration

02 p0227 A69-11761

Asynchronous on-line digital data acquisition system with immediate access to on-site numerical real time printout for rocket engine performance tests

[AIAA PAPER 69-323] 09 p1478 A69-22381

Rocket engine test facilities automation noting cost reduction and improved capabilities

10 p1671 A69-23258

Short duration tube wind tunnel supersonic testing, noting Saturn S-1C base heating and solid propellant rocket base burning tests

[AIAA PAPER 69-335] 13 p2242 A69-28271

Subcontractors documentation coordination system for Mississippi Test Facility, identifying end items for maintenance and spares provisioning

18 p3118 A69-35063

Test stand for measurement of forces and moments from thrust vector controlled rocket, analyzing dynamic characteristics of hydrostatic supports

21 p3691 A69-39631

ROCKET THRUST

NT RETROTHRUST

French solid propellant sounding rockets proposed launching from Guiana base using different fuel propulsion systems

03 p0518 A69-12851

Soviet book on gas dynamics of solid fuel rocket motors covering combustion chamber flow, nozzle and thrust characteristics, pressure relaxation and channel charge

04 p0647 A69-15493

NERO thrust power measurement, discussing electromagnetic and strain-gage test stands

08 p1301 A69-20156

Rocket engines transient thrust measurement by quartz transducers

08 p1301 A69-20589

Photochemical attitude control rocket adaptable to self contained command signal or remote signal transmission, discussing light irradiation of propellant for thrust control

12 p2148 A69-26801

Solid fuel rocket engine thrust and chamber pressure development curves from charge and engine geometry, heat of explosion and kinetic characteristics

16 p2836 A69-31994

Liquid propellant injector design for rocket thrust chambers, discussing mass and mixture ratio regulation

16 p2836 A69-31999

Agema propulsion system performance model for predicting propellant flow rate, mixture ratio, thrust time and specific impulse

[AIAA PAPER 69-453] 16 p2841 A69-32683

Constant chamber pressure thrust throttling of expansion-deflection rocket nozzle, calculating wall static pressure and thrust by characteristics method, discussing performance

[AIAA PAPER 69-435] 16 p2846 A69-32776

Small penetration aid rocket motors fabrication, discussing axial- and tangential-thrust integral assembly, impulse levels, delay line connection for igniters, production evolution, etc

[AIAA PAPER 69-520] 16 p2795 A69-32779

Aerothermodynamic problems during transition after activation of thrust inverter in solid propellant rocket engines

17 p3018 A69-33327

Thrust magnitude and direction modulation of hybrid propellant engine, noting applications

17 p3019 A69-33337

Kaufman ion thruster ESKA 18 operation principles and design compared to RIT 10 and SERT 2, discussing discharge and focusing characteristics and propulsion parameters

17 p3022 A69-33605

NERVA engine operational cycle and performance, discussing startup, thrust buildup and shutdown

[AIAA PAPER 69-515] 18 p3170 A69-34809

Numerical solution of equations of motion of rocket under thrust in inverse square force field, discussing effects of initial acceleration

20 p3595 A69-37203

Minimum fuel thrust limited transfer trajectories computation for coplanar elliptic orbits

[AIAA PAPER 69-914] 21 p3808 A69-39344

Longitudinal stability of unsteady motion of flight vehicle along ballistic trajectory, using linear differential equations

07 p1230 A69-19701

Rocket vehicle inertial attitude reference system, discussing flight control

09 p1609 A69-21618

Time optimal steering for rocket vehicle with trajectory defined between initial and final state, using minimum principle and boundary value problem solution

11 p1861 A69-25454

Ballistically effective atmospheric parameters for rocket vehicle design manuals involving application of climatological concepts of meteorology

12 p2175 A69-26874

Soviet book on rocket aerodynamics covering configurations, lifting, stabilizing and control surfaces, friction and heat transfer characteristics

17 p2889 A69-32829

Vibration analysis, using rigid body and normal modes to solve interconnection problem, applied to free-free natural vibration modes of clustered rockets

20 p3621 A69-37195

ROCKETRY

U ROCKETS

ROCKETS

Professional programs for aeronautics, rocketry and astronautics development

18 p3233 A69-34552

Rocket body elastic vibrations, liquid fuel supply oscillations and engine thrust vibrations effects on station stability

20 p3617 A69-37604

X Ray fluorescence of rock samples as applied to geological problems, noting standard deviations for element distribution

01 p0082 A69-10890

Lunar rock composition monitored by Luna 9 and 13 soft landed lunar probes
[UN PAPER 68-95769]

06 p1000 A69-17041

Griffith crack in brittle material, discussing validity for rock-like material with nonlinear stress-strain relationship

06 p1020 A69-17128

Complex index of refraction of naturally occurring rock and mineral as function of wavelength of incident radiation

17 p2973 A69-33093

Data on mass distribution of terrestrial fragmented rocks to interpret lunar rock samples, noting origin of asteroids and meteorites

20 p3613 A69-38250

Lunar surface, asteroids and meteorites properties by mass distributions of fragmented rocks

21 p3800 A69-38677

Amino acid components in paleozoic plant fossils and rock samples noting glycine, serine and glutamic acid

21 p3662 A69-39535

Physicomechanical properties of tuff rock based on similarity to lunar surface rock, determining natural density, porosity and compression strength

22 p4034 A69-41105

Lunar rocks types determination by mass spectrometry, describing results of terrestrial rocks tests

22 p4034 A69-41106

RODENTS

NT GROUND SQUIRRELS

NT GUINEA PIGS

NT HAMSTERS

NT MICE

NT POCKET MICE

NT RABBITS

NT RATS

Rodents exposure to neon enriched atmosphere for three weeks in sealed recycling system, discussing body weight pregnancies and litter

01 p0019 A69-11342

Computer analysis of cortical and subcortical activity in yellow bellied marmot during sleep, hibernation and hypothermia

10 p1643 A69-23122

Learned behavior performance failure in hypothermia as temperature dependent phenomenon using rat, guinea pig, chinchilla, mouse, gerbil and hamster

10 p1643 A69-23124

RBE of fast neutrons on mice, rats and guinea pigs, discussing suppression of mitosis in isolated cells

20 p3478 A69-37629

RODS

Finite deformation mode stability for finite amplitude first diameter nonlinear plastic wave initiation and growth at impact face in long rods

02 p0342 A69-12279

Rear gain control of dielectric rod antenna in airborne Doppler system with choke at feed point

04 p0576 A69-14770

Higher modes of longitudinal wave propagation in dispersive thin elastic rod, noting response to laser pulse

04 p0678 A69-14869

Stability of elastoplastic clamped free rod, noting compressive force for production of new equilibrium state and occurrence of transition to state

04 p0679 A69-14925

Elastic rod buckling under dynamic longitudinal compression load, determining critical load

04 p0679 A69-14926

Elastic rods shape for maximum stability defined by solution of variational problem, assuming noninfinite compressive stresses

05 p0832 A69-15688

Iteration method for determination of critical buckling load for straight rods

05 p0832 A69-15689

Buckling of rod with initial deflection as sinusoidal half wave, using Bubnov-Galerkin method and Laplace transform, calculating stresses of rod when subjected to nonsteady creep

06 p1021 A69-17182

Longitudinal and transverse vibrations of viscoelastic rods excited by inertia with aid of linear oscillator subjected to harmonic stress, using Kelvin-Voigt model

07 p1233 A69-19326

Thin rods and shells elastic analysis, using Cosserat continua for representing bodies in kinematics and balance and constitutive equations

07 p1234 A69-19382

Plane H polarized electromagnetic wave diffraction incident on array of rectangular rods described by linear algebraic equations

08 p1275 A69-20433

Long rectangular rods stability and vibrations under elastic deformations using bending theory

10 p1802 A69-24024

Slender elastic rod stability under spatial finite deflection, analyzing critical load by using Kirchhoff analogy and gyroscope motion

11 p1970 A69-24609

Temperature field in thin walled rods with spiral coil cross section in solar radiation, considering radiant heat exchange

11 p1999 A69-24779

Rod load capacity changes due to random overloads constituting upper limit of stress probability distribution density function used in programmed fatigue tests

11 p1985 A69-25180

Unsteady heat conduction of semiinfinite thin rod with mobile end face, ideally insulated lateral surface and convective heat transfer on uninsulated portion

11 p2002 A69-25229

Rectangular aluminum alloy rods carrying capacity under compression loads applied eccentrically to rod ends

11 p1986 A69-25326

Longitudinal and transverse frequencies of cylindrical metallic rod with spherical tip for sliding motion with dry friction

12 p2102 A69-26290

Dynamic programming method applied to Cauchy problem of large deflections in compressed rods, using recurrent functional equations

14 p2533 A69-28988

External and internal energy dissipation coefficients in vibrating aerodynamic rod structures

14 p2537 A69-29748

Heat propagation in rod of two sections with different properties, formulating relevant boundary value problem, solving with Duhamel principle

15 p2718 A69-31066

Thermal conductivity of semiinfinite rod with insulated surface and constant internal heat source, considering finite heat propagation rate

15 p2719 A69-31181

Statistical calculation of three dimensional frames of thin walled rods, using method of initial parameters in matrix form

15 p2714 A69-31199

Elastic stability of warped rods, using small oscillations method for varying end conditions and torsional-moment vector behavior

17 p3057 A69-33196

Longitudinal oscillations of homogeneous elastic rod under nonconservative force at one end, deriving equations of motion and stability conditions

18 p3216 A69-34578

Rod buckling under impact load, discussing compression strain wave front propagation

18 p3217 A69-34580

Natural longitudinal oscillations of variable cross section straight rods, assessing errors due to use of finite difference schemes

18 p3217 A69-34581

Stressed state analysis in dynamic brittle breakdown wave front of compression waves propagating in brittle rod under longitudinal impact

18 p3217 A69-34592

Buckling behavior of idealized Shenley rod consisting of linearly reinforced elastoplastic materials under compression, formulating constraints for stability

19 p3446 A69-36846

Equivalent circuit technique for dispersion equation and coupling impedance of slow wave structures of ring-rod systems, noting retardation

23 p4139 A69-41944

Thin walled rods for girder and frame systems designed by matrix method, solving differential equations for tension, compression, bending and torsion

23 p4230 A69-42005

Permanent deformation of axial rod subjected to blast load predicted using partial differential equation in conjunction with stress-strain relationship

24 p4406 A69-43699

ROGALLO WINGS

U FLEXIBLE WINGS

U FOLDING STRUCTURES

ROLL

Blunt cone hypersonic roll damping derivative, using Mach number distribution and graphical integration

04 p0542 A69-14739

Ablation surface patterns and resulting roll torques and roll behavior of hypervelocity vehicles
[AIAA PAPER 69-180]

06 p1036 A69-18051

Ballistic reentry vehicle roll-pitch coupling, showing influence of nose asymmetries
[AIAA PAPER 69-101]

06 p1018 A69-18156

Laminar hypersonic roll damping derivatives for 10 degree half angle cone at zero angle of attack for environmental flow conditions of hypersonic wind tunnel

09 p1430 A69-21958

Angular velocity of aircraft rotation about longitudinal axis at arbitrary point of passive trajectory section, with assumptions on roll damping, momentum, etc

18 p3092 A69-34989

ROLL CONTROL

U LATERAL CONTROL

ROLL FORMING

Hysteresis properties of membrane structures with soldered or rolled edges noting superiority of added elastic element in clamped area

01 p0087 A69-10828

Ti alloy blanks production technology and quality control, noting rolling of sectional profiles

07 p1161 A69-18765

ROLLER BEARINGS

Soviet aircraft roller bearings design, operation, service life, defect testing, etc

04 p0606 A69-14936

Rolling elements for high temperatures, discussing solid film lubricants, unlubricated rolling contact and materials and surface treatment
[IME PAPER 2]

07 p1138 A69-18566

Life margin tests of oil lubricated oscillating caged needle roller bearings under service conditions duplicating helicopter rotor hinge pin locations
[ASME PAPER 68-LC-7]

15 p2622 A69-30609

Linear analysis of damped flexibly mounted rolling element bearings influence on dynamic rotor unbalance response, including optimum support characteristics
[ASME PAPER 69-LUBS-8]

18 p3212 A69-34382

Cage and roller slip in high speed roller bearings over steady radial loads by measurement and theory

20 p3547 A69-37066

ROLLING

Fabrication of Cu-W composites with discontinuous fibers based on sintering and rolling

03 p0444 A69-13349

Rolling direction tensile tests of alloy steel plate displaying various fracture configurations over distinct temperature ranges, noting stress state, void formation and anisotropy
[ASME PAPER 68-WA/MET-1]

14 p2464 A69-29440

ROLLING CONTACT BEARINGS

U ANTI-FRICTION BEARINGS

ROLLING CONTACT LOADS

Mechanical properties of free rolling contact surfaces subject to high loads, discussing effect of oil film separation and fatigue crack initiation

02 p0339 A69-11989

Microslip between concentrated contacts and design charts for maximum pressure, closing-in of contacting bodies and optimized shapes, giving computer programs

15 p2629 A69-30903

Elastohydrodynamic lubrication film thickness in finite elliptical contact determined by two dimensional Reynolds equation in inlet region, using finite difference approximation
[ASME PAPER 69-LUBS-17]

18 p3120 A69-34379

Ball bearing lubrication simulation by rolling disk apparatus, emphasizing surface slip and related thermal effects alterable by geometric expansion
[ASME PAPER 69-LUBS-16]

18 p3140 A69-34380

Stress field in elastic contact area vicinity of hollow sphere subjected to normal load through flat plate, noting contact life
[ASME PAPER 69-LUBS-5]

18 p3212 A69-34383

Elastohydrodynamic theory of spherical bodies in normal approach contact, discussing lubrication and elasticity equations
[ASME PAPER 69-LUBS-3]

18 p3213 A69-34384

ROLLING MOMENTS

Aerodynamics of bodies of revolution in nonplanar motion using nonlinear functional analysis of moments for motion about center of gravity
[AIAA PAPER 68-20] 04 p0542 A69-14714

Roll acceleration influence on angle of attack convergence and windward meridian rotation rate of rolling reentry vehicles
[AIAA PAPER 69-100] 06 p1018 A69-18089

Monograph on rapid rotations of aircraft with fixed controls, covering spin and roll movements differential equations 12 p2013 A69-26118

Aerodynamic pitch-roll coupling in spinning vehicles, showing unsteady components complicating data reduction 21 p3647 A69-39038

ROOM TEMPERATURE

Low noise room temperature satellite broadcast receiver for UHF, using room temperature parametric amplifiers 05 p0728 A69-15672

Room temperature lattice spacings of PdIn, PtIn and PtSn alloys including magnetic susceptibility 05 p0779 A69-15832

CdS single crystals excess conductivity observed at room temperature 08 p1374 A69-21083

Room temperature WC-Co compacts oxidation resistance in air noting increase with preliminary sintering temperature 13 p2275 A69-27345

Low viscosity/density RTV silicone rubber sealants obtained by using glass microballoon fillers 24 p4337 A69-43454

ROOMS

U CLEAN ROOMS

ROOT-MEAN-SQUARE ERRORS

Root-mean-square error determination in automatic control system by digital computer for realizing control function, investigating harmonic and random input effects 01 p0050 A69-10208

Optimal control of discrete and continuous stochastic linear dynamical systems, discussing algorithms for instantaneous weighted minimum mean square error performance 01 p0051 A69-10439

Rms approximation validity limits for satellite temperature variances by deriving equations for thin insulated plate in space 02 p0352 A69-12211

F 2 layer critical frequencies variation coefficients, analyzing variation and root-mean-square deviations in terms of geomagnetic latitude and Wolf number 03 p0422 A69-13514

Noise signal mean square value measurement in pulse noise conditions by using noise amplitude limiter with limitation threshold in receiver 05 p0719 A69-16086

Analog-hybrid computer configurations for average and rms values of signals with respect to time 06 p0891 A69-17220

Double stochastic approximation algorithm for minimizing mean square error in finite expansion of unknown probability distribution functions 06 p0947 A69-17361

Linear closed loop control system poorly damped response to deterministic inputs improved by stability constraint for minimization of mean squared error 06 p0905 A69-17950

Root mean square time delay error with respect to playback time and autocorrelation function of tape recorded sine wave for studying jitter spectra 07 p1132 A69-18827

Presampling filtering, discussing effects on rms interpolation error for sampled data systems 07 p1083 A69-19129

Synchronization errors effects on performance of compression-line demodulator, increasing mean-square error in measuring instantaneous frequency and locking probability 08 p1271 A69-19920

Discrete predicting filter optimal synthesis in terms of rms error by solving normal Gaussian equations 09 p1473 A69-21858

Pattern recognition as part of statistical communication theory, using Karhunen-Loeve expansion to minimize root-mean-square errors, showing application to handwritten numerals 09 p1461 A69-22292

Stochastic approximation procedure minimizing mean square error criterion for system identification, estimation and decomposition of mixtures 11 p1842 A69-24934

Rms error for reproduction of satellite signal transmitted through continuous Gaussian channel assessed by numerical calculation 13 p2219 A69-27697

Temperature vertical profiles rms deviations calculated from temperature measurements during unstable atmospheric stratification 13 p2293 A69-27847

Root-mean-square error determination in automatic control system by digital computer for realizing control function, investigating harmonic and random input effects 14 p2424 A69-28744

Dynamic process during rms deviation of nonlinear system from prescribed trajectory described by nonlinear differential equations 14 p2425 A69-28822

Chopper modulated IR detection system error analysis through minimizing mean square error of approximating output function 14 p2450 A69-29639

Restoration of photographic images by optical spatial filtering with least mean square error filter in presence of random additive noise 15 p2611 A69-31033

Pulse compression using Hermitian functions, noting minimal rms error requirement in real system 16 p2755 A69-32585

Energy dissipation influence on elastic elements random vibrations, obtaining relations between displacements rms value and random disturbance intensity 17 p3064 A69-33921

Parameter sensitivity analysis of discrete suboptimal filters from optimal rmse estimate of actual system performance measure 18 p3110 A69-34675

Paraboloidal reflector antennas rms phase error minimization, describing axis location and determination of focus and focal length of best fit paraboloid 19 p3283 A69-35933

Maximum rms error comparison of redundancy reduction techniques, emphasizing limiting slope technique and worst case interpolation error 19 p3273 A69-36264

Digital data transmission by pulse code modulation considered for minimum mean square error 19 p3274 A69-36282

Algorithm for determining multidimensional random process from canonical representation of current state, noting minimum rms prediction error 19 p3287 A69-36663

Least square or least mean square approximation methods in abstract pattern recognition, noting unknown probability density function 20 p3504 A69-38285

Random variable used as model for unknown parameter in linear system, describing orthonormal expansion for evaluating mean-integral-squared error 21 p3685 A69-38727

Parameter estimation using entropy of error as criterion function compared with mean square error analysis 21 p3757 A69-39664

Optimal explicit method for parameters estimation not restricted to linear Gaussian problem derived in canonical form [AIAA PAPER 69-947] 22 p3975 A69-40330

RMS surface error compensation in radome-housed Cassegrain parabolic antenna including weight analysis 23 p4150 A69-42137

Northern Hemisphere 500-mb height pattern series expansion, using optimal sets of orthonormal functions, obtaining rms error 24 p4346 A69-43157

ROOTS OF EQUATIONS

Constant thickness disk temperature field for inhomogeneous boundary conditions, considering roots of characteristic equations determination 04 p0685 A69-14498

Two dimensional elementary transformation for obtaining eigenvalues, considering programming aspects for computing characteristic roots of matrix 04 p0624 A69-14967

Asymptotic computation and graphical display of imaginary mu-zeros of combinations of cross product Bessel functions 05 p0836 A69-15874

Root sensitivity of linear feedback control systems calculated with signal flow graph and transforming circle 05 p0740 A69-16588

Control system analysis and synthesis by means of generalized root-locus method on digital computer 07 p1114 A69-18291

Root sensitivity of characteristic equation of linear automatic control system to system parameter changes applied to aircraft angular stabilization 10 p1666 A69-23610

Zero crossing statistics measurements for 1/f noise, noting statistically stationary character of probability density distributions of interval spacings between zero crossings 10 p1656 A69-23657

Higher root loci of polynomials for multivariable systems with coefficients polynomials of real parameter 12 p2048 A69-26073

Stabilization of nonlinear control systems steady motions for two pairs of imaginary roots 13 p2298 A69-27745

Root locus method for nonlinear systems analysis, determining existence, stability and parameters of periodic solutions 14 p2445 A69-28919

Motion stability in nonresonant case of four pairs of imaginary roots in characteristic equation 21 p3770 A69-38883

Trajectories of roots of two channel systems with antisymmetric cross couplings using geometrical and analytical methods, noting hodograph 21 p3686 A69-38886

Algebraic equations for determination of controller parameters, noting a priori fixed roots of characteristic equation 21 p3723 A69-38887

Critical case of stable motion for differential equations having two zero roots 21 p3771 A69-39108

RORSCHACH TESTS

Pilots body images determined by inkblot tests, considering effects of aircraft type, pilots experience, etc 23 p4112 A69-42364

ROSETTE SHAPES

Printed circuit board wiring technique for strain gage rosettes application in extensive airframe static tests 02 p0250 A69-12231

Poisson ratio determination with bonded electrical resistance strain rosettes 11 p1995 A69-25652

ROSHKO PREDICTION

Roshko correlation for estimating vortex shedding from circular cylinder in sheared flow with velocity in Strouhal and Reynolds numbers 20 p3515 A69-37228

ROSSBY REGIMES

Planetary Rossby waves vertical propagation through weak westerly wind wave guides, using adiabatic linear model 03 p0460 A69-13335

Asymptotic similarity in neutral barotropic planetary boundary layers, solving Ekman flow by singular perturbation methods 03 p0460 A69-13336

Planetary boundary layer response to time varying pressure gradient force 03 p0460 A69-13337

Planetary wave-zonal flow interaction interpretation in terms of potential vorticity eddy transport, deriving zonal wind change and temperature field 07 p1126 A69-19037

Linearized model for vertical propagation of Rossby waves through atmosphere with Newtonian cooling, discussing atmospheric wind effects 08 p1344 A69-19812

Horizontally flowing eddies or Rossby waves in solar convection zone and photosphere, giving mathematical models showing hydromagnetic dynamo effects inducing reversing magnetic fields 22 p4019 A69-40294

ROTARY DRIVES

U MECHANICAL DRIVES

ROTARY GYROSCOPES

NT FLUID ROTOR GYROSCOPES

Dynamic equations for offset unsymmetric gyroscope with obliquely placed rotor, using dual transformation matrices [ASME PAPER 68-WA/DE-5] 05 p0764 A69-16170

Critical speeds of multiple disk rotors with multiple supports, discussing continuous shaft sections including gyroscopic and transverse shear and rotary inertia effects [ASME PAPER 69-VIBR-51] 10 p1804 A69-24153

Steady state solutions of differential equations of motion for body with fixed point, considering Kharlamov cone for rotation of heavy gyrost

11 p1917 A69-24780

Dynamics of gyroscope having flexible axis under gravitational force and elastic coupling reactions, deriving motion equations, precessions angular velocities, etc

14 p2445 A69-28798

Magnetic suspension device replacing mechanical bearings of inertial guidance systems gyro rotors, evaluating device strength and stability

14 p2479 A69-29492

Rate gyro life and reliability, discussing gas bearings separating rotor from stator by thin gas film with conventional oil film characteristics

15 p2608 A69-30410

Vibrarotor gyroscope operated as rate gyro for simultaneously indicating two components of angular velocity by amplitude and phase of periodic output signal

18 p3139 A69-35299

Accuracy improvement of method of averages applied to equations of small motions and disturbances of two rotor gyrocompass on ship performing circular maneuvers

18 p3139 A69-35378

ROTARY STABILITY

NT GYROSCOPIC STABILITY

First approximation stability of single rotation of artificial earth satellite about center of mass in Newtonian gravitational force field

01 p0161 A69-10585

Whirl instability of externally pressurized gas journal bearing with peripheral feeding holes, discussing analytical natural frequency of shaft bearing systems

02 p0254 A69-12426

Motion and stability of solid body with cavity containing rotor and two incompressible nonmixing liquids with surface tension

03 p0418 A69-13814

Rotation deviation of rigid body around axis, discussing three point body measurement and applicability

04 p0599 A69-15017

Stability of high speed rotors with sliding bearings

04 p0607 A69-15163

Aeroelastic rotor and nonsteady rotor aerodynamics

05 p0695 A69-15549

Unstable regions prediction for reciprocal system governed by linear equations with periodic coefficients, noting application to rotating shaft and helicopter rotor

08 p1413 A69-20401

Rotation effect on homogeneous gravitating systems stability, noting lack of unity in approaches to cosmogony by various authors

09 p1589 A69-21372

Stability of high speed single mass rotor with internal friction on damped anisotropic supports, considering support stiffness

[ASME PAPER 69-VIBR-2]

10 p1805 A69-24160

Stability of uniform rotations of gyrost at fixed point in potential force field, considering Routh rule

11 p1918 A69-24786

Nonlinear theory for whirling of heavy string under constant axial tension, considering orbitally stable modes for eigenvalues of rotation

13 p2359 A69-27264

Herringbone grooved gas lubricated journal bearing stability, testing effects of geometries and clearances on onset speed for half frequency whirl

[ASME PAPER 68-LUBS-25]

13 p2266 A69-27271

Linearized theory for stability of self acting gas journal bearings with noncircular members and elements of flexibility and damping, noting three lobed rotor

[ASME PAPER 68-LUBS-45]

13 p2266 A69-27277

Asymptotic analysis for stability and vibration response of spherical squeeze-film hybrid bearing, obtaining perturbation solutions

[ASME PAPER 68-LUBS-37]

13 p2267 A69-27281

Secular instability of steadily rotating stars, analyzing meridional motions in radiation zones by linear perturbation theory

13 p2354 A69-28566

Autonomous canonical system with two degrees of freedom, determining equilibrium position stability in resonance case, calculating earth satellite rotational stability

14 p2482 A69-28813

First approximation stability of single rotation of artificial earth satellite about center of mass in Newtonian gravitational force field

15 p2702 A69-30755

Rotation effect on homogeneous gravitating systems stability, noting lack of unity in approaches to cosmogony by various authors

18 p3198 A69-34761

Conservation laws and Liapunov stability of free rotation of rigid body about principal axes derived from kinetic energy and angular momentum

19 p3397 A69-35612

Turbine rotors load dependent unstable motions, considering exciting forces origins, external and internal damping, etc

20 p3628 A69-37918

Stability conditions determination for spinning projectile based on ballistic equations, discussing role of Magnus effect

21 p3772 A69-39294

Solid body filled with ideal incompressible liquid, analyzing stability of permanent rotations

21 p3773 A69-39837

ROTARY WING AIRCRAFT

NT ALOUETTE HELICOPTERS

NT AUTOGYROS

NT BO-105 HELICOPTER

NT CH-34 HELICOPTER

NT CH-46 HELICOPTER

NT CH-47 HELICOPTER

NT OH-6 HELICOPTER

NT S-61 HELICOPTER

NT SA-330 HELICOPTER

NT SH-3 HELICOPTER

NT UH-1 HELICOPTER

NT XH-51 HELICOPTER

Vibrating rod automatic ice detection and control system for fixed and rotary wing aircraft

01 p0083 A69-11046

Heligyro type takeoff and landing maneuvers, discussing M 211 takeoff jet thrust, pressure ratio, tip speed, etc

04 p0547 A69-14816

Future development in rotorcraft, discussing autogyros, helicopters, tilt rotor and wing aircraft

05 p0702 A69-16392

Compound rotorcraft VTOL vehicle current programs

05 p0703 A69-16394

Remote terminal computer for rotary-wing vehicles design, discussing programming language, engineer-computer interface and applications

07 p1052 A69-18868

Small and full scale model tests for feasibility of retracted rotor aircraft for high speed flight

[AIAA PAPER 69-219]

07 p1055 A69-19550

TRAC variable diameter rotor design based on jackscrew mechanism applied to compound helicopter

[AIAA PAPER 69-221]

07 p1056 A69-19572

Rotor dynamics of stowed rotor aircraft, analyzing blade stiffness in wind tunnel

[AIAA PAPER 69-207]

07 p1057 A69-19578

High bypass ratio compound fan shaft engine design and performance for convertible rotor wing aircraft

[ASME PAPER 69-GT-51]

09 p1572 A69-22511

Rotary wing aircraft speed boundary widening without impairing low speed attributes, discussing structural design factors, airframe design and stability, etc

17 p2897 A69-33209

Rotary wing aircraft height-velocity testing, analyzing engine-out landing by combining flight tests with mathematical simulation model

[AHS PAPER 353]

17 p2900 A69-33524

Propulsion power plant arrangements for rotary wing aircraft with thrust producer for forward flight, considering convertible fan/shaft engine configurations

[AHS PAPER 333]

17 p3021 A69-33529

Instrumentation for rotorcraft aerodynamics, considering boundary layer measurements, hot-wire anemometer and schlieren system for rotors and propellers

[AHS PAPER 320]

17 p2895 A69-33539

Circulation control by blowing and application to stopped rotor aircraft, discussing data from model scale blade experiments

19 p3248 A69-36767

Aerodynamics of rotary wing and V/STOL aircraft - Conference, Buffalo, June 1969, Volume 3

23 p4057 A69-41369

ROTARY WINGS

NT LIFTING ROTORS

NT RIGID ROTORS

NT TILTING ROTORS

NT TIP DRIVEN ROTORS

Structural vibration problems of SA 330 helicopter from test flight data, discussing natural frequency displacement of blades and dynamic response improvement of structure

01 p0009 A69-10158

Elastomeric bearings for support of heavy loads and accommodation of oscillatory motions, considering molded type for helicopter tail rotor

01 p0085 A69-10406

Composite main rotor blade for Sud-Aviation SA-330 helicopter consisting of steel spar/epoxy-glass envelope

[SAE PAPER 680693]

03 p0366 A69-13444

Military rotor blade radar antennas for all-weather low level flight and fire control

04 p0559 A69-15197

Rotary wing handling qualities, discussing analytical tools, design and IFR capabilities for higher speed range

05 p0701 A69-15550

Solar sail structural design, discussing application as propulsion system for heliogyro interplanetary spacecraft

06 p1015 A69-17591

Self excited rotor blade oscillation at high subsonic Mach numbers during flight tests of Sikorsky NH-3A compound helicopter

07 p1053 A69-18870

Flexible rotor blade dynamic response to radially moving force, emphasizing helicopter rotor vibration characteristics associated with tip-vortex impingement

[AIAA PAPER 69-203]

07 p1054 A69-19546

Research and development programs for several advanced rotary wing VTOL concepts

[AIAA PAPER 69-199]

07 p1055 A69-19555

Sikorsky ABC/advancing blade concept/helicopter program, discussing advantages and small scale wind tunnel experiments

[AIAA PAPER 69-217]

07 p1055 A69-19558

Boundary layer discontinuity on helicopter rotor blade in hovering using flow visualization

[AIAA PAPER 69-197]

07 p1051 A69-19561

Computer programmed momentum theory for induced flow field of helicopter rotor in forward flight

[AIAA PAPER 69-224]

07 p1052 A69-19562

Helicopter rotor noise generation, propagation, reception and reduction, discussing design charts for rotational noise spectra as function of design and flight variables

[AIAA PAPER 69-195]

07 p1055 A69-19563

Compound rotary wing aircraft research, discussing XH-51A maneuverability program and UH-1 high Mach and high advance ratio program

[AIAA PAPER 69-218]

07 p1056 A69-19568

Helicopter rotor blades in metal sandwich bonding, discussing component parts assembly by adhesive films

[ASME PAPER 69-VIBR-2]

07 p1443 A69-19731

Engineering testing of aerodynamic efficiency of helicopter rotors during hovering with and without ground effect

08 p1254 A69-20169

Streamlined rotors calculation, interpreting compatibility conditions between streamlining and airscrew stresses

08 p1252 A69-20655

Gyrostatic moments effects on critical angular velocities of varying and constant cross section rigidly and elastically supported hinged rotors

09 p1567 A69-21384

Dynamic stall data for helicopter rotor blade analyses obtained by oscillatory tests in pitch and in vertical translation at full scale Reynolds number

11 p1819 A69-25374

Dynamic systems stability with periodically varying parameters analyzed by Hill type infinite determinant, exemplifying helicopter rotor aeroelastic stability in forward flight

11 p1990 A69-25510

Mathematical model with straight wake airfoil to determine aerodynamic forces on oscillating rotor blades in hovering flight

11 p1821 A69-25514

Vibration eigenfrequencies of helicopter blades, discussing equation integration problems

11 p1995 A69-25673

Helicopter rotors with rigid blades performance from viewpoint of controllability and load distribution

13 p2201 A69-27295

Analog computer simulation of helicopter dynamics after main and tail rotor blades partial loss, showing banking and controllability 14 p2393 A69-29744

Life margin tests of oil lubricated oscillating caged needle roller bearings under service conditions duplicating helicopter rotor hinge pin locations [ASME PAPER 68-LC-7] 15 p2622 A69-30609

Painted helicopter rotor blades ruled out as cause of flicker induced vertigo, reporting pilots psychophysiological responses to formation flying 17 p2913 A69-33175

Optimum adaptation of propulsion gas generators to power jet driven rotors with blown flap control, considering jet engine, fanjet and engine driven compressor 17 p3020 A69-33344

Critical review of paper on tail rotor structural design principles covering sizing, blade frequency and response and aeroelasticity [AHS PAPER 342A] 17 p3059 A69-33503

Aerodynamic aspects of tail rotor design and structural dynamics of stiff inplane configurations, discussing blade natural frequencies [AHS PAPER 342] 17 p3059 A69-33504

Fatigue test loading spectra calculation methods, discussing helicopter rotating and nonrotating components tests [AHS PAPER 373] 17 p2945 A69-33515

Maximum helicopter level flight speed loads spectrum shape and severity related to rotor component fatigue design strength [AHS PAPER 372] 17 p3059 A69-33516

Fatigue properties and test procedures for glass reinforced plastic rotor blades used in twin engine helicopter [AHS PAPER 370] 17 p3060 A69-33518

Main rotor bifilar absorber for vibration reduction during S-61 helicopter flight, describing shake and flight tests [AHS PAPER 354] 17 p2900 A69-33523

Helicopter power plant and drive and rotor systems influence on design, configuration, weight, payload and performance [AHS PAPER 334] 17 p2901 A69-33528

Helicopter rotors and static propellers theory based on Prandtl-Betz theorem, calculating ideal performance [AHS PAPER 326] 17 p2894 A69-33533

Three dimensional potential surface flow past rotor blade in hover, accounting for compressibility and blade element theory limitations [AHS PAPER 324] 17 p2895 A69-33537

Helicopter hovering performance prediction from wake analysis by iteration, discussing wake interference significance and blade number influence [AHS PAPER 321] 17 p2895 A69-33538

Far field helicopter rotor noise radiation, analyzing blade slap, rotation noise, vortex noise effects and loading harmonics utilizing computer program 18 p3090 A69-34322

Aerodynamic characteristics of elliptical airfoils with jet circulation control for VTOL rotors including dual jets and cyclic results [AIAA PAPER 69-741] 18 p3084 A69-34406

Aerodynamics of rotary wing and V/STOL aircraft - Conference, Buffalo, June 1969 18 p3087 A69-35216

Lifting line theory for hovering propellers deformed wakes based on continuous vortex sheet representation 18 p3087 A69-35217

Rotating static thrust propeller or hovering rotor flow field study by schlieren photography, considering vortex field, tip flow and shock wave formation 18 p3087 A69-35218

Rotor airfoils design for helicopter performance optimization, noting hovering figure of merit and blade profile characteristics relationship 18 p3087 A69-35220

Rotor static performance calculation with near wake interference effects on rotor inflow distribution, considering strip momentum theory 18 p3088 A69-35221

Distributive loading rotational theory for helicopter rotor noise generation, considering steady and fluctuating force radiation and impulsive blade slap 18 p3088 A69-35222

Vortex shedding effects on helicopter rotor noise with and without blade slap, noting far and near field noise 18 p3088 A69-35223

Helicopter rotors forward-flight noise characteristics determined by wind tunnel tests compared to rotor noise during flyover 18 p3119 A69-35225

Aerodynamics of rotary wing and V/STOL aircraft - Conference, Buffalo, June 1969, Volume 2, Wind tunnel testing, New concepts in rotor control 18 p3088 A69-35226

Flow field throughout wind tunnel containing rotor with sharply deflected blades, noting reversed flow effect in front of wake 18 p3119 A69-35228

Torsionally flexible blade controllable twist rotor with pitch horn and servoflap control, discussing optimum inputs, airloads and angles of attack contours 18 p3089 A69-35234

Helicopter rotor blade construction and developments, discussing mass balance, fatigue life, fail-safe characteristics, cost and weight ceiling and plastic materials 19 p3329 A69-36768

Aerodynamic performance tests of autorotative unpowered rotor entry vehicle model at various Mach numbers and angles of attack [AIAA PAPER 68-950] 20 p3458 A69-37155

Vortex lattice method correlation on rotor/wing configurations for aerodynamic characteristics, noting triangular and circular hub and blades 20 p3458 A69-37163

Helicopter rotor blades instabilities during starting and stopping cycles, predicting aerodynamic loads by wind tunnel tests, determining negative/positive angles of attack 20 p3463 A69-37804

Passive helicopter rotor isolation for alleviating rotor induced vibration, using dynamic antiresonant vibration isolator 20 p3463 A69-37807

Positive pitch-flap coupling for controlling helicopter rotor blade motion stability involving blade in-plane deflections 20 p3463 A69-37808

Dynamic stall effect on helicopter rotor blades airloading and blade pitching motion at high advance ratio 20 p3463 A69-37809

Helicopter main rotor noise from square tipped blades determined as function of tip speed, blade area and thrust 22 p3864 A69-40676

Rotor operating limits, loads, performance prediction and airfoil development in rotary wing aerodynamics research 23 p4057 A69-41371

Rotor aerodynamics research in terms of theoretical and experimental data comparison, rotor blade flow visualization and blade section camber 23 p4057 A69-41372

Aerodynamic research for rotary wing and V/STOL aircraft, suggesting analytical techniques with software packages designed around standard input/output formats 23 p4146 A69-41373

Helicopter rotors trailing vortices by flow visualization, comparing Euler and Runge-Kutta iterative solutions 23 p4150 A69-41376

High speed compound helicopter rotor loads flight test program, discussing measured parametric effects [AIAA PAPER 68-980] 24 p4250 A69-43712

Solid body motion about fixed point representable by two dimensional motion of two points on complex plane 01 p0116 A69-10356

Differential rotation of celestial body maintained in resonance state by locking photosphere oscillation onto rotational period 01 p0156 A69-11136

Equatorial geodesic motion of rotating source in gravitational field, using exact empty space solutions of Einstein equations 01 p0157 A69-11289

Numerical solution for ambipolar diffusion and kinetic decomposition of rotating body of complex chemical composition in ionized airstream 02 p0191 A69-12580

Kerr family of solutions of Einstein and Einstein-Maxwell equations for gravitational field of rotating body, noting global structure and causality 03 p0466 A69-13473

Stokes and Rayleigh layer formation during solid body rotation of semifinite fluid and infinite disk 03 p0417 A69-13797

Mathematical analysis for mechanism of spherical comet nucleus division as effect of nonuniform surface heating during rotation 04 p0659 A69-14997

Rotation deviation of rigid body around axis, discussing three point body measurement and applicability 04 p0599 A69-15017

Poincare sphere representation of polarized light used to predict rotation effect on optical observations in photoelastic shell analysis 04 p0683 A69-15495

Angle of attack effect on motion throughout entry of spinning descending vehicle, noting effects of transverse angular velocity and spin rate 04 p0666 A69-15522

Secondary steady flow /Taylor vortices/ between rotating cylinders, discussing development due to stability loss of Couette flow 05 p0745 A69-15780

Whirl dynamics of partially liquid filled spinning rotor mounted on elastic shaft, noting synchronous critical speed and asynchronous whirl speed [ASME PAPER 68-WA/APM-25] 05 p0768 A69-16189

Integrability of equations for problem of motion of heavy solid body about fixed point 05 p0794 A69-16206

Newtonian theory of rotating configurations, noting use of algebraic equations 05 p0826 A69-16427

Programming technique using quaternion parameters for error reduction in simulation of spinning rigid body 05 p0724 A69-16469

Differential equations of rotational motion of systems of rigid bodies in gravitational field derived with Lagrange equation 06 p0957 A69-17130

Soviet achievements in space research, comparing satellites with U.S. counterparts 06 p1005 A69-17561

Galactic rotation constant calculated from radial velocities of O, B and A stars in Cassiopeia constellation, using Fehrenbach objective prism 07 p1214 A69-18664

Numerical method for three dimensional boundary layer equations, applying perturbation technique and independence principle to rotating flat blade [AIAA PAPER 69-227] 07 p1051 A69-19560

Range-Doppler processing in pulsed radar applied to imaging of rigid rotating body with motion compensating resolution cells 08 p1270 A69-19861

Rotation effect on homogeneous gravitating systems stability, noting lack of unity in approaches to cosmogony by various authors 09 p1589 A69-21372

Euler rotational equations for bodies with variable inertia tensor subjected to extreme variations of mass distribution and mass loss 09 p1616 A69-21956

Increasing rotation of axisymmetric body about velocity vector ascribed to asymmetry in mass distribution, defining conditions for occurrence 09 p1431 A69-22077

Rotation and mass of Sb galaxy NGC 1832, giving central and mean densities 09 p1599 A69-22188

Small angle precessional motion of axisymmetric spin stabilized bodies subject to disturbing moments 10 p1724 A69-22932

Rigid body rotational simultaneous equations of motion transformed into explicit form for digital simulation 10 p1661 A69-23855

Balancing criteria for rotors of rotating machines, discussing acceptable residual specific unbalance, center of gravity displacement and machine vibration tolerance [ASME PAPER 69-VIBR-60] 10 p1804 A69-24149

Convection heat transfer and flow in rotating bodies, discussing laminar, turbulent and mixed flow in cones and disks, spheres and cylinders 11 p1998 A69-24459

Rotational dynamics equations in linearized matrix form applied to satellite librations in circular orbit and gyroscope motion

11 p1970 A69-24608

Kowalewski solution for motion of heavy body with fixed point, noting hodographs

11 p1917 A69-24776

Variational equations for rotation of heavy solid body with fixed point about horizontal axis, noting mass distribution

11 p1917 A69-24778

Steady state solutions of differential equations of motion for body with fixed point, considering Kharlamov cone for rotation of heavy gyrostat

11 p1917 A69-24780

Stability of uniform rotations of gyrostat with fixed point in potential force field, considering Routh rule

11 p1918 A69-24786

Deformation processes of geometrically nonlinear rotational membrane shells under internal pressure

11 p1980 A69-24821

Covariant equations of motion of body of variable mass in general relativity, considering Schwarzschild field, rotating mass field and Einstein static universe

11 p1965 A69-25744

Nonrelativistic theory of rotating configurations in terms of gravitational potential, center mass density and variable angular velocity

12 p2159 A69-26662

Spiral galaxies rotation curve fluctuations attributed to kinematic properties of galactic matter and gas components

12 p2170 A69-27062

Optimal stochastic controller synthesis theory applied to stabilizing and controlling orientation of rotating bodies in central gravitational fields

13 p2300 A69-28326

Periodic solutions for small nutation angle of quasi-linear autonomous system of equations of motion of heavy solid body moving around fixed point

14 p2445 A69-28896

Contact problem between elastic cylinder and rigid punch analyzed using integral equation, singularity isolation and series expansion

14 p2532 A69-28972

Nongravitational force dynamic effect and model for rotating cometary nucleus, including changes in orbital elements

14 p2524 A69-29713

Differential equations for elastic stress distribution in thin rotating shell with arbitrary profile, obtaining analytical dimensionless solutions for potential profiles

15 p2703 A69-30158

KB-18A rotary prism moving film panoramic aerial strike camera

15 p2614 A69-31281

Exact solution for motion of conducting solid of revolution rotating in infinite conducting viscous fluid, describing magnetic field

16 p2817 A69-31666

Gravitational and magnetic torque effect on rotational motion of triaxial rigid body in regressing orbit about oblate primary mass

16 p2861 A69-32240

Magnetic field effects on rotating cone compressible boundary layer at zero angle of attack, describing changes in drag coefficient, torque and velocity profiles [AIAA PAPER 69-721]

17 p2892 A69-33484

Rotary motion stability of axisymmetric solid body or gyroscope suspended on string and containing ellipsoidal cavity filled with liquid

18 p3135 A69-34558

Drift of two connected gyroscopes, discussing equations of motion assuming unperturbed rotation and weightlessness

18 p3135 A69-34561

Equations of motion of rapidly rotating spacecraft, considering deformations of long clastic booms

18 p3207 A69-34582

Rotation effect on homogeneous gravitating systems stability, noting lack of unity in approaches to cosmogony by various authors

18 p3198 A69-34761

Tank configurations allowing for sloshing in liquid fuel reaction control system in spinning satellite

18 p3219 A69-34796

Dynamic balance for rotating aerospace vehicles, discussing error in principal axis location between rotor on machine and free body in space [SAWE PAPER 740]

18 p3137 A69-34887

Secondary steady flow /Taylor vortices/ between rotating cylinders, discussing development due to stability loss of Couette flow

18 p3123 A69-35032

Quadratic approximation at matrix level of dynamic equations for rotating bodies applied to gravity gradient satellite exhibiting nonlinear resonances

18 p3174 A69-35298

Passive damper system for reducing precession in free symmetrical rotating space vehicle, noting linear torsional spring influence on precession decay

19 p3429 A69-35913

Lumped parameter simulation model, based on vector mechanics for flexible spinning bodies, to study spin stabilized spacecraft or turbine rotors

19 p3280 A69-35990

Rayleigh criteria extension for boundary layers of rotationally symmetrical bodies with curved meridian, utilizing orthogonal coordinate system

19 p3298 A69-36309

Self rotary motions of nearly conservative systems with one degree of freedom, deriving periodic solution of equation for phase trajectories

19 p3374 A69-36466

Thermoelastic deformation and mean rotation divergence formulas for elastic simply connected micropolar body

19 p3440 A69-36586

Nonlinear rotational viscoelastic membranes creep rupture and failure found dependent on function of accumulated energy and power dissipation during deformation

19 p3444 A69-36806

Optimal control of rotational and transversal motions of elastic flight vehicles, considering torsional and flexural deformations

21 p3760 A69-38890

Near resonant and nonresonant solutions of nonlinear equation describing rotating pendulum motion under periodic disturbance

21 p3771 A69-39004

Rodrigues formula derivation procedure and summation formula derivation for finite rotations of solid body, noting simplifications from kinematic considerations

21 p3772 A69-39183

Solid body filled with ideal incompressible liquid, analyzing stability of permanent rotations

21 p3773 A69-39837

Antenna reactance from sounding rocket in ionosphere, showing variations relationship to rocket spin period

22 p3934 A69-39964

Pulsar CP 0328 radiation mechanism, considering relativistic effects of rapid rotation

22 p4035 A69-41206

Increasing rotation of axisymmetric body about velocity vector ascribed to asymmetry in mass distribution, defining conditions for occurrence

23 p4060 A69-41968

Aerodynamic characteristics of moving and rotating bodies of revolution in free molecular rarefied gas flow, assuming Maxwellian thermal velocity distribution and diffuse specular interaction

24 p4243 A69-42583

Collective rotational motion separation from internal motion in system of n point masses based on wave mechanics, emphasizing three body problem

24 p4349 A69-42650

Finite deformation of circular elastic membrane spinning with constant angular velocity, solving nonlinear differential equations by Runge-Kutta method for three boundary conditions

24 p4404 A69-43651

Wave generation in infinite micropolar elastic solid, determining displacement and rotation fields and strain state

24 p4406 A69-43731

ROTATING CONES

U CONICAL BODIES

ROTATING CYLINDERS

Tangential velocity profile growth in laminar axial flow through concentric annulus with rotating inner cylinder, using Navier-Stokes equations for prediction

01 p0058 A69-10143

Inertia effect of flow between eccentric cylinders with rotating outer cylinder, calculating pressure and shearing distribution and force on inner cylinder

01 p0059 A69-10307

Rotating bodies stability conditions relative to radial disturbances found to be field strength dependence on internal mass at any point

02 p0317 A69-11978

Unsteady transient flow of viscous fluid in suddenly rotating open pot, taking into account effect of bottom in determination of velocity profile

03 p0414 A69-13019

Numerical solution of axisymmetric incompressible viscous fluid flows about rotating cylinder, Taylor vortex between cylinders and through labyrinth seal

03 p0419 A69-13990

Equations formulated for space vehicle reaction to rotating machinery and internal mass motion, evaluating dynamics of cylindrical space station rotating about major axis

05 p0827 A69-16476

Laminar constant pressure gradient flow of viscous incompressible conducting fluid through rotating straight circular pipe with perpendicular magnetic field

06 p0967 A69-17718

Wave motion onset and waveforms in rotating annulus with sinusoidally varying temperature differences

07 p1126 A69-19039

Viscous fluids rotational flow in cylindrically symmetrical vessels, circumventing Navier-Stokes equations of motion by Wedemeyer approximation

10 p1677 A69-22896

Hydromagnetic instability onset in dissipative flow of electrically conducting fluid between rotating permeable perfectly conducting cylinders, noting oscillatory axisymmetric critical modes

11 p1926 A69-24895

Viscous flow stability in rotating pipe, giving velocity components in cylindrical polar coordinates

11 p1871 A69-25125

Steady flow field for viscous incompressible fluid in rotating pipe with porous walls determined from Navier-Stokes equations

11 p1875 A69-25481

Surface equilibrium configurations and bifurcation points for rotating homogeneous right fluid cylinder confined by surface tension forces

14 p2428 A69-28816

Rotating bodies stability conditions relative to radial disturbances found to be field strength dependence on internal mass at any point

15 p2680 A69-30260

Turbulent viscous gas ingestion and fluid inertia analysis using stability of dynamic gas-liquid interface between rotating cylinders [ASLE FICFS PREPRINT 31]

15 p2621 A69-30496

Bending surface of shells under crosswise load analyzed by moire method, considering rotating cylindrical surfaces

15 p2713 A69-31056

Numerical approximation of Taylor vortices in viscous incompressible fluid flow between concentric rotating cylinders, using truncated eigenexpansions

15 p2593 A69-31518

Rotatory cylindrical shells supported at corners under symmetric load, determining deformation in arbitrary locations by moire method

15 p2715 A69-31546

Thermal stresses in rotating cylindrical interplanetary body heated by solar radiation

16 p2871 A69-31901

Rotating cylinder or vortex motion in shear flow with friction, noting drag and rotor force combined influence

17 p2950 A69-33151

Normal and negative Magnus force experienced by rotating cylinder in air flow, discussing wind tunnel tests, laminar and turbulent boundary layers separation, pressure distribution, etc

17 p2958 A69-34213

Viscous fluid secondary flow stability between coaxial rotating cylinders, using nonlinear differential equations derived from equations of motion

19 p3299 A69-36391

Rotating stratified fluid in thermally insulated cylinder, studying angular velocity abrupt change effects under stable temperature distribution

21 p3694 A69-38768

Kinetic beam instability development in homogeneous dust /gas/ cylinder rotating in hot invariable medium under arbitrary perturbations

22 p4032 A69-41017

Thermoelastic stresses in rotating cylinders and disks with radial temperature distribution, deriving plane deformation approximate solutions

23 p4227 A69-41707

Transition from axisymmetric to nonaxisymmetric flow in rotating annulus, using two layer quasigeostrophic model

24 p4345 A69-43150

Centrifugal forces effect on stability of inviscid liquid film over rotating cylinder away from stagnation region, noting film thickness stabilization effect

24 p4305 A69-43597

Vortex shedding from circular cylinders rotating normal to free stream velocity, studying roles of rotation rate and Reynolds number 24 p4248 A69-43601

ROTATING DISKS

Unsteady laminar boundary layer near thermally insulated rotating disk, establishing solutions describing motion 01 p0059 A69-10361

Rotating bodies stability conditions relative to radial disturbances found to be field strength dependence on internal mass at any point 02 p0317 A69-11978

Resisting forces produced by transverse vibration of rotating disks in viscous fluid 02 p0232 A69-12257

Ekman boundary layer problem of steady axisymmetric viscous incompressible flow between infinite coaxial rotating disk, studying laminar range of Taylor number R 05 p0744 A69-15665

Flow and heat transfer on nonNewtonian fluid about disk rotating with time dependent velocity, using Runge-Kutta-Gill technique for numerical integration 05 p0745 A69-15793

Displacement, distortions and unit stresses in rotating circular disk under plane strain 05 p0835 A69-15807

Injection or suction at disk surface, noting effects on heat and mass transfer in laminar flow about rotating disk 06 p1029 A69-17002

Step function factor for laminar heat transfer from rotating disk with surface temperature changing stepwise in uniform forced stream 06 p1029 A69-17003

Laminar source flow of viscous incompressible liquid between two parallel coaxial rotating porous disks 06 p0909 A69-17243

Air film cooling of rotating turbine disk, suggesting applicability to gas flows 06 p1034 A69-17814

Mechanical stability of pressed and forged Ti alloy gas turbine disks at high temperatures and rates of rotation 06 p1026 A69-18018

Motion of viscous incompressible fluid in interspace between rotating and parallel fixed permeable plane having supplementary fluid injection solved by Navier-Stokes equations 07 p1119 A69-18743

Rotary head units used in telemetry magnetic recorders, explaining concepts and advantages of rotary scanning 07 p1077 A69-18826

Satellite components of lines formed in stellar type differentially rotating disk 07 p1219 A69-19336

Quasi-plane stress in rotating disks of unconventional profile emphasizing conic shaped disk analysis in terms of hypergeometric series 07 p1235 A69-19444

Unsteady suction motion of viscous incompressible fluid under action of slowly rotating suction disk, noting fluid velocity variation 08 p1302 A69-19875

Von Karman flow changes due to unsteady heat transfer from rotating disks impulsively changing temperatures, particularly steady state and response time 08 p1422 A69-20996

Hydromagnetic steady forced flow against porous rotating disk, integrating equations of motion by Karman-Pohlhausen and series methods 08 p1370 A69-21005

Broadband sound field generated aerodynamically by relatively smooth disk rotating in own plane, noting turbulent boundary layer flow and surface roughness effect 09 p1539 A69-21718

Hollow turbine disks for provision of coolant to high performance aircraft gas turbine engines, fabricating disk in two axial halves 09 p1509 A69-22345

Stability of thin rotating disks of stars with respect to axisymmetric disturbances, noting overstabilities dependence on epicycles sizes 09 p1605 A69-22413

Rotating disk induced viscous conducting fluid motion in axial magnetic field 10 p1727 A69-23099

MHD flow and heat transfer between coaxial rotating disks under axial magnetic field, using powers expansion of Reynolds number 10 p1728 A69-23234

Transverse waves induced by disk oscillations about state of steady rotation in MHD, revealing circularly polarized waves with different phase velocities 10 p1728 A69-23239

Moving conducting media velocity measurement using Reynolds number and electrical conductivity values, based on magnetic field distortion 10 p1731 A69-23435

Infinitesimal bending oscillations and/or responses of thin rotating disks applied to thin disk galaxies, discussing Magellanic Cloud passage near galactic center 10 p1786 A69-24110

Similarity solution for flow of fluid-particle suspension over disk rotating at constant velocity, solving differential equations for flow velocity distributions 11 p1867 A69-24280

Gas turbine disk calculation and plastic flow theory, considering loading conditions and elastoplastic strains due to centrifugal forces and nonuniform heating 11 p1982 A69-24945

Torsional flow of incompressible anisotropic fluid between parallel circular plates rotating with constant angular velocity, showing resemblance to shear flow 12 p0262 A69-26277

Rotating central disk in galactic plane observed by radio telescope, assessing relation between expanding gas of disk and high velocity stream from center 12 p2163 A69-27018

MHD Stokes flow for rotating disk in parallel magnetic field, showing Lorentz force inhibiting effect on fluid motion 13 p2305 A69-27325

Instantaneous rotational impulse imparting steady motion of disk determined for coupled gyroscope 13 p2264 A69-28527

High speed rotating disks design and stress analysis [ASME PAPER 69-DE-1] 14 p2453 A69-28838

Rotating disk of nonuniform thickness, establishing optimum geometry for minimum tangential stress [ASME PAPER 69-DE-36] 14 p2454 A69-28841

Rotating bodies stability conditions relative to radial disturbances found to be field strength dependence on internal mass at any point 15 p2680 A69-30260

Uncoupled field equations for free large amplitude axisymmetric transverse vibrations of spinning membrane disks 15 p2704 A69-30303

Stagnation flow of viscous fluid against rotating magnetized disk, determining effects on magnetic and velocity fields, currents and shear stresses 15 p2659 A69-30674

Thermal stresses and displacements in isotropic inhomogeneous rotating circular disk with axle hole under steady temperature field 15 p2712 A69-31016

Convective heat transfer in centrifugal force field of cavity between two rotating disks in turbulent gas flow 16 p2837 A69-32139

Stress-strain state determination for axisymmetric shells applied to design of circular/annular plates and rotating disks 17 p3057 A69-33194

Turbulent boundary layer on disk rotating in free air, using circumferential and radial momentum integral equations and entrainment equation 17 p2957 A69-33601

Elastic stresses in rotating anisotropic disks with constant thickness, discussing solid, circular rigid shaft mounted and center drilled disks 17 p3067 A69-34138

Low Reynolds number solutions for incompressible viscous flows resulting from finite disk steady rotation 18 p3121 A69-34784

Secondary flows in confined viscous vortex for nuclear rockets, employing rotating disk in chamber end wall for recirculation 19 p3296 A69-35756

Turbine disks stress-strain state, using wire strain gauge to determine residual stresses, radial and tangential stresses as function of disks rpm 19 p3436 A69-35850

Computer program using system simulation and Monte Carlo techniques to assess turbojet engine compressor disk reliability, discussing maintenance policy and engine design effects 19 p3394 A69-36042

Transverse vibration and wave solutions for nonlinear equations governing transverse motions of spinning circular membrane disks 19 p3440 A69-36637

Dimensionless radial and transverse velocity profiles for unstably incompressible boundary layer on rotating disk in rotating fluid 19 p3300 A69-36720

Surface stresses in rotating asymmetric profiled disks and axial deflection effects computed theoretically and compared to measurements on photoelastic models 19 p3447 A69-36862

Radial and tangential stress analysis of rotating disk during steady state creep, using equations solved by finite difference method 22 p4043 A69-40458

Thermoelastic stresses in rotating cylinders and disks with radial temperature distribution, deriving plane deformation approximate solutions 23 p4227 A69-41707

Time dependent unsteady flow of incompressible and electrically conducting fluid between two infinite disks rotating in uniform axial magnetic field 23 p4153 A69-42410

MHD flow of incompressible viscous fluid between rotating electrical insulator disks 24 p4354 A69-42599

Forced flow against infinite rotating disk, showing von Karman similarity equations solution for axial flow at large distances toward disk 24 p4244 A69-42718

ROTATING ENVIRONMENTS

Antimotion sickness drugs tested in slow rotation room with controlled Coriolis accelerations, noting summation effect of dextroamphetamine sulfate and scopolamine hydrobromide 03 p0381 A69-14079

Rotational velocity estimates by observers during angular acceleration, noting vestibular function interpretation 04 p0554 A69-15332

Coriolis acceleration dosages applied in vestibulometric tests of male subjects inclined in rotating chair 05 p0710 A69-16521

Human vestibular and sensory reactions to rotation and rocking, Coriolis acceleration and vestibular reaction inhibition on ground test stand for effects of temporary weightlessness 07 p1062 A69-18586

Overt motion sickness prevention by incremental exposure to Coriolis accelerations 07 p1067 A69-19425

Long time physiological effects of rotating systems, surveying acceleration effects and rotation experiments on humans and rats 08 p1265 A69-21183

Upper atmosphere rotation perturbation effect on satellite orbit when scale height varies with height, showing inclination reduction 09 p1594 A69-21660

Coriolis acceleration in rotating environment, discussing origins and role in human existence in rotating space station 09 p1540 A69-21891

Motion sickness studied with slow rotation room having controlled Coriolis accelerations, discussing oculogyral illusion, nystagmus, dizziness and neuromuscular incoordination 12 p2019 A69-26547

Human vestibular reactions at various bodily rotation rates and planes, including counterrotation illusion and nystagmic reaction 12 p2020 A69-26564

Human nystagmic reaction variations due to simultaneous rotation of head and body, studying coriolis couple in horizontal semicircular canals 12 p2020 A69-26565

Coriolis effect in rotating spacecraft simulation, discussing optokinetic reflex responses as function of head turning angle with spin axis 14 p2409 A69-29300

Atmospheric heat exchange and circulation simulated by rotating containers, reproducing temperature field and dynamic structure above large area 14 p2478 A69-29840

Head movements controlled for rapid vestibular adaptation in slow rotation room /SRR/, preventing motion sickness 17 p2908 A69-33178

Coriolis acceleration dosages applied in vestibulometric tests of male subjects inclined in rotating chair 18 p3096 A69-34740

Visual and vestibular analysors interrelation in subjects receiving light pulses before and after rotation, noting role of cortical elements 20 p3470 A69-37249

Auditory analyser functional changes due to prolonged slow rotation 20 p3470 A69-37251

Vestibular functions of humans subjected to Coriolis acceleration via prolonged rotation at different angular velocity rates 20 p3472 A69-37260

Motion sickness prophylaxis for rabbits subjected to rotation, investigating effects of adrenalin, ephedrine, sympatholytin, piperoxane and pyridoxophene on nystagmus and respiration
20 p3472 A69-37265

Nystagmus reactions in rabbits subjected to rotating vestibular tests, noting decrease following previous adaptation to stimulus
20 p3473 A69-37267

Bonded strain gages for experimental stress analysis of high speed rotating machinery under high centrifugal loads
24 p4397 A69-42740

ROTATING FLUIDS

Turbulent heat and mass transfer in rotating incompressible fluid flow analyzed by kinetic energy and shear stress equations
01 p0060 A69-10402

Steady state circular motion of fluid with variable rheological characteristics between coaxial cylindrical surfaces, obtaining velocity distribution
01 p0061 A69-10733

Thermal convection in rotating fluid annulus, discussing suppression of frictional constraint on lateral boundary
03 p0460 A69-13339

Three dimensional sonic flow downstream from shock wave in nondissipative perfect fluid, introducing pseudorotating flow to obtain velocity field
03 p0362 A69-13363

Secularly stable figures of equilibrium of rotating heterogeneous fluids of planetary size, noting dependence on laws of inertia and gravitation
03 p0513 A69-13780

Second order difference scheme for calculation of plane or rotational compressible flow, investigating stationary flow as asymptotic limit of unsteady flow [ONERA-TP-652]
03 p0419 A69-14111

Stability of nondissipative stratified rotating flows with constant density to axisymmetric disturbances
04 p0588 A69-14740

Heated liquid mercury rotation rate and direction counter to rotating bunsen flame related to Venus cloud formations high velocities
04 p0664 A69-15466

Ekman boundary layer problem of steady axisymmetric viscous incompressible flow between infinite coaxial rotating disk, studying laminar range of Taylor number R
05 p0744 A69-15665

Two dimensional supersonic rotational flow around convex corner solved using coordinate system consisting of left running characteristics and streamlines
05 p0697 A69-15722

Liquid rise in partially filled circular cylinder with free surface accelerated from rest to constant angular velocity [ASME PAPER 68-FE-13]
05 p0747 A69-16065

Navier-Stokes equations for steady rotational motions of incompressible viscous fluid at small Reynolds numbers between rotational surfaces
07 p1119 A69-18748

Wave motion onset and waveforms in rotating annulus with sinusoidally varying temperature differences
07 p1126 A69-19039

Radial distribution of azimuthally averaged temperature and amplitude vorticity characteristics in rotating differentially heated fluid annulus determined by multiprobe technique
07 p1126 A69-19040

Stability of inviscid swirling flow with finite axial velocity components and nonvanishing radial density gradients, noting criterion for infinitesimal disturbances
08 p1305 A69-20851

Fluid flow induced by horizontally moving bodies in stratified and rotating fluids determined by matched asymptotic expansion theory
08 p1253 A69-20997

Magnetic field decay modes due to nonuniform rotation having angular velocity as increasing function of distance from axis in infinite circular conducting fluid cylinder
08 p1369 A69-20999

Decrease existence at approaching infinity solution of Sobolev linear partial differential equations describing rotating fluid small oscillations
09 p1481 A69-21899

Topology of solar magnetic field differential rotation, using hydromagnetic equations
09 p1606 A69-22425

Permanent flow of solenoidal vector line rotation in steady nondegenerate rotational flow having complex lamellar unit normal to streamline
10 p1727 A69-22862

Free periods of oscillation of incompressible rotating fluid bounded by rigid concentric spheres, using Longuet-Higgins solution of Laplace tidal equation
11 p1876 A69-25558

Buoyancy-driven system instability mechanism, showing Prandtl number increment effect and relation to Coriolis-driven instability of rotating fluids
11 p1876 A69-25559

Virtual power principles applied to solving force acting on fluid consisting of colloidal suspension of polarized particles in neutral vehicle
12 p2136 A69-26404

MHD Stokes flow for rotating disk in parallel magnetic field, showing Lorentz force inhibiting effect on fluid motion
13 p2305 A69-27325

Viscous heat conducting compressible fluid response to abrupt change in circular cylinder angular velocity at stable temperature distribution, considering Boussinesq approximation
13 p2245 A69-27378

Motion of slender axisymmetric bodies in rotating fluid, relating Long hypotheses to flow reversal and dipole distribution effects on lee waves
13 p2248 A69-28170

Stratified rotating fluid time dependent motion characterized by stability frequency ratio and Coriolis parameter within quasi-geostrophic approximation
13 p2248 A69-28171

Benard convective flow as function of Rayleigh and Taylor numbers in thin variable rotating silicone oil layer determined by flow photographs
13 p2377 A69-28172

Unique solution proven for laminar boundary layer equations of flow of revolution in unsteady state
13 p2248 A69-28195

Surface equilibrium configurations and bifurcation points for rotating homogeneous right fluid cylinder confined by surface tension forces
14 p2428 A69-28816

Kelvin-Helmholtz instability noting effects of oblique magnetic field and rotation, deriving dispersion relation
14 p2491 A69-29335

Two dimensional adiabatic transverse normal modes of inviscid compressible uniformly rotating fluid, discussing harmonic wave propagation in opposite directions and rotation effects
14 p2431 A69-29581

Liquid filled toroidal shaped rotating damping tube containing bubble, discussing parameters variation effect on spacecraft nutation
16 p2868 A69-32561

Conducting fluid and plasma rotation between concentric cylinders due to crossed fields, determining velocity distribution, induced magnetic field and kinetic energy [AIAA PAPER 69-726]
17 p3011 A69-33472

Vortex breakdown in rotating fluids associated with wave motion along axis of rotation, considering effects of nonzero wave amplitude [AIAA PAPER 69-645]
17 p2892 A69-33478

Fluid dynamic simulation of gas core nuclear rocket chamber for separating light and heavy gas via centrifugal force produced by MHD-driven rotational flow [AIAA PAPER 69-727]
17 p3004 A69-33483

Cyclonic vortices production by horizontal convergence in rotating water bowl as function of bottom surface inclination, modeling cyclogenesis in jet stream entropy field
17 p3000 A69-33760

Model calculations for movement of barotropic and initially symmetric vortices in rotating fluids with Coriolis parameter or fluid depth varying horizontally
17 p3000 A69-33761

Mean rotational velocity of finite width gaseous ring in close binary system from rotational velocity measured on spectrograms
17 p3044 A69-34180

Wave equations governing evolution of long nonlinear axially symmetric wave motion in inviscid rotating fluids
18 p3120 A69-34441

Conservation theorems for energy and mean circulation in inviscid rotating fluid, noting inertial wave spectrum continuity
18 p3121 A69-34550

Dimensionless radial and transverse velocity profiles for incompressible boundary layer on rotating disk in rotating fluid
19 p3300 A69-36720

Theory for describing rotating fluid planets external geometry in state of hydrostatic equilibrium, noting role of equipotential surfaces
20 p3594 A69-37077

Jupiter Great Red Spot in terms of homogeneous fluid rapid rotation, Rossby number, stagnant region, Taylor column and stratification
20 p3609 A69-38060

Viscous incompressible nonNewtonian fluids flow with treatment for steady rotational problems and oscillatory motion, considering primary and secondary motions
20 p3519 A69-38319

Rotating stratified fluid in thermally insulated cylinder, studying angular velocity abrupt change effects under stable temperature distribution
21 p3694 A69-38768

Interaction between boundary layer and external vortex flows and stability transitions of heated rotating fluid annulus
21 p3698 A69-39869

Motion of body with cavity completely filled with viscous fluid about center of mass in potential mass-force field, applying small parameter method
22 p3980 A69-40109

Kinetic beam instability development in homogeneous dust /gas/ cylinder rotating in hot invariable medium under arbitrary perturbations
22 p4032 A69-41017

Conducting fluid flow in spherical container in rotating magnetic field, calculating induced field velocity and inside and outside components
23 p4196 A69-41609

Decrease existence at approaching infinity solution of Sobolev linear partial differential equations describing rotating fluid small oscillations
23 p4152 A69-41975

Free vertical shear layers structure solutions singularities in rotating fluids, considering motion by rising or spinning axisymmetric body
23 p4153 A69-42356

Axial and angular momentum flux, flow force and circulation to determine strength and structure of narrow rotating axisymmetric vortex and swirling core flows
24 p4298 A69-42598

Static and dynamic characteristics of fluid pressure signal transmitter between members with relative rotary motion
24 p4256 A69-43300

ROTATING GENERATORS
U AC GENERATORS
U DYNAMOMETERS
U TURBOGENERATORS

ROTATING LIQUIDS

Unsteady slow rotational motion of viscoelastic liquid contained between two concentric spheres rotating with constant angular velocities
02 p0230 A69-11563

Flow pattern induced by oscillatory point source in rotating inviscid liquid
04 p0591 A69-15279

Whirl dynamics of partially liquid filled spinning rotor mounted on elastic shaft, noting synchronous critical speed and asynchronous whirl speed [ASME PAPER 68-WA/APM-25]
05 p0768 A69-16189

Whirling liquid hydrogen layer thermal and hydrodynamical conditions, noting application to cold neutrons source in high flux beam reactor
05 p0849 A69-16818

Rotating incompressible liquid drop held together by surface tension noting spheroidal and toroidal shapes, energies and case of surrounding denser medium
07 p1120 A69-19267

Stability of rotating liquid mass held together by surface tension
07 p1121 A69-19268

Bubble spiral path motion toward axis of rotation of liquid rotating at constant angular velocity
09 p1483 A69-22006

Differential rotation of incompressible inviscid fluid of infinite electrical conductivity in spherical shell, noting toroidal magnetic field for sun
22 p4027 A69-40658

Transition temperature depression in rotating liquid He based on increased inertial density of excitations
23 p4192 A69-42335

ROTATING MATTER

Rotational motion of system of particles related to existence of reference frame to eliminate coupling terms between internal and rotational motion
02 p0280 A69-11867

Universe rotation from observations of microwave background and using closed universe model
10 p1771 A69-22851

Galactic mass relativistic distribution calculated, considering spherically symmetric model differential rotation near sun 20 p3600 A69-37484

ROTATING MIRRORS

Solid state laser Q switched by rotating prism emitting giant pulse before two mirrors in parallel 03 p0440 A69-13365

Laser color TV projection-display system using moving mirrors and dual polarization scanner 07 p1137 A69-19740

Image motion trajectory in rotating angular mirror having converging reflections from two surfaces, using precession theory of gyroscopes 11 p1881 A69-24562

Rotating mirror streak cameras in quantitative measurements of extreme compressions by shock waves, analyzing spatial and temporal resolving power 12 p084 A69-26151

Rotating mirror turbine with air cushion floating shaft for use in streak and framing cameras, noting framing rate 12 p2085 A69-26156

Rotating mirror framing camera with continuous access at f/18 aperture, discussing image transfer system, frame rate and capacity, etc 12 p2085 A69-26157

Ultrahigh speed cinematographic materials, discussing mirror turbines, streak and synchronized framing cameras 12 p2090 A69-26197

Q switched ruby laser with rotating prism, considering single pulse operation by increasing switching rate 12 p2107 A69-26588

Rotating mirrors used for light signal Doppler frequency shifting 24 p4351 A69-43806

ROTATING PLASMAS

Plasma gravitational stability problem with Hall effect, noting relevance to astrophysical systems 03 p0478 A69-13803

Gravitational instability of rotating anisotropic plasma for longitudinal wave propagation mode, obtaining dispersion by using modified Chew-Goldberger-Low equation 05 p0827 A69-16596

Magnetic field generation in nonuniformly rotating plasma by current density from electron drift relative to positive ion gases due to viscous forces 06 p1009 A69-17966

Wave propagation and instabilities in rotating anisotropic collisionless plasma, analyzing plane and cylindrical perturbations 07 p1195 A69-19438

Plasma wave coupling in absence of magnetic field in revolving system containing dielectrics and circular waveguide 08 p1371 A69-21150

Rotating spoke in unstable pulsed MPD arc, noting rotation frequency and resemblance to plasma rotation [AIAA PAPER 69-234] 09 p1561 A69-21219

Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant [AIAA PAPER 69-232] 09 p1562 A69-21225

Electric current spoke in MPD operation, using segmented anode and image converter methods with argon and helium propellant gases 09 p1548 A69-21962

Ionization and current growth in discharge in rotating plasma device with mirror shaped magnetic field 09 p1552 A69-22042

Rotating plasma gravitational instability during discharge as function of centrifugal acceleration, noting Coriolis and Larmor effects 09 p1552 A69-22043

Rotating plasma behavior in magnetic mirror trap, using radial electric field 10 p1740 A69-23716

Electrostatic wave dispersion relation in uniformly rotating plasma cylinder used in interpreting Q machine experiments 11 p1924 A69-24300

Kink type instability of rotating linear theta pinch plasma, calculating perturbation behavior with bounce model 11 p1929 A69-25270

Magnetic field effects on rotational MHD flow in container, noting Taylor-Proudman theorem, Ekman layers and vertical Stewartson boundary layers 11 p1930 A69-25279

Finite ion Larmor radius effect on gravitational instability of two superposed fluids in uniform rotation, analyzing interchange perturbations and vortex sheet 12 p2062 A69-26461

Finite Larmor radius effects on gravitational instability of rotating anisotropic plasma for transverse wave propagation mode 13 p2346 A69-27704

Plasma rotation by Lorentz force in homopolar gas discharge device, considering centrifugal forces effect on flow pattern 13 p2315 A69-28556

Radiative effect on rotating gaseous magnetic mass stability in thermodynamic equilibrium, including small oscillations stability 14 p2522 A69-29596

Radial pressure distribution in steady state rotationally symmetrical plasma jet subjected to axial magnetic field, emphasizing mass entrainment effect [DGLR-69-024A] 23 p4202 A69-41924

ROTATING SHAFTS

NT SHAFTS [MACHINE ELEMENTS]

NT TURBOSHAFTS

Flexural vibration of unbalanced rotating shaft with nonlinear characteristic of elasticity and damping, using equations of motion 01 p0168 A69-10329

Whirl instability of externally pressurized gas journal bearing with peripheral feeding holes, discussing analytical natural frequency of shaft bearing systems 02 p0254 A69-12426

Critical speeds of multiple disk rotors with multiple supports, discussing continuous shaft sections including gyroscopic and transverse shear and rotary inertia effects [ASME PAPER 69-VIBR-51] 10 p1804 A69-24153

Rotor shaft mounted on number of bearings and carrying masses and inertia angular precession and critical speeds, considering gyroscopic moments, rotary inertia and shear deformation [ASME PAPER 69-VIBR-54] 10 p1805 A69-24154

Varying diameter anisotropic composite shafts torsion based on strain and stress functions 11 p1982 A69-24975

Critical rotation rates of homogeneous shaft with two bearings under tension, considering shaft mass, stretching force magnitude and console disk gyroscopic effect 13 p2269 A69-28323

High speed shafting design for helicopter power transmission systems, discussing shaft in OH-6A Cayuse light observation helicopter [ASME PAPER 69-DE-5] 14 p2453 A69-28837

Thomas fracture theory and compatibility conditions for fracture surface of elastic-plastic rotating hollow shaft, discussing plastic equilibrium 15 p2712 A69-31017

Bending vibratory motion instability of rotor on elastic shaft with uniform mass distribution along axis, using variational methods 16 p2875 A69-32249

Elastomer hardness criteria ensuring maximum life and performance of rotary shaft seals 16 p2794 A69-32432

Thin walled cantilevered fiberglass reinforced shafts damping characteristics dependence on natural vibration modes and fibers orientation 17 p3065 A69-33938

Rotating shafts impact damping efficiency increaseable by providing proper clearance to reduce shaft stress in critical resonance frequency region 17 p3066 A69-33946

Supported shafts natural vibration frequencies determination by averaging shaft parameters, noting suitability in HF ranges 18 p3147 A69-34546

Viscoelastic shaft stability rotating at harmonically variable angular velocity, considering internal and external damping 18 p3224 A69-35300

Keyway stresses in shafts under tension, bending and torsion, using frozen stress photoelastic technique 19 p3445 A69-36827

Rigid shaft dynamics in hinged and elastic bearings, eliminating inaccuracy by limiting analysis to forced vibration 23 p4171 A69-42483

Rotating wickless hollow shaft heat pipe utilizing centrifugal acceleration for return pumping of condensate and transferring high heat fluxes [ASME PAPER 69-HT-19] 24 p4413 A69-43550

ROTATING SPHERES

Schlieren method for studying rotating sphere heat transfer during natural convection 01 p0174 A69-10095

Unsteady slow rotational motion of viscoelastic liquid contained between two concentric spheres rotating with constant angular velocities 02 p0230 A69-11563

Rotating bodies stability conditions relative to radial disturbances found to be field strength dependence on internal mass at any point 02 p0317 A69-11978

Flow development around impulsively rotating dipole magnetized sphere in viscous incompressible conducting fluid, noting diffusing Alfvén waves and induced field 03 p0477 A69-13793

Differential rotation of sphere in viscous incompressible liquid, discussing pressure and skin friction drag between two hemispheres with different angular velocities 04 p0590 A69-15278

Steady rotation of insulating body of revolution in unbounded electrically conducting fluid permeated by applied axial magnetic field 07 p1190 A69-18814

Aerodynamic torque on spinning spherical satellite, noting applications to accommodation coefficient measurements and study of aerodynamic gas-surface interactions 09 p1611 A69-22087

Short memory elasticoviscous fluid motion in and around oscillating spherical shell 10 p1800 A69-23240

Thin liquid film equilibrium on rotating sphere, determining conditions for detachment as function of angular velocity 12 p2061 A69-25886

Time dependent magnetic field induced inside rotating spherical conductor by external sources applied to moon 14 p2518 A69-29121

Incompressible viscous fluid steady motion caused by rotating ellipsoid, determining drag moments for circular disk and sphere 14 p2432 A69-29627

Rotating bodies stability conditions relative to radial disturbances found to be field strength dependence on internal mass at any point 15 p2680 A69-30260

Stress distribution in isotropic spherical shell rotating uniformly about diametral axis, deriving equilibrium equations 15 p2712 A69-31005

Upper limit of solar oblateness determined from secular stability of differential rotation during evolution 18 p3202 A69-35214

Angular velocity torsional oscillations of solid sphere under elastic force couple rotating in viscous liquid bounded by immobile concentric sphere 18 p3175 A69-35320

Conservation laws and Liapunov stability of free rotation of rigid body about principal axes derived from kinetic energy and angular momentum 19 p3397 A69-35612

Spherically rotating symmetric body gravitational collapse within Schwarzschild radius, presenting trapped surface concept for asymmetrical cases and generalization of space-time singularities 23 p4219 A69-42333

ROTATING STALLS

Two dimensional airfoil data application to three dimensional rotor blade element environment, predicting stall induced structural loads [AHS PAPER 322] 17 p2895 A69-33536

Dynamic stall characteristics of high speed symmetrical and cambered helicopter rotor blade airfoils from two dimensional wind tunnel determinations [AHS PAPER 206] 20 p3463 A69-37806

ROTATING VEHICLES

U VEHICLES

ROTATION

NT AUTOROTATION
NT EARTH ROTATION
NT MOLECULAR ROTATION
NT PLANETARY ROTATION
NT SATELLITE ROTATION
NT SOLAR ROTATION
NT STELLAR ROTATION

Absolute rotation in space measured with microwave rotation sensor using polarization of electromagnetic wave 04 p0573 A69-14342

Analytic solution for whirl in finite journal bearing with continuous lubricating film using Fedor approach [ASME PAPER 69-VIBR-55]

10 p1700 A69-24147

Rotary oscillatory solution of parameterized system with stable unexcited motion using successive approximations

14 p2482 A69-28812

Rotation curve, mass and M/L ratio of Sc galaxy NGC 6574, discussing nucleus and systemic velocity

15 p2691 A69-30764

Angular velocity of aircraft rotation about longitudinal axis at arbitrary point of passive trajectory section, with assumptions on roll damping, momentum, etc

18 p3092 A69-34989

Autonomous system steady motion with rotating phase and deviating argument solved by successive approximation over infinite time interval

18 p3175 A69-35323

Green functions for displacement and rotation fields of infinite homogeneous isotropic centrosymmetric micropolar elastic body subjected to time dependent mass forces and momenta

18 p3226 A69-35459

Human sleep during prolonged rotation, discussing electroencephalograms, acoustic signal frequency producing waking reaction, cutaneous galvanic reflex and depth of sleep

20 p3472 A69-37261

Rotation effect of secondary principal axes in scattered light photoelasticity by dual observation method, deriving light intensity

21 p3844 A69-39317

Low pressure arc discharge motion between concentric electrodes in transverse magnetic field, noting Lorentz, stationary and retrograde modes due to temperature nonequilibrium [AIAA PAPER 68-708]

24 p4359 A69-43644

ROTATIONAL FLOW

U FLUID FLOW

U VORTICES

ROTOR AERODYNAMICS

Aeroelastic rotor and nonsteady rotor aerodynamics

05 p0695 A69-15549

Vortex motion of separated flow from slender wings and rotor loading, discussing computer role in low speed aerodynamic research

05 p0696 A69-15562

Hingeless fiberglass rotary wings dynamics, discussing effects of in-plane bending to flapping frequency ratio [AIAA PAPER 69-204]

07 p1054 A69-19548

Helicopter rotor wake distorted geometry prediction by analytical method, noting experimental results for rotor in forward flight [AIAA PAPER 69-196]

07 p1051 A69-19553

Computer programmed momentum theory for induced flow field of helicopter rotor in forward flight [AIAA PAPER 69-224]

07 p1052 A69-19562

TRAC variable diameter rotor design based on jackscrew mechanism applied to compound helicopter [AIAA PAPER 69-221]

07 p1056 A69-19572

Rotor dynamics of stowed rotor aircraft, analyzing blade stiffness in wind tunnel [AIAA PAPER 69-207]

07 p1057 A69-19578

Streamlined rotors calculation, interpreting compatibility conditions between streamlining and airscrew stresses

08 p1252 A69-20655

Rotor downwash in ground effect in presence of step, using two dimensional analysis for flow field calculation [AIAA PAPER 69-225]

08 p1253 A69-21032

Foil bearings design, fabrication, applications to flexible material transport, rotor support, etc

15 p2618 A69-30327

Aerodynamic aspects of tail rotor design and structural dynamics of stiff inplane configurations, discussing blade natural frequencies [AHS PAPER 342]

17 p3059 A69-33504

Critique of paper on comparison of dynamically scaled model rotor test data with discrete azimuth aeroelastic stability theory [AHS PAPER 341A]

17 p3059 A69-33505

Dynamically scaled model rotor tested in wind tunnel to evaluate blade aeroelastic limits constructed with realistic mass and stiffness distributions [AHS PAPER 341]

17 p3059 A69-33506

Natural gyrofrequencies of rigid rotor during slowing/stopping at high forward speed, using simple approximation

17 p2899 A69-33507

Gyro controlled rigid rotor dynamic stability studied for stoppable rotor operation, developing analytical expressions for determining stability boundary of constant and rotor speed gyros [AHS PAPER 343]

17 p2899 A69-33508

Lifting rotors with thrust or tilting moment feedback control, deriving blade equations of motion [AHS PAPER 340]

17 p2899 A69-33510

Helicopter engine dynamic analysis, discussing modeling techniques, rotor responses and turbine speed control simulations and transition from mathematical models to hardware components [AHS PAPER 332]

17 p2946 A69-33531

Helicopter rotors and static propellers theory based on Prandtl-Betz theorem, calculating ideal performance [AHS PAPER 326]

17 p2894 A69-33533

Instrumentation for rotorcraft aerodynamics, considering boundary layer measurements, hot-wire anemometer and schlieren system for rotors and propellers [AHS PAPER 320]

17 p2895 A69-33539

Tail rotor aerodynamics, discussing ambient conditions, maximum thrust, precession effects, fin interference, noise reduction, etc [AHS PAPER 300]

17 p2895 A69-33549

Aerodynamics of rotary wing and V/STOL aircraft - Conference, Buffalo, June 1969

18 p3087 A69-35216

Lifting line theory for hovering propellers deformed wakes based on continuous vortex sheet representation

18 p3087 A69-35217

Aerodynamic behavior of airfoil oscillating in reverse flow defined for various angles of attack and oscillatory amplitudes at low Mach numbers

18 p3087 A69-35219

V/STOL model small scale tests compared with full scale tunnel or flight tests, considering normal differences in parameters and rotor instability

18 p3119 A69-35227

Flow field throughout wind tunnel containing rotor with sharply deflected blades, noting reversed flow effect in front of wake

18 p3119 A69-35228

Slot height, position and trailing edge geometry effects on elliptically shaped rotors selected for hover efficiency, size, transitional gust insensitivity and rigidity

18 p3088 A69-35231

Circulation controlled rotor aerodynamics with tangentially ejected air from surface slots of lifting body, noting performance at advance ratios and thrust coefficients

18 p3089 A69-35232

Torsionally flexible blade controllable twist rotor with pitch horn and servoflap control, discussing optimum inputs, airloads and angles of attack contours

18 p3089 A69-35234

Rotor operating limits, loads, performance prediction and airfoil development in rotary wing aerodynamics research

23 p4057 A69-41371

Rotor aerodynamics research in terms of theoretical and experimental data comparison, rotor blade flow visualization and blade section camber

23 p4057 A69-41372

ROTOR BLADES

Boundary layer discontinuity on helicopter rotor blade in hovering using flow visualization [AIAA PAPER 69-197]

07 p1051 A69-19561

Laminar boundary layer on rotating blades and yawed infinite wings, solving partial differential equations numerically by implicit finite difference scheme on computer

16 p2732 A69-31885

Dynamic stall characteristics of high speed symmetrical and cambered helicopter rotor blade airfoils from two dimensional wind tunnel determinations [AHS PAPER 206]

20 p3463 A69-37806

Natural convective heat transfer to gas turbine rotor blade and thermal resistance of cooling system using centrifugal pump

21 p3785 A69-39103

ROTOR BLADES (TURBOMACHINERY)

Steady three dimensional flow through impeller of turbines with small number of blades and with edge cut hub, noting inefficiency of flow without impact

01 p0142 A69-10309

Circumferential inhomogeneity of flow through impeller blades of axial flow compressor

03 p0361 A69-12954

Stress-strain distribution in rotor wheel with radial side blades, giving differential equations system for circular disk strains

09 p1612 A69-21494

Rotating twisted blades vibrations, deriving equations and vibration tests with models

09 p1618 A69-22236

Supersonic axial compressor boost stages for small gas turbine engines, using passage flow approach and passage criteria to design airfoils [ASME PAPER 69-GT-44]

09 p1570 A69-22478

Dry friction whip role in radial rubs dynamic stability in labyrinth seals and blade tips of turbomachinery [ASME PAPER 69-VIBR-56]

10 p1804 A69-24146

Rotatory inertia and shear deformation effects on natural frequency and bending mode shape in equations of motion of rotating turbomachine blade [ASME PAPER 69-VIBR-50]

10 p1804 A69-24148

Aerodynamic design of subsonic and transonic axial flow compressors, discussing blade configurations and computerized design of turbomachinery

12 p2147 A69-25792

American, French and Soviet medium weight helicopters tested in terms of main rotor blades construction, rotor performances and comparative power plant data

13 p2201 A69-27329

Aerodynamic losses and stage efficiency in partial admission turbines, using flat bladed rotor experiments and rotors of different blade pitch

15 p2547 A69-30290

Bladed disk assemblies vibrational properties, discussing dynamic characteristics of system with pairs of close natural frequency modes under forced vibration

15 p2704 A69-30304

Photothermoelastic analysis of thermal stresses in turbine wheels with welded blades, noting stress concentration reduction

15 p2715 A69-31488

Two dimensional model for analyzing turbulent separation and reattachment at blade trailing edge at supersonic speed [ONERA-TP-678]

16 p2733 A69-32258

Blade vibration damper consisting of springs attached to blade, analyzing resonance stresses on basis of dynamic rigidities

17 p3066 A69-33944

Critical speeds of high speed turbine rotors running in friction bearings determined by varying natural frequencies of rotor and supports

18 p3147 A69-34545

Natural oscillations frequency spectrum of turbomachine impeller blades subjected to random variations determined with frequency distribution function obtained by moments method

19 p3436 A69-35844

Tilt propotor composite aircraft design, discussing performance and mission potential [AHS PAPER 202]

20 p3463 A69-37805

Pyrometer for turbine rotor blades surface temperature measurement, considering purged, line-of-sight viewing tube and signal processing to reject C particles interference [SAE PAPER 690431]

23 p4165 A69-41649

Discrepancy between theoretical and experimental coefficients of friction losses on blades of centrifugal compressor impeller wheels, using lattice theory

23 p4058 A69-41727

ROTOR DISKS

U TURBINE WHEELS

ROTOR HUBS

U HUBS

U ROTORS

ROTOR LIFT

Sikorsky ABC/advancing blade concept/ helicopter program, discussing advantages and small scale wind tunnel experiments [AIAA PAPER 69-217]

07 p1055 A69-19558

NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed

14 p2393 A69-29702

Heavy lift helicopter design with 30 ton payload, considering fanjet drive hot cycle and shaft drive propulsion systems [AHS PAPER 330]

17 p2901 A69-33532

ROTOR SPEED

Whirl dynamics of partially liquid filled spinning rotor mounted on elastic shaft, noting synchronous critical speed and asynchronous whirl speed [ASME PAPER 68-WA/APM-25]

05 p0768 A69-16189

Axial torque effect on critical speeds of continuous rotor with motion described by partial differential equations [ASME PAPER 69-VIBR-52]

10 p1804 A69-24152

Critical speeds of multiple disk rotors with multiple supports, discussing continuous shaft sections including gyroscopic and transverse shear and rotary inertia effects [ASME PAPER 69-VIBR-51]

10 p1804 A69-24153

Rotor shaft mounted on number of bearings and carrying masses and inertia angular precession and critical speeds, considering gyroscopic moments, rotary inertia and shear deformation [ASME PAPER 69-VIBR-54]

10 p1805 A69-24154

Rotor angular velocity and flexural strain interdependence at critical velocity

11 p1987 A69-25390

Critical speeds of high speed turbine rotors running in friction bearings determined by varying natural frequencies of rotor and supports

18 p3147 A69-34545

High speed rotors with air lubricated foil bearings, studying motion in pressurized and self acting modes

22 p3955 A69-40405

ROTORCRAFT

NT ROTARY WINGS

NT TILTING ROTORS

NT TIP DRIVEN ROTORS

NT TURBINE WHEELS

Bursts of high speed rotor occurring at diametric cross section and around hub as function of hub size

01 p0142 A69-10306

Forced oscillations of unbalanced rotor on elastic bearings with nonlinear characteristics investigated for resultant forces and amplitude using motion equations

01 p0170 A69-10824

Amplitude-frequency characteristics of rotor mounted on hydrostatic bearings calculated by equations of dynamic compliance method

03 p0432 A69-12961

Blade to rotor heat transfer in turbines determined from temperature distribution of rod in medium with nonuniform temperature

06 p1034 A69-17870

Fracture mechanics for predicting crack propagation rate in rotor spars

07 p1053 A69-18872

Rotors linear vibrations due to unbalanced shaft rotating on lubricated bearings taking into account lubricant damping

07 p1235 A69-19441

Torsiograph systems analysis for rotors angular acceleration recording, discussing dynamic characteristics, system, environmental problems, etc

10 p1692 A69-23252

Stability of high speed single mass rotor with internal friction on damped anisotropic supports, considering support stiffness [ASME PAPER 69-VIBR-2]

10 p1805 A69-24160

Vector equation for correction masses for dynamic balancing of rotor supported on n points derived from bearing structure vibrations amplitude and phase

12 p2180 A69-26243

Dynamics of triaxial gyrostabilizer with additional rotor mounted on base, showing systematic drift

13 p2259 A69-27428

Gyroscopic motion with unbalanced rotor in run-down mode, integrating equations for small oscillations

13 p2259 A69-27429

Nonstatic gyroscopic nonlinear oscillations caused by swaying of synchronous gyromotor rotor

13 p2264 A69-28438

Oscillation amplitude of rotor with hydraulic dampers on elastic supports by expanding forced vibration modes with friction in natural modes

16 p2837 A69-32136

Bending vibratory motion instability of rotor on elastic shaft with uniform mass distribution along axis, using variational methods

16 p2875 A69-32249

Self excited vibrations of rotors supported in gas bearings from analyzing solutions to equations of rotor motion

16 p2875 A69-32250

Rotor hazards in rotational behavior of gravity stabilized satellites, describing gyrostact applications

17 p3048 A69-33233

Linear analysis of damped flexibly mounted rolling element bearings influence on dynamic rotor unbalance response, including optimum support characteristics [ASME PAPER 69-LUBS-8]

18 p3212 A69-34382

Mean drift rates of single and two rotor gyroscopic linear acceleration integrators mounted on irregularly rocking base

18 p3135 A69-34586

Attitude stabilization of symmetrical nonrotating earth satellite using earth-pointing rotor as gravitational anchor

19 p3429 A69-35914

Finite element method in stress analysis for axisymmetric rotors design, describing computer program and applications

19 p3445 A69-36826

Mathematical formulation and error analysis of two rotor gyroorbit used in plotting orbital system of satellite coordinates

21 p3765 A69-39636

High speed rotors with air lubricated foil bearings, studying motion in pressurized and self acting modes

22 p3955 A69-40405

ROUGHNESS

U SURFACE ROUGHNESS

ROUND TRIP TRAJECTORIES

NT CIRCUMLUNAR TRAJECTORIES

Optimum low thrust interplanetary transfers involving swingby trajectory past intermediate planet analyzed, assuming impulsive velocity change at planet

06 p1006 A69-17572

CircumJovian powered and free return trajectories, analyzing round trip missions and departure opportunity [AAS PAPER 68-117]

21 p3805 A69-39207

Reduced flight time interstellar round trip propulsion system with relativistic velocity capabilities, discussing vehicle with solar sail and magnetic course reversal [AAS PAPER 69-388]

24 p4363 A69-42829

ROUNDED LEADING EDGES

U LEADING EDGES

ROUTES

BAC Three-Eleven 220 seat airliner for short and middle distance routes, discussing operating costs, thrust and range

02 p0193 A69-12067

ROVER PROJECT

Control system utilizing digital and linear integrated circuits for low power testing of Pewee 1 reactor of Rover program [IEEE PAPER 2B-6]

07 p1179 A69-19188

Wideband acceleration instrumentation for Rover ground test facility liquid hydrogen turbopumps to study structural and flow induced vibrations

10 p1692 A69-23250

ROVINGS

Woven roving construction and fill/warp ratio effects on flexural strengths of four ply laminates

14 p2469 A69-29414

RUBBER

Displacement function selection in calculating rubber-metal valve design, considering boundary conditions of material deformation

01 p0087 A69-10829

Rubber modified thermoplastics structure and mechanical properties, emphasizing stress concentration around composite particles and crazing role in creep and fracture

10 p1716 A69-23985

Elastohydrodynamic lubrication of cylindrical rubber surface sliding over glass plate, using optical interference technique

23 p4171 A69-42531

RUBBER COATINGS

Small hovercraft simple and bag skirts design characteristics, considering materials

13 p2202 A69-27545

RUBIDIUM

Rubidium self oscillating magnetometer long term stability, noting changes affecting accuracy and sensitivity

02 p0250 A69-12394

Temperature dependence of isotope thermotransport in liquid K and Rb using steel capillary cells

03 p0533 A69-13970

Optical absorption of vacuum deposited thin rubidium films, noting similarity to sodium and potassium

03 p0491 A69-14114

Pumping light filtration conditions effect on transition frequency of rubidium atoms

04 p0611 A69-14779

Indium, Rb and Cs abundances obtained from sunspot spectra by comparison with Zr and Ti lines

13 p2343 A69-27626

Arcturus and solar rubidium abundance compared using Mount Wilson photographic spectrograms of Arcturus

14 p2522 A69-29589

Moldavites and Ries crater material, studying Rb-Sr isochronal relationship

23 p4154 A69-41341

RUBIDIUM COMPOUNDS

Parametric excitation of spin waves during parallel pumping of rubidium nickel fluoride ferrite, relating relaxation time and temperature

21 p3781 A69-39069

RUBIDIUM ISOTOPES

Rubidium, Sr and Sr isotopic composition of normal gray hypersthene chondrite falls, noting Rb/Sr and Sr87/Sr86 ratio determination of Bath Furnace L chondrite isochron

02 p0317 A69-12020

Rb 87 vapor laser short term frequency stability independent of vapor concentration, noting use as frequency standard

05 p0770 A69-15656

Rb 87 vapor laser short term frequency stability independent of vapor concentration, noting use as frequency standard

16 p2798 A69-32513

Rb 87 vapor laser output power dependence on magnetic field strength and resonator detuning, discussing laser and atomic transition frequency tuning

17 p2983 A69-33694

Rb 87 vapor laser pumping, output, spectral line width and emission frequency approximated in three level system

19 p3335 A69-36342

Rb 87 vapor laser output power and spectral line width dependence on optical pumping intensity and atom density in resonator

19 p3336 A69-36343

Light induced shift of Rb 87 vapor laser emission frequency during modulated optical pumping, discussing elimination by filter temperature and tuning

19 p3336 A69-36344

Frequency shift dependence in transition of Rb 87 atoms on pulsed pumping intensity, discussing continuous and pulsed indication and peak determination

19 p3336 A69-36345

Rb-Sr isotope patterns in tektites from Southeast Australian strewn field, studying Rb volatilization role in Rb-Sr isochron production

23 p4154 A69-41342

Rb-Sr isotopic determinations for Olivenga olivine-hypersthene chondrite, noting isotopic ratio vs age

24 p4385 A69-43214

RUBIDIUM 86

Gastric perfusion rate in restrained animals determined by Rb 86 clearance technique

17 p2908 A69-33170

RUBY

Electric effect in ruby, discussing resonance magnetic field and transition

03 p0485 A69-13320

Cross relaxation and spin-lattice relaxation probabilities determination in ruby crystal based on inversion coefficients

06 p0980 A69-17458

Ruby absorption, fluorescence and lasing properties, calculating polarization effect on relative intensities and forms of R1 and R2 bands in macroscopic theory

07 p1201 A69-19646

Relation between electron spin-spin interactions and polarization and relaxation of ruby nuclei at He temperatures

08 p1372 A69-20541

Chromium concentrations induced line shift in ruby single crystals spectra, determining principal lines position

10 p1744 A69-23321

Two photon absorption excitation of luminescence in ruby crystals by neodymium laser radiation, determining luminous intensity dependence on pumping intensity

15 p2634 A69-30731

Quantum mechanical microwave frequency doubling in ruby, discussing output power variation with orientation

17 p3015 A69-33024

Tau-luminescence in thin gamma-colored and uncolored ruby crystals containing Cr ions measured, discussing ions absorption spectrum changes

19 p3335 A69-36166

- Cross relaxation and spin-lattice relaxation probabilities determination in ruby crystal based on inversion coefficients
20 p3584 A69-37941
- RUBY LASERS**
- Ruby laser crystals optical inhomogeneity and residual mechanical stresses effects on laser beam angle of divergence
01 p0139 A69-10831
- Transmission of coherent ruby laser radiation through traveling wave amplifier noting spatial field structure changes
02 p0255 A69-11608
- Ruby laser limiting gain, stimulated emission loss, noise loss and spectral distribution determined by radiation intensity, pumping power and mirror reflection
02 p0256 A69-12000
- Pulsed ruby laser power supply incorporating facilities for variable output, automatic cutout for fully charged capacitors and automatic/manual triggering
02 p0256 A69-12095
- Ruby laser output energy degradation due to pump light absorption by color centers of ruby rod
02 p0256 A69-12358
- Ruby laser modifications for pulse transmission mode operation and cavity dumping, noting peak power output
02 p0257 A69-12410
- Mode locking and ultrashort pulses in giant pulses in giant pulse ruby laser with heated nitrobenzene or alpha-chloronaphthalene in resonator
02 p0259 A69-12655
- Giant pulse generation by Q switched water cooled CW ruby laser in narrow spectral range, discussing laser design and operation principles
03 p0435 A69-12982
- Ruby laser radiation nonlinear absorption coefficient measurement in CdS, ZnS and SiC semiconductor crystals, noting light limiting effects
03 p0436 A69-13038
- Ruby laser light beam self focusing in sodium chloride and potassium bromide crystals
03 p0438 A69-13051
- Ruby laser to study stimulated Mandelstam- Brillouin scattering in liquids and in various crystals in UV
03 p0438 A69-13053
- Nonlinear influence of resonator losses on stimulated emission of ruby laser, noting cut-off action
03 p0439 A69-13058
- Ruby laser emission spectral line narrowing due to lasing modes reduction
03 p0439 A69-13059
- Ruby laser boring and welding apparatus cooled by evaporated nitrogen gas, suitable for diamond boring
03 p0434 A69-13720
- Cavity arrangement to obtain pulse durations of 0.5-10 microseconds with ruby laser
03 p0441 A69-14142
- Frequency mixing of organic dye solution laser radiation with ruby laser radiation, showing broader UV spectrum
04 p0610 A69-14424
- Resonant interaction of radiation from liquid nitrogen cooled ruby laser with ruby crystal in temperature range 4.2-100 K
04 p0611 A69-14439
- Plasma refractive index determination by holographic interferometry with double pulse ruby laser
05 p0761 A69-15620
- High power single mode ruby laser, using multielement rods with plane-parallel end surfaces for generating longitudinal and transverse mode
05 p0770 A69-15700
- Self Q switching of ruby lasers at 77 K, noting saturable absorber giant pulse process obtained by shielding part of laser rod from pump
05 p0776 A69-16332
- Upper limit of nonradiative relaxation time between specific states of absorption bands and fluorescence state emitting R lines in ruby laser
05 p0777 A69-16335
- Pulsed ruby laser threshold and output energy for different relative orientations of rectangular prism and ruby crystal main crystallographic axis
05 p0777 A69-16526
- Ruby laser characteristics at 78 K, discussing emission threshold, optimum feedback, modes, etc
05 p0777 A69-16546
- Light pulse duration and other parameters for ruby and Nd-glass lasers operating in synchronized mode regime determined by Armstrong method
06 p0934 A69-17549
- Semiconductors reflectivity enhancement by irradiating with Q switched ruby laser output
06 p0935 A69-17768
- Temperature dependence of laser induced damage in plastic Q switch made of polyethylmethacrylate and vanadyl phthalocyanine for ruby laser
06 p0936 A69-17777
- Frequency doubling due to nonlinear response from Zeeman levels of ruby, discussing output and paramagnetic resonance
07 p1144 A69-18471
- Emission frequency stabilizing effect in concentric sapphire-coated ruby laser, noting frequency independence from temperature fluctuations and thermal stresses
07 p1147 A69-18543
- Fresnel pulse holograms of three dimensional diffuse objects by single mode ruby laser with or without Q switching
07 p1132 A69-18801
- Temperature profile and power density distribution in metastable level of ruby laser rod during pumping in air
07 p1150 A69-18937
- Saturable dye filters used with ruby lasers, discussing relaxation time, residual absorption source and transient spectral hole burning
07 p1155 A69-19089
- Ruby laser beam incident on steel surface in air or water measured for energies, determining reflected energy dependence on incident energy for self insulation effect
07 p1157 A69-19594
- Ruby absorption, fluorescence and lasing properties, calculating polarization effect on relative intensities and forms of R1 and R2 bands in macroscopic theory
07 p1201 A69-19646
- Reflection holograms with single mode pulsed ruby laser
08 p1313 A69-20164
- Q switched single mode ruby laser pulse passage through traveling wave amplifier decreases beam divergence
08 p1326 A69-20542
- Nonlinear optical effects in He-Ne and ruby lasers noting laser gain, frequency splitting, frequency differences in coupled lasers and frequency band narrowing
08 p1327 A69-20768
- Design of ruby laser for stability, lifetime, maintenance and safety requirements of commercial users, discussing power, pulse duration and beam divergence
08 p1327 A69-20881
- Luminous discharge at nonabsorbing surface when exposed to single pulse ruby laser beam, suggesting photoionization in surface layer
08 p1327 A69-21021
- Formation and characteristics of flash produced in air by single pulse of Q switched ruby laser, using holographic interferograms
08 p1317 A69-21022
- Laser rubies emission characteristics operating at different temperatures in common resonator, studying kinetics for pumping powers
08 p1327 A69-21076
- Atmospheric effects on laser beam attenuation, noting application to optical visibility measurement by ruby laser
08 p1327 A69-21089
- Optical parametric noise in water by ruby laser beam for phase matched four photon process
09 p1539 A69-21751
- Pulsed ruby laser of small output for hole drilling, studying correlation of vaporization, hole diameter and depth with laser output
09 p1504 A69-22247
- Ruby laser emission absorption in transparent dielectrics, noting crack formation and propagation producing opacity
09 p1520 A69-22655
- Nonlinear susceptibility tensor components and refractive index variations of liquids and glasses in high intensity ruby laser field, using interference methods
10 p1703 A69-23622
- Mode locked ruby laser for short duration pulse production, noting relation to reciprocal linewidth
10 p1705 A69-23813
- Spectral broadening measurements of ruby laser light scattered by density fluctuations in theta pinch plasma
11 p1924 A69-24304
- Output power losses in lasers with inhomogeneous active rods, deriving formulas for losses in ruby and Nd-glass laser rods
11 p1926 A69-24603
- Ruby laser unsteady modes with ruby filter, discussing conditions for pulsed, monopulse and steady mode transitions, with formulas for steady emission
11 p1894 A69-24619
- Ruby laser crystals optical inhomogeneity and residual mechanical stresses effects on laser beam angle of divergence
11 p1936 A69-24698
- Transmission of coherent ruby laser radiation through traveling wave amplifier noting spatial field structure changes
11 p1895 A69-24715
- Free emission spectrum analysis of ruby laser with external mirrors and elimination of axial mode discrimination
11 p1900 A69-25547
- Ruby laser performance with perturbing effect of standing wave field on homogeneity of deexcitation of level populations eliminated by HF modulation
11 p1900 A69-25569
- Population inversion in ground state sublevels of ruby laser, deriving required conditions
11 p1900 A69-25572
- Q switching of ruby lasers by natural chlorophyll a and derivatives pheophytin a and Cu chlorophyllin Na
11 p1900 A69-25581
- Nonuniform standing wave fields spatial distribution in active rod of ruby laser effects on laser radiation dynamic parameters, discussing radiation spectrum width
11 p1901 A69-25756
- Transverse mode dependence of spiking behavior for ruby laser pumped by pulsed argon ion laser
12 p2104 A69-25928
- Spectrum analysis of aluminum plasma excited by giant pulse ruby laser radiation, discussing temperature and density
12 p2134 A69-26027
- Q switched ruby laser stroboscope for high speed photography, using electro-optical crystals for Q switch
12 p2086 A69-26167
- Cine-holographic apparatus consisting of ruby laser and semitransparent mirror, noting capability of photographing within 10-100 nsec intervals
12 p2087 A69-26172
- Ruby crystal optical homogeneity and relation to main laser emission characteristics, discussing optical and structural surface properties [IEEE PAPER U-7]
12 p2106 A69-26322
- Q switched ruby laser with rotating prism, considering single pulse operation by increasing switching rate
12 p2107 A69-26588
- Heat removal from laser ruby rod by Cu prism connected to cooling system, discussing limiting factors in heat transfer area size
12 p2108 A69-26592
- Ultrasonic vibrations effect on emission of ruby laser with externally mounted mirrors
13 p2271 A69-27534
- Single frequency ruby laser emission spectrum coincidence with interacting laser radiation at instant of Q switching
13 p2272 A69-27911
- Single mode ruby laser for application to holography of ultrahigh speed three dimensional objects
13 p2262 A69-27980
- Power output of ruby laser stimulated by strong pinch discharge plasma flux at 4000-7000 A in He
13 p2273 A69-28530
- Composite ruby laser optical inhomogeneity effect on spectral, temporal and angular emission characteristics
14 p2458 A69-29163
- Ruby laser filled with single emission mode of oscillation using uniform pumping
14 p2458 A69-29164
- Ruby laser reflected and transmitted light intensity following radiation focusing on cuvette containing cyclohexane, noting dependence on incident pulse power
14 p2459 A69-29392
- Ruby laser lasing modes spectral time dependence attributed to population inversion inertia responsible for mode competition
15 p2633 A69-30725
- Lasing kinetics, emission spectrum and directivity of ruby laser with spatially homogeneous population inversion
15 p2634 A69-30729
- Inversion coefficient for two orientations of ruby crystal with respect to external magnetic field perpendicular and push-pull orientations
16 p2795 A69-31570

Ruby laser output energy degradation due to pump light absorption by color centers, discussing roles of defects and impurities in center formation
16 p2795 A69-31697

Fluorescence noise in Q switched ruby laser atmospheric backscattering experiments, noting relation to optical radar spurious and enhanced returns
16 p2777 A69-32183

Ruby and gas lasers operation principles, discussing spatial coherence, frequency stability, energy conservation and concentration, Q spooling, resonators, etc
16 p2797 A69-32377

Tunable far IR radiation generated from difference frequency between two Q switched ruby lasers using lithium niobate and quartz as mixing crystals
16 p2798 A69-32603

Self Q switching of pumped neodymium-doped YAG and ruby lasers obtained by static misalignment of mirror and pumped laser filament
17 p2979 A69-32916

Repetitively Q switched ruby laser applied to frequency conversion, stimulated Raman scattering and vacuum UV generation
17 p2980 A69-33027

Holographic recording of temporal coherence pattern of wave train from pulsed radiation source, investigating single mode ruby laser
17 p2973 A69-33114

Ruby laser stimulated emission spatial, temporal, energetic and spectral characteristics during disruption in spherical cavity containing strongly scattering medium
18 p3152 A69-35026

Ruby laser resonator losses resulting from changes in mirror transmittance or inclination, or introduction of bleachable absorbers
19 p3331 A69-35863

Ruby laser Q switching with electro-optical shutter based on Li metaniobate crystals by applying static, single pulse or periodic potential to Pockels cell
19 p3336 A69-36346

Pulse ruby lasers with mercury lamps for pumping noting improved efficiency, power and temperature regime due to reduced IR radiation
19 p3336 A69-36347

Flat wire grid calorimeter used as radiation sensor in measuring pulsed ruby laser
19 p3339 A69-36755

Wavelength-surface temperature relationship of ruby laser, discussing thermal control of emission wavelength
20 p3552 A69-36967

Second harmonic emission in KDP crystal using ruby rod as active material, discussing difficulties encountered by diffused reflector
20 p3552 A69-36970

Ruby laser-ultrahigh vacuum device for studying electron and ion emissions and light absorption of materials, noting influence of adsorbed gas layers
20 p3553 A69-37406

Stable mode generation in ruby laser with ability for modulation, using convex resonator and uniform illumination
20 p3553 A69-37607

Nitrogen gas breakdown threshold dependence on pressure during picosecond ruby laser pulse, discussing photoionization leading to breakdown in electromagnetic wave field
20 p3555 A69-38067

Ultrasonic vibrations effect on emission of ruby laser with externally mounted mirrors
20 p3556 A69-38201

Daylight sky spectral radiance in ruby laser spectral range as functions of scattering angle, height over horizon of observed point and sun altitude
21 p3734 A69-38397

Emission frequency stabilizing effect in concentric sapphire-coated ruby laser, noting frequency independence from temperature fluctuations and thermal stresses
21 p3735 A69-38695

Fresnel pulse holograms of three dimensional diffuse objects by single mode ruby laser with or without Q switching
21 p3724 A69-38946

Spectral characteristics of Q switched single frequency ruby laser with tunable emission frequency in giant pulse mode
21 p3737 A69-38991

Spectral, angular and temporal characteristics of traveling wave mode ruby laser emission, noting high transverse divergence effect on mode operation
21 p3741 A69-39554

Flash holography using ruby laser, describing optical system arrangement
21 p3727 A69-39784

Pulse ruby laser-smear camera ultrahigh speed multiple frame recording system, describing applications to transmitted and scattered light photoelasticity
22 p3944 A69-40076

Ruby laser resonator mirror mechanical vibrations effects on emission temporal behavior, spectral output and far field pattern, describing conditions for spiking
22 p3962 A69-40562

Mode locked ruby laser with picosecond pulses using rooftop prism cavity with helical flashtube for pumping
23 p4172 A69-41395

Monte Carlo method for energy transfer efficiency of ruby laser pumping cavities by helical flash lamps, noting dependence on ruby parameters
23 p4173 A69-41630

Blast wave energy determination of laser-induced gas breakdown in hydrogen, nitrogen, helium, argon and xenon in pressure chamber
24 p4299 A69-42651

Ruby laser crystal energy emission related to crystal rate of motion
24 p4327 A69-42652

High power ruby laser pulse generation by diffraction modulator, employing modulated ultrasonic traveling waves at minimum resonator transmission losses
24 p4328 A69-43163

Ruby laser second harmonic generation statistical characteristics with dielectric surface scatterer, showing variety of modes and high cross sectional stability
24 p4328 A69-43164

Light scattering from ruby laser beam passing through collisionless shock produced by H plasma compression measured by photomultiplier
24 p4360 A69-43748

RUMANIA

Photoelectric observations program at Astronomical Observatory of Bucharest to determine smallest moments of several eclipsing stars
15 p2696 A69-31224

RUMBLE INSTABILITY

U ACOUSTIC INSTABILITY

RUNGE-KUTTA METHOD

Nonlinear Volterra integral equation solved by Runge-Kutta method
05 p0787 A69-16456

Monograph on implicit Runge-Kutta formulas for numerical integration of first order differential equations
08 p1343 A69-20706

Order determination for single step Runge-Kutta methods for solving general system of differential equations
12 p2124 A69-26891

Numerical solution of nonlinear Volterra integral equation by Runge-Kutta-Felberg method
15 p2644 A69-30657

Runge-Kutta type method truncation error estimation, discussing validity conditions, evaluation processes and numerical tests
15 p2644 A69-30672

Pseudo Runge-Kutta methods stability in numerically integrating two point Cauchy problems
15 p2646 A69-31261

Cauchy problem solution for first order nonlinear Volterra integrodifferential equation, using Runge-Kutta method
20 p3569 A69-38294

Helicopter rotors trailing vortices by flow visualization, comparing Euler and Runge-Kutta iterative solutions
23 p4150 A69-41376

RUNNING

Telometered heart rate response to progressively increased distance swimming competition compared with equidistance running events for change patterns, magnitude and recovery
23 p4100 A69-41444

Alaska sled dogs cardiovascular performance and flow distribution during cross country runs
24 p4256 A69-42624

RUNUP

U ENGINE TESTS

RUNWAY CONDITIONS

All-weather landing factors for aircraft and pilots, describing instrument landing system, runway and visibility, pilot and crew procedures, etc
01 p0112 A69-10454

Drag and spray effects due to slush and water on runways during aircraft takeoffs
01 p0011 A69-11048

Runway roughness effects on aircraft, formulating relationship between weight and resonant frequency through simple harmonic motion analogy
01 p0057 A69-11274

Runway development for increased airport capability, discussing computer simulation model of airport operations
06 p0906 A69-17166

Instrument for measuring light transmission in atmosphere to determine runway visual range
07 p1132 A69-18673

Runways slipperiness and grooving, discussing influence of wetness, tire form and speed on friction coefficient
10 p1674 A69-23707

Variational statistics applied to hourly meteorological data for predicting airport runways icing conditions time and duration
12 p2127 A69-26900

Runway roughness induced vibrations in highly flexible aircraft, noting effect on pilot control of aircraft and airframe structure
14 p2392 A69-29504

Fog removal by high power carbon dioxide lasers, evaluating possibility of clearing airport runways [AIAA PAPER 69-670]
17 p2945 A69-33449

Jet aircraft runway friction due to mud and water noting relation to takeoff length
17 p2903 A69-34216

Runway grooving to improve aircraft tire traction in adverse weather tested by F-4D and Convair 990A under wet conditions [AIAA PAPER 69-773]
19 p3244 A69-35649

Problems caused by air traffic rate growth in London Terminal area, examining runway limits, safety and noise restrictions
19 p3371 A69-36736

Runway grade relation to jet aircraft takeoff length
19 p3296 A69-36874

Forces on aircraft during ground roll with slick runway surface and cross wind for deceleration and control on ground [SAE PAPER 690375]
23 p4062 A69-41652

Aircraft braking, discussing systems, brakes, tires, runway interface, heat sink materials, friction measurements, skid control, cooling and recovery equipment [SAE PAPER 690376]
23 p4063 A69-41671

RUNWAY LIGHTS

Approach light efficiency, discussing Calvert bar system and strobe flash on basis of pilot questionnaire polling
06 p0884 A69-18029

Sensory physiology of pilot landing guided by runway lighting, stressing visibility influence
19 p3260 A69-35987

RUNWAYS

Redevelopment program for Newark airport noting runway construction, underground fuel system and passenger terminal complex
01 p0057 A69-11275

Maintenance practices for rigid concrete pavement of runways including joint and crack sealing and patching, considering necessary surface preparation and equipment
01 p0057 A69-11277

Monograph on length requirements for takeoff and landing of jet transports covering airport classification, roll distance formulas and long range transport performance nomograms
08 p1301 A69-20717

Airport runway surface construction materials requirements, taking into account factors different from highway pavement
17 p2948 A69-34215

Air terminals plans for 1975 aircraft and air traffic based on runway configurations [AIAA PAPER 69-805]
19 p3288 A69-35591

Airport capacity increase in terms of operations delay, discussing computer aided approach systems and additional runways
22 p3925 A69-40429

Airport standards analysis for safe, efficient air carrier operations including airport funding, safety programs for runways and terminal facilities
22 p4054 A69-41144

Jet runway design, construction and operation, discussing surface texture, lightning, grooving, etc [SAE PAPER 690377] 23 p4147 A69-41670

RUPTURING

Bursts of high speed rotor occurring at diametric cross section and around hub as function of hub size 01 p0142 A69-10306

Plastic deformation and bursting pressure of thin rupture disk as related to tensile strength 06 p1020 A69-17129

Rupture times in analysis of creep tensile instability in uniformly pressurized thin walled membrane shells of revolution, comparing two criteria 07 p1234 A69-19378

Polymethyl methacrylate rupture time under stress determined from short and long time strength tests, noting relation to crack propagation time 09 p1528 A69-21853

Network rupture hypothesis and molecular structure considerations used in obtaining constitutive equations for flow of polymer melts and solutions [AIChE PAPER 42C] 10 p1800 A69-23369

Sinusoidal or random excitations equivalence from point of view of rupture risks, considering industrial applications 13 p2370 A69-28602

Unsteady oscillations after rupture in thin homogeneous isotropic elastic plate, assuming deflection amplitude smaller than thickness 16 p2873 A69-32033

Safety disk strength under static lateral pressure from rupture studies of thin circular plates under static and pulsating lateral pressure 19 p3434 A69-35773

Rigid thermoplastic cylindrical shell creep under axisymmetrical loads, giving computer algorithm and time dependent criterion for rupture strength 22 p4045 A69-40750

Deferred rupture as function of applied load noting test methods 24 p4407 A69-43801

RUTHENIUM

Absorption and emission spectra of ruthenium 2 complexes dissolved in rigid glasses, discussing crystal field theory and luminescence 07 p1200 A69-19219

Ligand field transitions in tertiary phosphine and arsine complexes of ruthenium and osmium 07 p1075 A69-19483

RUTILE

Compact high-gain chromium doped rutile traveling wave masers for Onsala radio telescope for galactic and extragalactic microwave emission studies 02 p0257 A69-12463

Friction and wear tests of synthetic rutile single crystals against diamond styli and spherical sliders of ruby, sapphire and hardened steel [ASLE PAPER 68-LC-3] 07 p1140 A69-19307

Elastic properties of hot pressed polycrystalline quartz and rutile as function of pressure, obtaining pressure coefficients of compressional and shear wave velocities 20 p3583 A69-37502

RYAN AIRCRAFT

U FIREBEE 2 TARGET DRONE AIRCRAFT

U XC-142 AIRCRAFT

RYAN MILITARY AIRCRAFT

U MILITARY AIRCRAFT

RYDBERG SERIES

Oscillator strengths of transitions in shock tube between nitric oxide Rydberg states in near IR 08 p1354 A69-20150

Lowest valence and Rydberg states assigned to ungerade singlet states in dipole allowed absorption spectrum of molecular nitrogen 09 p1542 A69-21916

Absorption spectrum of NO molecule, analyzing f complexes electron structure, ionization potential and quadrupole moment 22 p3984 A69-40477

S

S BAND

U SUPERHIGH FREQUENCIES

U ULTRAHIGH FREQUENCIES

S CURVES

Dust particle separation from inlet flow with S-bend duct to minimize engine dust ingestion, determining

particle trajectories [AHS PAPER 211] 01 p0006 A69-10409

Langmuir S curves for tungsten single crystals in presence of adsorbed cesium, discussing orientation, theoretical and experimental correlation and instrumentation 14 p2506 A69-29271

S GLASS

Prepreg based on S glass with HTS finish and B staged epoxy resin, discussing tensile strength and moisture exposure 09 p1530 A69-22327

S MATRIX THEORY

Test procedure for obtaining large signal S characterization of nonlinear power transistors 02 p0214 A69-11600

Scattering matrices of complex configuration specified by cross polarized radar cross sections based on Green function, noting wire loop and wedge scatterers 03 p0384 A69-12904

Radar cross section data interpretation, discussing calibration, unwanted signals, averaging, scattering matrix and power spectra 03 p0385 A69-12913

S matrix theory without restriction to asymptotic particle momentum measurements, introducing main nondynamical features 03 p0467 A69-13754

Equivalent generator approach to facilitate scattering matrix analysis of complicated microwave circuit 04 p0582 A69-14755

Transistor scattering matrix parameters determination, emphasizing directional coupler errors and impedance mismatches 04 p0582 A69-15067

General theorem of isotropic microwave waveguide junction ports imposed by reflection symmetry 06 p0893 A69-16935

Scattering matrix for internal diffraction in rectangular waveguide with transversely magnetized ferrite core 06 p0895 A69-17455

Transmission coefficient of double frequency regenerative parametric amplifier described by scattering matrices 06 p0895 A69-17456

Coupled and uncoupled terminals series connection for reactive multiport network determined by transforming scattering matrix columns into coordinate vectors 07 p1100 A69-18529

S matrix theory of electromagnetic interactions, obtaining equivalence of results with quantum electrodynamics by choice of subtraction constants 08 p1351 A69-20211

Degeneracy of hydrogenic states to sum S-matrix in Stark broadening calculations 09 p1543 A69-22405

Scattering matrix for pattern forming circuit for multiple beam antenna arrays with interacting elements, noting orthogonal pattern optimization 09 p1469 A69-22627

Computer program for analysis of linear microwave multiport circuit by means scattering matrix equivalent 11 p1858 A69-24572

Geometrical diffraction theory for bistatic scattering of plane wave by conducting frustum, calculating scattering matrix 11 p1837 A69-24999

Full wave calculation of gravity waves for thermospheric model, describing wave type reflection, transmission, conversion and coupling by scattering matrix elements 11 p1878 A69-25150

Error analysis in conversion of two port scattering parameters used in microwave transistor characterization 11 p1852 A69-25200

Output power and loss analysis of 2 n injection locked oscillators combined through magic tee hybrids 13 p2232 A69-28061

Transistors scatter matrix parameters determined, describing measuring bench calibration system 14 p2420 A69-29393

Orthonormalized partial radiation patterns for antenna array of N emitters developed by introducing scattering matrix 15 p2579 A69-30951

Numerical solution of boundary value problems, discussing spectral domain and scattering matrix formalisms 17 p2929 A69-33882

Small losses measurement in circulators and reciprocal quadrupoles, using scattering matrix to eliminate

mismatch errors 22 p3875 A69-40259

Numerical procedure obtaining scattering matrix of passive reciprocal two port from standing wave measurements, using image circle in Smith chart 24 p4281 A69-42617

S WAVES

Compressional and shear wave velocities vs porosity for sintered perlitic bricks 06 p1000 A69-17009

Fredholm equations from dual integral equations for studying penny shaped crack response to incident harmonic shear wave in elastic medium 07 p1233 A69-19175

Plane elastoplastic shock waves propagation due to combined shear loadings assuming elastic isotropic work hardening materials 13 p2368 A69-28346

Acoustic bulk-surface wave transducer for shear or longitudinal wave transformation in nonpiezoelectric material at HF 15 p2607 A69-30167

Stress corrosion cracks investigation by shear wave technique 16 p2876 A69-32334

Flaw determinations accuracy from measuring ultrasonic shear wave reflection peak intensities 24 p4397 A69-42756

S-N DIAGRAMS

Linear cumulative damage theory defining low cycle fatigue region of classic S-N curve, providing biaxial strain mode by centrifugally loading rotors [ASME PAPER 68-WA/MET-8] 05 p0838 A69-16151

Linear cumulative damage theory defining low cycle fatigue region of classic S-N curve, providing biaxial strain mode by centrifugally loading rotors [ASME PAPER 68-WA/MET-8] 14 p2535 A69-29438

S-N fatigue life small bondable resistance sensor, discussing random response data interpretation with emphasis on use of strain multipliers 15 p2613 A69-31270

Fatigue data adapted to conditions of specific design part including fatigue limits, S-N curves and various failure diagrams 16 p2794 A69-32433

Secondary fatigue curves slope variation to determine preloaded materials fatigue life under unstationary loading 17 p3052 A69-32976

S/N fatigue life gage response to constant frequency random amplitude input strain 20 p3537 A69-37007

Estimation of program fatigue life curves from equivalent load program using Miner law 21 p3846 A69-39810

Structural materials deformation response to loading conditions and stress or strain cycle analysis to predict failure, including creep and stress relaxation 24 p4398 A69-42771

S-58 HELICOPTER

U CH-34 HELICOPTER

S-61 HELICOPTER

Main rotor bifilar absorber for vibration reduction during S-61 helicopter flight, describing shake and flight tests [AHS PAPER 354] 17 p2900 A69-33523

S-64 HELICOPTER

U CH-54 HELICOPTER

SA-330 HELICOPTER

Structural vibration problems of SA 330 helicopter from test flight data, discussing natural frequency displacement of blades and dynamic response improvement of structure 01 p0009 A69-10158

Composite main rotor blade for Sud-Aviation SA-330 helicopter consisting of steel spar/epoxy-glass envelope [SAE PAPER 680693] 03 p0366 A69-13444

SAAB 37 AIRCRAFT

Electronic system checkout in SAAB 37 Viggen, using computer controlled test equipment 05 p0726 A69-16767

First flight test phase of multipurpose Viggen aircraft designed as basic platform for attack, trainer, reconnaissance and fighter versions 06 p0867 A69-17662

Microwave scanning beam landing guidance system for Swedish tactical aircraft Saab 37 Viggen, reviewing ground station and onboard equipment
16 p2735 A69-32057

Digital computer system for navigation, landing, fire control, monitoring and checkout aboard Saab 37 Viggen aircraft handling attack, reconnaissance and fighter missions
[AIAA PAPER 69-985] 22 p3908 A69-40365

SACCHARIDES

U CARBOHYDRATES

SADDLE POINTS [GAME THEORY]

Optimum control with respect to minimum fuel and power consumption involving constraints based on Kuhn-Tucker conditions and saddle point theorem
02 p0223 A69-11564

Uniform asymptotic expansion series for saddle point integrals applied to probability distribution in noise interference problems
03 p0398 A69-13832

Saddle point analysis of electromagnetic ground wave propagation in source excited field in waveguide formed by two parallel plate dielectrics
12 p2028 A69-25898

Existence theorem for Markov chain finite state stochastic games applied to saddle point and optimal strategy or epsilon-optimal strategy pairs
22 p3975 A69-41010

SAFETY

NT AIRCRAFT SAFETY

NT FLIGHT SAFETY

NT INDUSTRIAL SAFETY

NT REACTOR SAFETY

Aerothermal-structural reentry safety evaluation for SNAP-27 radioisotope Graphite Lunar Module Fuel Cask at orbital and superorbital velocities
[AIAA PAPER 68-1166] 03 p0465 A69-13561

Fault tree for hardware multiple failure safety analysis and reliability analysis for single failure analysis, illustrating comparative advantages
18 p3142 A69-34479

Aerothermal-structural reentry safety evaluation for SNAP-27 radioisotope Graphite Lunar Module Fuel Cask at orbital and superorbital velocities
[AIAA PAPER 68-1166] 22 p3979 A69-40551

Passenger safety during aircraft accidents in Arctic, discussing survival equipment and methods
23 p4107 A69-41811

Safety and failure of components - Conference, Brighton, England, September 1969
24 p4397 A69-42767

SAFETY DEVICES

NT ABORT APPARATUS

NT ARRESTING GEAR

NT EJECTION SEATS

NT ESCAPE CAPSULES

NT HELMETS

NT SEAT BELTS

NT SPACE SUITS

Astronaut safety considerations impact on design of Apollo Lunar Surface Experiments Package (ALSEP)
[SAE PAPER 680721] 03 p0433 A69-13448

Occupant restraint systems for automobiles, aircraft and manned space vehicles, discussing cost, practicability, ease of use, acceptability and possible improvements
03 p0380 A69-13459

Pilot warning indicators to equip all aircraft at low cost, discussing Doppler system
05 p0790 A69-16726

Supersonic aircraft fire detection using coherent fiber bundles
06 p0926 A69-17679

Boron carbide body armor fabrication by hot pressing in graphite molds
08 p1320 A69-20411

Business aircraft injury protection and impact survival design considerations, stressing upper torso restraint installations
[SAE PAPER 690335] 11 p1829 A69-24493

Aviation pathology in aircraft accident investigation of accident survivability features and accident precipitation factors, noting cockpit structures and protective equipment
12 p2021 A69-25841

Detonation system for exploding missile warheads, discussing trigger detonation and safety release elements
17 p3050 A69-33698

Mechanical vibration effects on human body in industry and in terrestrial, aerial and nautical vehicles, discussing harmful frequencies and safety measures
19 p3259 A69-35605

Optimized flight crew training, evaluating safety, flight simulator efficiency, takeoff/landing practice and line experience based on test results
[AIAA PAPER 69-771] 19 p3245 A69-35653

Safety disk strength under static lateral pressure from rupture studies of thin circular plates under static and pulsating lateral pressure
19 p3434 A69-35773

Descent device for emergency egress from jumbo jets based on centrifugal brake, including test data on C-5 fuselage section
19 p3255 A69-36146

SAFETY FACTORS

Rocket propellant safety, discussing thermal, mechanical and impact sensitivity tests of solid and liquid propellants
02 p0302 A69-11525

Safety problems of jumbo jet airbus and SST, discussing operational safety procedures and techniques
03 p0365 A69-12882

Industrial and workman safety concept evolution, discussing role in product design engineering
[SAE PAPER 680676] 03 p0433 A69-13449

Safety planning for use of reactive cryogenics in large volume, noting FLOX and liquid fluorine
04 p0645 A69-14468

JP-4 fuel emulsions properties, handling characteristics and safety performance, noting satisfactory shelf life and thermal stability
[ASME PAPER 68-GT-24] 06 p0982 A69-17190

Fatigue strength and aircraft structural standards based on experimentally determined safety factors
09 p1619 A69-22571

Safety requirements of test ranges, considering RF hazards to electroexplosive devices
10 p1751 A69-23019

Damage thresholds to ocular tissues from laser radiation, presenting comparative theoretical curves and recommended safe working levels
18 p3097 A69-34312

Computerized system-safety fault trees, discussing drawing, configuration control and simulation program
19 p3280 A69-36029

Composite laminated glass structures employed to improve safety characteristics of glass or to achieve special optical properties
21 p3752 A69-38934

Engine powered lift civil aircraft certification factors taking into account traffic growth, accident rates, learning rate and acceptable safety level
22 p3862 A69-39962

Laser safety factors in open air applications, discussing pulse length, energy spatial distribution, atmospheric attenuation, human eye sensitivity, etc
22 p3892 A69-40241

Fatigue collapse probability of fail-safe structure compared to safety factor design
22 p4045 A69-40820

Statistics of jet aircraft accidents including worldwide data and safety trends
22 p4054 A69-41128

Safety standards for DC 10 aircraft, considering cockpit design, hydraulic, electric power, autoland and direct lift control systems, structural safety and crash worthiness
22 p3867 A69-41133

Safety implications of technological developments in aviation, discussing standards and statistical data for supersonic transports and jumbo jets
22 p3867 A69-41134

B-747 safety assurance program, discussing organization, management, hazard sources, accident statistics, night visual approach and maintainability
22 p3867 A69-41135

Boeing 747 safety engineering program, discussing organization, design review, system safety, systems design-analysis and tests
22 p4054 A69-41136

Systems safety for unmanned spacecraft, considering power supply, equipment operation, trajectory correction, etc
[AAS PAPER 69-520] 24 p4392 A69-42849

Management system for safety in NASA Manned Space Flight Program, discussing hazard analyses and reduction precedence sequence
[AAS PAPER 69-522] 24 p4418 A69-42851

Flammability control for aerospace avionics systems safety, considering risk, test method, acceptability criteria, confidence level and ignition source
24 p4336 A69-43422

SAFETY HAZARDS

U HAZARDS

SAGITTARIUS CONSTELLATION

Lunar occultations of radio source Sagittarius A observed at various frequencies between 230 and 2400 MHz, obtaining diameter, position and decimeter band flux densities
06 p1009 A69-17960

Electron temperatures and internal turbulence in H II regions of Sagittarius arm measured by high resolution interference method
08 p1392 A69-20566

Low energy X ray spectra of Sco X-1 and Sagittarius sources measured by Be and Al window proportional counters during rocket flight
09 p1574 A69-21460

Further microwave emission lines and ammonia clouds in Sagittarius region, tabulating relevant transitions in ammonia and water
09 p1597 A69-22150

Polarization changes of R Coronae Borealis Star RY Sagittarii, tabulating percentage polarization and position angles
09 p1603 A69-22265

High energy X ray observational data for Sagittarius sources scanned by active telescope during February 1968 balloon flight
09 p1583 A69-22764

Sagittarius A occultation by moon, determining peak brightness and flux density of radio source
11 p1958 A69-24592

Milky Way structure, discussing dust bridge and density of absorbing matter between spiral arms of Sagittarius and Carina Cygnus
15 p2683 A69-30514

Star counts in Ophiuchus nebula darkened region /Scorpius/Ophiuchus/ and in comparison fields Corona Australis and Sagittarius
20 p3604 A69-37788

High energy gamma rays point source in Sagittarius indicated from evidence obtained by high altitude balloon flights
24 p4365 A69-42606

Nebulosity around FG Sagittae for origin and evolution of planetary nebulae, suggesting ejection of nebular shell
24 p4381 A69-42887

SAHA EQUATIONS

Argon plasma composition in Saha equilibrium, using FORTRAN 4 program
07 p1193 A69-19168

Electron concentration in low temperature nonequilibrium steady state plasma, including Saha equation applicability criterion
15 p2662 A69-30975

SAILPLANES

U GLIDERS

SAILS

NT SOLAR SAILS

Flutter vibration of sails fixed along edge and single wing weather vanes in supersonic flows
02 p0192 A69-12824

Passive attitude stabilization of interplanetary probe, using conically shaped sails elastically connected to payload
17 p3047 A69-33225

Aerodynamic characteristics of two dimensional nonexpandable flexible sail in hypersonic inviscid flow, discussing roles of sail length and chord and angle of attack
19 p3237 A69-35814

SAINT VENANT PRINCIPLE

Rectangular thin beam Saint Venant deflection in case of moment stresses based on elasticity and shell theory
05 p0834 A69-15783

Axisymmetric elastoplastic bending theory for cylindrical shell by applying Saint Venant plasticity conditions, determining stress distribution
08 p1419 A69-21179

Bar flexure determination for Saint Venant torsional and transverse loading, solving differential equations by finite element methods
09 p1614 A69-21722

Saint Venant torsion and flexure of prismatic bars analysis in polar coordinates, discussing boundary errors
09 p1621 A69-22770

Analytical expressions for Gaussian constraint of continuum, using continuity conditions as equations of internal geometric couplings
11 p1984 A69-25170

Rectangular thin beam Saint Venant deflection in case of moment stresses based on elasticity and shell theory
18 p3223 A69-35035

Saint Venant torsion problem using rederivation of integral equation by transferring external geometrical problem into internal static problem

21 p3836 A69-39003

Saint Venant principle of elastic equivalence of kinematically equivalent displacement systems at small surface area of elastic body

22 p4048 A69-41276

SALT BATHS

Cotton leaves reflectivity and transmittance measurements, discussing substrate salinity effects on internal structure of hydroponically grown plants

15 p2558 A69-30456

Salt bath brazing for honeycomb structures, describing brazing techniques for thorium dispersed Ni and NiCr, Rene 41 and Ti honeycomb panels

19 p3320 A69-35557

Ti-Al-V sheets quenched from alpha plus beta field into salt bath at various high temperatures, studying effects of bath temperature and holding time on aging and mechanical properties

21 p3730 A69-38667

Hot salt stress corrosion of Ti alloy, discussing hydrogen generation during elevated temperature exposure and embrittlement as manifestation of strain rate

21 p3747 A69-39434

Forged corrosion in aqueous salt environment at various temperatures in unstressed and stressed conditions, considering Be usability in turbomachinery

21 p3749 A69-39493

SALT SPRAY TESTS

Titanium alloys hot salt stress corrosion cracking, studying effects of chlorides and surface oxides

19 p3352 A69-36905

Burner rig hot corrosion test facility for evaluating Ni-Co alloys used in gas turbine engines operating in marine environment

22 p3928 A69-40673

SALTS

Salts and organic solvents effect on halophile Halobacterium cutirubrum catalase, noting enzyme activity inhibition by cation and anion

18 p3096 A69-35291

Electron transport chain of monovalent and divalent cations and of polyamines, studying effects on menadione reductase activity to determine salt dependence

22 p3886 A69-41077

SAMARIUM

Magnetic and semiconducting properties of samarium boride, noting effect of decreasing temperature

07 p1200 A69-19403

Fluorite crystal laser activated by divalent samarium, discussing characteristics in pulsed operation mode

14 p2458 A69-29328

SAMARIUM COMPOUNDS

High temperature research on systems formed by zirconium dioxide with samarium and gadolinium sesquioxides near melting point

01 p0101 A69-10044

SAMPLED DATA

U DATA SAMPLING

SAMPLED DATA SYSTEMS

U DATA SAMPLING

SAMPLERS

Miniaturized adding sample and hold device with adjustable delay applied to digital filters

04 p0574 A69-14350

Modeling requirements and methods for monitoring microbial contamination, discussing vacuum probe sampler to recover microorganisms from large surface areas

05 p0713 A69-15948

Supersonic molecular beam sampling system for coupling mass spectrometer to alkali metal-air reacting flow system in kinetics study, noting gas dynamic effects

[AIAA PAPER 69-94] 06 p0930 A69-18099

Surveyor scientific instruments and operation on moon, reviewing TV camera, alpha scattering instrument and surface sampler

[JPL-TR-32-1358] 08 p1312 A69-19850

Sample changer for metal fatigue studies under ultrahigh vacuum conditions, noting successive testing in same vacuum

08 p1302 A69-20877

Bulk, selective particulate and hard rock samplers for landed extraterrestrial geological and biological instruments performing on-site analysis

23 p4146 A69-41620

Leak detection techniques efficiency determined for airtight atmospheric air sampling devices used at low pressure and concentration

24 p4296 A69-42656

SAMPLES

Recursive algorithms for pattern classification using misclassified samples

06 p0891 A69-17357

Apollo lunar sample collection and analysis, discussing astronauts activity and equipment, sample types, laboratories for radioactive counting and gas analysis, etc

22 p3919 A69-40191

SAMPLING

NT AIR SAMPLING
NT DATA SAMPLING
NT RANDOM SAMPLING

Meteoritic extraterrestrial materials sampling for chemical, petrographic and metallurgical analyses, discussing microstructure and optimum specimen weight for representative analysis

[UN PAPER 68-95381] 01 p0150 A69-10480

Oscilloscope display of sample of subnanosecond light pulse, using optical analog of electronic sampling oscilloscope

02 p0259 A69-12656

Microbiological surface sampling methods, noting role in detecting contamination on eating utensils, blankets, sheets, etc

05 p0715 A69-15982

Direct bead sampling by aspiration of molten metal in open hearth furnaces and converters

07 p1141 A69-19341

Single sideband modulation theory explained by sum representation of sampling theorem, comparing different signal generating methods

09 p1456 A69-22290

Upper bounds for increment of band limited signal in sampling interval by increasing integral expressions of increment

11 p1834 A69-24551

Distribution function of multiple correlation coefficient for various sampling volumes and various numbers of predictors calculated using Fisher formula

13 p2293 A69-27843

Electronic component life test sampling plans based on lognormal distribution and instantaneous failure rate or hazard rate criterion

15 p2630 A69-31137

SAMPLING DEVICES

U SAMPLERS

SAN MARCO SATELLITE

San Marco project, discussing Italian Space Commission and NASA cooperation, equatorial range concept and development

[UN PAPER 68-95862] 01 p0180 A69-10518

SAN MARCO 2 SATELLITE

Long range HF propagation in equatorial zone observed with San Marco 2 satellite, discussing overall conditions of ionosphere

08 p1276 A69-20593

F region atmospheric density measurements obtained from aerodynamic drag on San Marco 2 satellite in equatorial orbit, comparing data with San Marco 1

21 p3704 A69-38369

Direct detection of ionospheric irregularity by device onboard San Marco satellite, utilizing antenna impedance fluctuations

21 p3715 A69-38562

SANDS

Sand ridge origin and dynamical setting, discussing morphology-tidal current system equilibrium indicated by theory and field measurements

15 p2596 A69-30443

SANDSTONES

Geochemistry and element abundances for Henbury impact glass, Darwin glass and australites, noting evidence for meteorite impact on sandstone

08 p1407 A69-20937

SANDWICH PLATES

U PLATES [STRUCTURAL MEMBERS]

SANDWICH STRUCTURES

Multifrequency three layer sandwich radomes design for reflectionless sandwich at second frequency

01 p0034 A69-11037

Deflection of orthotropic sandwich plates with unequal facing thickness with edges subjected to uniform and concentrated loading

01 p0172 A69-11270

Silicon nitride gate insulator in metal-insulator-silicon (MIS) devices, noting sandwich structures with thermally grown oxides removes limitations

02 p0299 A69-12244

Aluminum plastic sandwich products production costs compatibility with conventional materials

02 p0348 A69-12749

Sandwich panel construction, examining design with respect to panel size, thickness and weight limit

03 p0524 A69-13124

Fokker bond tester and structural details of different types of sandwich structure, giving attention to adhesive bonding of panels, adhesive application, etc

03 p0434 A69-13791

Low temperature conductance peaks observed in tunneling measurements on aluminum-phosphosilicate glass-degenerate silicon sandwich structures

03 p0493 A69-14183

Bending theory for sandwich plates with layers having different elastic properties using asymptotic integration of three dimensional equations

04 p0684 A69-15534

Five layer thin film band elimination filters amplitude and phase frequency characteristics

05 p0729 A69-16088

Glow discharge technique for dielectric layer deposition between metal interconnection patterns in multilayer integrated circuits, noting adhesion and feedthrough problems

06 p0931 A69-17201

Three layer structure theory, discussing thin elastic sandwich shells with middle layer susceptible to transverse shear

06 p1025 A69-17615

Anodizing effect on flexural properties of Al-aluminum oxide sandwich composites, emphasizing properties of oxide coatings as function of thickness

07 p1159 A69-18723

Symmetrical three layer A and B type sandwich reflectionless radomes design for multifrequency operation and insertion phase delay

07 p1110 A69-19522

Dielectric radome designs for operation at harmonically unrelated frequencies in C and K bands, discussing sandwich structure of A and B types

07 p1110 A69-19523

Paper-honeycomb sandwich radome structure for protecting monopulse UHF radar antennas used in BMEWS

07 p1111 A69-19537

Spherical sandwich radomes designs, discussing aerodynamic loads, wind pressure effect, electrical properties and mountings

07 p1112 A69-19538

Fabrication and processing techniques, tooling concepts and quality control for composite materials used in large aircraft, discussing honeycomb and sandwich structures

[ASM PAPER D8-25.4] 07 p1172 A69-19670

Helicopter rotor blades in metal sandwich bonding, discussing component parts assembly by adhesive films

07 p1143 A69-19731

Finite aspect ratio sandwich plates flutter in supersonic gas flow analyzed by differential equation describing plates elastic equilibrium

08 p1412 A69-20324

Variational method for safety limits of perfectly plastic simply supported conical sandwich shells subjected to uniform internal pressure and obeying Mises yield criterion

08 p1416 A69-20702

Optimal design of circular cylindrical sandwich shells under pressure and shear loads, showing acceptability of small shear coefficient values

08 p1416 A69-20722

Minimum weight plastic design of circular and annular sandwich plates with piecewise constant cross section, discussing cost reduction

08 p1417 A69-20823

Governing equations for bending of fixed isotropic circular sandwich plate subjected to eccentric concentrated load

09 p1615 A69-21926

Buckling of cylindrical and conical sandwich shells with fiberglass/epoxy facings and aluminum honeycomb cores

[AIAA PAPER 68-294] 09 p1616 A69-21942

Quality control tests for adhesives used in structural parts including ultrasonic and nondestructive tests

09 p1513 A69-22564

Histogram approximation of plastic deformation of metals, analyzing tube under internal load and sandwiched layer compression

10 p1793 A69-22850

Schleicher glider AS-W15 prototype tests, discussing balsa sandwich structure and flight characteristics

10 p1633 A69-22872

Numerical analysis of natural oscillations of three layer sandwich plates of rectangular planform, considering end conditions

11 p1976 A69-24773

Stress concentration around curvilinear holes in three layer spherical and cylindrical isotropic shells with hard and soft fillers under external loads

11 p1984 A69-25171

Book on statics and dynamics of anisotropic and heterogeneous elastic structures covering thin heterogeneous anisotropic panels, elastic and sandwich plates, etc

11 p1986 A69-25236

Metal bonded and sandwich structures application to space vehicles, launch vehicles, rocket motors, ground equipment and balloon gondolas, noting inspection methods

12 p2101 A69-25859

Finite deflection discrete element analysis of sandwich plates and cylindrical shells with unbalanced laminated faces

12 p2185 A69-26821

Fabrication, machining and contouring of boron-epoxy composite for sandwich type aircraft structure, noting F-5 supersonic fighter main landing gear strut door

12 p2103 A69-26826

Diffusion bonded Ti honeycomb sandwich, demonstrating structural integrity, efficiency, low weight and cost effectiveness

12 p2115 A69-26828

Minimum volume face sheet design of circular cylindrical sandwich shell obeying Mises yield criterion for loads transverse to lateral surface and axisymmetric

12 p2189 A69-27117

Local failure of axially loaded plastic foam core sandwich panels, using face wrinkling analysis procedures

13 p2357 A69-27207

Resistivity, capacitance and dielectric loss measurements for diode reactive sputtering grown AlN films and film sandwich structures of Ta, Au and Al films

13 p2322 A69-28013

Elastic deformations of spherical sandwich shell of rigidly connected isotropic homogeneous layers, describing shell symmetrical expansion and inversion under stresses

15 p2707 A69-30582

Vibration control by alternate layers of high damping viscoelastic material, discussing damping and loss factors, beams design and attachment

15 p2622 A69-30704

Vibrations attenuation by viscoelastic sandwich shear damping, discussing examples of aircraft equipment racks, gyro and airborne circuit board mountings

15 p2622 A69-30705

Linear bending theory of elastic anisotropic sandwich plates with strong and weak cores

15 p2713 A69-31025

Bending theory for two layer plate made of isotropic material under sinusoidal load obtained by elasticity and classical theory based methods

15 p2714 A69-31198

Bending method for unfolded honeycomb cores shaping for curvilinear sandwich structures

16 p2794 A69-32006

Forced oscillations of three layer plate used as vibration dampers for engine components

16 p2873 A69-32143

Roll-up solar array based on erection of planar sandwich structure from two rolled constituent halves

16 p2762 A69-32559

Transverse bending of asymmetric sandwich plates with rigid filler taking into account stresses and strains in filler

17 p3055 A69-33129

Finite aspect ratio sandwich plates flutter in supersonic gas flow analyzed by differential equation describing plates elastic equilibrium

17 p3058 A69-33317

Elastic sandwich structures design for maximum strength, using potential energy functional to derive governing equations

17 p3062 A69-33708

Damping constant of sandwich samples with foam plastic filler subjected to torsional and flexural vibrations determined for aircraft design applications

17 p2993 A69-33942

Axisymmetrical vibration characteristics of circular sandwich shell with viscoelastic core layer analyzed via differential equation to obtain frequency equation and composite loss factors

18 p3211 A69-34327

Sandwich beams optimal design determined for case of constraint on elastic deflection and for load factor at plastic collapse

18 p3218 A69-34623

Photoelastic materials stressed state analysis by inserting analyzer and polarizer into sandwich medium, obtaining polarized light field

18 p3138 A69-35152

Elastic stability of sandwich materials in microvolume under compressive force analyzed using three dimensional linearized equations for small subcritical strains

18 p3226 A69-35374

Diffusion bonded Ti honeycomb sandwich, discussing production, structural efficiency, high strength/weight ratio, etc

19 p3320 A69-35558

Adhesive bonding of Al sheets for honeycomb sandwich material, using electrical conductivity to measure sheets age hardening progress during high temperature curing

19 p3321 A69-35565

Strength analysis of three layer rectangular plates under complex load and support distributions

19 p3434 A69-35827

Transverse oscillations of shallow multilayer shells, using tangential-stress distribution law in determining natural oscillation frequencies in single and sandwich layer panels

19 p3435 A69-35842

Book on structural sandwich panels analysis and design covering beams and struts, bending theory, buckling, strain energy use, differential equations, etc

19 p3438 A69-36380

Vibration response approximation of three layer sandwich beam with nonlinear viscoelastic material core during flexural vibrations

20 p3619 A69-36910

Fusion welding for thin gauge corrugated core sandwich airframe structures capable of operating at high temperature, discussing equipment, techniques and quality control [SBAC PAPER 9]

20 p3549 A69-37448

Optimal plastic design of circular sandwich ring assuming symmetric loading, minimum plastic resistance and cost justification of stronger cross section

20 p3625 A69-37590

Soviet book on shell and thin walled structure calculation methods covering stability and stress analysis, reinforced and sandwich shells, etc

20 p3630 A69-38199

Stability of sandwich panel strip with lightweight core, formulating problem in terms of equilibrium conditions and potential energy of system

21 p3832 A69-38417

Multilayer sandwich panels containing unequal facings with distinct orthotropic cores, calculating dynamic load and stability of triangular panels

21 p3832 A69-38418

Stress concentration near holes in three layer spherical shells, determining boundary conditions at hole perimeters for various loads

21 p3833 A69-38570

Ti honeycomb sandwich panels, comparing properties of Ti and Al based brazing alloys

21 p3730 A69-38665

Composite or sandwich construction design based on employing all available materials and setting up requirements for mechanical and physical properties

21 p3836 A69-38935

Sandwich beams interlaminar shear stress calculations, considering roles of moduli of elasticity and layers thickness relative to beam

22 p4041 A69-40080

Nonlinear differential equations for large deflections of multisandwich shells of arbitrary shape built of stiff and weak elastic layers, considering cylindrical shells

23 p4226 A69-41572

Truncated conical sandwich shell suspended in free condition measured and analyzed for vibrational characteristics

23 p4235 A69-42462

Three layered circular plate under harmonic excitation, analyzing forced vibrational characteristics by variational principle and Ritz method

23 p4236 A69-42495

Heated three layer plates stability under finite deflections in supersonic gas flow, deriving aerothermoelasticity equations

24 p4395 A69-42590

Three layer plate transverse bending in linear presentation, reducing problem to two displacement functions determination

24 p4395 A69-42594

Shallow spherical sandwich shells critical buckling loads using differential pressure method

24 p4396 A69-42734

Si integrated circuits single and composite layered metallization systems, comparing characteristics of various refractory and noble metals

24 p4286 A69-42761

Transverse acoustic wave excitation of elastic circular cylindrical sandwich shell submerged in infinite fluid medium, describing simultaneous equations development for modal response [ASME PAPER 69-APMW-17]

24 p4401 A69-43100

Damage repair techniques of polyimide honeycomb sandwich panels constructed with polyimide and Ti face sheets, using precured plugs, prepreg disks, sealants, etc

24 p4323 A69-43420

Concorde elevons sandwich construction to meet sonic environment, discussing core, adhesive, design and fabrication

24 p4403 A69-43429

Metallurgical and structural production of diffusion bonded titanium honeycomb sandwich panels for aerospace hardware weight saving

24 p4324 A69-43434

Al brazed Ti honeycomb sandwich structures brazed in vacuum and Ar, analyzing mechanical properties and corrosion resistance as functions of temperature and pressure

24 p4324 A69-43435

SST range-payload improvement by emphasizing Ti alloys honeycomb and trusscore sandwich panels fabrication for structural boxes in wing and empennage

24 p4324 A69-43436

Orthotropic fiberglass/epoxy faced honeycomb aircraft type sandwich structure elastic properties by edgewise compression test

24 p4403 A69-43443

F-111 sandwich structure adhesive joints gluelines, describing thickness measurement techniques and acceptance criteria

24 p4403 A69-43461

Adhesive bonded joints for glass resin composite sandwich helicopter structures, describing aircraft applications

24 p4403 A69-43462

Welded honeycomb sandwich structures of Ti, steel and similar materials for use in extreme thermal and acoustical environments [AIAA PAPER 68-973]

24 p4326 A69-43716

SAPPHIRE

Sapphire whisker reinforced aluminum composites fabrication and evaluation

06 p0939 A69-16942

Maser amplification of 9.5 GHz longitudinal elastic waves in divalent nickel impurity ions doped sapphire by stimulated emission from inverted spin population

16 p2795 A69-31554

SARCOMA

U CANCER

SATAN [SENSOR]

U SENSORS

U TERRAIN ANALYSIS

SATELLITE ANTENNAS

Ariel 3 receiver for measuring galactic noise spectrum, discussing loop antenna use with swept receiver, false terrestrial signals, etc

03 p0404 A69-13581

Electronic counterrotating antennas, developing turning model of antenna group of telecommunications satellite

04 p0578 A69-15065

Homogeneous fused silica and quartz reinforced resins as dielectric materials for reentry vehicle antenna windows

07 p1090 A69-18400

Miniature current discontinuity antennas for VHF and UHF, describing airborne electronically steerable array exhibiting efficiency and minimum structural disturbance

07 p1105 A69-19111

Monopole antenna behavior over grounded metal hemisphere, noting application to spacecraft and broadcasting antennas erected on hill

08 p1282 A69-20040

Counterrotating antenna for spin stabilized satellite, noting linear phase shift influence on radiation pattern

08 p1289 A69-20968

Electronically phased array antenna system design optimization and testing for application to spin stabilized satellites

08 p1289 A69-20969

Self focusing linear array for communication satellites, evaluating reradiated field taking into account mutual coupling between elements

08 p1289 A69-20970

Large aperture satellite communication antenna gain measurement technique, using extraterrestrial radio wave source or satellite

09 p1456 A69-22116

Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit

11 p1994 A69-25534

Antenna systems design for ISIS-A scientific satellite, discussing antenna array of 13 radiators for telemetry, command, beacon and experimental purposes

17 p2918 A69-33030

Bearing system for mechanically despun antenna in spin stabilized communications satellite, offering greater directional stability, lower weight and power losses

17 p2978 A69-33431

Phased arrays applied to inertialess electronic steering of satellite antennas, discussing digitally steered, retrodirective and hybrid matrix arrays

17 p2942 A69-34083

OGO-F electric and electromagnetic fields measurement for ionosphere using dipole antenna, emphasizing broadband observation covering whistler mode waves

19 p3284 A69-36677

Explorer 20 satellite for obtaining fixed frequency pulse soundings of ionospheric topside, discussing transceiver-dipole antenna instrumentation and payload

20 p3618 A69-37857

Alouette spacecraft design and dynamics emphasizing antenna characteristics

20 p3618 A69-37858

Direct detection of ionospheric irregularity by device onboard San Marco satellite, utilizing antenna impedance fluctuations

21 p3715 A69-38562

Radio Astronomy Explorer satellite boom deployment method resulting in gravity gradient capture, emphasizing role of predeployment attitude and antenna Vee angle

[AIAA PAPER 69-920]

21 p3821 A69-39350

Intelsat 3 communications satellite mechanically despun high gain directive antenna, discussing system, control electronics, design and performance

22 p3913 A69-40691

ATS 3 mechanically despun communications antenna, using parabolic cylindrical reflectors, in-line feed and vernier type stepping motor drive positioning

22 p3913 A69-40692

Multifunction lightweight antenna system package for spin stabilized near synchronous satellite having axis normal to orbital plane

22 p3913 A69-40694

Circularly polarized VHF antenna systems for spin stabilized satellites, discussing design and performance test results

22 p3913 A69-40695

Aperture efficiency, weight and control power requirements for hybrid matrix arrays in synchronous satellite applications, calculating residual array gains

22 p3915 A69-40707

Frequency diversity technique simplifying airborne antennas for UHF telemetry, useful on spin stabilized vehicles requiring omnidirectional antenna coverage

23 p4122 A69-41777

Communication subsystem design of Defense Communication Satellite Program /DCSP/ for background information, noting repeater with toroidal pattern antenna

23 p4131 A69-42537

SATELLITE ATTITUDE CONTROL

Subsystems of ESRO research satellites Td 1 and Td 2, discussing telecommunication, attitude control, power supply and temperature control design and functions

01 p0160 A69-10031
